The export of grain and of other products has suffered very considerably in consequence of the inefficiency of the railway service, and vast quantities of grain are to be seen at the various stations inland exposed to the elements awaiting transport to the riverain ports. For the same reason the dock at Galatz has been and still is in a dangerously congested condition. It has been found impossible to deal with the cargoes of vessels which have arrived. The storage capacity of the dock in question has been found to be totally inadequate to give cover to goods landed with the consequence that merchandise of high value has been dumped on the quay side and left exposed to the mercy of the elements in pools of muddy water. The congestion has been so great that the authorities have been compelled to refuse reception of the parcel post arriving by steamer from the United Kingdom and the United States of America. It is understood that an agreement has been entered into by the Government of Roumania for the extension of the warehousing capacity of the Galatz dock, and that greater facilities will be available during 1921.

River transport has shown a decided improvement during the year both as to passenger and goods traffic. The spectacle of large numbers of tugs and lighters help up for want of repairs, as during 1919, is not so prevalent, and quite an appreciable amount of traffic has been observable.

## FORTHCOMING SAILINGS.

*The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parentheses* :—

*Anchor Line.*—S.s. Castalia for Bombay (Liverpool, September 15).

*Anchor-Brocklebank Line.*—S.s. Malakuta for Port Said, Colombo, Madras, and Calcutta (London, September 10); s.s. Manipur for Calcutta (Birkenhead, September 10); s.s. Stockwell for Port Said, Colombo, Madras, and Calcutta (London, September 14); s.s. Mathura for Calcutta (London, September 24).

*Bibby Line.*—S.s. Herefordshire for Marseilles, Port Said, Colombo, and Rangoon (Liverpool, September 14.

*Clan Line.*—S.s. Clan Urquhart for Bombay and Persian Gulf (Birkenhead, September 3); s.s. Clan Matheson for Colombo, Madras, and Calcutta (Birkenhead, September 8).

*Cunard Line.*—S.s. Sea Glory for Gibraltar, Malta, Piraeus, Constantinople and Galatz (London September 15); s.s. Tyria for Algiers, Malta, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Novorossisk, Odessa, and Batoum (Liverpool, September 24).

*Ellerman Line.*—S.s. Grodno for Gibraltar, Malta, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, and Varna (Liverpool, September 3); s.s. Falernian for Gibraltar, Malta, and Alexandria (Lverpool, September 10).

*Ellerman's "City" Line.*—S.s. City of Cairo for Calcutta (Birkenhead, September 6); s.s. City of Calcutta for Calcutta (Birkenhead, September 19); s.s. City of Manila for Calcutta (Birkenhead, October 3).

*Ellerman's Hall Line.*—S.s. Kandahar for Bombay (Liverpool, September 13).

*Ellerman's Westcott and Laurance Line.*—Steamers sail fortnightly for Mediterranean, Egypt, and Levant ports.

*Glen Line.*—S.s. Gleniffer for Port Said, Port Swettenham, Singapore, etc. (London, September 8); s.s. Glengyle for Port Said, Port Swettenham, Singapore, etc. (London, September 22); s.s. Glenogle for Port Said, Port Swettenham, Singapore, etc. (London, October 6).

*Harrison Line.*—S.s. Explorer for Calcutta (Liverpool, September 15.)

*Henderson Line.*—S.s. Martaban for Port Said, and Rangoon (Birkenhead, September 7).

**ANCHOR LINE**

**First-Class Passengers only.**

**LIVERPOOL TO BOMBAY.**

**KARACHI via Bombay calling at Gibraltar & Egypt**

LARGE STEAMSHIPS. UPPER DECK CABINS.
FITTED WITH ELECTRIC FANS.
RECOGNISED BY INDIAN GOVERNMENT.

PASSENGER SAILING DATES—
CASTALIA, SEPTEMBER, 15;
MASSILIA, OCTOBER 4,
ELYSIA, OCTOBER, 19,
CIRCASSIA, NOVEMBER, 2,
OLYMPIA, NOVEMBER 18.

**Anchor Line (Henderson Brothers), Ltd.,**
16, Gracechurch Street, London, E.C.3.

**Travellers to the Near East**

Can obtain all information as to the journey from Continental Traffic Department, Victoria Station (S. E. & C. R.), S.W.1:

*Holt Line.*—S.s. Machaon for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, September 8).

*Johnston Line.*—S.s. Pomaron for Galatz and Braila (Liverpool, September, 14).

*Moss Line.*—S.s. Assiout for Gibraltar, Algiers, Malta, and Alexandria, (Liverpool, September 3); s.s. Siptah for Gibraltar, Algiers, Malta, Syra, Piraeus, Smyrna, Salonika, Constantinople, Bourgas, Varna, Constantza, and Sulina (Liverpool, September 10).

*Papayanni Line.*—S.s. Belgravian for Algiers, Malta, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, and Varna (Liverpool, September 10).

*P. and O. Line.*—S.s. Morea for Bombay (London, September 9); s.s. Nore for Colombo, Madras, and Calcutta (taking cargo for Gibraltar, Port Said and Aden; also (with transhipment at Bombay) for Indian Coast and Persian Gulf ports, (London, September 9); s.s. Delta for Bombay (taking cargo for Gibraltar, Port Said, and Aden; also (with transhipment at Bombay) for Indian Coast and Persian Gulf ports). (London, September 16); s.s. Padua for Colombo, Madras, and Calcutta (taking cargo for Malta, Port Said, and Aden), (London, September 24).

*P. and O. British India Line.*—S.s. Hatarana for Bombay and Karachi (taking cargo for Persian Gulf and Malabar Coast ports) (London, September 3); s.s. Nardana for Colombo, Madras, and Calcutta (taking cargo for Port Said, Suez, and Aden) (London, September 3); s.s. Mundra for Colombo, Madras, and Calcutta (taking cargo for Port Said, Suez, and Aden) (London, September 17); s.s. Mandala for Bombay and Karachi (taking cargo for Persian Gulf and Malabar Coast ports) (London, September, 23); s.s. Morvada for Colombo, Madras, and Calcutta (taking cargo for Port Said, Suez, and Aden) London, September 30).

*Prince Line.*—S.s. Soldier Prince for Tunis, Malta and Alexandria (Manchester, September 2).

## OIL NOTES AND NEWS.

### Roumanian Oil in 1920.

The report on the economic conditions in Roumania in 1920 of Mr. Alexander Adams includes a report on the Roumanian oil industry by Mr. Louis Johnston, from which we quote the following:—

The records for the year 1920 show an amelioration of the 1919 situation, but not to any extent and certainly not sufficient to afford satisfaction to the Roumanians. During 1920 there have been continuous complaints about the lack of transport facilities, locomotives and tank cars, the unreliability of pipelines, inadequate storage, the costliness of material, the irregular electric supply on the fields, the ridiculously low maximum prices on oil for inland consumption, and the prohibitive taxes on oil for export. Yet in 1920 Roumania produced 1,034,123 tons of crude from 500 odd wells—113,686 tons more than in 1919 from about the same number of wells and more than the half of the record 1913 production of 1,885,619 tons from 944 producing wells. It must be remembered that the 1920 producing wells are for the most part restored damaged wells. Considering that practically all the oil wells and all the then existing field equipment was destroyed in December, 1916; and that it had taken 60 years to build up the equipment that brought forth the pre-war 5,000 tons per day from nearly 1,000 wells, it would be astonishing if that quantity were regained within 4 years after destruction, during two years of which the Germans occupied the territory.

Roumanian oil finance has undergone a remarkable war change. The capital that was invested in it in 1919 was 540,000,000 lei. In December, 1920, the capital invested stood at 1,326,000,000, for in 1920 a large number of companies increased their capitals, and many new companies were formed, including two British. In the capitals quoted above are not included a number of companies, nearly all British, that were apparently formed to exploit Roumanian oil land, but do not appear to have expended any money in the country.

In conclusion, in 1920 the Roumanians feared that the almost complete cessation of drilling for the various causes mentioned would be disastrous. Roumanians consider they have lost five years' drilling, and they know they cannot command such gushers as had been enjoyed in 1920. They are very anxious to see the fields in such activity that the production would not only be maintained, but that they will recover the pre-war 5,000 tons a day and more besides. A well-known Roumanian authority on oil matters was of opinion in July that 150,000 metres should be drilled yearly for the next four years in order to make sure of the pre-war production, that each metre would cost 6,640 lei (as against 411 lei pre-war price), or a total of 1,000,000,000 lei. But it is to be observed that a much greater production has been obtained in 1920 from the few new wells, for most of the 500 that produced in 1920 were old wells that had been repaired. This is natural, because the 1920 explorer has the benefit of sixty years' Roumanian geological and drilling experience behind him, and Roumania will get 5,000 tons a day with only a fraction of the 500 wells that she is now short of.

Our Bucharest Correspondent states (August 17):—The s.s. Venus from Dunkerque is expected to arrive soon to load part of the wheat sold to the French syndicate.

A series of lectures on the economic use of oil for power purposes has been arranged by the Institute of Marine Engineers during the Shipping, Engineering, and Machinery Exhibition at Olympia.

## TENDERS INVITED.

**India.**

Steel axles, etc.—The South Indian Railway Company invites tenders for the supply of (1) steel axles; steel boiler tubes; and (3) steel tyres. (Spec., £1 each) September 7.

Galvanised corrugated sheets, etc.—The East Indian Railway Company invites tenders for the supply of (1) Galvanised Corrugated Sheets; (2) Metallic Filament Lamps; (3) Steel Flat-footed and Double-headed Rails; (4) Steel Material; (5) Wrought Iron; (6) Pig Iron. (Spec. £1 1s. each). September 7.

Rolled Material for Wagons, etc.—The Bombay, Baroda and Central India Railway Company invites tenders for the supply of (1) Rolled Material for Wagons; (2) Wheels and Axles for Wagons; (3) Helical Springs; (4) Spring Steel; and (5) Acccumulator Supplies. (Spec. 1 and 2, £1, 3, 4 and 5, 10s.each. September 9.

Steel Rails, etc.—The Nizam's Guaranteed State Railways Company invites tenders for the supply of (1) 13,170 steel 85 lb F.F. rails in 39 ft. 6 in. lengths and 841 in 39 ft, lengths, with 14,361 pairs of fishplates; and (2) 58.900 steel fishbolts, etc. (Spec. 10s. each). September 9.

Steel Fishbolts, etc.—The Madras and Southern Mahratta Railway Company invites tenders for the supply of 67,070 Steel Fishbolts, Nuts and Washers. (Spec. £1 1s.). September 13.

Cast-iron Pipes.—The Madras Corporation invites tenders for the supply of Cast-iron Pipes, Special Castings, Sluice Valves, etc. (Spec., 5s., Messrs. Mansergh and Sons, 5, Victoria-street, S.W.1.) October 31.

**Malta.**

Electricity Meters.—The Government of Malta invites tenders for the supply of Single-phase Electricity Meters. (Part Crown Agents for the Colonies, 4, Millbank, S.W.1.) September 15

# Near East Markets.

## LONDON PRODUCE REPORT.

Dried Fruit.—Business has been fairly brisk during the week. Currants have been taken up well, especially Vostizzas. Supplies of Persian Dates are very small, and prices have hardened. Smyrna sultanas have been a weak feature, there being a substantial drop in quotations.

Coffee.—A quiet and steady tone has ruled for spot. Costa Rica has been done at from 115s. to 150s. according to quality, Mocha at 125s., Indian at 110s. to 115s., and Columbian at 100s. Futures are :—September 45s. 3d., December 45s. 9d.,March 46s. 1½d., May 46s. 4½d.

Sugar.—Home refined has been in good demand at unchanged rates. White Mauritius has come to business at 52s. 6d., Czechoslovakian has been done at 29s. Other transactions include Jamaica at 40s. and Santa Lucia at 47s. 6d. Futures are :—October 17s. 9d., November 16s. 7½d., December 16s. 6d.

Oilseeds.— Indian Linseed is again weaker at 21s. 9d., a decline of 1s. 6d. La Plata is 3d. up at 20s. 9d. Rapeseed has been steady with Toria at 22s. 3d., Ferozepore at 21s. 6d., and brown Cawnpore at 20s. 6d. Cottonseed is firm with Indian 3d. up at 11s. 6d., Egyptian black at 13s. 10½d., a rise of 1½d, and Sakellarides 13s. 4½d.

Seed Oils.—A firm tone has prevailed. Linseed oil at 37s 9d. 1s 1s. 6d. up. Crude rape oil is unchanged at 55s., but the refined is lower at 56s. Cotton oil has been steady. Common edible is unchanged at 52s., while Egyptian crude is the same at 42s ; deodorised however, is 6s. up at 56s. Turpentine is 6d. lower at 63s. 6d.

Oilcakes.—Business has been steady. Transactions have included cotton seed cake at 220s. , Arachis cake at 204s., and Linseed cake at 320s.

## THE WORLD'S CROPS.

The Ministry of Agriculture and Fisheries has received the following information from the International Agricultural Institute at Rome :—

The production of wheat in 1921 in Belgium, Bulgaria, Spain, Finland, Alsace-Lorraine, Hungary, Greece, Italy, Netherlands, India, Japan, Algeria, Tunis, Morocco, Canada, and the United States is estimated at 230,616,000 quarters, or 98 per cent. of last year.

The rye crop of Belgium, Bulgaria, Spain, Finland, Alsace-Lorraine, Greece, Hungary, Italy, Netherlands, Poland, Canada, and the United States is estimated at 36,931,000 quarters, or 120 per cent. of last year.

The yield of barley in Belgium, Bulgaria, Spain, Finland, Alsace-Lorraine, Hungary, Greece, Italy, Netherlands, Poland, Japan, Algeria, Tunis, Morocco, Canada, and the United States, is estimated at 71,410,000 quarters, or 102 per cent. of last year.

The yield of oats in Belgium, Bulgaria, Spain, Finland, Alsace-Lorraine, Hungary, Italy, Netherlands, Poland, Tunis, Algeria, Canada, and the United States is estimated at 198,890,000 quarters, or 82 per cent. of last year.

The maize crop of Bulgaria, Greece, Alsace-Lorraine, Canada, the United States, and Algeria is estimated at 360,363,000 quarters, or 94 per cent. of last year.

The yield of linseed in Bulgaria, Spain, Italy, India, Algeria, Tunis, Canada, and the United States is estimated at 678,000 tons, or 75 per cent. of last year.

## ROUMANIA'S WHEAT SUPPLIES.

*From our own Correspondent.)*

Bucharest, August 17.

This year's wheat production is estimated at about 160 thousand waggons of which 40 thousand will be assigned for export. 40 thousand will be needed for the autumn sowing, 20 thousand for the Army, 10 thousand to supply the capital, and the rest will be required to cover home consumption throughout the country.

A delegation of millers of Temesvar, Transylvania, Arad, and Oradea Mare has approached the Minister of Industry and Commerce with the request that the quantities of wheat and rye destined for export should not cross the frontier except in the form of flour.

According to statistical data 100 thousand waggons of cereals were exported last year and 75 thousand during the first six months of the current year. The aggregate value of the general export of Roumanian produce during this period amounts to about eight milliard lei, the total for the first half of the present year being four milliard lei.

## EFFECT OF DROUGHT IN ROUMANIA.

*(From our own Correspondent.)*

Bucharest, August 17.

The drought has lasted during the past month. While it has favoured the threshing of wheat and other cereals it has been deterimental to the maize plant in certain parts of the country. An official of the Ministry of Agriculture declares, however, that the maize crop is not compromised on account of the sowing having been made earlier than usual and abundant rains having fallen during May and June. He estimates that the yield will exceed the needs of the rural population and that the surplus, added to the old stocks, will provide a large quantity for export.

The exportation of hay and fodder has been prohibited. The scarcity of forage is acutely felt especially in Transylvania and the Banat on account of the large number of cattle. The price for beef has fallen there to two lei per kilogramme wholesale ; whilst a cart of hay fetches as much as 700 lei. On the other hand the fruit crop is very abundant.

## OPIUM MARKET REPORT.

Messrs. Barker Brothers, Smyrna, report as follows under date August 13 :—Since our last report of July 16, the sales on our market amount to 74 cases (about 11,840 lb.), at 8s. 6d. to 10s. for old and new lower grade manufacturing descriptions and 10s. 6d. to 12s. for soft Yerlis. The exchange has not varied much since our last circular, and to-day we quote 552 piasters per pound sterling for cheque, on London, and 0.68 dollars for one Turkish pound (Ps. 100). The arrivals are 120 cases against 138 at same date last year, and our stock in first and second hands is now, 1,178 cases.

*Cable Address: "Lobo, Dundee."*

**LOW & BONAR, Ltd., Dundee, Scotland.**

*Codes used: A.B.C., 4th, 5th & 6th edns., A.1, Lieber, Lieber 5 Letter, Bentley's, Marconi International*

## LEVANT MARKET REVIEW.

The following extracts are taken from the report of the National Bank of Turkey for July :—

The Greek advance in Anatolia during the month may be the beginning of the revival of trade which every one hopes will come and the fact that there is a certain amount of business being done with Batoum augurs well for the future.

Prices are beginning to fall in most articles, except rents which are still the heaviest item in the household budget. This fall is due to the world-wide drop in prices and also to the fact that the public have not sufficient money to spend on luxuries. This is a very different state of affairs from a year ago, when there were large numbers of rich Russians here who were prepared to give any price for the goods they purchased.

The tobacco and hazel nut crops are much inferior in quantity to last year, owing to the political situation in Anatolia. The labour question has been a difficult one, as so many of the men are serving with the Nationalists.

Export of produce is still meagre and there are no signs of improvement in the near future. The principal sources of supply have come from the sale of drafts for Greek account of Smyrna and export of gold from Constantinople to France and the United States. These sources of supply cannot be reckoned upon as certain for the future and in the event of their failing the effect on the Turkish exchange would be serious unless a favourable settlement of the political situation was arrived at before then. The economic position becomes steadily worse as nothing is being produced and the wealth of the country continues to be depleted and any appreciable improvement in the exchange can hardly be looked for.

*Flour.*—Arrivals during the month of July amounted to 150,000 sacks from America, Egypt, and Bulgaria, and some 3,000 sacks have been re-exported to the Sea of Marmora. No heavy arrivals are expected in the near future and forward purchases have been small owing to the rise in price in America. Shipments from Roumania and Bulgaria are awaited and this has prevented dealers from buying forward. Stocks on hand are about 60-80,000 sacks.

*Barley.*—The price for Roumanian barley has fluctuated from 7½ piastres to 8 per oke c.i.f. Greece and Smyrna are still buying for the Greek Army and keeping up prices. At the same time prices in the United Kingdom and the Continent have risen some 10 per cent., so that business direct with Roumania has been possible. Reports from Roumania still continue to indicate that their harvest prospects are good, but there is not much likelihood of any large quantity being available for local needs.

*Sugar.*—About 5,000 tons arrived from America, Holland, and Java at prices between £33 and £38 per ton c.i.f. Total exports amounted to 2,000 tons to Batoum, the Black Sea and Roumania. In spite of the steady price and subsequent rise in the centres of production, the market is weak owing to big arrivals. Stocks on hand are about 2,000 tons.

*Rice.*—Arrivals for July amounted to about 800 tons from America and Marseilles at 10.00-10.40 dollars per 100 kgs. c.i.f. and Lstg. 16 per ton for Saigon. Exports are estimated at 250-250-300 tons to Roumania and a small quantity to Batoum. Closing quotations per 100 kg. for American Blue Rose were 10.50 dollars, and for Saigon Lstg. 20 Rangoon Lstg. 22 per ton. In spite of the continual rise in the producing centres the local market is calm. Stocks on hand 600 tons, mostly Saigon.

*Coal.*—The coal market has not been very brisk during the past month. Demands from Greek shipowners have fallen off, owing to the arrival at the Piraeus of several cargoes of American coal. A small parcel of Pocahontas coal arrived on the market during the month and was quickly disposed of. A further cargo is expected to arrive here on August 2, a large portion of which has been sold. We understand that the old stocks of American coal are practically exhausted. The first cargo of best Admiralty large Cardiff coal since the resumption of work in South Wales is due to arrive about August 6, and a further cargo about a fortnight later. F.o.b. price for this class of coal immediately after the settlement of the strike was 47s. 6d., owing to lowness of extraction and heavy demands, but the price has since increased to 50s. per ton. However, every thing points to a reduction in prices in the near future. On the arrival of Cardiff coal there should be an immediate reduction, and both Cardiff and American should be offered at about 70s. per ton, f.o.b. and naturally the various qualities of Turkish will be obtainable at cheaper prices.

## CURRENT PRICES.

*General Produce.*—Bacon (Continental), 171s. 6d. cwt. ; bacon (Canadian), 150s. cwt. ; bacon (American), 129s. cwt. ; butter (Danish), 267s. cwt. ; butter (Australian), 235s. cwt. ; butter (New Zealand), 265s. cwt. ; cheese (Canadian), 134s. cwt. ; cheese (New Zealand), 133s. cwt. ; cheese (Australian), 123s. cwt. ; lard, 88s. cwt. ; chillies, 150s. cwt. ; eggs (Danish), 30s. 6d. per 120 ; eggs (Styrian), 20s. 6d. per 120 ; cloves (Zanzibar), 1s. 2¼d. lb. ; cocoa (Ceylon good to fine), 81s. cwt. ; coffee (Costa Rica), 137s. 6d. cwt. ; coffee (East India bold), 132s. 6d. cwt. ; coffee (Central American), 112s. cwt. ; coffee (Jamaica), 62s. 6d. cwt. ; coffee (Mocha longberry), 111s. cwt. ; coffee (Santos superior), 61s. 3d. cwt. ; ginger (Washed Cochin), 47s. 6d. cwt. ; nutmegs (110's to 80's.), 11½d. lb. ; pepper ( Singapore Black), 4,3-8d. lb. ; pepper (Muntok White), 9½d. lb. ; raisins (Valencia), 82s. 6d. cwt. ; raisins (Sultana Smyrna), 97s. 6d. cwt. ; currants (Vostizza), 77s. 6d. cwt. ; currants (Calamata), 44s. 6d. cwt. ; sugar (granulated), 59s. 1d cwt. ; sugar (No. 1 cubes), 63s. 9d. cwt. sugar (white Mauritius); 52s, 3d. cwt. ; sugar (West Indian crystallised); 48s. cwt. ; sugar (centrifugal) : 19s. 6d. cwt. ; tapioca (fair Singapore), 2d. lb. ; sago (small pearl), 26s. 6d. cwt. ; sago flour, 18s. 3d.. cwt. ; rice (Rangoon), £8 15s. ton ; cinnamon (firsts), 1s. 4d. lb. ; mace (fair Singapore), 1s. 2½d. lb. ; tea (Indian, common to good common), 8½d. lb. ; (medium to good), 1s. 3½d. lb. ; (fine to finest), 2s. 4d. lb. ; tea (Ceylon, common to good common), 10½d. lb. ; (medium to good), 1s. 4d. lb. ; (fine to finest), 2s. 7½d. lb. ; tea (Java, common to good common), 6d. lb. ; wheat (Australian), 82s. 4½d. qr. ; wheat (English white), 68s. qr. ; wheat (La Plata), 83s. 6d. qr. ; barley (malting), 75s. qr. ; oats (English), 34s. 6d. qr. ; oats (La Plata) 32s. qr. ; maize (La Plata), 41s. 6d. qr. ; maize (American), 39s. 3d. qr. ; flour, 59s. sack.

*Metals.*—Aluminium, £150 ton ; antimony (English regulus), £39 10s. ton ; bismuth 7s. 6d. lb. ; copper (standard), £67 3s. 9d. ton ; copper (electro), £72 5s. ton ; gold bars, 112s. 3½d. oz. ; iron (No. 3 Cleveland), 133s. 9d. ton ; hematite (mixed number), 161s. 3d. ton ; galvanised sheets (24g.), £21 15s. ton ; lead (soft foreign), £23 2s. 6d. ton ; manganese Poti, 1s. 2½d. unit ; molybdenite, 43s. 9d. unit ; nickel, £190 ton ; platinum, 365s. oz. ; plumbago, £20 ton ; quicksilver, £10 8s. 9d. bottle ; silver bars 38½d. oz. ; spelter (G.O.B.), £24 19s. 3d. ton ; tin (standard) £152 8s. 9d. ton ; tin plates (20 by 14), 23s. 3d. box ; wolfram 12s. unit ; zinc sheets, £35 10s. ton.

*Chemicals.*—Acids : Boric, 66s. 6d. cwt. ; oxalic, 9½d. lb. ; citric, 2s. 5½d. lb. ; tartaric, 1s. 5½d. lb. ; ammonia sulphate, £13 11s. 6d. ton ; arsenic (white powdered), £41 ton ; benzole (standard), 2s. 8½d. gallon ; bleaching powder (35 per cent.), £16 10s. ton ; borax crystals, 31s. 6d. cwt. ; cream of tartar, 131s. 6d. cwt. ; Potassium : Bi-chromate, 9½d. lb. ; chlorate, 5d. lb. ; caustic, £32 ton ; nitrate, £52 15s. ton ; permanganate, 1s. 2½d. lb. ; prussiate yellow, 1s. 2½d. lb. ; sulphate (90 per cent.) £19 ton ; Sodium : crystals, 141s. ton ; bi-carbonate, £12 5s. ton ; bi-chromate, 6½d. lb. ; alkali (58 per cent.), £9 7s. 6d. ton ; chlorate, 4d. lb. ; caustic (70 per cent.), £22 10s. ton ; hyposulphite, £20 ton ; prussiate, 7d. lb. ; nitrate, £18 10s. ton ; glycerine (crude 80 per cent.), £106 ton ; glycerine industrial (1260 per cent.), £120 ton ; lemon oil, 3s. 9½d. lb. ; quinine, 4s. ½d. oz. ; red lead, £39 15s. ton ; white dry lead, £42 12s. 6d. ton ; white ground lead, £53 ton ; sulphate of copper, £30 10s. ton ; sulphate of iron, 145s. ton.

*Miscellaneous.*—Cotton (American), 8.86d. lb. ; cotton (Egyptian), 14.80d. lb. ; linseed (La Plata), £21 ton ; rape (Toria), £21 18s. 9d. ton ; soya beans, £15 12s. 6d. ton ; palm kernels, £22 12s. 6d. ton ; Oils : Linseed, £36 15s. ; olive (Levant), £82 10s. ton ; palm, £40 5s. ton ; rape (crude), £54 15s. ton; soya, £41 17s. 6d. ; petroleum, 1s. 4½d. gallon ; petrol, 2s. 1d. gallon ; ground nut, £51 10s. ton ; cotton (crude), £42 5s. ton ; coconut (Ceylon), £53 5s. ton ; turpentine, 68s. 6d. cwt. ; shellac (T.N. second orange), 287s. 6d. cwt. ; shellac (A.C. garnet), 282s. 6d. cwt. ; rubber : plantation No. 1 crepe, 8½d. lb. ; smoked sheet, 8½d. lb. ; fine hard Para, 1s. ½d. lb.

*Hides and Skins.*—Ox and Heifer (first), 90 lb. and up, 10½d. lb. ; 80 to 89 lb. 10½d. lb. ; 70 to 79 lb. 10½d. lb. ; 60 to 69 lb., 10d. lb. ; 59 lb. and under, 7½d. lb. (second), 90 lb. and up, 9d. lb. ; 80 to 89 lb., 9½d. lb. ; 70 to 79 lb., 9½d. lb. ; 60 to 69 lb., 8d. lb. ; 59 lb. and under, 5,7-8d. lb. ; cows (first), 60 lb. and up, 7,5-8d. lb. ; 59 lb. and under, 7½d. lb. ; (second), 60 lb. and up, 5½d. lb. ; 59 lb. and under, 5½d. lb. ; bulls (first), 4,5-8d. lb. ; (second), 3½d. lb. ; Kips (first), 6d. ; (second), 5½d. lb. ; (third), 3,3-8d. lb. ; casualty hides, 4½d. lb. ; Calcutta market. Prices in rupees per 20 lb. :—Arsenic hides (cows) : Agras, 9 to 1 3: Durbhangas, 6 to 7 ; Patnas, 5 to 6. Salted cows, 3 to 6. Arsenic hides (Buffalo) : 3 to 7.8. Skins : calf, 8 to 10 per 20 lb. ; goat, 250 to 285 per 100 pieces.

## CZECHOSLOVAK SUGAR PRODUCTION.

During the period between October, 1920 and June 1921, the Czechoslovak sugar factories produced 715,244 tons of sugar. The home consumption amounted to 247,403 tons. The total exports were 302,905 tons, of which 70,657 tons went to Hamburg (transit), 51,039 tons to France, and 48,299 tons to Austria. Lesser quantities were exported to England, Germany, Roumania, etc.

## AGRICULTURE IN MOROCCO.

Mr. G. H. Selous, H.M. Vice-Consul at Saffi, in his report on the French zone of Morocco for 1920, comments as follows on agricultural developments:—In the first place there are 2,000,000 hectares (5,000,000 acres) of agricultural land yet to be brought under the plough. As the area actually cultivated at the present time is about 2,200,000 hectares (5,500,000 acres) in extent, it will be observed that the area under cultivation can be nearly doubled. and this without encroaching at all upon the 4,700,000 hectares (11,750,000 acres) of pasturage. There are, further, 80,000 hectares (200,000 acres) of marsh land which, after having been drained, will become agricultural land of the highest quality. Such drainage schemes are already occupying the attention of the Administration. There is, consequently, scope, under this heading alone, for the doubling of the country's agricultural output. In the second place, everything is to be done in the way of improved farming methods. Of the 2,200,000 hectares under cultivation only 50,000 (125,000 acres) are farmed by Europeans. In other words, only a small fraction of the cultivated area is farmed in other than patriarchal fashion The native farmer uses more seed than the European and produces less for it. On the other hand, although conservative enough in his habits, the Moor is yet amenable to modern methods and ways, especially when he sees that they pay, and he will, in time, adopt more scientific methods of agriculture. To encourage this, the Administration train a certain number of native apprentices on the Government model farms.

Considerable progress, has been made with viticulture during the year under review, and the area so cultivated is rapidly increasing. There seems every reason to suppose that the French Protectorate will soon be self-supporting in the matter of light table wines of every-day use, and will cease to be an importer, as at present, of large quantities of Algerian and Spanish "Vin Ordinaire."

The Protectorate Government are paying very particular attention to the agricultural possibilities of the country and have established several State farms and gardens for general experimental purposes. There are four such farms, situated respectively at Fez (700 hectares, principally cereals and draught horses), Casablanca (170 hectares, principally vines and cattle), Mazagan (500 hectares, principally forage and sheep), and Marrakesh (300 hectares). They are self-supporting, their upkeep during 1920 being estimated at 20,000 francs and their receipts at 625,000, though this latter figure was expected to be considerably higher.

Up to the present the experiments carried out on the State farms have been chiefly connected with the sugar-beet, cotton, and the vine. It has been demonstrated that the beet can be cultivated in the Protectorate from November to June without irrigation. The return is about 30 tons per hectare (12 tons per acre), and is nearly equal to that obtained in France. Unfortunately, the beet will not keep in "Silos" (underground storerooms without masonry), and is, therefore, only useful for distilling purposes. Experiments with cotton proved unfortunate at Fez where frost was a serious obstacle, whilst at Marrakesh trouble was experienced with locusts. In 1919, however, a return of 12 quintals per hectare (say, 9½ cwt. per acre) was obtained at Marrakesh, and an analysis of the value of this cotton from a commercial standpoint is now being made. Experiments with vines are being carried out at Casablanca. Agriculturally speaking, the future of the Moroccan vine yard is assured, extensive European vine yards having been planted and giving good results in the districts of Casablanca, Rabat and Fez.

Whilst forage forms a speciality of the Mazagan farm, experiments in cereals are carried out on the farm at Fez. Deep ploughing has produced a return of 10 quintals per hectare (8 cwt. per acre), which compares very favourably with the return of 6 quintals per hectare (say, 5 cwt. per acre) which results from the shallow furrow of the native wooden plough.

## ON 'CHANGE.

### Tone Generally Dull.

(*From our own Correspondent*).

London, Monday.

The various adverse factors that have obtained during the week have naturally had the effect of even further restricting business. The uncertain Irish position, the disturbances in Malabar, and increasing anxiety with regard to the general financial position here each had their influence, and in view of the general apathy of investors it is, perhaps, a little remarkable in the circumstances that the market should have presented one or two fairly bright features. In view of the economic position it is impossible to be optimistic with regard to the immediate future, and even if there are no unfavourable external influences, one can scarcely anticipate any general improvement in shares until trade is much better.

A variable tone has prevailed in the gilt-edged group. Consols are ¼ down at 47¾. Fundings are unchanged at 70 7-8, but War Loan Fives have been rather strong, and are now 88 3-16, a gain of ¼.

Industrials have on the whole been very dull. Business has been on the smallest scale, and there have been few fluctuations of prices. Shipping securities have been fairly steady. P. and O. Deferred at 340 show a slight decline on the previous week's figure. Furness Withys are 245 ex div. Kaffirs have again provided the bright feature of the week, and in a number of directions advances are to be recorded.

The position is unchanged as regards oils. There has been no renewal of the liquidation of the previous week, and a quiet tone has ruled. Anglo-Egyptian are 1-16 down at 1 11-32, while Roumanian Consolidated are 3d. lower at 11s., but Burmahs at 5 11-16 are 1-8 up.

## BRITISH TRADE WITH TANGIERS.

The following extracts are taken from the recently issued report on Morocco :—

British trade is chiefly concerned with cotton goods and candles. In both these commodities there has been considerable overstocking and the import during the last eight months has not been up to the normal level, but beer, spirits, furniture, and hardware show an increase. Importers generally are being very careful now owing to the unsteadiness in the value of the franc. There has been a large trade in building materials owing to a revival in construction, most of which are, however, imported from Spain and France, although British cement is preferred, and there would have been a considerable demand from Great Britain but for the heavy freight charges. The large imports of iron, steel and machinery are on account of the new water supply scheme. There has been a decrease in the importation of tea during the last six months, although a certain quantity of Shanghai tea has arrived from Marseilles. Belgium is once more competing in the Tangier sugar market and is able to supply it at a cheaper price than France, although it is believed that French sugar is preferred. Sugar too is being sent from Holland. Belgium is also offering paper and glass ware, but the market is overstocked in the latter article. The importation of coal has increased and it is now more easily obtainable and cheaper.

## INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated August 16 :—Monsoon strengthened in Gangetic plain. August 17—Active in North East India and Western Himalayas. August 19—Heavy rain in United Province Provinces of Agra and Oudh. August 20 and 21—Monsoon strengthened slightly in Peninsula and Upper Burma.

Condition of Crops.—August 19—Central Provinces—Rice and cotton very good but cotton now requires break in rains. Crop conditions in Punjab unchanged, *i.e.*, cotton, rice and sesamum normal ; indigo poor.

Markets.—Bombay cotton markets, August 17—irregular. Fine M.G. Oomras September Rs. 318. Cotton arrivals from September 1, 1920, to August 12, 1921, were 2,814,000 bales, as compared with 3,356,000 bales during the corresponding period of last year. Bombay market during the week ending August 20, quiet. Local goods moving steadily. Calcutta Jute and Gunny markets quiet but steady. Rangoon Customs reports price of special rice to be Rs. 587½ on August 19. At tea sale on August 16 Assams excellent ; Dooars, Cachars and Sylhets good ; Liquoring teas firm ; medium thin liquoring Pekos ¼ to ½ anna lower. 100,079 packages sold to date at an average price of 8 annas 11 pies per lb. Tea out-turn to July 1, 41 million pounds less than that at same time last year. Government of India have prohibited further export of wheat from India owing to recent rise in local prices.

## ALEXANDRIA EXCHANGE.

*Supplied by G. L. Mortera, Alexandria and Cairo.*

Prices on August 12 were as follows :—Agricultural Bank of Egypt, 4½ ; Alexandria Water Co., Ltd., £6,7-8 ; Anglo-American Nile Steam, £2½ ; Associated Cotton Ginners, £5-32 ; Banque d'Orient, Fr., 57 ; Behera Ord., £E 8½ ; Brasseries d'Egypte, Fr., 78 ; Building Lands of Egypt, £5-8 ; Cassi di Sconto, Priv. Fr. 94½ ; Ciments d'Egypte Priv., Fr., 45 ; Ciments d'Egypte Div., Fr., 35 ; Comptoir Fin. et Com. d'Egypte, £1 ; Consolidated Land, Pt., 5½ ; Credit Foncier Fondateur, Fr., 810 ; Credit Foncier Egyptien, Fr., 633 ; Credit Foncier, 1886 Oblig., Fr., 319 ; 1903 Oblig., Fr., 224 ; Credit Foncier 1911 Oblig., 225½, Crown Brewery Priv., Fr. 140 ; Crown Brewery Div., Fr., 130 ; Eaux du Caire Capital, Fr., 78 ; Eaux du Caire, Jouissance. Fr. 105 , Egypt and Levant, S.S. Ord. 28s. ; Egyptian Delta Light Railways, £4,5-32 ; Filature Nationale d'Egypte, £10,11-16 Gabbari Lands, £13 32 ; Immeubles d'Egypte Soc., an des., £5,15-32 ; Khedivial Mail S.S. Ord. 110s. ; Khedivial Mail S.S. Co., Pref., £2,9-16 ; Kom Ombo Ste. An de Wadi, £4 7-16 ; Kom Ombo Ste, Fondateur, £33 9-16 ex. ; Land Bank of Egypt, Parts de Fond, £35 ; Lots Turc., Fr., £40 ; Menzaleh Canal Navigation, Pt. 270 ; Nungovich Hotels, £6,1-16 ; Ramleh Railway, £2½ ; Salt and Soda, 34s. ; Tram. d'Alexandrie Priv, Fr 46 ; Tram d'Alexandrie Div., Fr., 68 ; Union Fonciere d'Egypte. £2 9-16 ; Egypte Hotels, £1 27-32 ; Urbaines et Rurales, £3.

## CZECHOSLOVAK COAL OUTPUT.

The output of coal and lignite in Czechoslovakia for the second quarter of 1921 was a follows :—The amount of pit coal produced amounted to 29,253,356 metric quintals as compared with 30,636,056 quintals in the first three months of 1921. The amount of coke produced from pit coal was 3,370,236 quintals, while the amount of briquettes was 176,632 quintals. (The respective figures for the first quarter were 3,974,324 quintals of coke and 176,632 quintals of briquettes). The output of lignite decreased from 54,348,851 quintals in the first quarter to 50,423,510 quintals. The amount of coke produced from lignite was 5,589 quintals, while the amount of briquettes produced from lignite increased by 2,186 quintals to 444,816 quintals.

The traffic receipts of the Smyrna-Aidin Railway for the week ended August 20, amounted to £6,320.

# COTTON & COTTON GOODS.

## MANCHESTER REPORT.

(*From our own Correspondent.*)

Manchester, Friday.

The market during the past week has not been altogether featureless, but although the tone has been a little firmer developments throughout the market have been very slow in taking place. The opinion has prevailed that it is better to await developments rather than rush into heavy commitments. The financial position abroad is certainly checking business, and if money was only distributed more freely then there would perhaps have been more business done than was actually the case. The cloth inquiry for Egypt has not been on a large scale and only a few miscellaneous sales have taken place. Buyers for the Levant and Constantinople have not been altogether idle. At the beginning of the week quotations for American and Egyptian yarns were slightly easier, but since then spinners have tended to harden their prices, but at the same time it is still possible to purchase most counts on a low scale. The piece goods inquiry for India has not been anything to boast about and transactions have not been of any weight. Buyers for Madras have been the most active. Sales of any weight for China have not been mentioned and standard makes have been practically neglected. Better reports however are being received from that outlet and latest advices show that stocks of dear goods out there are gradually but surely being liquidated. A few minor transactions have taken place for Java and Singapore. South America still lags behind. Quotations for American counts have tended to harden in sympathy with the strength displayed in raw cotton circles. On the whole the tone of the market is rather better than was the case a week ago but buyers generally are in no mood to commence operations on a more active scale.

## LIVERPOOL REPORT.

Messrs. Reynolds and Gibson report as follows for the week ended August 25 :—Liverpool cotton has been in fair request during the past week, and estimated sales show a slight increase over the preceeding one. Taken altogether, however, prices here still have a downward tendency, although we are of the opinion that some reaction is about due. There has been quite a spurt on the American side during the past few days, due chiefly to bad crop news, and as usual this advance has been reflected, to a lesser degree, in the Egyptian market. Private advices from Alexandria yesterday reported large purchases of Upper Egyptian in that market for American account, and this will undoubtedly tend to stiffen prices in a quarter which at all times is particularly susceptible to "bullish" influences. C.i.f. business has become very quiet lately, whilst the local demand has been chiefly for Sakellarides 15.00d to 17.00d and Upper 10.00d to 12.00d. Tokar, Sudan and Brown Cottons are neglected. There appears to be a better tone prevalent in Manchester circles, but it is more apparent where yarns are concerned at any rate, on the American side than on the Egyptian. The general impression given, however, is that a slow and very gradual improvement is taking place, and a certain amount of optimism in the future seems not uncalled for. It is satisfactory to note that for the third week in succession the visible supply of Egyptian cotton in Great Britain shows a steady decrease. Total sales 1,500 bales (includes 50 bales Sudan). Quotations of Upper are reduced 25 points, of Brown 50 points, and Sakellarides is unchanged on balance. Fully Good Fair Sakellarides—16.00d.

---

The Banca Commerciale Italiana and Romana, Bucharest, have opened a branch at Chisinau, and have also acquired a controlling interest in the Banca Agrara Timisana at Temesvar.

WONDERFUL EXHIBITS
at the
CONFECTIONERS' EXHIBITION
(*Royal Agricultural Hall, Sept. 3rd to 9th*, 1921.)
FLUGEL SODA FOUNTAINS.
Stand. Bay 23. Arcade Entrance.
Actual working models will be on view showing how the finest aerated fruit drinks are automatically manufactured at a minimum of cost and trouble. The Flugel Soda Fountain automatically filters every drop of water and each drop is aerated while it is being filtered. Every one interested in the production and sale of mineral water drinks should ensure seeing this remarkable machine, and if unable to visit the Exhibition they should send for the special free illustrated booklet (now ready) giving a full description of these exhibits. You will be more than interested. Write to—

| Actual receipts for 6 mhs 1920 ..... .....) | 31,010,269 | 29,971,854 |
| Difference between estimated and actual receipts for 6 months 1921 | +19,155,095 | +20,344,264 |
| Difference between estimated and actual receipts for 6 months 1920 | +16,560,269 | +24,621,854 |

Note.—Of the surplus over the estimated receipts from monopolies, tobacco, stamps, stamped paper, and Naxos emery, 49 1-5 per cent. is applied towards increasing the minimum rates of interest and sinking fund on the External Gold Loans of 1881 to 1893.

The products of the sales of Naxos emery have been paid in paper drachmae since August, 1920. In the case of the Piraeus Customs, the receipts in gold are included in the above statement at par.

---

Increasing interest is being devoted to the cultivation of marjoram in the district of Sfax, Tunis.

The Board of Trade have added Italy and Portugal (including Portugese Colonies) to the list of countries included in the new Export Credits Scheme.

## AGENTS WANTED ABROAD.

*ADVERTISERS requiring agents abroad may insert a paragraph in the following column free of charge. Letters in reply should be addressed to "The Enquiry Bureau, 'The Near East,' 1, Devonshire Square, London, E.C.2." when they will be redirected to the firms concerned. It must be understood that "The Near East" accepts no responsibility in connection with such replies.*

111. Agents wanted in the Near East, with good connections in the Typewriter and Stationery Trade, to represent a first-class English firm of manufacturers, on commission basis or own account.

118. Well known Sports Goods House with factory in India, wish to appoint Agents in Near and Middle East where not at present represented.

## ENQUIRY BUREAU.

*Readers abroad desirous of getting into touch with British manufacturers, export merchants, etc., are invited to insert a brief reference as to their requirements in this column free of charge.*

*Replies should be addressed "The Enquiry Bureau, 'The Near East,'" 1, Devonshire Square, London, E.C.2."*

*ADVERTISERS in and annual subscribers to "The Near East" will be supplied with names and addresses of enquiring firms on application. All catalogues sent to "The Near East" for transmission abroad must be accompanied by stamps to cover postage.*

*No guarantee is given as to the financial stability of firms using this column, and enquiries as to status, etc., must be made by the firms concerned.*

113. Import and Export Merchant in Smyrna invites inquiries from British firms wishing to trade with this territory. Will act as agent or on commission basis.

114. Importer in Karachi (India) travelling throughout India, wishes to get in touch with merchants and manufacturers in England and elsewhere. General merchandise.

115. An import and export firm in Spalato, Yugoslavia, wishes to enter into business relations with British manufacturers, importers and exporters. Specialities :—Exports : Medicinal herbs dried fruits, hides, timber. Imports : Oils, food products, tarpaulins, mackintoshes, sacks.

116. Import Merchants in Adana, Cilicia, Asia Minor, wish to represent British firms for any kind of British-made goods. Own account and commission basis. Good references provided. Send catalogues and samples with prices and terms.

117. Importer in Roumania, interested in Jute trade, wishes to get in touch with firms dealing in sacks, new and old, Dundee and Calcutta makes.

## NOTES OF THE WEEK.

### *The War in Asia Minor.*

A Greek message by way of Geneva reports the fall of Angora, and even if, as seems probable, this prove to be premature, the fate of the town may be regarded as having been sealed by the course of the recent fighting. In spite of the stubborn resistance of the Turks, the Greeks, who pay a generous tribute to the tenacity of their enemies, succeeded in turning their positions on the south of the extended front. The centre was next pierced, and we must infer that the Turkish retreat became general. The decision not to allow himself to be invested in Angora does credit to Mustapha Kemal Pasha's military instinct; but it remains to be seen how the bulk of the troops left to him take his defeat. Greek reports claim already a large number of deserters. The harder the Nationalist Government is pressed the greater its exactions on the Anatolian peasantry. The Greeks will, no doubt, see to it that those who surrender have nothing to complain of in regard to their treatment.

### *Roumania and the Straits.*

If it were not for the fact that he is generally well informed on international affairs, it might be thought that M. Take Jonescu is flogging a dead horse when he is so insistent upon the freedom of the waterway between the Black Sea and the Mediterranean. In stipulating for the Treaties, the whole Treaties and nothing but the Treaties, the Roumanian Foreign Secretary has rather overworked a shibboleth, because Europe wants the best settlement it can possibly get, and there is no virtue in a decision arrived at in 1919 that is shown to be unsound in the light of unprejudiced investigation in 1921. M. Take Jonescu, therefore, would be on safer ground, if he were to insist upon the upholding of the Treaties until a better solution could be produced. In regard to the internationalization of the Straits there can be no question that it is the only satisfactory solution for a problem which was the same yesterday as it is to-day, and must needs continue to be the same as long the sea remains an international highway. This, however, does not imply that Constantinople must also be internationalized. There could be no worse solution of a complex question in the case of a town; but the aim in view is sound, that no Power should be established which might have the strength *and the interest* to close the Bosphorus and the Dardanelles. Let this aim be kept in view and not obscured by striving after a brief "slogan."

### *The Palestine Constitution.*

With a view to arriving at an agreed Constitution for the new State the High Commissioner of Palestine has invited representatives of the various sections of the population to discuss with him draft proposals. The Executive Committee of the Palestine Arab Congress has refused the invitation on the ground that it is not possible for the Arabs to discuss the framing of a Constitution "while the destiny of the country is hanging in the balance and while the Arab delegation sent by the nation is fighting the Arab cause in London." Such discussion, the committee adds, is in its opinion the business of a body elected under self-governing principles. A more tactless reply could not have been drafted. The Arabs with their vast preponderance in the population of Palestine have nothing to lose by a frank discussion of the future constitution of the country. Their congress has clearly shown that it shrinks from meeting fellow-Palestinians on an equal footing in the Council Chamber. "A body elected on self-governing principles," it seems to think could adopt Jaffa arguments, if the Arab reprresentatives were at any time worsted in debate. The hint will not be lost on the Jewish community, nor on the British Government which is determined to keep the balance even between the different sections. Readiness to discuss a constitution and to accept an equitable adjustment between the intellectual and financial contribution that the Jews are able to make to the country's progress and the numerical superiority, very largely illiterate, as is known, which is the Arabs' chief asset would have influenced the world's opinion in favour of the Arabs more than anything else. It is a matter for regret that the Arab Delegation in London, which has had an opportunity of educating itself, should not have been able to give the congress in Palestine a sounder and more intelligent lead, instead of merely endorsing a blunder of its fellow countrymen.

### *"Sultan of Nejd."*

A *communiqué* issued last week by the Colonial Office announced that "at a large and representative con-

Digitized by Google

ference of tribal chiefs, notables and prominent inhabitants of the territories of Nejd, held in May last, it was decided that the Chief, Emir Bin Saud, should be proclaimed and addressed as Sultan of Nejd and its dependencies." Through Sir Percy Cox this resolution was conveyed to his Majesty's Government, and the *communiqué* adds that the Emir has now been informed that the Government recognizes him as Sultan of Nejd. We welcome the announcement for several reasons. Our relations with the Emir Bin Saud before the war were friendly, and during the war they became even more so. The way in which he ejected the Turks from El Hasa in 1913 marked him out as a power to be reckoned with in the Arabian Peninsula and greatly increased his influence with the desert tribes; and though he took no active part in the fighting in the late war, that influence was steadily exerted in our favour. His recognition as Sultan is, therefore, as natural as it is pleasing, and it is to be hoped that our relations with the Sultanate of Nejd will be as friendly as they were with the Emirate. The new Sultanate is much more extensive than those of Lahej, in the south-west, and Oman, in the south-east, and apart from any other consideration its connection with the Wahabite movement lends it considerable importance.

### *Towards Federation.*

The most important part of the *communiqué* quoted is, perhaps, its ending. After mentioning the new Sultan's grateful acknowledgment of the attitude of Great Britain towards him, it concludes: "At the same time he intimates his acceptance of the decision of the people of Irak and his Majesty's Government in regard to the choice of the Emir Faisal as King, and expresses his desire to maintain friendly relations with the new State over which Faisal will rule." Relations between the Hejaz and the Nejd have left a good deal to be desired in the past, and latterly it looked as if serious trouble was to be expected. The selection of one of King Hussein's sons as ruler of Irak cannot, therefore, have been entirely welcome to Bin Saud. King Faisal, however, is far-sighted and broad-minded, and reputed to be a better hand at making friends than his father, King Hussein. He is likely, too, to remember, though others may forget, that while the Desert has overflown the Sown on more than one occasion, the Sown has never yet successfully overrun the Desert. To the detailed observer it seems that Irak has more to gain than the Nejd by the maintenance of the friendly relations to which Sultan Bin Saud—or Abd el-Aziz es-Saud, to give him his his more formal name—refers. If only Irak and Nejd can keep on good terms, a big step will have been taken towards a federation of Arabian States.

### *The Kurds of Mesopotamia.*

The situation in the Rowanduz area is officially described as continuing to show steady improvement, and the effects of the aerial action taken against the recalcitrant tribesmen appear to have gone far towards justifying M. Churchill's hopes. This is satisfactory as far as it goes, and it is to be hoped that the action of those chiefs in the Rania area who have tendered their submission will speedily be imitated by other restless leaders and tribesmen. At the same time it is wise to recognize that the Kurdish problem is not going to be solved at once, or easily. It is satisfactory, therefore, to learn from the final draft of the Mandate for Mesopotamia—which was issued as a White Paper last week—that we are reserving to ourselves the right to establish "a system of local autonomy for predominantly Kurdish areas." The Kurd and the Arab can on occasion live on quite friendly terms side by side, but to put Kurds in any numbers under Arab rule would be a rather risky experiment; and it may very well be that the present trouble is directly connected with the election of an Arab ruler for Irak. Fortunately the difficulty has been foreseen all along, and the provision made for coping with it may, and probably will, prove to be ample. If the Kurds should finally fit themselves into the new State, so much the better; for they have virtues of their own that could be turned to good account. If, however, local autonomy is found to be necessary, it can be granted under the terms of the Mandate, without any risk of incurring charges of treachery.

### *Democracy and Egypt.*

It is announced that certain Members of Parliament, who claim to represent British democracy, have decided to visit Egypt for the purpose of inquiring into the internal affairs of the count y. If they defer their visit for a few weeks, they will doubtless find the trip a very enjoyable one; for in the cool season the climate of Egypt is hard to beat, and Zaghloul Pasha will doubtless take very good care that his visitors have enough 'democracy', in one form or another, to satisfy all their desires in that direction. The success of the extremist leaders in gathering together a mob, and working it into any mood desired is nor to be denied. Nor is it to be doubted that the visit of the self-styled representatives of British democracy will do something towards furbishing up the prestige of Zaghloul Pasha, which has become somewhat dulled of late. But what real good it is likely to effect and how far the inquiries into the internal affairs of the country are likely to take the inquirers, are matters on which opinions are bound to differ.

### *A 'Conducted' Tour.*

Any serious attempt on the part of the British public, or any section of it, to understand the present situatiou as between Great Britain and Egypt would be a matter for congratulation, if the endeavour were made along wise lines. But it would be interesting to know whether the British democrats whom these peripatetic M.P.'s claim to represent have any knowledge at all of the history of Egypt, or of the character of that very likable but very backward person, the Egyptian Fellah. They may, of course, be well instructed on both these points. But on the other hand it is possible that their democracy may be of the "count-the-noses" type, and that their interest in Egyptian politics is confined to the endeavour to embarrass their own Government. Unfortunately it seems to be only too certain that the inquirers might just as well draw up their report now, if it be true, as is reported, that they are making the visit on the invitation of Zaghloul Pasha. It is significant that influentlal Egyptians who have been working to bring about a reconciliation between Adly and Zaghloul Pashas should have done their best to prevent the visit taking place. Unhappily their attempts have failed, and the M.P.'s are to have their trip—presumably as the Zaghloulites' guests.

### *The Indian Frontier.*

*The Times* made a praiseworthy attempt last week to direct the attention of returning holiday-makers to the intricacies of the position on the Indian Frontier, and if nothing very new or startling was said, the

Digitized by Google

reason probably is that the question has been long ago threshed out. The essence of the whole thing is that we have some very awkward neighbours in that direction, who will not listen to our arguments, and can be kept quiet only by force; while that statement remains true, the force must be held in readiness, and India must go on paying for it, much as she dislikes the process. It is for the neighbours to change their ways, but they are conservative folk, and, so far as we can see, they are not likely to change until they find themselves enclosed in a ring of civilisation. The key to the position is therefore to be looked for in Afghanistan, rather than in India, and people who are able to take long views are beginning to think that, in spite of distractions on the Russian side, Afghanistan is moving on a path which may eventually lead to a radical change in the situation on our frontier.

### *Changes in Afghanistan.*

The fact is that Afghanistan is experimenting with civilised institutions. There is now an Afghan Press, the effusions of which are interesting if not always convincing; there is talk about popular education; a Criminal Code has this year been promulgated, and a Ministry of Justice has been created for its enforcement. It is easy to ridicule small beginnings, but there is now a distinct possibility that the country may gradually submit itself to the rule of law. and those who realise the change in India, since, little over a century ago, the foundations of that rule were laid, will prefer to wish the new aspirant God-speed. Given a stable and friendly Afghanistan, the inconveniences resulting from the idiosyncrasies of the border tribes would shrink to modest dimensions, and probably in time they too would fall into line. Of course no such readjustment can be expected immediately, but just at present, when India is manifestly impatient under the burden of continuous trouble on the frontier, it is worth while to emphasise the longer view.

### *The Calcutta Munitions Case.*

The considered statement of the Government of India in its corporate capacity should suffice to remove the misgivings aroused by the action of one of its departments in withdrawing from the prosecution of the now notorious case of fraud on the Munitions Board. On the one hand, the doctrine that men could hope to escape the consequences of crime if only they had a sufficient numbe of indigent dependents is emphatically repudiated as inconsistent with the principles on which justice should be administered; on the other, there is no less emphatic condemnation of the procedure adopted by which guilt was alleged in open court against persons who were prevented from defending themselves by the withdrawal of the charge. Lord Reading's Government is satisfied that the regrettable incident was not due to to any defect of system; a mistake was made, and has been acknowledged; and the announcement of the resignation of Sir Thomas Holland, the Member of Council responsible for the withdrawal of the prosecution, closes the incident in what appears to be the best possible way, the Council being left in a position to deal with the problems confronting it without the drawbacks resulting from internal strains.

## THE WEEK AT HOME.

LONDON, Monday Evening.

### The Irish Negotiations.

The main fact about the Sinn Fein reply to the Government is that it admits that De Valera wishes the negotiations to continue. The admission is certainly made with a maximum of collateral objections, and perhaps even with a minimum of the usual courtesies of debate; but the admission is made nevertheless, and it will not be lost on public opinion here or in Ireland.

The remainder of the letter appears to be irrelevant. Mr. De Valera even seems to manufacture a grievance out of geography as well as history, by his reference to the propinquity of the islands; but in that matter at least both Downing Street and Dublin Castle can plead "not guilty."

The main Irish argument, however, loses a good deal of its strength when examined. It makes a great point of "government by consent of the governed," on which most Englishmen will have a certain amount of sympathy with Irishmen; but as the *Westminster Gazette* remarks acutely, Mr. De Valera has not thought out all that is implied in the phrase. Would he allow Ulster to decide her own government in this way? It is notorious that he does not wish to. It is his principle that Ireland is a single political unit; but the facts are against him. If Ireland has the right to self-determination, surely Ulster has an equal right—it is a distinct political unit with its own government. Mr. De Valera's love for abstract phrases may lead him, as they did President Wilson, into difficulties.

On the whole public opinion is more hopeful this week than last. It has not much to go upon except the fact that the negotiations have not broken down, but it builds a great deal on that.

### The Cabinet at Inverness.

The whole question of Ireland is to be discussed by the Cabinet on Wednesday at Inverness. Mr. Lloyd George has been staying in Scotland for some days as a guest of his old enemy and present ally, the Duke of Athol—the days are gone when he told us that dukes cost more than battleships, and were less useful—Mr. Churchill has also been in the North, and the other Cabinet Ministers have been summoned thither. Cabinet Councils have been held in most parts of England, and even in France, but this is the first time that one has been held so far North.

Mr. Lloyd George is said to be enchanted with the Scottish lochs and mountains, and somebody has cruelly remarked that the Grampians will soon appear in his perorations instead of Snowdon, when the time for autumn oratory sets in. But no doubt that is a Wee Free taunt; the Independent Liberals are more cheerful than usual at this moment, owing to the fact that Lord Grey is to resume an active political career. His moral authority is unequalled, and we shall all hear him with interest and respect; but it is doubtful whether even he will be able to galvanise his old party into real activity.

### Mr. Austin Dobson.

The death of Mr. Austin Dobson at the ripe old age of eighty-one will be very generally regretted. He was one of the most attractive of the minor figures in contemporary literature, an echo of the eighteenth century.; the bulk of his work was not large, but what there was of it was perfect. It is strange to think that this dainty poet spent the greater part of his working life at the Board of Trade, where Mr. Edmund Gosse, now celebrated as a critic, also produced original literature in the shape of notes and minutes on such poetical subjects as port dues, harbour control, and standard gauges. Somebody called the Board of Trade in those days "a nest of singing birds," but they have all migrated now. Even Mr. Gosse could hardly have written a sonnet to "Dora."

### London Unemployed.

A rather difficult situation is developing in the London boroughs in connection with the unemployed. The Government's unemployed scheme having exhausted its funds, those who are still unemployed have turned to the

Digitized by Google

boroughs for a dole ; and some of the boroughs, particularly those with Labour majorities, have responded to the cry of " Work or Maintenance." Indeed, in one or two cases they have responded so generously that it pays a man better to " go on the parish " than to work for his living. The demand has now spread to other boroughs where Labour, although not in the majority, is powerfully represented, and one or two of these are showing signs of capitulation. The idea is *au fond* a Labour scheme, but the Liberals are playing with it as a means of discrediting the Government—an old trick recalling the last days of the Balfour administration in 1905. It is a pity that Labour should not have learnt better economics ; it revives the old belief in the State with a bottomless purse ; but in this case the State is a poor municipality like Islington or Shoreditch, and the persons who really pay the dole are not the idle rich or the capitalist profiteers, but the wretched shopkeeper or the struggling householder who can hardly keep his head above water as it is.

Once again Labour is showing its lack of leadership and pluck. There is hardly a man among the Labour leaders in Parliament who does not know that this method will only make things worse by driving up the rates and sending trade away ; but not a man has had the courage to say so. *Quos deus vult perdere* are in these days transformed into Labour politicians. The price will be paid in lost votes, for when the blunder is discovered and acknowledged, both employed and unemployed will resent it.

Very much the same thing is happening in Poplar, where the recalcitrant Councillors have gone to prison for refusing to issue a precept to pay the local share of London County Council and Metropolitan Asylums Board rates. There is a case, and to many minds quite a good case, for equalisation of rates and reform of local government from top to bottom ; but the rules must be obeyed until fresh rules are devised. There is no doubt that Poplar has utilised the London County Council and Asylums Board services, and is in fact still utilising them; nor has any suggestion of extravagance or insufficiency in the conduct of the services been made. Presumably then Poplar must expect to pay for them.

On the other hand a rather damaging statement has been made to show that Poplar is itself extravagant in its local services, and that, if it had not adopted this method as a set policy, its finances would hardly have been in so serious a condition as they now confessedly are. Poplar, under Mr. Lansbury's guidance, has followed the spectacular method of going to prison, apparently in the hope that its grievance will be well advertised—as has been the case—and that it will evoke sympathy and help —a more doubtful outcome. It has been suggested that a " no rent " protest should be added to the " no rate " protest, which is, of course, pure anarchy. In the end the Government may have to intervene.

**The Cost of Living.**

A great deal of dissatisfaction is being expressed at the way in which prices are keeping up, in spite of the fall in raw materials. Wages in the coalfields have fallen, but the cost of coal in the cellar has risen. It is true that export coal has fallen considerably, and the Mining Association has assured the public that that has nothing to do with the price of domestic coal ; but the public does not believe a word of it—particularly as the public still has to pay the subsidy. Bread has not fallen, although grain has fallen ; an organisation of bakers has told the public not to be unreasonable, and that the loaf cannot possibly be reduced ; but the effect of this statement has been seriously diminished by an article in *Milling*, a trade paper, proving that the price of bread could and should be reduced. A pig fetches half the money in the market that it did a year ago ; a plate of ham in a restaurant has not gone down. Eggs have fallen at the farm ; the teashops have not discovered it—perhaps poaching costs more. There is plenty of sugar in the country, but the price has gone up in the shops; the reason given is that it is the preserving season—and it is the fact that the housewife makes more jam because the alleged jam sold in the shops has increased in price and deteriorated in quality.

It is the same in the clothing trade. The price of cloth has fallen, but the ordinary tailor stares blankly, if you suggest that fourteen guineas is too much for a suit. A year ago the tailors blamed the cloth-makers, now the cloth-makers blame the tailors. *Magna est veritas*, we know, but it does not seem to prevail so quickly as one had hoped.

**The End of Cricket.**

The cricket season ended last week in a blaze of glory Interest in the county championship was kept up to the last, when Middlesex, by again beating Surrey, became champions for the second time in succession ; but then Surrey without Hobbs, as somebody remarked the other day, is like Antony without Cleopatra. But the real splendour of the week was that England beat Australia, —a feat that we had come to think impossible. It is true that the team modestly called itself merely " An England Eleven," and that it contained nobody who has taken part in the Test Matches this year—perhaps that was why it won. At any rate, after a miserable score of forty odd by our side in the first innings, things went better and better, and the invincible Australians could not make the necessary runs in the last innings. The result is so cruel a commentary on the judgment of the Selection Committee that, for the sake of our prestige in the Near East, I refrain from further comment.

OCELLUS.

## THE PRINCE'S VISIT TO INDIA.

**Staff Appointments.**

The King has been graciously pleased to approve of the following Indian Ruling Princes and Members of the Families of Indian Ruling Princes being attached to the Staff of the Prince of Wales on the occasion of His Royal Highness's forthcoming visit to India :—Major-General His Highness the Maharaja of Patiala, G.C.S.I., G.C.I.E., G.B.E. ; His Highness the Nawab of Bahawalpur ; His Highness the Maharaja of Jodhpur ; His Highness the Maharaja of Dhar, K.C.S.I., K.B.E. ; Major His Highness the Maharaj-Rana of Dholpur, K.C.S.I. ; Colonel His Highness the Maharaja of Ratlam, K.C.S.I. ; Captain His Highness the Nawab of Palanpur, K.C.I.E. ; Captain Maharaj Kumar Sadul Singh, of Bikaner ; Captain Raja Sir Hari Singh, K.C.I.E., of Kashmir ; Nawabzada Haji Muhammad Hamidulla Khan, C.S.I., of Bhopal.

The following is the list of the staff appointed by the Prince of Wales for His Royal Highness's visit to India :—Chief of the Staff, the Earl of Cromer, K.C.I.E., C.V.O. ; Comptroller to the Prince of Wales's Household, Vice-Admiral Sir Lionel Halsey, G.C.V.O., K.C.M.G., C.B. ; Chief Secretary, Mr. G. F. de Montmorency, C.I.E., C.B.E. ; Military Secretary, Colonel R. B. Worgan, C.V.O., D.S.O. ; Private Secretary to the Prince of Wales, Sir Godfrey Thomas, Bart., C.V.O. ; Equerries to the Prince of Wales, Captain Dudley North, C.M.G., C.V.O., R.N. Captain the Hon'ble Piers Legh, M.V.O., O.B.E., Lieutenant the Hon'ble B. A. A. Ogilvy, M.C., Chief Medical Officers, Lieut.-Colonel F. O'Kinealy, C.I.E., I.M.S. ; Assistant Military Secretary Lieut.-Colonel C. O. Harvey, M.V.O., M.C. ; Personal Medical Officer to the Prince of Wales, Surgeon Commander A. C. W. Newport, M.V.O., R.N. ; Assistant to Chief Secretary, Mr. H. A. F. Metcalfe, I.C.S. ; Aides-de-Camp, Captain E. D. Metcalfe M.C., 3rd Skinner's Horse ; Captain F. S. Poynder, M.V.O., M.C., 9th Gurkha Rifles ; Lieutenant the Lord Louis Mountbatten, M.V.O., R.N. ; Police Officer, Mr. D. Petrie, C.I.E., C.B.E., M.V.O.

## INDIA GENERAL SERVICE MEDAL.

It is officially announced that the riband of the India General Service Medal, for operations against Afghanistan, 1919, may now be worn by officers and soldiers who are entitled to the award of the medal. Officers not now serving should make application for the riband (giving rank, name, and the corps in which the applicant last served) to the Secretary, War Office (A.G. 10), 27, Pilgrim-street, London, E.C.4. Discharged and demobilised soldiers may submit their applications to the Officers in charge of the records of the corps in which they last served. Such applications should give full name ; name of unit and corps and regimental number therein, in which medal was earned and full address to which the riband should be sent. If an applicant served in a corps other than that in which the medal was earned, he should state the name of the last corps in which he served, regimental number therein, and date of discharge or demobilisation.

At a crowded meeting held in Sofia recently vigorous protests were made against the disarmament of Bulgaria.

# THE NEAR AND MIDDLE EAST.

*(From Our Own Correspondents).*

## EGYPT.

*Cairo, August 25.*

### The Cutting of the Khalig.

Last night there took place the celebration of the Cutting of the Khalig, the ceremony which is supposed to mark the highest point in the Nile flood at the Rodah Nilometer. As usual the Governor of Cairo presided over the singing of the traditional "Hodjé" at Old Cairo, and as usual all Government offices are shut to-day. The Nile flood has been very late this year, and a certain amount of anxiety is still felt as to the autumn prospects.

### The Young Offenders Problem.

An important step forward in the solution of the problem of vagabond and young offenders has now been taken by the formation of a special committee under the presidency of the Under Secretary of State for Justice. This Committee, which will be known as the Permanent Young Offenders Committee, is to be entrusted with the task of investigating the causes of criminality amongst children and of proposing proper means for its prevention and repression. It will also examine the existing law and suggest the modifications and additions which it considers it necessary to introduce; it will watch over the legal procedure followed in dealing with young offenders; it will superintend the execution of educative and corrective measures and particularly the running of reformatories and industrial schools instituted for the treatment of young offenders and vagabonds; and it will deal with every institution the object of which is to assist discharged youthful offenders.

The problem before this new committee has been occupying the attention of the authorities for the past thirty years; but for one reason or another, although periodically the Advisers to the Ministry of Justice have given the question their attention, it is only to-day that it has been possible to set up a permanent committee which will thus ensure that progress shall not depend on the enthusiasm or the reverse of one individual. Progress in the past has admittedly been slow. It was only in 1904 that the law was altered and judges were empowered to substitute, for the ordinary penalties prescribed by the law, whipping, detention in reformatory and delivery to parents on their offering personal genrantees in the case of young offenders under the age of fifteen. In 1905 a further step forward was registered when jurisdiction over young offenders in Cairo and Alexandria was transferred to one particular Court in each of those towns. A little later on a judge was appointed in each of those cities specially to deal with these cases. This reform had a most salutary effect, thanks to the great interest taken in the work and sound common sense shown by the first judges appointed. Sir Malcolm M'Ilwraith in his reports at the time put on record the excellent work done by these two judges, particularly in the case of the judge appointed in Cairo, and it is interesting and instructive to note that the two judges in question, Abdel Khalek Pasha Sarwat and Abdel Fattah Yehya Pasha, are repectively Acting Prime Minister and Minister of the Interior, and Minister of Justice in the very Cabinet which has approved of the formation of this much-needed Committee. Unfortunately these two judges were soon transferred to other posts; their successors, do not seem to have shown the same interest in the work, with the result that no progress in the solution of the problem was made until early this year, when in Cairo a special Court and prosecuting office were set up to deal with the question, while similar provision is about to be made in Alexandria.

### Looking to the Future.

The task before this permanent committee is no light one, for the problem of what to do with the vagabond children, who are annually growing in numbers, both in the cities and the provinces, and are swelling the ranks of the criminal class, is most difficult. The existing law requires very considerable amendment and a very necessary provision, which will have to be introduced, is punishment for the men and women who live on the earnings of children and send them out into the streets to beg and steal. Likewise provision must be made for housing these young offenders and vagabonds.

There is, it is true, a reformatory at Giza for boys and girls; but it is highly undesirable that youngsters whose sole offence is that they are vagabonds or beggars should mix with the young thieves and pick-pockets who are dealt with there. Under the auspices of the Commandant of Police an industrial farm school was started last year at Khanka, where a small number of boy-vagabonds can be accommodated. There is also an excellent institution of waifs and strays run by the Brotherhood; but beyond those two and the Waif Orphanage there are no institutions in this country.

Considering the number of vagabond children, not to mention young offenders, in Cairo, Alexandria and the Provinces—in the Capital alone the Police say they could arrest four hundred at any time—the above-mentioned provision is obviously inadequate; for it is just as necessary to provide institutions where these young children can be trained to earn an honest livelihood as it is to clear them periodically off the streets. The new committee, which is a strong body, should be able to do much to remedy the present state of affairs; and it is to be hoped that its recommendations will receive proper support from the Government.

### Cairo's Landmarks.

Changes are almost daily taking place in Cairo, and one by one the old land-marks and meeting places are disappearing. The latest to be so affected is the Savoy Hotel, the scene of most of the brilliant assemblies and *fêtes*, which were a feature of previous seasons. From shortly after the outbreak of war until about a year ago the Savoy was the General Headquarters of the Egyptian Expeditionary Force, which after a short sojourn at Abbassia was brought back into town to Eden Palace Hotel. (These successive moves, it may be remembered were made the subject of much criticism by Anti-waste spokesmen in the House of Commons). The Savoy Hotel, under the name of "Savoy House," has now been taken over by the Government, to meet the growing needs of some of the newer departments, at an annual rental of L.E. 12,000. In view of the uncertainty of the coming winter season the Nungovitch Hotels have done well to lease the hotel, and I understand that the Board of Directors are jubilant at the handsome rental they will receive.

## YUGOSLAVIA.

*Zagreb, August 24.*

**Belgrade and Baranya.**

The Baranya business, which at one time threatened to be a new storm centre, has blown over. The turbulent spirits met with a cold douche when they came to Belgrade, for M. Pashitch is too wise and experienced to be caught in any wild-cat scheme. He told the delegates that the country required peace and rest to organise itself and settle down properly, that it could not be dragged into any policy of adventure, and that, above all, it was essential for the Peace Treaties to be carried out in their entirety. As in the matter of the Fiume question the Belgrade Government has been absolutely correct, probably to the disappointment of the adventurous spirits, and of the enemies of the country, who would welcome a false step on the part of the Serbs. The Government then ordered the evacuation of the Baranya, and did everything it could to avoid a conflict.

This satisfactory conclusion, however, has had an unfortunate aftermath. Practically the entire Yugoslav press has issued reports alleging open and marked partisanship on the part of the Allied Mission. The statements are too categorical to be overlooked or dismissed at once. It is stated that the British officer in command showed himself unnecessarily aggressive in his dealings with the Yugoslav officials, that he boasted of having twice turned the Serbs out of Korushka, and was going to have them as quickly out of the Baranya. As an instance of the attention that is being paid to these reports I may mention that the *Jutarnji List* of Zagreb attributed this hostility to an Ally and partisanship for enemies to inspiration from London, caused by the investment of British capital in Danube navigation, which will be easier to control with that stretch of the river in Hungarian hands, since the British are now all powerful at Budapest. It is certainly most undesirable that Yugoslav papers, in Belgrade and in Zagreb, should accuse a British officer of gross partisanship and partiality in the execution of his duty as a delegate of the Allied Council in dealing with a defeated enemy, and should infer from the absence of any notice being taken of their charges that their accuracy is established. Advantage is likely to be taken of the incident in interested quarters in order to inflict a blow on British prestige, at a time when British business relations with Yugoslavia are becoming more and more important.

The natives of the Baranya are extremely disappointed at the failure of their little republic. A large number of them are migrating into Yugoslavia. It is stated that 3,000 of the miners of the Pécs collieries have left the district to seek work in the Yugoslav mines. The population is very mixed, consisting of Hungarians, Germans, Slovak colonists and Yugoslavs, many of whom are Serbian immigrants from Herzegovina who have accepted the Roman Catholic faith. That the Slavs should flee from Maygar reprisals is not at all surprising. It is also interesting to note that the Austro-Hungarian 6th Regiment mutinied in May, 1918, against Austria, claiming a republic. A number of ringleaders who were condemned to death succeeded in escaping. The Hungarian element is divided between the Horthyists and the Karolyists, who are out for a socialist-republican regime in Hungary and look to Yugoslavia for allies against Admiral Horthy or any possible return of the Hapsburgs.

**The Hapsburgs.**

The Hapsburgs are learning something about unpopularity. The ex-Emperor Karl failed to get back to Budapest, and another member of the family has tried to take up his residence in Yugoslavia, but without success. The Archduke Reiner, the most popular member of the Hapsburg family, son of the Archduke Leopold Salvator, made a morganatic marriage and renounced his rights. His wife is the daughter of Baron Vladimir Nikolitch of Zagreb, and the ex-Archduke has recently been visiting his father-in-law. He has also been in Liubliana and Bled, under a false passport with the name of Karlstein. But he was found out and conducted to the frontier.

**Elections in Montenegro.**

The first municipal elections in Montenegro have just been held, and the results are interesting. There are now, of course, no Communists. The Democrats swept the board with 33 successful candidates, the Radicals came next with 16, and these combined made an overwhelming majority in favour of the Coalition Government. The remaining parties are represented as follows: One Neutral, one Republican, two "Green," i.e. *Zelenash* or reactionaries, and supporters of the Petrovitch Njegush dynasty, and one Councillor who rather pathetically describes himself as an ex-Communist.

**Miscellaneous News.**

The sensation which was caused some weeks ago by the arrest of the Russian General Komesaroff has been increased by the revelation that he was not only in close touch with the Communists, but also a pronounced germanophil, as is shown by documents discovered in his possession. The police are said also to have discovered a certificate to the effect that he was in the service of the Hungarian Intelligence, recommending him to all Hungarian officials.

The Belgrade Consumers Association has succeeded in reducing the price of meat by a dinar and a half per kilo, by establishing their own butchers shops, where they are selling beef and veal at six dinars per kilo, against the 7½ dinars which is the price in the shops. Even this is a reduction on last year's prices.

It is unusual for wolves to put in an appearance in the low ground or near villages except during long hard frosts. It is probably the prolonged drought which is the cause of packs of these animals in several districts along the coast. In one commune they have destroyed about 200 sheep. They are extraordinarily bold and penetrate right into the paddocks of the villagers. The police are organising a wolf-drive and the peasants, who had been disarmed, will have their weapons returned to them.

## GREECE.

*Athens, August 26.*

**The Death of King Peter.**

The news of the death of King Peter, King of the Serbs, Croats, and Slovenes, was received her with much regret. The Minister for Foreign Affairs, M. Baltazzi accompanied by the Director of the Foreign Office, called at the Serbian Legation and expressed the condolences of the Hellenic Government to the Minister, M. Balougdjitch. The sad news of King Peter's death was immediately telegraphed to King Constantine at the front.

A service in memory of the late King was held last Sunday morning at the Russian Church in Athens, in the presence of the Diplomatic Corps, the Prime Minister, M. Gounaris, the Ministers for Foreign Affairs and Marine, also a large number of Serbians and Russians residing in the Greek capital.

**An Attempt that Failed.**

An attempt to wreck the Dedeagatch-Karagatch train was made on the night of August 15, when two bombs were placed on the railway line at a point about 10 kilometres from the latter town. The bombs exploded a few minutes before the arrival of the train destroying a bridge. Unaware of what had occurred, the train continued its onward run and the engine and one wagon fell into the stream. Fortunately there were no victims.

The authorities have taken extraordinary steps to discover the perpetrators of the dastardly attempt which reminds one of the policy of frightfulness adopted by the *Komitajis* in Macedonia prior to the Balkan wars. The attempt is attributed to members of the so-called Turko-Bulgarian revolutionary organisations which were recently formed in Thrace. Five arrests have been made so far.

**The Crown Prince of Persia.**

On Friday last Athens was honoured by the visit of the Crown Prince of Persia, who arrived from Alexandria accompanied by his uncle, the Persian Prime Minister, and many other high officials.

The distinguished visitors were received by Admiral Malicopoulos and the harbour-master of Piraeus, on behalf of the Hellenic Government, and after spending a few hours in Athens and visiting the Acropolis and the Museums, returned to their ship, which left in the same evening for Smyrna and Constantinople.

**Greece and the League of Nations.**

The Minister for Foreign Affairs, M. Baltazzi, who was appointed President of the Greek Delegation at the second session of the League of Nations, declares that owing to the political situation he will be unable to leave Athens at present. He will be replaced by M. G. Streit. The other members will be M. D. Panas, Greek Minister at Bucharest, M. S. Seferiadis, M. Frangoudis, and M. Lambiris. The military and naval advisers have not yet been appointed. The Greek delegation will probably leave Athens on Sunday.

**General News.**

The Government has denied the rumour to the effect that the High Commissioner of Smyrna, M. Stergiadis, had tendered his resignation.

The Press Bureau of the Ministry for Foreign Affairs has issued a statement denying the information published in the French and Italian newspapers to the effect that the ex-Kaiser sent a telegram to King Constantine and Queen Sophie congratulating them on the victories of the Hellenic Army.

An offer by a German firm of 50 aeroplanes, now in Denmark, was declined by the Greek Government.

King Constantine who was suddenly taken ill at Eskishehir is rapidly recovering his health. His Majesty has been ordered by the doctors to stay in bed for a few days.

The Minister of War, M. Theotokis, has returned to Eskishehir.

Colonel Macrycostas has been appointed Quarter-master-General in the place of Colonel Lidorikis, who has been granted leave.

## ROUMANIA.

*Bucharest, August 24.*

Outwardly the week has been uneventful in the political world as far as the various parties are concerned in their relations to one another, and the situation remains intricate. In the inner political life the outstanding feature this week is the secession of M. Take Jonescu's partisans at Jassy from the Governmental group of that town; the former have denounced the fact of collaboration and have intimated to M. Take Jonescu to do likewise at the centre within the ensuing two months. This manifestation took place just on the eve of M. Take Jonescu's departure for abroad, and as the Cabinet cannot in present circumstances afford to allow a domestic conflict to grow, M. Argetoyano, Minister of the Interior, has undertaken the task of squaring up matters before Parliament re-assembles. M. Take Jonescu has gone on leave for forty days, and will take the waters at Vichy; his journey has no official character, but he expects to meet various Western statesmen. The Cabinet will be presided over by M. Argetoyano, and the Ministry of Foreign Affairs will be in the charge of M. Antonesco, Minister of Justice; until such time as General Averesco returns.

**Roumania and the Soviets.**

In reply to a note from Tchitcherin, the Soviet Foreign Secretary, complaining about the hostile attitude of Roumania and ascribing to her the intention of declaring war on the Soviets, the Foreign Office has declared the allegations devoid of foundation, and has pointed out that on the contrary, bands of Bolshevists have repeatedly attempted to make incursions on Roumanian territory. The Soviet Government, moreover, has been reminded that M. Tilalitti, President of the Roumanian Delegation appointed to negotiate with the Russian Government, has been waiting for the last four months to be put into touch with the Soviet delegation.

In another note the Soviet Government expressed the wish to be allowed to send a Commission to buy wheat in Roumania. The Cabinet replied that the sale of wheat in Roumania for export is being carried out exclusively by the State, and that as about 20,000 wagons are to be delivered first to France on an old contract, the State will not be in a position to ascertain the available surplus until after delivery has been completed.

**Miscellaneous News.**

An Inter-Allied Commission for the delimitation of the Roumano-Hungarian frontier has arrived, and the members have been presented to Prince Carol. The Commission subsequently left for Budapest, *en route* for Oradea-Mare, where it begins work.

General Rashcano, Minister of War, has been delegated to represent Roumania at the funeral of King Peter of Yugoslavia.

At the invitation of the South-East European Institute, Professor W. Craigie of Oxford, and Dr. A. Wright, Vice-President of the Folk-lore Society have arrived to give a series of lectures.

The Roumanian steamer *Regele Carol* has been put at the disposal of the French University Professors and students who are to leave Naples on August 27, and are due to arrive at Galatz on a visit to Roumania.

Large fires in the forests around the mountains of Colibitzia and Parva have taken place lately. As so frequently proves to be the case, the fires have been found to be the work of shepherds anxious to enlarge the grazing areas for their flocks.

**SCHOOL OF ORIENTAL STUDIES.**

## BULGARIA.

*Sofia, August 28.*

**The Political Situation.**

The Sobranje assembled on the 25th for its extraordinary Autumn Session, and yesterday the amendments to the law for the trade in cereals, and "Article 4" were due to be brought in. M. Stambolisky is expected back any day and it is not likely that the amendments will be finally approved before he returns.

It is now an open secret that the ranks of the Agrarian Party are divided; and at the meeting of the party which was held at Sofia ten days ago a vote of confidence in the Government was only passed by a small majority. There are two main groups amongst the Agrarians which for purposes of reference may be styled the Moderates and the Extremists. The Moderates have at their head M. Manoloff, President of the Sobranje, who is actively supported by M. Thomoff, the newly appointed Minister of the Interior, and also by three other Ministers, M.M. Radouloff, Boteff, and Tourlakoff. The adherents to this group number about 40 out of a total of 109 Agrarian Deputies in the Sobranje. Their policy may be said to be nearly a "bourgeois" one; and in conjunction with M. Drachioff, who is still living quietly at Stara-Zagora, they aim at the gradual restoration of the economic life of the country, without having recourse to violent and extreme legislation. The extremists count amongst their leaders M. Dimitroff, Minister of War, M. Dashkaloff, Minister of Commerce, and M. Onarchevsky, Minister of Public Instruction, whilst they have a following of some 50-60 deputies. Their policy is an entirely agrarian one and is calculated to favour only the peasants at the expense of the bourgeois.

There remain the Prime Minister, M. Oboff, and M. Bakaloff. The latter two Ministers appear undecided as to their future course of action, while M. Stambolisky is endeavouring to bring about a reunion and conciliation between the two opposing groups.

The fact that there is disunion amongst the Agrarians is, however, a serious menace to the continuance of the Government, as there are indications that the principal opposition parties have at last patched up their petty differences and are ready to show a united front. The Democrats are the chief among the various parties in opposition, although the Communists are numerically stronger, and it is they—the Democrats—who supply the two leading men, viz., M. Malinoff and M. Liaptcheff.

Naturally it is impossible to predict when a change of Government will take place; but it is considered in well informed circles, that the time is drawing very near. For a long while past discontent at the prevailing economic situation has been increasing, both in the minds of peasants and bourgeois, and the idea that a change, no matter what it is, will be for good has been growing.

The Agrarian Government has held office, as a purely Agrarian Government for less than two years, but these years have not been ordinary ones, coming as they did in the wake of a great war and entailing many difficulties in the way of both external and internal administration. In view of the many reforms which the Government has either brought in or attempted to bring in, and the widespread unpopularity of these reforms it would seem that the Government might at least be well advised to appeal to the country for a further vote of confidence. If it took this step, the matter would at any rate assume a clearer aspect and the country would know where it stood. It is, however, to be feared that in certain quarters the love of power is too great to allow of this step being taken and a change will only be brought about by political manoeuvres. There remains, of course, the King, who has the right to demand the resignation of the Government; but for a young Monarch, who is entirely alone, this step offers considerable difficulties.

Meanwhile the chief figure, M. Stambolisky is still abroad, and although he is daily expected back, it is said that his stay will be of short duration, as he is due to attend the Conference of the League of Nations at Geneva on September 5. When he returned from his "100 days tour in Europe," he found that intrigue and disaffection were ripe in his party, but the presence of his commanding personality soon sufficed to dispel the trouble. It is possible that once again he may be able to pull his party together, but it is certain that his task is much harder to-day than it was six months ago.

**The Army.**

On Tuesday, the 22nd, in conformity with the decision of the Council of Ambassadors, 7,000 men were dismissed from the Army and from now onwards 7,000 will be dismissed each week until by the end of September the Compulsory Army is totally disbanded. Meanwhile recruiting for the Voluntary Army is proceeding very slowly, and the total number of soldiers so far obtained is under a thousand. The conditions of service have been made even more attractive, the pay of a private soldier having been raised to 750 levas a month with the promise of 4 months' leave on full pay each year. The officers pay is to be doubled. The amount necessary for the upkeep of the Army now being so large, it is not likely that any further increases in pay will be made. Here the matter promises to rest and on October 1 the country will be without an armed force. Nevertheless, since I last wrote on the same subject, three weeks ago, several new factors have presented themselves. The first is the suggestion that no Army at all should be kept, but that in its place a Gendarmerie should be formed, to be officered by army officers, and to have a total strength of some fifteen to twenty thousand men. The advantages of this scheme are obvious; it will cost much less than the Army, and as the length of service will be comparatively short, say three years, it should not be difficult to secure the necessary numbers. The idea is only in its infancy but is well worth considering, for it must be remembered that the Peace Treaty only allows Bulgaria an army of 20,000 proper, and owing to the relative smallness of this figure it may well be argued that the country would do well to forgo having an army at all, and instead let it be known that she looks to the Great Powers for protection in the event of external aggression.

Apart from this, there is existent an idea that the Council of Ambassadors may allow a delay for the execution of the terms. The reason for this life lies in the fact that the Government, no doubt to a certain extent guided by the views of the Inter-Allied Military Commission of Control, always thought that some modifications would be made in the terms. The order for the complete disbandment of the Compulsory Army by October 1 came in the nature of a bombshell.

**Departure of Sir Arthur Peel.**

Sir Arthur Peel, the retiring British Minister, left Sofia on Tuesday the 23rd, for London. A large number of officials and friends were at the station to see him off, and general regret is felt at his departure.

Sir Arthur Peel, and Colonel Baird, the Military Attaché for Turkey and Bulgaria were the guests of King Boris at Euxinograd Palace, Varna, last week, and after the Minister had presented his letters of recall the King bestowed on him the Order of Civil Merit (1st class).

The new Minister, the Honourable W. F. Erskine, is not expected to arrive until the middle of September, and till them Mr. Rodd, Secretary of the Legation, will act as Chargé d'Affaires. This is the third change in two years that has taken place in our Diplomatic Representation at Sofia; Sir Herbert Dering holding the first for nine months from January 1920 to October of the same year while Sir Arthur Peel has only been here ten months. The coming Minister is a younger brother of the Earl of Mar and Kellie and has been Minister at Havana, whilst he has previously held posts at Rome, Athens, and Stockholm.

Sir Charles Stewart Wilson, the Secretary General of the English Delegation on the Reparations Commission, left Sofia on August 27 for London.

M. Radeff, the newly-appointed Bulgarian Minister to Berne, left Sofia on August 20, to take up his post.

Digitized by Google

## ALBANIA.

*Tirana, August 27*

**The League of Nations and Albania.**

September 1 is the date fixed by the Secretary General of the League of Nations for the attendance of the Albanian delegates at Geneva, when the Council proposes to consider the relations between Albania and Serbia. The opinion held in Albania is that these relations can quite well be maintained on a correct and friendly footing if the Serbians accept the frontier fixed in 1913 and if Greece subsequently can be brought to accept it as well.

**Serbian Bands.**

According to the information received here the Yugoslav authorities continue to form and arm bands of Serbian *Komitajis* to operate on Albanian territory. These bands are sent towards Luma and Mirdita with the object of creating the impression that the north of Albania is in revolt against the Tirana Government. But in spite of all the rumours which find their way into the foreign press there is no point at issue between the Mirdites and the Government; the chief Marka Gjoni is in Serbia with a handful of followers only. The Mirdites themselves, as well as the other Catholic inhabitants of Northern Albania, are opposed to all insurrectionary movements.

**Relations with Greece.**

For the last few days there has been an appreciable improvement in Greco-Albanian relations. The frontier between Koritza and Florina, which has been closed for three months, has been re-opened; travellers pass without encountering any difficulty, and trade has resumed its normal aspect.

**The Island of Saseno.**

A report has gained currency that Great Britain had proposed that the island of Saseno should be handed over to Greece on the ground that the majority of the inhabitants were Greeks. Commenting upon this the *Drita* of Argyrocastro remarks:—Saseno is an uninhabited rock; there are only rabbits on it, and we do not suppose that these animals are Greek. At the present moment there is a company of Italian soldiers on Saseno. The island, however, is still regarded by the Albanians as an integral part of Albania. The agreement signed at Tirana on August 2, 1920, between the Albanians and the Italians did not give the latter any rights on the island of Saseno. Albanian sovereignty over it is unimpaired. Albania, moreover, can never renounce her sovereignty over the island for fear of disturbing the equilibrium of her frontiers, through seeing herself compelled to make similar sacrifices in other directions. In other words Albania does not wish to recognise any Italian right over Saseno, as she does not wish and cannot consent to any rectification of the frontier in favour of the Serbians.

From an authoritative source I learn that on July 8 last, the British delegate before the Commission on Albanian affairs at the Quai d'Orsay, having asked whether Albania considered the island of Saseno within her 1913 frontiers, the Albanian delegate replied that "the 1913 frontiers admit of no exception." Another argument used by the Albanians is as follows:—Italy wishes to have Saseno in order to guarantee her supremacy in the Adriatic, and, if occasion arises, to use it as a base in any future conflict with Yugoslavia. But in that case Slavs and Italians would be fighting one another on the Albanian coast and would make Albania their battleground. Very rightly Albania has no desire to be ravaged by armies fighting for a cause to which she remains a stranger.

## CYPRUS.

*Nicosia, August 16*

**News from Smyrna.**

Letters from Smyrna (where there are over 1,600 Cypriots one of which is published in the *Phone tes Kyprou*, say that the strongest desire prevails that, after the conclusion of the King's "triumphant campaign" in Asia Minor, when elections are likely to be held in Greece, M. Venizelos should obtain a commanding majority, and will, it is hoped, return to occupy the position to which his splendid services entitle him. The King, it is asserted, speaks in the highest terms of him, and of what he is doing for Greece, and the future should see the official collaboration of these two great saviours of Hellas. The British Consul, it is reported, has appointed a committee to watch over the interests of the Cypriot colony. The greatest order prevails in the city.

**Miscellaneous News.**

The High Commissioner has been paying a visit to Limassol, and has taken advantage of the opportunity for some sea bathing. He has also been to Larnaca, where he received a visit from the new Hellenic Consul, M. Papavasiliou. After proceeding to Nicosia, he has returned to Troodos, accompanied by the Acting Chief Secretary.

The Chief Inspector of Schools, Canon F. Newham, has been requested by the High Commissioner to examine all the school buildings at Nicosia, and to submit a report on their condition. Progress is being made with the rebuilding of the Greek Gymnasium, which was destroyed by fire. In reply to the application for a loan of £10,000, the Loan Commissioners have stated that present circumstances do not admit of the advance of such an amount. This has caused disappointment, but it is hoped that it may be found possible to lend smaller sums annually for a term of years.

## THE ACCESSION OF KING FAISAL.

On the occasion of his enthronement in Baghdad the following telegram was sent to King Faisal by His Majesty King George:—

I offer your Majesty my sincere congratulations on this historic and moving occasion, when, by an overwhelming vote of the people of Irak, the ancient city of Baghdad has again become the seat of an Arab kingdom. It is a source of deep gratification to myself and my people that the combined military effort of the British and Arab forces and those of their Allies has culminated in this memorable event. The treaty which will shortly be concluded between us to consecrate the alliance into which we entered during the dark days of war will, I am confident, enable me to fulfil my solemn obligations by inaugurating an era of peace and renewed prosperity for Irak.

(Signed) GEORGE, R.I.

To this message King Faisal sent the following reply:—

I am profoundly touched and greatly rejoiced at the royal and gracious favour which you have extended towards me and towards my people in your Majesty's message. On this auspicious day, when Baghdad, the city of the Khalifs, has become for the second time the capital of an Arab kingdom, I recall with pride how white has been the hand of your Majesty and of your noble people in the achievement of Arab aspirations. I am confident that the Arab nations will justify your Majesty's reliance on the success of their efforts to regain their pristine glory provided that they continue to enjoy the support and friendship of Great Britain. I doubt not that the treaty which will be concluded shortly between us will strengthen the bonds of alliance, already cemented with the mingled blood of Briton and Arab on the battlefield of the Great War, and that it will be established on unshakable foundations. Finally, I wish your Majesty and your honoured nation continued prosperity and enduring glory.

## NEWS IN BRIEF.

The *Times* Simla Correspondent states that the Ameer's Kalifa, with 500 Tori pilgrims, have left Kabul for Herat, *en route* to Meshed.

M. Stambolisky, the Bulgarian Premier, who returned to Sofia last week, left again to attend the Assembly of the League of Nations in Geneva on September 5.

The Bengal Legislative Council has, by a majority composed of the non-official members, passed a resolution demanding an inquiry into the general working of the Calcutta University.

Reuter's Agency learns that, owing to the disfavour with which the proposal to appoint Dr. Streit as Greek representative to the League of Nations Assembly was met amongst the Allies, the Greek Government decided that he should not go to Geneva.

A Reuter's message from Sofia, dated August 26, announces: The Minister of Finance, in his capacity as representative of the Bulgarian Treasury, will hold a watching brief in the suit against the former Radoslavoff Cabinet for the sum of 10 milliard leva (nominally £400,000,000), for damage caused to the State by the entry of Bulgaria into the war as an ally of the Central Powers in 1915.

# PRESS ON THE NEAR EAST

## Bulgaria's Future Army.

In the third of a series of articles written from Sofia Lieut-Colonel Repington discusses in "*The Daily Telegraph*" the question of disarmament. After referring to the military clauses of the Treaty of Neuilly, and to the statements regarding the concealment of arms, which place the number of rifles supposed not to have been delivered up at figures ranging from 20,000 to 180,000, he deals with the question of voluntary enlistment.

But these are not the most serious grounds for the marked uneasiness which prevails here on the question of the military articles of the Treaty. The trouble comes from two main causes: first, the inability, or professed inability, of Bulgaria to raise an army by voluntary recruiting, or to pay for it; and second, the passing of a law on compulsory labour, which has a strong affinity to conscription, and could be adapted to that purpose without much difficulty were the necessity to arise.

To deal with the army first, the position is that the Council of Ambassadors in Paris has cut all arguments short by giving a definite order that the army is to be placed on a basis of voluntary enlistment by October 1. Every Bulgarian whom I have consulted alleges that this is impracticable. The argument is that voluntary military service is unknown in Bulgaria; that the peasant proprietor will not enlist, least of all for twelve years; that to ask Bulgaria to raise 20,000-recruits for voluntary service in two months is the same thing as to ask England to raise 200,000 on the same terms and in the same period; that the only elements likely to enlist are the *vauriens* and the corner-boys; that such an army would have no discipline, and could not maintain order; that it might either become a Communist toy, as happened in Austria, or a Pretorian guard which would support some *coup d'etat* and become a public nuisance. The general impression is that 20,000 recruits, or even a quarter of that number, could not possibly be raised in the time, and a serious feeling of anxiety spread abroad when the Paris decision was announced. Lastly comes the argument that if Bulgaria could raise the 20,000 volunteers, she could not pay for them and the Reparations Commission appears to share this view. ..

Despite these opinions, and a statement made to me by a very level-headed British member of the Reparations Commission that Bulgaria had done her utmost to encourage voluntary enlistment and had failed, I am not convinced of her inability to carry out Article 65 of the Treaty, given a reasonable time. A great many Bulgarians go abroad annually to make money, and a great many more enlist in the French Foreign Legion, France having been careful to safeguard her powers of recruiting for the Legion under Article 103. There must obviously be a considerable floating population not tied to the land, while the fact that volunteers may not be so good as those made available by compulsion is common to all States that retain voluntary service.

But it will take time. General de Fourton thinks that Bulgaria may raise some 3,000 or 4,000 men the first year, and a similar number in subsequent years. His proposal is to make up the balance by ballot; to embody the unlucky number for four years, and gradually to replace the conscripts by volunteers as the latter enlist. The process may last some five years before it is complete. This solution seems to me reasonable and to be worth trying, but it has been refused by Paris, which has issued the edict to which I have alluded. How things will now go I cannot say, but it is obvious that to leave this country without the power of maintaining order is to assume a very heavy responsibility, and to bring before us the unpleasant alternative of a foreign occupation, the end of which cannot be foreseen.

I think that we ought to start from the Treaty, and make it abundantly clear to Bulgaria, as indeed Paris has done, that the terms which she accepted must be carried out, and that the Bulgarian army of the future must be voluntarily enlisted. But it is no use to try to fit every nation, regardless of its circumstances, into a bed of Procrustes, and to pretend that the conditions in Eastern and Western Europe are identical, when they are, in fact, totally different. Therefore, I think that, as local conditions must govern our action, we ought to leave to General de Fourton entire liberty as to the time, and what we call the modalités, for effecting the transition and carrying out the Treaty stipulations. Also, I think that it should be a matter for very serious consideration whether 3,000 frontier guards are enough to terminate the raids upon the Greek and Roumanian frontiers. In other words, we must look at facts as they are, and not legislate for a situation which does not exist.

## Jew and Arab.

In an article entitled "Partners, not Enemies," *Palestine*, in its issue of August 27, seeks to show how the Jew and Arab may develop side by side in Palestine. It says that the Arab deputation in London, in asking the British Government to break its word to the Jews, is not expressing the real mind of the Arab. But it may be, it continues, that the Arab delegation will report on its return to Palestine that a policy of obstruction is against the interests of the Arabs, in which case the Jews could easily find a basis for settlement.

When the promise of a Jewish National Home was made there can be no doubt what was meant. What was in mind was a State of Palestine whose civilisation should be sufficiently Jewish to make a Jew who settled there feel himself to be at home, and to have a nation of his own. There are two ways in which that end could be accomplished. We might have begun by setting up a State in which the Government was entirely in the hands of Jews, and in which the British Government lent this Jewish oligarchy its physical support until such time as Jewish immigrants became a majority, and were able to defend themselves. There are parallels for this way of founding a State. Spain did something of the sort in South America, and England in Australia. But there the indigenous population was weak, divided, and, in the case of Australia, degraded, and this method obviously is not applicable to Palestine, and was never meant to be applied there. What is the alternative? To form a Government out of the elements existing in the country, and to leave the Arab majority and the Jewish minority to settle their own differences as best they can? That seems to be the idea of the Arab delegation, but everyone knows what the result would be. The Arab majority would resist the immigration of Jews and see to it that they never became a majority, but remained so small a minority that Palestine could never be their own or a nation that they could call their own. In other words, the policy of the Arabs would inevitably be to defeat the promise of a National Home to the Jews in Palestine.

Between these two extremes—the immediate establishment of a Jewish oligarchy based on physical force, whether its own or British, and the immediate setting up of a system of government whose policy is determined by a mere counting of heads—the one extreme advocated by a few rash and unwise Jews, the other by bigoted and unfriendly Arabs, there has to be found a middle course, which is both a fulfilment of the promise of a National Home and provides the fullest safeguards of Arab rights. This middle course cannot be found so long as a few Jewish extremists think of their home as a racial oligarchy imposed on an Arab majority, or so long as Arab extremists set themselves to resist the immigration of Jews and their chances of founding in Palestine a home and a nation. There must be no race-ascendancy policy on one side or the other. All Arab rights—social, legal and religious—must be respected, but Jewish rights—both present and prospective—must be guarded with equal jealously.

## "LA VITA ITALIANA."

Last month's issue of this Italian Magazine has two articles dealing with Near Eastern politics, "The Eve of a new Balkan War," and "Roumania and Bolshevism." The former, provocative and tendencious in tone, suggests, indeed invites, a Bulgaro-Serb attack on Greece, for the reversion of Thrace, while Greece is fighting in Anatolia. Apparently *La Vita Italiana* is so jealous of Greater Greece as to forget that Italy, like the rest of the world, is sick of national hatreds. "Roumania and Bolshevism" is a frank and critical exposition of the Roumania of 1921, and a friendly call to the fifth Latin State to "quit you like men" and "be strong." This latter article is an excellent reminder that Italian statesmanship, at its best, is no Cinderella among the Chancelleries of civilization—a wretched but prevalent opinion that every good Italian bitterly resents.

## A GLIMPSE OF TRIBAL CIVILISATION.

**"THE ANGAMI NAGAS," By J. H. Hutton, C.I.E., M.A.** *(Indian Civil Service)* **(London: Macmillan and Co., Ltd., £2 net.)**

Assam is separated from Burma by a hilly region which extends from the valley of the Brammaputra to the Bay of Bengal. Its northern portion is occupied by a congeries of tribes who have not yet received the attention they deserve from British anthropologists. Every stage in the progress of mankind, from barbarism to a relatively high degree of civilisation, may be studied in their habitat. Mr. J. H. Hutton, C.I.E., has made the most advanced of those communities the subject of a monograph which possesses absorbing interest. The Angami Nagas, of whom he discourses:—

Pay no house tax, and do no reluctant coolie work; know not the seed of conversion, and the sword of dissension which missionaries bring, nor have been made to eat of that forbidden fruit which drove our first parents into fig-leaves and banishment. The diseases which follow in the wake of civilisation have not yet touched them, and they go clothed with modesty rather than "Dhooties."

It is a mistake to suppose that alien forms of civilisation imply diversity of mental processes; for intensive study reveals fundamental similarity in most branches of the human race. The Angami Nagas are highly intelligent. Their outlook on life is more consonant with the average European's than that of the majority of Indians, whose perceptions have been warped and stunted by the trappings of caste. Truth with them is the rule, and falsehood the exception; and they will serve a sympathetic master with conspicuous fidelity. Their lavish hospitality towards strangers stands in marked contrast with the frugality of their households. They have a keen sense of humour, and are always ready for a joke.——

And yet behind their spontaneous geniality lies a vein of deep melancholy. The thought of death is never far from them, and the fear of it is a potent factor in their lives. This is particularly noticeable in their songs; their music, invariably solemn and dirge-like, being reminiscent of the fifty-first Psalm, even though the subject be love, as it almost invariably is. But this is not all. There is a tendency in the vast majority of their songs to animadvert on the brevity of life and the dread finality of death.

Thus Angami Naga folksong echoes the Horatian plaint:—

We, alas, earth, naughty kings,
We, who promise better things,
Losing soon our happy prime,
Pine and fade in little time.
Spring returns, but not one bloom;
All is silent in the tomb.

A race which is moved by such sentiments has emerged from the soul-crushing level of barbarism. It must be admitted that the Angami Naga has no regard whatever for sanitary science; and was an inveterate head-hunter until British influence compelled him to mend his ways. He is an instructive monogamist, treats his women-folk with kindness, and respects the sanctity of the marriage tie; but does not expect chastity in the unmarried girls of his class. His religion is a mixture of animism, magic and reverence for nature-powers; but idolatry is quite unknown. Great progress has been attained in craftsmanship; spinning, weaving, and metallurgy being practiced with the help of simple but effective machinery. Splendid crops are raised by terrace cultivation, and deficiency in rainfall is remedied by a complex system of miniature canals. The Angami Naga warrior's costume at the ceremonies in which he delights, is as elaborate in its way as that of Louis the Fourteenth courtiers. Indeed, as regards the "scaffolding of life"—to use a happy phrase invented by Sir M. Grant-Duff—the tribes on our North-Western Frontier have made greater progress than their contemporaries on the other side of India.

The folklore of this isolated region proves that many western legends have travelled far afield. Browning's "Pied Piper of Hamelin" has its counterpart in an Angami Naga tale telling how a strong man took refuge from his enemies in a cave, and thereafter enticed their children to his retreat.

By singing and making manifold music; and the parents of the boys sought them but found them not."

Still more curious is the Angami Naga version of the Biblical "Tower of Babel."

Ukepenopfu was the first human being. Her descendants are very many. Instead of dying, she was translated into heaven. Later on her descendants thought to communicate with her by building a tower up to heaven, up which they might go and talk to her. She, however, knowing their thoughts, said to herself, "They will all expect presents, and I have no presents for so many men. The tower must be stopped before it gets any higher." So she made all the men working at the tower to talk different languages, so that they could not understand each other; and while one said "bring a stone," they would fetch water or a stick, and so forth; so that all was confusion, and the tower was abandoned. Hence the different tongues of the various tribes of men.

Mr. Hutton's monograph is illustrated by 54 maps, sketches, and photographic plates. Although he modestly refuses to pose as an ethnographer, he has produced a work of great scientific value, which may serve as a model for future studies of the isolated branches of our race. F.H.S.

## THE DITHYRAMBICS OF NON-CO-OPERATION.

**"THE POLITICAL GITA or THE PHILOSOPHY OF LIFE." By V. M. Shah, Bombay, "Published for free Circulation among world-thinkers only."**

This is a rather thinly-disguised pamphlet in favour of the non-violent type of non-co-operation. At least we think that is the object, but it may really be meant as a skit; we have tried it both ways, and can make nothing of it. Just at the end, the author explains that it is the result of meditating upon the experiences of (amongst others) Kabir, Nietziche, Rama and Schopenhauer, and perhaps mental indigestion is the most sympathetic diagnosis.

## IN THE TERAI JUNGLE.

**"THE JUNGLE GIRL," by Gordon Casserley (London: Philip Allan and Co. 6s. net.)**

The story of sport in India, particularly in the Terai Jungle, will give pleasure to many readers, and they will follow with real excitement the adventures of Frank Wargrave. He must be regarded as the hero of the tale, as his tangled love affairs form the plot which keeps together the descriptions of his experiences when tiger shooting and so on. But the real hero is obviously the elephant, Badshah, who has apparently played the same part in a former book by Mr. Casserley. The final adventure, when Badshah is the means of rescuing Cassidey and the loyal and attractive Jungle Girl makes a suitably thrilling climax to a story that holds the reader's attention from the beginning.

**ITALIAN SELF-TAUGHT, GRAMMAR WITH KEY**

**By G. DALLA VECCHIA and A. C. PANAGULLI.**

For learning the Language by the Natural Method. It contains Classified Vocabularies, Travelling by Rail, Road, and Sea, Cycling, Motoring, Post, Telegraph, &c. ## PERSONAL AND GENERAL.

**To-Day.**
September 8 (New Style).
August 26 (Old Style).
Moharram 6, 1340 A.H., of the Moslem Calendar,
Elul, 5,5681, of the Jewish Calendar.

The King and Queen of Roumania arrived in Paris last Thursday from Dinard.

M. Stancioff, the Bulgarian Minister, has returned to town from the country.

M. Slavko Grouitch, Yugoslav Minister in America, arrived in London last week on his way to Washington.

M. Nicolas H. Lahovary has been appointed First Secretary to the Roumanian Legation in London.

His Highness the Maharao of Kutch left London last week for Geneva.

Field-Marshal Lord Plumer and Lady Plumer have left England for Malta.

The Earl of Bessborough left Southampton last week in the R.M.S.P. Avon for South America.

On August 26, at Alexandria, a son was born to Mr. and Mrs. C. P. Lea-Birch of Khartoum.

Dr. V. Mastny, the Czecho-Slovak Minister, has left London for The Hague to attend the International Law Conference.

On August 25, at Postmore, Simla, a daughter was born to Captain K. H. Noel (Indian Army) and Mrs. Noel.

A marriage has been arranged, and will shortly take place, between Mrs. Gladys Robinson Duff and Mr. Robert Vansittart, C.M.G., M.V.O., of the Foreign Office.

Prince William of Sweden, travelling as the Duke of Sodermanland, has arrived at Khartoum from a sporting and scientific expedition in Uganda and the Belgian Congo.

A marriage has been arranged between William Stalkartt Morrison, I.C.S., Burma, and Edith Eleanor, eldest daughter of the Rev. Herbert and Mrs. Moore, Acton Vicarage, Nantwich.

According to a Geneva report M. Jean Ghika, the 16-year-old son of the Roumanian Minister in Paris, slipped while making a descent from the Thion crest, and was killed.

The marriage arranged between Lieutenant Colonel Pierce Yoyce, C.B.E., D.S.O., Croix d'Officier, Legion d'Honneur, Connaught Rangers, and Miss Colin Murray will take place in Bombay about October 1.

Adly Yeghen Pasha, Prime Minister of Egypt, has left London for Paris. The negotiations between the Egyptian and British Governments will be resumed at a later date.

Mr. Norman Bentwich is on his way to London to discuss legal matters concerning Palestine. He will be absent for about two months, during which period Mr. R. H. Brayton will take his place as Legal Secretary.

The engagement is announced of Captain E. V. R. Bellers, 1st K.G.O. Gurkha Rifles, eldest son of Colonel E. V. and Mrs. Bellers, of Bedford, and Nancy, youngest daughter of Colonel H. J. and Mrs. Barnes, of Colyton, Devon.

M. Alex Ludskanof, formerly Bulgarian Minister of the Interior, has arrived in London to act as Bulgarian representative on the Mixed Arbitral Tribunal set up to deal with the private claims of British and Bulgarian nationals.

On September 1, at St. James's, Paddington, the marriage took place of Mr. David Jardine Bethell, M.C., Sudan Civil Service, youngest son of Col. E. H. and Mrs. Bethell, of 18, Hyde Park Square, to Erica Gwytherne de Grey.

A marriage has been arranged between Captain A. G. C. Bidie, 10th. Lancers, Indian Army, and Madeline (Madge), eldest daughter of G. H. Bent, 11, Brechin-place, London, and will take place at the Brompton Oratory on September 12, at 2.15 p.m.

Mr. John H. Humphreys, Secretary of the Proportional Representation Society, is visiting Malta, at the suggestion of the Maltese Government, for the purpose of giving advice with regard to proportional representation, which is to be applied to the coming elections in the island.

On August 31, at St. Michael and All Angels', Chetwyn, the marriage was solemnized of Mr. A. H. Gurney, I.C.S., to Miss Nancy Ward Evans, only daughter of Dr. and Mrs. H. Ward Evans, of The Old Hall, Newport, Shropshire. The Rev. Charles Peake officiated.

The marriage was celebrated on August 23, at St. Peter's Church, Bishop Auckland, by the father of the bride, between Kenneth Henry, eldest son of Mr. and Mrs. E. T. C. Joly, of Beyrout, Syria, and Ethel Gertrude eldest daughter of the Rev. C. F. and Mrs. Bickmore, of Bishop Auckland, County Durham.

The marriage arranged between Robert Eliot Fryer (late Major, R.E.), eldest son of Lieutenant-Colonel and Mrs. C. R. Fryer, 6, Queen-street, Colchester, and Alice Napier, daughter of Leiutenant-Colonel and Mrs. H. N. Jervois, of North Leasowes, Malvern, will take place at the end of November in Bombay.

Queen Olga of Greece arrived in Paris on the 2nd inst. from Brittany, where Prince and Princess Christopher of Greece have joined her from Aix-les-Bains, to make the final arrangements for the wedding of the latter's son, Mr. W. B. Leeds, to Princess Xenia of Greece, which will take place in Paris about the middle of September.

The engagement is announced of Captain Donald Stewart Fraser, 18th Lancers, A.D.C. to His Excellency the Viceroy of India, only son of Colonel P. F. Fraser, of Bedford, and Marjorie Constance Alice, only daughter of Mr. and Mrs. Edgar Moorsom, of Norton Manor, Radnorshire.

**OUTFITS** FOR EGYPT, INDIA, AND THE FAR EAST

The engagement is announced between Douglas Ward Bell, M.C., the Worcestershire Regiment, third son of the late Mr. David W. Bell and of Mrs. Bell, of Shanghai and Bedford, and Mary Kathleen, elder daughter of Mr. and Mrs. Atherton West, of Cawnpore and Brierfield, Lancs.

---

The marriage arranged between Lieutenant C. L. D. Fawcus, Royal Artillery, Punjab, India, son of the late Mr. C. O. Fawcus and Mrs. Fawcus, The Peake, Hythe, and Kathleen, elder daughter of Lieutenant-Colonel and Mrs. Graham Swan, will take place on October 6 at Ferozepore.

---

M. Venizelos and Miss Schilizzi will be married on Thursday, September 15, at the residence of Sir Arthur Crosfield at West-hill, Highgate. After a short honeymoon on the Continent, M. Venizelos and his wife will go to America. It is their intention to stay a long while in California.

---

A marriage has been arranged, and will shortly take place, between Brian Halsey Tyrwhitt-Drake, only son of the late the Hon. Montague Tyrwhitt-Drake, of Victoria, British Columbia, Canada, and Miss Constance Letitia (Lettice) Lawrence, eldest daughter of the late the Hon. H. A. Lawrence and Mrs. Lawrence, of 9, Chantrey House, Eccleston-street, London, and granddaughter of the first Lord Lawrence of the Punjaub.

---

The *London Gazette* announces that General the Right Hon. Sir Bryan T. Mahon, K.C.B., K.C.V.O., D.S.O., has retired on retired pay as from August 31st. Sir Bryan Mahon was in command of the British Forces at Salonika from 1915 to 1916, when he became Commander-in-Chief in Ireland until 1918. In the South African War he commanded the Kimberley column of Colonial Mounted Infantry at the relief of Mafeking, and in 1903 he was Governor of Khartoum.

---

The *Gazette* announces that, under date Aug. 24, 1920, the King has been graciously pleased to ordain that Lucy Anna Maria, wife of John Storrs, Dean of Rochester, and daughter of the late Henry Francis Cockayne-Cust, shall henceforth enjoy the same title, rank, place, pre-eminence, and precedence as the daughter of a baron, which would have been due to her had her father survived his cousin, the late Adelbert Wellington Brownlow, Earl Brownlow, Vicount Alford, and Baron Brownlow, and had therefore succeeded to the title and dignity of Baron Brownlow.

---

## APPOINTMENTS AND PROMOTIONS.

It is officially announced that His Majesty, upon the advice of the Secretary of State for India, has accepted the resignation tendered by Sir Thomas Holland, K.C.S.I. K.C.I.E., of his office as Member of the Council of the Governor-General of India.

---

Mr. Robert J. Thompson, of Messrs. Furness Withy and Co., Newcastle, has been appointed honorary Consul for Roumania at Newcastle. Messrs. Furness, Withy and Co., Limited, some time ago, took over large business interests on the Danube.

---

Major-General E. H. Willis has been appointed Major-General R.A., Army Headquarters, India, in succession to the late Major-General C. E. D. Budworth. Major-General Willis was C.R.A., 12th Division and 17th Corps during the war, and subsequently in 1919 was appointed C.R.A., 6th Division Ireland. Recently he has been in command of an infantry brigade in Ireland.

## THE LATE KING PETER.

A Requiem Mass was celebrated for the late King of the Serbs, Croats, and Slovenes on September 5, at 12.15 p.m. in the Church of St. Magnus the Martyr, by London Bridge. The service was arranged for the English members of the Otder of St. Sava, and the Rev. H. J. Fynes-Clinton, the rector, officiated. The Rev. Dr. Hermitage Day delivered the address. His Excellency the Minister of the United Kingdom of Serbs, Croats, and Slovenes, was present attended by the Serbian Military Attaché. Also present were the Portugese Minister, Mr. Edward Shortt, the Home Secretary, Sir Eyre Crowe and the Hon. R. C. Lindsay, representing the Foreign Office; Mr. J. B. Monck, Assistant Marshal of the Diplomatis Corps, representing the Marquiess Curzon; Mr. Stephen Gaselee, of the Foreign Office; Mr. Featherstone Whitty, Serbian Consul at Bristol; Sir Albert Kaye Rollit, Consul-General for Roumania; Baron de Santa Maria, Count Mijatovitch, Sir Lewis Newton, Lady Grogan, Sir Thomas Lipton, Captain C. Leveson-Gower, Mr. C. E. Osborn, Mrs. St. Clair Stobart, Miss Garrett, M. de Alexyev, M. Smodlak, Archdeacon Potter, Mr. Tomlin, Lieutenant-Colonel and Mrs. Marrett Tims, Mr. Stanley Naylor, Mr. Harold Hartley, M.M.D Dimetrieveich, Colonel Lowry, the Rev. E. C. Linton, Rev. R. C. Sampson, Captain and Mrs. Gallagher, Mr. F. J. Egerton-Warburton, Miss Hedges, Miss D. Persse, Dr. Archer Houblon, Mrs, Beale, the Rev. J. Douglas, Mrs. T. C. Sandeman, Mrs. Robert Frank, and he Rev. A. M. Scrutton.

---

## OBITUARY.

### M. DEMETRI RALLI,

Our Athens Correspondent writes (August 26):—The passing away of the ex-Prime Minister Demetrius Ralli, which occurred last week, after a long illness and an unsuccessful operation in Paris, is sincerely mourned by the entire country. Born in 1844, Demetrius Ralli completed his studies in France, afterwards returning to Greece where, a few years later, he was elected deputy in the "Boule" at the age of 29. At the age of 31 he became Minister of Education under the Premiership of Charilaos Tricoupis, and had since held almost every portfolio. He was made Prime Minister for the first time in 1897, and then again in 1903, 1905, 1909, and finally in November 1920, after the fall of M. Venizelos' Government.

M. Ralli was extremely popular in Attica, and only failed once to obtain a seat in the Parliament. This happened in 1912, when Panvenizelism reigned throughout the country. He was accorded a State funeral and military honours were rendered by the whole force comprising the Athens garrison.

## PALESTINE UNDER THE MANDATE.

No fault can be found with the Palestine—on paper—presented to the world by the High Commisssioner, Sir Herbert Samuel, in his interim report on the first year's working of the Civil Administration. It is a simple record of honest endeavour and unostentatious achievement. The High Commmissioner tells his story unaffectedly. He has had no easy task, and he is within his rights in laying stress on the things of permanent value and glossing over the ephemeral ebullitions that are apt to figure so largely in the press presentation of contemporary history. A military administration had been labouring for the last two years at the restoration of the country from the exhaustion caused by the war. Palestine was already showing all the signs of gradually returning life when the Civil Administration took over the work, and at once, leaving out of account the standard attained before the war, set up as its goal a condition of things that would be more in keeping with the potentialities of the land and with its geographical position on one of the important highways of the world. The details are familiar to all who have watched or read of similar undertakings on the part of British officials. A judicial system we are told was established by the Military, and has been developed by the Civil Administration, which dispenses justice with a degree of integrity, impartiality and promptitude hitherto unknown in Palestine. All the railways have been brought under the control of the Government, and the Railway Department, in addition, operates the Sinai Military Railway between Kantara and Rafah. Many improvements have been effected, lines strengthened, gauges broadened, rolling stock provided to meet the requirements of modern travel. Special attention has been paid to the assistance of agriculture, the principal industry of Palestine. Agricultural assistants have been posted in all districts and instructed to tour the villages continually; plant diseases and insect pests are notified immediately and steps taken to prevent their spread; veterinary hospitals have been established; a fisheries service is charged with the improvement of the fishing industry; five meteorological stations have been created; forestry is a special care; agricultural shows have been held; above all, loans to agriculturists have assisted the revival of the country. An active desire for opportunities for education manifested itself at the outset, but the majority of the Moslems are illiterate, and to provide a number of schools sufficient for their requirements is a task of some magnitude. The plan adopted has been to invite the people where the school is needed to provide a suitable building and to keep it in repair. Government does the rest. Under this scheme, we learn, new schools are being opened at an average rate of more than one a week. Under a Department of Public Health progress is being made in combating the two maladies that are the most prevalent in Palestine—malaria and eye-disease. The record is not yet exhausted, but we may leave it with, perhaps, its greatest achievement—"the cost of the Civil Administration has been kept within the amount of the local revenue, and no grant-in-aid is received from the British Exchequer." Unfortunately a garrison of five thousand combatant troops entails a charge on the latter of £2,500,000 annually.

If from the Palestine as reflected in Government Departments we turn to the Palestine that has to be lived in to-day, we find a country far less placid than the report represents and than the Government deserves. Sir Herbert Samuel does not ignore the agitation which culminated in the Jaffa riots last May, but a Commission of Inquiry has investigated the causes, and until its report has been presented, he refrains from comment upon the disturbances. At the same time the Report brings into relief the *causa causans* of the trouble. There are in Palestine some 700,000 people; four-fifths of the whole population are Moslems, 77,000 are Christians, the Jewish element numbers 76,000. Almost all the latter have entered Palestine during the last forty years; the success of their agricultural colonies attracted the eager interest of the masses of the Jewish people scattered throughout the world, and it was not long before the idea of expanding this colonisation and industrial development into a Jewish political and spiritual home took firm root in the practical Jewish mind. "The British Government," writes the High Commissioner, "was impressed by the reality, the strength and the idealism of this movement," and recognising its value in insuring the future development of Palestine, decided to give to the Zionist idea, within certain limits, its approval and support. The Balfour declaration followed. It is well to keep the actual terms of the pronouncement in the memory:

> "His Majesty's Government view with favour the establishment in Palestine of a National Home for the Jewish people, and will use their best endeavours to facilitate the achievement of this object, it being clearly understood that nothing shall be done which may prejudice the civil and religious rights of existing non-Jewish communities in Palestine or the rights and political status enjoyed by the Jews in any other country."

It was natural perhaps that the Declaration should mean one thing to the Zionists and another thing to the Arabs. The latter became uneasy as to its implications. To instal the Jews in Palestine might mean the expulsion of the Arabs, their lands and homes would be imperilled, the Moslem Holy Places might be taken from them. Quotations from Zionist speeches and writings were pressed into service to stimulate an agitation, and the inevitable outbreak followed, in April 1920. Although Sir Herbert Samuel points out that many men of education and enlightenment among the Arabs took no part in this antagonism, and among the mass of the population there were large numbers who, taking no interest in politics, thinking only of the needs of daily life, made no response to the agitation, it is to be feared that the score or so of months that have intervened have not brought about the spread of their wiser attitude or diminished the feelings of anxiety and hostility among the Arabs as a whole.

It should not be necessary to labour the point. The facts are clear; the Arab population has taken alarm

Digitized by Google

(whether unjustifiably or not does not matter); if satisfactory relations are to be restored between Arabs and Jews, and the country is to revert to a state of peaceful progress, the Arab must be reassured. No exception can be taken to the High Commissioner's statement of the policy of the Administration. That policy contemplates the satisfaction of the legitimate aspirations of the Jewish race in relation to Palestine, combined with a full protection of the rights of the existing population. The Zionism that is practicable, he points out, is the Zionism that fulfils the essential condition. Jewish immigration is not to involve Arab emigration; the greater prosperity of the country, through the development of Jewish enterprises, is not to be at the expense of the Arabs. We need not stop to inquire whether Zionism started at too great a pace or not. Immigration, whether at the rate of one per cent. or twenty per cent, of the population, is a relative matter, and the only thing that counts is the total effect, whatever may be the causes, on the Arab. It may not be possible to reason with the natives, but the British Government should not have to say the same of Zionism. In the Arab mind the Jewish development of Palestine and British Administration should be identified as parts of a single whole representing progress and prosperity, and no occasion should be given to the Moslems to hold to the one while they resent the other. But unless in this matter Zionism first identifies itself with the British Administration, it will always run the risk of being singled out for attack.

## ARGYROCASTRO.

*By J. Strachey Barnes.*

In view of the recent decision of the Ambassadors' Conference in Paris to attribute Agyrocastro and its district to Albania, the following notes may prove of interest:—

The district of Argyrocastro or those parts of it which at one time it was proposed to cede to Greece had in 1911 unquestionably a majority of Moslem Albanians—and I have never heard it suggested that any of the Moslem Albanians were pro-Greek. The majority may have been a small one in some parts, and in others the Christians were in a majority. But for the district as a whole the proportion of Moslems to Christians was on a conservative computation at least 55-45. No one moreover disputes the fact that a considerable proportion, if not the majority, of the Christians were pro-Albanian. Therefore there is no doubt that in 1911 the district as a whole had a very marked pro-Albanian majority.

Then all authorities concur—even the Greeks admit the fact—that the vast majority of the people in the district are Albanians by race, habits and language. On the other hand it is true that a proportion, possibly a majority, of the Christian Albanians were at one time pro-Greek. This was due to the fact that the Christians were not permitted by the Turks to have Albanian schools, so that very naturally they fell under the influence of Greek propaganda in the Greek schools, which were the only schools permitted them. At the same time all opportunity of advancement was denied the Christian population—at any rate all the plums went to Moslems. It is not surprising, therefore, that many Christian Albanians looked to Greece for their liberation from this condition of unequal opportunity, especially as in the years proceeding 1908 hope of an autonomous, free Albania in any near future was a very shadowy one indeed. New hope, however, came after 1908, and the younger generation in increasing numbers began to look for salvation in an independent Albania and not in Greece. When I was in Argyrocastro in 1911 I went with a completely open mind. I talked with many Christians through an Albanian interpreter, and I was struck by the curious fact that often in one family the older members were pro-Greek, and the younger members were pro-Albanian. Now that Albania's independence is assured there can be no doubt that the pro-Albanian element among the Christian population has largely increased and with the success of the present Albanian Government many of the older generation who doubted whether real liberty could ever be looked for in a country where Moslems were in the majority, have also been converted. I am afraid it is impossible to confirm this by statistics, but the Albanian Government has always been ready to agree to any form of impartial inquiry which may be proposed to establish the facts.

It has been said that the Albanians claim that the pro-Greek element is now reduced to only 10,000 or 13,000. I understand the truth is that there are less than 15,000 Greeks (as distinct from pro-Greek Albanians) in the districts. To these the Albanians are prepared to give minority rights, even though Greece may not do the same for the 40,000 Albanians of the Chamoria, most of whom are violently pro-Albanian.

With regard to the situation to-day as contrasted with that in 1911, there is no doubt that the majority of the people in the district concerned are Moslems again now, in spite of the fact that the blackened ruins of numerous Moslem villages, not yet rebuilt, give evidence of the policy of extermination pursued at the time of the invasion by Cretan irregulars.

That these excesses were committed with the connivance of the Greek Government, is generally admitted, and this point, no doubt, had its due weight when the matter came up for final consideration the other day. But to return to the question of majorities, the facts remain that now as in 1911 the majority in the district is Moslem and therefore pro-Albanian; that it must be conceded that a proportion of the Christians are also pro-Albanian; that this proportion has been on the increase since 1908; and that since the establishment of a stable Government the increase has become rapid. Whether the proportion of pro-Albanian Christians has become a majority it is impossible to prove. But the evidence, though mostly deductive, points unquestionably to that conclusion.

The town of Argyrocastro was in 1911, and is now predominantly a Moslem town. It is the centre of the district. Special weight, therefore, was also given to the consideration that the cession of the whole district to Greece would have entailed the surrender of an important centre—the chief centre of the district—with its predominantly pro-Albanian majority.

Though, during my recent visit to Albania I had no opportunity of going to "Northern Epirus," I had long talks on the subject with Christian deputies of the South. One of them M. Vinyau, deputy for Argyrocastro, is a young man, on whose honesty and truthfulness I would stake my life. He is quite an exceptional individual, is universally respected, is a fine speaker, and is bound to take a leading part in Albanian politics. He was perfectly frank with me, and he assures me that the pro-Greek sentiment among the Albanian Christians of the South is daily on the wane, and that the great majority of these Christians are now pro-Albanian. M. Kaccimbo, the new Minister of Justice—an Orthodox Christian and a native of Argyrocastro—is another typical example of pro-Albanian zeal among the Christian population.

The Greek element and the pro-Greek element in the district concerned is only strong in certain parts of it, and these parts are south of Argyrocastro, except for the isolated district of Chimarra. Even in Chimarra the Greek element is in the minority, and only succeeded for a time in resisting absorption into the Albanian State by making common cause with the autonomists. It was not long, however, before these two parties fell out with one another, with the result that the centralist Albanian minority got the upper hand, and the district

Digitized by Google

is now perfectly quiet, policed by Albanian gendarmerie. The only districts, therefore, where the Greek and pro-Greek sentiment is strong may be said to be confined to the Upper Drinopol Valley, close to the frontier, and to the Delvina Plain. Whether the whole district in question could be advantageously partitioned without damaging economic interests is a question. But it would have been manifestly unjust to sacrifice its centre, Argyrocastro, and the pro-Albanian districts to what constitutes a minority in the district as a whole. The 1913 frontier was decided upon geographical and economic considerations, after it had been rightly assumed that the district as a whole possessed an Albanian majority. I am not aware of any independent authority (travellers, Consular Reports, etc.), ever having stated that Argyrocastro was not predominantly Moslem, and, therefore, an indisputably pro-Albanian town. The Admiralty hand-books prepared for the use of the British Government during the war by the Admiralty Information Department, which has certainly no axe to grind, confirm this. The volume on Albania is very well prepared and is obviously based on the reports of British agents with personal knowledge of the district. It is, therefore, difficult to understand on what evidence the Greeks at one time came near to establishing their claims.

## MUSICAL NOTES.

**Women and Music.**

The problem of woman's position in life, of her achievements and of her potentialities is one not easy to determine, and in any case with its larger aspect I am not concerned. But I have just been reading, in the "Proceedings of the Musical Association" (Leeds: Whitehead and Miller, One Guinea net), a paper on "Women and Music," by Mr. J. Swinburne, and since music is but a part of life it is impossible in a discussion of this subject not to allow one's general philosophic views upon woman to form the background of one's specific ideas. If, then, I appear to wander from the straight path of musical criticism, readers will understand, even if they do not forgive.

"What," says Mr. Swinburne, who is speaking generally, "what is the result of all this musical activity of women? Nothing; at least nothing good. They have never done anything of the smallest importance in the art." That, I believe is the pitiful truth. For long years now women have lived "emancipated" lives; they have had, in this country at any rate, unequalled opportunities in musical training; they have been encouraged in a belief in their creative ability; and they have been recognised (during the war) as beings deserving of equal rights with man. Yet the pendulum of male opinion, which for many years was swinging in their favour, is now going back again; for it is as much by what women have done as by what they have not done, that the belief is forced upon one that, creatively speaking, they are inferior creatures. Their sex has, in fact, no significance whatever.

That women have achieved something in music is, of course, admitted; but I think Mr. Swinburne is right when he states that whatever they may have done they have done through their possession of male characteristics—which is merely another way of a French writer's saying: "There are no women of genius. Women of genius are men." Take, for instance, our female composers:—Ethel Smyth (I cannot at the moment think of any worthy other). Her work is full of big, strong ideas, with no trace of that tender imagination, that soulful emotion commonly supposed to be the property of woman. She is, so far as her artistic significance is concerned, a man. Or think of our interpretative artistes (from whom very rightly Mr. Swinburne excludes singers, thinking no doubt of such anti-progressives as Melba or Clara Butt): Jelly d'Aranji, Isolde Menges, Suggia,—are not all these as with the strength of men? Among the smaller artistes there are some in full possession of the smaller and feminine virtues, delicacy, grace, and so on; but these are they who chiefly fail in face of a big interpretation.

Mr. Swinburne looks at the subject from many points of view; he states, for example, that woman has no scientific ability, that she is not interested in mechanics, that, contrary to a belief which man's idealism has created, they are largely devoid of any aesthetic sense, and that the exercise of their minds, which are purely receptive, can do nothing but injury to the art of music. On some of these points I am not competent to speak, but I have little doubt that female "interest" in art has retarded it. What most mars the musical life of England to-day? The ballad-concert, of which the larger part of the audience is composed of women. What has cramped the popular appreciation of art? The pianoforte, on which the most frequent practisers are women. Women at best are but a stimulus to music; they cannot create it, and they cannot properly appreciate it. At all times they are too much interested in the personality of the musician, at the expense of his music, as Tchekhoff (I think) said, "Women are not interested in art, they are only in those interested in art."

And the exceptions that can be brought against this thesis only prove its truth.

Towards an explanation of this inferiority of women I can contribute nothing, being ignorant of any probable one. I merely record these sentiments as the result of my own musical experiences, and in doing so I am not unmindful of the fact that when England was a truly musical country our virginals desired its name from the sex whose achievements I have been declaiming.

ANDANTE.

---

The Palestine Arab Delegation in London announces that Arab notables in Jerusalem have declined to discuss the proposed Constitution with Sir Herbert Samuel, the future of Palestine being the question raised by the delegation in London.

The express train from Bucharest to Budapest was attacked on the night of August 27 near Kronstadt by brigands, who entered the coaches and, having used chloroform to render the passengers insensible, robbed them of their baggage. One of the victims was in the employ of the American diplomatic service. The brigands escaped with a sum of 600,000 Roumanian lei (about £2,000).

## NOTES AND NEWS.

Devonshire Square,
E.C. 2,

**Unemployment and Export Credits.**

The unemployed problem, which has now become the question of the hour, provides one of the most ironical features of these difficult times. If anything is certain it is that there is a potential demand in the world's markets for all that our manufacturers can produce. The trouble is that it cannot be translated into reality because of the lack of producing power expressed in the adverse exchanges. On that account certain countries are unable to obtain adequate supplies of the materials they need for reconstruction; while many of our workers have to stand idle for lack of orders. The extension of the use of the export credits system would appear to be the only remedy, and if the present arrangement does not meet the situation then it is the duty of the authorities to provide one that does.

**The Future of Palestine.**

In his interim report on Palestine for the year ended June 30, Sir Herbert Samuel touches only briefly on economic matters, but he gives sufficient particulars to show that despite the somewhat discouraging conditions encouraging progress has been made with the work of development which in the hands of the British military authorities was carried on with such marked success. Trade and agriculture have been encouraged, and various works of improvement have been carried out, though the most important projects in this connection are necessarily held up until the pending loan has been issued. Of the prospects before the country nnder favourable auspices there is no question ; the geographical position of Palestine and the resources of its soil plainly indicate that. But they can obviously be only realised on a basis of mutual understanding on the part of the inhabitants.

**An Undeveloped Country.**

Developments in Palestine cannot be rapid seeing that the country is to all interests and purposes undeveloped. "The methods of agriculture" to quote the report "are for the most part primitive; the area of land now cultivated could yield a far greater product. There are in addition large cultivated areas that are left untilled. . . . The Jordan and the Yarmuk offer an abundance of water power; but it is unused. Some industries—fishing and the culture and manufacture of tobacco are examples—have been killed by Turkish laws ; none have been encouraged; the markets of Palestine and of the neighbouring countries are supplied almost wholly from Europe. The seaborne commerce, such as it is, is loaded and discharged in the open roadsteads of Jaffa and Haifa : there are no harbours. . . . The country is underpopulated because of this lack of development."

**United Provinces' Loan.**

Particulars are now available of an interesting departure in Indian finance in the shape of a Development Loan to be issued by the United Provinces Government. The loan, subscriptions to which open in India on September 15, is a six per cent. issue, and the amount asked for is two crores of rupees. It is in the form of bonds of Rs. 25 upwards, and the issue price is Rs. 93 per cent. The loan will be repaid at par in November 15, 1941, and can be repaid in any year after November 15, 1931, after three months notice. An interesting feature is the provision that in every year after November 15, 1926, the Government will announce that it is prepared to repay a certain sum at par and will invite applications for repayment. As indicated by its title the object of the loan is development. Among the works for which it is to be utilised are the construction of the Sarda-Kichcha Feeder and Sarda Oudh canals, the improvement of communications capital outlay on industrial development and agricultural expansion, and large building projects.

**The Abyssinian Market.**

Elsewhere in these columns will be found an interesting account of conditions in Abyssinia taken from an Italian contemporary. The country is one about which only too little is known in the United Kingdom which no doubt affords an explanation why we were not more successful before the war in developing trade in that region. The world economic conditions since 1918 have rendered the market a specially difficult one for trade enterprise, but there is no question at all as to the extent of the opportunities in Abyssinia in many directions. The account referred to, which deals with the country from the point of view of immigration, is not without its humorous passages, for instance the statement that Abyssinia is not suitable "for persons with weak hearts"—this, it is carefully explained, being on account of the high altitudes of the inhabited localities.

**The Exhibitions Season.**

Last week saw the opening of the trade exhibitions season, and from now on until next summer there will be an almost constant series of demonstrations of the manufactures of this country. How far these exhibitions will be successful in promoting business will depend to a very great extent on the number of foreign buyers they attract. There is little point in holding exhibitions if they are only attended by our own people, and that seemed to me to be the case in a number of instances last season.

REPORTS FROM OUR OWN CORRESPONDENTS.

## ROUMANIA.

Bucharest, August 24.

**Miscellaneous.**

It is reported that an agreement has been made between Roumania and Belgium concerning the exchange of all kinds of goods and cereals. It is believed that these operations will be effected through the headquarters of the Peasants' Co-operative Associations.

The Ministry of Industry has received an application from a leading Viennese manufacturer for permission to erect a large plant in Roumania for the manufacture of motor cars and aeroplanes. The Ministry has approved the request, granting the advantages of the law for the encouragement of national industry.

Bulgaria has begun to restore the cattle according to the Peace Treaty. The live stock to be handed over will consist of 60 bulls, 6,000 cows, 5,250 horses, 3,400 oxen, 50 mules, and 15,000 sheep.

From the 20 million marks which Germany has to pay for the restitution of the horses taken during the occupation—besides the 50,000 horses, which will be restored in kind—a sum of five million marks has been put at the disposal of the War Ministry for sundry supplies and 15 millions at the disposal of the Ministry of Communication for the purchase of locomotives.

A tax of 15 lei per kg. and one leu commission will be levied on the export of "*Cashaval*" cheese.

The rumour of a fresh internal loan in the autumn is contradicted. On the other hand, the press reports that an arrangement has been reached between the Ministry of Finance and the National Bank, respecting the sum of about 600 million lei, advanced at various times and which has now been consolidated into a loan bearing the interest of 1 per cent. per annum.

A large stock of paper money for the National Bank has arrived from France.

The Minister of Industry has made an appeal to the authorities, manufacturers, and the public to encourage home industry, thus contributing also to the improvement of the rate of exchange.

The negotiations for an economic convention with Austria have been postponed *sine die*, and the departure of the Roumanian delegates for Vienna has been countermanded.

The Government has given a new order for 100 locomotives to the Skoda Works. 75 locomotives of the first order are ready, and 35 of them will arrive here shortly.

During July the shipments of cattle through Constantza were: 643 oxen and 12 cows for Constantinople, 159 oxen for Italy, and 11 oxen for Greece.

An artesian well, bored at Osnat-Avatza, Banat, was found to contain lead, iron, and radium. Experts are investigating this discovery.

## GREECE.

Athens, August 26.

**General News.**

The Athens Chamber of Commerce has requested the Minister for Foreign Affairs to approach the Yugoslav Government with a view to abolishing the additional duty recently imposed on Greek wines entering Yugoslavia.

A telegram has been received from the Greek Minister at The Hague stating that the Dutch Minister of Finance has withdrawn the Bill increasing the duty on Greek wines and currants imported into Holland.

The Swiss Government has decided to appoint a Consul-General in Athens.

It has been decided to establish Chambers of Commerce in the towns of Adrianople, Kirk Kilisse, and Gumuldjina.

## ALBANIA.

**The Oil Quest.** *Tirana, August 27.*

Two weeks ago agents of the Standard Oil Company of America arrived in Albania, enjoying, so it is said, the official support of Italy. The chances of finding rich sources of petroleum are claimed to be more and more certain, and already the fields are credited with the richness of the Roumanian oil belt. The Standard Oil Company is trying to obtain a concession on conditions more favourable to Albania than those offered by the Anglo-Persian Company.

## ECONOMIC CONDITIONS IN THRACE.

(*By Our Sofia Correspondent.*)

It is doubtful if there is any other part of Europe whose statistical details are so incomplete and old as are those of Thrace. The reason for this is that during the last 10 years Thrace has been the scene of several wars, intermingled with constant guerilla warfare, which prevented law and order from being established. The province has been alternately under the rule of Turks, Greeks, and Bulgarians, and also under French administration for a short period in 1919-1920. In view of the circumstances it will be understood that the figures given in this article must be regarded as purely nominal.

Thrace to-day is a country of 28,143 sq. kilometres, which shows a decrease of 14,857 sq. kilometres since 1912, when the Turks were ruling. Of these 28,143 sq. kilometres, 65 per cent to 68 per cent. can be cultivated, the rest being mountainous ground. Cultivation has, however, been on a very restricted scale, and in 1908 there were only 4,378 sq. kilometres under cultivation which then represented a tenth of the whole country. This year the Greeks claim that about 16 per cent. of the cultivable land is actually being utilised.

The country is not rich in forests, and the total area of wooded land amounts only to 1,500 acres, whilst lakes cover an area of 500 acres with another 150 acres of inundated land. Hitherto Thrace has not been fertile land, although under able and competent administration it is undoubtedly capable of becoming so.

At present no cereals are being exported, and it has even been necessary to purchase small quantities of flour and other similar commodities from abroad. In this connection it is curious to note that American flour has so far secured the market, owing to it being cheaper than that supplied by Bulgaria, in spite of the proximity of the latter country. The Greek administrative authorities are hard at work trying to improve the agricultural situation, and have instituted an Agricultural College at Adrianople, and are distributing motor tractors amongst the farmers. There is also an efficient service of Greek agricultural specialists who have been recently making a thorough survey of the country with a view to the construction of a large irrigation scheme.

In 1920 only 25 million kilos of all kinds of cereals were produced, but this year there is an increase of 600 per cent., viz. to 150 million kilos, of which two thirds represented wheat. The 1921 crop, although a great improvement on 1920, is not nearly so good as it might have been, as it has been considerably affected by the drought. Apart from cereals, the chief products ar cheese, honey, tobacco, and wool.

There is at present a great shortage of live stock, and the Greeks have imported a considerable quantity from the ports of Greece for distribution amongst the popu-

Digitized by Google

lation. For statistics of live stock we have to go back to 1908, when there were 107,000 horses, 382,000 oxen, and 20 million sheep. The population has always been a changing one, and thus most difficult to assess. Thus, while in 1906 there were 1,160,338 inhabitants, in 1913 the figure had risen to 1,365,626, to drop again to 671,301 in 1920.

During 1921 the population has, however, again begun to increase, and it is now estimated that the total has reached 800,000. Of this number approximately 80 per cent live in the villages, as Thrace is not rich in towns, Adrianople with a population of 60,000 being the largest. The country is very largely populated, there being only 25 people to the square kilometre. One cannot go fully into the question of religion and nationalities unless one has spent a considerable time in the country, but it is safe to say that in the villages about 60 per cent. of the inhabitants are Mussulmans, the rest being Christians. Very few Bulgarians have remained in Thrace, a liberal estimate of the number now in the province gives the figure as 10,000, of which the majority are to be found in the area north of Gumuldjra.

Thrace has a large sea-coast, but the railway facilities are very poor, the only place on the coast which actually has railway communication with the interior is Dedeagatch, and here there is no port, either natural or artificial. During the summer a certain amount of merchandise is landed at Dedeagatch, but the winter winds are too strong for it to be possible for ships to discharge cargo. There is little that can be said as to Thrace's economic future, as everything depends on political events and above all on the result of the war now being waged in Anatolia. For the sake of the inhabitants, no matter what nationality they are, it is to be hoped that they will henceforth be allowed to till their land and live a life uninterrupted by strife caused by the political aspirations of Turkish, Greek and Bulgarian statesmen.

## INDIAN INTELLIGENCE.

The Indian Trade Commission has issued the following cabled news received from the Director General of Commercial Intelligence, Calcutta, dated August 29:—

Season.—August 22—Monsoon weak except in North East India and Burma. August 23—Strengthened in Gangetic Plain. August 24—Stronger in Central Provinces but weakened on 25th. August 26—Increase of rain in Upper Burma and Southern Madras but monsoon continues very weak in Peninsula and North West India. August 27 and 28—Strengthened in North East India and Burma. Break persisting in Peninsula and North West India.

Condition of Crops.—August 26—In Punjab rice good; other crops unchanged. Break in rains continues. In Central Provinces, cotton very good to excellent but break in rains required to facilitate weeding operations. Assam, August 29—Weather very favourable to harvesting autumn rice and jute. Out-turns of these poor, but prospects of other crops generally good.

Markets.—Bombay Cotton market, August 25—Strong: merchants and mills have bought very largely both forward contracts and ready cotton. M.G. Oomras Rs. 334 December January, Rs. 363 September. Cotton arrivals from September 1, 1920, to August 19, 1921, were 2,843,000 bales, as compared with 3,367,000 bales during the corresponding period of the last year. Bombay Piece-goods market quiet but steady. Prices in some staple lines easier, particularly in low narrow width mulls. Calcutta jute market, August 26—Quiet but steady. August 27—Hessians steady; heavy goods steady to firm with fair enquiry. Rice market, August 26—Specials Rs. 625. At Tea Sale on August 23, good selection from all districts, particularly from Assam and Dooars. Well-made orange pekoes were half to one anna dearer. All other grades unchanged. 115,177 packages sold to date at an average price of nine annas per lb.

---

The output of crude oil of Roumanian companies during June amounted to about 78,000 tons, as compared with 98,000 tons for the previous month.

The stocks of tobacco in the Alexandria Customs at the end of June amounted to 222,792 bales.

The Council of Administration of the Ottoman Public Debt notify that the date for depositing for payment coupons of the Ottoman 4 per cent. Unified Converted Debt, due March, 1915, to March 1920, by allied and neutral holders, has been extended from September 1 to March 1, 1922.

## MESOPOTAMIAN OIL.

### POLICY OF SHELL COMPANY.

The following letter has been addressed by Sir Robert Waley Cohen to the Press:—

Sir,—My attention has been drawn to some statements relating to Mesopotamian oil which have been recently circulated. The statements are sometimes connected with attacks upon the Shell Company and its friends, and as such would be as negligible as their predecessors were it not that the suggestions utilized on the present occasion might damage British interests, for foreign Governments and peoples are not always able to set as true a value upon such things as we are at home.

If these statements were taken seriously it might injure not only the 60,000 shareholders of the Shell Company, which I think I may claim to be generally recognized as the leading British oil company, but what is perhaps even more serious, they might also add to the difficulty of restoring that confidence among our friends abroad in the good faith of British commerce which has done more than anything else to give us as a nation the leading place that we hold in the world's commerce and industry.

The suggestions made are mainly of two kinds—first, that Sir Henri Deterding and the great organization of which he is the head have, in the past, looked to Germany rather than to Great Britain as their home; and, secondly, that the Turkish Petroleum Company was a mysterious organization in which we and our friends sheltered ourselves behind German intrigue. These suggestions, of course, are utterly false.

In the group of companies over which Sir Henri Deterding presides there has never been the smallest vestige of German influence of any sort or kind. Sir Henri himself had, before the war, a clearer insight than most of us into the dangers of Germany's commercial methods, and since the day when war was declared there has been no truer and more far-seeing friend of the British Empire.

Just before the declaration of war, he, writing on behalf of the whole group to a British Secretary of State, placed our resources at the disposal of the British Empire, and public acknowledgment has been made on many occasions by statesmen representing this country and France of the immense factor which the fulfilment of this promise constituted in the achievement the final victory.

An endeavour is apparently being made to create bad blood between my company and our friends and the Anglo-Persian Oil Company. There are many foreign interests who would like to achieve this end, because they do not find it convenient to see British interests working together. One of the common methods used is to represent the petroleum industry as in the grip of a "trust," by means of which the Shell Company and its friends bleed the consumers of petroleum products, and from which the Anglo-Persian Company are to deliver them. Fortunately these methods have never had, and will never have the slightest chance of success, either by means of that ancient falsehood or by the newer method now adopted.

As the foremost British oil group, it has always been our policy to work in friendship and co-operation with our our younger competitor, the Anglo-Persian Oil Company; indeed, without our help it would have been as difficult for them to achieve their steady progress in production as it would have been for us without their help to effect the reduction in petrol prices, which are now at such a level that the motorist in Great Britain is obtaining his petrol supplies to-day at a price which would not cover the cost of bringing them to him from America.

As far as Mesopotamia is concerned, it is well that the world should know that it must be at least a decade before oil from Mesopotamia could hope to render any serious help in meeting the world's demands, and even that will only be achieved if Mesopotamia proves to be a great oilfield—a prophecy no responsible person could make with any certainty to-day. Experienced oil men are familiar with sanguine expectations of what will be found in an oilfield that has not yet been subjected to the drill, and with the very different picture usually presented by the actual result of development.

There have been no negotiations, and no agreement has been signed or discussed in regard to Mesopotamia with the Shell Group in recent months.

The fact is that the Turkish Petroleum Company, which had been formed by Sir Henry Babington Smith, was reconstituted in the beginning of 1914, and the shares allotted as to 50 per cent. to the Anglo-Persian, 25 per cent. to our group, and 25 per cent. to the Germans. These arrangements were entered into at the invitation of the British Government, and in association with partners invited by them to join in this enterprise. At the San Remo Conference it was agreed that the German interest should be handed over to the French, and that is the only change that has taken place, and there has been no struggle or fight connected with it.

We do not believe in mixing up politics with business; it leads sometimes to corruption, always to inefficiency, and it tends to convert what should be mere commercial rivalries into national animosities—a very serious disadvantage. Therefore we would have preferred to enter the Mesopotamian field, as we have every other oilfield in the world, by means of a free association with friends in a purely commercial enterprise, but in the circumstances we could only accede to the wishes of the British Government and join in the arrangement of the Turkish Petroleum Company.

Then came the war, and afterwards a rearrangement was suggested—again by the British Government—as a result of which one of our British companies, of which Sir Henri Deterding and I are managing directors, was to take the management of this difficult enterprise. Politics are as dangerous to business as to an army, and just as the British Army at the greatest crisis in its history was placed under the command of a tried and trusted foreign friend of Great Britain, so the Shell Company, realizing Sir Henri Deterding's genius, have won their victories of commerce and industry by placing their forces under the command of an equally tried and trusted friend.

The policy of this company has been and is the traditional policy of Great Britain in commerce. It is to work in harmony with our neighbours, to encourage foreign interests to associate themselves with us, so that we may work together to our mutual benefit, and create international friendships with nations like the Dutch, whose character and history fit in so closely with our own.

In our view no greater injury can be done to British commerce than to create the impression that we are unwilling to work together in friendship with other nations, and it is because misconceptions of the kind I have mentioned fan the flame of international rivalry and bitterness that I am glad to take this opportunity of exposing the entire falsity of the whole basis of these assertions and suggestions.

I would take the opportunity of saying once more that the Shell Company, the foremost British oil company, stands for and will maintain its policy of inviting the co-operation of all those, whether they be British or foreign, whose sole purpose it is to develop the oil industry, so that it may serve the needs of the world in the peaceful years of international trade which it is our hope may be characteristic of the epoch ahead of us.

Your obedient servant,
R. WALEY COHEN.

# Engineering Topics.

*By our Engineering Representative.*

**Bronze Casting.**

A certain amount of trouble is apparently being experienced in metallurgical work in obtaining a bronze alloy suitable for using in the production of some of the peculiarly thin parts required for special purposes in modern engineering. Some of these parts are barely one-sixteenth of an inch in thickness and have to withstand a pressure of from 40 to 50 lb. per square inch. A number of experiments have been made recently in one of the largest works in the country, and it has been found that an alloy of 87 per cent. copper, 7 per cent. tin, and 3.0 per cent. each of lead and zinc will give extremely good results. Castings of this alloy will "peel" or leave the sand readily, and will prove remarkably strong and tough. The next problem to solve in this direction is to find some addition that will cause the castings to leave the sand with as clean an appearance as die-castings. This is, of course, asking a good deal, but experiments are being made in the direction of adding traces of aluminium and of silicon to the alloy, but so far little progress has been made.

**Mountaineering Up-to-Date.**

A 1921 Rolls Royce, touring body with four passengers and luggage has just completed an exacting tour through the Alps during which it passed over the most severe road gradients in the country. Actually it climbed over 50 passes, with a average height of 5,723 feet. In one case eight passes were covered in a single day between Grenoble and Geneva.

The most difficult journey of all, however, was that over the lofty Col du Parpaillon, a strategical road which is practically never used, and proved to be in a terrible state of disrepair, the surface being either grass or loose stones throughout. The road is only 8 feet wide, and has gradients up to 15 per cent. Four large avalanche deposits in turn had to be cleared by labourers to enable the car to proceed, but the crumbling edges of the primitive roadway were the chief danger. Moreover in the tunnel (over 1,500 ft. long) at the summit the floor was found to be covered with ice.

As indicating the difficulties of the route, and the long waits while the road men worked with pick and shovel, it may be mentioned that it took the car nearly 12 hours to cover the 29 miles of ascent and descent, although subsequently, on an open road in France, it attained a speed of 77 miles an hour with a full load, and finished the tour of 3,150 miles in perfect mechanical condition.

The car was driven by amateurs throughout, and they have informed Messrs. Rolls-Royce, Ltd., that its ease of handling was truly extraordinary, even at hairpin corners, the long wheel base being more than compensated for by the wide lock and beautifully balanced steering. The suspension, too, was found to be not only equal as regards strength to the well-known post-war condition of continental roads, but was also the acme of comfort, and the passengers did not experience a single jar. Despite the collossal number of mountain descents, moreover, the brakes were amply adequate, and were only once adjusted, and at the conclusion of the tour were still fully equal to all emergencies. In short, the car answered every requirement of long-distance touring to the most satisfying degree.

**A Remarkable Retread.**

Some little time ago I was writing in these columns regarding the advantages of re-treading motor car and motor-cycle covers, and mentioned that I had obtained excellent results from tyres re-treaded by the Beldam Tyre Co., and also by the Almagam Co. I mentioned at the time that I had a cover under observation and test which had been re-treaded, and which was giving really exceptional results. As the cover now shows signs of wear, the canvas being just visible in two places about the size of a three-penny piece. I have had it taken off for a certain reason although in the ordinary way I should have had it run for another hundred miles or so and then fitted with a liner. The history of the cover is little short of amazing. In the first place it was a light, 3-ply ordinary plain treaded motor-cycle tyre, 26 x 2½ inches, and it was fitted on the back wheel of a 4h.p. fixed gear Triumph motor cycle, where it ran for 1,000 miles during the test of a new type of speedometer. It was then put on the front wheel and in a further 700 miles it was really worn-out and had had a bad burst. It was repaired and retreaded by Beldams in the ordinary way with their ordinary re-tread, and was put back on the back wheel of the same Triumph to carry out a 1,000 mile oil test. About that date a tyre firm sent a new cover for test and the Beldam re-tread was removed from the back wheel and put on the front wheel of the same machine. Since then, to date it has done 2964.6 miles, or a total of 3964.6 miles since retreading as compared with 1,700 as a new cover. The reason I have had it taken off now is that I intend to ask Beldam's if they would like to try retreading it again! I may add that the machine has not been used on ideal roads and specially driven in order to get a long mileage. On the contrary practically all the miles have been done on country roads in Cornwall, Devon, Wilts, Berks, Herts, and Norfolk, and as regards speed I may add that to my personal knowledge the rider of the machine had a late lunch at Brandon and tea at Willesden Green.

**Commercial Vehicle Exhibition.**

Practically the whole of the available space at Olympia has been allocated for the fifth International Commercial Motor Exhibition, which will take place from October 14 to 22, inclusive. The organisation is being carried out by an Exhibition Committee representative of all the sections interested, under the chairmanship, of Mr. F. Churchill the Chairman of the Commercial Vehicle (Petrol) Committee.

The exhibits will comprise petrol, steam, and electric vehicles for goods and passenger transport and general utility purposes. Many new and interesting developments in commercial motor traction will be shown. In connection with the exhibition, the Institute of Transport is organising two conferences at Olympia for Monday October 17. In the morning there will be a paper on "Roads," and a second, on "Commercial Vehicles," will be presented in the afternoon.

The Institution of Automobile Engineers is arranging the following conferences:—October 19, 11 a.m. paper, "The Scope of the Farm Tractor," by E. H. Arnott; 2.30 p.m., paper on "Agricultural Tractors," by H. G. Burford (Chairman of the Agricultural Machinery Section of the Society) and H. Scott Hall. October 20, 11 a.m., paper on "Coke as a fuel for Commercial Vehicles," by T. Clarkson, M.I.C.E. M.I.M.E., M.I.A.E.; 2.30 p.m., paper on "Loading devices for Commercial Vehicles," by W. D. Williamson.

# Near East Markets.

## LONDON PRODUCE REPORT.

Dried Fruit.—Business has been rather brisker. Currants have come to business well at firmer rates. Sultanas have been in good request.

Coffee.—A steady tone has prevailed during the week. Costa Rica has been done at 130s.; Mocha at 125s.; Indian at 114s.; and Columbian at 110s. Futures are:—September, 48s.; December, 47s. 3d.; March, 48s. 3d.; May, 49s.

Sugar.—Home refined has been in good demand at lower rates. White Mauritius is 2s. 6d. lower at 50s., and Czechoslovakian at 28s. has shed 1s. Other transactions include West Indian crystallized at 44s. 6d.; Jamaica, 40s.; and Santa Lucia at 47s. 6d. Futures are:—October, 17s. 6d.; November, 17s. 3d.; and December, 16s. 9d.

Oilseeds.—Indian linseed has gained 1s. 3d. at 21s. 9d. La Plata is 3d. up at 21s. Rapeseed has been steady with Toria, 3d. up at 22s. 6d.; bold Ferozepore unchanged at 21s. 6d. as also brown Cawnpore at 20s. 6d. Cottonseed is unaltered with Indian at 11s. 6d.; Egyptian black at 13s. 9d.; and Sakellarides 13s. 3d.

Seed Oils.—A firm tone has characterised the market. Linseed oil has gained 3d. at 38s. and crude rape oil is the same at 55s., but the refined is lower at 51s. Cotton oil has remained steady. Common edible is 1s. down at 51s.; while Egyptian crude is unchanged at 42s. and deodorized at 56s. is the same.

Oilcakes. Business has been brisk. Cottonseed cake has come to business at 240s.; Arachis cake at 290s. and Linseed cake at 320s.

## CYPRUS CAROB HARVEST.

(*From our own Correspondent.*)

*Nicosia, August* 16.

The gathering of carobs (locust beans) is about to begin. This is one of the busy seasons of the Cypriot farmers' year. Villagers in the carob growing areas—in five of the six districts go forth in groups, armed with long sticks, like fishing rods, and proceed to beat down the pods, which by Mid-August have turned from bright green to a deep chocolate colour, from the trees. In ordinary years large numbers of labourers are hired to assist in the gathering. This year while on the one hand the yield is to be an exceptionally large one, village growers on the other hand are in a very unhappy plight, as owing to the still high prices of all commodities and of labour, and to the very low price of carobs (12s. to 14s.) the Aleppo *Kantar* (180 okes), they are unable in many cases to meet the cost of collecting. In a great many instances they will only be able to employ members of their own families unless some help is forthcoming. There is a general cry that the merchants should raise the price which is paid for the beans, in order that sufficient labourers may be hired. It will be to their advantage, as otherwise their store will remain unfilled in what is a bumper year. They have made, the villagers say, sufficient profit in late years to enable them to show some generosity in hard times. The merchants on the other hand complain of the low prices they obtain, and are hardly likely, as a rule, to advance money except on the usual ruinous terms, which is exactly what the peasantry is hoping to escape. The tribe of money-lenders will probably profit considerably from the occasion.

## EXPORT OF ROUMANIA'S CEREALS.

(*From our own Correspondent.*)

Bucharest, August 24.

The Cabinet has decided on the monopoly of the exportation of wheat and rye and their derivatives. The export of other cereals is free. The exporting firms will, however, have the obligation of selling to the state an equal quantity at the fixed maximum prices, which are, for home consumption, wheat 18,000 lei; maize and barley, 16,000; oats, 14,000; beans, lentils peas, 18,000 per waggon of 10,000 Kg.

The Ministry of Agriculture reports that the showers that fell this week in various parts of the country have been beneficial to the vegetables.

## TRADE IN THE PHILIPPOPOLIS DISTRICT.

The British Vice-Consul at Philippopolis reports that the general commercial stagnation continues, and that very little business is being done except in the sale of foodstuffs of local production. A small amount of merchandise from Allied countries is being delivered, but considering the needs of the country the total is very small indeed. Generally speaking merchants are not seeking to increase their purchases in the United Kingdom, though in some cases they are delaying orders in the hope that the rate of exchange will improve, in which case it is thought that orders might be diverted from Germany to this country.

On the other hand the Vice-Consul states that large quantities of Czechoslovak goods are being delivered and that the chief article imported from that source at present is a small rotary hand-worked fan for grain. Several trainloads of these have been delivered at Philippopolis alone, and wagons of them are being delivered at every station in Southern Bulgaria.

German goods are finding their way in but not in large quantities. Many orders are placed with German firms, but delivery is very slow and in consequence the total of orders placed is small compared with what might reasonably be expected. The Germans are carrying on organised propaganda in favour of their goods.

An important feature of the commercial stagnation is the great decrease in the value of the leva. Most business men, and also the banks are not anxious to buy foreign money on this account. Merchants who have to remit cheques to England to settle pre-war debts are, however, buying English cheques at a rate 20 or even 30 points above Bourse rate. This latter question is worrying merchants a good deal at present.

Merchants seem particularly anxious to export through or to United Kingdom firms, not from any idea of paying lower rates of export duty, or even of obtaining facilities in the Customs on the assumption that United Kingdom firms will not be kept waiting as long as Bulgarians would, but merely because they are of opinion that they will secure fair treatment by this procedure.

Agricole et Industrielle d'Égypte.—For the year ended March 31, there was a profit of 343,050 francs, as against a loss of 1,408,064 francs for the previous year.

Banque des Pays Serbes.—This capital of this institution is to be increased from two to five million dinars.

**Travellers to the Near East**

Can obtain all information as to the journey from Continental Traffic Department, Victoria Station (S. E. & C. R.), S.W.1:

COUNCIL of ADMINISTRATION of the OTTOMAN PUBLIC DEBT.

NOTICE to HOLDERS of the OTTOMAN FOUR PER CENT. UNIFIED CONVERTED DEBT.

The COUNCIL of ADMINISTRATION GIVE NOTICE that the DATE for DEPOSITITING for PAYMENT COUPONS of the Ottoman Four per Cent. Unified Converted Debt, due March, 1915. to March 1920, by Allied and Neutral holders has been extended from the 1st SEPTEMBER to 1st MARCH, 1922.

26th August, 1921.

WONDERFUL EXHIBITS at the

**CONFECTIONERS' EXHIBITION**

(*Royal Agricultural Hall, Sept. 3rd to 9th*, 1921.)

**FLUGEL SODA FOUNTAINS.**

Stand. B1y 23. Arcade Entrance.

Actual working models will be on view showing how the finest aerated fruit drinks are automatically manufactured at a *minimum* of cost and trouble. The Flugel Soda Fountain automatically filters every drop of water and each drop is aerated while it is being filtered. Every one interested in the production and sale of mineral water drinks should ensure seeing this remarkable machine, and if unable to visit the Exhibition they should send for the special free illustrated booklet (now ready) giving a full description of these exhibits. You will be more than interested. Write to -

## ABYSSINIA.

### AN ITALIAN POINT OF VIEW.

This country, which has a very great significance for us Italians says *Oriente Moderno*,* as there we made, such as it was, our first experiment in colonial politics, and which is the most advanced and best organized nucleus of Central Africa, situated between two of our colonies, is almost outside the range of Italian public attention at the present moment. The observations which follow are drawn from various German and Austrian sources. The official and semi-official ministerialists of these two States have continued the active relations which they had with Abyssinia before the war, and they study it to-day especially with regard to the point of exports and labour-supply.

Abyssinia has a population of 15 millions, and, given its area of 1,200 miles in length and 1,200 in breadth, it is calculated to be capable of supporting 30 millions. It is mainly an agricultural State whose principal products, coffee, skins, wax, ivory and civet, have only recently acquired commercial proportions. But it offers large possibilities of development for other important products, such as rubber and cotton. The Abyssinian subsoil is still unexplored, but it is held to contain extensive deposits of iron and coal. The climate generally is good, being that of a mountainous country.

Immigration prospects are various according to the professions: an agriculturist with 5,000 dollars could obtain, on favourable terms, ground to cultivate for himself and family, and especially gardening in the vicinity of the large towns could be profitably undertaken by Europeans. Also viticulture offers prospects of development, Until now wine has been wholly imported from France, but vineyards are beginning to be planted, According to the missionary, Munzenberger, the lands in the vicinity of Lake Tana are specially suitable for vine culture. So also coffee could be more intensively cultivated, Abyssinian coffee being comparable with the best Arabian.

Similarly all small trades, such as carpenters, shoemakers, &c., have openings in Abyssinia, as also printers and expert masons able to direct native or Indian labour. In a country so rich in timber there is only one saw-mill, instituted in 1918. Sugar is imported from Europe to an annual value of 200,000 frs.; whereas a national beet-sugar industry might be created, the beet growing well in many localities, and labour being procurable very cheaply.

The possession of land is regulated by local laws, which differ essentially from European. The juridical status of landed property in Abyssinia may be epitomized in the following terms: all the land of the State is the property of the Emperor; the Emperor, however, cedes the use to the grand court dignitaries (Ras and Dejak) who in their turn sublet the lands to private persons against rent in labour or payment of taxes or produce in kind. The sublease is always revocable, and in any case ceases to be valid on the death of the Emperor or of the Ras of the particular territory unless his successor confirm the title. The dues in labour or in kind assume various forms according to the region, and do not exempt the owner from the direct taxes imposed by Government, which imposts are very light. Besides possession by way of rent, foreigners may acquire land directly from the Emperor, but such is conceded only exceptionally. According to a law of May 14, 1913, all foreigners who establish themselves in Abyssinia must register within three months at their respective consulates, or demand Abyssinian naturalization.

The capital of Abyssinia, Adis Abeba has about 100,000 inhabitants of whom about 1,000 are Europeans of all the social classes. There are no theatres or *cafe-chantants* as yet, but two cinemas have been opened. For persons with weak hearts Abyssinia is not suitable, as the inhabited localities are fully 6,000 to 9,000 feet in altitude, so before visiting the country it is advisable to consult a doctor.

To enter Abyssinia that Government's permission is not necessary, but whoever goes by way of Jibuti or Aden must be provided with a French or British passport. As to the voyage there is no direct line of communication from any Italian port to Jibuti; Italian ships touch only at Massowa or Aden, and a steamboat leaves Massowa for Jibuti only once a month, and from Aden once a week; but in each case the voyage is rendered longer and more costly by transhipment and stoppages. On the other hand the Messageries Maritimes and other French Companies have liners sailing direct from Marseilles to Jibuti, thus obviating the journey from Massowa or Aden which alone costs £2. By third class the voyage from Marseilles to Jibuti costs 1,260 frs, all found and lasts about ten days. From Jibuti the train leaves twice a week for Adis Abeba, Sunday and Wednesday, the second class fare costing about 160 frs. (only natives travel third). The journey takes two days; the first evening one sleeps in Diri-Dowa in an Italian hotel (Albergo Montaperto) at 10 frs. the night, and the second evening one arrives at Howash in Abyssinia. While Jibuti has a tropical climate, that of Adis-Abeba is European Abyssinia, under existing economic conditions, is not fitted to receive a very large immigration; what it needs above all is the influx of skilled workmen, professionals and industrials. Chiefly to be recommended is immigration into Adis Abeba which on account of its central position and climate is susceptible of great commercial development; it is calculated that more than 50,000 men attend the Saturday market. Food-stuffs (meat, potatoes, flour, tomatoes vegetables, &c.) are cheap; in years of drought water become scarce and it is necessary to beware of typhus. The hours of work are normally from 8 to 12 and from 2 till 3. Foreigners are subject to no special taxes. The best season for reaching Abyssinia is November, as the rainy season commences in July and lasts about four months.

*Oriente Moderno. No 3 August 15, 1921. Rome, Institute per l'Oriente.

## THE WORLD'S WHEAT CROPS.

Messrs. H. N. Bathgate and Co. in their report on the world's wheat crops state:—

We are now able to give our summer's estimate of this season's world's wheat crops, embracing those countries which we included in pre-war years. Necessarily there are some omissions; for we have no authentic information about Poland, Czechoslovakia and Yugoslavia. The lines of demarcation are not yet so long settled that it is possible to discriminate between one state and another. Therefore to some extent there is an appearance of a greater shortage than actually exists; but future investigations will throw some light upon this feature. Of Manchuria we have said nothing statistic, for the very simple reason that we have nothing that we would like to put into print; but we understand that it will again provide some contribution towards international supplies.

Taking the chief growers seriatim, we find first that the total crop of the United States is very little more than in 1913; though it must be remembered that the year was the pre-war record for America. In Canada the yield is not the largest on record; but it easily surpasses anything raised before the war, and is fully 10,000,000 quarters greater than the crop of 1913.

The Indian crop this year, (harvested before the opening of our new season) is a short one, leaving nothing for export. In fact, wheat exports have been prohibited, and nothing more can be expected from that quarter until next June, supposing that the crop of 1922 be a very good one. It is customary to speak of this year's Indian shortage as though it did not matter. That is an entirely fallacious view, because although India's pre-war average exportable surplus was little more than 5,000,000 quarters, it was quite enough to quote as a "bearish" influence whenever it suited the occasion.

Turning to France, with which is included Alsace-Lorraine, we find that the result cannot be described as disappointing, when we consider the immense loss of life suffered by that country during the war, and the great dislocation to her agricultural and mechanical industries. Still, the shortage is material and can only be met by increased imports or the practice of rigid economy in the consumption of wheaten bread. It may be noted that about the crop of 1913 there was a good deal of conflicting evidence in the summer of that year; but we think our final estimate was about accurate.

The figure for Hungary is taken from the official estimate provided by the International Institute of Agriculture at Rome. In the old days it was our custom to give a combined total for Austria-Hungary and dependencies—dependencies then meaning Bosnia, Herzegovina, and Croatia. These are all now included in the new state of Yugoslavia, for which we have no figures. But part of this omission is made up in the estimate for Balkan States, which of course included Serbia.

Italy comes out quite well in comparison with her pre-war average, and our estimate is practically the same as the official figure for that country, about which an Italian correspondent informs us that it is difficult to get private estimates, but that he thinks the Government statisticians are not far out. Germany —reduced Germany—shows a sad falling away—a thing of no wonder when we remember the limbs lopped off. Still, if there is less wheat there are fewer mouths to eat it, and less money to buy withal. Roumania now includes the former Russian provinces of Bessarabia, and one may expect that in time she will become once more a very important factor in the world's markets. We have never included Roumania under the heading of Balkan States, and these latter have therefore no cause for jealousy on that account of their northern neighbour; and their estimated crop of 8,000,000 quarters allows a margin for any

Digitized by Google

little internal troubles and occasional official negligence. No special comment is required on Spain and Portugal; but if the total for "Other European Countries" be considered large it is because we have had to allow something for Austria, though nothing like equal to her pre-war average.

As for the Southern Hemisphere, it is impossible to do more than anticipate more or less intelligently. The estimated total is slightly more than for 1913, and though it might be considered safe to be more optimistic, we have to remember that Australia has had two comparative crop failures since the beginning of the war, and is agriculturally a land of great vicissitudes.

The grand total of the world of course shows a very big reduction owing to the exclusion of Russia. This however, does not mean that there will be an equivalent deficiency in importing countries, but only that we shall be short to the extent of Russia's average exports, except that there is the possibility of other countries having to supply grain for the starving abjects of Lenin.

## SUMMER ESTIMATE OF WHEAT CROPS.

(Including Indian crop harvested 1921.)

| | Quarters. |
|---|---|
| U.S.A. | 96,000,000 |
| Canada | 35,000,000 |
| India (crop harvested 1921) | 31,000,000 |
| Russia | |
| United Kingdom | 9,000,000 |
| France (with Alsace-Lorraine) | 32,400,000 |
| Hungary | 5,240,000 |
| Italy | 22,500,000 |
| Germany | 12,500,000 |
| Roumania | 8,000,000 |
| Balkan States | 8,000,000 |
| Spain and Portugal | 19,000,000 |

(London, September 16); s.s China for Bombay (taking cargo for Gibraltar, Port Said, and Aden; also (with transhipment at Bombay) for Indian Coast and Persian Gulf ports) (London, September 23); s.s. Padua for Colombo, Madras, and Calcutta (taking cargo for Malta, Port Said, and Aden) London, September 24).

*P. and O. British Line.*—S.s. Mundra for Colombo, Madras, and Calcutta (taking cargo for Port Said, Suez, and Aden) (London, September 17); s.s. Mandala for Bombay and Karachi (taking cargo for Persian Gulf and Malabar Coast ports) (London September 23); s.s. Morvada for Colombo, Madras, and Calcutta (taking cargo for Port Said, Suez, and Aden) (London, September 30); s.s. Nevasa for Bombay and Karachi (also taking cargo for Persian Gulf and Malabar Coast ports) (London, October 7).

## TENDERS INVITED.

**Bulgaria.**

Window Glass.—The Administration of the Bulgarian State Railways, Sofia, invites tenders for the supply and delivery of 11,000 sheets of ordinary and 500 sheets of opaque carriage window glass. September 17. (D.O.T.)

Water Closets, etc.—H.M. Legation, Sofia reports the receipt of an enquiry for quotations for 1,000 water closets complete and 500 lavatory basins which are required in Philippopolis for the equipment of new constructions. The enquirer is also desirous of receiving catalogues for machinery of all descriptions, including dynamos, motors, flour milling plant, pumps (hand and power), stationery and portable electric sets, sausage machinery, etc. (D.O.T.).

**Morocco.**

Waterworks Contracts.—Tenders are invited in connection with two contracts for the construction of the Ain Sebzar-Petitjean Waterworks as follows:—(1) The supply and fixing of material, pipes, valves, etc.; (2) The construction of earthworks, etc. The public adjudication of tenders will take place at the office of the "Direction Generale des Travaux Publics" at Rabat, Residence Générale, on September 29.

Railway Rolling Stock.—H.M. Agent and Consul-General at Tangier reports that tenders are invited for the supply of rolling stock for use on the Ceuta-Tetuan Railway in the Spanish Zone of Morocco, as under:—(1) Two first-class coaches. (2) One second-class coach. (3) Three third-class coaches. (4) Ten closed vans. Delivery is to be made at Ceuta within six months of the adjudication of the contract. The latest date for the receipt of tenders in Tetuan, Morocco, is September 24, 1921, but it is understood that tenders may, alternatively, be presented in Madrid up to September 14. Tenders must be accompanied by plans of the coaches and vans, together with documents proving the good faith of the tenderer, and certifying that a deposit of 3,000 pesetas has been made at the Bank of Spain, which deposit must eventually be increased to 10,000 pesetas by the firm whose offer is accepted. Tenders may be addressed direct to the "Delegacion de Fomento," Tetuan, Morocco, but United Kingdom firms who are represented in Spain may care to instruct their agents to submit tenders to the Ministry of Public Works in Madrid. In any case, in view of the conditions of tendering, local representation either at Madrid or Tetuan is desirable. (D.O.T.)

**India.**

Cast-iron Pipes.—The Madras Corporation invites tenders for the supply of Cast-iron Pipes, Special Castings, Sluice Valves, etc. (Spec., 5s., Messrs. Mansergh and Sons, 5, Victoria-street, S.W.1) October 31.

Copper Plates, etc.—The South Indian Railway Company invited tenders for the supply of (1) Copper plates for locomotive fireboxes. (2) Volute and Helical Springs. (3) Steel boiler plates. (4) Wheels and axles. Specifications and forms of tender may be obtained at the Company's Offices, 91, Petty France, Westminster, S.W.1., September 14.

## SUPPLIES AND PRICES IN THE NEAR EAST.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank :—

Mersina.

The report for July states :—The commercial and financial crisis recorded in our previous report continues with the same intensity. Because of the complete absence of business and the stringency which obtains here numerous bills remain unpaid, goods ordered abroad remain a long time in the Customs or are refused on most specious pretexts, and merchants, experiencing serious difficulties in meeting their engagements, demand continual extensions of time.

A very marked improvement has taken place in the price of cotton during the second half of the month under review. This rise has been caused to a great extent by the demands of the spinners of this region. The prices are Ps. 125-150 per *batman* of five kilos as against Ps. 115-140 at the end of May and June.

Wheat, which at the end of June had risen to Ps. 12-13 per oke., as against Ps. 9-10 in May, has fallen to Ps. 11-12 as a result of arrivals. To the same reason is to be attributed the fall in barley which at the end of June showed a slight tendency to rise. This article during four months has recorded the following prices : April Ps. 8-8½, May Ps. 7-7½, fallen to Ps. 18-20 per cent. as against Ps. 20-22.

## ROUMANIA'S TIMBER TRADE.

The timber exports of Roumania, especially sawn white-wood, which finds its markets principally in the Levant, Italy and Spain, although before the war shipments were also made to Rotterdam and the United Kingdom, seem to offer a prospect for British importers, says the Commercial Secretary to H.M. Legation at Bucharest in his recent report. There are certain advantages in dimensions which Roumanian shipments have over those coming from Scandinavia, although it must be borne in mind that the majority of Roumanian timber men are not accustomed to sawing for the English market, and in many cases the interior dispositions of the sawmills would have to be altered in order to allow the cutting of whitewood in those lengths and sizes suitable for the United Kingdom. Roumanian oak is shipped to some small extent in France, and it is probable that it would find a market in the United Kingdom. Bellywood, for use in the manufacture of pianos, is also a product of some of the Roumanian mills, and the question of its purchase for Great Britain might well be studied by interested firms.

Shipments of timber could, of course, be purchased f.o.b. the Danube port of Galatz, but it would be more profitable, and probably more satisfactory to the British buyer, to purchase the timber f.o.b. railway trucks (ex-mill), and organise an agency or branch in Roumania, or the port of reception in the United Kingdom. The branch or agency instituted could take delivery of the timber at the mill, and thus the representative of the British firm would be able to see that all timber shipped was in accordance with the standards demanded by the British market before any expense of transportation was incurred. This seems a very important matter as, with Roumanian shippers unaccustomed to the grading demanded by the English market, the deliveries if effected in any other way, would possibly produce friction. Once the shipper has become thoroughly habituated to the standards desired, this system would, of course, not be necessary.

## ON 'CHANGE.

(*From our own Correspondent.*)

London, Monday.

There has not been much in the past week to distinguish it from any of the dozen or so that have preceded it. Generally speaking there has been very little business, though one or two markets notably Kaffirs, have made some show of brightness. A point worthy of note is the small quantity of stock about. When there is any real buying this factor will make its presence felt.

Gilt-edged stocks have been firm. Consols are 47,5-8 ex div., while Fundings are 71¼, a rise of 3-8. War Loan Fives have gained 1-16 at 88¼. India 7 per cents have been strong, and close at 102,7-8.

In Near Eastern securities which rank as British funds Egyptian Guaranteed 3 per cent. are 67 ex div., Greek Guaranteed 2½ per cent. 1898 are 66, and Turkish Guaranteed 4 per cent. 1865 are 69.

A rather better tone has been in evidence in the industrial group, and most of the leading securities are a trifle harder. There has not been much doing in shipping shares. P. and O. are unchanged at 340, while Furness Withys are the same at 24s. ex div.

Oils have been variable. Anglo-Egyptians are 3-32 up at 1,7-16, but Roumanian Consolidated are 6d. down at 10s. 6d. Steaua Romana are 10s. 9d., and Phoenix are 8s. 9d. Burmahs are 5,13-16 at which they show a gain of 1-8.

Bank shares have been quiet. Agricultural 3½ per cent. Bonds are 52¾, while Agricultural 3½ per cent. Guaranteed Bonds are 54¾. Imperial Ottoman Banks are 8, National Bank of Egypt 20, Bank of Athens 2,3-8, and Ionians 3¼.

There has been little change in Greek securities. The 5 per cent. 1881 Loan is 43, while the 5 per cent. 1884 issue is 42. The 4 per cent. 1902 Loan is 35, while the 5 per cent. 1914 Loan is 42½ ex div.

Land shares have made a strong showing. Beheras are 9,5-16, and Behera Prefs are 3,1-8, and in both cases there are unsatisfied buyers. Egyptian Delta Lands are 8s. 6d., while Egyptian Consolidated Lands are 1s. 1½d. New Egyptians are 24s. 6d., Sudan Plantations 2,13-16, and Union Foncieres 2,11-16.

Among miscellaneous descriptions Egyptian Markets are 19s. Egyptian Salts and Sodas 35s., and Alexandria Waters 6,13-16.

## TRADE CONDITIONS IN BULGARIA.

The Bulgarska Bank in its report dated August 1 says:—During the past month the difficulties of commerce due to various causes indicated in previous reports have increased as a result of the sudden fluctuations in the leva. The depreciation immediately brought about a marked rise in the prices of merchandise especially manufactures, skins, and colonial produce. The decline which followed the rise in the exchange did not bring prices to their previous level. Merchants are bewildered not knowing on what to base their calculations, and they continue to abstain from giving orders, although this is the great time for ordering merchandise for the autumn and winter.

The Consortium has not succeeded in making considerable sales abroad during the past month. The business community is impatiently awaiting the establishment of free trade in cereals. As regards tobacco there is no change; the stagnation is complete. The tobacco harvest has commenced in some regions. Some activity is to be recorded in cocoons. Transactions have taken place at 140-180 levas per kilogramme. The Agricultural Bank of Bulgaria has sold in Italy the stock deposited in the warehouses by the producers—estimated at 65,000 kilogrammes—at 185 levas. Business has been brisk in skins, without any appreciable rise in price. At a meeting of the producers of attar of roses at which a representative of the Chamber of Commerce and Industry of Philippopolis was present the price of attar of roses was fixed at 90 levas per five grammes which is equivalent to 18,000 levas per kilogramme. There have so far been no transactions, and exports are absolutely insignificant. Offers are round about 16,000 levas per kilogramme.

## ALEXANDRIA EXCHANGE.

*Supplied by G. L. Mortera, Alexandria and Cairo.*

Prices on August 19 were as follows:—Agricultural Bank of Egypt, £4 7-16; Alexandria Water Co., Ltd., £6 7-8; Anglo-American Nile Steam, £2½; Associated Cotton Ginners, £3; Banque d'Orient, Fr., 57; Behera Ord., £E 8 3-8; Brasseries d' Egypte, Fr., 78; Building Lands of Egypt, £5-8; Cassi di Sconto Priv. Fr., 100; Ciments d'Egypte Priv., Fr., 45; Ciments d'Egypte Div., Fr., 35; Comptoir Fin. et Com. d'Egypte, £1; Consolidated Land, Pt., 5½; Credit Foncier Fondateur, Fr. 810 ex.; Credit Foncier Act, Fr., 631; Credit Foncier, 1886 Oblig., Fr.; 318; Crown Brewery Priv., Fr., 110 ex.; Crown Brewery Div., Fr., 130; Eaux du Caire Capital, Fr., 78; Eaux du Caire Jouissance. Fr. 105, Egypt and Levant, S.S. Ord., 28s.; Egyptian Delta Light Railways, 4,5-32 ex.; Filature Nationale d'Egypte, £10 5-8; Immeubles d'Egypte Soc. an des., £5 7-16; Khedivial Mail S.S. Ord., 110s.; Khedivial Mail S.S. Co., Pref. £2 9-16; Kom Ombo Ste. An de Wadi, £4 3-8; Kom Ombo Ste., Fondateur, £33 9-16 ex.; Land Bank of Egypt, Parts de Fond, £37½; Lots Turc, Fr., 37; Menzaleh Canal Navigation, Pt., 270; Nungovitch Hotels, £6½; Ramleh Railway, £2 ¾; Salt and Soda, Pt., 33s. 4½d.; Tram. d'Alexandrie Priv., Fr. 49 Tram d'Alexandrié Div., Fr., 68; Union Fonciere d'Egypte, £2 13-32; Egypt Hotels, £1 27-32; Urbaines et Rurales, £3.

The Bank of Athens announces an interim dividend of 5 drachmae on Ordinary shares (coupons No. 41), free of all Greek taxes, leaving 9,053,048 drachmae to be carried forward.

The transfer books of the National Bank of India have been closed until September 21.

The forthcoming Bulgarian internal loan is to be a 6½ per cent issue, redeemable in 40 years by half-yearly drawings at the price of 120.

Odessa Tramways.—A general meeting will be held at the company's offices in Brussels on September 13.

The traffic receipts of the Suez Canal from August 20 to August 25 amounted to 2,550,000 francs as against 2,170,000 francs.

Ionian Bank.—Interim dividend at rate of 6 per cent. per annum, free of tax, for half year to June 30 last, payable September 20.

# COTTON & COTTON GOODS.

## MANCHESTER REPORT.

(*From our own Correspondent*).

Manchester, Monday.

All events in the market during the past week have been overshadowed by the violent fluctuations in raw cotton rates. Although values for the staple have been greatly advanced on last week's prices most buyers have adopted a waiting policy pending more settled conditions. Lancashire as a whole is sceptical as to the unsatisfactory news relating to future supplies in the raw material, and there is no fear of any shortage. The higher level of values should it be maintained would not be a bad thing for Lancashire as it would enable dear stocks of manufactured goods to be cleared on a more favourable basis. With regard to the cloth section a fair inquiry has been about for Egypt and the Levant, but on the whole, actual transactions have not been of any weight. Quotations for Egyptian yarns have been irregular and spinners have not obtained adequate advances. Only a small offtake has been registered. The cloth inquiry for India and China has been rather disappointing, and most of the bids received from the first named outlet have proved entirely impracticable. For the latter market a few sales in greys and whites have taken place. South America still lags behind. Taking the market as a whole a feeling of optimism prevails with regard to future trade developments, and if the values for the raw material keep advancing steadily then it will not be very long before all the Lancashire factories are working at full time.

## LIVERPOOL REPORT.

Messrs. Reynolds and Gibson report as follows for the week ended September 1 :—Spot cotton has again been in slightly improved request. The reaction we have been expecting has taken place; in fact, there are many who believe it has been overdone. The two factors chiefly concerned in forcing our market up—we use the word " forcing " deliberately—have been the important purchases made in Alexandria for American account, and the very active and " bullish " markets we have lately experienced here on the American side, both spot and futures. It was very disappointing when the recent rise failed to attract the trade in any strength, but there are distinct signs that spinners are at last taking more interest in the situation. A number of Egyptian spinners are on the short side as regards actual cotton, although they still hold large stocks of yarn, and the position they find themselves in as the season draws to a close is not an enviable one. Speaking broadly, they cannot sell their yarn, and until they sell yarn they cannot buy cotton, and in the meantime they see the price of the raw material being pushed up against them, and American, fearful of a deficiency of staple in her own crop, absorbing rapidly the visible supply in Alexandria. This evening, the Washington Agricultural Bureau Report, as to the condition of the American crop, is due here, and it promises to be an event of considerable interest to the trade. A figure of anything under 50 should be followed by a series of good, active markets, whilst a figure of 52 or above would probably result in a rapid decline, the effects of which would be felt immediately in the Egyptian market. Taken altogether, we are of the opinion that prices have been elevated rather too much by outside influences, and that there is not sufficient trade buying to warrant any further advance. However, if these outside influences continue to exist, or become even more pronounced, as, for example, the production of a very " bullish " Bureau Report, and a sustained buying for American account in the Alexandrian market, then the value of the home trade as a factor in the situation will become proportionately less, and the technical position will automatically right itself. Manchester reports have not been brilliant, but have improved somewhat in tone during the last few days. The usual enquiry for Fully Good Fair to Good Sakellaridis on the spot has been experienced, and a feature of the week has been the renewed interest displayed in brown cottons, even Tokar and Sudan enjoying a certain amount of popularity. C.i.f. business shows no improvement at the moment ; in fact, the unsettled markets in Alexandria made the offering of cotton from that quarter a somewhat hazardous undertaking. Estimated sales 2,100 bales (includes 250 bales Sudan). Quotations are all advanced, Sakellaridis 200 points, Uppers 200 points, except fine and extra fine, which are raised 240 points; brown 175 points, except fine and extra fine, which are raised 200 points. Fully good fair Sakellaridis 18.00d.

## EGYPTIAN GOVERNMENT CONTRACTS.

H.M. Commercial Agent for Egypt desires to call attention to the fact that contracts for the supply of goods to the Egyptian Government have been lost through the failure on the part of British firms to comply with the conditions of tender. These conditions stipulate that tenders can only be submitted by firms having a resident agent in the country and that tenders should be accompanied by a provisional deposit of 2 per cent. of the value of the offer in money. This provisional deposit may be replaced by a letter of guarantee from an approved Bank in Egypt and does not therefore necessarily involve any outlay of capital.

Copies of the general conditions of tender which form the basis of the conditions which apply to all public tenders, may be obtained on application at the Department of Overseas Trade together with a memorandum of information for the use of those United Kingdom firms who are desirous of submitting tenders for Egyptian Government contracts.

### *An Extended Horizon.*

With the break-up of the Austro-Hungarian Empire the sharp line of cleavage that formerly divided the Balkan States from the rest of Europe has gone. The Near East finds itself overlapping Central Europe; the Danube and its tributaries, instead of dividing the nations, now serve as a bond of union between them. In these pages we must needs adapt ourselves to the new conditions. The fortunes of Hungary, Austria and Czecho-Slovakia are too closely linked up with the future of the the Balkans Proper to remain outside the purview of "The Near East." The same policy that alone will bring peace and prosperity to the undeveloped countries of South-Eastern Europe is needed no less imperatively for the States whose life revolves about such world-centres as Budapest, Vienna and Prague. For the moment the jibe that Europe, instead of civilising the Balkans, had allowed itself as the result of the war to become Balkanised would seem to be in some measure applicable to the territories of the old Dual Monarchy; but some allowance must be made for the inevitable upheaval of a world struggle and the disturbing effects of a long delay in the settlement of the terms of peace.

### *Towards Federation.*

The Allied nations are being urged in many quarters to see to it that their friends are treated as friends and their late enemies as enemies. There is everything to be said for wary treading in regard to Germany, who as a nation remains potentially as powerful as she was before the war. It is not so clear that the advice represents any great measure of statesmanship when it is applied to the others among our late enemies. There is no powerful Austro-Hungarian Empire to-day to disturb the sleep of European chancelleries. In its place are left two comparatively small States, shorn of their capacity for any serious mischief, and, in addition, inclined to be hostile to one another. As it would be foolish not to have some guarantee for the good behaviour of the smallest community, we welcome the appearance on the scene of the Little Entente as the policeman of Central Europe; but we prefer that this guardian of the peace should model his bearing on that of the London policeman rather than on that of the *Schutzmann* of the former Prussian kingdom. Statesmanship, it would be imagined, ought to be directed towards encouraging Austria to link up her destinies with South-Eastern Europe rather than with Germany on the north, and towards making it possible for Hungary to win content in a great Near Eastern federation of inter-dependent progressive States.

### *Hungary and Austria.*

For people still smarting under the memory of Magyar oppressions it may well be that their former taskmaster retains something of his old terror. If this be the case, the greatest service that can be rendered them is to help them to see that their fears are no longer necessary. No doubt, the leopard does not easily change his spots, but with teeth extracted, claws cut, and in a strong cage he may have in him something to excite admiration. To-day, it is true, the Magyars are making it difficult for any one to see their good points. They are challenging the terms of peace imposed upon them after they have accepted them. The particular items on which they have fastened cannot be regarded as vital to Hungary's existence, and they have chosen the worst method of urging their case. To appeal to force at this stage is effectually to place themselves in the wrong, and to strengthen the hands of those who claim that the Magyar must always be regarded as a danger to European peace. In the years to come Hungary is not going to live to herself; her material existence will depend on her good relations with her neighbours, including Austria. If she feels that a real injustice has been done her by the Peace Treaties, and that its removal is more important than friendly relations with Austria, she will be able in due course to submit her grievance to the League of Nations. She has no chance of establishing her claims by mere filibustering; but she may entirely ruin her case by such means. The better way would be to trust to arriving at an understanding with Austria, which could be presented to the League of Nations for subsequent ratification. In the meantime her neighbours in the Near East will do well to show that they are ready to respond to a correct attitude on the part of the Magyar Government, but that they cannot be bluffed or intimidated. In this way they will hasten the time when Hungary will realize that her true interests lie in peaceful relations and economic co-operation with them.

### *Albanian Frontiers.*

The decision to restore the Albanian frontiers of 1913, which the Ambassadors' Conference is said to have taken a short while ago on the advice of a territorial commission, is not to be allowed to pass unchallenged. It is noticeable, however, that those who are in favour of perpetuating injustice and unrest in the Near East have no more convincing argument to adduce than the plea that the question was settled two years or so ago by the Paris Conference. Without going closely into the matter, the world at large has formed the shrewd opinion that, in regard to the Near Eastern settlement, any decision of the Paris Conference is *a priori* evidence in favour of reopening a subject. The "Diplomatic" dictograph of *The Daily Telegraph* unwittingly gives the case away when he refers to "the foreign claims to territory hitherto Albanian." If peace is to be restored to the Near East, these foreign claims must no longer be countenanced, still less recognised, and territory must be adjudicated according to the national instincts of the population. An international commission examined on the spot in 1913-14 the frontier problem of Southern Albania. It is ridiculous to contend that the recommendations perfunctorily endorsed in Paris in 1919-20 under conditions associated with "a seething cauldron of human passion and greed" can carry any weight against the dispassionate findings of the more qualified judges. Europe to-day is not concerned to know who of the four members of the Supreme Council in 1919 held one view one day and another the next: it wants to make sure that a district with a strongly developed consciousness of a certain nationality is not going to be handed over to any alien jurisdiction.

### *Concessions to Yugoslavia.*

When it was announced that the Ambassador's Conference had recommended the retention of the 1913 frontier in Southern Albania it was understood that there would be certain rectifications of the Albano-Serbian frontier. The Albanians, however, according to our correspondent, are not prepared for the drastic revision that it is now believed finds favour in Paris. Perhaps the fears of Tirana to which he refers will prove to be unfounded; certainly the alleged changes suggest something more than minor rectifications. In view of the fact that the delimitation of 1913 was reached after a careful investigation of rival claims as well as of strategical considerations, it is to be hoped that violence will not be done to the former decisions without adequate cause. The goal to be kept in view is peace in the Balkans; it will never be reached by creating a variety of Alsaces-Lorraines in the Near East. Albania's neighbours can, no doubt, point to the unsettled condition of that country in the past. But the Albanians to-day claim to have broken with their past and ask to be allowed to make a fresh start, as an independent country free from outside intrigue. They are entitled to be given their chance. How difficult things are likely to be made for them, unless the Powers protect them, is indicated by the attitude of the Yugoslav delegate at the Council of the League of Nations. As Albania, on the representation of the Tirana Government, has been admitted as a member of the League, his slighting reference to that Government is an affront to the Council, and should be taken note of by the Government which accredited him.

### *War in Asia Minor.*

A further lull has taken place in the fighting in Asia Minor. The Greek official statement is to the effect that, after a march of ten days and a battle lasting fifteen days, the Greek Army inflicted defeat and severe losses on the Turks. It has occupied the enemy's strongly fortified positions, and established itself firmly on the East of the Sakaria. "During this pause," the statement continues somewhat abruptly, "it is strengthening its lines of communication and remedying their defects, whilst preparing to continue its successful operations until the object of definitely defeating the adversary is attained." Mustapha Kemal's report on the fighting has not yet reached the outer world, but a Constantinople message, which probably reflects his view, states that as a result of the battle for Angora the Greeks are withdrawing westward, with losses that are put at 18,000 as compared with the 12,000 casualties suffered by the Turks. From the two versions it is evident that both sides have fought themselves to a standstill, and in so doing have confirmed the cynicism of the Supreme Council, which counted on a settlement of the Asia Minor problem proving easier after the intransigence of the disputants had been chastened by further fighting. It remains to be seen whether the Allied Governments are now prepared to stop the useless bloodshed, which, as is known, is not confined in the Near East to battlefield casualties.

### *A New "Policy" in Persia.*

The Teheran Government is still as bent as ever upon dispensing with foreign advice or assistance—or, to be more exact, with advice and assistance from those quarters whence Persia formerly received them—and, apparently upon undoing nearly everything that has been done in the last few years to bring something like order into the country. It has cancelled the contract of Mr. Armitage-Smith and other members of the Financial Commission, dismissing them with six months' salary in its eagerness to be rid of them; and it is now disbanding the South Persia Rifles as rapidly as possible. The Government, we know, has several times announced that Persia can manage her own affairs perfectly well; and the Persians as a whole appear to be of the same opinion. The wish, at any rate, is a very natural one, especially in these days; and if effect could be given to it without disastrous consequences for the country, and especially for the bulk of its people, the policy of Teheran would find plenty of sympathisers in Great Britain. But, frankly, anyone who knows the country as it is to-day is sure to feel very sceptical on the point. We all remember that the new and democratic Government of Seyyid Zia ed-Din and Colonel Riza Khan—the first to insist so strongly on Persia's fitness to do all things for herself—found it necessary to imprison a very large number of their predecessors in power, to say nothing of some hundreds of governors and lesser fry; that Zia ed-Din's term of power was brought to a sudden end by the manoeuvres of his colleague; and that several of the imprisoned statesmen have found their way back to power. And one cannot help wondering whether what has happened before will not happen again; whether the politicians at Teheran will not forget their duty to their country in settling up accounts with one another.

### *Whither?*

So long as the Persians persist in misunderstanding, or pretending to misunderstand, Great Britain's attitude

Digitized by Google

towards their country, we can surely do no more to prove our friendly feeling for them. Indeed, in face of recent events, it must be increasingly difficult to keep that friendly feeling alive. For it would be idle to deny that while the dismissal of the members of the Financial Commission was, in itself a small incident, the method of performing the act appears to have been distinctly unfortunate, and, taken together with other incidents, seems to point to a deliberate intention of showing unfriendliness to Great Britain. The disbanding of the South Persia Rifles, too, it is difficult to avoid suspecting, is prompted largely by the feeling that that very promising force was a British conception and a British creation. That some body of the kind was needed, and badly needed, in South Persia, is not to be denied by anybody having any acquaintance with the facts; and while British trade, owing to its leading position in that region, certainly benefited by the preservation of order, the greatest gainers by far were—as they certainly ought to be—the Persian Government and the Persian people. Yet the force is to be scrapped, although our own Government made one final effort to save it for Persia by proposing a scheme under which all British officers would within six months have been replaced by Persians. Meanwhile the Teheran Government has the trouble in Khorasan upon its hands, and has lately offended the Bolshevist Minister in Teheran by allowing a Commissary (rejoicing in the name of Israelenko) and a former Russian Consul-General (M. Pokhutanoff) to evade arrest on Persian soil. Upon the whole, the Ministers of His Imperial Majesty the Shah seem to have plenty of work of one kind or another before them.

### *A Trans-Jordanian Incident.*

An incident, small in itself, but not without importance as indicating an unsatisfactory state of affairs in Syria, is reported from Jerusalem. A Syrian named Ibraham Hannano, and described in some messages as an 'anti-French demonstrator,' recently arrived in Jerusalem from Trans-Jordania: and was then arrested at the request of the French authorities. This led to a meeting of protest being held at Amman, at which a British officer—Colonel Peake, Inspector of Gendarmerie was roughly handled by the crowd. The Emir Abdullah dealt with the matter promptly and correctly, insisting upon an apology to Colonel Peake, the dismissal of the culpable officials, and the arrest of those guilty of the assault; and the usual commission to inquire and report has been appointed. It is to be feared that incidents of a similar character to this one are likely to occur for a long time to come. The Arabs have not forgotten, and are not likely to forget, the departure of the Emir Faisal from Damascus, or the events that led up to and immediately preceeded his departure, and while those memories last they will chafe at the presence of the French in their land, and will work, in the only way open to them (as they consider) to put an end to a state of affairs which they heartily dislike. The extradition treaty between Syria and Palestine is, therefore, sure to be frequently invoked.

---

An urgent appeal, addressed "to all peoples," is issued by the Georgian Information Bureau in London on behalf of the Georgian people "groaning under the yoke of the invaders, suffering all the horrors of famine, typhus, cholera, and plague and reduced to the last stages of despair." The Bolsheviks says the appeal, are exacting fresh contributions reaching the enormous total of 50 milliard roubles and considerable quantities of commodities and wool.

## THE WEEK AT HOME.

LONDON, Monday Evening.

### Inverness and Ireland.

The Cabinet met at Inverness on Wednesday, to the great excitement of the Highlanders, and despatched its answer to Sinn Fein. The document has been closely scanned both here and in Ireland, and its combination of firmness and conciliation has generally been approved. Sinn Fein is invited to a general conference at Inverness on the 20th; no conditions are made, except that the Irish delegates must be "prepared to ascertain how the association of Ireland with the community of nations known as the British Empire can best be reconciled with Irish national aspirations." In other words, separation is excluded, but the form of union is open to full discussion.

Irish organs accept the invitation as not merely satisfactory, but generous, and it is recognised that Sinn Fein can hardly refuse the conference. It is noticeable that Mr. de Valera's language in his public speeches has been more conciliatory during the past few days, and generally Ireland is more optimistic. But it is doubtful, according to Dublin opinion, whether Mr. de Valera will himself attend the conference; it is thought more likely that Mr. Arthur Griffith will be delegated to discuss the question with the British Cabinet. This is probably all to the good, for Mr. de Valera has not been altogether a success as a note-writer or a speech-maker; he has been both irreconcileable and desirous of compromise, and it has been difficult to gauge exactly what his attitude implied. Moreover, it has apparently been quite impossible to get him to discuss details: he is too wedded to phrases and abstract propositions. Yet if the negotiations are to result in settlement, resounding phrases will do little, and details will have to be discussed. The idea is growing that the more inadequate and constructive elements of Sinn Fein are now attempting to get control of the movement.

It is accepted on all sides that the negotiations will be prolonged. There is not only the relation of Ireland to Britain, but also that of the South of Ireland to Ulster, a more difficult proposition, to be considered. It is easy to construct an academic constitution, but to frame one that will work takes time. It is doubtful whether the discussions will be completed before the assembly of Parliament in the middle of October—if they are successful, the autumn session will have to be given to Irish legislation—and in any case it is assumed that Parliament will not now be called together before that date, as at one time seemed likely. Few will regret the breathing-space.

**Unemployment.**

The unemployment figures are diminishing week by week, but they are still serious, and there is likely to be a good deal of distress during the coming winter. The Cabinet has been denounced for not doing more, but the fact is that artificial remedies for unemployment are usually found to aggravate the disease, and the bulk of the existing unemployment is directly due to the prolongation of the coal dispute, which was not happily handled by Labour. Indeed, Labour at the moment appears to have no constructive ability. At the Trade Union Congress held last week, the only remedy suggested in the presidential address was shorter hours. The speaker betrayed not the least recognition that this would merely mean a lowering of the standard of living all the way round. But it is noteworthy that Labour has entirely abandoned its belief in "one great union." At the Congress any suggestion for diminishing the existing autonomy of the unions was voted down.

**The British Association.**

The papers read before the British Association at Edinburgh this year seem to have been less interesting than usual, or else the reports have been excessively curtailed. Perhaps this is partly due to there having been no element of controversy in the proceedings: one may be interested in the structure of the atom, but one does not get wildly excited over its positive and negative elements. After the last meeting a year ago there was some correspondence as to the declining interest in the meetings, which was reflected in diminishing attendance. Several remedies were suggested—some of them contradictory—but I doubt if any real advance has been made this session.

**London Changes.**

While part of the Strand as well as of Oxford Street is being pulled down for rebuilding purposes, and great blocks of offices are still being erected in the City, Central London is beginning to wear an oddly different appearance. It is due to the notice-boards of offices and shops to let. A year ago it was impossible to get in anywhere, and City landlords were profiteering in the most shameless fashion, but the depression of trade has blighted their outrageous appetite, and there is now a good deal of vacant space. This is likely to continue for some months, the demand having diminished at the same time that the supply has increased. But while there is no longer any shortage of offices, the shortage of houses in the outer suburbs has not been fully remedied.

**Food Prices Falling.**

The indignation over the excessive prices charged by retail dealers, to which I referred last week, has had some effect. Ten days ago the bakers declared that it was quite impossible to reduce the price of bread; the price of bread has now fallen. The coal merchants declared that it was impossible to reduce the price of coal, and the Mining Association impertinently rebuked the public for its belief that, as wages had fallen at the coal fields, prices should fall. The public, however, refused to buy coal, and it laughed at the rebuke; the price of coal has now fallen. These reductions, which will probably be followed by similar outbursts and capitulations in other trades, will have some effect on the cost of living. This greed on the part of retailers is an important contributory cause of Labour unrest.

**Rate Summonses.**

A good many local authorities are becoming perturbed over the question of local rates remaining unpaid. In the poorer boroughs people sometimes cannot pay them; in the richer they delay payment until the last moment, and pay only with emphatic protests against the extravagance of the local administration. There is very little doubt that there has been far more waste in local than imperial Government, and I imagine that the anti-waste movement would have more chance of success in municipal than parliamentary elections. In the field of higher politics, although it has frightened both Coalition and Labour, it has become ridiculous by splits within the anti-waste party itself; when Lord Rothermere secedes from Mr. Bottomley, and one picture paper attacks another in a by-election, sensible people fight shy of such absurdities; but in municipal matters I should think this particular movement should do some good.

**"Mr. Chaplin."**

It was comical to see *The Times* devote a grave leading article last week to "Mr. Charles Chaplin," the celebrity of the day, who is now with us in the flesh after having been with us on the films continuously for years. All the world loves Charlie, but more particularly London, for his career is of the kind that the Cockney most appreciates. Born in Kennington—where schools dispute for the honour of having educated him—he failed as a young actor, went to America, and made his name and fortune on the pictures as the typical cockney. He is said to be of a grave and serious disposition, and to cherish the desire of studying philosophy in some quiet retreat, where bowler hats and baggy trousers are unknown—but this will not really happen. He is rather shy and nervous of the uproarious welcome at present, but no doubt he will get used to it.

**Another Australian Defeat.**

English cricket has been saved. Another scratch eleven, raised by that old veteran Mr. C. I. Thornton, has beaten the Australians at Scarborough; as somebody once said of us in war, we win very little except the last. I fancy the Australians are going a little stale—they have been playing continuously since May—but we seem at last to have found players who are not dazzled by the prestige of their opponents. If we pick teams for the next series of test matches from players under thirty who have never been tried for their county, we may stand a chance of winning.

**The Grand Trunk Sensation.**

The decision of the arbitration of the Grand Trunk of Canada that the shares of that railway are practically worthless has caused a sensation on the Stock Exchange. The decision is so obviously unjust, in view of the past history of this undertaking and the relations of the Canadian Government with the Corporation, that it is to be appealed against, and the market is relying on the minority report of Mr. Taft, the American ex-President and Judge of the Supreme Court, to force the Canadian Government to act. If it does not, all Dominion securities—and the standard of Dominion ethics as well—will receive a rude shock.

**The Week's Books.**

One of the most interesting books I have read for many a long day is "Miscellanies, Literary and Historical" (Hodder and Stoughton) by Lord Rosebery. There are papers on Gladstone, Randolph Churchill, on racing, on Burns and R.L.S., and a dozen other subjects; all with a certain distinction of thought as well as style. Lord Rosebery has been compared by Mr. Gosse to the eighteenth century, and there is truth in the comparison, but his style reminds me at times of the great Elizabethans. His oratory deserves that rare tribute, that it reads as well in the study as it sounds on the platform.

"Portraits of the Nineties" (T. Fisher Unwin) by E. T. Raymond, is in one sense a continuation of the author's "Uncensored Celebrities," which was so popular a couple of years ago. The nineties of last century are rather the middle ages to many of the younger readers of the day, but they had great names, and Mr. Raymond on the whole treats them with more respect than his contemporaries. His gallery includes Lord Salisbury, Sir William Harcourt, Cecil Rhodes, Creighton, and other prominent figures of the Diamond Jubilee time.

"The Control of Life," (Melrose) by Professor J. Arthur Thompson, who is one of the few scientific writers with the gift of popular exposition, discusses our natural inheritance, the biology of health, the biological control of life, the individual life cycle, and the kingdom of man in an informative and instructive fashion. It is likely to prove a useful little book in what may be called practical eugenics.

# THE NEAR AND MIDDLE EAST.

*(From Our Own Correspondents).*

## ALBANIA.

*Tirana, September 8.*

Reports are arriving here from Geneva and London which arouse the gravest misgivings among Albanians. It is stated that the British Government is prepared to cede certain Albanian territories to Yugoslavia. Mention is made of frontier rectifications in three directions, the cession of Kastrati, north-east of Scutari, of an important district south-west of Prisrend, and of another west of Dibra. It is pointed out here that the result of these cessions would be to enable Serbia to dominate the whole of Albania; for Tirana, Scutari and Elbasan, and even Koritza, would be rendered to all intents and purposes defenceless against Yugoslav aggression. A prominent Albanian with whom I have discussed the subject expressed himself as follows:—"Are there then no qualified judges in the capitals of the Great Powers? If there are, how comes it that a judge hands over the victim to the one who has done him ill?" For these are the precise districts where the Serbians have carried out their raids and where the population has laboured under such terrible hardships.

It is perhaps fair to add that a considerable section of Albanian opinion refuses to believe in these reports and retains its faith and a blind confidence in England, which has already guaranteed the independence and sovereignty of Albania.

**The Gathering of the Eagles?**

Apart from the immediate practical disabilities that the suggested cession of territory would impose on Albania, it might be pointed out that one effect would be to strengthen the opinion of Yugoslavia, Italy and Greece that Albania after all is a State destined to be partitioned sooner or later. It would seem to be in anticipation of such an event that Italy has once more insisted upon a form of mandate, as well as upon the Isle of Saseno, and perhaps also Valona. With the same aim in view the Serbian Committee at Podgoritza has been created, Yugoslav bands violate the Albanian frontier and the Belgrade Government has set up Marka Gjoni—a worthy successor to Essad Pasha.

To lay hands on the territorial integrity of Albania at this moment—such is the opinion here—would be to encourage Albania's neighbours to intrigue and conspire against her life. The attitude of the Great Powers will have a demoralising effect when they ought at this time to be giving to all the nations a lesson in morality by accustoming them and compelling them to respect the liberty and life of neighbours.

**On the Greek Frontier.**

A report has been current for the last week that bands are being formed on Greek territory, in particular at Kastoria, with the object of attacking the Albanian frontier. As might be imagined, it is believed here thar the Hellenic Government is offering pecuniary inducements to those who are willing to enrol themselves in the bands. The Albanian authorities have taken certain measures of protection, and to-day it is reported from Koritza that a small Greek band, on trying to enter Albanian territory, came into conflict with Albanian gendarmerie; one Greek was killed and another wounded and taken prisoner. The latter, it is stated, is a man in close touch with Bishop Jakov, the Orthodox Metropolitan of Koritza, who is famous for his anti-Albanian attitude. But such is the anxiety of the Albanians to give no cause for complaint that they have not yet deported the Metropolitan, who is, I understand, a Greek from Smyrna.

The fear is expressed that Greece is encouraged by the favourable attitude adopted by the Powers towards Yugoslavia, and their intention to make a fresh grant to the latter of Albanian territory. Greece, it is pointed out, is consequently inclined to be jealous, and is anxious that she too should have a share in the spoil.

On the top of all these sinister reports which are exercising public opinion here comes another in regard to Italy. It is persistently alleged that the Consulta is continually talking of certain rights, of an economic hold on Albania and of the possession of the island of Saseno. In some quarters it is believed that Italy hopes to secure recognition for her claims as a *quid pro quo* for her silence in regard to the frontier rectifications in favour of Serbia. Are we back again, it is asked, at the partition of Albania, decided upon in the dark days of 1915, but fortunately abandoned later, when more honourable counsels prevailed?

M. Marquart, delegate of the International Red Cross of Geneva, has been in Albania for the last three weeks with a view to seeing with his own eyes the miserable state of the children and women refugees at Tirana, Kavaja and Elbasan, who fled from the districts devastated last year by Serbian bands. M. Marquart has already sent in two reports to the Red Cross, and these, it is hoped, will be formally communicated to the League of Nations.

**The League of Nations Session.**

September 2 was the date fixed by the Council of the League of Nations for the consideration of Albania's request for the settlement of her difficulties with Yugoslavia. Before the discussion opened Mr. Balfour, the British delegate, read a resolution according to which the Albanian request was to be sent back to the Assembly to which Albania wished to submit the question which had remained without solution at the last session—June 25. The Albanian delegate is understood to have supported the resolution, but the Yugoslav delegate intervened with a question purporting to ask for information as to which of the two Governments of Albania—that of Mirdita, or that of Tirana—really represented the country and the nation, and with which of the two Governments the League ought to enter into relations. The Yugoslav delegate went on to suggest the despatch to Albania of a committee of enquiry for the purpose by the League of Nations. The Albanian delegate replied that the seat of the Government of Mirdita was at Prisrend, that is to say, in Yugoslav territory, while the seat of the Government of Tirana was in Albania itself; moreover, he pointed out, while the Government of Tirana represented the country and the nation, that of Mirdita consisted of a single individual Marka Gjoni, and was paid and created by Yugoslavia. At the conclusion of his remarks the resolution of Mr. Balfour was adopted unanimously.

It is understood that the inquiry into Albanian affairs will be conducted in the 6th Committee, which will probably refer it to a sub-committee. The League of Nations, before investigating the matter, will, no doubt, wait for the decision taken by the Ambassadors' Conference in Paris regarding Albania's northern frontiers.

**Education.**

A technical school, called the Vocational Training School, has just been established at Tirana. Funds

for the purpose have been furnished partly by the Albanian Government and partly by the American Red Cross, which has undertaken to appoint certain of the staff. The School will supply a great want in the country. The Minister of Public Instruction has just established at Scutari a school where 120 children from the Albanian highlands (Maltsors) will be brought up and educated.

It is interesting to note that the number of students supported by Albanian State funds in European capitals now amounts to 130. There are, as well, 150 others who are prosecuting their studies at their own expense. The Albanian Society 'Vatra' in the United States has offered to contribute an annual sum of 2,000 dollars towards the support of a dozen young Albanians studying in America.

## YUGOSLAVIA.

*Zagreb, August* 30.

**The Baranya Question.**

The press is still very disturbed about the Baranya question. The evacuation appears to have been carried out in a proper and satisfactory manner, but the Magyars have in a few instances overrun their rights, and driven off some cattle from the wrong side of the line. These are trifling matters. What is more serious is the statement in all the papers that the British officer commanding the Allied Mission has asked the Belgrade Government to withdraw the frontier some distance to the south. The Government have decided that the line must be maintained as set forth in the Peace Treaty, and quite naturally refuse to consent to this withdrawal, which would bring the Hungarians still nearer to the important town of Subotica; and they have given orders to defend the proper line by force if necessary. If the Mission encourages the Magyars to take this line, a conflict can scarcely be avoided; which may lead to serious consequences. Public opinion is strong on the point, and it is especially regrettable that this unfortunate business should be associated with the name of a British officer, as the incident has gone far to damage in Yugoslavia our reputation for being supporters of fair play. The Belgrade *Politika*, commenting upon the report in the Paris *Temps* that the British officer in question sent a telegram of hearty congratulation to the Hungarian general, remarks that one would think that from 1914 to 1918 it was the Hungarians who were the sturdy allies of Great Britain, and the Serbs a bitter and savage foe. At the same time, the Zagreb *Novosti* gives prominence to a telegram from its correspondent to the effect that Admiral Horthy has decorated the British officer in question with the highest order possible, in recognition of his services in connection with the evacuation of the Baranya.

The Zagreb *Jutarnji List* reports (with big headings) that the officer has come to Belgrade, where he will be received by M. Pashitch, to "justify his attitude on the occasion of the evacuation of the Baranya, which has so disturbed public opinion throughout the country."

**Kemalist Propaganda.**

Kemalist propaganda has reached Yugoslavia. Mohammedan armed bands are harassing the Orthodox population in the old Sandjak and in the Kossovo district and what is known as Old Serbia. As the Christians have been disarmed, they are unable to help themselves. It is reported from Prijepolye that the Mufti recently made a speech in the local mosque and encouraged his co-religionists to hold out, for in a month Kemal Pasha would come with his victorious army to liberate them from the yoke of the Giaour. The gendarmerie, even with the help of volunteers and irregulars, cannot deal with the situation, as the Mohammedan bands are very numerous and strong; and troops have been sent to deal with the matter properly. One powerful band, after being hunted in the wilds of the Sandjak, has withdrawn into the mountainous district of Herzegovina, but it can only be a matter of time before it is crushed.

**For Tariff Reformers.**

In these days of tariff revision it is interesting to see the figures of the tariff of Prince Milosh, when Serbia was still a pashalik, with Turkish currency and measures. Thus, the import duty of coffee was 7 grosh (20 centimes, a piastre) per 100 okes, an oke being about 2¾lb.; on sugar, 3 grosh; on rice, 3 grosh and 12 paras; on hempseed, 2 gr., 20; on cotton and wollen goods, 13; on new copper 15; on old copper 7.20; on guns 55 grosh per 100; and 4 grosh on a box of scythes. Milosh also had an export duty, curiously enough, with the same tariff. It is interesting to note that in those days, about a century ago, there was not a surplus of food in the country, and its export was discouraged; for at the end of the tariff there is a note that wheat, maize, barley, oats and beans pay duty when going to another pashalik, but are duty free on importation.

*Belgrade, September 7.*

**Montenegrin Irreconcilables.**

Although Italy recognised the fusion of Montenegro in Yugoslavia by the Treaty of Rapallo, the surviving adherents of the Petrovitch-Njegush dynasty keep up a semblance of a government. The official *Glas Crnogora* is printed in Rome, and a recent number proclaimed the shuffling of the four "Ministers," Plamenats, Vuchinitch, Vujovitch and Shoch, signed by the Regent-Mother ex-Queen Milena, in the name of "His Majesty King Michael I." The Yugoslav press has welcomed the news that the Italian authorities have searched the premises of the "Montenegrin Consulate" in Rome, on the ground that they have news that the Montenegrin exiles in Rome, Geneva and Basle were plotting anti-union disturbances in Montenegro. This Italy, as an ally of Yugoslavia, cannot tolorate within her territory, especially as the "consulate" of a defunct State can have no extra-territorial rights.

**An Impressive Ceremony.**

A sad ceremony took place at Nish on Saturday. The remains of no less than ninety nine Serbian priests, who died at the hands of the Bulgarians between the 12th and 18th of November 1915, at Yelashnitza, Surdurluk and Bela Palanka were buried. The remains were reverently collected and conveyed to Nish, where, with a touching and impressive ceremony, they were interred in the Cathedral. A marble slab will be erected to perpetuate the names of these martyrs in their country's cause.

**The 'Alkari.'**

One of the most interesting deputations to the funeral of King Peter was the "Alkari" from Sinj. These were four strapping men in picturesque uniform, richly decorated with gold and silver, with long plumes in their caps, and swords by their sides. Their home, Sinj, is a picturesque and romantic town in the backhills of Dalmatia. For years it was the refuge of the *haiduks* and and "uskoks" the Robin Hoods of Dalmatia, who were described by Sir Gardiner Wilkinsoh ninety years ago. Tired of this wasps' nest, the Turks sent a considerable force to wipe them out in 1715, sixty thousand men under the Serasker Pasha, who laid siege to the town. But the "uskoks" defeated the Turks, who left eleven thousand on the battlefield and withdrew. In this desperste fight the Orthodox and the Roman Catholic Serbs fought sid by side, the latter led by a friar. To perpetuate the memory of this great victory they formed a guild of knighthood, of which each member owned a horse and was escorted by his orderly. They maintained a military organisation, and celebrated tournaments, at which the chief item was tilting at the ring or "alka" from which they called thenselves "alkari." The guild still survives, and maintains its plcturesque and striking uniform designed two centuries ago, and its members are to-day as much inspired with the flame of patriotism as when they sent the Turks headlong.

## ROUMANIA.

*Bucharest, August* 30.

**Political.**

Had it not been for a meeting which the 'Tzaranists' (Peasant Party) held, we should have had the unusual gratification of recording a blank week with regard to internal political affairs. At the meeting referred to, M. Michalake, the chief of the Party, gave an account of his and his followers' parliamentary activity up to their retirement from the House. *Inter alia*, he denied the rumours afloat about negotiations for eventual collaboration with the Cabinet, affirming the necessity of a new democratic Government, and of fresh elections which should be conducted by an interim and neutral Cabinet. He made their return to Parliament conditional on the Cabinet apologizing for the insult offered by one of its members to one of his partisans.

General Averesco is expected to return soon, and political activity will certainly revive after his arrival. A section of the press which claims to be "in the know" regarding the Government's plans, discloses its intention of bringing the existing political crisis to an end by securing the collaboration of the Tzaranists, Ardeleni; and Bessarabians (under Stere). There will be allotted to them a fair share of portofolios in the Cabinet, which will be reconstituted in the autumn, in order completely to isolate the Liberals, whose seats in Parliament will be declared vacant, should they persist in their abstention from the sittings.

This version although somehow bearing the stamp of "fabrication" deserves to be mentioned, because it expresses the general impression that the viability of the Cabinet depends on a compromise with the Opposition mentioned, also because it contradicts the other version that the Cabinet will be re-arranged with some fresh elements of the governmental party. If accomplished, it is believed that this would prove, after all, only a palliative..

**Miscellaneous.**

The intentionally misleading report published in a Viennese paper stating that General Averesco, after completing his cure at Kissingen, will go to Berlin for the conclusion of an economic accord, has been officially contradicted. The report about the conclusion of a concordat whith the Vatican is also denied.

The Coronation of the Sovereigns which was to take place on September 27, is officially postponed. It will presumably be celebrated on May 10, this date being also the anniversary of the Coronation of the late King Carol.

The Roumanian-Yugoslav Commission for the frontier delimitation according to the Treaty of St. Germain, has resumed its work, after a short interruption on account of its President, a Serbian General, having had to attend King Peter's obsequies.

M. Panas, Hellenic Minister in Roumania, who has been appointed his country's representative on the League of Nations' meeting, has left Bucharest. During his absence, M. Satrellaropoulos is acting as Chargé d'Affaires.

## BULGARIA.

*Sofia, September* 4.

**The End of Article 4.**

The Sobranje has repealed Article 4, and a very much abused and unpopular measure has thus disappeared. The Reparations Commission, who advised the Government to repeal the article, have now achieved their object, and the thanks of the country are due to them. They have, however, allowed the trials which are pending against 60 persons to continue; but the majority of those affected by the article, numbering about 1,500, will be free.

The consequences of this legislation should be far reaching, as many capitalists who during the last two or three years have been forced to live abroad will now return; and, with them will come at least a portion of the capital, which left the country with them. Recent events in Russia will convince anyone that capital is a vital necessity for the economic life of a country, and the return of capital to Bulgaria is surely one of the best things that could have happened.

At the same time, even although the Article is definitely repealed, fears are entertained that the Government, whilst honouring the repeal in theory, may not altogether observe it in practice. The reasons for this fear are not far to seek; the political rivalry between the Agrarian and Bourgeois parties is running very high at the present moment, and the majority of the persons who suffered under "Article 4." belong to the Bourgeois parties. It is thus evident that it is not in the interests of the Government to have many wealthy men whose ideas and politics are opposed to theirs returning to Bulgaria; whilst on the other hand it is doubtful if a number of the aforesaid Bourgeois will deem it worth their while to come back as long as the present Govern-

ment is in power. "Article 4" has unfortunately become rather more of a political weapon than a means of punishing those who illegally made large fortunes during the war.

Nevertheless the repeal of the Article is a step in the right direction, and if the moderate section amongst the Agrarians can exert their influence on the whole party, and prevent the extremists from waging a ceaseless war against capital, there is every reason to hope that an improvement in the financial and economic situation will soon take place.

**Relations with Roumania.**

There have of late been signs that Roumania is sincerely desirous of a *rapprochement* with Bulgaria, and the news that the sequestration of the property and rights of Bulgarians in Roumania, and especially in the Dobruja, may be raised is hailed here with great satisfaction. The action of Roumania in renouncing her right to judge Bulgarian war criminals was also favourably commented on, and the appointment of General Fitcheff as Bulgarian Minister to Bucharest will, it is hoped, further help to increase the good feeling, as the General is both known and respected in Roumania. M. Langa Rascano, the Roumanian Minister at Sofia, also enjoys great popularity both in official and unofficial circles, and his declarations to the Roumanian newspaper *Dacia* last month are significant and interesting. The Minister said *inter alia* that the rumours regarding Bulgaria's efforts to evade carrying out the terms of the Peace Treaty, in so far as they affected Roumania, were without foundation. The Sofia Government, he said, was doing its best to live on good terms with its Northern neighbour, and although there was still a regrettable amount of *Komitaji* activity along the frontier, the joint action of the two Governments in having all trees cut down at a certain distance from the actual frontier should greatly minimise these outbreaks. Economic relations were improving daily, and the Roumanian petrol had succeeded in ousting the American product, whilst the Bulgarian railways were themselves using the Roumanian oil. If only the other neighbouring countries would follow Roumania's example, and enter into more complete and intimate relations with the Sofia Government, there would be a real chance for peace and order in the Near East.

**The Press Censorship.**

An article, which appeared in the Sofia newspaper *Zora* this week, commented on the Press Censorship in Russia. Towards the end of the article the author began to discuss the Press censorship in Bulgaria and the rest of his article was completely censored. On the other hand, the newspaper *Den* published ten days ago a most violent attack on England; incidentally this article has since been strongly criticised by many leading men here. These two cases, of censorship and non-censorship, coupled with the somewhat remarkable fact that on two occasions the *communiqués* of the Reparations Commission have been censored, go to show the illogical system on which the Censorship is carried on. One would understand the Government objecting to the Press indulging in a campaign against another country, having regard to the straits that Bulgaria finds herself in; but it is difficult to understand why all criticism of internal affairs should be forbidden.

Yet another example is that of the series of articles written by Colonel Repington, which appeared in the *Daily Telegraph* of August 22, 24, and 26. The last two articles were reproduced *in toto* in all the leading papers; but the first, which contained some very mild criticism of the Government, has been sedulously hushed up and prevented from appearing. This kind of policy is as dangerous to its authors as it is to those on whom it is practised, and the whole question of Press Censorship would seem to be badly in need of reform.

**Personalia.**

The King has returned to Sofia from Varna.

The Hon. Aubrey Herbert, M.P., is at present staying in Sofia and was received by King Boris on September 3.

Mr. Bruce, the new Secretary General of the English Delegation on the Reparations Commission has arrived at Sofia.

# THE CARAVANSERAI.

*Think, in this batter'd Caravanserai*
*Whose Doorways are alternate Night and Day,*
*How Sultan after Sultan with his Pomp*
*Abode his Hour or two and went his way.*
—OMAR KHAYYAM

The abnormal summer has produced some strange results in this country; but neither here nor in any other European country has it, I think, exercised any influence directly upon the fate of any ruler. In Mesopotamia, however, it really does seem to have done a good turn to King Faisal. Evidently owing to the unusual summer, some of the many thousands of Basrah's famous date palms have been making preparations, so to say, to produce a second crop of fruit this year. I do not suppose that any of the second crop will ever come to anything. For one thing, the owners of the trees are likely to feel that it is much better to give the trees their usual rest than to help on the abnormal growth; and therefore to prevent fertilization. For another thing, if a few greedy owners should try to secure a second crop, I fancy the cold weather will be on the trees too soon to allow the fruit to ripen. For all that, I gather that the extraordinary conduct of the trees has caused much excitement among the Arabs, who regard it as a fortunate occurrence, and that they are generally inclined to attribute it to the presence in their midst of their newly chosen King, Faisal. And—in Mesopotamia, at any rate!—such things are not without value.

* * *

From all parts of the country there arise murmurs and wails, about the Mosquito and his (or her; for I believe it is Mrs. M., who is so objectionable) nasty little ways. Streatham residents I read, had to close their windows and suffer in stuffiness until they killed the hundreds of invaders who had already penetrated the privacy of the Streatham homes. And all round London, and in many parts of England, the same kind of thing has been going on, more or less. Affectionate couples have been driven from the seats of the parks and commons; gardens have had to be abandoned in the evenings; and the number of bitten necks, arms, and faces that you see is astonishing. But the best evidence of the seriousness of the plague in our once-happy land is the fact that organisations are springing up all over the country for the purpose of waging systematic war on the blood-thirsty insects. It is time, too, for each year the plague seems to get worse, and the extraordinary summer has suited the Mosquito admirably.

* * *

Apropos of mosquitoes, I remember well when I first began to realise that the insect really could make life a burden to you. It was in the winter, but at Suez my friend and I found a few hardy specimens in our room. They did not trouble me greatly—and, in fact, they never have taken very kindly to me, so far—but with my friend it was otherwise. He was a nice pink-and-white young Scot, and the insects evidently found him very much to their liking; for in the night I was aroused from sound sleep by the sound of vigorous slapping accompanied by a steady murmur, of what I discovered as I woke up fully to be extremely violent expressions, poured forth with a strong Scottish accent. Moreover, I very soon realized that there was an undeniable smell of sulphur in the room. Could it be D—'s language? No; when I roused myself sufficiently to sit up and investigate matters, I saw my poor travelling companion sitting up in bed, holding his candlestick between his knees, slapping himself and his bed vigorously at frequent intervals, and occasionally burning villainous-smelling sulphur matches. In response to my surprised query he informed me—very tartly and profanely—that his mosquito-netting had several holes in it, that he had been reading in bed after I fell asleep, and that 'these deevilish mosquitoes' had found him out, and wouldn't let him get a wink of sleep. I am afraid my unsympathetic reception of his complaints did not soothe him; for he used language which as a full-blown minister (as he now is) he must surely blush for—if ever he remembers it.

# PRESS ON THE NEAR EAST

## "The Indian Situation."

Under the above heading, the *Yorkshire Post* publishes (Sept. 6), a leading article inspired by Lord Reading's address to the Council of State and Legislative Assembly at Simla on September 3. It refers to the difficulties, internal and external, of the situation, and mentions Lord Reading's remark to the effect that the Moplah rising had assumed the character of a rebellion. When the Viceroy 'seems to draw a distinction between the agitators who have directly played on the fanaticism of the Moplahs and the leaders of the Non-co-operation movement with whom he has been in negotiation,' the writer appears to be unable to follow him for he shares the opinion of Lord Willingdon, and of other observers that 'the disturbances in Malabar are an inevitable outcome of the propaganda associated with M. Gandhi.' The article continues :—

Having recognised the presence of a revolutionary movement, the Indian Government, it is to be hoped, will see the wisdom of taking adequate measures not merely to put down its violent expressions, but to suppress its activities at an earlier stage. To do that effectively, it is desirable that there should be no drawing of fine distinctions between those who, while preserving an appearance of moderation, awaken dangerous passions, and the active extremists who are the logical outcome of their teachings. At least, care should be taken to avoid giving the impression that the authorities are temporising with revolutionary elements.

While these troubles are largely due to the weakening of authority that followed the Government's failure to support General Dyer's drastic restoration of order at Amritsar, their difficulties have also been increased by the policy of the Home Government in the Near East. The British attitude to Turkey has provided a means which the Indian extremists have used for inflaming Moslem opinion, and it is in this connection we must read the Viceroy's expression of a fervent hope that the treaty between Turkey and Greece will soon be concluded on terms satisfactory to Turkey and Moslem opinion. The effect of this policy has been felt not only in India, but on its borders, and it has played no small part in accentuating our embarrassments on the frontiers. It must certainly have been of assistance in preparing the field for Bolshevik propaganda in Afghanistan, to which the failure of the peace negotiations between the Ameer and the Indian Government is generally attributed. The Viceroy is hopeful of the opposition being overcome before long, but the task before our diplomacy is obviously not light.

Turning to the North, the article regrets that, owing to the successful work of Bolshevist agents, 'Afghanistan has ceased to be the barrier that she formerly constituted between India and the possibilities of invasion from the North. The buffer has disappeared : it must be restored The articles concludes :—

For many years our great Indian Viceroys and administrators have recognised the importance and value of this buffer policy, and by annual subsidies, combined with trade advantages, and advice and guidance in regard to Afghanistan's foreign relations, have bound this rugged country to us with chains far easier and more economical than those of military domination or occupation. But of late years there has been a tendency to depart from this eminently sane policy which has been followed by all the great Viceroys of the immediate past, from Lord Lawrence onwards, and, as a consequence, our relations with the Afghans have not been altogether satisfactory. The task before us now is to restore this former state of affairs, complicated as the position is by the new factors born of the war.

## The L.O.N. and Armenia.

The *Daily Telegraph's* special correspondent at Geneva contributed an interesting article upon the League of Nations to the issue of September 5. He does not appear to expect the League to accomplish any great thing, and among other reasons which have forced him to this state of mind the Armenian Question has evidently played its part. He writes :—

What has been done, or rather not done, with regard to Armenia affords a typical instance of the powerlessness of the League of Nations under existing conditions. Nothing moved the delegates at the first Assembly so much as the impassioned appeals of Lord Robert Cecil for the saving of the remnant of the Armenian race from destruction by the Turks, and a resolution directing the Council to undertake this task was passed with complete unanimity. The Council in its report, which will be presented to the Assembly next week, simply declares its powerlessness in the matter, and states "no action was possible." The reason given for this is that the Armenian Government which was in existence when the Assembly resolution was passed had disappeared, and was replaced by one in close relationship with the Soviet Government of Russia. The plain fact is that the League of Nations was unable to offer any help to Armenia, and as a measure of self-protection its Government allied itself with the Soviet Government of Russia. At the present moment practically the whole of this ill-fated nation is in the hands of the Nationalist Turks or the Soviets.

In the same way the commission of inquiry which the Assembly resolved should be appointed to examine into the position of women and children in Armenia, Asia Minor, Turkey, and the Adjacent territories, who were alleged to be deported in large numbers, was never appointed. Instead, the Council asked "three persons already on the spot" to collect any information they might be able to obtain. There the matter ended so far as is known.

Looked at in this way—and it seems to be a very fair, statement of the case—the prospect for the Armenians if they depend upon the League's help, does not appear any too bright.

## In Defence of Basrah.

A little while ago Mr. G. R. Sims wrote in the *Referee* some notes on the subject of Basrah and Baghdad, basing his remarks on the report of a kinsman of his, 'a young officer home on leave from Baghdad.' His remarks have failed to meet with approval from the *Times of Mesopotamia*, which, very naturally, particularly resents the statement that Basrah 'is a dirty, unhealthy city,' even though it be qualified by the addition of : 'with a wonder-wealth of roses blooming around it.' Nor does G.R.S.'s opinion that 'everybody seems to be getting something out of Mesopotamia except the British' find an echo in the columns of our Basrah contemporary. We read in its issue of August 7 :—

All we can say is that "Dagonet" is misinformed, and his young kinsman appears to be an adept at leg-pulling. It is true that Basrah is not a particularly bracing place at this time of the year; on the other hand, for eight months out of the twelve its climate is excellent—as good as that enjoyed by any place in the East. Moreover, judged by Eastern standards Basrah is certainly not a dirty town. It is the cleanest town in 'Iraq, and from a sanitary point of view sets Baghdad an example which the Capital would do well to emulate. Those of us who have visited Mosul and Kirkuk, and who have seen some of the smaller towns, such as Hit, Kifri and Khaniqin, realise how far Basrah has progressed from the general standards of sanitation prevailing in 'Iraq. One is assailed by fewer street smells in Basrah than in the vast majority of Eastern cities. If "Dagonet" should ever happen to pay us a visit we might convince him of our progressive spirit by arranging a trip for him in one of our new municipal motor dust carts! Having completed his early morning round in one of those super-modern innovations, he might proceed (as an antidote) to search for one of the flowery bowers referred to by his lucky kinsman. Our "blooming" wonder-wealth of roses, indeed! . . . . As regards the possibility of "getting something out of Mesopotamia," we don't mind telling Mr. Sims, in confidence, that (to the best of our belief, and notwithstanding the bad state of trade) two or three of the British firms here are still able to turn an honest anna.

We share the belief that 'Dagonet's' informant was indulging in leg-pulling. But with such a doughty champion as the *Times of Mesopotamia* to protect their good name there is evidently no need for us to break a lance on behalf of the cities of Irak.

## ARTICLES TO NOTE.

"Mesopotamia's Claim on Britain," by Captain H. B. Usher; and "Changing Pastures in India," by Lord Meston, in the *Contemporary Review* (*Sept.*)

"Lord Cromer To-day," by D. G. Hogarth, C.M.G., and "The Anatolian War," by H. Charles Woods, in the *Fortnightly Review* (*Sept.*)

"A False Prophet in the Sudan," by Lieut.-Colonel C. E. Vickery, in *Blackwood's Magazine* (*Sept.*)

"A Wazir-Mahsud Blood Feud," by L. M. Crump, in the *Cornhill Magazine* (*Sept.*)

SCHOOL OF ORIENTAL STUDIES.
London Institution Finsbury Circus, E.C. 2

**ORIENTAL LANGUAGES AND RELIGIONS.**

Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.

For particulars, apply to Sir E. DENISON ROSS, Director.

# NEAR EAST BOOKSHELF.

## KOSTES PALAMAS.

**"A HUNDRED VOICES AND OTHER POEMS." By Kostes Palamas. Translated by Aristides E. Phoutrides** (*Harvard University.*)

About a year ago we had the pleasure of reviewing the first volumes of the works of Kostes Palamas which Mr. Phoutrides is translating from the Greek for English readers—" Life Immovable." It was a notable book, the literary importance of which however, there was difficulty in exactly discovering, so much on the context of the verse and so little on its form had one to rely.

But there is another estimate than the literary to which the works of Palamas, and especially "A Hundred Voices" prompt us, and that is to consider him as an interpreter of the new soul of Greece. For much as Whitman showed to the world the new America, Palamas uncovers to us the finer longings and passionate desires of the new Greeoe.

First Palamas is a patriot, then he is a philosopher, and in the fusion of these two virtues he becomes a poet. He has in full the violent likes and dislikes of his race; he has, what is rare in a Balkan, a most Catholic capacity for seeking good outside his own country; and he has, hardened and indomitable, the optimistic vision of the poet. Of his love for his country a consumingly beautiful love, as much spiritual as physical, there is no doubt, though it sometimes comes a little haltingly in the translation. Here, for example, are two verses from his " Olympic Hymn "(which, incidentally, has been set to music by Samaras ), out of the " Hymns and Songs of Wrath " :—

Ancient and immortal spirit, father pure,
Of all things beautiful and great and true,
Come and reveal yourself among us
Amidst the splendour of your land and sky.

Meadows and seas and mountains shine with you
Like a great temple sapphire blue and white,
Luring the nations pilgrims to your shrine,
Ancient and immortal spirit, from all earth.

He is confident of his country's high calling, as certain of its potentialities as of the worth of its achievements, and though a sceptic in some things, he does not sigh for the past that is dead, but seeks rather to link up with the glory that was Greece, a Greece that shall once more be glorious. So, in this quest for the self-assertion of his nation's soul, he takes fire from similar efforts by other people. The struggle of the Boers, for instance, moved him to write :—

Freedom, the brave one sung of Solomos,
Has gone on wings of winds and seabirds,
For to a race unknown and humble;
And see, a Sparta and a Suli blossomed there.
Then with the sunset of the age,
Hail, dawn of virgin and unknown lands!
O treasure haunted fields untouched by fame,
The greater treasure has now come to you.
Welcome the hour! For here is valour,
And here is sacrifice,
And here is glory.
Sufficient is a single heart
For giving birth to history,
A virgin fair and clothed in perfect armour.

But for those of his countrymen who seek narrowly to conserve the heritage of Greece he has nothing but words of scorn, directing his ire chiefly on the monks and the priests; the first are " haters of the sun and all that finds delight in sunlight ;" the second but " precious blossoms of decay." There is indeed overmuch of the local and ephemeral element of affairs in the verse of Palamas; the seen and the imagined are in fact hopelessly confused; but we can forgive anything to the man who, particularising from his own petty wrath, can open up a general avenue thus ;—

Two ogresses work havoc on the State:
The black monk's fury and the teacher's rage.
The State has closed its gates and cast me out;
And on the lonely trail of loveliness
I wander on; and as I go, I pick
The shining fragments of the star-eyed thought
Whom they have slain. I plant them on my path;
And see, a kingdom rises here, and there
A paradise; and farther, palaces,
Temples and mighty castles dragon-guarded;
And all rejoice in one unending day.

It will be at once observed that his almost Shelleyan eloquence has moved the translator to unwonted beauty of expression.

Much might be written of all the poems in this volume; of " A Hundred Voices," wherein is traced the philosophy of Palamas that thought and light will ultimately triumph; of " The Hymns and Songs of Wrath," in one of which,—" The Song of the Cross,"—he memorably describes the junction of the world's two finest products. the Hellenic and Christian civilisations ( " The Cloud of Calvary was mingled with the white gleam of Homer's ever-blessed Olympus," ) and of the " Great Visions," with its high statement of his attitude at once Christian, pagan and pan-human.

We have small doubt of the destiny of Greece; ultimately we see it once more the centre and director of a civilisation; and if it have many other sons like Palamas, the fulfilment of its role is near. He is a most convincing and significant figure, and this last volume shows unmistakably how heavy a debt the English-speaking world is under to Mr. Phoutrides for discovering to it the compelling and pregnant genius of this Greek poet.

### BOOK RECEIVED.

" The Governor's Romance." By Mina Holt. (London: John Long. 8s. 6d. net.)

" Some Personalities," (Murray) by 20-1631—a pseudonym that conceals the name of Mr. Allen Upward—is a work of lively recollections that should amuse many holiday-makers. When in Nigeria, as Resident of the Provinces of Lokoja and Kabba, he wrote an order as follows: " To Lady Superintendant, Freed Slaves Home —Please let bearer have one wife." Miss Marie Corelli he describes as " a charming, unaffected, bright-haired little fairy, with whom I should have thought it impossible for anyone to quarrel." She described herself to the author as " a little dog watching over Shakespeare's grave.

## PERSONAL AND GENERAL.

**To-Day.**

September 15 (New Style).
September 2 (Old Style).
Moharram 13, 1340 A.H., of the Moslem Calendar.
Elul 12, 5681, of the Jewish Calendar.

Lord and Lady Islington will return to London early next month from Lennoxlove.

Prince Nicolas of Roumania, with Captain Hansell, arrived in Bucharest from Paris last week.

Prince William of Sweden arrived in Cairo on September 11, and expected to stay there a week.

At Mhow, India, on August 12, a son was born to Major E. Howell (Indian Army) and Mrs. Howell.

Mr. A. D. Alban, H.M. Consul-General at Alexandria, is spending a month's leave in Cyprus, with Mrs. Alban.

Mgr. Brice Meuleman, the Catholic Archbishop of Calcutta, is at present visiting the principal towns of Belgium.

On September 4, at Brighton, a son was born to Mr. E. F. L. Taylor, (Ministry of Public Works, Cairo), and Mrs. Taylor.

Lord Plumer returned to Malta on September 10, and has resumed the office of Governor under the new constitution.

The marriage between Mrs. Gladys Robinson Duff and Mr. Robert Vansittart took place very quietly in London on September 7.

Sir Claud Jacob, Chief of the General Staff of the Indian Army, is coming to England. Sir John Shea will act as Chief of Staff during his absence.

M. Frederic Nano, Secretary at the Roumanian Legation, and Madame Nano left town on September 12 for three weeks' leave in the New Forest, Hants.

On September 5, at Camberley, the death occurred, suddenly, of Colonel J. B. Hutchinson, C.S.I., formerly of the Indian Army.

M. Pashitch, Prime Minister of Yugoslavia, has arrived at Versailles, where he has had a long audience of King Alexander.

The Maharaj Rana of Jhalawar left London on September 6, for Edinburgh, where he will attend the meetings of the British Association.

M. Nicolas Em-Lahovary, who was recently appointed First Secretary at the Roumanian Legation, arrived in London on Saturday from Washington.

Lord Newton arrived in Budapest last week on a visit to Admiral Sir Ernest Troubridge, the President of the International Commission of the Danube.

Mr. Arthur Chalk, Financial Member of the British Delegation of the Reparations Commission in Bulgaria, has returned to Sofia after a brief holiday in England.

Mrs. Mulock, the wife of Mr. E. Homan Mulock, his Majesty's Commercial Agent for Egypt, First Secretary to Viscount Allenby, is making a satisfactory recovery after a severe operation.

Mirza Abdul Ali Khan, late Persian Minister to the United States, who has been transferred to Spain, arrived in London last week, on his way to take up the duties of his new position.

A marriage has been arranged, and will take place shortly, between Major Hew Congreve Kennedy, late of Ceylon, and Miss Joyce Erehe Menzies, daughter of the Rev. and Mrs. A. S. M. Menzies, of Burley.

Mr. C. F. Andrews, well known for his interest in the welfare of Indian emigrants, has decided to start from Bombay for Kenya Colony and Uganda on September 21 at the invitation of the East and Central Africa National Congress.

The engagement is announced between Mr. C. Stokes O'Callaghan, of 3, Fitzwilliam-square, Dublin, and Margery, widow of Major R. H. Manners, I.A., and daughter of Mr. and Mrs. G. Thornton, Fairlawn, Eltham, Kent.

Lord Oranmore and Browne and the Hon. Dominick Browne will return to London early next month from South Africa. Lady Oranmore and Browne, who has been spending the summer at Sunningdale, will return to London at the same time.

Reuter's Madras correspondent reports that Lieutenant-Colonel E. A. Roberts, Indian Medical Service, was drowned on September 7, while bathing. Colonel Roberts was the brother of Mr. C. H. Roberts, Under-Secretary for India, 1914-15.

King Alexander of Serbia had sufficiently recovered from his recent serious illness to leave Paris for Versailles, last week, to complete his convalescence, after which he will leave for Belgrade, where his coronation will take place at an early date.

The engagement is announced between Mr. Godfrey H. Prickard, Indian Police, Campbellpur, son of the late Rev. W. E. Prickard, of Dderw, Rhayader, South Wales, and Miss Phyllis R. Whishaw, daughter of Mr. and Mrs. James Whishaw, of Westerham, Kent.

The engagement is announced between Captain F. E. Morley Clarke, 2nd Battalion 19th Punjabis, youngest son of the Rev. A. C. R. Clarke and Mrs. Clarke, of Sharpness, and Vera Dagmar, only daughter of Mr. and Mrs. Albert Bates, of Congleton.

A marriage will take place in October, in Constantinople, between Captain Ernest S. W. Peatt, O.B.E., F.R.C.V.S., Royal Army Veterinary Corps, son of Mr. and Mrs. Peatt, of Leominster, Herefordshire, and Alice Gertrude, daughter of Stephen Nowill, of Constantinople.

Mrs. Margaret Dunlop Gibson, D.D., LL.D., Litt.D., of Castlebrae, Cambridge, a distinguished Oriental Student and traveller in Egypt, Palestine, and Sinai, who died on January 11, 1920, widow of the Rev. James Young Gibson. left personal estate valued at £48,290.

Rear-Admiral Sir Richard Massie Blomfield, of 32, Elm Park Gardens, Chelsea, a Crimean veteran, who also saw service in the Egyptian War, 1882, and was for some years Director-General of Egyptian Ports and Lighthouses, left estate of the gross value of £7,648.

On September 7, in Worcester Cathedral, Captain C. C. Crick, O.B.E., 109th Infantry, I.A., second son of the Rev. F. W. Crick, of Litton Cheney, Dorsetshire, was married to Miss Edith Eva Montague Beach Hicks, only daughter of Mr. R. M. Beach Hicks, of St. John's, Worcester.

It is reported that Mrs. Doughty Wylie, wife of the late Colonel Doughty Wylie, V.C., is selling her Theberton Hall estate, in Suffolk, in September, in order to finance the erection of a memorial at Sedd el-Bahr to her husband and the other men who died at Gallipoli. A site has already been obtained from the Turkish Government.

Digitized by Google

The engagement is announced between Captain Arthur Harris, M.C., 7th Lancers, Indian Cavalry, A.D.C. to the Viceroy, son of Surgeon-General G.F.A. Harris and Mrs. Harris, of 6, Corfton-road, Ealing, and Doris M., only daughter of Mr. and Mrs. Theodore Robson, of 32, Cavendish-square, London, W.1. and New York.

The marriage arranged between Captain P. G. Bateman, London Irish Rifles and R.A.F., and Mlle. Marie Louise Blanc, eldest daughter of Mme. Irène Procopiu, Lady-in-Waiting to her Majesty the Queen of Roumania, will take place at Sinaia, Roumania, the summer residence of the Royal Family, on September 25.

A marriage is arranged, and will take place shortly, between Captain H. P. James (late Suffolk Regiment), Political Department, Nigeria, youngest son of the late A. H. James, Commissioner of Police, Calcutta, and Mrs. James, Southwold, and Cecil Aileen Oakes, younger daughter of the late E. H. A. Oakes, and Mrs. Oakes, of Grayswood House, Haslemere.

A marriage has been arranged, and will shortly take place in India, between Lieutenant-Colonel Whitworth Crosse, D.S.O., Royal Army Service Corps, eldest son of the late Lieutenant-Colonel C. R. Crosse, C.M.G., M.V.O., Secretary N.R.A., and Miss Ænid Isobel Lewis youngest daughter of the late David Lewis, of Cilwen, Cambridge, Tasmania.

The engagement is announced, and the marriage will shortly take place, between Brevet-Lieutenant-Colonel Leslie Gwatkin Williams, C.M.G., D.S.O., 5th Cavalry Indian Army, son of the late E. Gwatkin Williams and of Mrs. Gwatkin Williams, of 3, Lansdown Parade, Cheltenham, and Helen Mary (*nee* Landale), widow of Dr. W. B. Grandage, of 74, Gloucester Road, London, S.W.

The christening of the infant son of Mr. Humphrey Bowman, C.B.E., Director of Education, Palestine Government, and of Mrs. Bowman, took place at St. John's Church, Paddington, on September 5. The Rev. Sir Paget Bowman, Bart., Rector of Sheve, officiated, and the following stood as sponsors: Mrs. Hubert Brinton, Miss Gertrude Bell, C.B.E., Sir Arnold Wilson, K.C.I.E., C.S.I., C.M.G., D.S.O., Mr. C. H. Walker, and Captain F. Drummond, M.C. The child received the names of Paul Humphrey Armytage. A small reception was held later at No. 17 Cambridge Square, the residence of Colonel and Mrs. Armytage.

## APPOINTMENTS, PROMOTIONS, &c.

Mr. C. A. Innes, Secretary to the Government of India (Commerce Department), has been temporarily appointed a member of the Executive Council in succession to Sir Thomas Holland.

The *Egyptian Gazette* understands that Judge Thorp is proceeding to Constantinople in October, and that he will probably be succeeded by Mr. Maxwell, of the Ministry of Justice.

A Rome message states that Sir Ronald Graham, K.C.M.G., has been appointed British Ambassador in that city. Sir Ronald's close acquaintance with the Near East should be of great value in his new position; for Italy has of late shown a strong determination to play a more active part in those regions. He has served in Persia and Egypt, and knows Persian and Arabic well, and he did good work on the Muskat Arbitration Tribunal at the Hague. He also spent some months on special service in Crete in 1906.

The Secretary of State in Council has appointed Lieutenant Colonel Arthur D'Arcy Gordon Bannerman, C.I.E., C.V.O., to be his Political Aide-de-Camp, in place of the late Lieutenant Colonel Sir J. R. Dunlop Smith. Lieutenant Colonel Bannerman was until recently, the British Resident in Kashmir, and has had a varied career in the Indian Foreign Department. He entered the Army in 1885 and was appointed to the Indian Army three years later, attaining his present rank in 1911. His work in the Indian Political Department began in 1893 in Central India, and before going to Kashmir he served in various capacities in Rajputana.

## OBITUARY.

It is with profound regret that we have to announce the death of Mrs. C. W. Dawson, wife of Mr. C. W. Dawson, Chairman of Allen Bros., and Co., Limited, of Calcutta, London, and Manchester. Mrs. Dawson died at Burnt Ash Hill, Lee, on September 8. The funeral took place at Hither Green Cemetery on September 12.

On September 5, at Camberley, the death occurred, suddenly, of Colonel J. B. Hutchinson, C.S.I., formerly of the Indian Army. Colonel Hutchinson, who was 77 years old, was the son of the late Lieutenant-Colonel George Hutchinson, Bengal Engineers. He served with the Gurkha Rifles for three years. From 1894 to 1899 he was Commissioner and Superintendent at Lahore and from 1900 to 1905 Governor of Aitchison College, Lahore. He also served as a member of the Council of the Lieutenant-Governor of the Punjab.

Colonel Sir Peter Johnston Freyer, K.C.B., late Indian Medical Service, died on September 9, at 27, Harley-street, W. He was the eldest son of Samuel Freyer, of Selerna, Galway, and was born in 1852. At the age of 23 he gained the first place in the open competition for the Indian Medical Service. After a period of military employment, his services were lent to the Government of the North-West Provinces, under which he held in succession the appointment of civil surgeon at Moradabad, Bareilly, Allahabad, Mussoorie, and Benares. He was surgeon to the Prince of Wales's Hospital at Benares, and was for some time medical officer to the Lieutenant-Governor of the North-West Provinces and Oudh, and afterwards to the late Nawab of Rampur. In 1894 he attended the International Medical and Surgical Congress at Rome as the delegate of the Indian Government. He was awarded the Arnott memorial medal for original surgical work in 1904. Since his retirement Sir Peter had practised as a consulting surgeon in London.

## CONFLICT IN INDIA.

The news which has reached this country lately from India has been sensational, and consequently it has been misleading, for its tendency has been to concentrate the attention of the public on particular symptoms, and thereby to obscure the real issues in a conflict which is still some way from a conclusion. India is just now the scene of one of those fundamental differences of ideals, which, when they occur between nations, usually lead to open war, and, when they occur within a nation, may bring it within measurable distance of anarchy, until the time comes when the national will can be clearly ascertained. On the one side we have the aspiration to make a new and better India by assimilating whatever is best in Western knowledge and ideas: on the other we have the determination to reject all influences outside, and stand on the ancient traditions of the country, as they appear when viewed through the mists of passion and prejudice. India has not yet decided between these two ideals. The first, which is the declared policy of Parliament, is accepted in all sincerity by a large mass of educated opinion; the second is urged by some of the most active personalities in the countries; and between them stand the people as a whole, uneasy, puzzled, beginning to look for a change, but as yet uncertain what they want, and ready to follow any leaders who may win their confidence. Such is the present position, and, when once it is grasped, the occurrences of the last year fall naturally into place.

The first move in the campaign was the general election of last winter, when the attempt was made to lay the foundations of an essentially Western constitution in a country which possesses no constitutional tradition beyond despotism and bureaucracy. The Extremists made strenuous efforts to render the elections nugatory, but they failed, and parliamentary institutions have made a successful start, too successful, perhaps, for the bulk of the legislators have been content with sessional activities, and have so far neglected the education of their constituencies. While legislators were busy with resolutions and interpellations, the Extremists made a second, and more dangerous move, consisting of an organised attempt to exploit the passions and the grievances of some sections of the people. Judged by results, they chose their ground well; the industrial workers, whose wages had lagged behind prices, the Oudh peasantry, whose grievances had long been notorious, the Moplah fanatics of Malabar, were successively moved to turbulent outbreaks; and, while lawlessness has brought only suffering and punishment to those who engaged in it, the indirect effect has apparently been to increase the extremists' following in the country. The action of the administration in the face of this attack has been widely criticised. It is true that many minor agitators have been convicted, that order has been restored, and that from time to time announcements of more drastic measures have been made; but the anxiety to avoid any action which might be regarded as provocative, or might turn criminals into martyrs, has resulted in an appearance of hesitancy and reluctance to use adequate force at the outset, which has undoubtedly deterred many of the weaker politicians from taking a determined line. A similar effect was produced by the meetings between the new Viceroy and the Extremist leader; the Indian tradition is to avoid political commitments, the opening of negotiations immediately suggests that active partisans may be left in the lurch, and even a vague suspicion that the Government may be meditating a change of front can be counted on to keep many potential supporters on the fence. To say this, however, is not necessarily to condemn the line taken by the administration. A gambit is a good opening if it wins the game, and the position has not yet developed to a point where a final judgment is possible.

Whatever the cause may be, the most conspicuous feature of the present situation is the failure of moderate politicians to make an active bid for popular leadership. They are, as we have said, sincere in their aspirations, but they have manifested little of the energy required to turn those aspirations into facts, and over the greater part of the country the extremists appear to have had matters very much their own way. The most striking exception to this statement is to be found in the United Provinces, where the Government, realising at an early stage that leadership is the essence of the whole thing, set on foot an organisation of Peace Leagues to mobilise popular opinion in favour of the policy which has been sanctioned by Parliament, and is consequently entitled to the active support of officers responsible in the last resort to that authority. These Leagues have undoubtedly served both as rallying-points and as centres of leadership; they are living organisations, some of which are already almost independent of direct official support; and the change which they have produced in the political atmosphere furnishes ample testimony both to the insight of their founders, and to the magnitude of the opportunities which moderate politicians have so far missed. Happily for India, there is still time to recover the ground lost. The extremists have recently developed the third move in their campaign. We need not repeat what we have written on the dangers incident to their attempted boycott of imported cloth, but it is apparently encountering more initial resistance than its promotors anticipated, and if the moderate party should decide to oppose it vigorously, or to pass to the offensive on some other issue, they might hope to win an important, and possibly a decisive victory for their cause. The action taken by Sir Harcourt Butler in the United Provinces has shown the way. All over India there is no lack of sound common sense, which, if it were only organised, would suffice to bring the present conflict to a satisfactory conclusion. Its organisation is the country's most immediate need.

## JEWISH TALES FROM JERUSALEM.

By Estelle Blyth.

*These short Tales out of Jewry were among the many collected by an old friend, who was long a missionary to the Jews in Palestine. He had not one drop of Jewish blood in him, but he loved the Jews greatly, and gave the best years of his life to them. These stories were told to him on different occasions by Jews whom he visited, and he wrote them down afterwards. Some of them he passed on to my sister; she has given me her notes, from which these Jewish Tales may be retold.*

### The Story of Titus and the Gnat.

Titus, having perpetrated within the Holy Temple at Jerusalem abominations which decency forbids us even to hint at, collected the Vessels of the Sanctuary, wrapt them in the Veil, and caused them to be placed on a ship that they might be taken to Rome as proof of his conquest of Jerusalem. But the Almighty One was angered at his presumption, and He sent a mighty tempest which threatened to send the ship to the bottom of the sea.

Tiberias: Sea Front.

Titus said: "Behold, the God of these Jews has power only over the waters. Pharaoh came, and He drowned him! Sisera came, and He drowned him! Now He seeks to drown me also. If He be indeed a mighty God, let Him forsake the waters and contend with me upon the dry land."

So spake Titus in his pride, which all the tumult of the waves and winds could not abate; but swift upon his words there came as it were the echo of a voice that said: "Thou man most wicked, son of a wicked man, descendant of Esau the accursed! I have heard thy words. Lo, in My universe that I have created there is a creature so insignificant that men regard it not. Thou shalt contend with it on land."

Gradually the storm died down, and in time the ship came safely into harbour. Titus landed; but very soon after his feet had touched the dry land a little gnat flew into the passage of his nostrils, and so entered his brain. For seven years the gnat kept stinging at his brain, and great was his torment, both by day and night. At first, the mighty hammering of a blacksmith afforded Titus some relief, and every day the Emperor's servants brought one to the palace for that end. If the smith were a Gentile, he was rewarded; but if he were a Jew it was considered that he was sufficiently rewarded by the sight of the torture of the enemy of his people. At first the loud hammering frightened the gnat, which ceased to sting the Emperor's brain; but after a while it got used to the noise, and paid no more heed to it. There remained for Titus no relief but that of death.

Now it was so that after Caesar's death, the learned Rabbi Pinchas ben-Aruva was among the Roman senators and chiefs when the skull of Titus was opened by the doctors, if haply they might learn the cause of all his suffering; and the Rabbi himself beheld in the skull a gnat as large as a sparrow. Furthermore, the Rabbi testified that Titus on his death bed commanded that his body should be burned and the ashes scattered upon seven seas, that the God of Israel might not be able to find him, and summon him before His judgment-seat.

### The Gates of the Holy Temple.

Behold, Nicanor went to Alexandria, which is a city of Egypt, that he might bring from thence the brazen gates that belonged to the eastern portion of the Temple. As he returned, the ship was overtaken by a storm, and, being already heavily weighted with the holy gates, it seemed as if it must each moment sink beneath the waves. Then Nicanor threw one of the gates into the sea, that he might save the ship and those who were in her; but still the storm did not abate. The sailors shouted to Nicanor to throw out the other gate also, but Nicanor, that pious one, flung himself upon it, and clinging to it with his hands, said vehemently: "Throw me over with it." Immediately a great calm fell, and the ship went smoothly on her way. All the sailors rejoiced, but Nicanor now bitterly regretted that he had cast away one gate of the Holy Temple.

In due time the ship sailed into the harbour at Acca, and as it lay at anchor close to the shore, the brazen

The Jew's Wailing Place.

gate of the Holy Temple suddenly appeared, floating upwards from the depths. Who can say how this came to pass? Perhaps some mighty sea-monster had swallowed it when Nicanor threw it overboard during the storm, and, having followed the little ship even into harbour, now discharged its burthen safe and sound.

In remembrance of this great miracle, all the other gates of the Holy Temple were changed for gates of gold, saving only the Gate of Nicanor, which was of brass.

### The Finding of Joseph's Bones.

When the time came for Israel to depart out of Egypt, Moses, mindful of the commandment of old, sought for the bones of Joseph, that he might carry them also out

of the land of bondage. It was so that no one knew where the patriarch's bones were buried, save only Sarah, the daughter of Asher. She was of the generation of Joseph, and yet lived, being as full of wisdom as of years. Sarah revealed unto Moses the unknown place of Joseph's burial, for his body had been laid in a coffin of metal and lowered into the waters of the Nile, that the great river of Egypt's prosperity might be blessed.

Moses heard the words of Sarah, the daughter of Asher, unto the end; after which he went forth and stood on the banks of the Nile, and cried with a loud voice: "Joseph, the time of Israel's redemption, which was sworn by the Holy One (blessed be He!) has come, and we who go forth out of Egypt are not unmindful

**Jaffa: A Street Scene.—The building in the background is the Hotel de Ville.**

of the oath which thou didst exact from the children of Israel. If now thou wilt show thyself, so be it; and if thou wilt not, then are we free from thy oath."

Even as he spoke, Joseph's coffin floated to the surface, and rested at his feet.

All through the forty years of Israel's wandering in the desert, the Ark of the Covenant and Joseph's coffin were borne along side by side; and it was so, that when strangers who were not of Israel asked why this was done. the children of Israel made answer, "The one belongs to a dead man and the other to the Shechinah, and they are kept near to each other, because he that is dead in his time fulfilled all the demands of the Law."

## NEWS IN BRIEF.

Calcutta tramwaymen went on strike last week for the third time within a year, but returned in three days.

Bengal Legislative Council has rejected by 56 votes to 37 a resolution in favour of the enfranchisement of women.

The battleship Renown, which is taking the Prince of Wales to India, is ordered to leave Portsmouth for commissioning trials on the 27th inst., and returns from Portland on October 6

It is reported from Jerusalem that the Financial Government Committee which will administer the finances of the Greek Orthodox Church of the Holy Sepulchre will consist of Major Luke, Mr. Varens, M. Gerasimou, manager of the Credit Lyonnais, Dean Dositheos, and M. Elias Moussembek.

The grant of the "India General Service Medal, 1908," in silver, with clasp "Afghanistan, N.W. Frontier, 1919," is, it is stated officially, to be extended so as to include all troops who served: (1) in the Khyber Pass, west of and excluding Jamrud, between August 9, 1919, and September 30, 1919, both dates inclusive; and (2) with the Waziristan Force, including those stationed at Darya Khan, Mianwall, Mari-Indus, and Kalabagh, between August 9, 1919, and September 30, 1919, both dates inclusive.

The Secretary of State for India has nominated Gentleman Cadet Garbachan Singh to a King's India Cadetship at the Royal Military College, Sandhurst. This is the first appointment of an Indian to a King's India Cadetship. The rule regarding nominations to King's India Cadetships prescribes that "they shall be given to the sons of persons who have served the Crown or the East India Company in India." The father of the present nominee was the late Risaldar-Major Kartar Singh, Bahadur, 12th Cavalry, who was invalided from the Service in 1917, after twenty-eight years service, and who died in the following year.

Father Berre, of the Ordre des Frères Prieurs, is to be appointed Roman Catholic Archbishop of Baghdad.

Colonel E. Mossberg, Swedish Military Attaché in London, has been invited by the Persian Government to undertake the reorganisation of the Persian police.

Eleven Jews and twelve Arabs were enlisted at Tiberias for the new Gendarmerie as a result of a visit by the Director of Public Security at the end of August.

The *Akhbar* learns that it is not expected that the ex-Khedive's mother, who is now in Constantinople, will be permitted to return to Egypt at present.

An accident occurred on August 25 at the Egyptian Army Barracks, Cairo. Work was going on in the magazine when a shell burst with disastrous results. One soldier was killed.

It is reported from Jandola, Waziristan, that the water in the river suddenly disappeared underground on August 27 for a distance of two miles. Three days later the water reappeared in the old channel.

A White Paper was issued on September 6 containing the text of the agreement between Great Britain and Denmark relating to the suppression of the Capitulations in Egypt, signed at Copenhagen on July 14 last.

Fines paid and rifles handed in by the Wana Wazirs up to August 31 more than fulfilled the preliminary terms stipulated with them. Owing to the prevalence of cholera, the raising of the blockade has, however, not been notified to the tribesmen.

Ismail Sidky Pasha, the Egyptian Minister of Finance, exl pects to spend September 19 and 20 in visiting typical industria concerns in Manchester and district and in conference with the Egypt section of the Manchester Chamber of Commerce.

The Palestine-Syria Congress, which has been sitting at Geneva has presented an appeal to the League of Nations demanding liberty and independence. The appeal states that the British troops in Palestine and the French troops in Syria are not wanted and declares that the peoples are capable of governing themselves as a united republic.

The Egyptian Gazette states that the Egyptian Education Mission now visiting this country is composed as follows:—Dr Youssef Aboul Nasr Barada Effendi, Dr. Eta Moustafa Effendi and Mahmoud Ahmed Moustafa Eff., from the School of Medicine Aly Labib Gabr Eff., Edbel Wahab Kamel Eff. and William Salim Eff. from the Sultania Engineering School; Mohamed Taher el Kholy Eff., Zeky Hassan Eff. from the Higher School of Commerce; Moustafa Husny Eff., Mohamed Ziada Eff. Mohamed Highab Eff. Miltiadi Hanna Eff., Hassan Moustafa Kamel Eff., and Zeky Rafla Girgis Eff., from the Sultania Training College.

## NOTES AND NEWS.

Devonshire Square.
E.C. 2,

### The Anglo-Danubian Association.

The Anglo-Danubian Association, whose dissolution has just been announced, was formed in the spring of 1920 for the purpose of rendering assistance in the re-construction of the Succession States who were faced with the difficulty that while they had factories and labour they lacked raw materials and coal and were unable to obtain them for lack of credit. The object of the association was to supply raw materials to these countries on trust, and the finished products were to be re-exported to markets where they could be disposed of to advantage. Two indispensable conditions were laid down for the States concerned. The association's ownership was to be safeguarded, and there was to be complete freedom of re-export.

### Its History.

The auspices under which the association was launched were such as to ensure success if that was possible. The directors included some of the most eminent leaders of British industry, while the venture enjoyed the support of some of the leading banking establishments. It was started on a small scale, the capital being £10,000 in £10 shares, only half of which was called up, but it was intended eventually to form a large undertaking. That project was postponed as a result of a mission sent out to examine the position in the countries in question last year, wisely, as it proved, in view of the "slump" which was so soon to take place, and which, had the plan been proceeded with, would inevitably have led to very serious losses. As it is, subscribers have had half the amount of their subscriptions returned to them.

### The Association's Work.

I do not think there is any need to take a pessimistic view of the dissolution of the association. When it was established it appeared probable that the re-establishment of pre-war economic relations between the different countries would be in the main a matter for private enterprise. At the time a wholly misleading trade "boom" made any other measures appear unnecessary. The association had in view certain definite objects, and to a very considerable extent it would appear that it succeeded in carrying them out, and it has to its credit the very definite result that it has introduced to the countries in question very many firms who are now carrying on a satisfactory trade on long credit terms. It has ceased functioning, I take it, because of the realisation that any further assistance of the kind involved appertains rather to Governments than to companies.

### A Greek Loan?

The financing of the war in Asia Minor has proved a most serious problem for Greece, whose financial position as a result of the Great War was in a very far from satisfactory state at its outset. Last month no fewer than three loans were contracted with a view to meet current obligations, but this method is one which obviously has its limitations, even if it has its advantages. The real way out of Greece's immediate difficulties is by means of a foreign loan, in which connection it may be noted that negotiations have again been opened in Paris and London. Greece's failure hitherto to obtain the financial accommodation she requires has been due to the feeling of uncertainty as to the outlook. A speedy conclusion to her campaign coupled with unmistakable evidence that her policy in Asia Minor will be conducted on sound lines would go far to supply the confidence without which financial support will in all probability not be forthcoming.

### Turkey's Financial Straits.

If the Anatolian campaign has taxed Greece's financial resources it is nothing to the effect that it has had on the financial position of Turkey. Conditions at Constantinople could scarcely be worse than they are at the present time, mainly as a result of the closing of Anatolia to commerce. Trade has been literally paralysed, and a state of stagnation prevails. One result is that the Treasury is faced with the most serious problem in finding funds to meet the salaries of the officials. There can be no hope of improvement until conditions are settled, and even with the Greek campaign at an end it is certain that there can be no real revival of prosperity in the country without assistance on a large scale in the shape both of money and materials.

### A Great Exhibition.

Everyone I have come across who has been to Olympia is loud in praise of the Shipping, Engineering, and Machinery Exhibition, at which I am not at all surprised, for it struck me as being a particularly well-organised affair in many respects. Most of the well-known firms are there, and nearly all of them, I am glad to note, have learnt the lesson that it is very undesirable to have too many exhibits on view. Some, indeed, have very few, which in their lordly isolation attract attention to the full. The popular side of the exhibition is, of course, very pronounced, as to the advantage of which I am doubtful. It means crowds every day, naturally, but an exhibition is a business undertaking.

**Egyptian Cotton Freights.**

It had been hoped that an amicable settlement of the cotton freights dispute might result from the negotiations that have been taking place between the Liverpool Conference Lines and the United States Shipping Board. The American attitude over the question, however, gave no very substantial grounds for optimism, and the report from Washington that there has been a definite rupture in the negotiations will therefore occasion little surprise. Apparently an *impasse* has been reached, but it is sincerely hoped that before applying the Jones Act as the Americans have threatened to do—a step which by the way would be as likely to do harm to the applier as to anyone else—further efforts will be made to arrive at an agreement. It should not be impossible, given that there is a spirit of give and take on both sides.

**A Difficult Position.**

Unfortunately there is no getting away from the fact that the position literally bristles with difficulties. The Liverpool Conference Lines have had the contract for years, have been able to meet the requirements of the shippers, and naturally enough cannot be expected to see why, when they have again obtained the contract on the recommendation of a body which is international in character and on which British members are not in the majority, a part of it should be ceded to the unsuccessful tenderer. But this is apparently what the Americans expect them to do, for as I understand the position the Shipping Board will be satisfied if allowed to undertake the shipping of cotton to America.

**Causes of the Dispute.**

I do not desire to enter at length again into the causes of the dispute, but in view of the fact that a correspondent says I did not make myself sufficiently clear when I first commented on the dispute, I will deal lightly with the crux of the position, the tenders. The first tender of the Liverpool Conference Lines was at the rates of 60s. and 40s. to the United States and the United Kingdom respectively, these rates applying to the unexpired portion of the old contract. The quotations of the Shipping Board were respectively 40s. and 25s., but as in the circumstances it was impossible to compare them as one tender was for a year and the other for a longer period the Conference Lines were asked to quote again, and this time their tender was for 40s. and 30s. On June 2 the acceptance of this offer was recommended, and on June 3 the Shipping Board put in a new offer of 35s. to the United States.

**A Misunderstanding.**

Now on these facts it is at least conceivable that the Americans are under the impression that they have been badly treated. Such a view is nevertheless erroneous. The Conference Lines had held the contract, as I have pointed out, for years. They made a tender which represented a very considerable sacrifice on their part; as the rates for the unexpired period were 90s. and 60s., and in the circumstances as their tender could not be justly compared with that of the Shipping Board they were certainly entitled to be asked to amend it. Undoubtedly it was regrettable that the amended tender of the Shipping Board making both their rates 5s. below those of their rivals did not arrive earlier, but if it had it is practically certain that it would have made no difference to the result.

**That 5s. Difference.**

Taking the rates as they were before the arrival of the second offer of the Shipping Board, there was then a difference of 5s. in the quotations to the United Kingdom but to America they were the same. Now the Shipping Board has no regular berths here, and the charges for docking and insurance for American bottoms would have amounted to the difference. There was, therefore, not much to choose, and it is surely not surprising in the circumstances that the exporters should have given the contract to the lines that have served them so well in the past. It may possibly be imagined that the subsequent tender of the Shipping Board might have obtained for them the contract to America but the division of the contract would have entailed higher costs.

**Machinery in Morocco.**

A lesson to the business man here as to the value of catering for the requirements of a country is forthcoming from Morocco, where, according to a French contemporary British internal combustion engines are proving very popular,

## TRADE ON THE DANUBE.

---

In a letter to *The Times* Mr. Thomas Gibson Bowles writes:—"Unless we can get beyond our present European policy, and can hit on something beyond the protocols of Foreign Offices, we shall certainly come, in Central and South-Eastern Europe, upon trouble, not only for our present selves, but also for the next generation. The Low Countries used to be called the cockpit of Europe. It would seem, from the news that reaches me, that Roumania, Poland, Serbia, and Hungary, always more or less ready for a fight, are become the breeding-places of the military microbe in those parts; while some of us, who look at them from Europe proper, are I fear, pursuing a false policy. Thus there are distinguished French generals who are engaged in organizing, at vast expense, a great Czech army; and have been doing the same by Roumania, Serbia, and Poland; the consequence whereof must be that those little States will have no money to pay their debts, and develop their material interests; and that at any time one of the many dog-fights, always threatening there, may break out with serious and lasting consequences.

"But the Danube invites us to other and better ways. Something more and something else may be done there. The Danube that great highway which runs right across Europe, may be developed for trade in such a way as fully to occupy the energies of the neighbouring peoples, and to make them turn away from fighting to commerce. This, indeed, is already being attempted with success. Some years ago, instead of sending generals to levy armies, we sent out an admiral to encourage and facilitate Danubian commerce by the improving of that river. The admiral was warmly supported by Lord (then Mr. Walter) Long and the material results are already very valuable. The inhabitants of the Danubian countries have taken to making money instead of fighting. Their commerce among themselves, and with other nations, flourishes and increases—not, indeed, so much as it might, but encouragingly. This is the English method; and, as I venture to think, the right one, rather than the French method of creating military power. We are specially and particularly identified with the development of Danubian trade, as well as with the international commission to ensure it. And it is right to record that it is to the able and energetic action of Admiral Troubridge that we owe this very noteworthy development of the great waterway instead of the creation of great armies, and the very noteworthy substitution of material progress for military adventure.

"But if the English method is finally to succeed, it must receive the full support of the English Government. The material development of the Danube must not be arrested for want of a buoy, while more generals are highly paid to raise armies and armaments in and for Danubian countries. Here is surely a lesson to be learnt, if we will but learn it, and to be especially commended, if I may venture to say so to our excellent Allies across the Channel."

## BRITISH CONSULAR REPORTS.

### VIII Czecho-Slovakia.

The following extracts are taken from the report of Mr. R. H. Bruce Lockhart, Commercial Secretary to H.M. Legation, Prague, on the industrial and economic situation in Czecho-Slovakia in 1920:—

It may be said without fear of contradiction that Czecho-Slovakia, as regards both natural resources and industrial development, is one of the richest territories in Europe. It has several rich coalfields, and possesses valuable mineral resources which, notably in Slovakia, have not yet been fully developed. Radium, gold, silver, iron, graphite and lead are all mined successfully, while the whole country is abnormally rich in mineral and thermal springs. Oil is found in Slovakia, and Bohemia has rich deposits of clay, kaolin and sand. The whole country is well farmed, and agricultural production is on a very high level of excellence. Thirty-three per cent. of the total area of the country is forest-land, and both in the productiveness of the forest and the quality of the timber the forest wealth of the republic is enormous.

In its industrial development Bohemia may be compared to Belgium. In Bohemia, Moravia and Silesia, which have a total population of ten millions, more than four million people are engaged in industry. The various industries are well organised and as regards both machinery and modern improvements the factories are as well equipped as any in Europe. Outside of Slovakia illiteracy is almost unknown, and both the German and the Czech elements which compose the working-class population are hard-working and in many cases highly skilled. The new republic possesses, therefore, many valuable economic advantages, and after the the first two and a half years of its existence it is no exaggeration to state that Czecho-Slovakia is in a far more flourishing state than most of its neighbours. It would be unwise, however, to close one's eyes to the serious difficulties which the republic has still to overcome before its economic life can become stabilised. These difficulties are, to a large extent, due to the world crisis. There are, however, other difficulties which are purely local in character.

**Trade with United Kingdom.**

The trade statistics of Czecho-Slovakia for 1919 and 1920 do not furnish any very satisfa tory materials for the British exporter. British goods suffere considerably from the high exchange, and still more from the system of State control. It must be recognised that Czecho-Slovakia herself manufactures many, if not most of, those articles which form the staple export commodities of Great Britain, and in many cases, where Czech firms would have been willing to buy British goods in preference to the local products, import licences were not obtainable. In this respect Great Britain suffered almost more from the control than any other country, for even in certain cases, where import licences for various commodities were granted to firms of countries with low currencies, they were refused to British firms supplying the same articles on account of the high costs and adverse rate of exchange. There will always be, however, a certain demand for what may be called British luxury goods, *i.e.*, goods which will be bought by a certain class on account of their distinctive qualities, but such goods are banned under the present system as luxury goods with which the State can dispense.

On the other hand, there is, and will be, a steady demand for raw and semi-raw materials. Up to the present, very few British firms have made any attempt to establish direct connections with Czecho-Slovakia. Those firms, who were represented in this country before the war, had their headquarters in Vienna, and even to-day seem to prefer to use that city as their centre for Czecho-Slovakia. Other firms, who have visited the country have not found the volume of business large enough to tempt them to embark on new ventures in a country where the Englishman is bewildered by the complicated system of State control and Government regulations. There has been, too, more than one instance of British firms preferring to do business with Czecho-Slovakia through Germany rather than direct with Czech firms. This is not likely to lead to good results. Under the conditions which prevail at present in Czecho-Slovakia, only those firms who take the trouble to send out their own representatives are likely to achieve satisfactory results. For the present, it is true, the openings for British goods are comparatively few. When trade improves and the control is removed, the possibilities for business should be greater. Much will depend, however, on how far our prices can compete with the local and German competition.

**Openings for British Capital.**

With regard to improved trade relations with Great Britain expert opinion tends invariably to emphasize the need for an influx of British capital and to express regret that, in this matter Great Britain has not followed the example of France, Holland, Italy, America and Belgium. As far as the Czechs are concerned, this desire for English capital is influenced to a large extent by, the wish to preserve their country from too close a subjection to German influence; but the demand is by no means confined to purely Czech circles. On the whole there is a good deal to be said for British investments of capital in this country. Provided that the political situation in Central Europe remains stable, Czecho-Slovakia should develop rapidly. Many new schemes of improvements for water works, electrification, shipping, port construction, railways, forest development, &c., are being put forward almost daily, and fail for want of capital.

**Advice to British Traders.**

The British trader visiting Czecho-Slovakia for the first time must remember that in a country where several different races are strongly represented and where he may have to do business with both Czechs and German Bohemians, he should keep his political opinions to himself or run the risk of offending one or other of his customers. He will find that Prague, although the capital and Government centre, is by no means the only trade centre and that a visit to that city does not exhaust the commercial possibilities of Czecho-Slovakia. Karlsbad (Karlovy Vary), the centre of the porcelain industry, Reichenberg (Liberec), the centre of the cotton industry, Aussig (Ustí) (chemicals) and Bruenn (Brno) (woollens), are all important headquarters.

Business correspondence, if with German Bohemian firms, can be conducted in German. Circumspection should be used in dealing with purely Czech firms and care taken to avoid offending national susceptibilities. When visiting the country, it is well to remember that the Czechs are a little suspicious of the foreigner, and proud of the importance of their first appearance as an independent nation. They are also very democratic in spirit and sensitive to a degree in everything that concerns their nationality and pride of race. But to the Englishman who goes half-way to meet him, the Czech is not only friendly but exceedingly hospitable. Great care should be taken in the selection of agents. As commerce is hedged in on every side by irksome Government regulations, the services of a local agent are essential. There are practically no Englishmen resident in the country who would be suitable for this purpose. There, are, however, a limited number of English-speaking Czechs and German Bohemians whose services can be obtained. Once a good agent is appointed, he should be visited at frequent intervals. There are also several large export and import houses who have considerable influence in government circles. While the state control lasts, English firms of a similar nature might find it advantageous to get into touch with such houses and arrange for an exchange of goods. This is at present the easiest way of obtaining import licences.

## THE SHIPPING, ENGINEERING, AND MACHINERY EXHIBITION.

### Some Impressions.

(*From our own Correspondent.*)

Olympia, unlike some of the centres at which trade exhibitions are held, has the supreme merit of accessibility, and it is not surprising that there should have been record attendances during the first few days at the Shipping, Engineering, and Machinery Exhibition. I was fortunate in that my first visit was paid on the opening day when it was possible to view the exhibits in comparative comfort while the various staffs were putting the last touches to the stands. That is not to say that Olympia was deserted; far from that being the case when the time came for luncheon it was impossible to get a seat in two restaurants in the building so I turned to a third to find an extensive queue lined up, after which I gave up the attempt in despair. There seems to be no happy mean in these matters.

There is no question in my opinion that the present exhibition constitutes a great advance on that of last year. It is not an entirely representative affair as yet, but sufficiently so for all intents and purposes, and it gives an excellent idea of the potentialities of one of the greatest British industries. In some respects, indeed, it affords a positive revelation of the capacity of British manufacturers. We are still passing through the most profound economic depression ever experienced, and it is difficult in the circumstances to regard trade prospects with other than a jaundiced eye, but the exhibition, were it to serve no other purpose, is certainly an inspirer of hope, since it shows beyond a peradventure that so far as quality is concerned the products of the British workshops are still better than any that other countries can put in competition with ours. Given that the exchanges improve and that the tendency of labour to adopt a saner outlook continues then it is evident that we can look forward to a future full of promise for trade endeavour.

The principal value of the exhibition obviously depends on the extent to which its attracts the foreign buyer, and judging by the company in the first few days I am afraid that he will be a negligible quantity. I should like to see throngs of visitors from the Near and Middle East and other great markets for British products. It would be of enormous value to this country in the future if they could see the fruits of British inventiveness, the wonderful machinery and the delicate appliances that go to make up the exhibition. There is nothing like a personal inspection to convince, and if this and other exhibitions are mainly destined to interest British people then I can only regard them as next door to useless.

The real trouble is to be attributed to the inherent lack of imagination that characterises the British business community. The Near and Middle East are among the most promising marts for our products, but there has never hitherto been any real attempt to exploit them properly. If our firms did these things in a business-like way they would see that everything possible was done to attract buyers to our exhibitions, and they would spare no pains to bring their products before these markets by the most useful means at their disposal, namely advertising. Few firms do so, the reason being either that they have an inadequate knowledge of the outlets in question, or that they are put off by the problem of payment—which is admittedly a serious difficulty. But it must be remembered that there is the export credits scheme to fall back upon, a thing which British firms are apt to forget apparently, and further that while there is apathy over here and unemployment on an immense scale orders are continually being placed in Germany and elsewhere by the Balkan countries.

### Review of Exhibits.

(*By our Engineering Representative.*)

A preliminary visit to the Shipping, Engineering, and Machinery Exhibition has shown me that no engineer who wishes to keep abreast of modern developments can afford to remain an absentee. Naturally a considerable amount of space is devoted to ship machinery and propulsion plant, but shipyard and workshop equipment is also shown in plentiful variety, and there are a large number of new applications of electric and hydraulic power on view. I noticed that certain of the better known firms in the marine oil engine business are not represented, a policy I consider to be mistaken. Of course everyone knows that they are so extremely busy just now that they can hardly spare time for exhibitions, but I have always found that the general public have a tendency to forget the firm that neglects to keep its name before their notice, and I suppose engineers do much the same. However, in spite of a few abstentions I consider the exhibition to be representative, and one that no one, as I have said, can afford to miss.

Naturally one does not expect to see huge Diesel, and semi-Diesel engines on exhibition, the demand for delivery on the part of buyers is such that nothing of the kind could be spared for exhibition purposes. There are, however, a number of big parts shown, and the size of these components enabled one to form some true ideas of the magnitude of the whole.

I was particularly struck with the stand of Vickers-Petters, who have on exhibit a range of semi-Diesel machinery of both marine and stationery types. The largest engine they are showing is not a big production, as such plant goes, but it is a magnificent example of the modern engine builders' art, and shows the exceptional care and finish given by the firm to their products. It is a semi-Diesel of the four-cylinder type, developing 152 brake horse-power at 300 r.p.m. The firm are also showing a comparatively small two-cylinder set, and, as an example of their larger work they have on view a piston and connecting rod for a 500 h.p. engine they have on order. Amongst the smaller exhibits I noticed a 5-b.h.p. Petter paraffin marine engine, and also a small lighting set, developing 1½ kilowatts and driven by a 2½ h.p. Petter engine. The firm also show demonstration plant, visualising the action of the Vickers-Petter Electric starting apparatus, comprising electric torch, fuel pump and sprayer.

The Metropolitan-Vickers are showing an interesting electric motor of 30 h.p., coupled to a ship's winch. This plant is provided with a shipping clutch by which the load can be taken up as gradually as desired, and it may be mentioned that what is known as push-button control has been adopted with this set.

The latest example of electric welding outfit is also shown on this stand, and consists of a powerful motor, wound to suit the voltage at the source of supply, and direct coupled to a low voltage, high-amperage dynamo which supplies energy to the welding electrodes. All the components of this outfit, including the switchboard

WONDERFUL EXHIBITS
at the
GROCERS' EXHIBITION
(*Royal Agricultural Hall, Sept. 17th to 24th, 1921.*)
FLUGEL SODA FOUNTAINS.
Stand. Bay 23. Arcade Entrance.
Actual working models will be on view showing how the finest aerated fruit drinks are automatically manufactured at a minimum of cost and trouble. The Flugel Soda Fountain automatically filters every drop of water and each drop is aerated while it is being filtered. Every one interested in the production and sale of mineral water drinks should ensure seeing this remarkable machine, and if unable to visit the Exhibition they should send for the special free illustrated booklet (now ready) giving a full description of these exhibits. You will be more than interested. Write to—

and mark envelope "Exhibition."

Digitized by Google

which is mounted with the necessary instruments, are on one foundation. This equipment is consequently of the semi-portable type, and may be moved to any part of the ship-yard or welding shop as desired.

Mention may also be made of the Vickers stern tube appliance shown on the stand of the B.R. Vickers (Leeds) Engineering Co., Ltd. The lubrication is effected in a most scientific manner, and the exhibit certainly is the last word in this side of marine engineering. An oil reservoir is fitted above the water line, with pipes and a pump in close proximity to the stern gland. Oil is fed to the stern tube as desired, and an air pipe is fitted with the object of ensuring the proper charging of the system. A cast-iron neck bush is fitted at the forward end of the tube, a special type of gland being arranged in sections at the after end. The effect is to reduce the downward wear of the shafting, and it can easily be realised that considerable economy must result from its use.

The Avance Oil Power Co. is showing their successful type of semi-Diesel, a 60-h.p. set being exhibited. This is designed to run at a speed of 370-r.p.m., on a consumption of half a pint of fuel oil per brake horse power hour. This set is shown complete, and has a two-bladed reversible propellor attached. The firm are also showing an Avance stationary set of 30-h.p., running at 370 revolutions per minute. This is of the single cylinder type, and is fitted with a double acting pump for emulsion injection of fuel and water. There is also a portable set on view, consisting of a 10-12 h.p. engine, complete with all necessary adjuncts and accessories, and suitable for pumping, machinery driving, or electric power productions.

The Power Plant Co., are well known in the engineering world as makers of high class gearing, and their stand is such as must add to the already hfgh reputation of the firm. One of the most remarkable exhibits in Olympia is on this stand and is a 60 to 1 reduction set of which the pinion has one tooth geared with a wheel of 60 teeth. The firm are also showing a magnetic clutch capable of transmitting 500 h.p. The special speed increasing gear, for the production of which the firm have gained so high a reputation is also in evidence on this stand.

Messrs. J. Samuel White and Co., were showing one of their semi-Diesels as well as a number of examples of their system of oil fuel burning. The engine is of the single cylinder type, whilst an interesting feature in connection with scavenging is incorporated. This consists of sending a super charge of air into the cylinder after the first exhaust. Mechanical oiling is provided and the exhibit will certainly enhance by its excellence the already high reputation of the firm.

The Aster Engineering Co., also have a number of interesting exhibits on their stand amongst which may be mentioned a small electric generating set driven by an 8-h.p. engine running at 800 revolutions per minute. There is also an 8-cylinder engine for electric lighting, developing about 100 h.p. and giving out about 50 kilowatts. This is a very fine piece of work and is certain to be the subject of close examination by every visitor interested in electrical engineering work.

*(To be concluded)*

## MISCELLANEOUS.

### Touring Facilities Abroad.

The Automobile Association announces that, as a result of their negotiations with the Commissioners of His Majesty's Customs, they are now able to resume the issue of documents known as "Carnets de Passage." The documents are issued in place of triptyques when motorists proceeding abroad propose visiting more than one country. They have the great advantage of requiring as deposit the duty in respect of one country only of those being visited, viz., the one where the highest duty is payable. The use of these Carnets, therefore, will very considerably decrease the amount which motorists going abroad will be required to deposit for Customs purposes.

### Vauxhall Successes.

Further cable news has been received of the Brisbane--Sydney reliability trial, in which there were 26 starters. The performances of the Vauxhall cars show that, though few British cars competed, the honours of the day can be claimed by a car of English make. The distance travelled was 817 miles, and the result was that the 20 h.p. Vauxhall driven by Mr. Boyd Edkins was first, Mr. Monro's 20 h.p. Vauxhall third, and Mr. Ottoway's 25 h.p. Vauxhall fifth. In the two hill climbs, Mr. Boyd Edkins was first on formula and Dr. Manning (30-98 h.p. Vauxhall) third in one and fourth in the other. The three fastest times in the hill climbs were made on each occasion by Dr. Manning, Mr. Ottoway, and Mr. Edkins, in the order given. The petrol consumption figures for Vauxhall cars were :— Mr. Monro 32.9 m.p.g., Mr. Edkins 30.6 m.p.g., Mr. Ottoway 26.5 m.p.g. and Dr. Manning 20 m.p.g. It is of interest to mention that Mr. Edkins' and Mr. Ottoway's cars were sent out to Australia in 1914, and Mr. Monro's in 1912.

### Norton Motor Cycle.

The famous Norton Motor Cycle has scored one of it greatest victories in the winning of the Belgian Grand Prix, when Hubert Hassall on a 3½ Norton secured this coveted honour. In the long and strenuous journey of 200 miles on the road, it is estimated that the C.A.V. magneto with which his machine was equipped gave out somewhere about 570,000 sparks in 3 hours 19 minutes riding time.

According to a Prague report an Anglo-Czech radium company has been formed half of the capital being subscribed by the Imperial and Foreign Corporation, Ltd.

# SHIPPING INTELLIGENCE

## ROUMANIAN NOTES.

(*From our our Correspondent.*)

Bucharest, August 30.

The papers report the rumour of the sale to an English company of the fleet of a Roumanian shipping company on the Danube The transaction is supposed to have been concluded a few days ago.

The level of the water in the Danube has fallen considerably in consequence of which three sea-boats have run aground between Galatz and Braila also some sand-banks emerged up river, greatly interfering with the traffic of barges.

## SHIPPING AT SULINA.

The following extracts are taken from the report of Mr Marshall, Acting Vice-Consul at Sulina:—

Sulina has practically no separate commercial existence; it depends entirely upon shipping, it being the port of transhipment for grain finding its way down the Danube. There are literally no exports, for the town is hemmed in on all sides by swamp. There are neither local industries nor any means of developing agriculture, and public works are equally unknown, and the beginning and end of human enterprise at Sulina is shipping and such pursuits as are immediately connected with it. As a loading port for grain, Sulina used to be of considerable importance to British shipowners, principally owing to the fact that the depth of water on the bar in pre-war days was maintained at about 24 feet with a river depth of about 20 feet, which made the place more attractive, the loading facilities being good the risk of river navigation to Galatz and Braila and detention being avoided.

During the greater part of the year the river depth was maintained at about 23 feet, but vessels were only allowed to cross the Sulina Bar with a draft of about 20 feet; only small quantities of grain were shipped in Sulina, vessels drawing more than the bar draft when loaded preferring to complete at Constantza, thus escaping very heavy lighterage expenses and delay in Sulina Roads, since the high cost of lighters, towage, labour conditions generally and loss of time through bad weather, practically consumed the freight earned by the vessel on the quantity loaded outside the Bar.

The fluctuating population of about 2,500 souls has not increased and there have been practically no imports of any description beyond a few tons required for the European Commission works. The conditions in the town have not yet been improved, and the damage caused by the war has not been repaired. Only about one-fourth of the houses are habitable and the small needs of the town, so far as colonial goods are concerned, are supplied from up-river ports where ocean-going steamers land the general cargoes which they bring to Roumania.

## CZECHO-SLOVAK PORTS.

The Danube touches Czecho-Slovak territory for a distance of 170 kilometres and forms the southern boundary between Devin and Parkany. This section of the river (says the recently issued British Consular report on Czecho-Slovakia) is unfavourable to navigation and requires constant and costly regulation. The right bank, with the exception of a few kilometres round Bratislava is in Hungarian hands. The work of canalising the Moldau and the Elbe has just been completed, and by a series of locks and canals it will now be possible for boats of 600 tons to go direct from Prague to Hamburg. The German portion of the Elbe, as far as Magdeburg, however, is in a very neglected condition, and in the summer months the depth of water in this section of the river often falls below 60 centimetres. Czecho-Slovakia has three ports on the Danube: Devin (Gonyo), Bratislava and Komarno (Kommorn). The first and last are of little importance. The equipment of the port of Bratislava is totally inadequate to cope with the present volume of traffic. Its present mechanical equipment scarcely suffices to re-load 50 trucks per diem, but great efforts are being made by the Government to rebuild the wharves and install a plant capable of dealing with over 500 trucks per diem, or about 2,000,000 tons per annum.

## FORTHCOMING SAILINGS.

*The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parentheses* :—

*Anchor Line.*—S.s. Massilia for Bombay (Liverpool, October 4).

*Anchor-Brocklebank Line.*—S.s. Mathura for Calcutta (Birkenhead, September 24).

*Bibby Line.*—S.s. Gloucestershire for Marseilles, Port Said, Colombo, and Rangoon (Liverpool, September 28).

*Byron Steamship Line.*—S.s. Maid of Athens for Patras, Piraeus Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Galatz, and Braila (Liverpool, September 28).

*Clan Line.*—S.s. Clan Morrison for Colombo, Madras and Calcutta (Birkenhead, September 22); s.s. Clan Macvicar for Bombay and Persian Gulf (Birkenhead, October 6).

*Cunard Line.*—S.s. Sea Glory for Gibraltar, Malta, Piraeus, Constantinople and Galatz (London, September 15); s.s. Tyria for Algiers, Malta, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Novorossisk, Odessa, and Batoum (Liverpool, September 17).

*Ellerman Line.*—S.s. Asturian for Gibraltar, Malta, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas and Varna (Liverpool, October 8.).

*Ellerman's "City" Line.*—S.s. City of Calcutta for Calcutta (Birkenhead, September 19); s.s. City of Manila for Calcutta (Birkenhead, October 3); s.s. City of Baroda for Calcutta (Birkenhead, October 15).

*Ellerman's Hall Line.*—S.s. Trafford Hall for Bombay (Liverpool, October 1).

*Ellerman's Westcott and Laurance Line.*—Steamers sail fortnightly for Mediterranean, Egypt, and Levant ports.

*Glen Line.*—S.s. Glengyle for Port Said, Port Swettenham, Singapore, etc. (London, September 22); s.s. Glenogle for Port Said, Port Swettenham, Singapore, etc. (London, October 6).

*Harrison Line.*—S.s. Inventor for Calcutta (Liverpool, October 1); s.s. Professor for Port Said, Port Sudan, Aden etc. (Birkenhead, October 6).

*Henderson Line.*—S.s. Arracan for Port Said and Rangoon (Birkenhead, September 21); s.s. Henzada for Port Said and Rangoon (Birkenhead, October 5).

*Holt Line.*—S.s. Knight of the Garter for Port Said, Port Swettenham, Singapore, etc. (Glasgow, September 22); s.s. Laomedon for Port Said, Port Swettenham, Singapore, etc. (Glasgow, September 22); s.s Mentor for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, September 22); s.s. Orestes for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, September 22).

*Johnston Line.*—S.s. Cranmore for Piraeus, Syra, Smyrna Volo, Constantinople, Bourgas, Varna, Constantza, Sulina, Galatz, and Braila (Liverpool, October 1).

Digitized by Google

*Moss Line.*—S.s. Siptah for Gibraltar, Algiers, Malta, Syra, Piraeus, Smyrna, Salonika, Constantinople, Bourgas, Varna, Constantza, and Sulina (Liverpool, September 24); s.s. Amasis for Gibraltar, Algiers, Malta, and Alexandria (Liverpool, September 24).

*Papayanni Line.*—S.s. Bosnian for Tangier, Malta, and Alexandria (Liverpool, September 17).

*P. and O. Line.*—S.s. Delta for Bombay (taking cargo for Gibraltar, Port Said, and Aden; also (with transhipment at Bombay) for Indian Coast and Persian Gulf ports). (London, September 16); s.s. China for Bombay (taking cargo for Gibraltar, Port Said, and Aden; also (with transhipment at Bombay) for Indian Coast and Persian Gulf ports) (London, September 23); s.s. Padua for Colombo, Madras, and Calcutta (taking cargo for Malta, Port Said, and Aden) (London, September 24); s.s. Novara for Colombo, Madras and Calcutta (London, October 7).

*P. and O. British Line.*—S.s. Mundra for Colombo, Madras, and Calcutta (taking cargo for Port Said, Suez, and Aden) (London, September 17); s.s. Mandala for Bombay and Karachi (taking cargo for Persian Gulf and Malabar Coast ports) (London September 23); s.s. Morvada for Colombo, Madras, and Calcutta (taking cargo for Port Said, Suez, and Aden) (London, September 30); ss. Nevasa for Bombay and Karachi (also taking cargo for Persian Gulf and Malabar Coast ports) (London, October 7); s.s. Manora for Colombo, Madras and Calcutta (taking cargo for Port Said, Suez and Aden) (London, October 14); s.s. Neuralia for Bombay and Karachi (taking cargo for Persian Gulf and Malabar Coast ports, (London October 21).

## AGRICULTURAL SITUATION IN INDIA.

The following official estimate of the agricultural situation dated September 3 has been received from India:—During August the monsoon was very good in the United Provinces of Agra and Oudh, Bengal, Bihar and Orissa, Assam, Southern Madras, Central Provinces, Gujarat, Central India, and most of Burma. Rain was very scanty throughout August in the Deccan districts of Bombay and Madras, and since the middle of August, in North Western India and Hyderabad (South), but crops are still doing well. Crops at present are excellent in the Central Provinces, good in Bengal, Bihar and Orissa, Bombay, Lower Burma, Sindh, United Provinces of Agra and Oudh, and are very saitsfactory elsewhere. Much will depend on the continuance of rain during the first half of September. The fodder supply has greatly improved. Canal supplies are good. Famine relief continues, but the numbers on relief works are steadily decreasing. Despite the generally good monsoon, there has been an extraordinary rise of prices, especially of wheat, in Northern and in Western India.

## GREECE'S MACHINERY REQUIREMENTS.

The question of the lack of agricultural implements which so seriously hampers the development of Greek agriculture, says the *Oikonomologos Athenon*, as regards both quality and quantity of produce is now being dealt with. The need is most urgent for the following articles: motor ploughs, threshing machines, reapers, hydraulic engines, ploughs, corn sifters. The need of the last mentioned is most pressing. The amount of seed corn that can be sifted by them in one day lies between 1,000 and 2,000 okes, which with the common sieve takes from 15 to 20 days, and is even so a less thorough process. There are now about 1,000 of these machines, while at least 7,000 are required. About 200 motor ploughs are now used in Greece with approximately about 100 threshers and 2,000 reapers.

## OIL OUTPUTS.

British Burmah Petroleum.—A cablegram has been received from Burmah reporting that the total production of crude oil by this company and the Rangoon Oil Company, Limited, for August amounted to 81,406 barrels.

The traffic receipts of the Smyrna-Aidin railway for the week ended September 3 amounted to £9,619.

OTTOMAN 4 per cent. UNIFIED CONVERTED DEBT, 1903-1906.

NOTICE TO BRITISH HOLDERS OF COUPONS DUE MARCH, 1915, TO MARCH, 1920 (NOS. 23 TO 33), INCLUSIVE.

The Council of Foreign Bondholders Give Notice that the deposit with them of the above Coupons for the purposes indicated in the Notice of 1st February, 1921, of the Council of Administration of the Ottoman Public Debt will cease on the 23rd instant.

COUNCIL OF FOREIGN BONDHOLDERS,
JAMES P. COOPER, Secretary.
17, Moorgate-street, London, E.C.2,
7th September, 1921.

## TENDERS INVITED.

*Tenders are invited for the following contracts and must be made by the dates mentioned,*

**Egypt.**

Water Tubing and Fittings.—The Egyptian War Department invites tenders for the supply of 5,500 feet 2-inch galvanised W.I. water tubing and fittings. Further particulars can be obtained from the Inspecting Engineer, Egyptian and Sudan Governments, Queen Anne's Chambers, London, S.W. 1. September 26.

Wood.—The Secretary-General, Ports and Lighthouses Administration, Arsenal, Alexandria, invites tenders for the supply of wood. October 5.

Bags.—The Central Stationery Stores, Ministry of Finance, Cairo, invites tenders for the supply of 10,000 money bags. October 8.

**Bulgaria.**

Hardware.—The Bulgarian Ministry of Railways, Telegraphs and Telephones, invites tenders for the supply and delivery of brackets, belts and other hardware furniture of telegraph and telephone lines. October 12. (D.O.T.)

Water Closets, etc.—H.M. Legation Sofia reports the receipt of an enquiry for quotations for 1,000 water closets complete and 500 lavatory basins which are required in Philippopolis for the equipment of new constructions. The enquirer is also desirous of receiving catalogues for machinery of all descriptions, including dynamos, motors, flour milling plant, pumps (hand and power), stationery and portable electric sets, sausage machinery, etc. (D.O.T.)

**Yugoslavia.**

Stockings.—The "Depot Central Sanitaire" invites tenders for the supply of 10,000 pairs of stockings for invalids. Tenders must be addressed to the "Direction du Depot Central Sanitaire à Zemun" and must bear a stamp of 20 dinars, and must be accompanied by a letter of guarantee. September 24.

**India.**

Cast-iron Pipes.—The Madras Corporation invites tenders for the supply of Cast-iron Pipes, Special Castings, Sluice Valves etc. (Spec., 5s., Messrs. Mansergh and Sons, 5, Victoria-street, S.W.1.) October 31.

Boilers.—The South Indian Railway Company, Ltd. invite tenders for the supply of Locomotive Boilers. Specifications and forms of tender may be obtained at the Company's Offices, 91, Petty France, Westminster. September 21.

**Morocco.**

Waterworks Contracts.—Tenders are invited in connection with two contracts for the construction of the Ain Sebzar-Petitjean Waterworks as follows:—(1) The supply and fixing of material, pipes, valves, etc.; (2) The construction of earthworks, etc. The public adiudication of tenders will take place at the office of the "Direction Generale des Travaux Publics" at Rabat, Residence Générale, on September 29.

It is understood that the next exhibition at Algiers will be held in April.

At Czecho-Slovakia's third international sample fair at Prague more than 4,000 exhibitors applied for space, totalling over 64,000 square yards, whereas at the first fair 2,000 exhibitors applied for a total space of about 30,000 square yards,

The opening of the Sample Fair and Exhibition at Bucharest will take place on September 10.

**BANQUE FRANCO-SERBE**

Capital - Frs. 20,000,000.

**London Office:—**
**30, COLEMAN STREET, LONDON, E.C.2.**
Telephones: LONDON WALL 8934, 8935. Telegrams: "FRANCOSERB AVE LONDON."
**HEAD OFFICE: PARIS, 16, Rue le Celetier.**

**Belgrade.**

**ZAGREB (Agram), BITOLJ (Monastir), SKOPLYE (Uskub), FIUME, and SALONIQUE.**
*Agents throughout JUGO-SLAVIA, the BALKANS, AUSTRIA, HUNGARY, CZECHO-SLOVAKIA, Etc., Etc.*

**The London Office collects Drafts and Documents; issues Cheques and effects Mail and Telegraphic Transfers; accepts Bills; opens Documentary Credits; issues Letters of Credit and conducts all operations of Foreign Banking.**
**Current Accounts opened in Sterling, Francs, Dinars, etc.**
**Insurances effected through the Bank's Brokers.**

*Applications for Terms invited.*

Digitized by Google

# Near East Markets.

## LONDON PRODUCE REPORT.

**Trade brisker; Prices rising.**

Dried Fruit.—Business has continued to be fairly brisk. Currants are moving off well at easier rates. Sultanas are steady, and rates are firm.

Coffee.—The tone has been very irregular during the week. Costa Rica has shed 4s. to 126s.; while Indian has jumped from 114s. to 120s. Columbian at 110s. has remained unchanged. Nairobi is quoted at 96s. Futures are:—September, 48s.; December, 47s. 3d.; March, 48s. 3d.; May, 49s.

Sugar.—Home refined has been in steady demand throughout the week. White Mauritius is the same at 50s.; but Czecho-Slovakia at 27s. 6d. has dropped 6d. Other transactions include West Indian crystallized at 44s. to 50s.; and beet sugar at 20s. Futures are:—October, 17s. 6d.; November, 17s. 3d.; and December, 16s. 9d.

Oilseeds.—There is an all round improvement in prices. Indian linseed has gained 1s. 3d. to 23s. and La Plata is 1s. up at 22s. Rapeseed has been firm with Toria 3d. up at 22s. 6d. Bold Ferozepore is unchanged at 21s. 6d; and brown Cawnpore also unaltered at 20s. 6d. Cottonseed has risen with Indian at 12s. 6d.; a rise of 1s.; Egyptian black at 14s. 6d.; and Sakellarides at 14s.; increases of 9d. in both cases.

Seed Oils.—A firm tone has prevailed during the week. Linseed oil has gained 2s. at 40s.; crude rape oil is unchanged at 55s.; but the refined variety has gained 11s. at 61s. Cotton oil is higher, with common edible at 53s.; Egyptian crude, at 46s.; and deodorized at 59s.; increases of 2s., 4s., and 3s., respectively.

Oilcakes.—Business has been brisk. Linseed cake has been done at 320s. and finest Arachis, 300s. London-made cotton-seed cake is quoted at 220s.

## ROUMANIA'S CEREAL EXPORTS.

(*From our own Correspondent*).

Bucharest, August 30.

It is officially estimated that the cereals that will be exported this year will represent a value of about two milliard lei.

About three thousand waggons of the quantity of wheat sold to France are already loaded on barges, and some of it is lying at the various railway stations. The grain is being sent by barges to Braila to be shipped on the boats arriving from France

## DRIED FRUIT.

Messrs. J. C. Houghton and Co. report as follows for the two weeks ended September 6.:—

Currants.—Reports that the quantity of new crop likely to be available for export is estimated at not exceeding 90,000 tons caused a reawakening in the demand, and the position has undergone a complete change. The market during the past month, especially during the second and third weeks of the period under review, has displayed a more cheerful tone, and sales have increased considerably, although no advance in price can be quoted. The final disposal of the old fruits sold by the Government to a Syndicate some time ago also helped the position, as the uncertainty regarding the clearance of this stock has undoubtedly been a menace to the trade. New crop—Very little interest has been taken in this, and sales reported are quite insignificant. Spot quotations are:— Pyrgos and Amalias 48s. to 55s.; Patras, 50s. to 64s.; Zante, 56s. to 70s.; Gulf and Panariti, 58s. to 72s.; Vostizza, 72s. to 90s. Duty paid clearances for the month were 1,780 tons, against 1,080 tons for July. The first steamer s.s. Phrygia with new fruit is now loading, and is expected here towards the end of the month.

Valencia Raisins.—Sales of new crop are said to have been made at 105s. c.i.f. for fair average and 108s. c.i.f. good average. Advices from Spain are very pessimistic as to extent of the crop; some estimates as low as 7,000 tons are to hand.

Sultanas.—Stocks are practically cleared. Latest sales have been at 140s. Afghans experienced a good demand, and are now almost exhausted. Sales were—red 105s. to 112s. 6d.; yellow, 130s. to 137s. 6d. The s.s. Luque with the first of the new crop Smyrna is loading, and prices asked vary from 10s. to 120s. c.i.f., according to quality, London has been better served than Liverpool, having had an arrival of 3,000 boxes 147s. 6d. to 155s. Quality and colour are reported good for early gathering

We regret to announce the death of Mr. H. Chalmers, general manager of the National Bank of India, which occurred recently at Aberdeen where he was spending a holiday. Mr. Chalmers who had been in the service of the bank for forty-five years, was at one time manager of the Bombay branch of the bank, and subsequently inspector of branches. He was appointed general manager in London at the beginning of 1914, and last year was appointed to a seat on the Board.

## BULGARIAN CEREAL TRADE.

(*From our own Correspondent.*)

Sofia, September 4.

M. Stambolisky returned from abroad on the 1st inst., and although he is due to leave for Geneva in a few days time will be here when the Sobranje discusses the amendment to the law regarding the trade in cereals, providing for free trade in cereals and putting the Consortium on an equal footing with private merchants. This amendment is inspired by the Commission of Reparations and as the Government have assented to its introduction, there should be little delay in its becoming law.

Meanwhile the harvest is in, and although it is good there is no sign of an improvement in the leva, the rate being about 450 for sterling. The rate is however, comprehensible when one reflects on the way in which trade in cereals is being carried on. The following story is a good instance of what is actually happening. A Roumanian firm wanted to buy maize from Bulgaria. Telegrams were exchanged between the sellers and the Consortium, which finally sent a wire offering to sell maize at a certain price. The Roumanian firm accepted the offer and promptly dispatched a representative to Sofia to conclude the deal. The Consortium had, however, no sooner wired to Roumania than they had an offer from a French firm who also wanted to buy maize, the price offered being the same as that offered by the Roumanian firm. The Consortium accepted the second offer and telegraphed to the Roumanian firm that the deal was off, but their representative was on his way here, and a day or so later arrived to claim the maize, only to be told to his astonishment that it was sold! The matter will not of course end here, and will very likely involve the Consortium in the loss of a considerable sum.

There is no question that competition is a healthy thing, and it will be interesting to see if the grain merchants can succeed where the Consortium has failed in increasing the export of cereals and thus bringing about an improvement in the leva. It is understood that the Government have given an assurance to the Reparations Commission that steps will be taken to see that an adequate quantity of bread is available for the townspeople, so the alarmists who prophesy a shortage of bread as a result of free trade should be discomfited. The peasants can always be relied upon to keep a supply which is more than sufficient for their own needs, so legislation to provide for the rationing of the towns is all that is required.

## CROP PROSPECTS IN BULGARIA.

The Bulgarska Banka in a report dated September 1, states:—The final results of the crop are not yet known. The cereals in general are giving a good yield, and the threshing of wheat has now been commenced. Enough is not known yet for it to be possible to give even an approximate estimate of the surplus available for export. It is expected, however, that it will be large. The modifications that are to be introduced with regard to the Consortium are awaited with impatience. If freedom for trade and for exports is decided upon it will be possible to anticipate a marked improvement in the economic position in general.

During the past month considerable quantities of flour and cheese have been exported and a little wheat. The money received in exchange for exports has not, however, at all influenced the position of the Bulgarian exchange, even compared with the Turkish pound. The sellers of exchange in Constantinople have always found purchasers above parity. The regulation of dealings in exchange attempted by the Government for a certain time has not failed to make the situation of the leva worse, the large transactions which ordinarily bring about the levelling of the rate having become practically impossible. A certain improvement would result from the abolition of the famous Article 4 of the law for punishing those responsible for the war. The abolition of this article has been solemnly promised by the Government. It appears at the same time that the large payment that Bulgaria ought to make to the Entente Powers and the situation of the country from the point of view of international politics remain the chief factors un-

Digitized by Google

favourable to an improvement of the exchange.

The same influences dominate the market. There are very few orders. The principal houses make very few purchases, endeavouring to reduce the risks they run from the ruinous rate of the leva. Merchants are no longer having recourse to the long term credits that certain foreign houses offer; there have been too many unfortunate experiences,

Business having been practically nil, there are scarcely any changes of price to record. There have been unsuccessful attempts to concert sales of tobacco abroad. The general tendency is to hold aloof pending the results of the crop. Sales of cocoons have been concluded at 185 levas per kilogramme. The market has been a little more animated than in the previous month. The alarm of producers of and dealers in attar of roses at the proposal of the Government for the control and regulation of the production and sale of this commodity has been allayed the project not having been put into execution for the moment. The purchases have taken place round 80 leva per five grammes. For the best qualities up to 105 levas have been paid which appears to be the definite price of the season.

* As announced by our Sofia Correspondent on page 315 this has now been abolished.

## INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated September 1:—Conference freight rates—October-December—for United Kingdom and Continent for jute and linseed reduced by five shillings. (previous rate about 45s.) Rangoon rice rose to Rs. 650 on settlement of speculative bargains (previous rate Rs. 625). Excluding estimates for the United Provinces of Agra and Oudh, for which figures are not yet available, the forecast of area under sesamum in 1921-22 is 1,543,000 acres, as compared with 1,557,000 acres last year.

A further cable dated September 5, states:—Season. August 29 and 30.—Moonsoon vigorous in north-eastern India and Upper Burma with break continuing in Peninsula and north-western India. September 1 and 2.—Bombay monsoon revived. September 3.—Strengthened materially in north-western India. September 4.—Heavy rain in Bombay Presidency. Conditions of Crops. September 1.—Punjab unchanged (the last report was, rice good and other crops unchanged, *i.e.*, cotton and sesamum normal and indigo poor). September 2.—In Central Provinces, rice very good, cotton good to excellent. In Assam, prospects of tea and winter rice, and out-turn of autumn rice and jute fair. Bombay cotton market, September 1.—Steady. M.G. Oomras Rs. 394. December-January; Rs. 420 September. Cotton arrivals from September 1, 1920, to August 26, 1921, were 2,864,000 bales, as compared with 3,406,000 bales during the corresponding period of the last year. Bombay piece-goods market quiet. Prices in some grades slightly easier. Calcutta jute market, September 2.—Very firm. Prices advancing. September 3.—Hessians quiet but steady; heavy goods quiet. At tea sale on August 30, good selection from all districts, particularly Assam. Fine cup quality and Tippy Orange Pekoes were dearer. Leafy thin liquoring brokens and brokens with tips one to one and a-half anna cheaper; other grades unchanged. 126,222 packages sold to date at an average price of nine annas one pie per lb. Special rice, September 2—Rs. 522½. No change in Bank rates.

## CURRENT PRICES.

*General Produce.*—Bacon (Continental), 111s. 6d. cwt.; bacon (Canadian), 127s. 6d. cwt.; bacon (American), 120s. 6d. cwt. butter (Danish), 250s. cwt.; butter (Australian,) 233s. cwt.; butter (New Zealand), 255s. cwt.; cheese (Australian), 123s. cwt.; lard, 89s. cwt.; chillies, 152s. 6d. cwt.; eggs (Danish), 28s. 3d. per 120; eggs (Styrian), 19s. per 120; cloves (Zanzibar), 1s. 3d. lb.; cocoa (Ceylon, good to fine), 85s. cwt.; coffee (Costa Rica), 142s. 6d. cwt.; coffee (East Indian bold), 132s. 6d. cwt.; coffee (Central American), 117s. 6d. cwt.; coffee (Jamaica), 67s. 6d. cwt.; coffee (Mocha longberry), 113s. 6d. cwt.; coffee (Santos superior), 6s. 6d. cwt.; ginger (washed Cochin), 47s. 6d. cwt.; nutmegs (110's to 80's) 11½d. lb.; pepper (Singapore black), 4½d. lb.; pepper (Muntok white), 9½d. lb.; raisins (Valencias), 82s. 6d. cwt.; raisins (Sultana Smyrna), 96s. 6d. cwt.; currants (Vostizza), 79s. 6d. cwt.; currants (Calamata), 48s. 6d. cwt.; sugar (granulated), 57s. 1½d. cwt.; sugar (No. 1 cubes), 62s. 3d. cwt.; sugar (white Mauritius), 51s. 3d. cwt.; sugar (West Indian crystallised), 47s. 6d. cwt.; sugar (centrifugal), 19s. 9d. cwt.; tapioca (fair Singapore), 2d. lb.; sago (small pearl), 26s. 6d. cwt.; sago flour, 17s. 3d. cwt.; rice (Rangoon No. 2), 23s. 9d. cwt.; rice (bran Rangoon), £8 17s. 6d. ton; cinnamon (firsts), 1s. 4d. lb.; mace (fair Singapore), 1s. 2½d. lb.; tea (Indian common to good common), 8½d. lb.; (medium to good), 1s. 3½d. lb.; (fine to finest), 2s. 4d. lb.; tea (Ceylon, common to good common), 10d. lb.; (medium to good), 1s. 4d. lb.; (fine to finest), 2s. 7½d. lb.; tea (Java, common to good common), 6½d. lb.; wheat (Australian), 75s. 6d. qr.; wheat (English white), 57s. 6d. qr.; wheat (La Plata), 79s. 6d. qr.; barley (malting), 77s. 6d. qr.; oats (English), 35s. qr.; oats (La Plata), 31s. 1½d. qr.; maize (La Plata), 41s. 1½d. qr.; maize (American), 38s. 9d. qr.; flour, 58s. 6d. sack.

*Metals.*—Aluminium, £150 ton; antimony (English regulus). £39 10s. ton; bismuth, 7s. 6d. lb.; copper (standard), £68 13s. 9d. ton; copper (electro), £72 10s. ton; gold bars, 109s. 7½d. oz.; iron (No. 3 Cleveland), 134s. 6d. ton; hematte (mixed number), 161s. 3d. ton; galvanised sheets (24G), £20 15s. ton; lead (soft foreign), £23 1s. 3d. ton; manganese Poti, 1s. 2½d. unit; molybdenite, 41s. 3d. unit; nickel, £190 ton; platinum, 36s. oz.; plumbago, £20 ton; quicksilver, £10 5s. bottle; silver bars, 38½d. oz.; spelter (G.O.B.), £24 10s. 3d. ton; tin (standard), £156 17s. 6d.. ton; tin plates (20 by 14), 22s. 3d. box.; wolfram, 13s. 4½d. unit; zinc sheets, £35 10s. ton.

*Chemicals.*—Acids (boric), 66s. cwt.; oxalic, 8½d. lb.; citric, 2s. 4½d. lb.; tartaric, 1s. 4½d. lb.; ammonia sulphate, £13 11s. 6d. ton; arsenic (white powdered), £31 5s. ton; benzole (standard), 2s. 5½d. gallon; bleaching powder (35 per cent.), £16 10s. ton; borax crystals 31s. 6d. cwt.; cream of tartar, 126s. 3d. cwt. Potassium: Bichromate, 9½d. lb.; chlorate, 4¾d. lb.; caustic, £31 10s. ton; nitrate, £48 10d. ton; hyposulphite, £18 ton; prussiate, 6¾d. lb.; nitrate, £18 10s. ton; glycerine (crude 80 per cent.), £85 ton; industrial, (1260 per cent.), £120 ton; lemon oil, 3s. 10½d. lb.; quinine, 4s. 1½d. oz.; red lead, £39 15s. ton white dry lead, £42 12s. 6d. ton; white ground lead, £53s. ton; sulphate of copper, £31 ton; sulphate of iron, 140s. ton.

*Hides and Skins.*—Ox and Heifer (first), 90 lbs. and up, 10½d lb.; 80 to 89 lbs., 10½d. lb.; 70 to 79 lbs., 10½d. lb.; 60 to 69 lbs.; 59 lbs. and under, 7¾d. lb.; (second), 90 lbs. and up, 9d. lb.; 80 to 89 lbs., 9½d. lb.; 70 to 79 lbs., 9d. lb.; 60 to 69 lbs., 8½d. lb.; 59 lbs. and under, 6d. lb. Cows (first), 60 lbs. and up, 8d. lb.; 59 lbs. and under, 8d. lb.; (second), 60 lbs. and up, 6d. lb.; 59 lbs. and under, 6d. lb.; 59 lbs. and under, 6d. lb.; Bulls (first), 5d. lb.; (second), 4d. lb.; Kips (first), 6d. lb.; (second), 5½d. lb.; (third), 4d. lb.; Calcutta market; Prices in rupees per 20 lb. Arsenic hides (cows): Agras, 7 to 12.8; Durbhangas, 6 to 7; Patnas, 4 to 6. Salted cows, 3 to 6. Arsenic hides (buffalo), 3 to 5.8. Skins: Calf, 8 to 10 per 20 lb.; goat, 250 to 285 per 100 pieces.

*Miscellaneous.*—Cotton (American), 11.72d. lb.; cotton( Egyptian), 18.52d. lb.; linseed (La Plata), £20 17s. 6d. ton; rape (Toria), £22 6s. 3d. ton; soya beans, £14 17s. 6d.; palm kernals, £22 17s. 6d. ton; Oils: Linseed £37 17s. 6d. ton; (Levant), £82 10s. ton; palm, £40 17s. 6d. ton; rape (crude), £55 ton; soya, £41 5s. ton; petroleum, 1s. 4½d. gallon; petrol, 2s. 1d. gallon; ground nut, £51 10s. ton; cotton crude, £42 5s. ton; coconut (Ceylon), £53 10s. ton; turpentine, 63s. 9d. cwt.; shellac (T.N. second orange), 295s. cwt.; shellac (A.C. garnet), 282s. 6d.. cwt.; rubber (plantation No. 1 crepe), 8½d. lb.; smoked sheet, 8¼d. lb.; fine hard Para, 1s. lb.

British holders of coupons due March 1915, to March 1920 (Nos. 23 to 33 inclusive), of the Ottoman 4 per Cent. Unified Converted Debt (1903-1906) are notified by the Council of Foreign Bondholders that the deposit with them of the above coupons for the purposes indicated in the notice of February 1 last of the Council of Administration of the Ottoman Public Debt will cease on September 23.

## SUPPLIES AND PRICES IN THE NEAR EAST.

*The following extracts are taken from recent reports received by the Imperial Ottoman Bank.*

Adana.

The report for July states :—The crisis continues on our market which is devoid of business. Some orders have been placed for machines for knitting stockings and socks, also for weaving. Some sales of manufactures have been carried out at low prices in order to enable holders to meet their engagements. In view of the approaching recovery of trade some important merchants have decided to make purchases.

The depreciation of Turkish bank notes has brought about a rise in commodities imported and exported. Cotton has risen from Ps 110-120 per batman to Ps 135-150 following some sales for Smyrna and Salonika. The exports of the month under review are of no importance. In view of the poor yield of the crop of cereals the importation of American flour and of Algerian wheat is to be anticipated.

## INDIA'S FOOD SUPPLIES.

A communiqué issued by the Government of India states :—The Government of India have given anxious consideration to the position caused by the recent large and rapid rise in the price of foodstuffs, especially of wheat, and they now make the following announcements :—The existing prohibition of the export of wheat, atta and flour will be continued in full force until at least the end of March 1922. In order to prevent any depletion of stocks, or enhancement of prices owing to the supply of military requirements, all supplies of wheat, atta and flour required for the Army in India, or based on India, will be obtained for the present, as far as possible, by the purchase of wheat abroad. It has been represented that private imports of Australian wheat will be encouraged if a portion of the imported wheat is allowed to be re-exported in the form of flour, while the balance remains in the country and increases its food supplies. At the same time the mill industry which is suffering from the embargo on the export of flour will be assisted. The mills in India largely convert wheat into certain proportions of flour and atta, and it has been repeatedly urged that if the export of fine flour were more freely allowed the price of atta produced by the mills would be lowered, since, with a greater demand for flour, the mills could work full time and therefore more economically. The Government of India having regard to the rise in the price of wheat which might ensue from the conversion of larger quantities into flour for export have not hitherto acceded to the request for permission to export increased quantities of flour. There can, however, be no objection on the ground that stocks will be depleted or prices enhanced if the export of flour is preceded by the import of wheat from abroad and is limited to only a portion of the wheat imported.

## MINING IN SYRIA.

Notwithstanding reports at various times of rich mineral resources in Syria operations conducted thus far have not justified such optimistic conclusions, according to an American consular report. None of the workings have, in fact, proved financially successful. Minerals have been discovered and worked to some extent, but reliable engineers report that the quantity of such minerals is so small and the quality so poor that the continuation of operations of the concessions would prove unprofitable. Certain concessions, for instance, were worked prior to 1914, but after a short period of operation, work was stopped. During the war the German army also operated a coal mine for a short time, but the officers in charge of the work decided that, even with an unlimited supply of men hired at army rates, operations did not pay.

## ON 'CHANGE.

### EGYPTIAN LAND SHARES BUOYANT.

*(From our own Correspondent.)*

London, Monday.

It has been a decidedly varied week. While the general political situation has improved we have had the Grand Trunk development which has naturally had a marked effect on the markets. Still on the whole the favourable influences have predominated, and prices in some groups are rather better on balance.

Gild-edged stocks have been firm. Consols at 47,7-8 ex div are ¼ up, while Fundings are 5-8 up at 71,7-8. War Loan Fives exceptionally have lost 1-16 at 88,3-16.

In Near Eastern securities which rank as British Government stocks, Egyptian Guaranteed 3 per cent. are 1 up at 59, while Greek Guaranteed 2½ per cent. 1898 and Turkish Guaranteed 4 per cent 1855 are unchanged at 66 and 69 respectively.

The Industrial group has again displayed firmness though business has been on the smallest possible scale Shipping securities were harder' P. and O. being 350, while Furness Withys are 3d. up at 24s. 3d. ex div. Iron and steel shares continued to show improvement. Armstrongs are firm at 18s. 3d. while Vickers are 13s. 3d.

Oils shares have been fairly firm. Anglo-Egyptian are unchanged at 1,7-16, as are Roumanian Consolidated at 10s. 6d. Steaua Romana are 3d. up at 11s., while Phoenix, at 9s. are also 3d. up. Burmahs are 1-16 down at 5⅞.

A good tone has been in evidence in bank shares. Agricultural 3½ per cent. Bonds at 53s. are ¼ up, while Agricultural 3½ per cent. Guaranteed Bonds are ¼ up at 55. Imperial Ottoman Banks have gained ¼ at 8¼, but National Bank of Egypt at 19¾ ex div. are ¼ down. Bank of Athens are unchanged at 2,3-8, while Ionians are the same at 7¼.

**Greeks Decline.**

Greek securities have been rather easier. The 5 per cent 1881 Loan is ½ down at 42½, while the 5 per cent. 1884 issues has shed a point at 41. The 4 per cent. 1902 Loan is also 1 down at 34.

Land shares have again been strong. Behera Prefs. are 1-8 up at 3¼. Egyptian Delta Land have risen 9d. to 9s. 3d., while Egyptian Consolidated Lands have gained 1½d. at 1s. 3d. New Egyptians are 1s. up at 25s. 6d., while Sudan Plantations at 3 show a gain of 3-16. Union Foncieres are 5-16 up at 3.

Among miscellaneous descriptions Egyptian Markets are 1s. up at 20s., Egyptian Salts and Sodas are unchanged at 35s., while Alexandria Waters are ¼ up at 7 1-16 at which there are buyers.

---

The net profits of the Imperial Bank of India from January 27 to June 30, 1921, inclusive, amounted to Rs58,14,792. This sum the governors disposed of as follows :—Dividend at rate of 16 p.c. p.a., free of tax, Rs33,00,656 ; transferred to reserve fund, Rs10,00,000 ; transferred to pension funds, Rs5,00,000 ; carried forward to profit and loss account of current half-year, Rs10,14,136.

## NEW COMPANIES.

**Transylvania Syndicate.**

The Transylvania Syndicate, Ltd. has been registered with a nominal capital of £5,000 in 4,500 preference shares of £1 each. each, and 10,000 deferred shares of 1s. each. Objects : To search for and acquire mines and land capable of affording a supply of mineral oils.

**Anglo-Oriental Petroleum.**

The Romaneasca Anglo-Oriental Petroleum Co., Ltd., has been registered as a private company, with a nominal capital of £25,000 in £1 shares. Objects : To carry on the business of dealers in and producers, importers, exporters, miners, distillers, refiners, and distributors of petroleum and other mineral oils, oil shares, natural gas, asphalte and bitumen, shipowners, lightermen, carriers, &c. The subscribers are to appoint the first directors. No notice of situation of registered office was filed at time of incorporation.

## AGRICULTURAL BANK OF EGYPT.

The following was the position of the bank's encashments on July 31 (the figures in brackets representing the corresponding totals for 1920) :—Existing Loans : Short term Loans, £E57,026 (£E10,795), Category "B" £E3,500,628 (£E3,468,490), Total, £E3,557,654 (£E3,479,285); Matured Loan instalments : Due £E25,557 (£E24,976), falling due £E604,186 (£E545,830), total £E629,743 (£E470,806). Perceptions : Outstanding on January 31 £E172,760 (£E83,724), Balance £E140,730 (£E52,650), Encashed £E32,030 (£E31,074) ; Matured Loan instalments : Encashed £E10,120 (£E12,713) ; Total encashments of instalments due £E42,150 (£E43,787).

## THE CZECHO-SLOVAK SUGAR TRADE.

A liquidation of the Czecho-Slovak Sugar Commission, the official body controlling the whole Czecho-Slovak Sugar Trade, has been decided upon, and the sugar industry will be released from all governmental control. A Sugar Syndicate embracing the whole industry, i.e., organization of the beet growers, raw sugar factories and refineries, is in course of formation. The Control Office which will regulate the trade between the wholesale traders and the refineries will begin to carry out its functions on October 1. The exports of sugar will also in future be concentrated with the Czecho-Slovak Sugar Export Company, which will be supervised by the Central Association of the Czecho-Slovak Sugar industry.

## ALEXANDRIA EXCHANGE.

*Supplied by G. L. Mortera, Alexandria and Cairo.*

Prices on August 26 were as follows :—Agricultural Bank of Egypt, £4 15-32; Alexandria Water Co., Ltd., £6 15-16; Anglo-American Nile Steam, £2½; Associated Cotton Ginners, £25-32; Banque d'Orient, Fr., 57 ; Behera Ord., £E 8½ ; Brasseries d' Egypte, Fr., 78 ; Building Lands of Egypt, £5-8 ; Cassi di Sconto Priv. Fr., 100 ; Ciments d'Egypte Priv., Fr., 45 ; Ciments d'-Egypte Div., Fr., 35 ; Comptoir Fin. et Com. d'Egypte, £1 ; Consolidated Land, Pt., 5½ ; Credit Foncier Fondateur, Fr. 810 ex ; Credit Foncier Act, Fr., 635 ; Credit Foncier, 1886 Oblig., Fr., 317 ; Crown Brewery Priv., Fr., 110 ex. ; Crown Brewery Div., Fr., 130 ; Eaux du Caire Capital, Fr., 78 ; Eaux du Caire Jouissance. Fr. 105, Egypt and Levant, S.S. Ord., 28s. ; Egyptian Delta Light Railways, £4,5-32 ex.; Filature Nationale d'Egypte, £10 5-8; Immeubles d'Egypte Soc. an des., £5 7-16; Khedivial Mail S.S. Ord., 110s. ; Khedivial Mail S.S. Co., Pref. £2 9-16 ; Kom Ombo Ste. An de Wadi, £4 3-8 ; Kom Ombo Ste., Fondateur, £33 9-16 ex. ; Land Bank of Egypt, Parts de Fond, £37 ; Lots Turc., Fr., 37½ ; Menzaleh Canal Navigation Pt., 270 ; Nungovich Hotels, £6½ ; Ramleh Railways, £2 ¾ ; Salt and Soda, Pt., 33s. 4½d. ; Tram d'Alexandrie Priv., Fr., 49 Tram d'Alexandrié Div., Fr., 66 ; Union Fonciere d'Egypte, £2 15-32 ; Egypt Hotels, £1 27-32 ; Urbaines et Rurales, £3.

# COTTON & COTTON GOODS.

## MANCHESTER REPORT.

Manchester, Friday.

The market during the past week has been thoroughly demoralised by the violent fluctuations that have taken place in raw cotton prices. Many ups and downs have been experienced and at times the value of the staple rose and fell, in some instances 2d. a lb., which is a thing not heard of for some time back. As was only natural in such an unsettled market buyers held aloof. At the moment of writing raw cotton rates show signs of stability, but one can never tell what will happen during the next few days. With regard to cloth buyers for the Near East have not been much in evidence, and only a few miscellaneous sales from stock have taken place for the outlets generally. Sellers found it impossible to cope with the situation, and they even refused to give out quotations. With regard to Egyptian yarns quotations have been irregular and business has been practically negligible. The cloth demand for India and China has been on a very small scale, but towards the week-end more bids have been received from the other side. The majority of these however, proved impracticable. A few lots of printing descriptions have been sold for South America, and a slightly better demand has been met with for the home trade. In connection with American yarns, hardly any business has been done, and quotations when given out have been very irregular. Sales have been isolated.

## LIVERPOOL REPORT.

Messrs. Reynolds and Gibson report as follows for the week ended September 8 :—The excited and "bullish" American markets which followed the Bureau report had an immediate effect on our markets, and the past week has witnessed a very rapid rise in the price of Egyptian cotton. There was no holding Alexandria, and Liverpool seemed quite ready to follow its lead. The result has been that at mid-day yesterday prices for spot cotton had registered in one week an advance of, roughly, 7d. per lb. Estimated sales show a considerable increase on anything we have lately seen, but we are inclined to the belief that they are somewhat misleading, inasmuch as a fairly large percentage of them represents speculative buying on merchants' account, and not genuine trade. Lancashire, in fact, has viewed the advance with mixed feelings. It has been so rapid that the big world-buyers of yarn and cloth have been left gasping, uncertain what to do. Spinners with stocks of cotton and yarn have seen a large increase, on paper, in the value of their stocks, but at the same time, those having hedges in futures have had to pay out large sums, and are still unable to sell their yarn ! There are, of course, a few isolated cases where fortune has smiled on the favoured ones, but, speaking generally, the improved business in yarn and cloth, which it was confidently anticipated would make its appearance on the rise in value of the raw material, has, so far, failed to materialise. Had the market steadied, and given buyers a chance to weigh up the situation, or had the advance kept on, it seems a fairly reasonable argument to suppose that the trade would have come in sooner or later. However, a break, which started yesterday in New York, and has been more than reflected in Alexandria and Liverpool to-day, seems to have killed any chance of that for the time being. Spot quotations, following the break in futures contracts, were reduced 300 points here to-day, and that is quite sufficient to frighten off any prospective buyer ! As we write, all the markets are weak, if not temporarily demoralised, and holders of cotton do not know quite where they are, or what the morrow may bring forth. Practically no c.i.f. business has been done, owing to the difficulty of making firm offers from Egypt, and Manchester reports, after starting off hopefully at the beginning of the week, have again relapsed into a state of gloomy uncertainty. The spot enquiry here has been fairly general, a feature for the second week in succession being the interest displayed in Tokar and Sudan cotton, but it is remarkable what little interest is taken by spinners generally in the new crop. Quotations on balance show an all round increase of, for Sakellaridis, 375 points ; for upper, 400 points, with the exception of fine and extra fine, which are 450 points better ; and for brown 375 points, except fine and extra fine, which are 400 points better on the week. Sales, 3,100, which includes 450 bales Sudan. Fully good fair Sakellaridis 21.50d.

Can obtain all information as to the journey from Continental Traffic Department, Victoria Station (S. E. & C. R.), S.W.1:

## CZECHO-SLOVAK'S TIMBER EXPORTS.

According to figures published by the Czecho Slovak Statistical Office the exports of timber during 1920 amounted to 848,181 metric tons. The largest purchasers were Germany (246,551 tons), Hungary (215,943 tons), and Austria (147,135 tons). During the second half of 1920 exports of textiles amounted to 16,837 metric tons, and imports to 47,052 tons (raw materials and manufactured goods:) As regards countries of origin the United States with 16,777 tons stand first, Germany with 8,812 tons is second, and Austria with 2,116 tons third. The largest exports went to Austria 7,693 tons, Hungary 2,488 tons and Yugoslavia 1,315 tons.

## NEWS FROM ALL SOURCES.

The Mercantile Bank of India announces an interim dividend of 8 per cent., less tax, on "A," "B," and "C" shares.

Compagnie Franco-Roumaine de Navigation Aérienne. The general meeting will be held at Paris on September 17.

The Banque Franco-Serbe announces the opening of a branch at Fiume.

H.E.H. the Nizam's Guaranteed State Railways Company recommends a final dividend of 2½ per cent., together with bonus of 2 per cent., making a total of 7 per cent. for the year ended March 31, 1921.

The directors of the Chartered Bank of India, Australia and China, declare an interim dividend for the half-year ended June 30 last, at the rate of 14 per cent. per annum, free of income tax payable on and after Friday, September 16.

The Roumanian Government has passed a Bill authorising the town of Bucharest to contract a 3½ per cent. interim loan of 10,000,000 lei, redeemable in 50 years by half-yearly drawings. The bonds will be exempt from all taxes present or future.

The Bank of Athens announces that as a consequence of further instructions received from Athens until further notice payment of coupon No. 19 of the Piraeus-Athens-Peloponnesus Railway Four per Cent. bonds (which fell due on July 1-14, 1921) will be resumed at the rate of 6s. 11½d. per coupon of each £20 bond (multiples in proportion) instead of 8s. as hitherto, the difference of 1s. 0½d. being retained for Greek income-tax 10 per cent. (10d.) and duty of 2½d. on transferable securities.

## AGENTS WANTED ABROAD.

*ADVERTISERS requiring agents abroad may insert a paragraph in the following column free of charge. Letters in reply should be addressed to "The Enquiry Bureau," "The Near East," 1, Devonshire Square, London, E.C.2." when they will be re-directed to the firms concerned. It must be understood that "The Near East" accepts no responsibility in connection with such replies.*

111. Agents wanted in the Near East, with good connections in the Typewriter and Stationery Trade, to represent a first-class English firm of manufacturers, on commission basis or own account.

118. Well known Sports Goods House with factory in India, wish to appoint Agents in Near and Middle East where not at present represented.

## ENQUIRY BUREAU.

*Readers abroad desirous of getting into touch with British manufacturers, export merchants, etc., are invited to insert a brief reference as to their requirements in this column free of charge.*

*Replies should be addressed "The Enquiry Bureau," "The Near East," 1, Devonshire Square, London, E.C.2."*

*ADVERTISERS in and annual subscribers to "The Near East" will be supplied with names and addresses of enquiring firms on application. All catalogues sent to "The Near East" for transmission abroad must be accompanied by stamps to cover postage.*

*No guarantee is given as to the financial stability of firms using this column, and enquiries as to status, etc., must be made by the firms concerned.*

113. Import and Export Merchant in Smyrna invites inquiries from British firms wishing to trade with this territory. Will act as agent or on commission basis.

114. Importer in Karachi (India) travelling throughout India, wishes to get in touch with merchants and manufacturers in England and elsewhere. General merchandise.

115. An import and export firm in Spalato, Yugoslavia, wishes to enter into business relations with British manufacturers, importers and exporters. Specialities :—Exports : Medicinal herbs dried fruits, hides, timber. Imports: Oils, food products, tarpaulins. mackintoshes, sacks.

116. Import Merchants in Adana, Cilicia, Asia Minor, wish to represent British firms for any kind of British-made goods. Own account and commission basis. Good references provided. Send catalogues and samples with prices and terms.

117. Importer in Roumania, interested in Jute trade, wishes to get in touch with firms dealing in sacks, new and old, Dundee and Calcutta makes.

## NOTES OF THE WEEK.

### *The Greco-Turkish War.*

Now that the Greek Government has officially admitted the withdrawal of its army across the Sakaria and the abandonment of the attempt to reach Angora, the Entente Powers, it is to be hoped, will offer the belligerents their mediation, informing them at the same time of the terms on which they propose to settle the Asia Minor question. Mediation without an outline of the proposed settlement will be useless. The Nationalists may hold their own views of the nature of the Greek withdrawal and of the reasons leading up to it, and encouraged by the presence of reinforcements, now that the harvest operations are over, may think that they stand to gain something by following up the Greeks. If on the other hand they find that the Powers are prepared to offer the terms suggested in London last February, with possibly some compromise in regard to Thrace, they may welcome the respite that peace will give them. At best the situation resembles the proverbial nettle, and there is only one way in which the Allies can deal with it.

### *Albania's Frontiers.*

The question of Albania's frontiers has not only given the Council of the League of Nations a field day, but has also produced a special report on the subject by Mr. Balfour. The latter inclines to the belief that the decision of the Paris Committee appointed by the Ambassadors' Conference will settle the matter. Last week reference was made in these columns to the fears of the Tirana Government that some drastic revision of the 1913 frontiers was contemplated in favour of Serbia. No doubt any revision will seem arbitrary to the Albanians, but there would seem to be some reason for regarding the proposed alterations in the boundary line as inconsiderable, although they will certainly favour the Serbians. The Entente Governments are being charged with inconsistency on going back upon their decisions of last year in regard to the southern frontier. Unless we are mistaken the award to Greece of Argyrokastro and Koritza was made under the impression that thereby some counterweight was offered Albania to Italian designs on the country. Those designs, as is known, no longer exist, at least not in the crude form of a year or two ago, and it is held that there is no reason why the two towns should not be given now to Albania. It is certainly to the credit of the Tirana Government that no serious complaints have been raised against it by the Greeks under its jurisdiction.

### *A Constantinople Plot.*

Early last week it was reported that a plot of a very serious character had been discovered by the British Intelligence Department in Constantinople, and according to one version it was organised in and directed from Angora. Later reports served to diminish the dangerous character of the plot, but still left it serious enough to cause some little uneasiness. According to a statement issued by General Harington, there would appear to be more than one organization at work, each with its own programme as far as details were concerned; but all aiming at overthrowing the Allied authorities in Constantinople. One body aimed at bringing about revolution, seizing war material and distributing it to the Turks, and promoting discontent among our Indian troops. General Harington warned the inhabitants not to abuse the tolerance of the Allies, and invited their co-operation in preventing further conspiracies. He also submitted to the Turkish authorities a list of persons implicated, with a request that they should be arrested and handed over within seven days for trial by an Allied court of inquiry. According to the earlier reports, the men who were 'wanted' were desperadoes of the deepest dye, and in very close touch with leading Kemalists; but a late report, from a source by no means over-friendly to the Turks, indicates that they are in point of fact nonentities—"very low-class cut-throats." In the circumstances, it may be well to await the investigation by the court.

### *Persian Puzzles.*

Reports from Persia continue to be of an extremely contradictory character. Thus, on the same day we were informed: (1) that the Governor of Khorassan was defying the Teheran Government, and that Kuchik Khan had formed a provisional government; and (2) that calm had been re-established throughout Persia, and that statements that Khorassan had declared its independence were devoid of truth. We must leave our readers to make their own choice between these two versions, merely adding that the first comes by way of Simla and the second by way of Paris, and—though this is hardly necessary, perhaps!—that the second is an official notification from Teheran. Another, but very

Digitized by Google

minor, Persian problem has been solved by the handing over of M. Israelenko by the French Chargé d'Affaires to the Persian Government, for trial by a Persian court. M. Israelenko is charged with embezzling Soviet funds; and if found guilty, he is to be punished by the Persian court. The fact that M. Rothstein, the Bolshevist representative at Teheran, has undertaken not to demand him from Persia is hardly calculated to make M. Israelenko's case look hopeful.

### *Roman Remains at Alexandria.*

A discovery of considerable interest to archaeologists is reported from Alexandria, where, in excavating for an extension of the Hydrobiological Institute, the workmen came upon remains of a Roman roadway and part of a pavement in mosaic. The latter is reported by the Director of the Alexandria Museum to possess very high artistic merit, and as other remains of a similar character were discovered some time ago in the immediate vicinity it is to be hoped that it will prove possible to carry out scientific excavations at the site. That plenty of competent excavators would be willing to undertake the work is not to be doubted; and if, on further investigation, the remains seemed likely to justify the expense, it is quite probable that funds would be forthcoming also; for, as we have pointed out, such work in Egypt has many generous patrons in Europe and America. But in the first place it would seem to be the part of the Alexandria authorities to do a little more clearing of the site, possibly with the assistance of the Department of Antiquities; and if any difficulty should arise in the matter of finding money for this preliminary work, it would surely be a disgrace to the citizens of Alexandria. The position of the city and the comparative moistness of its climate do not tend to preserve such relics so well as they are preserved in Upper Egypt, and if the present opportunity is neglected the remains may suffer accordingly.

### *The Plight of Georgia.*

An appeal, signed by M. Jordania, President of the Georgian Republic, and by M. Tcheidze, President of the Constituent Assembly, is now being circulated on behalf of the Georgian people, who are described as "groaning under the yoke of the Bolshevists, suffering all the horrors of famine, typhus, cholera and plague, and reduced to the last stages of despair." The picture, we fear, is in no respect overdrawn. Georgia, which in the short period of its real freedom gave every sign of developing into a State useful to the world, happy and prosperous, is now reduced to ruin by the Bolshevist hordes. The latter, we are told, are now "exacting from the population, who are already ruined and reduced to misery, fresh contributions, reaching the enormous total of 50 milliard roubles, and considerable quantities of commodities and wool." The land is over run by Red troops, who, receiving little or no food from Russia, seize what they can from the luckless Georgians, who, of course, are left to starve for all the Bolshevists care. That help is needed most urgently is very clear. The problems that present themselves are: (1) how to arouse Europe to a sense of the need; and (2) how to get help to the deserving Georgians without its falling into the hands of the Bolshevists. It is possible that this may be arranged, and we sincerely hope that it will; but the difficulties in the way loom very large.

### *The Arrests in India.*

The news of the arrest of some of the most prominent Moslem agitators may be taken as marking a new development of the conflict in India of which we wrote last week. It is of course no sudden decision, for the likelihood of action of the kind has been openly canvassed for some time, and the charges which have been formulated relate to speeches made as long ago as July. Among these charges are attempts to seduce troops from their allegiance, a thing which not even the most modern Government can afford to tolerate, and we believe that the weight of responsible opinion in India has for some time past been in favour of bringing this particular charge, and also others, before the courts. The attitude of irresponsible opinion is another matter, and one on which we are not inclined to venture a prediction, but recent events make it probable that the Administration will be prepared to deal effectively at the outset with any manifestations of disorder which may occur.

### *The Indian Civil Service.*

A short but useful correspondence regarding the position of the Indian Civil Service has been carried on in the columns of *The Times*, the pessimistic views put forward by a civilian in India having called forth replies from Lord Meston and Sir Valentine Chirol, as well as from a junior member of the Service, whose letter will have warmed the hearts of many of his seniors. There is no use attempting to deny that the service is not "what it was," but that is equally true of the position of the classes from which the service has hitherto been recruited in this country. It is very many years since the pecuniary attractions were really considerable, and those who went out in recent times to make money were usually among the least satisfactory of the recruits. The young man who is governed by purely economic motives will be well advised still to put in his time "at the Bar, or the Banks, or financing," and, as Sir Alfred Lyall characteristically added, "get damned in a common place way." The call of service is addressed to other ears.

### *The Secretary of State's Council.*

Autumn brings what is coming rapidly to be regarded as the usual announcement of changes among the Indian Members of the Council at Whitehall. Sir Sankaran Nair, one of the latest appointments, is, we are told, returning to India to pursue his literary projects, while Mr. Basu, who has served a longer term in this country, feels the call to public work in his own province of Bengal, and is unlikely to return from the leave which he has secured. We wonder whether Mr. Montagu will be successful in filling the vacancy. Englishmen used to refuse to go out to India for short periods because they objected to leave the main stream of affairs for a backwater, and surely the same consideration will have great weight with Indians who may be invited to come over here; the new opportunities of public service are numerous and attractive; reputations can at the moment be made in a few months; and a public man who spends even two years in England, may find it very difficult to regain his position on his return to his own country. The matter may right itself when the number of public men in India has largely increased, but for the present it is doubtful whether anyone worth having will accept the offer of inconspicuous dignity in Whitehall.

# THE WEEK AT HOME.

LONDON, Monday Evening.

**Controversy by Telegram.**

It seemed almost impossible that Sinn Fein should boggle over the Prime Minister's invitation to a conference "prepared to ascertain how the association of Ireland with the Community of Nations known as the British Empire can be reconciled with the Irish National aspirations." But Mr. de Valera has boggled and objected nevertheless, and the result has been an exchange of telegrams between him and Mr. Lloyd George. These documents have been published to the world, and consequently we are able to judge the advantages or disadvantages of open diplomacy better than before. The new method may make for clarity of definition, but it certainly does not seem to have any advantage in speed over the old leisurely tradition.

The whole controversy between the Prime Minister and Mr. de Valera is on the point whether Ireland is a sovereign state. The Irish "President" wishes it to be admitted that Ireland is a sovereign state, and is entering these negotiations of her own free will. Mr Lloyd George points out that the claim of sovereignty is not true in fact, and that its theoretical admission would have grave consequences if the negotiations broke down.

Mr. de Valera has not been successful in answering this downright treatment. On the whole he has hardly had the best of this telegraphic duel, and he has not strengthened his position by these quibbles. It is not true, as the *Westminster Gazette* suggests to-day, that the whole trouble is one of words; but that journal really does hit the nail on the head when it says that "the important thing is not how Ireland goes into the Conference but how she comes out of it."

Mr. de Valera professes to desire peace above everything else. We are bound to take him at his word, but he has a strange way of ensuing it. There appears to be some impatience in Ireland at his hesitation to accept an invitation which the whole world regarded as open and generous, and it is suggested that this prolongation of the discussion is due to some division of opinion in the Sinn Fein ranks, between the extremists and the moderates.

**The Prime Minister's Health.**

The conference at Inverness, which was proposed for the 20th, must now be postponed, probably until October owing to these delaying tactics. But in any event it would have had to be put off, as the Prime Minister's health is unsatisfactory. Some alarm was expressed last week when it was known that Lord Dawson had been called in, for he is the head of the medical profession in this country, and there is a sort of popular idea that you only call in the most eminent physicians when you are really seriously ill. The facts were that Lord Dawson was taking a holiday in the neighbourhood, and that Mr. Lloyd George has been suffering from an abscess in the tooth and a chill—contracted, no doubt, during those excessive rains which have recently descended on the Highlands.

The Prime Minister has an extraordinarily strong constitution, but he has been in office continuously since 1905, and after all, a good many things have happened in the sixteen years. Somebody has remarked that during the war there was only one first-class crisis a month, but that peace has brought a fresh crisis every week—Russia, Berlin, Silesia, Warsaw, Ireland, unemployment, strikes, and so on. All these things have had to be decided ultimately by the Prime Minister, and the lack of any real holiday for years has a little reduced his physical energy. Even now his holiday is in no sense the kind of vacation that Gladstone and Disraeli were accustomed to every autumn.

**The Quest Sails.**

Sir Ernest Shackleton's little ship left London Bridge on Saturday on her voyage of polar and Pacific exploration. It was dirty weather—the summer seems now to have broken up—and she anchored in the Thames instead of proceeding to Plymouth. The great crowd who watched her departure were no doubt interested mainly in the adventurous side of her expedition, but scientific men are looking eagerly for extensions of knowledge from her reports. We shall hear news of her from time to time, as she will return to New Zealand after visiting the Antarctic and before entering the Pacific.

**A Study in Contrasts.**

One day last week I happened to be in a quiet Cathedral city. I attended the service; the music was perfect, the choir admirable; the congregation consisted of one—myself. But near my hotel window was a cinema, and I noticed so many folk coming and going that it must have been crowded at every performance. Out of curiosity I went across to see what the film was that attracted men from the Cathedral to the cinema. The bill ran as follows: The Mystery of Arch-Deaeon Wakeford; A Reconstruction featuring the Archdeacon and Mrs. Wakeford, and showing the episode of the Girl in the Cathedral," etc., etc. *De gustibus non est disputandum.*

**Another By-Election.**

The Lewisham by-election was a fairly open thing. Its most significant feature was that the Labour Party forbore to put up a candidate in the villadom of Brockley and Forest Hill—which is practically a confession that they have lost, or at least have not gained, the great heart of the middle-class. The Independent Liberals had an excellent candidate in Mr. Rafferty; but as he came in at the bottom of the poll, it is clear that the prospects of a Liberal revival must be post-dated. The Anti-Waste party no longer counts seriously, for no politician will appear in public without the label, and when everybody wears the same label, it is worth nothing—except perhaps as a bogey to frighten Labour. Apparently the Government have little to fear from the present—and apparently, too, the Government know it.

**The Railway Grouping.**

The new scheme of railway grouping, which was so fiercely assailed in the House of Commons earlier in the year, appears to be working well. It has eliminated a certain amount of waste competitive running, which means more money for less showy but more useful services; and there seems to be a genuine attempt to introduce co-operation between old rivals, from which the public should profit. It is true that trains are not as fast as they used to be in pre-war days, except on the Great Western Railway, but the schedules are steadily being improved. The introduction of new cross-country services is another boon; it is no longer quicker to come to London when travelling between two provincial towns, as it used to be. Week-end and excursion tickets are also a promise of better things to come; but the real desideratum is a reduction in ordinary fares and freight rates. For this we have still to wait, but there have been hints that something in this direction will be done next year. It will have to be; for in spite of the all-round improvement on the railways, the charabanc continues to make great strides in popular favour. It is true that it sometimes overturns and lands you at the bottom of a precipice instead of following the road at the top; but the risks are said to be exaggerated, the pain quite short, and the apologies to one's widow profuse.

**Drought and Flood.**

The drought, which has lasted from February to September, has ended at length in the South and East of England. It was curious to go to the North and see fresh green pastures after parched Kent and thirsty Essex; in Scotland they have had so much rain that it is difficult to get the harvest in. The South has forgotten about harvesting this four weeks, and they have already prepared the ground for the autumn-sown wheat. Never was there such a year for corn as this in England; and the prolonged sunshine since the harvest has cleaned the ground, and made it better for 1922 crop than it has been for many a long year. On the whole, the farmers have little to grumble at. They have made money, and got rid of Government control.

**Too Many Bishops.**

The public has been rather startled by a sudden proposal to create twelve new bishops. The suggestion is made by the National Assembly of the Church—itself a new body—and the idea is to divide up some of the present dioceses, such as Winchester, into two or three; to create a Bishopric of Leeds, the absence of which, I understand, has been a long-felt want, and generally to secure that there shall be one bishop to every 250 or 400 clerics. I am not competent to discuss the merits of the proposal; but its demerits are being pointed out very frankly by the clergy, who do not seem to appreciate the prospect—indeed they hint not obscurely that Satan finds some mischief still for idle bishops to do. I gather that to create more bishops instead of more parish priests would increase the administrative at the expense of the spiritual side of the Church; that it would be very expensive, bishops being by heredity and environment a costly species; that on this account alone it would be undesirable,at a time when many of the parochial clergy are in dire poverty; and that in any event twelve new bishops would be too much top-hamper for the ecclesiastical ship, which is at present labouring rather heavily. These objections have weight, and I confess I do not think the money for the purpose can be raised.

**A Recent Book.**

**"The Origin of Man and of his Superstitions" (Cambridge University Press) by Carveth Read, is a curious and stimulating work. The author holds that "man in character, is more like a wolf or dog than he is like any other animal," and that "the Nordic sub-race with its fair hair, has the appearance of an Arctic beast of prey, like the polar bear." He began by hunting, which accounts for the origin of wars, owing to the struggle for hunting fields—this surely rather a dubious conjecture—and the desire for property. Not many will agree with the theories, but it is a book to make one think.**

OCELLUS.

---

The *Morning Post* reports that a convention regulating fishing in the Adriatic was signed on September 15 by Italian and Yugoslav delegations.

Some 13 Turkish political prisoners who were on parole in Malta awaiting exchange with British prisoners in the hands of the Kemalists have succeeding in escaping.

Drastic reforms are recommended by the Acworth Committee on Indian Railways, including the non-renewal of the contracts of the railways under companies of English domicile.

A Turkish motor-boat laden with rifles and ammunition has been stopped in the Sea of Marmara by a Greek auxiliary vessel. The crew will be tried by Court-Martial at Brusa.

It is understood that the new Constitution granted to Malta will be inaugurated by the Prince of Wales next month on the occasion of his visit there on his way to India.

Under date of September 14, Reuter's Bombay correspondent reports that Shaukat Ali, addressing a gathering of Mohomedans, said that he and his brother (Mohamed Ali) would soon be arrested and sent for trial, but he was convinced that others would be forthcoming to carry out their work.

The Colonial Office reports that the situation in the disturbed Kurdish area east of Mosul shows no important change. Aerial operations against the recalcitrants in the Rowanduz and Rania areas have been continued during the period from September 2 to 7.

An earthquake shock was registered on September 13 at the Athens Observatory, says a Reuter message. The seat of the disturbance in believed to be some 260 kilometres south-west of Athens. The shock was also felt at Zante and Patras, while at Amphilochia in Epirus some houses collapsed and a large fissure appeared in the quay.

It is reported in Cairo that work on the White Nile dam at Jebel Aulia, near Khartoum, will be resumed in October.

It is reported that the British authorities at Constantinople have discovered a plot, organized and subdized from Angora, to stir up revolution at Constantinople, spread disaffection among Indian troops, and murder leading officers of the Allied forces.

# CORRESPONDENCE.

## THE STATE OF SALONIKA.

(*To the Editor of "The Near East."*)

Sir,—It gave me much pleasure, recently, to see in "The Near East" a letter from Salonika, written by one of your correspondents who was passing through it, as I had begun to think that once flourishing seaport had altogether ceased to exist. I first visited it some twenty, or more, years ago. It was then under the Turk, a thriving town with a harbour in course of construction, a large export and import trade, active building going on of houses, shops, and warehouses, a daily train service through Belgrade and Vienna, by which one could reach London in 72 hours; in fact, a town with a prosperous future before it, and not in any way an undesirable place wherein to dwell. In those days Greek and Bulgarian Komitajis occasionally made it, and the district around, somewhat lively; but as they mostly preyed on and murdered one another when the Turk showed a little more energy, and himself too strong for them, the peaceful life of the Jewish, foreign, and other inhabitants was not greatly disturbed; the tunnelling under, and blowing up of, the Imperial Ottoman Bank, together with the destruction, by bombs in the engine-room, of the French mail-steamer as she was leaving the port for Constantinople, being only little episodes got up by the Bulgars to give zest to, and brighten up, the too quiet situation. On and off I have known Salonika ever since, but, alas! it is no longer the flourishing town of old. I again visited it a few months ago; but I only breathed freely when I got away from a ruined, dirty, and squalid Greek seaport. such as, it is greatly to be feared, Smyrna will likewise become owing to the incomprehensible policy elaborated by the Allies—or was it solely by the British Government, as general rumour persistently maintained?

When one remembers that Greece has to have British officers to train its Navy; French to organise it Army; Italian for its Gendarmerie, a European Commission to control its Finances; and, recently, U.S. officials appointed for the hygienic supervision of its Mercantile Marine, it passes all understanding why it has been given Macedonia, Thrace, Asia Minor, certain islands in the Archipelago, etc. Utterly incapable of intelligently governing what it previously possessed, what fate can be in store for the vast territories recklessly bestowed upon it by the Entente Powers? Perhaps you, sir, or some of your readers, will venture to make for us a forecast of the condition of Macedonia, Thrace, and Asia Minor a few years hence. We who have visited the first named know to what it has sunk; including Salonika of which the large area destroyed by fire over four years ago is still, to-day, an abomination of desolation; a shameful testimony to Greek administrative incapacity and intrigue.

I am, etc.,

Falmouth, A. WANDERER.
September 14, 1921.

(Our correspondent is too harsh in his denunciation. Financial stringency has been the main obstacle in regard to the rebuilding of Salonika. It has never been possible to apply Western standards in the Near East; but, given peace on the basis of a just settlement, which will enable the different countries to make some headway in material progress, there is no reason why vast improvements should not be seen in the years to some. Undoubtedly a country possessing more territory than its civil service can efficiently administer or the State Exchequer can develop will be seriously handicapped in its strivings after prosperity—.Ed.)

## HONOURS.

The following honours for services in Mesopotamia are gazetted—Knights Commanders of the Order of the British Empire:—Major-General H. De Vere Atkinson, C.B., C.M.G., C.I.E., Colonel P. O. Hambro, C.B., C.M.G., and Major-General O. R. A. Julian, C.B., C.M.G., C.B.E.

The King has given permission for the wearing of decorations of the Order of the Nile, conferred by the Sultan of Egypt, as follows:—

Second Class.—Mr. Leander Gasprad Roussin, Financial Secretary, Ministry of Finance; Dr. Owen William Richards, Director, School of Medicine, Cairo.

Third Class.—Mr. Aubrey Lovell Pryce Weedon, Sub-Director-General, Direct Taxes Department, Ministry of Finance; Mr. William Fraser Hume, Director, Geological Survey; Mr. Thomas Bent, Director of Customs, Alexandria; Mr. Charles Halford, Mr. Sidney Charles Heberd, Senior Inspector, Egyptian Ministry of Education, Mr. Adam Bell Stewart, Inspector, Egyptian Ministry of Education.

# THE NEAR AND MIDDLE EAST.

*(From Our Own Correspondents).*

## EGYPT.

*Cairo, September 3.*

**The Negotiations : A Lull.**

As the Anglo-Egyptian negotiations were about to be suspended, the pessimism which had existed in the minds of the leading Egyptians concerning the result of the pourparlers was suddenly replaced by a strong feeling of optimism. From conversations with some of the leaders I have learnt that the change was due, primarily, to the news that Mr. Lloyd George had decided to take the negotiations in hand himself on the resumption in October, and that this decision was interpreted as a sign that the Premier evidently hoped for an agreement, as otherwise he would not have intervened. In the second place, an optimistic cable has been received from Adly Pasha, in which the Official Delegation leader mentions that there is a prospect of a happy ending. These two things, in conjunction, have led to the dispersal of the atmosphere of suspicion and the dawn of a much more hopeful spirit, the immediate main effect of which has been to lull the country as a whole into calm. But while the change is welcome, one cannot help thinking that the present optimism is dangerous, inasmuch as there has been no sure indication that an agreement would be reached; and should the reverse be the case, the consequent disappointment will be all the more bitter because of the intensity of the blighted hopes.

This sudden reversal from the edge of despair to a pinnacle of expectancy, is therefore, alarming because of its potentialities. Its first effect, apart from the natural impulse of the gratitude that is the sense of favours to come, has been to throw all except small sections of rabid Anglophiles and equally fanatical Anglophobes into the arms of the Moderates. If there is an agreement this *liaison* will be advantageous, inasmuch as it will assure Adly Pasha of a substantial majority at the elections, and will thus facilitate the national confirmation of the Treaty made in London; but if there is no agreement the resultant chagrin will throw the mass of Moderates into the ranks of the extremists. Leading Egyptians recognise this danger; in fact, they go so far as to emphasise that they cannot be held responsible for the conduct of the people as a whole, if the negotiations fail. They assert that patriotism and circumstances have united the Egyptians into a political unit which cannot be toyed with. They point to the disorders in Ireland and India, and infer that the position in Egypt is potentially analogous. One knows these things, but nothing can be done. Negotiations are postponed for a month, local organisation is proceeding, but whether for peace or war depends on the fate of the official discussions.

**The Visit of M.P.'s.**

While it is true that the collective temper of the Egyptians is calm, there is a feeling among some of the more prominent men that the suppressed excitement would not be difficult to fan into activity. Therefore, they are anxious regarding the proposed visit of Mr. Swan and some of his brother parliamentarians to this country at the invitation of Saad Pasha Zaghloul. They foresee that, if the Members do make the visit, the followers of Zaghloul will endeavour to honour the visitors by demonstrations. As, in the opinion of the leaders quoted, the majority of the Egyptians will resent the visit, it is feasible that the latter will commence counter-demonstrations, whence greater and graver troubles will spring, perhaps finally necessitating the intervention of the British forces to restore order. Should any calamity happen, the responsibilty would be placed upon the Egyptians as a whole, and the leaders realise that such an event at this juncture would be most embarrassing to Egypt's cause. They also urge in support of their contention that the visit would be ill-advised and ill-timed, and would lower British prestige in the East, as Orientals have always regarded members of the British House of Commons as above paid partisanship in Oriental politics.

The Press Bureau published a *communique* two days ago, denying the statements which had appeared in some of the native papers to the effect that the Government was making preparations for the holding of the elections in the near future. The *communiqué* added that the question of elections would not be considered until official advice was received of the conclusions of an agreement between the British Government and the Egyptian Delegation. To anyone who has any intelligent conception of the situation the information contained in the *communique* was not news, as it is manifest that the holding of elections depends upon the outcome of the negotiations. I have been discussing the question of elections with various leaders, and have been informed that the proceedings, though in the nature of an election, will be more in the spirit of a referendum to decide whether the provisional agreement—if any—made with the British Government should be accepted. There will be, I understand, no other issues.

**The Heat Wave.**

Technically we are at the end of summer and in the beginning of autumn. In fact, as far as conditions are concerned, we are in mid-summer—and a particularly warm summer at that. The heat wave which prostrated more northern regions some weeks ago is finishing its tour in Egypt and the Sudan. Its toll upon the European populations in both countries has been heavy. Cases of prostration in all the big cities have been of frequent occurrence daily; and those fortunate ones who were able to get away on leave during July and August are fast losing the benefit gained by their trips. The most sensational development occurred a few days ago in a railway train en route from the Sudan. Owing to the wash-outs on the line the train was delayed and the heat was so terrific in the carriages that three Greek workmen, returning from their work on the dams in the Sudan, collapsed and died before the journey was completed. Incidentally, though the floods in the Sudan have wrought awful havoc at Atbara and in the vicinity, they have materially eased the shortage of irrigation water in Egypt.

## YUGOSLAVIA.

*Zagreb, September 12.*

**Dangerous "Bands."**

The Pan-Islamic ferment has extended its disturbing influence even to Yugoslavia. For a long time past, two brigand chieftains, by name Husein Boshkovitch and Yusof Mehonitch, have been terrorising the country in the wilds of Novibazar. Their band is numerous, well-armed, and well organised. Frequently there have been stiff encounters between them and the gendarmerie

Digitized by Google

with heavy losses on both sides. The authorities have had a very difficult task, because the band has a trick of vanishing into the air, as the members disperse to their homes, mingle with the rest of the Mohammedan population, and cannot be identified. They will collect again, attack a Serbian village, where the people have been disarmed by the Government, and murder all the most prominent citizens and villagers. The gendarmes have been reinforced by a band of volunteers under Voivoda Kosta Pechanats, and now by a detachment of troops, as the matter is developing into more than mere brigandage.

One characteristic tale is told of Mehonitch, a famous looter, who was once an Austrian *Feld-Webel*. He met a party of Serbs on the road, and he and his band promptly killed nine of them and wounded five others. A woman with a child implored the bandits to spare her for her childs sake. Mehonitch said: "If the child is a male, we will kill it, but if it is a female, you may both live." He satisfied himself that it was a girl, and let them both go. His policy appears to be the extermination of the Christian population in the district. The statistics are appalling. The *Politika* states that since the liberation, there have been murdered in this way over eight hundred Serbs, all of which atrocities are directly or indirectly, the work of this band. The same paper is following the matter up with great care, and claims to have proved that it is a part of a carefully organised plot with a definite political object—the restoration of Mohammedan power in that wild district.

In former days, there were plenty of Mohammedan Serbs in the Ottoman army, and in more recent times, plenty in the Austro-Hungarian army, the vast majority of whom place their religion or their master before their Serbian blood. Only last year, a Bosnian was nominated a Minister who was actually on the list of war-criminals. Encouraged by rumours of the success of Kemal Pasha in Asia Minor, these men are lifting their heads. Whether or no there is direct communication between them and Kemal is doubtful, but the *muftis* in the mosques are encouraging the Mohammedan population to hold out till Kemal arrives with his liberating army! They are certainly in touch with the Mohammedan Albanians, and the genuine Turkish element is of course sympathetic. It must, therefore, be regarded as a definite military political rising, using methods of the Sinn Feiners and inspired by the Pan-Islamic ferment which is visible in so many parts of the world.

**Changing Views of the British.**

Two years ago, the British were the most popular foreigners in Yugoslavia. The memory of comradeship in arms on the Macedonian front was recent. The Serbs had there seen a good sample of the British races, just as we had seen, perhaps, a picked sample of the Yugoslav race. But after the return to Belgrade there began a process of gradual disillusionment, which was to a certain extent inevitable and mutual. Those of the British who had been to Salonika and seen Serbian heroism at its loftiest were disappointed at the inevitable lack of organisation, the oriental methods, and the abundance of that population which had placed interest before patriotism. They saw the enthusiasm of the union and liberation fade away amid mutual recriminations and the bickerings of political parties, who introduce an atmosphere of personal animosity into their public life that is almost incredible to us. On the other side of the picture, the Serbs saw a very much more mixed representation of Britons than they had seen with the Army. Some samples indeed, called for comment among their own compatriots; some reflected the reverse of credit to our prestige, and this is perhaps truer of Zagreb than of Belgrade; but it is now recognised in both cities that Britons whom they had more or less idealised before are, like other nations, of all sorts.

But the change in attitude is mirrored in the press. The natural sympathy for "small nations struggling for liberty" may be the cause of the siding of the Belgrade and Zagreb press with the Sinn Feiners, but that sympathy was exaggerated into violent attacks upon the English, which, one cannot help feeling, were inspired from further north. Then there came the unhappy business of the evacuation of the Baranya, where British officers were openly and persistently accused of favouring the hated Magyar. All the papers vied with each other in attacking them.

It makes one rub one's eyes to read in the Belgrade *Trgovinski Glasnik*, ("The Commercial Messenger") one of the most solid papers in the country, that "In Admiral Troubridge we have an open enemy, who in this question of the evacuation of the Baranya, exerted influence against our country." Times are indeed changed, since the gallant admiral's name was one to conjure with, in Salonika and in Belgrade! Feeling is so bitter against the pro-Hungarian attitude of prominent Britons that it is hardly surprising to hear all sorts of motives attributed to them, which one knows instinctively are utterly false, but still, are most painful reading. The Hungarians, with a greater superficial aspect of culture, perhaps, than the majority of the Yugoslavs, are masters of the art of propaganda; and as scarcely any Englishman ever learns Magyar, it is most exceptional for him to penetrate beneath the crust of polished manners and engaging hospitality to see the true spirit of the man within. The result is that we have suffered a heavy loss of prestige in a country which matters far more to us than Hungary.

**Anti-British Articles.**

It is distressing to the British resident in Yugoslavia to find anti-British articles in almost every paper. The Irish question is treated, it is true, a little more fairly since the facts have been put before the public here in vernacular reviews, and since the negotiations have been opened, but now India is to the front. The events in Malabar have given the Belgrade *Politika* an opening for another attack upon the British, as oppressors of small (sic) nationalities, in the form of a long article from a Hindu, idealising Ghandi and referring in stock terms to our methods of fire, sword and atrocities. It is very desirable that some steps should be taken to present the British point of view. To a certain extent, this has been done in the case of the Irish question, but it is not really a matter for private enterprise.

It is not only the Belgrade press, but the Zagreb opposition papers which take the matter up, the latter, it is true, to make political capital out of it. It is strange to read in the Narodny's Club's *Obzor* that the explanation of the "scandalous" behaviour of Colonel Gosset and Lieut.-Colonel Craven in the Baranya is really due to the disgust of the British Government at the manner in which the Belgrade authorities have carried out agrarian reform. Anyhow, the effect is that these officer's names are being bandied about in the Yugoslav press, and invariably in an uncomplimentary manner.

## GREECE.

*Athens, September 4.*

**Bulgaria's Disarmament.**

The numerous meetings which have taken place recently in Bulgaria to protest against the decision of the Conference of Ambassadors regarding the complete disarmament of that country, have caused no surprise here. It was only to be expected that Bulgaria would do her utmost to convince the Allies that the creation of a voluntary service army was an impossibility, and that compulsory service ought, therefore, not to be abolished.

SCHOOL OF ORIENTAL STUDIES.

Digitized by Google

The Athens Press is urging the Greek Government to awaken from its deep lethargy, and act without delay against any modification of the Allied decision. It points out that if the clause of the Treaty of Neuilly concerning Bulgaria's disarmament is cancelled, that would mean the cancellation of the whole Treaty, which would only result in new complications, and would mark the beginning of fresh troubles in the Balkans.

**The Bakers' Strike.**

The Athens and Piraeus bakers have gone on strike, and although we are not in any danger of being left without bread, owing to the prompt and exceptionally drastic measures taken by the Government, there is bound to be a shortage during the first few days.

The cause of the strike was the refusal of the Government to allow the bakers to increase the price of bread by 12 lepta the oka. The latter maintain that owing to the bad quality of the flour produced from the wheat purchased recently from Bulgaria, its yield is inferior to that of the American flour, thus reducing their profit on each loaf by 12 lepta. When, however, the Government proposed the appointment of an expert for the purpose of carrying out tests to ascertain whether the bakers' statement was correct, the latter rejected the proposal and intimated that their bakeries would remain closed until the increase they had demanded was authorised. Strange to say, in this instance, the Government did not give way as it had done on many previous occasions. Instead of saying to the bakers: "Yes, gentlemen, you may have your extra 12 lepta," as everyone expected, it promptly requisitioned 150 bakeries in Athens and Piraeus, and as the bakery hands did not participate in the strike of their employers, they continued their work under protection of the police.

**The Albanian Frontier Question.**

The news published lately in the Athens Press to the effect that as a result of an Anglo-Italian agreement, both Koritsa and Argyrocastro are ceded to Albania, has caused a painful surprise here, particularly to those who relied on Great Britain's support in the matter.

Though the Hellenic Government had not received official confirmation of this report from its representatives abroad, the Minister for Foreign Affairs, dispatched a friendly note to the Allied Powers pointing out the bad impression which was caused by the publication of these reports by the Press, and expressing his hopes that they were void of any truth. M. Baltazzi seized the opportunity to expose the Hellenic point of view on the Albanian frontier question, which is based upon the previous decisions of the Supreme Council.

The Minister for Foreign Affairs has had many long interviews with the Italian Minister in Athens, Signor Montania, and although the greatest secrecy is maintained as to the subject of their deliberations, it is generally understood that attempts are being made to find a solution satisfactory to both countries, and one which would serve as a basis for the forthcoming "pourparlers" at the meeting of the League of Nations.

**Attack on Journalists.**

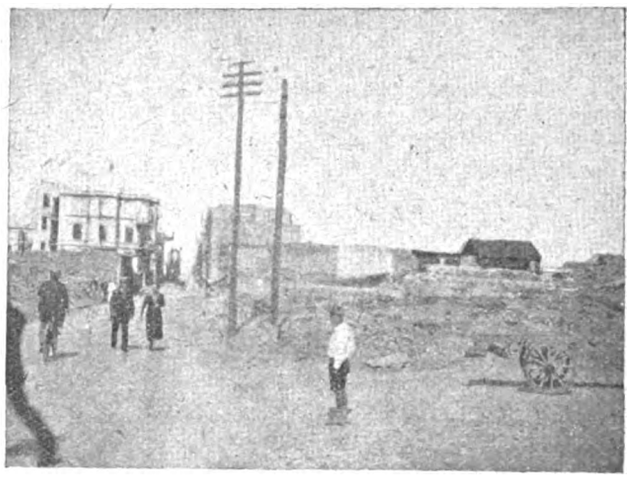
Two well known and highly respected journalists, M. A. Cavafakis, Editor of the *Eleftheros Typos*, a Venizelist paper, and the assistant editor of the same paper, M. Spyro Melas, were the victims of a cowardly attack in Stadium Street last Tuesday evening. Three individuals, whose identity is so far unknown, approached the two gentlemen, and after accusing them of circulating defeatist rumours, attacked them with walking sticks. M. Melas was seriously injured in the head and the arm, M. Cavafakis escaping with injuries of minor importance. A detective who, standing near by, witnessed the scene, promptly arrested M. Melas (!) whilst the culprits vanished amongst the crowds, which are usually dense in Stadium Street at that time of the evening. Shortly afterwards, however, the Chief of Police himself proceeded to the Police Station and set M. Melas at liberty.

This is not the first time that well-known Venizelists have been subjected to similar attacks, and both sections of the Press are vigorously attacking the Government for the indifference with which it is treating the matter.

The *Eleftheros Typos* commenting on its Editors' adventure, points out that no guarantee or security exists any longer even in the capital itself, while the *Politia* (Government) which is likewise throwing the blame on the Government, says that the *Eleftheros Typos* has always maintained a sincere attitude, and in no way associated itself with the views of the extremists of the Venizelist party.

**Fires in Salonika.**

A big fire which reminded one of the catastrophe of four years ago, occurred in Salonika at the beginning of last week. The fire broke out in a small shop in the old market, and spread very rapidly, burning down about fifteen shops, the majority of which were wooden.



**IN SALONIKA**—The untidy mounds on the right are remnants of the Great Fire. A large area of Salonika presents such an appearance.

Another fire broke out at a military depot in the proximity of the town causing the destruction of 200 thousand okas of hay.

**A Mission to America.**

The Hellenic Government has decided to send a mission to the United States of America for the purpose of enlightening by lectures and other means of propaganda, public opinion in that country on the real state of affairs in Greece, both from an internal and external point of view. M. Loukas Roufos, M.P. for Patras, will probably take charge of the mission, whose date of departure has not yet been fixed.

**An Italian Spy.**

An Italian subject residing in Smyrna, named Alberto Penzo, has been found guilty on a charge of espionage and condemned to death by Greek Court Martial. It was ascertained that Penzo was in the habit of paying frequent visits to the Greek lines of communication, of collecting as much information as he could obtain, and of transmitting it to Constantinople, and thence to the enemy. Penzo pleaded guilty and very coolly said that he did not consider his action as in any way condemnable.

## ROUMANIA.

*Bucharest, September 6.*

**Political.**

General Averesco has returned and forthwith political activity has been resumed. Re-entering the country through the new provinces, the Banat and Transylvania, the General visited several localities where he held political meetings. His discourses were a recapitulation of the outstanding features of his administration during the last two years, emphasizing the fact that, prior to his taking up the reins of office, the country was on the verge of anarchy, which he quickly repressed by energetic measures, restoring public order and thereby saving the country from the Bolshevism and Communism toward which it was being driven by preceding Cabinets. He laid stress on the paramount laws of Agrarian and Fiscal Reforms which are meant on the one hand to consolidate the State, and, on the other, to exact adequate taxation from the war profiteers. Sketching out a programme for future activity, he advocated, *inter alia*, complete unification of the new provinces with the Old Kingdom. He condemned the action of M. Maniu and his followers in encouraging "regionalism," which is against the vital interests of the Nation, and interfering with the process of unification. He appealed for support to those elements willing to collaborate with the Government for the consolidation of democracy; and disputed the Liberals' right to claim power, ascribing to them the evils the country has had to endure during the war, and since its conclusion.

In connection with this, it is stated that the General is willing to come to terms with a certain section of the Opposition in order to be able to wage war upon the Liberals. It appears that negotiations are in progress with the Tzaranists and those sections of Ardeleni and Bessarabians that are antagonistic to the Liberals. Notwithstanding these manifestations, the Liberal press is showing remarkable self-confidence, impertubably affirming that their party will, all the same, come to power in the autumn. Time will show whether this optimism is well founded.

**Friction with Hungary.**

The Roumanian consulate at Budapest is declining to visé passports of Hungarian subjects wishing to come to Roumania. This is in accordance with instructions given by the Roumanian Government, which will maintain its attitude until some three hundred Roumanian subjects who are being detained on one pretext or another by the Hungarian Government have been released.

**Various.**

According to a Magyar-Transylvanian paper the King has been studying Hungarian for the last few months. He wishes to be able to converse in Hungarian with the Magyar delegations at the Coronation festivities.

M. Aziz Ibar Behvan, the new Minister Plenipotentiary of Persia to Roumania has arrived in Bucharest.

An Italian Mission sent by its Government will arrive on September 8 to bestow military distinctions on two historical localities, Marashesti and Marasti.

It is announced that a Blériot aeroplane will shortly make the journey from Paris to Bucharest, with passengers.

From April, 1921, on, a regular aerial service will operate between Paris and Bucharest, and return.

## BULGARIA.

*Sofia, September 10.*

**Political Activities.**

This week has seen a considerable amount of activity in the political world, and on the whole the Government may be said to be in a much stronger position than they were ten days ago. First, there has been a change in the Cabinet, M. Boteff, the Minister of Railways and Telegraphs, having tendered his resignation, which has been accepted. M. Boteff only became Minister in the middle of June, but it appears that some grave scandals in the working of his Ministry have been disclosed, with regard to which he is not able to escape responsibility. Efforts are being taken to hush up the matter as far as possible, but it has already come to light that there has been gross mismanagement of public money over the question of locomotives for Decauville Railways. M. Boteff is Deputy for Kustendil; and it seems that the Co-operative Society of Radomir, a neighbouring town, is also involved in this particular affair. Yesterday the Agrarian Deputies held a meeting in order to consider the situation and it is probable that a Commission will be appointed to investigate the whole matter.

M. Manouloff, President of the Sobranje, is talked of as M. Boteff's successor, but in the meantime it is understood that M. Dimitroff, the Minister for War, who was largely responsible for the discovery of the scandal, will act in his place. M. Stambolisky leaves for Geneva this afternoon, to attend the Conference of the League of Nations, and it is said that he may afterwards pay his deferred visit to London and Paris, whilst his trip to Washington, in company with King Boris, may after all take place towards the end of the year.

On the 7th inst. M. Stambolisky made a very long speech at the Sobranje, but it contained no essentially new points of either external or internal interest. His most interesting declaration was that it was always necessary to bear in mind that the wish of the people was the most important thing the Government had to consider and that the Constitution did not permit the King to interfere in any way with the governing of the country. The Prime Minister also referred to Opposition intrigues abroad, and said that M. Tourlakoff, the Finance Minister, had, whilst in Europe, been able to trace and even to obtain some incriminating letters which had been written by members of the Opposition parties.

The strengthening of the Government's position referred to at the beginning of this letter has arisen largely through the fresh dissensions that have broken out amongst the Opposition. The Democrats and the Narodniaks, with which latter party are incorporated the Danevists, were supposed to have had a working understanding for some considerable time, but it appears that the Narodniaks are now not content with the present arrangements and cannot see their way to the continuance of a common policy with the Democrats.

On their part, the latter will not make any concessions; so the prospects of the Opposition appear for the time being to be very hopeless.

Then, again, the Agrarians seem to be showing a more solid front, having doubtless realised that a split in their party will only result in their loosing the power, whilst they have been greatly aided in coming to this decision by the presence of M. Stambolisky, who has once again pulled his party together, although fresh dissensions will doubtless break out when he is away.

Another point of minor interest is that overtures have again been made to the Socialists and the Radicals with a view to their joining the Government. However, neither of these two parties is willing to do so, although a small and unimportant section of the Radicals would have accepted the Government offer, if the majority of their *confrères* had been in agreement.

**The Army.**

It is wearisome to touch on the same subject so frequently, but the future of Bulgaria depends so much on the external and internal order of the country that one may be excused for entering into some new aspects of the situation as it concerns the Army. The number of voluntary recruits has perceptibly increased in the last few days, and the total figure now borders on 3,000. The Chief of Staff, Colonel Topaldjikoff has, however, stated that the majority of these three thousand men were refugees from either Macedonia, Thrace, or the Dobruja, and would doubtless be prone to desert. The facts are as they may be, but surely the descipline to which the men will be subject should render desertion impossible; and there are good grounds for hoping that if 3,000 men have enrolled themselves voluntarily, others may speedily follow suit.

As to the 3,000 Forest Guards which Bulgaria is allowed to maintain, a request has been made by the Government to the Inter-Allied Military Commission of Control for permission to retain these men on a Conscription basis. Pending a reply from the Supreme Council at Paris, the Government will keep this force mobilised until the last possible moment, that is until October 1.

The more the matter is discussed the more pressing becomes the demand of the Bulgarians that the Great Powers will send either a representative or a small Commission to Sofia in order that the actual position may be studied. The suggestion put forward in the editorial columns of "The Near East," that a Commission composed of a representative from each Balkan country, with a neutral chairman, should be constituted, has also been hailed with favour. The great majority of the Allied representatives here, both military and civil, will tell you that they consider the constitution of a voluntary army an impossible and unworkable project. And it may well be asked what is the use of sending representatives to a place if their point of view is totally disregarded. It is hardly possible that all and sundry have fallen under the spell of the Bulgarians! A well known Dutch newspaper wrote the other day: "It would seem that the Allies are bent on wreaking their vengeance on Bulgaria and thus sending her to a state of ruin and impotence." This statement, coming from a neutral source is well worth considering.

Then, those people who say that Bulgaria has no need of an army will do well to pay heed to what President Harding said ten days ago: "No matter where the best aspirations in the world may lead us, there never can be a time without the necessity for armed forces."

## PRESS ON THE NEAR EAST

**Roumania: Diplomacy and Arms.**

The *Daily Telegraph* of September 14 contained the first of a series of articles upon "New Roumania," by Lieut-Colonel Repington. The article is entitled "Diplomacy and Arms," and Colonel Repington begins it by showing what Roumania gained by the Peace.

Leaving aside the question of the justice or injustice of the Treaties of Trianon and Neuilly, there is no doubt that the Roumanian national unity was fully accomplished by the peace, and that almost every scrap of territory inhabited by Roumanians became enclosed within the borders of the New Roumania. No country more completely satisfied all its national aspirations. Geographically it became of nicely balanced shape, with good access to the sea. Economically it found itself in possession of almost every form of agricultural and mineral wealth that a country can desire. Militarily it was strong enough to resist all visible dangers, and all that was required was time to organise these new and great resources, and the genius of administration to repair the ravages of the war and to make the New Roumania a going concern.

But there was a reverse to this pleasing medallion: Roumania with her new territories acquired 'great blocks of Magyars . . . . who considered themselves the superiors of their new masters,' and "Bessarabia was not exclusively Roumanian by any means." Thus there arose a situation in which—

There was not only the ineradicable hostility of Hungary to be faced, but also the enmity of Bulgaria, two peoples whose fighting merits no one contests; while beyond the Dniester there lay Russia, that potentially mighty but intangible and inexplicable mass of humanity, which was and is in a state of chaos verging on dissolution, but could not for ever so remain, since her people possess a genius all their own, and her wealth was in her soil, which no one could steal or destroy. Roumania was a Latin island in a Slav sea, and in memory of her past and her present might well have taken "Ense et aratro" for her motto.

Security was her first need, and she set out to obtain it both by diplomacy and by arms. She was fortunate in having M. Take Jonescu as Foreign Minister, a man of ripe experience, deeply versed in diplomacy of all complexions, very alert, and with shrewd insight into all the motives which sway both man and nations. Basing himself firmly on the Great Entente, and confiding mainly in the performance of Anglo-French unity, he must have observed that something more was necessary to insure the stability of Eastern Europe, and so set himself industriously to work to build up the Little Entente in order to perpetuate the settlement which was of such supreme importance to Roumania.

The coming into being of the Little Entente and its advantages are sketched. "But," says the writer "a diplomacy unbacked by arms is ever vain, and the corollary of this diplomacy was the establishment of strong armies to give weight to words." He continues:

This was particularly necessary in Roumania's case, since the Roumanian and Russian forces still confront one another and occasionally have a fight on the banks of the Dniester, while not so very far away, at Kharkoff, is the centre of gravity of all the

Bolshevik armies. Not a boat can be launched on the Dniester without being fired at from one bank or the other and probably from both, while in the Dobrudja martial law has been proclaimed, and a whole division of Roumanian troops is engaged in dealing with the Bulgarian bands which infest the border and raid afar into Roumanian territory. The conditions in the East of Europe represent a very imperfect form of peace.

After giving particulars of the military system, the strength of the Army, its training, and so forth, the article concludes:

The political and strategic circumstances of Roumania compel her to regard a war on two fronts as among the possibilities of the future, and, in fact, a sort of war of this kind is now in progress. But here, of course, come in the new allies of Roumania, and in the event of more serious trouble Roumania should not stand alone. The Bolshevik menace is apparently the greatest for it will have been seen that the Soviet retains its army on the Dniester, and that in the Kharkov area is the great Bolshevik reserve. But General Averescu, the present Prime Minister, knows his Russia well, and never believed in a Bolshevik attack on this front this year. The Bolshevik army on the Dniester has the Ukraine bands all over its communications, so that the latter may be compared with tracks through a primeval forest. The bands run up to 15,000 in places, and all the villages are armed. Moreover, the Roumanians believe that the sad experiences of the Bolsheviks in Poland have taught them that they cannot oppose regularly constituted armies. In any case the Roumanians do not fear them, and are confident that they can beat them with less than half of the present Roumanian army.

So far as the Straits are concerned, the settled policy of Roumania is to maintain freedom of passage and an international garrison has her very decided preference. In the garrisoning of Constantinople Roumania will help in case of need, but she has no intention of interfering in the war between the Kemalists and the Greeks. In all future troubles that can be present be foreseen on the shores of the Black Sea, Roumania is sufficiently armed, and if ever she requires help it will probably be ships and aeroplanes which she will need most. There seems to be no divergence at all between the policy of England and Roumania in this part of the world, but none of our great fighting generals has yet travelled to Bucharest to draw closer the links of friendship as Marshal Joffre and General Badoglio have done for France and Italy. A little more cordiality towards an ally who did and suffered so much in the common cause would, I think, be appreciated by the Roumanian Government, Army, and people.

It is to be hoped that the hint given in the last two sentences will not be thrown away.

**Counting the Cost.**

Under the title "Greece and Turkey," *The Times* published (September 14) a leading article reviewing the situation brought about by the Greeks' failure to reach Angora and their retirement westward. There were, says the writer, times when the prize seemed to be within reach, but at last, after a loss of 18,000 men in the basin of the Sakaria, the home of the ancient Phrygian Kings, the Army of King Constantine was compelled to retire. "Fleet-footed rumour, interpreting hope and anticipating achievement, had already announced the capture of Angora. But the effort of the Greeks fell short of achievment. The difficulties of communications in the wild heart of Asia Minor mocked at the enterprise, the sacrifices, and the strategical resources of the invaders, and the fierce tenacity of the Turks in their own home-land turned the Greek tide backwards." How far "the Greeks will go in these sad days of autumn" we do not know. Their opponents appear to be exhausted by the fierce struggle, and may not immediately undertake a serious pursuit; and after such a battle both sides will require time to recuperate. The article continues:—

We have no doubt that both Greeks and Turks have fought well. Technically the battle has ended in a draw. Psychologically it will be regarded in the East as a victory for the Turks The Greek Command aimed at a goal which it has failed to reach and the Greek Army, whether because of the growing danger of Turkish attack or the exhaustion of its ammunition owing to the bad roads and the feeble carrying capacity of a solitary railway, has been compelled to retire. In the revulsion from the dread of the capture of a key position such as Angora is the retirement of the Greeks will be regarded throughout the East as a victory for Mustapha Kemal, and will reaffirm his shaken prestige. What the effect of the reverse will be on the position of King Constantine it is difficult to judge. The Greek Army, after such high hopes, such a struggle, and such losses, will hardly be in a cheerful mood as it makes its Anabasis through the grim Anatolian mountains towards the sunlit coast. And in the Hellenic peninsula and the islands of the Aegean there must be many who are thinking as they count up the cost in blood and treasure: To what purpose was this far thrust into the terrible unknown? Better have been content with small achievements nearer home than risk great adventures in the dark land of the Mother of the Gods, now for centuries the home of the Turk whose one hereditary calling is war.

The Greek failure and disappointment, the increased prestige of Mustapha Kemal, are facts with which the Allies must now reckon.

An attitude of mere aloofness and indifference will soon cease to be possible. The decision which Turks and Greeks, for all their long fighting and for all the outpouring of the blood of obscure thousands, have been unable to achieve is now forced upon the Allies. . . . It is a pitiful dilemma with which the Allies are now faced. All this bloodshed has been in vain; the Greek advance has ended as it might have been expected to end if it was pushed forward too far into a primitive region where communications hardly existed and the Turk felt most intimately that he was defending his home. Formal neutrality covering secret hopes in one direction or another, was a poor and evasive policy in view of such a situation as this. The errors and the procrastination of the past are making themselves felt now. At any rate, the moment has come for the Allies to formulate a clear policy in relation to the Near East.

One or other of the combatants may appeal for mediation; but the Allies must not wait for that; they should have their policy ready. "And" the article concludes, "it certainly seems to us that one element of that policy should be that the Greeks should no longer be encouraged to undertake burdens that, with all their courage and all their enterprise, they are totally unable to bear. It will be a matter for thankfulness if this thrust into the heart of Asia Minor does not end in disaster."

## NEWS IN BRIEF.

Negotiations between Lord Curzon and the Egyptian Mission will, it is understood, be resumed in about ten days.

Among the recruits offering for the new voluntary, Bulgarian Army, are said to be three women, who have not been accepted.

The *Morning Post's* Alexandria Correspondent reports that the Government has issued a *communique* announcing that the war bonuses for officials will be prolonged indefinitely.

The Indian Government has instituted proceedings against the Ali brothers and others in respect of inflammatory speeches made at the All-India Khalifate Conference last July, Mahomed Ali and Shaukat Ali have both been arrested.

A rising against the Bolshevist Government of Azerbaijan, in the district of Lenkeren, is reported from Baku. It is stated that the Reds endeavoured unsuccessfully to bribe the insurgents to lay down their arms.

One of the first people in Mosul to volunteer for service in the Irak Army was Haji Hussein Agha al Jaleeli, who is more than seventy years of age, says the *Times of Mesopotamia.*

The Baghdad vernacular papers report that thieves broke into the house of Al Nawwab Saffad Ali Khan, and got away with articles valued at Rs. 300,000, including a watch studded with rubies, necklaces of emeralds and pearls, and a costume ornamented with pearls. There is no clue as to the identity of the robbers.

Under date of September 15, Reuter's New York correspondent reports:—The s.s. King Alexander sailed to-day for Greece with seventeen immigrant passengers, who were brought over here in excess of the quota allowed from Greece for any one month. The ship's agents have filed a complaint with the British Embassy in Washington protesting against the methods employed by the American Government prohibition agents, who raided the vessel on her arrival here, alleging that in this raid two members of the crew, who were unarmed were killed. The vessel is of British registry.

# NEAR EAST BOOKSHELF.

## A PERSIAN POINT OF VIEW.

**LA POLITIQUE EUROPEENNE EN PERSE, Par Dr. Afschar (Librairie Orientale "Transchaehr," Berlin).**

It is always well to have the "other man's point of view." Dr. Afschar's statement of Persia's case will probably commend itself to the bulk of his fellow-countrymen; it certainly enables the reader to understand better what is happening to-day in Persia. The political and diplomatic history of Persia throughout the nineteenth century, he points out, is dominated by the rivalry of Russia and Great Britain. Accordingly he divides his book into two parts, entitled "The Policy of Russia" and "The Policy of England," and examines the two policies more or less in chronological order. With his reading of Russian relations with Persia not much fault can be found. Russia was frankly out for expansion southwards, and the story falls naturally into three periods:—The period of military penetration from the time of Peter the Great to the Treaty of Turkmanchai (1828), the period of peaceful penetration from that date until the occupation of Tauris by Russian troops, and the period of military occupation until the Soviet Government evacuated the country. The narrative, in the form of a sequence of notes, gives the salient features of these different periods. Dr. Afschar would not claim to be an impartial historian, although he endeavours every now and then to explore the ground for explanations of conduct that he does not understand. Thus he indulges in a long dissertation on Capitulations, distinguishing their imposition on Persia as a political move from their existence in Turkey, where he attributes to them a commercial origin not disagreeable at first to the Turks. An English writer, possibly with the laudable intention of soothing susceptibilities, once tried to justify Capitulations on the ground of the difference in outlook between Islam and Christianity. Our author examines this thesis and rightly dismisses it; he does not find that Persia has anything in common with Turkey in the matter of recurrent massacres to justify Capitulations, and finally he comes to the point of view of justice. "It might be urged that Persian justice is not perfect. Suppose for a moment that this were true, what sort of a judge is substituted for the Persian judge?" He then describes the kind of man who might be nominated as (Russian) consul or consular agent, and dwells upon his unfitness as a judge. All this may be true, but it does not affect the real reason for Capitulations, which is the general superiority of Western justice over justice as administered by Orientals. Fortunately in most cases intercourse with the West has raised the level of oriental justice; but the quickest way to secure the withdrawal of Capitulations is to place the administration of justice above reproach.

Dr. Afschar would have made out a stronger case against European policy in Persia, if he could have adduced any evidence of Persia's capacity to manage her own affairs. No doubt if the Persians had been a race of Archangels they would have had difficulty with Russia. To Great Britain Dr. Afschar rightly attributes anxiety to arrest the approach of any Great Power to the Indian frontier. Her policy he describes as one of "rivalry and equilibrium" in relation to other Powers, while being a policy of peaceful penetration as far as Persia herself has been concerned. It would be more correct to say that British policy has always sought to bolster up Persia in order that she might be strong enough of herself to stand against Russia. This is different from a policy of peaceful penetration; but we must allow our author his analysis, because during the period when the British Government was content to play second fiddle to Russia, and acknowledged the latter as a partner, while Russian policy was one of open aggression in Persia and interference with the country's internal affairs, Great Britain went a long way towards forfeiting her claim to the good opinion of Persians.

Dr. Afschar, however, writes under the *idée fixe*, that Great Britain can do nothing right and that there is nothing wrong with Persia. Presumably it is the opinion of Young Persia, which is having free play at the present moment. The results will be seen later. Argument with those who hold the opinion does not carry one very far. At one point our author is magnanimous.

> "We ought not, of course, to disregard the particular situation of Great Britain in Asia. We know the importance of Persia for the protection of the English Colonies and of the territories which should naturally come under English protectorate. But precisely for this reason we believe that a strong and friendly Persia will be more disposed to collaborate with England than a Persia distrustful and impotent."

Admirable. But Dr. Afschar apparently does not recognise that Persia is not strong, and owing to economic and financial reasons, can never become strong of her own accord. Great Britain has made mistakes in handling the Persian situation, but she has never deviated from the desire to help Persia to help herself to become strong. Dr. Afschar inveighs bitterly against the Anglo-Persian Agreement of 1919, which he describes as proof that Great Britain had adopted a "policy of hegemony;" but he makes no attempt to justify his language by an analysis of the terms of the agreement. The subsequent attitude of the British Government has entirely removed the ground from under all his assertions, for Persia has now been left to her own devices. Her first step has been to place herself in the power of the Soviet Government. This volume concludes with the text of the Russo-Persian Treaty of February 26, 1921, which we are led to suppose is in our author's eyes the foundation of Persia's freedom and strength. Great Britain offered Persia various officials as advisers; therein lay evidence of the "policy of hegemony." Persia has rejected British advisers, and has called in Swedes or others, thus conserving her independence and integrity.

It is matter for regret that anyone who has taken the trouble to study the history of his own country and has been able to put his finger on the mistakes of European policy in Persia in the past, is not able to recognise Persia's own shortcomings or the real influences now at work under new methods. For this form of constitutional shortsightedness German-made spectacles are the worst possible remedy.

## PERSONAL AND GENERAL.

**To-Day.**
September 22 (New Style).
September 9 (Old Style).
Moharram 20, 1340 A.H., of the Moslem Calendar.
Elul 19,5681, of the Jewish Calendar.

The Maharajah of Kapurthala will sail for India on October 22, instead of spending the winter at Cannes.

M. Také Jonescu is expected to visit London in the course of the next fortnight.

Mr. Noel Buxton and Mr. Leland Buxton have left this country for Prague and Yugoslavia.

Mr. and Mrs. A. S. Merton have arrived in England from Cairo.

Mr. G. T. Maclean, H.B.M's Consul at Zagreb, is now in England on leave.

Mr. William Erskine, the newly appointed Minister to Bulgaria, who is now in Scotland, expects to leave for Sofia about September 27.

Dr. Stancioff, Bulgarian Minister in London, who is also accredited to the Belgian Government, left for Brussels last week on a brief visit.

M. Demetrius Caclamanos, formerly Greek Minister to the Court of St. James, left London, on September 18 for Paris.

Dr. Stancioff, Bulgarian Minister in London, who is also accredited to the Belgian Government, left for Brussels last week on a brief visit.

M. Boerescu, Minister Plempotentiary and Roumanian Chargé d'affaires in London, is still in France, but is expected to return to England next week.

Sir Regendra Mookerjee, who has been serving on the Indian Railway Commission, and Lady Mookerjee left for Calcutta on September.

Lieutenant-Colonel Sir Francis Younghusband will return to London early next month from Scotland. Lady Younghusband has arrived from Bath.

Sir Harry Brittain, M.P., with a party of British journalists, has left London for Bucharest, at the invitation of the Roumanian Government, to make a tour of the country.

The marriage took place at St. Cuthbert's Church, Philbeach Gardens, on September 17, of Sir Arthur Peel K.C.M.G., to Grace, eldest daughter of Senhor Alberto Landsberg, of Rio de Janeiro, Brazil.

Mr. Theodore Edward Strachey, of 3, Harley-place, Clifton, Bristol, formerly leader of the Bar, at Cawnpore, left £25,890. His bequests included £1,500 to the Governors of Sherborne School on the falling in of his wife's annuity.

A marriage has been arranged between Samuel T. Sheppard, of Bombay, youngest son of the late Philip Sheppard, and of Mrs. Sheppard, 6, Springfield Place, Bath, and Anne, daughter of the late John H. Carpenter, of Teddington, Middlesex.

The engagement is announced between Henry Cecil Jackson, Sudan Political Service, of Portishead House, Portishead, and Margaret Estcourt, elder daughter of Major Estcourt Harrison, late Royal Artillery, and Mrs. Estcourt Harrison, of Chargrove House, near Cheltenham.

A marriage has been arranged, and will take place before the end of October in India, between Herbert Williamson, Indian Civil Service, Acting Deputy Commissioner at Simla, and Winifred Lilian, third daughter of Major-General Edward R. Kenyon, C.B., C.M.G., late R.E.

The Very Rev. William C. Bourchier, Dean of Cashel, has left London, for Bulgaria, to visit the grave of his brother, the late Mr. James D. Bourchier, who for many years was Special Correspondent of *The Times* in Bulgaria. During his visit he will be the guest of the Government of Bulgaria.

Lord Granville, the British Minister in Athens, and the Greek Minister for Foreign Affairs, have signed an agreement providing for the tending of the graves of British officers and men who fell in Greek territory in the war. An Anglo-Greek committee will be appointed to take care of the graves.

An engagement is announced between Robert Duncan Graham Dick, of the Imperial Bank of India, Agra, only son of Lieutenant-Colonel James Roy Dick, of Bolton Mansions, South Kensington, and Elsie Mant Martin, second daughter of Brownlow Rudings Martin, M.B., of Ravenscourt Park, W.

The engagement is announced, and the marriage will shortly take place, between Captain Owen P. Hamilton, 74th Punjabis, only son of Major-General Sir E. O. F. Hamilton, K.C.B., and Lady Hamilton, of Broom Lodge Wokingham, Berks, and Joan Beryl Edwards, eldest daughter of Major and Mrs. F. A. Edwards, of The Grange, Bembridge, Isle of Wight.

On September 6 at Marlow, by the Rev. M. Graves, Rural Dean of Wycombe, uncle of the bride, assisted by the Rev. O. F. Spearing, vicar of the parish, Lt.-Col. G. C. Hodgson, D.S.O., 2-23rd Sikh Pioneers, second son of the late Lt.-Co. G. R. Hodgson, Bombay Staff Corps, and of Mrs. Hodgson, of Bexhill, was married to Mary, eldest daughter of Mr. and Mrs. F. Morten, of Tilecotes, Marow.

The marriage arranged between Captain Leonard Treise Morshead, R. of O. Royal Engineers, of Rangoon, Burma, eldest son of Mr. Leonard Frederick Morshead, I.C.S., and Mrs. Morshead, and grandson of the late Frederick Morshead, of Winchester, and Marjorie France, only daughter of Mr. and Mrs. Frank Colborne Ridley, of 29, Scarsdale Villas, Kensington, will take place in Calcutta at the end of November.

The marriage arranged between Mr. Henry Alwyn Barker, the Rifle Brigade, son of Mr. and Mrs. H. E. Barker, of Alexandria, Egypt, and Ida Sybil, daughter of Mrs. Cumberbatch and the late Mr. H. A. Cumberbatch, C.M.G., H.B.M.'s Consul-General, will take place at St. Mary Abbot's, Kensington, on Saturday, October 1.

The marriage of William Ecklin Henry Grayburn, Talup, Assam, eldest son of the late Mr. William Grayburn and of Mrs. Grayburn, of Fairfield Sandsend, and Betty, eldest daughter of Mr. and Mrs. John Malcolm Aitken, Norwood, Lockerbie, will take place in Wellesley Square Church, Calcutta, early in November.

The Rev. the Marquess of Normanby will officiate at the marriage of Captain H. Pease, D.S.O., Western Arab Corps, Egyptian Army, and the Hon. Cynthia Chaloner, third daughter of Lord and Lady Gisborough, which will take place at Gisborough Parish Church, Yorkshire, on September 28. The bride will be given away by her father and will be attended by six bridesmaids—the Hon. Ursula and the Hon. Elizabeth Chaloner (her sisters), the Hon. Eileen Plunket, Miss Wharton, Miss Margaret Stilwell (cousin), and Miss Margaret Drake. Three little girls—Miss Margaret Bruce Chaloner, niece of the bride and daughter of the late Captain Hume Chaloner, Miss Rachel Pease, and Miss Helen Medlicott—and two pages—Master Bob Long and Master Ingram Pease—will also attend her.

On September 15, at Holy Trinity Chruch, Sloane Street, Lieutenant William Ogilvy Scrymgeour-Wedderburn, D.S.O., R.N., youngest son of the late Mr. and Mrs. Henry Scrymgeour-Wedderburn D.S.C., R.N., youngest son of the late Mr. and Mrs. Henry Scrymgeour-Wedderburn, of Lindorse House, Fife, was married to Joyce, only daughter of the late Colonel R. H. Jenning of 20, Roland Gardens, S.W. The officiating clergy were the Rev. H. R. Anderson, vicar of St. Luke's Church, Redcliffe Square ; the Rev. G. W. Elliott, R.N., and the Rev. P. D. Scott. Lieutenant Alan Robertson-Macdonald acted as best man, and the bride was given away by her brother, Lieutenant A. Jennings, R.N. Among those present were General Sir Bindon and Lady Blood, Sir Michael and Lady O'Dwyer, Lady Napier, Lady Pinhey, and the children of the Maharajah of Patiala.

## APPOINTMENTS, PROMOTIONS, &c.

It is officially announced that Major B. Temple, the Commercial Secretary for Persia, resumed duty at Teheran on August 22.

The King has appointed Mr. Claud Frederick William Russell to be Envoy Extraordinary and Minister Plenipotentiary to her Majesty the Empress of Ethiopia (Abyssinia). The appointment will date from September 20.

Mr. Bhupendranath Basu, the Bengali member of of Council, is going out to India in November, and though he does so on leave, it is not expected that he wil return to his work in Whitehall, having regard to the state of his health and to the call there is for his service to India in Bengal.

Mr. H. C. Norman, H.M. Minister at Teheran, is leaving Persia very shortly, and will be succeeded by Sir Percy Loraine. Sir Percy ioined the Diplomatic Service in 1904, and has served in Teheran before (1907-1909), going there from Constantinople (his first appointment). He has also served in Peking, Rome, and Paris.

Sir C. Sankaran Nair has arranged to leave London on November 18 on a visit to India. Before his departure, says *The Times*, he will resign his membership of the India Council, to which he was appointed last year. Sir Sankaran Nair's resignation is not due to any question of public policy, but to literary work, for which he desires freedom.

## MARRIAGE OF M. VENIZELOS.

The first portion of the marriage took place on September 14, at St. Pancras Registry Office, of M. Eleftherios Venizelos, formerly Prime Minister of Greece and son of the late M. Kyriakos Venizelos, and Miss Helena Schilizzi, daughter of the late Mr. John Schilizzi and of Mrs. Schilizzi. The witnesses of the marriage were Mr. and Mrs. Stephen Schilizzi (brother and sister-in-law of the bride), Mrs. Schilizzi, the bride's mother, Lady Crosfield, Mrs. Elliadi, and Miss Elliadi.

The religious ceremony took place the following day at West Hill, Highgate, the residence of Sir Arthur and Lady Crosfield. Dr. Pagonis, the Archimandrite of the Greek Church, Bayswater, officiated. The bride, was attended by Lady Crosfield, and the sponsors were Mrs. Elliadi (mother of Lady Crosfield), and Miss Elliadi. A number of relatives and friends were present, including the two sons of M. Venizelos. In the afternoon M. and Madame Veniselos left London for the Continent, and after a brief stay, they intend to go to America and pay a long visit to California.

## OBITUARY.

A Reuter telegram from Cairo states that the death is announced of the Sultan's brother, Prince Mahmud Hamdi, one of the most familiar figures in Cairo, where he chiefly frequented British circles.

The death is announced at Exmouth of Sir Thomas Salter Pyne, who for several years was chief engineer to the Government of Afghanistan. Born in 1860 he served with a mercantile firm in India from 1883 to 1885, and in the latter year proceeded to Afghanistan, where he put down works for the manufacture of guns, rifles ammunition and other industrial products. Sir Thomas acted as ambassador for the Ameer of Afghanistan to the Viceroy of India, and at the satisfactory conclusion of the negotiations received a knighthood. During the war, Sir Thomas was employed at the Ministry of Munitions.

## THE PRINCE'S INDIAN VISIT.

The battle-cruiser Renown in which the Prince of Wales will go to India, was commissioned at Portsmouth last week by Captain the Hon. Herbert Meade, D.S.O. She leaves for Portland on September 27 for commissioning trials, at the conclusion of which she will return and prepare to embark the Prince on October 26. It is stated that very little money has been spent on the ship in preparation for the coming voyage.

## THE TRAGEDY OF ASIA MINOR.

The tragedy of Asia Minor is running its inevitable course. Sooner or later the point had to be reached when the Greek Army could go no farther. Whether it happened before or after reaching Angora mattered little. Greece had embarked upon an enterprise to which there was no real goal. She imagined, perhaps, that the establishment beyond all challenge of Greek military superiority over the Nationalists would create one; the annihilation of the Kemalist Army or the capture of Mustapha Kemal himself held out the promise of a still more desirable ending. In each case, however, the Greeks would have been beating the air; the two peoples are too evenly matched for either to accept permanent defeat at the hands of the other. They would have left no lasting impression on the Turks other than an intensification of hatred, which must have had its aftermath. Even with the dictation of peace terms in Angora the moment would have come for the Greek Army to turn its face homeward. And then? In Athens, no doubt, it was held that in such circumstances the future could be allowed to take care of itself. There can have been no serious attempt to work out the problem to a logical conclusion. The first few moves, it was argued, could not fail to be successful from a military point of view; after that Greece must trust to luck. It was forgotten that the Turkish question could never be settled by Greece alone; she had come very near to accomplishing the feat with the Treaty of Sèvres, but unfortunately for her that Treaty proved to be no settlement. The Allies, accordingly, had had to recover their freedom of action; a fresh attempt to settle the question could only be less in favour of the Greeks than was the Treaty of Sèvres. Here then was a further stultification of any campaign against the Nationalists. Just as in the war of 1897 the Turks were not allowed by the Great Powers to keep Thessaly after their victory over the Greeks, so now there could be no question of Greece keeping the part of Asia Minor which her troops had victoriously overrun. In the increase of territory that the Greek Government might hope to extort from the Entente Powers after the defeat of Mustapha Kemal, over and above the terms that it was offered at the London Conference in February, was there adequate justification for a campaign in Asia Minor, with its sacrifice of Greek life, its drain on the Greek exchequer? We have urged all along, in the interests of Greece herself, that there was none. The whole enterprise was a gamble in which Greece stood to risk everything and gain nothing.

Instead of a victorious ending to the military venture Greece may yet be hard put to it to avoid a serious reverse. The moment for turning back has arrived before the capture of Angora. No amount of sophistry can prevent the withdrawal from being interpreted as a failure for Greek arms, for the simple reason that the retention of Angora will be acclaimed in Asia Minor and elsewhere as a triumph for Mustapha Kemal. Unless the Greeks can resume the offensive and change the course of the war once more, they have failed in their purpose, which was not to overrun Turkish territory, but to prick what they regarded as the Nationalist bubble, and to impose terms on Mustapha Kemal. Should they be compelled to abandon all the ground they have occupied the effect on the Nationalist leader, as far as his relations with the Greeks are concerned, could only be to leave him more intransigent than ever. In his future dealings with the Allies, however, we must hope that time, as well as the stress of the Greek campaign will have brought him wisdom. In fairness to Mustapha Kemal it has to be admitted that he showed some measure of reasonableness at the time of the London Conference. It was thrown to the winds only when the Greeks moved out to attack him, or at least manoeuvred to improve their military position in Asia Minor before the expiry of the month which the London Conference allowed for the replies of the two parties. Apart from the Treaty of Sèvres, which the Allies have agreed to modify, the Nationalists have a grievance against the latter for having allowed their mandatory to resume hostilities without any formal denunciation of the truce agreed upon at the calling of the Conference. But these are minor considerations compared with the problem of the Near Eastern settlement, and we trust that both the Turks and the Allies will see the matter in this light.

The first step to be taken is for the Allies to resume control. They abdicated their authority when they allowed Greek and Turk to go to war against one another, and that authority had already been weakened when the settlement of the Turkish question was spun out for two years. By now the Nationalists will have learnt afresh their limitations, and if a settlement which has some claim to being just and practicable is imposed upon them, there should be little difficulty in securing its acceptance. There can be no such settlement, however, unless the Entente Governments agree to pull together. If a compromise cannot be effected by friendly agreement, the time has come for Great Britain to shoulder her responsibilities in the matter. To her failure in this respect are due in no small measure the intensification of the unrest in India and the uncertainty in Egypt, Palestine, and Mesopotamia. A satisfactory settlement of the whole Near Eastern question would have gone a long way by now towards improving the economic position in South-Eastern and Central Europe, which in turn would have reacted upon the industrial situation in Great Britain. The treaty of Sèvres was based on the idea that the best way to settle the Turkish question was to allow the Greeks to take charge of the Turks, and to this end the Allies undertook to weight the scales against the Turks, regardless of considerations of pure justice, geography and economic principles. The attempt failed, and there is now only one alternative for the time being—what may happen fifty or a hundred years hence when Greece is a more advanced nation need not concern the world to-day. The Allies must take charge of the Turks themselves; to reduce friction to a minimum there should be no land frontier between Greeks and Turks; the peculiar position of Smyrna can be met by making it an autonomous State and free port; definite provision for the welfare of minorities in Turkey must be made by means of some form of European supervision to be terminated after a period of good behaviour; the internationalisation of the Straits will stand as at present arranged. In urging this settlement we do not lose sight of Turkey's past, but we hold that Europe has her share of blame for what Turkey has been. It will be time to throw stones at the Turks when Constantinople is free from the intrigues of the Great Powers. The Turks ask for a fresh chance in the light of the principles enunciated by the Allies during the war. They must be given it. If they show that they have learnt nothing, Europe can then deal finally with them, with a clear conscience, which she lacks to-day. Nor must Greece be forgotten. For her present troubles also the Entente Governments are largely responsible. She ought to be accorded all

Digitized by Google

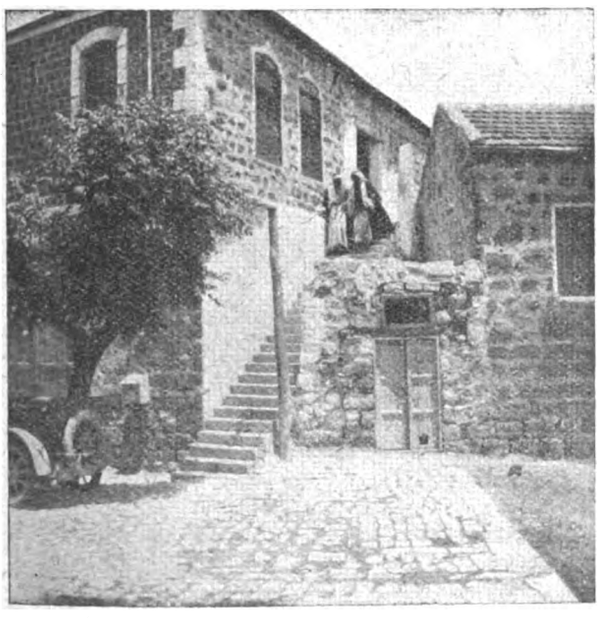
possible assistance in gettting back to a straightforward practical national policy. She has recovered under King Constantine much of the unity which she lost when he left the country, and she needs probably only financial help to forget her territorial aspirations and to concentrate on her disorganised finances. and economic development.

## BEISAN.

(*From a Correspondent.*)

The excavations to be carried out at Beisan (Scythopolis), in N. Palestine should yield results of considerable interest. The war has stripped the neighbourhood of many trees, but the well-watered plain in which the village stands, with fields of Indian corn, its picturesque ruins, and pleasant views of the Jordan Valley, will be remembered by travellers who have strayed out of beaten tracks. Beisan—the Bethshan of Scripture—took its name Scythopolis from an occupation by Scythians in the 7th Century B.C., when an invading army swept through to the borders of Egypt. Scythian settlers no doubt were added to its mixed population of Canaanites, Assyrians, and others. It was the largest city of the Decapolis League. Under the later Roman Empire it was the seat of an Archbishop of " Palaestina Secunda." During the Crusades it was known by both its names. It was reduced and burnt by Saleh-ed-Dîn (Saladin). Irby and Mangles a hundred years ago gave an interesting account of what remained, of the theatre, city walls and gates, and necropolis. In their explorations they found ruins of another large city, about two-thirds the size of Beisan. No doubt the whole region will be examined wth a view to future excavation.

At present Beisan contains about 2,500 inhabitants,



**Government Offices, Beisan.**

a large majority being Moslems, with a fair number of Christians, and about 60 Jews. To the east and south are numerous Bedouin belonging to the Ghazawieh, Sagr, and some other tribes. The Sagr encampments extend as far westwards as Shatta, and in the summer their tribe migrates down the Jordan Valley. They are an element of insecurity, as they not only assist marauders from across the Jordan, but themselves participate in raids. Peaceful inhabitants live in more or less terror of these Arabs, and of the blood feuds to which hostilities too often lead.

Beisan is fortunate in possessing an intelligent and energetic president of the municipality (*Reis el-beledieh*). el-Hadj Mahmoud, who was formerly a sergeant-major in the Turkish gendarmerie. He boasts that under Ottoman rule he could keep the whole of the Jordan valley lying within his district in order with ten men, a statement which one can well believe. He has taken an active part in the carrying out of various progressive local schemes.

West by south of Beisan is a large marsh formed by the confluent waters of two springs. A project for diverting the inflow has been carried out by cutting two channels, each of some 3,000 metres in length. These works were completed and opened about a month ago. As a result about 200 *feddans* of land have been reclaimed

**Beisan Main Street.**

and will now be available for cultivation of cotton or other crops. Most important, perhaps, of all, is the fact that the work is a considerable step towards the much-needed elimination of malaria, which is the curse of the place, and which claims many victims.

A magnificent view of the Jordan valley may be obtained from the old Crusader fortress of Kanhat el Hawa, which lies some 5 or 6 miles north of Beisan.

The progress already made at Beisan is an excellent illustration of the results of British administration in a place where, as elsewhere, hopeless stagnation had hitherto prevailed. Beisan could indeed be converted into a delightful and attractive place of residence, if money were available for carrying out various improvements which suggest themselves in this really charming spot.

**Beisan. In Main Street. The Sheikh Mutlak Irsan, of the Sagr Bedouin.**

## INDIAN AGITATORS ARRESTED.

The India Office announces that news has been received from the Government of India of the arrest of Mohamed Ali on September 14, at Waltair, Northern Madras, and of Dr. Kitchlew at Simla on the following day. These arrests have been made in accordance with a decision of the Government of India to institute proceedings against Mohamed Ali and others in respect of their speeches made and the resolutions passed at the All-India Khalifate Conference held at Karachi in July.

One resolution declared it was wholly *haram* (unlawful) for any Moslem at this time to remain or enlist in the Indian Army or to get others enlisted in it. The charges are understood to be criminal conspiracy, attempts to seduce troops, and defamation. One of the other men charged is Shaukat Ali, the elder brother of Mohamed Ali. The decision to prosecute was taken before the Moplah rising, but the actual institution of proceedings was delayed by the necessity of obtaining evidence as to the exact language used by the accused, and of considering the bearing of the law.

## THE OPTIMIST.

*By William Ransted Berry.*

He sat cross-legged in the thin shade of a poplar tree—an aged Turk, fezed and wide-trousered, bearded like the pard. All about sprawled the blackened ruins of a native village; a solemn stork brooded upon the stump of what had beeen a small mud-brick minaret.

Dismounting from my horse, which I left to graze where he would, I too sat down in the shade of the poplar-tree, though there were scarcely enough for two. The old Turk received me with a courtly bow, the fingers of his right hand fluttering from heart, to lips, to forehead, in the graceful gesture peculiar to an Eastern greeting.

"You are welcome, Effendim," he said gravely, handing me with a second bow his box of rank tobacco and a few poor wisps of cigarette paper.

I rolled myself a cigarette and lit it from the stump of one that smouldered in his fingers.

"Is no one of this village left but you, Baba?" I asked.

The old man threw back his head and clicked with his tongue in the native fashion of negation.

"No, Effendim, not one—except Hadji-lek-lek there." He nodded in the direction of the stork, who thereupon pointed his beak at the sky and clapped it with a mournful wooden sound, like castanets. "Most are dead; a few—a very few, are hiding in the hills."

"Yet you remain, Baba?" I looked about me at the desolation where scarce one stone remained upon another; a large green lizard scuttled up a ruined wall with a dry rustling noise and stopped to look at us. "—Here, where none but lizards inhabit the former homes of men?"

"And why not, Effendim? I am an old man and a feeble. It is not hard to die where one was born, if Allah wills it. He is the wisest, and will provide."

He rolled a cigarette and lit it with flint and tinder.

"Yet Allah first took away," I said, indicating with a sweep of my arm our surroundings.

"Ah, Effendim, ripe corn were we between two millstones. Allah must have nodded while the millstones ground us."

The old man's eyes sought the great wooded hills to East and West which flanked the little valley wherein we sat. He pointed them out in turn.

"On these hillls, Effendim, were the Kemalists, entrenched and with artillery; and on those the Greeks. Thus our village was in 'no man's land,' as you can see."

"It is sad to remember that those who should have been our brothers harmed us first. A band of wild Circassians—part of Kemal Pasha's irregular cavalry—swept through our village like a tornado, plundering, raping, killing. We called on Allah, but so did they. Night fell on gutted houses, and the wailing of women and children; the blood of most of our young men—a few had been dragged off at the heels of Circassian ponies to swell the ranks of Kemal—lay in black pools under the moon.

"Next came the shelling. Day and night the great shells droned overhead from hill-crest to hill-crest. Many dropped on us, for each side feared the village offered shelter to the other. Our houses fell like cardboard; fire and death filled every hour. Yet some of us remained.

"At last Kemal retreated. The Greeks swarmed down into our valley like locusts—but such locusts as you never saw, armed with fire and sword, and searching like blood-hounds for a red fez or a veiled face. They found them, too, all that were left. But they left none. When the moon rose that night—I remember it was a bright crescent one, the emblem of Turkey—there was no sound in all this village but the rustle of smouldering embers, nor any living thing but crickets—and myself."

The old Turk stroked his beard complacently.

"How did you happen to survive?" I asked him presently.

A pious mien, in which there lurked a gentle artfulness, suffused his countenance as he pointed to the hollow mud-brick stump whereon the stork now stood on one foot and appeared to slumber.

"I placed myself in Allah's keeping," he replied, "inside our broken minaret. Allah alone knows why no one thought to look within it. Snug and safe I lay until morning came when Hadji-lek-lek, standing on the rim where he is now, looked down as you might do into a well and clapped his bill at me. Sometimes I think he was a messenger from Allah sent to tell me that my life was spared."

The shadow of the poplar treee had lengthened considerably. I caught my horse and mounted, for I still had far to go before sundown.

The old Turk rose and once more handed me his tobacco box. I am glad to recollect that before I handed it back to him I emptied into it the contents of my own tobacco pouch.

"Where do you live now, Baba?" I asked, as I gathered up my reins.

"Sometimes" he answered, "in an empty tomb cut in the hill-side where the ancients buried their dead—it makes a famous house in winter. Other times," here his eyes twinkled as he looked up at me, "in the minaret."

"How do you live?"

"Allah provides." he said soberly. Then a smile, confiding as a child's played among his wrinkles. "Also, I have two bees, a queen bee and one other. In time, if Allah wills, I hope to raise a swarm and eat the honey."

"Allah and your bees abide with you, Baba," I said, turning my horse's head down the valley.

"And may he ride with you, Effendim." answered the old man, as his fingers fluttered once again from heart to lips, to forehead.

# COMMERCIAL & FINANCIAL SECTION.

## NOTES AND NEWS.

Devonshire Square.
E.C. 2,

**Better Outlook in Egypt.**

It is very satisfactory to learn from our Cairo Correspondent that at last there are signs of an improvement in trade conditions in Egypt. The economic depression in that centre has been very pronounced, more so in fact that in many other regions owing to local factors, which are too well known to be enumerated, and to the unfavourable conditions in neighbouring markets. The accumulated stocks of goods are now, however, beginning to dwindle, and provided no untoward factors arise, the market will in due course offer excellent opportunities for British enterprise. The fact that there is no exchange problem to be contended with should be an additional inducement to our exporters to take advantage of the first indications of reviving trade there.

**Tourists and Cotton.**

The extent of the market revival will depend, of course, on the price of cotton and the tourist season. Speculations as to the future of cotton are apt to be a thankless task, but at the moment there would appear to be justification for the assumption that higher prices are in view as a result of the anticipated shortage of the American crop. Still, as against this it has to be remembered that visible stocks are very large, and trade outlets for the moment restricted. As regards the tourist season the prospects would appear to be excellent. Reports are forthcoming of record bookings from America and this country also can be looked to, despite the high taxes and other aftermaths of the Great War, to furnish a very respectable contingent.

**The Ter Meulen Scheme.**

It is a long time since we have heard anything of the Ter Meulen scheme, and I fear that in this case no news is scarcely likely to be good news. The application of the scheme depends upon the issuing of bonds by countries with adverse exchanges, and so far as I know no State has taken any steps in this direction. The scheme itself is good enough, but arrangements should have been made to ensure its utilisation by the countries concerned before it was launched. It is surely little short of an absurdity that business houses should be expected to bring pressure to bear to ensure the utilisation of an official scheme. That is, or should be, the function of its sponsor the League of Nations.

**The Trade Outlook.**

According to Earl Grey there is unlikely to be a real trade revival for two years, and for that reason the autumn of 1923 has been fixed for the commencement of the voyage of the British Trade Ship which is to go on a tour of the principal ports lasting eighteen months. The only relief that Lord Grey offers for this uninviting prospect is that the intervening period may show what he termed a fictitious improvement. Happily the most experienced prophets are liable to be wrong in these matters, and it does not require a great stretch of imagination to picture an earlier trade revival.

**The Roumanian Exchange.**

A further lapse in the value of the *leu* has caused the Roumanian exchange to run its Bulgarian neighbour close. It is a tragedy that these two countries should be handicapped with an exchange rate in the vicinity of 400 for the one and 550 for the other. One would like to believe that the economic infallibility of exchange quotations has for once broken down, but the attempt to connect the Roumanian fall with artificial or political influences is not convincing. The news of a Bolshevist declaration of war on Roumania may have fluttered financial dovecots, but forced sales, the calling in of a French loan on delivery of grain, which has fallen in arrears, and transport difficulties tell their own tale. I wish all the Near Eastern States could be brought to realize that their troubles, which are due to war, are only likely to be got rid of by real peace, externally and internally. Political parties sank their differences for the sake of the war; it is no less urgent to sink their anomosities in the sacred cause of peace so that the country can get on with the work of reconstruction.

**Indo Burma Oilfields (1920).**

The Indo Burma Oilfields (1920) are making this week an issue of £250,000 ten per cent. Convertible First Mortgage Debenture Stock at par, repayable on June 30, 1924, at 110. Of the total amount £55,000 have been subscribed in India, leaving £195,000 for the English market. The Company was formed in February 1920, with an authorised capital of £2,000,000, of which £1,500,000 was then issued. Expenditure on properties and purchases not included in the original programme of the Company, coupled with the increased cost of all plant and machinery during last year, exhausted funds which would otherwise have been available for development work. The present issue of half the balance of the authorised capital is made to replace funds for the purchases referred to and to cover the part accruing to the Company of the cost of erecting a joint refinery with another oil company. With the £250,000 the managing agents are satisfied that the self-supporting stage can be reached. On another page in this issue will be found a statement of the Company's present position, and it will be seen that promising results have been obtained from a subsidiary area, before it has been possible to tap the proved property at Yenangyaung.

**Commentator.**

---

A new agreement has been arrived at between the Compagnie des Messageries Maritimes and the French Government, which ensures the continuance of the various pre-war services of the Company from Marseilles to the Mediterranean, East Africa, Madagascar, Mauritius, Colombo, Straits, China, Japan, and Australia.

REPORTS FROM OUR OWN CORRESPONDENTS.

## EGYPT.

*Cairo, September 3.*

**Brighter Outlook.**

The commercial barometer during the past few days has indicated a general improvement. Much, of course, depends upon the fate of the negotiations—in fact, the fate of these official discussions fundamentally affects every phase of life in Egypt. Meanwhile there has been a sharp rise in cotton to 36 dollars, and the week has closed with business brisk by comparison with recent months. The immediate consequence of the rise has been to ease the tightness of money, and one finds a much more optimistic tone amongst practically all sections of business men. Retailers report that the demand in the emporiums has shown a slight increase, and they are confident that what may be termed the partial buying strike during the summer will now cause a reaction. This factor, in conjunction with the approach of the winter season, when retail buying always grows heavier, is leading them to believe that—subject to no untoward political developments—the worst period of stringency is over. Apart from the political situation the only cloud is the dispute between the United States' Shipping Board and the Liverpool Conference Lines, but I learn from a reliable source to-day that the efforts towards peace are making good progress and that well-informed circles would not be surprised at an early settlement.

## ROUMANIA.

*Bucharest, August 30.*

**An American Mission.**

A Cluj paper announces the early arrival of a commission of leading American manufacturers, sent by their Government to study the economic situation in this country. The mission will visit the commercial and industrial centres throughout the country.

**Miscellaneous.**

A gang of armed thieves entered the offices of the Austra-Romana Oil Company at Moreni in the daytime and, ordering the employés under threat not to move, seized the keys of the safe, and laid hands on the available cash amounting to a few hundred thousand lei and then disappeared. A number of gendarmes started in pursuit of them.

At the annual cattle market which was held last week at Somcutza-Mare, in Transylvania, out of four thousand head of cattle that were brought for sale, only 350 found buyers. The price of a good cow varied between 300-400 lei.

The Government has fixed October 27 as the date by which the German, Austrian and Hungarian insurance companies must have liquidated their operations in this country.

*Bucharest, September 6.*

**Roumano-Yugoslav Relations.**

The work of the Roumano-Yugoslav Technical Commission has now been completed. The proposals put forward provide for the construction of a railway line connecting the capitals of the two countries, crossing the Danube by a bridge to be built at Semendria, on Yugoslav territory, and for the construction later on of a second line which would cross the Danube at Gruja, in Roumanian territory. The postal, telephonic, and telegraphic connections are to be developed, and a special wireless service is to be organised in Yugoslavia to permit of communication with Roumania. It is further proposed that mail carriages should be attached to each train, and that a telegraph line should be constructed between Turnu-Severin and Belgrade to link up Belgrade and Bucharest. As regards aerial communications Roumania will be included in the Paris-Prague-Belgrade-Constantinople route.

**Miscellaneous.**

New regulations regarding imports are under consideration. It is rumoured that importation is to be free, and that only luxury articles will be heavily taxed.

The announcement that M. Titulescu, the Minister of Finance, now at St. Moritz, is endeavouring to negotiate a loan of 100 million francs in Paris is contradicted.

The Entente Powers propose to establish at Jassy a great centre for commodities and merchandise intended for Russia.

A group of Belgian financiers have just arranged a loan of 57 million lei for the town of Bucharest.

## BULGARIA.

*Sofia, September 10.*

**Question of Reparations.**

When M. Tourlakoff, the Finance Minister, visited London and Paris recently he asked that the payment of reparations should be postponed for three years. While no definite answer was given M. Tourlakoff appears optimistic regarding the prospects. It is stated in local financial circles that the Reparations Commission are in favour of time being granted to Bulgaria for the fulfilment of the financial clauses of the Treaty of Neuilly. The effects of delay should be far-reaching, as the country would have time to set its house in order and would be able to embark on industrial and commercial schemes for the development of the natural wealth of the country.

**The Leva.**

The leva still continues its downward course, and yesterday the rate on London was 525. The Government hold the view that speculation is the chief cause of the fall. M. Stambolisky stated recently that there is a banking house at Vienna that occupies itself solely with speculation in the Bulgarian exchange, and that a young Jew had made 900,000 levas in a few minutes.

## CYPRUS.

*Nicosia, August 30.*

**The Asbestos Mines.**

The company which is purchasing the mines on Troodos, acquires for £125,000 properties and rights for which the Cypriot Company paid £16,000. The latter have, therefore, made an excellent bargain. The papers, while regretting that the working of the mines has passed out of Cypriot hands, are gratified by the prospect of a greatly expanded activity, which will provide labour on a much larger scale for the people at a time when such employment is badly needed. There is great depression in the poorer parts of the island.

WONDERFUL EXHIBITS
at the
GROCERS' EXHIBITION
(*Royal Agricultural Hall, Sept. 17th to 24th, 1921.*)
FLUGEL SODA FOUNTAINS.
Stand. Bay 23. Arcade Entrance.
Actual working models will be on view showing how the finest ærated fruit drinks are automatically manufactured at a minimum of cost and trouble. The Flugel Soda Fountain automatically fills every drop of water and each drop is ærated while it is being filtered. Every one interested in the production and sale of mineral water drinks should ensure seeing this remarkable machine, and if unable to visit the Exhibition they should send for the special free illustrated booklet (now ready) giving a full description of these exhibits. You will be more than interested. Write to—
FLUGEL & CO., LTD., (Dept N 14),
69, Green Lanes, London, N.16.
and mark envelope "Exhibition."

## SYRIA.

*Beyrout, August 25.*

**Beyrout-Haifa Rivalry.**

A campaign has lately been raging in the Beyrout Press over the danger that Beyrout was running from the competition of Haifa. The authorities here have come in for a good deal of sharp criticism for what was described as suicidal apathy on their part. That the import trade of Beyrout has been declining in the same ratio as Haifa's import trade has been rising is an evident fact. The reasons for this diversion are stated to be the following :—

1.—The Palestine authorities, with the commendable aim of encouraging building enterprise, whether for the repair of ruined dwellings or the erection of new ones, or for the carrying out of works of public utility, have reduced the customs duty on building material, such as cement, hydraulic lime, bricks, iron girders, timber, tiles, etc. to 3 per cent. ; while on the ordinary merchandise from Egypt they are levying the old Turkish duty of 8 per cent. without the supplementary 3 per cent. On the other hand, the authorities at Beyrout are not only levying the full duty of 11 per cent. on all merchandise, including building material, but basing their valuation not on the original invoice price but on the current market price, which increases the nominal duty of 11 per cent by sometimes 40 per cent., and even 70 per cent. In addition to this, there are the harbour dues at Beyrout which goods entering Haifa do not have to pay.

2.—Railway tonnage from Beyrout to Damascus and Aleppo was almost completely requisitioned for military transport during the whole of 1920, and part of 1921, and now that railway tonnage has been released for civilian traffic the railway rates are kept on a prohibitive scale, so much so, indeed, that merchants have been finding it cheaper to transport grain from Damascus to the Lebanon and Beyrout by camel or cart, than by rail. But the supreme blow to the Beyrout trade was the recent issue of an *arrete* reducing the rates by that section of the Hejaz Railway under French control, which lent additional impetus to the competitive trade movement between Haifa and Damascus. This measure seems to have been taken by the Military who may have been actuated by a selfish desire for the cheaper transport of the large quantities of barley they had been buying from Southern Palestine.

When it is known that French policy has always aimed at the maintenance of the supremacy of Beyrout, even before it became the capital of Greater Lebanon—looked upon as the stronghold of French influence—such indifference to the loss of Beyrout's commercial position seems an inexplicable mystery.

**Cut Rates.** *Beyrout September 2.*

The authorities here have at last waked up to the danger referred to in my previous letter, and have redressed matters with a vengeance by a clean cut of the rates on the French Railways. Against the freight of £E20 per truck of 15 tons on the Hejaz Railway from Damascus to Haifa the French Railways are now quoting £E15, from Damascus to Beyrout.

The establishment of a severe customs barrier is said also to be contemplated, so as to leave no chance for Haifa to compete in transit goods to Damascus and neighbourhood. It is hoped that the authorities will awaken shortly to the necessity of reforming the present system of levying dues, and follow the footsteps of the Haifa Customs authorities. In regard to building material, a reduced rate is in the long run a gain to the Custom House itself. Destruction during the war in the Lebanon has been on a far larger scale than in Palestine ; and in Beyrout itself, the rent crisis is so acute that the remedy is urgent. So long as the duty is prohibitive there will be little or no building, and consequently no duty collected.

This principle applies, to a certain extent, to other classes of merchandise. The less goods are burdened with onerous dues the greater the consumption. The fable of the golden egg is an apt illustration.

## INDIAN RAILWAY CONTROL.

### Drastic Reforms Proposed.

Far-reaching changes in the organisation of the Indian railway system are recommended by the Committee appointed last October by the Government of India. The following is a summary of the report :—

The Committee is of the opinion that the existing Indian railway system is entirely inadequate to meet the needs of the country, and that there is urgent need of drastic measures of reform and reconstruction. They consider that the defects are due primarily to the failure of the Government to provide adequate funds both for capital works and for renewals, and are the inevitable results of a paralysing system, which has not been developed to meet the requirements of a great commercial enterprise. Stress is laid on the fact that railway investment is directly profitable, and also indirectly through the benefit to the country.

The subordinate position of the railway administration, it is maintained, is not in accord with its financial importance. The Member of Council for Commerce, with his present multifarious duties, cannot adequately attend to the railways, with the result that the Railway Board is in the position of a stepchild. It is overloaded with routine and trammelled by unnecessary restrictions and does not exercise the necessary powers in matters of policy. As at present organised, it cannot possess the necessary local knowledge and does not enjoy the public confidence. Engineering inspection is overdone. Greater provision for inspection of traffic is especially needed. Accounts and statistics are in need of radical reforms. Railway relations with the public are unsatisfactory, and greater control of rates and fares is necessary. The provision in the Railways Act for Commissions is unsuitable. Delays in settling claims are serious. Bribery in connection with wagon allotments has grown into a system of organised blackmail. Third-class passengers' grievances require particular attention.

The Committee recommend the addition to the Governor-General's Council of a Member for Communications, to be responsible for railways, ports, inland navigation, road transport so far as it is a central subject, and posts and telegraphs. The member must be an experienced administrator, but not necessarily a technical expert. The Railway Board to be replaced by a Railway Commission, with a technical railway man as Chief Commissioner, who would be responsible, under the Member of Council, for arriving at decisions on technical questions, and for advising the Member on matters of railway policy, and would have the status of a Secretary to Government. He would be assisted by four Commissioners, one Financial Commissioner as Second in Command at headquarters, and in charge of Finance, Statistics, Secretariat and Establishment, and three Railway Commissioners in charge respectively of Western, Eastern, and Southern territorial divisions. The Divisional Commissioners to be normally engaged at headquarters, but to devote a substantial portion of their time to personal visits to their divisions. The technical staff at headquarters should be strengthened, especially on the traffic side, and should comprise six Directors in charge respectively of Accounts, Civil Engineering, Mechanical Engineering, Traffic (operating), Traffic (commercial), and Ports, Inland Navigation and Road Transport.

The Finance Department ought to cease to control the internal finance of railways, and the Railway Budget should be separate, and should be presented to the Legislative Assembly by the Member in Charge of Communications. The Railway Department should be responsible for earning and expending its own income, and, after providing such net revenue as may be required to meet the interest on the railway debt, would regulate the disposal of the balance, being left free to devote it to new capital purposes, to reserves, or to the reduction of rates or the improvement of services. Subject to independent audit by the Government of India, the

Digitized by Google

Railway Department should employ its own Accounting Staff. The reconstituted Railway Department should be relieved from control by the India Office and the Government of India except on large questions of finance and general policy. It should delegate increased powers of day-to-day management to the Railway Administrations, but, on the other hand, should be given greater powers in matters such as the initiation and enforcement of reforms and some control over the appointment of the principal officers.

To give the Indian public a voice in railway management, the Committee recommend the establishment, as soon as possible, of one Central and a number of Local Advisory Councils, the former, under the chairmanship of the Member for Communications, to consist of not more than 25 members, three or four representing the Departments of Government concerned, eight or nine to be nominated by trade and industrial associations, and a similar number, to represent agricultural interests and the travelling public, to be nominated by the Provincial Legislative Councils. The Local Advisory Councils to be about half the size of the Central Advisory Council and similar in constitution, meeting either at the headquarters of each railway with the Agent as chairman, or at each important railway centre, the agents of all the railways concerned being members and one of them chairman.

A Rates Tribunal, with an experienced lawyer as chairman, and one railway and one commercial member to be established with jurisdiction over all questions of reasonableness of rates and facilities. The Tribunal to investigate conditions attached to owners' and railway risk notes and to frame standard forms. In certain circumstances an appeal to lie against the decision of the Rates Tribunal to the Governor-General in Council. The utmost possible efforts to be made to stamp out the serious and widespread abuses connected with the allocation of wagons; also to minimise the inconveniences of lower-class passengers by the loan of stock from one railway to another when required by enforcing cleanliness and the provision of drinking water, and by the extended employment of passenger superintendents. The Committee consider a general and substantial increase in rates and fares overdue, and recommend such an increase, the present surtax on railway traffic, which is bad in principle, being withdrawn. Greater facilities are necessary for training Indians for superior posts and the process of their employment to be accelerated.

Branch lines should be as far as possible constructed and worked by main lines, and separate Branch Line Companies should be encouraged only in cases where the State is unable or unwilling to provide funds. When financial conditions permit of railway development, Indian States should be called into Council and invited to take part in working out a common scheme of development.

The Committee are unanimous in advising that the system of management by guaranteed companies of English domicile should not be continued after the termination of their present contracts, and that management by a combination of English and Indian domiciled companies is impracticable. But they are divided as to the relative merits of management by the State and by India domiciled companies.

The Chairman, Mr. Sastri, Mr. Hiley, Mr. Purshotamdas and Mr. Tuke are in favour of direct State management, provided that the Committee's recommendations for financial and administrative reforms are substantially adopted. They are opposed to Indian domiciled companies, mainly on the broad ground that, as a matter of practical politics, conpanies substantially independent cannot be formed in India to work the State-owned lines, and that, without such independence, the advantages claimed for private enterprise are lost. They recommend accordingly that, as and when the English guaranteed companies' contracts fall in, the undertakings should be managed directly by the State. All future capital to be raised directly by the Central Government. Funds required to put the existing railways into proper shape should be raised, even at to-day's prices, as fast as they can be economically spent. The immediate raising of capital for extensions is not recommended. Government borrowing to be by ordinary sterling loans in England and rupee loans earmarked for railway purposes in India. A systematic organisation should be established to familiarise Indians with the idea of subscribing to Government loans, and specially to interest the masses of people not hitherto accustomed to investment.

Sir Henry Burt, Sir Rajendra Nath Mookerjee, Sir Arthur Anderson, Sir George Godfrey and Sir H. Ledgard, are against the Government being committed to a policy of State management only, and recommend the continuance of the system of State and company management side by side, with Indian companies in place of English companies. They accordingly propose a scheme for creating Indian domiciled companies to manage the East Indian Railway and possibly the Great Indian Peninsula Railway, the lines to be considered on their merits later when their contracts become terminable. They agree that much capital must be raised directly by the Central Government, but urge also the fullest use of Indian domiciled companies to provide funds from independent sources. No channel through which money can be obtained to be neglected; for instance, further debenture loans through existing companies might be negotiated. They agree that money should be raised as fast as it can be economically spent, but do not wish new developments arrested, and consider that private enterprise should be enlisted to provide capital for new lines. Government borrowings, both in England and India, should be advertised as for railway purposes. They recommend enlisting the assistance of all banks when money is required, and that independent offers of loans on special conditions should be considered.

The Committee unanimously endorse the recommendations of the Mackay Committee that in periods of easy money funds should be raised in excess of immediate requirements.

## ENQUIRY BUREAU.

*Readers abroad desirous of getting into touch with British manufacturers, export merchants, etc., are invited to insert a brief reference as to their requirements in this column free of charge.*

*Replies should be addressed "The Enquiry Bureau, "The Near East," 1, Devonshire Square, London, E.C.2."*

*ADVERTISERS in and annual subscribers to "The Near East" will be supplied with names and addresses of enquiring firms on application. All catalogues sent to "The Near East" for transmission abroad must be accompanied by stamps to cover postage.*

*No guarantee is given as to the financial stability of firms using this column, and enquiries as to status, etc., must be made by the firms concerned.*

113. Import and Export Merchant in Smyrna invites inquiries from British firms wishing to trade with this territory. Will act as agent or on commission basis.

114. Importer in Karachi (India) travelling throughout India, wishes to get in touch with merchants and manufacturers in England and elsewhere. General merchandise.

115. An import and export firm in Spalato, Yugoslavia, wishes to enter into business relations with British manufacturers, importers and exporters. Specialities :—Exports : Medicinal herbs dried fruits, hides, timber. Imports: Oils, food products, tarpaulins, mackintoshes, sacks.

116. Import Merchants in Adana, Cilicia, Asia Minor, wish to represent British firms for any kind of British-made goods. Own account and commission basis. Good references provided. Send catalogues and samples with prices and terms.

117. Importer in Roumania, interested in Jute trade, wishes to get in touch with firms dealing in sacks, new and old, Dundee and Calcutta makes.

119. Russian gentleman, age 34 years, speaking fluently English and French, offers his services to a British firm or company, with a view to becoming acquainted with any special line they intend to undertake in Russia, so as to be able to act in their interest in that country.

# Engineering Topics.

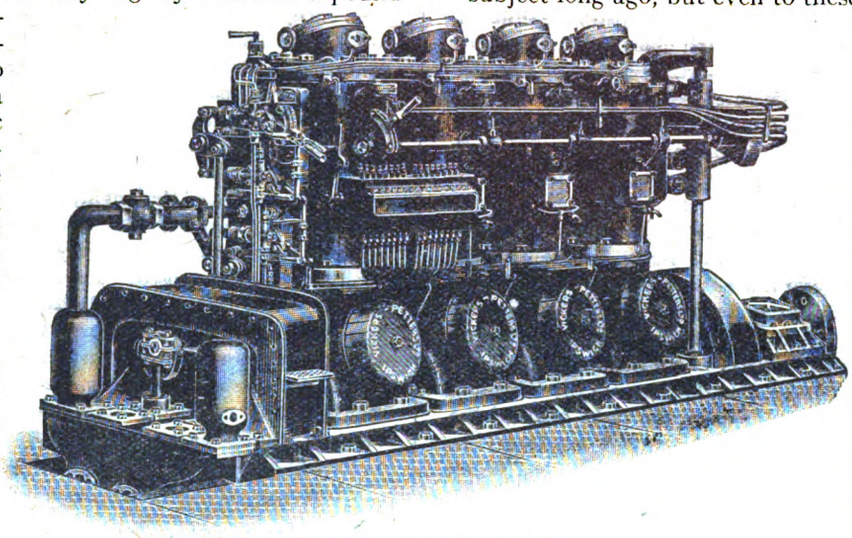
*By our Engineering Representative.*

## THE SHIPPING, ENGINEERING AND MACHINERY EXHIBITION.

(*From Our Own Correspondent.*)

Exigencies of space prevented me last week from mentioning the interesting electro-hydraulic ram pattern steering gear shown by the Variable Speed Gear, Ltd., who are also showing a cargo winch which is capable of lifting 3½ tons on single purchase at 60ft. per minute or, alternately 1½ tons at 150 ft. per minute. Mechanism is provided to obviate any risk of overloading the driving motor, and comprises an hydraulic ram connected to the pump portion of the gear. Several other electro-hydraulically operated devices are shown, and these exhibits together with those of the Metropolitan Vickers Electrical Co., are shown in conjunction with Vickers Ltd. An interesting and comprehensive range of engineers' tools is also shown.

The Atlas Diesel Co. is showing a standard stationary type of two-cycle semi-Diesel developing 50B. h.p. at 350 r.p.m. This engine is of the vertical two cylinder type, and is fitted with a belt pulley and outer bearing. No use is made of water injection, and I understand that the fuel consumption is only slightly over half a pound per brake horse-power hour. An Atlas compressor is also shown, coupled to a 20 h.p. electric motor. The compressor is of the single cylinder type, and can deal with 76 cubic feet of air per minute and deliver it at a pressure of 100 lb. per square inch. Pneumatic tools are shown in operation in conjunction with this exhibit. The company are the British representatives of the Polar-Diesel Co., and claim to be the first engineering concern to instal a Diesel engine on board a vessel.



Marine Semi-Diesel Crude Oil Engine.

A stand of special interest is that of Messrs. Vickers-Petters Ltd., whose exhibits includes various types of semi-Diesel engines, notably a 152 B.h.p. marine four cylinder semi-Diesel crude oil engine, an illustration of which is given on this page. This firm are also showing a 1"-1¼" Petter Junior Lighting set consisting of a V.A. type Petter Junior Engine driving by belt a 1"-1¼" k.w. continuing current generator, and a small demonstration plant showing the units of the Vickers-Petters electric starting apparatus.

Engineers interested in gears should make a point of seeing the Hele-Shaw Martineau devices on the stand of Hydraulic Gears Ltd. This company show a working model of a steering gear with 6 inch rams, and a steering telemotor is also shown at work. There is also a crane and a high-pressure pumping set designed to work at 3,000 lb. per sq. inch. A low pressure pump for an output of 20 tons per hour is also shown, and component parts of other manufactures of the firm are shown in great variety.

Mr. H. R. Richard, well known in the engineering world as a designer, has a number of his productions on the stand of Messrs. Mark Webber, Ltd. One of these is a 10–16 h.p. paraffin engine of high efficiency, which presents many novel and interesting features, and another is a welding set, complete, and suitable for a single operator. The large capacity friction hoist and winch shown is also of more than usual interest.

Whilst on the subject of electric welding, both the engine driven and motor generator types of plant for this purpose are being shown by the Premier Electric Welding Co., Ltd. The engine driven outfit comprises a 10 h.p. engine coupled to a 4½ kilowatt generator on the same bedplate. The engine cooling is by radiator and fan, and the whole outfit is extremely compact and efficient.

Exhibits of strong electrical interest are shown by Siemens and Co., including wireless telegraph sets of the cabinet type. A generator driven by a petrol engine provides the necessary current for the set, to a total of 0.3 k.w., and the transmitter is worked from a 50 volt battery. The receiver has a wave range of from 200 to 2,000 metres, and the outfit would appear to have a number of practical uses. The firm are also showing an extensive range of telegraphic apparatus.

A good deal has been said and written recently on the subject of oil fuel, and a north country contemporary with some claims to engineering knowledge, but apparently with insufficient information, recently championed the burning of raw coal in furnaces and under boilers in preference to the use of oil fuel. The majority of engineers have, however, made up their minds on the subject long ago, but even to these a visit to the various oil fuel exhibits at Olympia will prove of interest. The stands of the Anglo-Mexican and the British Petroleum Companies, and of the Anglo-American Oil Co., are proving centres of attraction. The first-named is showing a large map giving the localities where supplies of oil fuel may be obtained.

The British Petroleum Co., have laid out their stand in a particularly attractive manner, and, as may be expected, bulk oil storage installations form a feature of the Anglo-American Oil Co's exhibits, and demonstrations are given of the ease with which oil can be delivered and removed.

The Universal System of Machine Moulding and Machinery Co., Ltd., have on view several types of power and hand moulding machines for foundry use, and Messrs. Nettlefold and Sons are also staging an attractive exhibit. Amongst other stands worthy of more than passing attention are those of Messrs. Worthington, Simpson, Ltd., Peter Brotherhood, Blackstone and Co., Haslam Foundry and Engineering Co., Reavell and Co., Clarke Chapman and Co., Laurence, Scott and Co., John Kirkaldy and Co., Ltd., the North-Eastern Engineering Co., Thorneycrofts and a host of others. There is no doubt that the exhibition is well arranged and comprehensive, and any reader who has not yet paid it a visit should lose no time in so doing.

An interesting exhibit is that of the Parsons Motor Co., who are showing a 30 k.w. generating set driven by a 60 h.p. four cylinder engine running on ordinary paraffin. The dynamo, which is producing energy at a pressure of 230 volts, is of Crompton manufacture. This firm have produced a highly efficient engine for running on alcohol which should attract considerable attention in the near future. A two-stage Reavell air compressor is shown on this stand driven by a 14 h.p. twin-cylinder engine, which is also driving an electric generating set.

### Miscellaneous.

It is interesting to note that the number of car owners

Digitized by Google

joining the A.A. since May 1 last (the commencement of the touring season) shows an increase of 24 per cent. compared with 1920. Applications for home routes have increased by 64 per cent. over last year, whilst the number of triptyques issued to members going abroad has risen by 22 per cent. Over 42,000 calls were made at the London and Area Headquarters, by members and potential members in connection with motoring matters during the four months ended August 31, and it may be taken that, given no unexpected "depressions," the industry should soon be at "set fair."

## OIL NEWS.

### INDO BURMA OILFIELDS.

The Indo Burma Oilfields ( 1920), Limited, are in the fortunate position of a cricket team whose "tail" has had to go in first and has knocked up a respectable score, leaving the best men still to bat. When the Company was formed in February 1920 its hopes were centred in the Yenangyaung oilfield, which had already built up the fortunes of the Burmah Oil Company, the British Burmah Petroleum Company and others; but circumstances delayed the development of the well-sites on this field, and in order not to have production indefinitely postponed, attention was given to other fields owned by the Company. Unexpected success has been met with in these quarters, and the time is now approaching when the "star" field may also begin to be brought into the picture.

The holdings of the Indo Burma Oilfields ( 1920 ) are situated on the Irrawaddy River from 300 to 400 miles above Rangoon. The Yenangyaung field is the most northerly, and of this the Beme reserve area is the most favoured portion. Here the Burmah Oil Company have about 600 wells, with an annual production of 3,600,000 barrels. The new company has secured 77 well sites, which are considered to be excellently placed for production purposes. But wells may have to be drilled from 2,000 to 3,000 feet before the main supply of oil is tapped, and it takes fully nine months to reach these depths. When, therefore, it was found early in 1920 that a year must elapse before the £480,000 order placed in the United States for heavy drilling equipment could be executed, it was decided to make a start in developing one or other of the Company's areas where shallower drilling is required than at Yenangyaung. For this purpose the Yenanma site, some seventy miles lower down on the right bank of the Irrawaddy was selected. Sufficient plant and machinery to start drilling could be secured in Burma, and work was begun without delay. It had been originally estimated by the Company's Consulting Geologist that with an average production of three barrels per well per day this area could be developed into a sound commercial proposition. Up to the present date sixteen wells have been drilled; two of these were exploratory, three are still in process of being sunk; the eleven producing wells have yielded an average of 6¼ barrels. With the informatiom already gained, the area is now being developed laterally and materially improved average results are confidently expected. In the meantime drilling was started last January on another field at Pedaukpin still farther south. Four wells are in process of being sunk so far, and oil was struck in the third at a depth of 1414 feet in the last week of July. The initial yield gave 30 barrels, but by August 3 the actual yield was reported to be 60 barrels. "The striking of oil in this well in such quantity," the Company's Technical Adviser reports, "taken in conjunction with the oil proved years ago by the Burmah Oil Company, conclusively proves that this is a field of the greatest importance, and with the other wells now being drilled and all necessary plant actually on the ground, there can be no doubt whatever that a large production of oil from this area will be attained by the time the refinery is ready for operations, about October or November."

It is believed that several thousand wells can be drilled on the Yenanma area, and it is hoped to have at least one hundred in production early in 1922. Six special drilling machines and equipment purchased in America at the beginning of the year have arrived on the field and are now in use. With one of these drilling machines the actual time taken to drill a well has been less than ten days.

The refinery to which reference has been made is being built on a site of 330 acres on the left bank of the Rangoon River, fifteen miles south of Rangoon, under an agreement with the Yomah Oil Company. Of the estimated cost of £235,000 the Indo Burma Oilfields contribute two-thirds, and will have a proportionate interest in the refinery, which will deal with the products of both companies.

As circumstances have compelled the Company to concentrate its field organization in the Yenanma and Pedaukpin areas, it has recently been decided with a view to saving duplication of staff, to enter into a working arrangement with the Yomah Oil Company, who are themselves owners of a number of wells and well-sites in the Yenangyaung area, to drill some of the "Indo Burma" well sites on terms which are regarded as mutually advantageous to both companies. Under this agreement the Indo Burma Oilfields Company will supply the necessary machinery and plant, while the Yomah Oil Company supply the supervision and labour to drill these wells, receiving as their remuneration a proportion of the oil so obtained which is based upon a sliding scale dependent upon the quantity of machinery and plant which the Indo Burma may be called upon to supply. A start has already been made under this arrangement, and the first well is down to a depth of 490 feet.

Preliminary examination in the Lower Chindwin district has led to application for prospecting licences being made in respect of two areas, that of Nyaungbinle being four square miles and that of Kani two square miles in extent. In each case oil seepages have been found.

In a report dated August 1 the Company's Technical Adviser summarises the position as follows:—

"In spite of the many difficulties inseparable from getting started to work by a new concern the progress made has really been exceptionally good. There have been many disappointing hitches and delays, but it may be safely said that no oil company operating in Burma has ever accomplished the amount of work which this company has done in the comparatively short time since its inception. Recent developments have largely transposed the relative values of the Company's holdings. The Company's Yenangyaung Well Sites remain unchanged, being situated on an old-established thoroughly proved oilfield, but the Yenanma and Padaukpin areas, which had formerly only a potential value are now proved to be immensely more productive and valuable than has been supposed. The geological conditions had been carefully investigated, but only the drill could tell what oil would be met with, and the drilling results to date speak for themselves. We can now confidently assert that production will go on with steady acceleration, and the whole of the operations have been so timed that oil weells, pipe-lines, pumping stations, storage tanks, refinery and selling agencies will all be ready practically simultaneously to complete the chain of operations.

Of the several other undrilled areas which the Company owns or has applied for it is too early to say more than that they have had as much care devoted to their selection as the now proved areas have had and there is much promise of success in their exploitation."

### BEER PRODUCTION IN CZECHO-SLOVAKIA.

Before the war the brewing of beer was one of the most important branches of Czecho-Slovakian (or Bohemian, as it then was) industry. Few brands were better known throughout the world than the Bohemian speciality of "Pilsen beer." During the war the industry steadily declined owing to the lack of raw material. In 1913 there were 666 breweries on the present territory of Czecho-Slovakia, and these produced 13 million hectolitres. This total declined in 1914 to 10½ millions; in 1915 to 9½; in 1916 to six millions; in 1917 to 1½ million hectolitres, while some 200 breweries closed down altogether. After the cessation of hostilities and the establishment of the independent Czecho-Slovak State, the industry began to revive. In 1919 the production was raised to 3½ million hectolitres while the number of breweries at work totalled 566. For the year 1920 the figures were 5½ million hectolitres of output produced by breweries. Although the pre-war figure has not quite been attained, the statistics show a marked improvement, which is expected to continue.

The importance of this industry lies not only in its close connection with agriculture (the annual consumption of barley being about 350,000 tons, and of hops 3,000 to 4,000 tons), but also in the amount it yields to the Government revenue. Moreover, at present, though the output is far below its pre-war level the treasury receives considerable sums from the beer tax, which for example, in the period 1919-1920 yielded 73½ million Czecho-Slovak crowns in Bohemia, Moravia, and Silesia only. (Statistics for Slovakia and Carpathian Ruthenia have not yet been published). The greatest portion of this amount was collected in Bohemia, the contribution of this province amounting to over 59 million crowns. During 1919-1920 there were 463 breweries working in Bohemia alone.

# Near East Markets.

## LONDON PRODUCE REPORT.

Coffee.—Prices are lower. Costa Rica has shed 4s. to 122s. while Indian at 110's has dropped 10s. Colombo at 110's is 2s., lower, but Nairobi at 102s. has gained 6s. Futures are :—September, 47s. ; December, 47s. 3d. ; March, 48s. ; and May 49s.

Sugar.—Home refined has been in fair request at the official rates. White Mauritius is 1s. down at 49s., and Czecho-Slovakia at 25s. has lost 2s. 6d. Other transactions include West Indian crystallised at 43s. to 48s. 6d. ; white Java at 24s. 6d. ; and beet sugar at 20s.

Oilseeds.—The market has been unsettled during the week. Indian linseed has shed 1s. to 22s., and La Plata at 19s. 3d. has lost 2s. 9d. Rapeseed has been firm with Toria at 22s. 6d.; bold Ferozepore, 21s. 6d., and brown Cawnpore at 20s. 6d. Indian cottonseed at 12s. is 6d. lower, while Egyptian black has risen 9d. to 15s. 3d.

Seed Oils.—Prices have ruled quiet and steady. Linseed oil has shed 2s. at 38s. Crude rape oil remains unchanged at 55s., while refined is 1s. down at 60s. Cotton oil is higher with common edible at 54s. ; Egyptian crude at 47s., and deodorized at 61s. ; increased of 1s., 1s., and 3s. respectively.

Oilcakes.—Business has been brisk. Linseed cake has gained 1s. at 330s., while finest Arachis cake has dropped 2s. to 298s. London-made cottonseed cake in unchanged at 220s.

## YUGOSLAVIA'S WINE PRODUCTION.

The Belgrade journal *Trgovinski Glasnik* reports that the wine trade in the Yugoslav Kingdom is seeking its Government's assistance to make possible the exportation of the surplus production of wine which is estimated at three million hectolitres and worth at the present time about one milliard of dinars. A commission of the Central Society of Croatia and Slavonia have investigated the position of the trade, and have resolved to ask the Ministerial Council to conclude treaties with Czecho-Slovakia and Austria which would assist the exportation of wine to those countries. They further request the Government to (1) raise the tax on exportation and substitute bounties (2) reduce the railway tariff on such wine (3) limit the culture of the vine to existing vineyards (4) take steps that the national copper mine produces the sulphur and copper sulphate necessary for the vineyards (5) create an agency for the exportation of wine produced by agricultural co-operative societies and (7) encourage the exportation of dried grapes.

## EGYPTIAN CROPS.

The *Bulletin* of the Egyptian Ministry of Agriculture gives the following particulars of the crop conditions in August :—

Cotton.—The hot weather that prevailed this month has had a marked effect on hastening the maturity of the crop. Shortage of water and subsequent overwatering after the arrival of the flood have adversely affected the crop in some places. Pink boll worm is general and the attack is somewhat more severe than in past years. The crop is still somewhat backward. Picking has begun in some provinces of Upper Egypt and probably will be general by the middle of September.

Millet (Sefi).—Harvesting has begun in Middle Egypt, while it is approaching completion in Upper Egypt. A slight attack of smut and stem-borer has been reported from several provinces, but damage done is negligible. The crop is satisfactory.

Rice (Sefi).—The weather has been favourable and water supply sufficient, except at the tails of some canals. Ears have formed in the early sown crop. The crop is growing satisfactorily and free from pests.

Sugar Cane.—The weather has been very favourable to the growth of the crop. Water supply was generally adequate, though the crop has suffered to a certain extent from the lack of water in Minya Province. The crop is healthy and in a good condition.

Ground Nuts.—The crop is progressing satisfactorily. A good average yield is expected.

## ROUMANIA'S CROP OUTLOOK.

(*From Our Own Correspondent.*)

*Bucharest, September* 6.

The agricultural department has issued the following report : The maize plant has suffered greatly in some parts of the country. On account of the drought the maize and potato crops will be average ones. Ploughing for autumn sowing has begun. Pasture-lands have benefited from the late rains and are good. Vineyards in general present a good appearance. Fruit is plentiful.

## ASIA MINOR FRUIT REPORT.

Messrs. C. J. Giraud and Co , Smyrna, report as follows for the week ended August 27 :—

Sultanas.—The total estimated arrivals to-date amount to 13,965 bags compared with 4,155 bags for the corresponding period of last year. The total estimated sales are 11,465 bags, as against 3,155 bags for the same period last year, and the estimated stock unsold amounts to 2,500 bags as against 1,000 bags for 1920.

Shipments.—The following ships are expected to load about 3-3,500 tons of sultanas and the first lots of figs due to reach the market next week. S.s. Castilian for London ; s.s. Lugue for Liverpool ; s.s. Ganymede for Amsterdam ; and s.s. Megale Hellas for New York.

The weather remains fine, and the gathering and drying of sultanas are in full swing in all districts. Considerable transport difficulties up-country are retarding the movement of fruit to the railway stations, but farmers are sparing no effort to send their produce to market. Financial stringency and adequate supplies are influencing prices downwards, and a further decline of 5s. and 6s. has been recorded over the week. Fine outstanding grades are still scarce. The market is gradually stabilising, and farmers have a tendency to resist further decline.

First arrivals of figs should reach the market on the 29th inst. But as certain differences have arisen between the Greek authorities and the administration of the Ottoman Public Debt with reference to the collection of the tithe duty, it is probable that arrivals will be held up a few days pending settlement of this question.

For the week ended September 3 Messrs. Giraud report :—

Sultanas.—The total estimated arrivals to-date amount to 38,480 bags as against 15,390 bags for the corresponding period of 1920. The total estimated sales are 26,480 bags as compared with 14,390 bags, and the estimated stock unsold amounts to 12,000 bags as against 1,000 bags last year.

Figs.—The week's estimated arrivals are 7,883 loads as compared with 18,200 loads for the corresponding period of 1920. The estimated sales are 7,883 loads as against 18,200 loads.

Shipments.—The estimated shipment per s.s. Castilian for London are 106,409 boxes sultanas, 695 cases figs, 140 boxes figs, and 5,627 bags figs, and per s.s. Lugue for Liverpool, 59,433 boxes sultanas, 872 cases figs, 1,116 boxes figs, and 1,202 bags figs. S.s. Ganymede for Amsterdam, s.s. Malatian for Liverpool, and s.s. Antigone for London are sailing on the 10th inst, and s.s. Destro for London-Hull is sailing on the 15th inst.

The Sultana market ruled fairly steady the first four days of the week under the influence of the heavy purchases effected for shipment by the s.s. Castilián and Lugue. The withdrawal of the leading buyers on Friday, pressure of arrivals, and financial stringency forced a sudden break in values of 5s. to 6s., and the market closed on Saturday very weak and irregular. The oversold account for September is estimated at over 4,500 tons, and shippers must commence buying on a larger scale before long. Farmers up country are resisting the decline, and the interior markets at Magnesia, Cassaba, etc., are at present well above Smyrna parities. Some reaction must consequently be reckoned with before long.

Figs are a steady market, and all arrivals will be daily absorded against September engagements, prices being regulated by the extent of the supplies. Estimates of the yield have been slightly lowered consequent on the loss of fruit by the extreme heat.

The traffic receipts of the Smyrna-Aidin Railway for the week ended September 10 amounted to £15,455.

# SHIPPING INTELLIGENCE

## ITALY'S TROUBLES WITH KEMALISTS.

*(From Our Own Correspondent.)*

*Smyrna, September 9.*

The Kemalists have not forgotten what they learned from the Germans in connection with the commandeering of goods. The coasting steamers arriving at Smyrna from Kuluk, Adalia, and Scala-Nova are loaded with goods which merchants have shipped away to avoid paying the 40 per cent. duty recently levied by the Kemalists. As the Italians are installed at these ports the greater part of the business has passed into the hands of their nationals, who are now experiencing very heavy losses. The only compensation offered by the Kemalists for goods commandeered is a rebate of 10 per cent. on the new import duty of 40 per cent., but as nobody will import goods on these terms, the result is that the merchants lose the value of the goods commandeered. A considerable loss falls on British Smyrna cloth merchants who have considerable stocks in Adalia. The Italians are much incensed, and are endeavouring to intimidate the Kemalists by increasing their forces at Scala-Nova, where they have recently landed 500 men, and Adalia, where they keep a naval force. The Kemalists, however, are in a very ugly mood, and it is feared that Italian merchants may have a choice of either abandoning their holdings or running the risk of being massacred.

## FORTHCOMING SAILINGS.

*The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parentheses :—*

*Anchor Line.*—S.s. Massilia for Bombay (Liverpool, September 27) ; s.s. Elysia for Bombay (Liverpool, October 11).

*Anchor Brocklebank Line.*—S.s. Mahanada for Port Said, Colombo, Madras and Calcutta (leaves London, September 24) ; s.s. Mathura for Calcutta (Birkenhead, October 1) ; s.s. Anchoria for Port Said, Colombo, Madras and Calcutta (leaves London, October 8) ; s.s. Malia for Calcutta (Manchester, November 5).

*Bibby Line.*—S.s. Gloucestershire for Marseilles, Port Said, Colombo, and Rangoon (Birkenhead, September 28) ; s.s. Oxfordshire for Marseilles, Port Said, Colombo and Rangoon (London, September 28 ; Birkenhead, October 12).

*Byron Steamship Line.*—S.s. Maid of Athens for Patras, Piraeus, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Galatz, and Braila (Liverpool, September 28.) A steamer will sail from Liverpool on October 15 for Patras, Piraeus, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Galatz and Braila.

*Clan Line.*—S.s. Clan Macbrayne for Colombo, Madras and Calcutta (Birkenhead, September 27) ; s.s. Clan Macvicar for Bombay and Persian Gulf (Birkenhead about October 7).

*Cunard Line.*—S.s. Phrygia for Gibraltar, Genoa, Leghorn, Naples, Palermo, Messina, Catania, etc. (Manchester, September 27; and Swansea, October 4) ; s.s. Brescia for Ceuta, Gibraltar, Algiers, Malta, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Odessa, Novorossisk and Batoum (Glasgow, November 3).

*Ellerman Line.*—S.s. Asturian for Gibraltar, Malta, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, and Varna (Liverpool, October 8).

*Ellerman's "City" Line.*—S.s. City of Manila for Calcutta (Birkenhead, October 3) ; s.s. City of Baroda for Calcutta (Birkenhead, October 15).

*Ellerman's "Hall" Line.*—S.s. Trafford Hall for Bombay, Karachi, the Punjab, and Malabar Coast ports (Liverpool, October 1) ; s.s. City of Palermo for Karachi and the Punjab (Liverpool, October 15).

*Ellerman's "Westcott and Laurance" Line.*—Steamers sail fortnightly for Mediterranean, Egypt, and Levant ports.

*Glen Line.*—S.s. Glenogle for Port Said, Port Swettenham, Singapore, etc. (London, October 6) ; s.s. Glenluce for Port Said, Port Swettenham, Singapore, etc. (London, October 20).

*Harrison Line.*—S.s. Inventor for Calcutta (Liverpool, October 1) ; s.s. Professor for Port Said, Port Sudan, Aden, etc. (Birkenhead, October 6).

*Henderson Line.*—S.s. Henzada for Port Said and Rangoon (Birkenhead, October 5).

*Johnston Line.*—S.s. Incemore for Piraeus, Syra, Smyrna, Volo, Salonika, Constantinople, Bourgas, Varna, Constantza, Sulina, Galatz, and Braila (Liverpool, October 1) ; s.s. Dromore for Piraeus, Volo, Salonika, Bourgas, Varna, Constantza, Sulina, Galatz, and Braila (Liverpool, October 22).

*Moss Line.*—S.s. Siptah for Gibraltar, Algiers, Malta, Syra, Piraeus, Smyrna, Salonika, Constantinople, Bourgas, Varna, Constantza, and Sulina (Liverpool, September 24) ; s.s. Amasis for Gibraltar, Algiers, Malta, and Alexandria (Liverpool, September 24) ; s.s. Lugue for Casablanca, Gibraltar, Malta, Haifa, Beyrout, and Cyprus (Manchester, October 4).

*Papayanni Line.*—S.s. Gerano for Algiers, Malta, Syra, Smyrna and Constantinople (Liverpool, October 22).

*P. and O. Line.*—S.s. China for Bombay (taking cargo for Gibraltar, Port Said, and Aden ; also (with transhipment at Bombay) for Indian Coast and Persian Gulf ports) (London, September 23) ; s.s. Padua for Colombo, Madras, and Calcutta (taking cargo for Malta, Port Said, and Aden) (London, September 24) ; s.s Novara for Colombo, Madras and Calcutta (London, October 7) ; s.s. Devanha for Bombay (London, October 7).

*P. and O. British India Line.*—S.s. Mandala for Bombay and Karachi (taking cargo for Persian Gulf and Malabar Coast ports) London September 23) ; s.s. Morvada for Colombo, Madras, and Calcutta (taking cargorfor Port Said, Suez, and Aden) (London September 30) ;

## CZECHO-SLOVAKIA'S TELEPHONE SYSTEM.

In less than two years the Czecho-Slovak Republic has increased its telephone lines by no less a length than 6,250 miles. At the moment of the proclamation of Czecho-Slovak independence in October 1918 there did not exist in the whole country even six miles length of copper wire with which to start new constructions and yet in the time which has elapsed since then, the Republic has constructed new telephones lines equivalent to all that was constructed by Austria-Hungary through several decades.

Two years ago there was only a single line between Prague and Brno, while the west of the Republic, Bohemia and Moravia, were not directly connected at all by telephone with the east. This state of affairs was the result of the Austrian policy of centralization, which demanded that all roads should lead to Vienna or Budapest. To-day there exists direct communication between Prague and all the principal towns of the Republic. Direct communication has been established with Austria and Germany, with Yugoslavia and with Hungary, and negotiations are proceeding for communication with Poland and with Switzerland.

This is really a noteworthy achievement when one considers the scarcity and high price of material, the enormous cost of labour, and the financial and other difficulties under which the Republic has laboured.

## THE ECONOMIC SITUATION IN ROUMANIA.

The Bucharest correspondent of the *Frankfurter Zeitung* takes a pessimistic view of the economic position in Roumania. Writing in the issue of September 2, he says that: In spite of all the semi-official announcements as to the extremely favourable economic conditions in Roumania it cannot be denied that that country is in the midst of a serious crisis. The financial reforms which have been accepted by the Assembly and will come into force in September will not for the present apparently fulfil the hopes which the Finance Minister, M. Titulescu, placed in them. In order to meet the most urgent expenditure, he is now negotiating with the National Bank for the issue of a large loan, but the bank is insisting on anything but favourable conditions. The loan concluded in the spring with a French group against a delivery of 20,000 truckloads of grain has been called in by the French since Roumania is in arrears with these grain deliveries. Accordingly, not only private individuals in Roumania, but the State itself as well, is passing through a serious crisis.

With regard to private individuals there seems no prospect of a speedy termination of the sales and output crisis. Last spring Italian, Austrian, French and last, but not least, Roumanian importers imported a vast quantity of industrial products, far more indeed than the Roumanian market could absorb. All the warehouses are packed with goods. A large number of Italian and Roumanian importers obtained their goods with the aid of large credits from the banks, and when these credits fell due, and there was no prospect of finding ready purchasers for the goods, compulsory sales were necessitated owing to the pressure exerted by the banks. Italian firms in particular suffered severely, and a large number of manufacturing firms were involved in financial difficulties These forced sales, together with the continually increasing supply, resulted in prices falling as much as 60 per cent. and more. Nevertheless, no modification of the sales crisis can as yet be foreseen, for the consumption capacity of the Roumanian population is limited.

## ON 'CHANGE.

### GREEK SECURITIES WEAK.

*(From Our Own Correspondent.)*

London, Monday.

Conditions during the week have been distinctly adverse to any improvement in the markets, Irish developments in particular having a weakening tendency. There are no signs so far of a reviving interest on the part of the investing public, and anything of the kind is scarcely to be looked for until the situation in general is much brighter.

The gilt-edged group is distinctly harder on the week. Consols are ¼ up at 48,1-8, while War Loan Fives are 5-8 up at 88,13-16, and Fundings are 1,3-8 up at 73¼. In Near Eastern securities which rank as British Government stocks. Egyptian guaranteed 3 per cent. are 68xd, Greek guaranteed 2½ per cent. 1898 are 66, while Turkish guaranteed 4 per cent., 1855 are 69. The Sudan 5½ per cent Loan is now 94½, while the India 7 per cent. Loan is 103.

There has been little doing in the industrial group. A few specialities developed strength, but the tendency on the whole was irregular. Iron and steel shares were on the weak side, while Textiles were rather dull. A strong tone has developed in Shipping securities. P. and O. has risen 15 to 365, this being on account of expectations with regard to the dividend, while Furness Withys are 24s. 3d. Motor shares have been weak. Kaffirs have been rather a bright feature, Rand Mines rising to 2½, and Modders to 7¾. A feature in the mining groups was the weakness in De Beers and Rio Tintos, the former being 12,1-8 after being lower, while Tintos have touched 28½.

**Oils Dull.**

It has been a bad week for Oils, and prices are generally low. There would appear to be some prospect that, considerably reduced dividends are in view, in which case we shall see lower values all round. Anglo-Egyptian are 1-16 down at 1,3-8, while Roumanian Consolidated have dropped 9d. at 9s. 9d. Steaua Roumana are exceptionally 3d. up at 11s. 3d., while Phœnix are unchanged at 9s. Burmahs at 5,5-8 are 1-8 down.

The outlook seems to be rather better with regard to Rubber, and the market is assuming a somewhat firmer aspect. The latest trade returns show a marked development in the export of the commodity, and should this tendency develop it will not be long before stocks have reached a point at which a share revival will become possible, though in view of the general conditions it would be unwise to harbour great expectations.

Bank shares have been firm. Agricultural 3½ per cent. Bonds are 3, while the Agricultural 3½ per cent. Guaranteed Bonds are ¼ up at 55¾. Imperial Ottoman Banks are 3-8 down at 7,7-8, but National Bank of Egypts are ¼ up at 20. Bank of Athens are unchanged at 2,3-8, while Ionians are 3¼.

A weak tone has developed in Greek securities. The 5 per cent. 1881 Loan is 1½ down at 42, while the 5 per cent 1884 issue is 2 down at 39. The 4 per cent. 1902 Loan has gained ½ at 34½. The 5 per cent. Funding Loan is 39, while the 5 per cent. 1914 Loan is 41½.

**Egyptians Firm.**

The firm tendency in land shares has continued. Beheras are 11, while Behera Prefs are 3¼. Egyptian Delta Lands are 3d. up at 9s. 6d., while Egyptian Consolidated Lands are 1s. 3d. New Egyptian are 25s. 6d., while Sudan Plantations are 1-8 up at 3,1-8. Union Foncieres are 1-8 down at 2,7-8.

### CZECHO-SLOVAK SUGAR INDUSTRY.

The Czecho-Slovak sugar companies are now beginning to hold their general meetings, and the balance sheets which have been submitted show that, as a whole, the assets are considerable. The season 1920-1921 was one of the most successful which the sugar companies have had. The profits have been far greater than was expected, especially as production of beetroot is still only two-thirds, and in some cases, one-half of what it was before the war. The balance sheet issued by the Nymburk Sugar Refinery which held its fifty-first general meeting on August 20, is typical of the present situation. The Nymburk Sugar Refinery is a very small concern, its output having been only 36,000 quintals for the past season. It belongs to a joint stock company with a capital of less than half a million crowns. The shares, whose nominal value are 600 crowns each, are quoted at 729,1-9. As a result of last season's activities this company has realised a profit of 2,358,000 crowns, which, with the sum of 2,402,000 crowns brought forward from the preceding year, produces a total profit of 4,760,000 crowns, or ten times greater than the share capital. The share-holders received a dividend of 185 per cent., or 1,050 crowns per share, and this does not represent even a quarter of the actual profit. The company could actually pay a dividend of 500 per cent., and even then it would have a surplus of 1¾ million crowns at its disposal. The Czecho-Slovak Company for the Sugar Industry (Sugar Bank) which is one of the most important sugar concerns in the country, announces a dividend for 1920 amounting to 110 crowns per share, or 55 per cent, as compared with 60 crowns or 30 per cent. last year. The company is increasing its capital by 8 million crowns.

### ALEXANDRIA EXCHANGE.

*Supplied by G. L. Mortera, Alexandria and Cairo.*

Prices on September 2 were as follows :—Agricultural Bank of Egypt, £4 17-32 ; Alexandria Water Co., Ltd., £7 ; Anglo-American Nile Steam, £2½ ; Associated Cotton Ginners, £27-32 ; Banque d'Orient, Fr., 57½ ; Behera Ord., £E 9¾ ; Brasseries d' Egypte, Fr., 75; Building Lands of Egypt, £5-8 ; Cassa di Sconto Priv. Fr., 100 ; Ciments d'Egypte Priv., Fr., 55 ; Ciments d'-Egypte Div., Fr., 30 ; Comptoir Fin. et Com. d'Egypte, £15-16 ; Consolidated Land, Pt., 5½ ; Credit Foncier Fondateur, Fr. 810 ex ; Credit Foncier Act, Fr., 642 ; Credit Foncier, 1886 Oblig., Fr., 319½ ; Crown Brewery Priv., Fr., 110 ex. ; Crown Brewery Div., Fr., 130 ; Eaux du Caire Capital, Fr., 78 ; Eaux du Caire Jouissance, Fr. 104½ ; Egypt and Levant, S.S. Ord., 27s. 6d. ; Egyptian Delta Light Railways, £4,5-32 ex. ; Filature Nationale d'Egypte, £10 5-8 ; Immeubles d'Egypte Soc. an des., £5 7-16 ; Khedivial Mail S.S. Ord., 110s. ; Khedivial Mail S.S. Co., Pref. £2 9-16 ; Kom Ombo Ste. An de Wadi, £4 19-32 ; Kom Ombo Ste., Fondateur, £33 9-16 ex. ; Land Bank of Egypt, Parts de Fond, £37 ; Lots Turc., Fr., 37½ ; Menzaleh Canal Navigation Pt., 270 ; Nungovich Hotels, £6 5-8 ; Ramleh Railways, £2 15-16 ; Salt and Soda, Pt., 353 ; Tram d'Alexandrie Priv., Fr., 51½ ; Tram d'Alexandrie Div., Fr., 65½ ; Union Fonciere d'Egypte, £2 13-16 ; Egypt Hotels, £1 27-32 ; Urbaines et Rurales, £3.

Bulgarian Five per Cent. Gold Loan 1902—The Bulgarian Government is prepared to pay to French, British and Belgian bondholders coupon No. 38 of the above loan maturing on September 14, 1921, at French francs 12.50 each, and bonds drawn for redemption of that date at French francs 500 each.

# COTTON & COTTON GOODS.

## MANCHESTER REPORT.

(*From Our Own Correspondent.*)

*Manchester, Friday.*

Trading conditions in the market during the past week have not been favourable to a large turnover. Many people are not confident that the present level of values will be maintained. Orders, therefore, are being placed with caution. The advices relating to the Egyptian cotton crop state that the plants are now making normal progress. Buying by spinners this week has not been important. Rates have fluctuated from day to day, but on balance there is not much change. A feature of interest has been the extensive buying in Peruvian cotton, the week's sales being over 20,000 bales. Good grade American material has also attracted considerable attention, and Lancashire spinners seem determined to secure their supplies for several months ahead. Prices in Egyptian yarns seem to be out of the reach of buyers, and only a limited business has been done. Operations in American yarns have been on a restricted scale and quotations remain very irregular. A rather increased turnover has taken place in piece goods for the Near East, and buyers for Egypt, the Levant, and Persia have been fairly active. Most of the buying has been out of stock. On the other hand, India has given very little support, and only occasional lines have been put through for China. Manufacturers are still full of complaints, and it is exceedingly difficult to secure prices which are worth having.

## LIVERPOOL REPORT.

Messrs. Reynolds and Gibson report as follows for the week ended September 15 :—

Although fluctuations have again been frequent and somewhat violent in all markets, the past week shows a certain improvement on the preceding one, and as we write the trade looks distinctly more settled than it did a week ago. The tendency of prices is still upwards, but we cannot say that business, as yet, shows many signs of broadening in this department. Egyptian yarn is not moving off as we would like to see it, and, although various sources speak of an increased enquiry, the offers made are by no means compatible with the enhanced value of the raw material. However, a threatened labour dispute at Oldham has fortunately been settled, and, provided that the markets in Alexandria and Liverpool find a steadier basis, there is quite a fair prospect of spinners and manufacturers coming to terms.

The enquiry on the spot here has been only a moderate one until yesterday when a marked improvement took place, practically all grades and classes of Egyptian cotton being in request. Still, no interest has been shown by spinners generally in the new crop, which is the more remarkable considering the varied and somewhat doubtful accounts which have been received concerning it. A cable just to hand from Egypt predicts a lower yield and lower quality than last year, and gives as a preliminary estimate a figure of 4¼ million kantars. The critical time will be during the next six weeks, and crop reports should be carefully studied during this period by those interested. Very little c.i.f. business has been reported of late, and it seems likely that before the end of the season something in the nature of a scramble for cotton may be witnessed on the part of spinners who find themselves running short before the new crop has time to arrive.

Rather more interest has been displayed in this market of late by spinners of American cotton, as, owing to the high prices asked for American staple at present, Egyptian cotton appears relatively cheap. This, however, is a more or less normal occurrence which is often seen at the tail end of the season, and we do not expect very much from this enquiry. Total sales, 1,900 bales, which includes 300 bales Sudan. Quotations are raised 50 points all round.

---

It is announced that the Trieste Samples Fair has been postponed until May, 1922.

---

Sir P. W. Newson Bart., of Messrs. Jardine, Skinner and Co. of Calcutta, has been appointed a director of the Eastern Bank

---

It is proposed to hold an All India Hand Weaving Exhibition at Patna, commencing the first week in December.

---

Numbers are announced of bonds of the Piraeus, Athens, and Peloponnesus Railway Four-and-a-Half per Cent. Bonds drawn for repayment at par on October 15.

## COTTON INDEX NUMBER.

### STRIKING ADVANCE.

The recent pronounced upward movement in raw cotton rates is reflected in the index number of current cotton prices which appears in the monthly Cotton Trade Circular published this week by Mr. Frederick W. Tattersall, of Manchester. In each case the basis of calculation is 100 and this represents the price ruling at the end of July 1914. The general average now is 219, compared with 174 a month ago, which brings the figure to the same level as at the end of 1920. Egyptian cotton has advanced 65 points and American cotton 61 points to 253 and 195 respectively. Yarn prices have not increased to the same extent, the rise being 42 points to 221 for American descriptions, and in the case of Egyptian the number now is 228 which is 37 points higher. The appreciation in cloth values has been 21 points, from 177 to 198.

## LANCASHIRE COTTON COMPANY DIVIDENDS.

### COMPARATIVE FIGURES.

Mr. Frederick W. Tattersall has just issued his usual monthly analysis of the stocktaking returns of Lancashire cotton spinning companies. For three months trading to the end of August 22 companies with a total paid-up ordinary share capital of £2,440,682, have paid an average dividend per company of 8.56 per cent. per annum. Of these 22 companies seven were unable to make a distribution to shareholders, but four companies paid 5 per cent., five 10 per cent., five 20 per cent., and one 25 per cent. per annum. The previous average dividends for the same 22 companies were : quarter ended May 1921 8.95 per cent., quarter ended February 1921 27.24 per cent., quarter ended November 1920 47.45 per cent., and quarter ended Agust 1920 51.23 per cent. per annum.

## INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated September 10 :—American sensations reflect in Bombay cotton market where considerable excitement prevails. Fine Broach cotton price rose from Rs. 442 on September 1, to Rs. 491 and 8 annas on September 7, and closed at Rs. 489 on September 8. Large quantities purchased by exporters to Japan and Europe. Ready supplies dwindling. Calcutta jute mills will continue work for four days to end of the year, with proviso of one month's notice. Hutur-Hesla railway survey by East Indian Railway s anctioned, covering 101 miles near south Karanpura Coalfields.

A further cable dated September 13, states :— Season: September 5 to 7—Heavy rain in parts of Central Provinces, and in Central India West. September 9—Monsoon strengthened slightly in Burma, North-east India and to the south of Peninsula, but weak over rest of country. September 10—Active in south of Peninsula and Gangetic Plain. September 11—Active except in North-west India and Deccan. Condition of crops. September 9—Punjab—unchanged. Central Provinces—some rain has fallen but more needed. Rice excellent. Cotton very good to excellent ; break has improved cotton. Sesamum good. Assam—unchanged. Markets. Cotton.—Bombay cotton market, September 8—Steady. Oomras Rs. 440 December—January, Rs. 470 September. Cotton arrivals from September 1, 1920, to August 31, 1921, were 2,879,000 bales as compared with 3,427,000 bales last year. Piece-goods.—In Bombay piece-goods market, enquiry not encouraging. Jute and Gunnies.—Calcutta jute market on September 9, firm. Rates unchanged. Gunnies on 10th quiet but steady. Tea.—At the taa sale on September 6 quality was irregular, fie second flush Assams,d Darjeelings, and early Dooars cominng to an end. Prices followe quality. Whole leaf teas barely steady ; Dusts firm. 160,715 packages sold to date at an average price of nine annas one pie per lb. Rice.—In Rangoon rice market speculative element strong. Special rice, September 9—Rupees 635. No change in bank rates.

---

It is hoped to increase the production of phosphates in Morocco to 500,000 tons by 1926, and 1,750,000 tons by 1930.

It is reported that the output of oil of roses in Bulgaria is 50 per cent. larger this year, than that of last year.

The pre-war coal production of Bulgaria amounted to 358,000 tons, and 108,000 tons were imported. Last year's production was 711,687 tons, and only 1,500 tons were imported, whereas Bulgaria needs at least 1,500.000 tons yearly.

The Bank of England give notice that Sudan Government £5½ per cent. Guaranteed Bonds will be ready for delivery in exchange for fully-paid scrip certificates on and after September 9. The scrip certificates should be lodged at the Loans Office, 5-6, Lombard-street, E.C., and must be left at least three clear days for examination prior to the issue of the bonds.

517,134 tons of coal were imported into Alexandria from January 1 to August 19. Of this total 58,130 tons were Welsh, 13,671 tons Scotch and 445,333 tons other qualities. During the corresponding period last year 262,758 tons were imported. The stock of coal now held ashore is about 11,500 tons.

## NOTES OF THE WEEK.

### *The Asia Minor Struggle.*

After the Greek Army had recrossed the River Sakaria its withdrawal would seem to have been carried out without any serious interference by the Turkish forces. It now holds a line some fifty miles east of Eskishehir. The Greek Minister of War is reported to have announced at Broussa that the Hellenic Government proposes to proclaim the annexation of "the territory occupied by the Greek troops," but it has yet to be confirmed that the Government's intention has reference to all the territory west of the line actually held by the army. Possibly some of the enemies of the present regime in Greece would like to see it make this mistake; for even if the Allied Powers acquiesed in the proposal, it would not be long before the Turkish population, who now, smarting under Mustapha Kemal's exactions, are prepared to welcome the Greek occupation, would remember that they were Turks and lend themselves to irredentist propaganda. Unless all the indications are at fault, the time is coming when public opinion the world over, freed from the prejudices and pacts that have lowered the prestige of the Supreme Council, will make short shrift of imperialist designs in the Near East. Greece will then stand to lose much more than would be the case if she voluntarily accepted an equitable settlement now.

### *Bulgaria's Army.*

The Council of Ambassadors has accorded permission to Bulgaria to retain temporarily thirteen thousand frontier guards and gendarmes on a conscript basis. Its action is a commonsense one in view of all the facts. By the terms of the Treaty of Neuilly Bulgaria had to disband entirely her conscript army and was to be allowed to keep only twenty thousand men under arms, to be obtained by voluntary enlistment for twelve years' service. The first efforts to enrol men on the voluntary system failed, and the Bulgarian Government pleaded for permission to retain a conscript force. When the Ambassadors' Council proved deaf to entreaty, as well as to the recommendations of the Inter-Allied Military Mission in Bulgaria, the members of the Government made it a personal matter to attempt to secure voluntary recruits. Aided by the presence of large numbers of unemployed refugees from Thrace and Macedonia, they succeeded in raising 3,500 volunteers, and at the eleventh hour the Ambassadors in Paris, influenced, no doubt, by the folly of leaving Balkan frontiers to the mercy of *komitajis* of all the local nationalities have compromised by sanctioning the temporary retention of thirteen thousand conscripts. The total force of soldiers and gendarmes thus falls short for the present of the twenty thousand contemplated; but if the Bulgarians maintain the level-headed and correct attitude that they have maintained hitherto in their troubles since their defeat, the number will be sufficient for practical purposes. It is to be hoped that all sections of the population, including Macedonian and Thracian refugees, will recognise that the concession in regard to the conscript army has been made on the strength of Bulgaria's good behaviour, and will draw the appropriate lesson from this fact.

### *Serbia and Albania.*

All the admiration that the new Yugoslav State won for itself as a result of the correctness of its attitude over the Fiume question is being endangered by the actions of the Serbian Military party in regard to Albania. The Allies turned a blind eye to what happened in Montenegro; they are not likely to repeat their criminal neglect in the case of Albania, a member of the League of Nations; and unless public opinion in Yugoslavia can restrain the elements in Serbia responsible for a policy of frontier aggression, the new State will find itself handicapped by universal distrust and prejudice. Centrifugal forces are already at work in the Triune Kingdom, and the action of the Serbian Military party can only strengthen them. Anyone acquainted with the Balkans is prepared to hear of rifles going off of their own accord on either side of a frontier, and in ordinary circumstances not much attention is paid to such incidents. But it is a different matter when a 24 hours' ultimatum passes between the two Governments. Fortunately for Albania the League of Nations is in session, and as far as can be judged from reports from Geneva the Yugoslav plea of innocence failed to carry conviction owing in part to the *komitaji* manners of the Serbian delegate, which seem to have elicited a well-merited rebuke from Lord Robert Cecil.

### *Frontier Fighting.*

In frontier incidents in the Balkans it is always rash to infer that the fault is altogether on one side; but there can be little doubt that the Serbians have put themselves in the wrong by sending an ultimatum to the Albanians without referring their quarrel to arbitration, as they

Digitized by Google

bound themselves to do under the charter of the League of Nations. As a matter of fact at the very time when the ultimatum was delivered, the frontier question was before the League. The only interpretation that will be placed on their action is that the aggressors were eager to forestal the League's decision. The Balkans, to say nothing of the Allies, expect better things from the Yugoslav Kingdom. For once in a way the advantage of getting in the first blow has not outweighed the value of a just cause. Russian mercenaries—their employment in this work will tend to modify the good opinion hitherto held of Serbian altruism towards Russian refugees—would seem to have been found no match for the Albanians. The whole business is unsavoury, and we are confident that the best public opinion in Yugoslavia must be against it.

### *The Constantinople Plot.*

The attitude of the Constantinople Government in regard to the plot discovered for the assassination of General Harington and other British officers has been expressly commended by the General, who has expressed his satisfaction in another *communique*. He had already extended the time limit of seven days originally granted for the arrest of the conspirators ; and though one report from Constantinople stated that nine persons had been arrested, including an *aide-de-camp* of Mustapha Kemal Pasha, it appears to be uncertain whether all those named on the General's list have yet been secured. It is possible that further investigation has proved the plot to be far less important and less widespread than the first sensational reports cabled over here would have led us to think. But until the results of the official inquiry are published—if they ever are published—it would be unprofitable to speculate further on that aspect of the case.

### *Disturbing Rumours.*

Unfortunately, the affair has taken on a fresh aspect in the past week, and, moreover, a highly unpleasant one. Messages from Constantinople, received in the latter part of last week, referred to the alarm caused in Turkish circles by rumours that the British had 'manufactured' the plot in order that they might have a good pretext to overthrow the Constantinople Government and to tighten their hold on the city. It is not the first time that malicious rumours of this kind have been spread in Constantinople, but on previous occasions they have usually been treated with contempt, as they deserved. This time, however, the case is different ; for it is reported that the present rumours emanate from French sources, and there appears to be only too good reason to believe that such is the case. Naturally this report created much irritation when it reached London, and it is certain that unless French agents are restrained by headquarters from spreading such baseless stories, real harm will be done to the relations between our two countries. In the circumstances it was not unnatural that the announcement that General Harington had left Constantinople on September 22 on a month's leave should have given rise to the belief that he had been recalled. A report published in certain English papers on the previous day, to the effect that both the High Commissioner in Constantinople and the French Ambassador in London had formally protested against the measures taken by General Harington is hard to believe ; but in view of past events it found ready credence in many quarters. We are glad to believe, however, that General Harington's departure is due to his own desire to put his views before the Foreign Office and the War Office.

### *Zaghloul Pasha's Guests.*

The Labour Members of Parliament who are visiting Egypt at the request of Zaghloul Pasha had an extremely demonstrative reception from the extremists at Alexandria on their landing, and from the same party a few days later on their arrival in Cairo. They have issued a manifesto of precisely the kind to be expected from them, with suitable references to 'self-determination' the 'elected representatives of the Egyptians,' and the abolishing of 'repressive measures' ; and some of them at any rate, have indulged in a flow of 'oratory' which can hardly have created a favourable impression upon the educated members of their audience. In fact, it is clear that their visit is not regarded with unmixed favour even in circles which profess keen anxiety for 'independence.' One native journal, before they arrived, was unkind enough to refer to "this ill-omened month, September, in which the British troops entered Egypt" and in which some of "the British Imperialist Members of Parliament intend to come to Egypt." It went on to suggest that it would be said that by inviting the Labour delegation the Egyptians had laid themselves open to a charge of being unable to do without their help ; and it spoke—rather bluntly, we feel—of 'the coal-miner Swan wishing to consolidate the British Occupation and perpetuate British rule.' Moreover, it was indiscreet enough to refer to the expenses of "Swan and his colleagues" being paid by the Zaghloulists. If Messrs. Swan and company recognize themselves as the "Imperialists" referred to, they will perhaps entertain some doubts regarding the fitness of the Egyptians as a whole for self-determination, etc., etc.

### *The Rowanduz Rising.*

A Colonial Office *communique* reports that the trouble with the Kurds in the Rowanduz area has been dealt with successfully by a combined force of local levies and police under British officers, assisted by aeroplanes. It mentions also that the trouble was due to Turkish intrigues among the Kurds, and that a small Turkish force actually invaded Mesopotamia. The entry of this Turkish element into the affair lent it a certain seriousness at the present juncture, and it is all the more satisfactory that the trouble has been dealt with so promptly and successfully. Another pleasing feature of the report is the statement that "both police and levies showed great gallantry." If carefully chosen, the Native presents good material for British officers to work upon, and the present instance seems to point to the possibility of his training taking less time than it was generally expected to take ; and this is of good augury for the future of Irak. But it is necessary to remember that this is but one case, and that in the troubles of eighteen months ago there were cases which were by no means so satisfactory. That, however, is by the way, and for the time being we may content ourselves with congratulating all concerned in what appears to have been a particularly successful little punitive expedition. The leader of the malcontents has presented himself for the purpose of making his submission ; and the lesson, though its effect may not last long, will not be thrown away on his neighbours.

Digitized by Google

### *South Persia Rifles Again.*

According to the latest reports from Persia it appears that the Teheran Government has made an offer to take over the South Persia Rifles, and that this offer has been rejected by Lord Curzon. The reason for the refusal is said to be the absence of guarantees for the "effective taking over of a highly disciplined force with a very considerable quantity of munitions." It is no doubt regrettable that such a useful force should be broken up; but it is extremely doubtful whether its usefulness would have been maintained after the withdrawal of the British officers, upon which the Persian Government laid so much stress; and there can be no doubt at all that, with things as they are at present in Persia, our own Government is acting wisely in keeping that "very considerable quantity of munitions" out of harm's way. If the Persians have learnt the value of the force, as it is to be hoped they have done, there can be nothing to prevent their organizing one on similar lines for themselves, if they have the ability to do so; and the disbanded men and officers of the S.P.R. will, perhaps be available for such services. As to munitions, they will now, presumably, be free to buy them how and when they please; and possibly Soviet Russia may be willing to give them the financial help necessary for such a transaction. Failing that, some other new friend might be willing to step into the breach.

### *The Meshed Military Mission.*

A report on minor operations in North and North East Persia from 1917 to 1921 has been made by General Rawlinson to the Government of India, and was published last week. It deals, all too briefly, with a stirring period and a field in which Imperial troops from British India did most excellent, though not showy, work, in the early stages of the war. Pan-Islamic intriguers were hoping to stir up trouble in Afghanistan and in India, and Germans and Turks very naturally sought to turn them to account. It was necessary, or at any rate advisable, to establish military order along the Perso-Afghan border; and this was done partly with Russian and partly with Indian troops. The Russian Revolution subsequently cast all the burden on our shoulders, and at the same time threw the province of Khorasan into a state of ferment that made it a particularly happy hunting ground for enemy agents and intriguers generally. This necessitated the dispatch of strong reinforcements from India, and led to our pushing up to Meshed, and, later, to frequent "scraps" with Bolshevist troops in Transcaspia—"all of which," says the Report, "were successful, and added greatly to the prestige of our Imperial forces in Persia." In the Spring of 1919 the force was withdrawn from Transcaspia to Meshed, and in May of this year it was finally withdrawn entirely, leaving only a consular guard at Meshed. It would be interesting to know what state the country has fallen into since that date; but we are unlikely to get trustworthy information on the point just yet.

### *Indian Politics.*

The latest news from India seems to justify the cautious view expressed by one correspondent that an improvement in the general situation has begun, though things are very far from normal, and numerous grounds for anxiety still exist. The arrest of the principal Moslem agitators has so far resulted in no disturbances, and in itself that fact is satisfactory, though it must be remembered that in various recent cases the actual hearing has been made the occasion for disorder. Meanwhile the restoration of civilised government in Malabar goes steadily on, and it is possible to hope that the Hindu inhabitants will shortly be relieved from the terror of their Moslem "brethren." The proclamation of an independent kingdom in these parts will not come as a surprise to readers familiar with the troubled history of the Moplah race. By Indian reckoning it is not very long since an enterprising Moplah proclaimed himself Lord of the Indian seas and Defender of Islam, but he ended his days chained to his oar in a Portuguese galley, and that was a much worse fate than any which is likely to overtake his modern imitator.

### *The Food Question.*

Much the most important item of the week's Indian news is the concise statement that recent rains have removed the last traces of anxiety regarding the monsoon. That means that the country, taken as a whole has food in sight and to spare for the next twelve months, and also sufficient raw materials to keep the principal industries going. An index to the food-position is furnished by the reports on the rice-crop, which is said to be rather better than "normal." The somewhat puzzling official definition regards a normal crop as one which should satisfy growers, and the standard is very seldom reached in practice, so that a yield which exceeds the normal should relieve the scarcity of this particular staple from which Asia has been suffering for so long. It is to be hoped that the favourable season will soon bring down the price of wheat, which at the end of last month had been pushed up to an indefensible figure. So far as we can learn, the rise was due entirely to violent speculation in stocks which, though smaller than usual, were not really inadequate; the result was acute distress in the towns, and a corresponding increase in political anxiety; and if the gamblers have beendisappointed, they will find no sympathy either in town of the country.

### *Repressive Legislation.*

It may seem a little curious that a committee composed mainly of Indian politicians should have chosen the present time for recommending the repeal of what

have come to be known as the repressive laws. But the truth is, as we have previously pointed out, that the laws in question are so mild in themselves, and have been so leniently administered, that their existence has made very little difference in the situation. The most significant feature of the Committee's report is the recommendation to retain a few of these laws for the present, on the ground that the efforts of certain agitators have for the time being shaken the respect for law, and created an atmosphere of preparedness for violence. The fact has long been obvious, but it is one to which many politicians have deliberately closed their eyes and its formal recognition may be taken as marking one more step towards reality, the goal which only a few years ago seemed to be hopelessly out of reach, but which the working of the new institutions has already brought so much nearer.

## THE WEEK AT HOME.

LONDON, Monday Evening.

**The Irish Negotiations.**

In politics, as in metaphysics, it is almost beginning to seem that time does not exist, so leisurely are the moves of either side in the Irish negotiations, or rather the preparations for the negotiations. But in politics at any rate, we know that time really does exist, and although it may not be the essence, it is still an element of the problem. However, one step forward has to be recorded.

Mr. de Valera has more or less definitely withdrawn his demand as to independence, thus securing a continuance of the discussion, and, according to some, "demonstrating at once his sincerity and his moderation." Other observers suggest that his conduct is compatible with dissemblance until the last possible moment, and that it does not suit his purpose to play his full hand at once; still others think he is bluffing all the way through. I believe the real situation is that he is a very ordinary person, who has come to the top by force of circumstances rather than character; that he is doing his best for his side, and that he is not a particularly skilful player, or altogether sure of himself or his position.

The Government has drawn up its reply to his note, but this has not yet been published or despatched, as it is considered wise that it should be submitted to all the Cabinet for approval. The Cabinet being scattered at the moment from the Highlands to Geneva, this is rather a lengthy process; but it is held to be certain that it will not block the path for a conference, and unless some untoward event intervenes—as it has done so often when there has been the dawn of a better day in Ireland—it is likely that the conference between England and Ireland will take place in October. It is to be noted that there is still rioting and shooting in Belfast, but elsewhere the truce seems to be faithfully kept, and Irish public opinion wholeheartedly hopes for the success of the discussions.

**Mr. Lloyd George and Washington.**

The Prime Minister is better in health, the offending tooth which caused so much pain having been removed by a local dentist. (The report that the Inverness Museum had claimed the molar as an illustrious exhibit will have to be investigated exhaustively by some future historian). But Mr. Lloyd George is still by no means well, and he will do wisely to make the most of his next three weeks' holiday before Parliament meets again on October 18.

With the Irish negotiations likely to occupy the rest of this Autumn, to say nothing of the unemployed problem, his time will be fully occupied; and although it is well known that he would have liked to have visited America, he will be unable to visit Washington for the Conference there.

It is very doubtful whether Lord Curzon will be appointed to attend. Mr. Balfour would have been warmly welcomed by the Americans, who still recollect his tact and urbanity during his war mission to the States, but his presence is also desired at Geneva, where, despite the gibes of his cousin Lord Robert Cecil, he is doing good work in the direction of making the League of Nations more of a force in European politics.

In these circumstances we may have to fall back on Mr. Bonar Law, whose health is now nearly recovered. Mr. Law suffers from the disadvantage (in American eyes) of being a Canadian, and he is rather a pessimist by nature—although the buoyant air of New York and Washington may restore him; but he is a hard worker and an honest dealer in politics, both national and international, and the country might have a worse representative.

It is curious, by the way, that although both the British and the American Press have been full of the Conference and the great work it will do in securing the peace of the world, very little public interest is as yet taken in it on either side of the Atlantic. We were told once before that the world was made safe for democracy, and we do not believe quite so readily nowadays.

**Another Woman M.P.**

The Liberals held the seat at the Louth by-election, and the late member's widow headed the poll by a considerable majority. This is the second woman in the House of Commons, and the first British-born woman. Lady Astor is an American by birth. She has often taken part in debate, but she has not made much impression, being seemingly unable to get away from sex-antagonism and pussyfoot propaganda, neither of which is very popular. Mrs. Withrington, her new colleague, is more silent by nature, but an active worker in Lincolnshire, where she did much good in alleviating the distress consequent on the Louth disaster last year. She is, I understand, a Liberal of the old school without any qualification—a proper Wee Free.

**The Unemployment Discussion.**

The London Mayors have seen Mr. Lloyd George in Scotland, as well as a good deal of Scotland in the process—let us hope with some satisfaction to themselves, if not to the unemployed whom they represent. Meanwhile the latter are being exploited by Socialists and Communists and others—even by Free Traders in a feeble way; and Labour has propounded its remedy, which, as everybody knew beforehand, would simply be the State. The idea that the State has a bottomless pocket seems ineradicable in the official Labour mind; it does not realise that this is merely a question of taxing the employed for the unemployed, and that by doing so, it may increase the amount of unemployment, and make things worse.

A more able contribution to the discussion has been made by Mr. Philip Snowden, in *The Times* and *The Daily News*. Mr. Snowden appears to have been more or less cold-shouldered out of the Labour Party; which is a pity, for he has both brains and courage—qualities somewhat to seek in the ranks of parliamentary Labour. He points out that the real trouble is that Capital and Labour both want too large a share of the product, and are working against each other instead of together. He urges that "ca'canny" should be stopped, that machinery should be exploited to its utmost, and that Capital should endeavour to see that Labour is secured against its main incentive to slacking—the fear of the sack when the job is done. In essentials this is a plea for goodwill and better understanding; and although both sides are irritated with each other, it should not fall entirely on barren ground.

**Foreign Exchanges and Exports.**

The discussion does not, however, touch one of the great difficulties of the position. Britain supports the surplus population which she cannot feed herself by the profits of her export trade, which enables her to import food. It is, as the Germans recognised before the war, our "Achilles heel"—but only one heel is vulnerable, and the Germans, as usual, got hold of the wrong leg. It is not in the politics of war, but the finance of peace

Digitized by Google

that the trouble has come, and that by reason not of submarines but of foreign exchanges.

Our own currency is inflated, but not beyond the reasonable limits of health; but foreign currencies are inflated to a degree at which they can neither buy nor sell with any precision outside their own boundaries. They want our goods, and we want theirs; but in the present "economic Bedlam"—as Sir Alfred Mond rightly characterised it—what should be a simple matter of exchange becomes an impossible barrier.

The position improved to a certain extent during the earlier part of this year, but it has recently become worse, from a combination of different causes: And there are signs that this will again react on our home economic position by necessitating a further inflation of prices this coming autumn and winter, with its concomitant, an increase of the cost of living—or at least a cessation of the decreases which have characterised the index number since last December.

**Why Australia Won.**

Armstrong, the Australian captain, has been giving his opinion as to the reason why we lost the Test Matches. For one thing, our fielding was at fault; some of our players gave away as many runs as they made. For another thing our men were too old—although most of them were younger than Armstrong himself; but perhaps a cricketer, like a lady, is really only as old as he feels. The third and deciding factor was that we played too many professionals, and these, according to Armstrong, are bound to play more for themselves and less for their side than the amateur. There is something in this contention, particularly when it is coupled with the fact that the only teams that beat the Australians were young amateurs. But I am bound to add that the amateurs in the England teams did us better than the professionals, and that whether the professionals played for themselves or their side they made a pretty poor show in any case.

**What is Full-length.**

Lord Leverhulme is again the hero, or the victim, of an art controversy. A year ago, when Mr. Augustus John painted him, he found the picture too big for the place chosen for it to hang, and cut off his head to spite the artist, leaving a decapitated magnate and a furious painter. Since then he has sat to Sir William Orpen, who quoted him various prices for half, three-quarters, and full-length portraits—the head to be included in each. Lord Leverhulme went the whole hog, so to speak, and ordered a full length; he now claims that there is not enough of it for the price. Apparently one buys pictures like Sunlight Soap, by the yard, in the twentieth century.

**The Week's Books.**

The Autumn publishing season is not yet in its full swing, but some interesting books have already been produced.

"The Life of Jean Henri Fabre" (Hodder and Stoughton) by the Abbé Augustin Fabre, is a capable life of the great French naturalist, which needs little recommendations to those who have enjoyed Fabre's writings.

"Angels and Ministers" (Jonathan Cape) by Laurence Housman, is a series of three short plays; I mention it partly because it is the first time, I fancy, that Queen Victoria has been one of the *dramatis personae*, and partly because there is a distinct play-reading public which enjoys these delicate trifles.

"Lords and Commoners" (Fisher Unwin) by Sir Henry Lucy, will appeal to a wider circle. It is another of the author's political scrapbooks—his store of recollections seems inexhaustible—and it contains several happy portraits. Most interesting, perhaps, is his contrast or comparison between Churchill pére and Churchill fils. In both Mr. Lucy discovers the same kind of eloquence, the same marvellous memory, "the same slightly bent figure as if pressing forward in a race, the same long stride and the same loosely swinging arms." It might have been added that Winston has proved himself a greater man than Randolph—or is it that the times are kinder? The father made only one bad mistake, and it ruined him; the son's career is strewn with blunders, but the blunders only seem to set off the solid achievements.

Everybody knows the *Times Literary Supplement*, and therefore everybody knows Mr. Clutton-Brock, who often writes the leading article, and who frequently discurses religious as well as literary matters. He is occasionally a little rhetorical and diffuse, but nearly always interesting and sometimes provocative; and on the whole I think I like him as well wholesale in a book as retail in a weekly. The reprint of his papers is called "More Essays on Books," and is published by Methuen.

OCELLUS

## NEWS IN BRIEF

In addition to the 3,000 Cossacks who had already entered Bulgaria, a further batch of 2,500 from Gallipoli and Constantinople last week landed at Burgas. The men, who were fully armed, will shortly be disarmed.

Five aeroplanes at Bucharest were destroyed by a falling bomb; 10 men were killed and four injured.

A report by Lord Rawlinson on the operations of the force employed in North and North-East Persia, 1917-21 was issued last week. The force was withdrawn last May, leaving a small Consular escort at Meshed. In very trying circumstances the conduct of the troops, both officers and men, was, says Lord Rawlinson, "worthy of the highest praise."

The Egyptian Government has decided, states a Reuter message from Cairo, to continue the present restriction of cotton growing areas for a further period of two years.

The *Morning Post* understands that the British and Italian Governments have virtually reached an agreement regarding the steps to be taken to safeguard Albania from aggression and thereby to safeguard Italian interests in the Adriatic.

It is reported from Athens that an express train was derailed at Larissa through coming into collision with a goods train, and that several people were injured.

An Armenian youth believed to have become insane as the result of a massacre from which he recently escaped in Turkey has murdered the sacristan of the Armenian convent in Jerusalem.

A resolution brought forward in the Council of State at Simla, reports Reuter, for the transfer of the German portion of the Rhodes Scholarships to India was accepted by the Government.

Messages from Bengazi (Cyrenaica) state that the Italian Crown Prince, who is making a tour of the Italian possessions in North Africa, was enthusiastically received by the population when he landed there.

Our Belgrade Correspondent writes (September 19):—The ex-Emperor Karl's "Royal and Imperial" train has been allotted to Yugoslavia by the International Committee, and has arrived at Liubliana.

## CARDINAL BOURNE AND THE ARAB DELEGATION.

The Arab Delegation recently interviewed the Cardinal Archbishop of Westminster. After a review of their interview in Rome with the Pope the Delegation explained the reasons why they had approached his Majesty's Government on the subject of Zionist activities in Palestine. Cardinal Bourne reminded the Delegation of the speech he had made in Liverpool on his return from a visit to the Holy Land in 1919, and expressed his sympathy with the Arabs in the difficulties in Palestine at the present time. He expressed regret that the Commission appointed to inquire into questions concerning the sacred sites had not yet been able to carry out its work.

## LORD ALLENBY'S DONKEYS.

"No one seems to have remarked" writes a correspondent of the *Morning Post*, "that Lord Allenby was the first military commander to discover the value of the donkey. When the "Bull" (as the Egyptians call him) took over the command of the Egyptian Expeditionary Forces there were not enough horses to mount his cavalrymen. So this master of ways and means requisitioned practically all the asses in Egypt. There was genius in the move, for the achievements of the donkeys were a revelation, rivalling the camel's. Having a thick coat, the donkey, like the camel, does not perspire, and so can go for a long time without water. On a fistful of tibbin it would trek from 20 to 40 miles a day. I shall never forget the occasion when the Field-Marshal was held up in the narrow paths of Gaza by droves of donkeys, each carrying a trooper and his equipment. Allenby was racing to the front in a fast car. One of his staff had to set about the mokes with a riding crop to clear a path. The donkeys raised a discordant chorus, and Allenby resumed his progress with a smile."

*(From Our Own Correspondents).*

## EGYPT.

*Cairo, September 9.*

### The Changing Situation.

Since my last letter there has been no obvious change in the local political situation ; but it will be remembered that in that letter I laid stress on the sudden change to a feeling of optimism among the prominent Egyptians who glean carefully such information as leaks from official circles here, which, of course, includes any scraps that may emanate from the Official Delegation abroad. I felt, then, that it was too sudden to be natural. To-day another swing back can be recorded, not altogether pessimism regarding the outcome of the negotiations—though Adly Pasha's interview to the *Daily Express* correspondent in Paris, wherein he stated that he was optimistic "on principle," has damped some of the more ardent hopes—but a reversal of what I may term confidence in the country. Hitherto the prominent Egyptians who have been supporting the Adly Cabinet, who include the influential dissentient ex-members of Zaghloul's delegation, have been sure that if Adly Pasha could return from London with a signed provisional Treaty guaranteeing the independence of Egypt, the country would accept it. As things were then, it was a natural assumption. There was a lull; Zaghloulist propaganda was not, as far as could be judged, making any great headway; and all things pointed to the common-sense of the majority inspiring support of the Official Delegation if an acceptable compromise was reached in London.

### Zaghloul's Tactics.

But lately Zaghloul's tactics have caused a certain perturbation in high circles. To an onlooker it is a situation pregnant with interesting developments: to the Egyptians who are standing behind Adly it is disquieting. One must understand the circumstances to appreciate it. According to the present law of the land, unauthorised public meetings are forbidden. It has been realised for some time that Zaghloul wished to hold meetings, but to date he has not made any open move of the sort. A few days ago, however, an apparently inspired delegation from one of the provinces visited Zaghloul and invited him to come to their district and address the people. Zaghloul, according to well-informed sources, has accepted the invitation. The precedent having been set, other deputations probably will give similar invitations and before long Zaghloul will have a strong campaign arranged.

The Government foresees itself being placed in a very delicate situation: if it prohibits the meetings, it will be accused before all the world of stifling liberty of speech and curtailing political freedom from motives of fear; if it does not prohibit them it will be countenacing breaches of the law of the country. Added to all this is the uncertainty of the outcome of the London negotiations, the progress being daily made by the old Nationalist Party, with its policy of unbounded extremism, the pending visit of the British Members of Parliament, and the audacious propaganda of the Zaghloulist newspapers.

### Government's Difficulties.

It is a delicate situation. And I think I am not unduly pessimistic when I say that it may even prove to be the prologue to a situation still more delicate. It is not the fault of the Government, rather is it due to the untoward circumstances in which the Government unhappily has been placed. The absence of the leaders of the Cabinet has weakened the Government: English officials have told me during the last few days that they have been forced to assume responsibility for urgent policies which should never be decided upon by anyone but the Minister. Egyptians of many classes are complaining that the Government is turning all its attention to politics, to the exclusion of administration. Public security is becoming affected; robberies are increasing, and from the provinces come daily reports of daring crimes. The police are doing their best; but in the absence of a strong and determined rule the inevitable disrespect for authority is having its natural consequences. These features are all natural to the situation as it is. I would emphasise that it is not a situation created by the Government, but rather a situation into which the Government has been forced. There are two safe remedies: the strengthening of the Administration, which is impracticable pending the return of the Prime Minister and his colleagues, or the stronger application of martial law, which is undesirable at the moment because of political considerations.

### "Zaghloulism" and Sedition.

Having shown the drift of things, I think it is easy for the logical deductions to be made. Weeks must elapse before the end of the negotiations comes into sight. In the meantime Egypt will be invaded by curious Members of Parliament; Zaghloulist propaganda will continue; and the continued enforced laxity of the Administration will weaken further that respect for authority which is so imperatively essential for public order in all countries and in Oriental countries more particularly. The troubles in India are proving fruitful sources of propaganda; and the effect of the Irish situation may be indicated by mention of the fact that Zaghloul Pasha sent a cable to de Valera congratulating him upon his reply to the British Government's offer for a settlement. It is often urged in the Zaghloulist Press that the Adly Cabinet remains in power because it has the support of the British Government. But it is a pathetic paradox that the British Government can do nothing to help the present Cabinet without inflicting upon it injuries more serious than that from which it is now suffering. Yet the time is ripe for the strong hand. No man, however popular he may be, however powerful he may be, should be immune from the law. Zaghloul Pasha's policy and Zaghloulist propaganda are driving masses of ignorant Egyptians to a discontent which may result in frenzy. One can understand the reluctance to check him, because of the capital that would be made from it. Plainly it is a question of two evils: the effect of Zaghloulism, if I may so term it, or the effect of the stoppage of Zaghloulism, on the justifiable grounds that Zaghloulism is, in the circumstances, sedition.

## SUDAN.

*Khartoum, September 1.*

### Floods and Storms.

Heavy rainfalls are reported throughout the Sudan, causing extensive damage in certain localities. Serious floods occured at Atbara—the town being flooded to a depth of some three feet, resulting in a collapse of many buildings. It is estimated that at least 200 houses and 94 shops are in ruins, and some 700 people are homeless, being housed temporarily in tents, etc., which were sent post haste from Khartoum. A certain number have been accomodated in railway sheds and wagons.

At Merowe a succession of rain storms and floods poured through the town doing severe damage. A similar state of affairs is reported from Tangassi, where 75 shops, 50 of which were Government property, have been completely demolished. The floods were so severe that the large "Abu Haras" trees in the market place were not only uprooted but were carried away for several hundred yards.

Dongola town and Korti have also suffered severely, especially the latter, where all Government buildings with the exception of the Rest House, part of the Zaptia, and the Mamur's house have been destroyed.

Digitized by Google

The damage to the Railway has been very extensive 2,000 yards of track being washed out between Dagash and Abu Dis; while between Abu Hamed and No. 6 Station some 4,500 yards of track were destroyed, and between Nos. 5 and 6 about 15 kilometres of line were badly damaged. The Kareima line was also badly washed out, and is still under repair. Naturally there have been abnormal delays in the mail service, all communications having been cut for about 15 days. No. 4 Station, situated in the middle of an arid desert was completely destroyed, the only signs of a station having been there, being the tablet machines, which stood forlornly upon their pedestals.

His Excellency the Acting Governor-General has been indefatigable in his efforts at organising relief works in the various flooded areas. and is reported to have made Merowe his Headquarters for the time being.

---

*Khartoum, September 5.*

**Egyptians and the Sudan Civil Service.**

In a recent article on the Sudan which appeared in the *Omma* the Sudan Government are accused of filling up government appointments with Englishmen and Syrians, to the exclusion of Egyptian candidates. This is interesting in view of the fact that the rank and file of the Legal and Posts and Telegraphs Departments are almost entirely of the Egyptian Effendi class, and that there has been a certain amount of 'grousing' on the part of the Sudani that he cannot obtain employment in these particular offices. The feeling was so strong that in the League Matches where an All-Black team met one from these Departments proceedings were rather in the nature of a free fight, with sympathetic argument amongst the various lookers on. The *Omma* make a point of the fact that the medical service is almost exclusively recruited among Syrian graduates from the Beyrout College, to the exclusion of graduates of the Sultanic School of Medicine. If the facts were examined more carefully the *Omma* would find that the average Egyptian medico is very much averse to service in the Sudan, in view of the fact that a doctor is liable to serve in all sorts of unpleasant spots in the Back-of-Beyond, many hundreds of miles away from the specious delights and doubtful pleasures of even such great places as Khartoum and Port Sudan. Apart from the fact that the Egyptian is by temperament unsuited to the country, it is generally recognised that, although thay make brilliant surgeons, the Egyptians are not so successful in the role of physicians or general practitioners, and must take second place to the versatile Syrian in this respect. The posts of mudirs, inspectors, commandants of police, etc., are filled by Englishmen for the simple reason that the Egyptian cannot administer the Arab or Sudani as efficiently, as is fully evinced by a brief study of the history of the Sudan under Khedivial administration. Even in those remote days the Egyptian Ministers in Cairo found it necessary to bring in foreigners to administer their Sudan territories, and the rapid advancement of men such as Lupton, Dr. Emin and Slatin Pasha over the heads of Egyptian officials long resident in the country, under a purely Khedivial administration, can in no way be attributed to favouritism. It is unfortunate for the aspirations of the Nationalists that after even a lapse of so many years they are unable to produce an Egyptian Warren Hastings.

**The Political Situation.**

The apparent deadlock in negotiations between the Delegation and the British Government is looked on here as the natural sequence of events. Local opinion is to the effect that had Adly Pasha given way on minor points and an agreement been signed, Zaghloul would have made the most of this in a political campaign which would have resulted in the overthrow of the Adly Cabinet and the appointment of Zaghloul and his satellites in their stead. As it is the Delegation will come back and, as a friend put it to the writer, say to Zaghloul: "Sorry old bird, but we could not do any better, suppose you push off and see what you can do after all your hot air." Result Zaghloul and his lieutenants will proceed to England, have an extraordinarily good time at the expense of the Nationalist Party Funds, and come back eventually discredited, by which time the populace will have tired of him and will have set up another idol in his place. Considerable amusement is evinced at the selection of the Members of Parliament who are to visit Egypt and go into the momentous question, the more especially as they appear to be all lights of the Labour party, and the odds are heavy that they are totally ignorant of the Oriental mind. A query has been raised whether the three ex-colliery employees have been specially selected to deal with the Sudan question.

**The Floods.**

An interesting incident in connection with the recent flooding of Atbara Town was that telegrams were despatched to both the *Sudan Times* and the *Hederet el-Sudan* alleging that the damage caused to private property etc. was entirely due to official negligence. The authorship of this charge has not been made public, Similar charges were brought against the authorities in respect of flood damage to cultivation in Khartoum Province during 1920. It is quite possible that these messages were composed by sympathisers with the Nationalist party; but on the other hand there has been a certain amount of chafing at the somewhat antiquated methods adopted, or possibly inherited, by some Departments, and the occasion of the floods may have been seized upon as an opportunity of venting the discontent of the non-official element. The Government are to blame in maintaining a ponderous secrecy on the subject of the various projects they undertake, and it is only recently that a Press section of the Intelligence Bureau has been instituted for the purpose of making known officially the various occurrences throughout the country.

The question of flood protection has always been a difficult problem in the Sudan, as it is impossible to forecast what volume of water will have to be dealt with. Atbara has presented greater difficulty than other localities, in view of the town being built at the foot of an eastward slope from the desert and across the natural water ways towards the Nile. It has therefore been necessary to evolve a scheme of drainage in a southerly direction towards th Atbara river; and this has hitherto consisted of a system of banks and ditches east and west of and between the town and the railway main line, which converged at a point to the south of the town, discharging into the Atbara river through a cutting and regulator in the bank. This system has been very effective for many years, in spite of the usual difficulty of heavy sand deposits in the ditches, from *habubs* immediately preceding heavy rain, which impedes the free discharge of the flood water. In the case of the recent floods, however, the volume of water was so stupendous that no protective works except on a colossal scale would have proved adequate. Under these conditions it would appear only reasonable that the author of the telegrams should be made to substantiate his charges against the authorities, and the proceedings be made as public as possible.

## ROUMANIA.

*Bucharest, September 13.*

**The Political Situation.**

General Averescu on his return from his provincial tour has resumed the presidency of the Cabinet Council, and is also acting *ad interim* as Minister for Foreign Affairs, during M. Také Jonescu's absence. The General's appeal to the democratic elements in the country for collaboration has been favourably received not only by the Government papers but also by those of independent views, and hopes are expressed that those to whom the appeal is addressed will respond to it. Opposition journals, however, doubt whether the Cabinet's efforts for a compromise will succeed so far as to smooth matters over. Apart from the Liberals, who are avowedly working toward the overthrow of the Cabinet, the other important opponents are the Ardeeni (National Transylvanians), the Tzaranists and M. Jorga's group. The Ardeleni under M. Maniu and M. Vaida maintain their antagonistic attitude toward the Cabinet, and seem to have come to a tacit agreement with the Liberals. M. Jorga advocates a national Government. The Tzaranists alone show signs of an eventual understanding with the Government, but formal *pourparlers* have not yet been broached. No hurry is evinced on either side, but it is believed that official negotiations will be entered upon in due course.

**The Falling Leu.**

Home politics have this week been largely put in the shade by the extraordinary manoeuvres on the Paris Bourse in connection with Roumanian exchange. This has fallen to an alarming and quite unjustified rate. People here are inclined to believe that the collapse is only temporary, and brought about mainly by wild speculation *à terme* on lei, which has been going on in Paris during the past two or three months on an unprecedented scale, resulting in forced realizations and the merciless sacrifice of speculators who were unable to meet their obligations. But once this gambling fever has passed, it is confidently held that the Leu will return to its true level, commensurate with the potentialities of one of the richest countries—if not the relatively richest country—in Europe; although the exploitation of its vast riches is for the moment hampered by inadequate transport facilities. It must not be forgotten that this handicap is a direct outcome of the war, a result of the deliberate plan of the implacable enemy, who dealt his last blow by destroying and carrying off the rolling stock in order to thwart the ulterior economic development of the country. But the railway traffic is being visibly improved—although it cannot for the moment cope with the progressive development of the various branches of production—and to judge by what has been achieved during the last two years, it may reasonably be assumed that normal conditions will be restored at no distant time.

In some quarters here the collapse of the exchange is not viewed altogether with disfavour, because it is considered that, with the foreign exchange resulting from the coming grain export, the State will be enabled to redeem a considerably larger amount of lei than would otherwise have been the case. Thus, this particular dark cloud has its silver lining. It must be admitted that importers with liabilities in foreign currencies will have very hard times unless their creditors take the circumstances into consideration and renew their bills until reasonable times. On the other hand profiteers, urging the low value of the leu, are not slow to extort higher prices for commodities, to the discontent and dismay of the consumer.

**Various.**

The Royal Family is expected to arrive on September 20.

H. E. Dr. Hendrik Muller van Werendycke, Netherlands, Minister Plenipotentiary to Roumania has returned from leave.

Two English scholars Dr. A. R. Wright, the Vice-President of the Folk-lore Society, and Professor Sidney Chapman, of Manchester University, have delivered lectures at the Fondatia Carol here, on the invitation of the Roumanian Society of Sciences. Dr. Wright lectured on the history and origin of the Alphabet and Writing, and Prof. Chapman on the relation between the sun and the earth's electricity. Both lectures, accompanied by lime-light views were of a fascinating and instructive character and were greatly enjoyed by as elect and appreciative audience. Both the visitors have been touring in this country for the last few weeks, lecturing at the various educational centres.

A group of English politicians and journalists is expected to arrive here shortly. They will be headed by Sir Harry Brittain and other Members of Parliament, and will spend about three weeks in this country, visiting various regions.

## YUGOSLAVIA.

*Zagreb, September 14.*

**Relations With Hungary.**

Satisfaction is felt in Yugoslavia at the unwise behaviour in Hungary, which has necessarily provoked the wrath of the Entente; and events are watched with the keenest interest, and it is hoped that the rumour is true that the Supreme Council will give a mandate, in the event of sanctions being necessary, not to Italy but to the Little Entente. Italy is naturally interested in keeping Czecho-Slovakia and Yugoslavia apart, and fears that concerted action on their part would lead to the formation of a corridor through Western Hungary. The part which Yugoslavia would have to play would be the immediate re-occupation of the Baranya. News comes through that the Magyars are persecuting the pro-Yugoslavs there, that at Baja a wine-merchant named Yovanovitch has been flogged to death, and a land-owner named Vladimir Djkuitch hung. Large numbers of the miners of the Pechuy collieries are being interned, and the output has almost ceased, as many thousands of the labourers have fled into Yugoslavia. The consequence is that Hungary is failing to deliver the quantum

of coal which it is bound to do under the Treaty, thus bringing about a serious threat to the fuel supply of the Danube steamers and Voivodina railways. Yugoslavia has here a very solid grievance ; for it is another instance of Hungary's bad faith and refusal to fulfil her obligations. Yugoslavia is naturally pleased to see Hungary showing itself in its true colours before the world, and thus counteracting the propaganda which the Magyars had so successfully exerted on the Allied missions in the country.

A convention with Italy concerning the Adriatic fisheries has been signed at Pola.

**An Amazon.**

A girl named Jelena Gruitchitch, from Gromachnika, near Pozhega, in Slavonia, who must be of an unusually enterprising disposition, won notoriety as a leader of a gang of robbers before the war, was captured and sentenced to five years penal servitude. Now she has succeeded in escaping, taking with her a little boy to whom she had given birth in gaol.

*Belgrade, September* 19.

**M. Protitch's Proposals.**

The latest political sensation is the present attitude of M. Stoyan Protitch. The Opposition press maintains that the Democrats are greatly disturbed by it, but the Democratic press regard it as an anti-climax, as a *ridiculus mus* : they say that both the Narodni Club and Raditch are very disappointed, that the latter is seeking a new orientation, which may even persuade him to make up his mind to do something. To the Radical Party it is a blow, certainly, for M. Protitch has a great record of services to his party, but it is doubtful whether his attempt to split it will have any really serious consequences. M. Pashitch's prestige is too great, and M. Protitch is, after all, a rather uncomfortable man to work with. His action may involve the Coalition in difficulties, but the Radicals and Democrats know well enough that they are both too weak to stand alone, and are dependent upon each other for their power. There is a report that the former are pressing for the Portfolio of the Interior, in which case M. Pribitchevitch would ask for Communications or Justice.

**Serbia and the Anatolian War.**

The war in Asia Minor is watched with a certain detached interest. The Serbs have had experience of both parties in war, and have a proper respect for the Turk. Of the Greeks their opinion is not so high. Practically they are interested in view of the spread of Kemalist propaganda among the Moslems of Southern Serbia and Macedonia and the rumours of an understanding between Kemal and the Bulgarian chauvinists. Sentimentally, they are interested in the fate of Angora ; for when Tamerlane defeated the Turkish Sultan Bayezid there, in 1402, the Serbian Prince, Stephen the Tall, was brother-in-law of the Sultan, and brought reinforcements in the form of a detachment of his Serbian heavy cavalry, who so distinguished themselves that Turkish historians are full of praise for their value.

**Rumours Again.**

Yugoslavia in general, and Zagreb in particular, are great places for sensational rumours. All sorts of silly stories have been current, for instance, about King Alexander's illness and absence in Paris. The question of the succession gave the gossips a grand time, and this reached foreign newspapers. One, for instance, was that Prince George was asserting his claims to the throne, as the elder brother. At length the Press Bureau issued a *dementi* categorically denying all these rumours as baseless, and reminding the public that Prince George, together with his uncle Prince Arsen, and his cousin Prince Paul, were the first to take the oath, at the head of the corps of officers, to the new king.

**Alfred Jensen.**

A prominent Slavologue and great friend of the Yugoslavs has died in the person of Alfred Jensen, a Swedish journalist, who was a recognised authority on the Slavonic languages and literature. He was born in 1859, and died on September 15, of apoplexy. He had written a great deal on Russian literature and translated much into Swedish. On one occasion he stopped a whole year at Dubrovnik to make a special study of Gundulitch, the Ragusan nationalist epic of the XVIth Century. He had also translated into Swedish Peter II. of Montenegro's famous "Gorski Viyenats," Mazhuranitch's "Death of Chengitch," and much of Zmaj Preradovitch, Matavulja, and other Yugoslav literary men. Since 1901, he had been adviser on Slavonic literature to the Nobel Foundation. Owing to his activities, Slavonic literature is probably more accessible to the Swedish reading public that it is of the English.

## BULGARIA.

*Sofia, September* 18.

**Political.**

The Sobranje finished its extraordinary autumn session on the 16th, and has adjourned until October 28.

The amendment to the Law regulating trade in cereals has been passed, and free trade is now the order of the day.

During the absence of M. Stambolisky, at Geneva, M. Tsanko Bakaloff, Minister of Public Works, is acting as Prime Minister ; while M. Daskaloff has become Minister of Foreign Affairs in place of M. Radouloff, who has returned to the Ministry of Justice. The *affaire* Boteff has been sedulously hushed up, and although at least two well-known public men are involved in the scandal, their names are being carefully kept in the background. M. Dimitroff is still acting as Minister of Railways, whilst the two chief candidates for the post are M. Karadjoff, Director of the Consortium, and M Manouloff, President of the Sobranje. After the affairs of the Consortium have been liquidated, M. Karadjoff will be without a post, so it looks as if he stands the best chance of succeeding M. Boteff. He is one of the old members of the Agrarian Party, and his selection would be highly popular among his fellow deputies.

In other respects, there is a lull in politics, although the Narodniak Party have embarked on a vigorous electioneering campaign throughout the country.

**The Army.**

Nothing fresh has taken place during the last week regarding the situation of the Army, although a reply from Paris to the request of the Bulgarian Government for the continuance of the 2,000 Frontier Guards on a conscript basis is daily expected. Only a few more voluntary recruits have been obtained, and these have been counter-balanced by the desertions that have already taken place among the newly enlisted volunteers.

Six thousand Cossacks, who used to form part of General Wrangel's Army, are now in Bulgaria, and as the great majority of them are reported to be free from Bolshevism, it would seem that the Bulgarian Government might do worse than to enlist the services of at least a few of them as Frontier Guards. They will not be exigent as to pay, and as they will only be engaged temporarily, it is not likely that any of the neighbouring countries would see in this action any menacing attempt on the part of the Bulgarians. At present 3,400 of the Cossacks are at Kovno and the remainder at Burgas, all under the orders and control of their own officers.

**Communist Activity.**

The decision of the Council of Ambassadors to suppress Bulgaria's Army has begun to have unpleasant effects already, and the recent events at the village of Kopriustica, which is situated some 10 miles S.E. of Pirdop, in the middle of Bulgaria, are significent of what may soon become everyday occurrences. The Mayor of Kopriustica was a Communist ; and the Government decided to replace him. A Government official proceeded to Kopriustica, but found that the Mayor was unwilling to vacate his office, and a mass meeting of the villagers held the same day heartily endorsed his refusal. The official returned to Sofia and recommended that a squadron of cavalry be sent out to quell this attempt at

Digitized by Google

insubordination; the Government requested the War Office to send the necessary soldiers, only to be met with the reply that there were none available. The matter, it is understood, has now been satisfactorily settled, but a little incident like this serves to show the impotent position the Government will henceforth be placed in.

This is not the only instance of Communistic activity; for an organised attempt was recently discovered at Burgas, where it was planned that about 200 local Communists should enrol themselves in the voluntary army. The presence of such a number of Communists wouldl have very seriously impaired the loyalty and discipaine of any regiment, and the authorities are to be congr tulated on having been able to avert the enlistment of the men.

While opinions differ very much regarding the real power of the Communist Party in Bulgaria, some people declaring that they constitute only a neglible factor, it should always be borne in mind that the Soviet are on the constant look-out for any adherents to their cause, and that money will be soon forthcoming if it is thought likely to justify its outlay. Although one does not want to raise again the bogey of the much talked of Soviet invasion of Bessarabia, supposing that this invasion actually did take place, it would be of incalculable value to the Soviet if they were able to count 6n assistance from the Communistic Party in Bulgaria. At present one can assert with a fair amount of certitude that the vast majority of Bulgarians are Anti-Communist; but the small minority who are not, could, if unchecked by armed force, cause great embarrassment to the neighbouring governments, as well as to the Bulgarians.

**The Arrest of Colonial Nicoloff.**

The case of Colonel Nicoloff is attracting a good deal of attention amongst the English residents here, and much indignation is expressed at his arrest. Briefly, the facts of the matter are that Colonel Nicoloff, who lives at Philippopolis, and was the Commandant of the Prisoners of War Camp at Philippopolis, was arrested on August 29 under "Article 4." Colonel Nicoloff is well known throughout Bulgaria for his English sympathies, and during the war he was exceedingly kind to the English officers who were prisoners of war. In fact the latter presented him with a gold watch as a mark of the esteem in which they held him.

It appears that Colonel Nicoloff is now accused of having indulged in some illicit trading during the war, but it is generally recognised that an intrigue is afoot against him, and it is hoped that he will be able to clear himself completely when he is tried.

It is said that the affair is connected with his pro-British feelings and that the intrigues form part of the Chauvinistic element, which was mentioned a few weeks ago in "The Near East." The Government stoutly deny this, and have promised to accelerate the holding of his trial in order that the matter may be quickly cleared up. In the meantime one cannot go into more precise details, although one wonders why his arrest was so long delayed and was finally made only three or four days before "Article 4" was abolished.

## GREECE.

*Athens, September 16*

**The War in Anatolia.**

The advance of the Greek Army which was somewhat arrested last week, has come to a complete standstill now. This, however, was only to be expected after the exceptionally heavy fighting of the last fortnight. The battle of the Sangarius river was by no means a small affair; on the contrary it is considered as the biggest battle that has been fought between the two enemy nations since the days of Byzantium. The stiff defence put up by the Kemalists was a surprise to the Greeks, who, instead of making the anticipated "promenade militaire" to Angora, had to fight desperately for every inch of ground they won.

The losses on both sides are said to be enormous. No estimate has yet been made, but one could safely say that the Hellenes have had at least 20,000 men "hors de combat." All the hospitals in Athens, Smyrna, and Salonika are full to overflowing, and more wounded are arriving daily.

The Army is now having a rest and is at the same time organising its new lines of communication. It is really wonderful to think that King Constantine's soldiers are fighting inland over 300 miles from their base, in a strange and most difficult country, with no roads and a very inefficient railway system. In spite of these serious handicaps the "Intendance" has excelled itself, and both war material and supplies are reaching the advanced lines regularly.

The sub-Chief of Staff, Brigadier-General Stratigos, arrived in Athens quite suddenly from the front last week, and was present at the many Councils of Ministers held during the last few days. Decisions of extreme importance are said to have taken place with regard to the future operations, but those in the know are maintaining a fish-like silence; and the many hours spent by expectant reporters in the long, chairless corridors of the Ministry of War were wasted. According to all indications, however, the idea of occupying Angora has now been abandoned. Winter in Anatolia is not pleasant, and soon after the rainy season sets in the entire country becomes impassable, rendering operations of any description absolutely impossible. Probably the Hellenes will find themselves obliged to withdraw from some of their advanced positions in order to prepare and establish themselves in their winter quarters.

It is to be hoped that before the armistice, imposed by circumstances, comes to an end, diplomacy will step in and succeed this time in untying the Gordian knot of Anatolia. Both Greeks and Turks are tired of war, and it is most certainly the duty of the Powers to do their utmost, and even use force if necessary, to stop any further purposeless bloodshed.

**The Outrage on Journalists.**

G. Soureas, one of the thee individuals who attacked M. Cavafakis and M. Melas in Stadium Street a fortnight ago, gave himself up to the Chief of Police. He stated that he did not know either of these gentlemen, but when he heard one of them say that the Hellenic front had been broken and that the Army was retreating, he attacked them with his stick. Soureas added that it was his intention to treat in a similar manner any other person spreading false rumours about the Army. The Chief of Police promptly ordered his release!

**General News.**

An agreement has been concluded between the British Minister in Athens, Earl Granville, and the Greek Minister for Foreign Affairs with regard to the maintenance of the graves of the British soldiers who fell in Gallipoli. A mixed Anglo-Greek commission will be appointed shortly for this purpose.

The departure to the United States of a Greek Mission has been postponed indefinitely.

The 1922 class has been called up.

The Russian Colonel Martation at present in Athens has volunteered to proceed to Asia Minor at the head of 400 Russians to fight against the Turks. The Greek Government has not yet replied whether it accepts this generous offer.

## CYPRUS.

*Nicosia, August 16.*

The late success of Cypriots who have been called to the Bar in London has had a stimulating effect. M. Halid Bey, Turkish Judge at Famagusta, is the latest addition to the rank of barristers, and several Greeks have been called in the last few years. Fuad Effendi, son of the Mufti of Cyprus, who is Turkish Judge at Nicosia, and Munir Effendi, of the Treasury Department, have now obtained long leave in order to study in London; and there are several other applicants.

The heat continues to be very oppressive, and the season is one of general holiday and slackness. There is a serious out break of typhus among the Russian refugees at Polemidia near Limassol, with over 30 cases in hospital, while there are a few cases in Limassol. The steamers continue to bring visitors, and the difficulty is to find accommodation.

Digitized by Google

*Nicosia, August 30.*

**Dispatch of the Secretary of State.**

Once more the Colonial Secretary has replied to the Greek Archbishop and Members of Council, who on May 31, sent a volume containing resolutions passed at various villages in support of the "union with Greece" agitation. The reply, which has been communicated by the Acting Chief Secretary, states that the Government of His Majesty the King can hold out no hope that this union can be approved. Regret is expressed in the papers, but an answer to this effect was of course anticipated by all concerned. It is to be hoped that the Greek leaders—although they, of course, declare that they will maintain the struggle by all lawful means—will now at last recognise the futility of troubling the Secretary of State with any more of these tiresome memorials.

**Cypriots in the Greek Army.**

The papers give the names of several Cypriots who have been wounded in engagements in Asia Minor, and of others who are taking part in the advance on Angora. Some of these were volunteers in 1912. Some of their letters are published. They describe the pride and enthusiasm with which the Cypriots are are taking part in the fighting. One of them who has been decorated by the King is called "the hero of Philadelphia."

**A Letter from Smyrna.**

A Correspondent, whose letter is published in the *Phone*, writes that great anxiety prevails regarding the status and nationality of Cypriots in that city. The British Consul, with all his good will and sympathy, states that he is unable officially to give his protection. Cannot, the writer asks, his compatriots in Cyprus, either through the Government or the members of Council, being about an arrangement by which Cypriots may be registered as British subjects, or, if this is not possible, as of Hellenic nationality? (This is quite in keeping with native ideas. It is imagined that a Government can "arrange" such a matter as a sudden change of nationality, regardless of laws that regulate such matters, if only it chooses to do so). The letter says that not only does the presence of the King at the front inspire in the highest degree the Greek troops, but that the manner in which the Ottoman people are treated both by the military and civil authorities causes surprise and "the deepest gratitude" among them. The Turks whose fighting force is given as 50,000, fight bravely but cannot resist the *elan* of the Greeks, who can assuredly overrun, if necessary, "the whole of Asia Minor."

**Government Examinations in English.**

Evidently a great impulse is being given to the study of English. At the recent examination an unusually large number of candidates entered and passed. The majority were of course Greeks, but there was a considerable number of Turks. An interesting feature in this examination was the success of the first girl candidate, who passed with flying colours. This was Angelica Christopoulou, daughter of one of the Greek Judges. She was warmly congratulated by the examiners, Canon Newham and Captain Ellis.

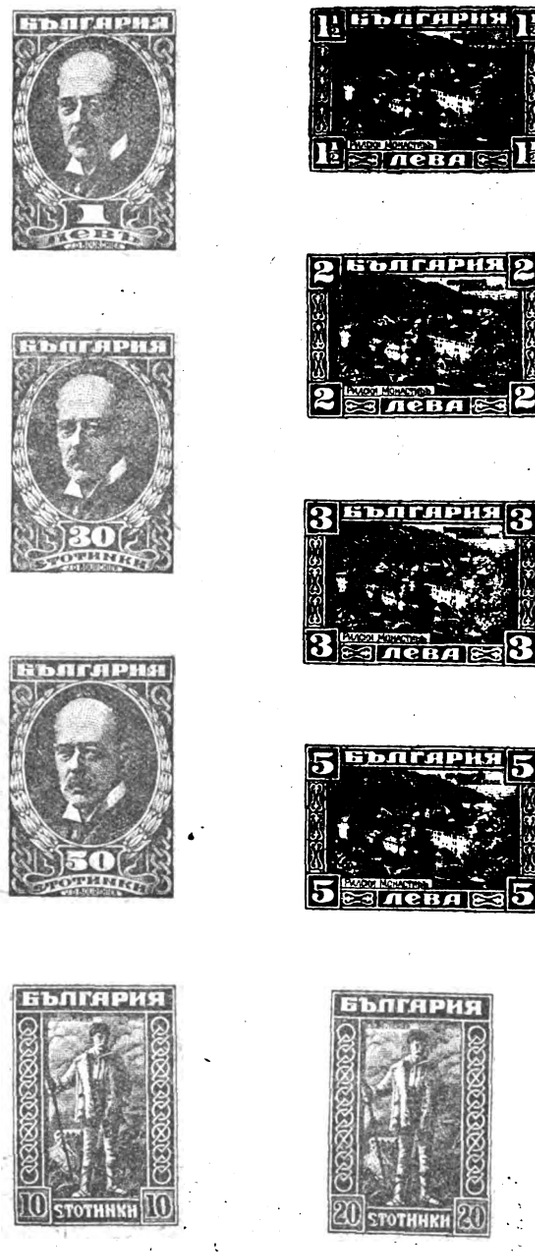
**General News.**

The Archbishop has been making a tour. The Bishops of Kitium and Kyrenia are also carrying out their annual progress through the villages of their sees. During these tours the fees due to their establishments are collected. and an opportunity s given to villagers to settle local questions affecting the churches, and also to lay before the prelates grievances which for various reasons they have not submitted to the Government directly, or through their representatives in the Legislative Council.

There has been some cooler weather, but the hot season does not end till mid-October.

## THE "BOURCHIER" STAMPS.

We publish below impressions of the set of nine stamps issued by the Bulgarian Government to commemorate the late J. D. Bourchier. Five of the series are portraits, three reproducing, no doubt faithfully enough, an early photograph, but they are hardly reminiscent of the kindly and vivacious personality which was the charm to all



ENGRAVED & PRINTED BY
BRADBURY WILKINSON & Co LTD
LONDON

who knew him. The two depicting "J.D.B." in the costume of a Bulgarian peasant have had to sacrifice likeness for the general effect. The other four stamps show Rilo Monastery, "Bourchier's Resting Place." The issue constitutes a unique tribute on the part of a country to a foreigner.

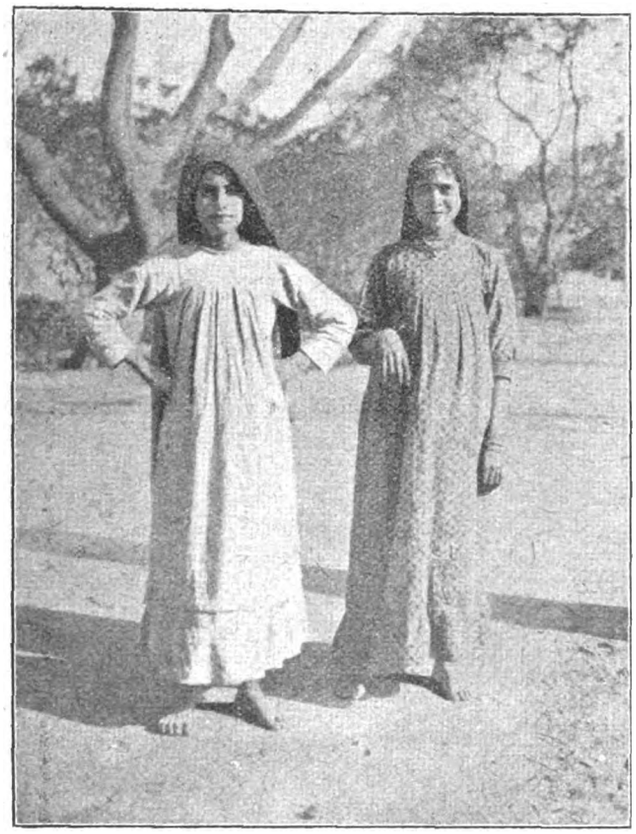
## THE COMING EGYPTIAN SEASON.

Information from a variety of sources points to a record "Season" for Egypt during the late Autumn, Winter and early Spring, with a considerable overflow to Palestine, Syria and Greece. Bookings have already commenced in Scandinavia, Holland, the United Kingdom and the United States, and two or three Nile Dahabeeyas have already their first complements. This means that hundreds of millions of piastres will be spent in Egypt for other things than cotton, and that Master Backsheesh will renew his broad and winning pre-war smile; the more fashionable donkeys will answer to modern names;

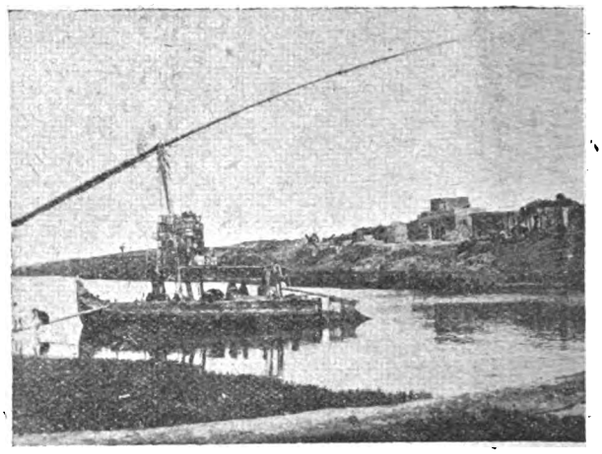


(Photo by Martin Briggs F.R.I.B.A
**Two youthful Egyptian Belles.**

Mrs Langtry will give way to Charlie Chaplin; Mark Twain will become President Wilson; and Monsieur Clemenceau will be progged behind while he ambles tiger-like beside that universal lambkin Mr. Lloyd George. All this will happen after the present visit of

**An Egyptian Potter and family.**

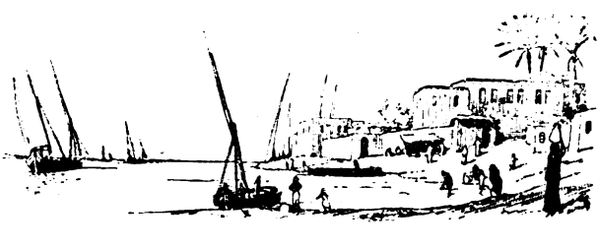
the British Labour Members of Parliament, who are now being enlightened and entertained by his Excellency Zaghloul Pasha, provided always that his Excellency's efforts for the welfare of Egypt do not comprise a veto on the visit of the non-political tourist and his wife and daughters. Messrs, Thos. Cook and Son have completed arrangements for a winter Nile service (including Palestine and Syria) on the fullest pre-war scale, whereas at this time last year they were in doubt whether they could obtain the British Government permit for the stocks of coal absolutely necessary for their Nile steamers. No such trouble faces Egypt's pioneer tourist agents for the coming season—which



**On a Branch of the Nile.**

fact, we trust, may be regarded as a definite sign that the world is moving towards happier times. Besides Messrs Cook, other British agencies and steamship companies are offering special Egyptian and Mediterranean Winter tours; and extensive advertising in the United States promises a considerable American invasion of the Near East. There are also indications that the round-Mediterranean trip, to include Greece and the Dardanelles, will be largely patronised from November onwards, and that a speedy truce or settlement between the Greek and the Kemalist Governments will assuredly result in a notable tourist traffic in Aegean waters:—amid

"The Isles of Greece, the Isles of Greece,
Where burning Sappho loved and sang."



## SOME COPTIC CLERGY I HAVE KNOWN.

(*Being extracts from a paper read by Mr. T. D. Moscona at the Manchester University on February* 10, 1921.)

When I was a boy in Egypt I was as devout as a boy could be. My red letter days were: Christmas, St. Basil's Day, St. Theodore's Festival, the Holy Week, and the "pardon" of St. Mark, the patron saint of Egypt. St. Mark's day was an exceptional day feast for members of the Greek Church in Alexandria, Greeks and Copts, i.e. the Orthodox and the Monophysites alike, keeping the anniversary of the martyrdom of the first Bishop of Alexandria on April 25. The only Coptic Church in Alexandria is named after the Martyr, and is situated, as it is alleged, over the tomb of the Saint. On his festival day this church is crowded with Greek pilgrims, who are cordially welcomed as visitors; and it was on one of these occasions that I was first brought into contact with the Coptic Church.

This Church of St. Mark, which stands close to the Coptic schools, and is a very spacious building, is internally like a Greek Church, inasmuch as the Iconostasis divides the choir from the inner temple; but unlike the Greek Church in Egypt, which does not tolerate the use of seats, the Coptic Church is modern in providing pews. The chapel containing the tomb of St. Mark is small, and very few people can enter it at a time. The walls are profusely decorated with ikons, and on a kind of dais covered with red velvet is a small box containing relics of the First Bishop of Alexandria, which thousands of pilgrims approach on their hands and knees to kiss.

Digitized by Google

The Copts follow St. Mark's Liturgy, and those of Basil, Cyril, and Gregory are also used, but all of them are very lengthy. Musical instruments are allowed; and I have observed that the Coptic *Kappelmeisters* are nearly all blind, and know the service by heart.

The Coptic deacons are rather peculiar. The order is composed of youths specially trained for this holy office. They are dressed in white, with blue surplices, and wear red velveteen caps on their heads. They assist the officiating priest, and also form the choir; but I could not help noticing that these young men sometimes did not seem to realise the sanctity of their office, joking among themselves, pointing at one another, and even making faces at the unsuspecting priest, under the tender eyes of their mammas behind the *Kafass* in the women's gallery.

The Coptic Liturgy is very difficult to follow for a member of the Western Church; but such is not the case for a Greek, because he can easily pick up the parts which remind him of Chrysostom's liturgy, and many a Greek hymn and Theotokia. The pronunciation of the Greek is awful; but I understand that the study of Greek will now be compulsory in all Coptic schools and seminaries, and that Coptic students will be sent to Athens every year to render themselves familiar with the language.

The Copts, as an Oriental people, like the melodious hymns, and their monotonous troparia are eagerly followed, time being marked by the head, hand, or foot. At the end of the service the "antedoron," *i.e.* the blessed bread, is given to the congregation. This is a small barley loaf, stamped with St. Mark's Lion and the Trisagion hymn. On St. Mark's Day a great "fantasia" takes place outside the church; the band of the Coptic School plays; and refreshments are distributed freely. On the same day many oblates are numbered among the Deacons, amid the mingled cheers and tears of their parents and friends. Many devout Coptic mothers also choose St. Marks' Day for the christening of their children; and there is such a rush for priests and baptismal fonts that the poor parents have to line up in queues, and the priest has to christen the neophyts two or three at a time. It is not at all unusual for a careful mother to put a distinctive ribbon round the waist of her naked baby before it is christened, in order that it may not be lost!

It was in 1913 that I made the acquaintance of Amba Johannes, Metropolitan of Menufieh and Behera, and Coptic Patriarchal Vicar in Alexandria. He has ever since treated me in a very friendly manner, and I have always tried to return his friendly sentiments. He is a very pleasant old gentleman, and would have made the best successor to Cyril V, if it had not been for the rule that the Coptic Patriarch must always be chosen from the monks of the Great Monasteries of the desert.

I had approached Amba Johannes, to interview him on behalf of a local paper. The editor of a Coptic contemporary was vigorously attacking the Coptic Church on the subject of reforms; and the Coptic Prelate denounced the articles and the editor as "battal keteer" (very bad), and as paid and inspired by ther "Brautestante" (Protestants). From this and other sallies, I gathered that he belonged to a very conservative school.

On Easter Day 1914, I went to pay my respects to Amba Johannes at the Patriarchate, near St. Mark's Church, and there was then a scene which showed me how greatly opposed are the Coptic clergy of the old school to foreign missions in Egypt, and how much they dread their influence. Five young Coptic schoolgirls, after a performance in French, began to sing the well-known Easter hymn, "Christ is Risen," which had probably been taught to them by their English mistress. An old priest seated near me asked me why the girls were repeating so many times "Alleluia," and wondered whether the hymn was Greek. I replied that it was an old hymn of the Church of England.

"St. Mark have mercy!" growled the old man. 'The impudent minxes! *They* dare to sing the hymns of the 'Brautestante' before His Grace!"

His Grace himself took no notice whatever of the episode, as he was sipping his coffee at the time. But I remember that after the reception in talking with two young priests the subject cropped up, and one of the priests, gesticulating wrathfully said: "Only fancy that English mistress had the impertinence to teach our girls those foreign hymns. She knows that our dear Metropolitan—may he never see his house wrecked!—is not familiar with English, and she did it on purpose—on purpose! We want no heterodox interference. Thank God, we are "Massehen Morgooseen' (Christians of Mark), and we were Christians a long time before any Frankish nation!"

*(To be continued.)*

## TO OUR LADY READERS ABROAD.

"*THE NEAR EAST*" invites its *Lady Readers overseas* to enter a competition in which the Prizes will be as follows:—

**1st Prize £10.**
**2nd Prize £5.**
**3rd Prize £3.**

and five Consolation Prizes, taking the form of a year's subscription to *The Near East*, for the *best letters or articles* submitted in accordance with the following conditions:—

Competitors must forward to the Editor a letter or article dealing

(1) with the country or region in which the writer is resident or travelling (or has been resident or travelling) its people, its scenery, customs, folk-lore, or some kindred topic; or

(2) with some personal experience of the writer in the region or country.

Length 1,000-1,800 words.

The letter or article may be either serious or humorous in character; literary style is less to be aimed at than freshness of outlook. In other words, a competitor who writes as she would to an intimate friend and gives an interesting account or description of what she sees or experiences, will have as good a chance of winning a prize as one who sends in a more "correct" article on some well-worn subject.

Each letter or article must be legibly written (or typed) **on one side of the paper only**; it must be accompanied by a coupon (to be found on the last page) duly filled in; and must be addressed:

The Editor,
"*THE NEAR EAST*,"
1, Devonshire Square,
London, E.C. 2. England.

Competitors may adopt a pseudonym, if preferred, for purposes of publication; but correct name and address must be given for the Editor's information.

The Editor's decision will be final.

Unsuccessful articles or letters will be returned, if accompanied by an addressed envelope.

The Editor reserves the right to publish, at the usual rate of payment, any articles submitted which do not win a prize.

The coupon (on last page of cover) will be repeated in the next two issues. Competitors are restricted to three letters or articles; but each must be accompanied by a coupon—not necessarily of the same date.

See coupon on page xii of cover.

## PRINCE MAHMOUD HAMDY.

A Correspondent writes:—The death of Prince Mahmoud Hamdy on September 16, at the age of 61, will be regretted by numerous friends. The fifth son of the Khedive Ismail, he was sent to England at the age of nine, and placed by the Khedive's Agent, Mr. J. Larking, in charge of an English clergyman in Kent, Mr. Law. When after barely two years, he was brought back for what was intended to be merely a visit, it was found that he had almost completely forgotten Turkish, and what little Arabic he knew; and, as the Viceroy knew no English, he could only converse with his father through an interpreter. The story goes that when the Khedive spoke to him in Turkish he said to a brother "Tell him that I don't understand French." He might at this time well have passed as an English boy. He had a frank and open countenance and very fair complexion.

In consequence of representations made to him, the Khedive, who had no particular prejudices of his own, decided that he should be withdrawn from Mr. Law's care, and remain in Egypt to regain a knowledge of Turkish. He was for some time under the charge of Turabi Bey (whose wife was by the way, English), but continued to study English and other languages. Various plans were made for him. At one time he was destined for the British Navy. At another he was to be entered at a Swiss School. Finally he was marched off to the Military College at Abbassieh, near Cairo; where, however, his career was a short one. He was for some time educated at a house at Abdin where his younger brother Fuad, the present Sultan, was studying. He was married in due course, and settled in a "palace" in the Ismailieh quarter of Cairo. He alone retained his love of the English language and many English habits, and made many friends among both residents and visitors to Egypt. He was a well known figure at Shepheard's hotel. During the war he was a kind and generous friend to many British officers and others. To the end his genial manner endeared him to many who will deplore his loss.

## A LESSON FOR THE KURDS.

The Colonial Office announces that the trouble in the Rowanduz area, which was due to Turkish intrigue among the Kurdish tribes of Mesopotamia and to an invasion of Mesopotamian territory by a small Turkish force, has been dealt with successfully. A combined force of 200 local levies and police under British officers left Arbil on September 10th, and with the assistance of aeroplanes occupied Batas and two neighbouring villages on the 12th. A quantity of property, including cattle and grain, came into the hands of the Government forces.

The attack was a complete surprise. The force was subjected to sniping, and at one point came under heavy fire. but both police and levies showed great gallantry. The aeroplanes rendered invaluable assistance throughout the operations, and contributed largely to their success. The enemy casualties are estimated at fifteen to twenty. One of our machines was compelled to land and was wrecked. The pilot and observer, who were injured, were brought in by aeroplane after the pilot had succeeded in burning his machine.

Ubaidullah, the leader of the Kurdish malcontents, has come into Arbil to make submission.

---

Over 200 casualties were caused by recent fighting between Red Azerbaijanis and Russian Bolshevist troops at Baku.

Shaukat Ali, Dr. Kitchlew, Chulam Majadid, and Shankara Chariya last week at Karachi, where all seven of the Indian extremist leaders will be tried.

Syrian and Palestinian delegates meeting at Geneva under the presidency of the Emir Michael Lutfallah have appealed to the League of Nations to quash the mandates in Syria and Palestine, withdraw French and British troops and annul the Balfour Declaration.

Abd-el-Muneim, a robber chief in Samaria, has been wounded and captured by disguised Arab policemen.

Five aeroplanes at Bucharest were destroyed last week by a falling bomb; 10 men were killed and four injured.

It is officially announced in Jerusalem that the censorship of news in Palestine came to an end on September 1.

Four casualties and serious damage to buildings were caused by the new earthquake shock at Massewah, in Eritrea.

*Al Lewa al Masri*, the organ of the Egyptian Nationalists, has been suspended for publishing an article calculated to provoke disturbances.

## MUSICAL NOTES.

### At the Promenades.

The "Promenade" concerts at the Queen's Hall are now more than half-way through their course, and the full musical season, with opera, ballet, and hundreds of recitals, is upon us again. It may be of interest to record that this year a multitude of "stars" is to descend upon this country, though the fact has in the musical sense no significance.

Though at the Promenades there is in the works to be performed but one by a Near Eastern composer—Enesco's first "Roumanian Rhapsody"—Sir Henry Wood has already conducted two or three compositions which should be of peculiar attractiveness to readers of the "The Near East." For instance, there was Santoliquido's "Crepuscolo sul Mare." Now Santoliquido is an extraordinarily interesting composer, who, having learned the art of composition in Italy, retired to a solitary life in Tunisia, drawn thither, I believe, by the appeal of the Arab music. In this work, an early one, there was no Oriental rhythm or melody; and it was in fact a disappointing piece of Italian theatricalism. But his later compositions, in which Eastern and Western modes are fused, are much more important. One of his works in which the Arab influence is apparent is "Il profumo delle oasi sahariane," which is to be performed at at the Queen's Hall on October 6, and I advise all readers who appreciate the potential importance of the fusion of Eastern and Western thought and idiom to hear it.

In Ticciati's "Poema Gregoriano" for pianoforte and orchestra the notable experiment was made of using the Gregorian tones for secular purposes. These ecclesiastical modes of course have their origin in the old Greek scales, and there is no reason, theoretically speaking, why they should not as exactly express thought as, say, the ordinary major and minor scale. Yet one has to say that the effect of Ticciati's attempt was not wholly pleasant. He had some fine themes, some Catholic and some original, and his orchestral writing was brilliant if not novel, but it was where he was simplest (in the second movement) that the beauty of the Gregorian tones was most manifest, that is to say where they were employed in the most natural way. To hear them in lively or jerky rhythm seemed almost a sacrilege, though probably that was only the effect of aural convention. In any case the experiment was worth making, even though the resultant work was not great.

Another work of Near Eastern origin was a symphonic tableau by Joseph Jongen called "Lalla Rookh." Jongen is hailed by some as the foremost living Belgian composer, but nothing that I have heard gives him claim to any such position. I confess that I am sufficiently of my generation not to have read Thomas Moore's poem, and certainly the advantage of doing so was not forced home on me by Jongen's illlstrative music to it. If there is one thing more detestable than another in modern music it is the facile habit of writing pseudo-oriental stuff, and the beginning of Jongen's programme-music was sufficient to put me against it. There is no grip in "Lalla Rookh," and full though it is of pleasant amiabilities it palls badly.

Enesco's Rhapsody in A is to be played on October 14.

## BAGHDAD-LONDON RECORD.

An officer of the Royal Air Force proceeding home from Mesopotamia in the ordinary course of duty, has travelled from Baghdad to London in less than seven days.

Starting at Baghdad at 6 a.m. on September 15, the flight across the Syrian Desert to Amman, a distance of 515 miles, was made in 8¾ hours on the first day. The second day's journey began early and by 9 o'clock Heliopolis was reached after a flight of 325 miles. From Heliopolis the journey was continued to Aboukir, the total distance covered on this day being 440 miles.

This flight was arranged to connect with the sailing of the s.s. Vienna from Alexandria Dock. Within 40 minutes of arrival at Aboukir, the officer embarked for the remainder of his journey to England by sea and rail. He arrived in London at 8.5 p.m. on September 21, six days and 14 hours after leaving Baghdad, having saved from 10 to 14 days in passage.

# NEAR EAST BOOKSHELF.

## KUT AND AFTER.

**THE SECRETS OF A KUTTITE.—By Captain E. O. Mousley, R.F.A. (London :—The Bodley Head. 8/6 net).**

It may be said of all the books that have been written by British prisoners of war in Turkey that they are intensely interesting; in fact it is difficult to choose between them. Probably for sheer excitement "The Road to En-Dor" remains unsurpassable, but certainly if general interest be the standard, "The Secrets of a Kuttite" comes high in the list. Mr. John Lane must indeed be a proud man when he points to the books on Turkey that he has published since the war.

Captain Mousley has produced a remarkable book. His record, which is formed from diaries that were recovered in Turkey after the war, is a very individual one, by which we do not mean that he is constantly obtruding his own personality, but that he views matters from a very personal point of view. This method has its dangers; one's attention may be drawn from the things said to their sayer; but it must be freely admitted that the author's cleverness never allows our interest to flag, and his pages are amazingly attractive.

Upon the siege of Kut he has much to say that is more or less new, and he gives a vivid picture of that heroic endeavour. Naturally his account is enlivened with humorous episodes, but the awful privations which all ranks had to endure are not obscured. It is wise of him to print General Townshend's encouraging *communiques* to the brave garrison—*communiques*, which, as he points out, to the Sepoy were promises, but to the British private soldier were "'opeful buck"; for it is really round them that his diary notes are chiefly built. No one can read this story of the siege without a thrill of pride in the patience and courage of our Army, without also a fresh storm of indignation against those responsible for pushing on the Sixth Division alone. Incidentally, it is these pages on the siege, we imagine, that will of all this book prove most useful to historians of the Mesopotamian campaign.

Of that fearful, ineffable trek from Kut too much can never be written. Were all else forgotten or forgiven the Turk, what he then made our men endure would be accounted eternally against him. Let this author describe the beginning of the march in words that harrow the mind; he himself, sick and suffering from shell-shock, was on the Tigris at the time :—

> We tingled with anger and shame at seeing on the other bank a sad little column of British troops who had marched up from Kut being driven by a wild crowd of Kurdish horsemen who brandished sticks and what looked like whips. The eyes of our men stared from faces drawn long with the suffering of a too tardy death, and they held out their hands towards our boat. As they dragged one foot after another some fell, and those with the rearguard came in for blows from cudgels and sticks. I saw one Kurd strike a British soldier who was limping along. He reeled under the blows. We shouted out, and if ever men felt like murdering their guards we did.

That the Turks could treat their own men almost as badly is scarcely comforting to those who would have England's future in the East depend upon an alliance with such a nation. And it is wise, when trying to determine British policy in the East, to remember what our own fighting men have written of the Turk. Of these there is not one we have read who believes that any good can be done by the Turkish nation so long as it retains its official class. All these writers, including Captain Mousley, point out that the Turkish peasant, though he easily relapses into the barbarian, is often a good fellow, but there are so many others, parasitical, ignorant, intriguing and cruel, who must first be got rid of before any good can come from Turkey, though it must not be inferred from this that the author is a Turcophobe because he is well-disposed either to the Greeks or to the Armenians.

After Kut Captain Mousley went to the camp at Kastamuni, of the events at which he gives an account that usefully supplements what we had learned from other authors. His own plans of escape did not mature there, but he left this camp before most of the other officers, being sent to Stamboul via Angora for the treatment of his eyes. During this journey and on his arrival a Psamatia he underwent vile experiences of Turkish cruelty and inefficiency, and his mind more than ever hinged on the one idea of escape. Finally he did make a most gallant attempt, but was wrecked in the Sea of Marmora, and perforce returned whence he had started. From here to the end of the book page after page is crowded with astonishingly interesting matter; there is, for example, his account of the British Generals' camp at Broussa, and there is some extremely instructive matter on the political intrigue which preceded the surrender of Turkey; there is the story of his friendship with Lieutenant Jones, the author of "The Road to En-Dor," and there are his opinions of such men as General Townshend and Rahmi Bey. For the sake of these last hundred pages, indeed, the book is well worth reading. The author of this book is a very clever and intelligent man, whose exceptional experiences in both the high and the low stations of a prisoner's life made him unusually well qualified to express his opinions—a privilege of which he has fully availed himself. His book, alike for its historical, human, and political value, ought certainly to be read, and the sooner the better.

## BOOKS RECEIVED.

"Kashmir in Sunlight and Shade. A description of the Beauties of the Country, the Life, Habits and Humour of its Inhabitants, and an Account of the Gradual but Steady Rebuilding of a once Down-trodden People." Illustrated. By C. E. ## PERSONAL AND GENERAL.

**To-Day.**
September 29 ( New style ).
September 16 ( Old style ).
Moharram 27, 1340 A.H. of the Moslem Calendar.
Elul 26, 5681 of the Jewish Calendar.

The Crown Prince of Sweden left Alexandria for Marseilles on Sunday.

The Bulgarian Minister returned to London last week from Brussels.

Prince Nicholas of Roumania arrived in London on September 20 from Bucharest, and has returned to Eton.

Prince Andrew of Greece arrived in Paris last Thursday (September 22).

M. Venizelos and his two sons arrived in Paris on September 21, says a Reuter message.

It is stated that Mr. Sheldon Amos will come to London next month, having been called to the Foreign Office in connection with certain judicial questions in Egypt.

Mrs. Barrington-Ward has returned to 8, Green Street, where Mr. F. T. Barrington-Ward, K.C., will join her on his return from Baghdad at the end of the week.

Lientenant-Colonel Douglas Capitaneano, Military Attaché to the Roumanian Legation, has arrived in Bucharest from London.

Our Sofia Correspondent writes :—The marriage was recently celebrated at Sofia between Mr. A. A. Elder, Attaché to the British Legation, and Miss Olga Tsankoff.

Sir Charles Harington, G.O.C., the Allied Forces at Constantinople, is returning home on leave. The Italian General Monbelli will be G.O.C. during his absence.

Lady Wake has left London to join Lieutenant-Colonel Sir Hereward Wake, who is at present stationed at Quetta, India.

Commander Luke, Acting Governor of Jerusalem, will leave for a two months' holiday in England after the return of Mr. Ronald Storrs, Governor of Jerusalem.

The *Egyptian Gazette* reports that Seyyid Zia ed-Din, former Prime Minister of Persia, arrived at Port Said recently, on his way to France.

At Mussoorie, on August 17, a daughter was born to Captain T. W. R. Haycraft (Survey of India, Dehra Dun), and Mrs. Haycraft.

Sir Thomas Holland, who recently resigned his post as Member of Commerce in the Governor-General of India's Council in connection with the Calcutta munitions case, left Simla on Friday for England.

A marriage will take place next month in Burma between Mr. John Clague, I.C.S., and Miss Winifred F. A. Dawkins, only daughter of Mr. and Mrs. Francis H. Dawkins.

A marriage has been arranged, and will shortly take place in India, between Irene, widow of Captain Tarrant, Highland Light Infantry, and Lieutenant-Colonel H.G. Gregorie, The Royal Irish.

The engagement is announced between Ernest D. Adams, son of the late W. Day-Adams, af Caynton, Torington, and Lilias Gordon ( Queenie ), younger daughter of Mr. Alfred W. Fraser, of Khartoum and 21 Lexham Gardens, Kensington, W.

The Vali Ahd, Heir Presumptive to the Crown of Persia, accompanied by his uncle, Prince Amin-ed-Dowleh, arrived in Paris on September 22. He was met by Samad Khan, Persian Minister in Paris, and representatives of the French Government.

It is reported that the King of Roumania has bought Weinburg Castle, near Rheineck (St. Gallen, Switzerland), which formerly belonged to the Prince of Hohenzollern, and that the Roumanian Royal Family intend to spend next summer there.

On October 5, at King's College, Strand, at 5.30 p.m., Mr. A. W. Gomme will lecture on "The Scenery of Greece." The lecture, which will be illustrated by lantern slides, is given under the auspices of the Anglo-Hellenic League.

The Bishop of London will preside at the annual meeting of the Jerusalem and the East Mission, to be held at the Church House, Westminster, on Tuesday afternoon, October 4. The speakers will be the Bishop of London, and the Bishop of Jerusalem.

A Belgrade correspondent writes :—There is a new rumour about the forthcoming engagement of King Alexander. This time it is believed that his bride will be a Princess of the House of Guise, probably Isabella daughter of the Duc de Guise, first cousin of the Duc d'Orleans.

The marriage of Norcliffe Fourness Thompson, of Calcutta, only son of the late Frederick C. Thompson, of 40 Porchester Square, W.2., and Helen Vavasour, only daughter of the late Frederick Walker, of 18, Durham Villas, Kensington, will take place at St. Mary Abbot's Church on October 27.

At the Parish Church, Rode, on September 21, the marriage took place of Brigadier-General R. B. D. Blakeney, C.M.G., D.S.O., General Manager, Egyptian State Railways and Telegraphs, to Clara Isabel Henderson of Merfield House, Rode. The Rev. Alan Armitage officiated.

The marriage arranged between Commander B. C. Marsh, D.S.O., R.I.M. ( Ret.), 12, Radnor Park West, Folkestone, only son of Major-General F. H. B. Marsh, I.A., ( Ret.), and Evelyn Rosevere, third daughter of the late Edward Starbuck Williams, and of Mrs. Starbuck Williams, 9, Grimstone Gardens, Folkestone, will take place in October.

On September 12, at St. Thomas' Cathedral, Bombay, Major John Gaylard Lawrence, R.A.P.D., only son of the late Colonel W. W. Lawrence, the Royal Irish Regt., and of Mrs. Lawrence, Coleraine, Co., Londonderry, was married to Myrrha, elder daughter of the late George E. Attwater, and of Mrs. Earwaker, Butts Croft, Uckfield, Sussex.

On September 17, at St. Matthew's Church, Bayswater, John Scott, M.B., Ch.B., Dept. of Public Health Egyptian Civil Service, was married to Flores, youngest daughter of the late Howard Chatfield Clarke, F.R.I.B.A. P.P.S.I., and Mrs. H. Chatfield Clarke, South Kensington Hotel, Queen's Gate Terrace, S.W. The Vicar, the Rev. F. Murphy officiated.

On September 20, at All Saints' Church, Shelsley-Beauchamp, Worcester, Major W. F. R. Webb, 22 Punjabis, eldest son of the late Captain W. W. Webb, M.D., F.R.C.S., Indian Medical Service, was married to Tara Isabella, second daughter of the late C. W. Wallace and Mrs. Wallace, The Manor House, Shelsley-Beauchamp, Worcester.

Digitized by Google

The engagement is announced of Mr. Euan W. Lucie-Smith, M.C. of the Palestine Police (late Captain R.F.A. and G.S.I.), second son of Sir Alfred Lucie-Smith, Chief Justice of Trinidad, B.W.I., to Joyce, only daughter of Captain P.d'E. Wheeler, M.D., F.R.C.S. (late R.A.M.C.), late Medical Superintendent, English Hospital, Jerusalem and of Mrs. d'E. Wheeler, of Roscrea, Worthing, England, and granddaughter of the late Bishop Popham Blyth, Bishop in Jerusalem.

The engagement is announced and the marriage will take place at St. Michael's Church, Bournemouth, on Tuesday, October 25, between Philip Gordon Murray, late P.W.D., India, third son of the late Major-General Robert Murray, C.S.I., B.S.C., late Director-General of Telegraphs in India, and Dorothy, only daughter of the late Major Edwin William Sandys, late R.A., Fulford House, York, and Mrs. Sandys, of Fair Mount, Priory Road, Bournemouth.

Near Eastern subjects will be well represented in the curriculum of King's College, London, for the forthcoming session. There will be a course of seven lectures beginning on October 12 dealing with Mesopotamia from the historical, geographical, geological, anthropoligical, historical, political and other points of view. Three lectures will be delivered on Serbian subjects; the first giving an account of the parts played by Karageorge and his great and, at the time, successful rival Milosh Obrenovitch in the achievement of Serbian independence, will be given by His Excellency the Yugoslav Minister, Dr. M. Gavrilovitch. In the course of ten lectures Dr. Arnold Toynbee will discuss the Greco-Turkish question, while Doctor Lysimachos Oeconomos will devote five to a study of Greece on the eve and in the first months of its revolution of 1821. Of a quite different kind from any of these will be two lectures on Roumanian Folk-poems and Roumanian superstitions.

## APPOINTMENTS & PROMOTIONS

Sir Jamsetjee Jejeebhoy has been elected Deputy-President of the Indian Legislative Assembly.

Dr. Dusan Resetar, Secretary at the Yugoslav Legation, has been appointed to the Foreign Office, Belgrade.

Mr. Nigel Davidson, Advocate General, Sudan Government, has proceeded to Baghdad to succeed Sir Edgar Bonham Carter, K.C.M.G., C.I.E., as Judicial Adviser in the Mesopotamia Administration.

The Rev. Richard Bell, B.D., Manse of Wamphray, Beattock, has been appointed Lecturer in Arabic in the University of Edinburgh, in succession to Dr. Edward Robertson, who has been appointed to a professorial chair in the University College of North Wales. Mr. Bell is an authority on Semitic languages and a keen student of Islamic subjects.

## OBITUARY

Colonel Herbert St. Clare Carruthers, Indian Medical Service (retired), died very suddenly, of heart failure, on September 19.

The death has occurred of Professor Henry Jackson, Regius Professor of Greek at Cambridge University. He had held this post since 1906. Though he did not publish much of his work, his writings, of which possibly the most popular is the volume of Texts of Greek Philosophy from Thales to Aristotle, are well and widely known.

The death has occurred of Sir John Harold Heffernan, formerly Chief Inspector of Machinery, R.N. He was a shipmate and lifelong friend of the late Lord Fisher, with whom he served on the Warrior, the first British ironclad. He was Chief Engineer of the Inflexible at the bombardment of Alexandria, July 11, 1882, and served during the Egyptian War.

The death is announced of General Harry Cortland Anderson, C.B. He entered the Army in 1842, and four years later took part in the Sutlej Campaign and was present at the battle of Ferozeshah. Later, as Brigade Major, with the Rohilkund Field Force, he was engaged in the suppression of the Mutiny in India, taking part in the actions of Narnoul and Nagal, the occupation of Nujeebabad, the action of Nugeenah, occupation of Moradabad, the actions of Bareilly and at Ford of Burnai, the capture of Fort Mahomdee, and affairs with Jhansi mutineers. He was Honorary Colonel of the 4th Rajputs and was nominated C.B. in 1907.

The death has taken place at Fiddington, Somerset, of Mr. Thomas Cuffe, who was for thirty-three years managing partner in the banking firm of King, King, and Company, of Bombay. He was a leading member of the Bombay Municipality, and served in the office of Sheriff. For some years he commanded the Bombay Light Horse and was Hon. A.D.C. to the Viceroy of India.

We regret to have to announce the death of Mr. Samuel Webster, principal of the firm of S. Webster, Ltd., of Moorgate Station Chambers, E.C. Mr. Webster was on an extended business trip to South-Eastern Europe, and when in Cologne he died suddenly after a short illness. Mr. Webster was one of the best known men in the typewriter trade, being for 25 years prior to the establishment of S. Webster, Ltd., the Continental Manager to the Yost Typewriter Co., Ld.

### SIR ERNEST CASSEL.

Sir Ernest Cassel the famous financier, died suddenly on September 21, from heart disease, at his Park Lane residence. Born in Cologne in 1852, the son of a Jewish banker, he came to England as a young man and very soon acquired the reputation of a sound man of business; and the position he made for himself both in the City and society affords the best proof possible of his force of character.

During his early years in this country Sir Ernest was interested chiefly in South American finance, but later he turned to other quarters of the globe, and his name is associated with several highly important undertakings in the Near East. As a young man he had been engaged in setting the accounts of the Khedivial loans and transactions in order, and this probably accounted in some measure for his taking such an important part in financing of the Nile irrigation works and other works of development in Egypt. With Sir John Aird he was chiefly responsible for the two great dams, at Assouan and at Assiut, which added so largely to the cultivatable area of Egypt; and he was the founder of the Agricultural Bank of Egypt. He was also largely interested, later, in the National Bank of Turkey.

Of his vast interests in other parts of the world nothing need be said here. Nor is this the place to record his very considerable charitable gifts in this country. But it may be noted that he contributed some £40,000 for hospital work in Egypt. He was interested in the turf and in hunting, and owned many race-horses. He married a daughter of Mr. R. T. Maxwell, but had been a widower since 1881; and his only child, a daughter, who married Colonel Wilfred Ashley, M.P., died in 1911. He was a G.C.M.G., a G.C.V.O., and a G.C.B., and among the numerous foreign orders which he held was that of the Osmanieh (1st class).

THURSDAY, SEPTEMBER 29, 1921.

## SOVIETS, WHITEHALL AND PERSONALITY.

The amazing indictment embodied in a Note dispatched by the Foreign Office to the Soviet Government on September 17, will be read by the public in this country with mixed feelings. Time was when even one of the dozen charges brought against Bolshevist Russia would have been regarded as sufficient cause for breaking off relations with the offending country; to-day it is merely suggested that, if the conditions described in the Note are to continue, it will be impossible that the better relations between the Governments and peoples of the two countries anticipated from the Trade Agreement should be established. The document is a model of diplomatic restraint worthy of a more honourable addressee. Only in the final paragraphs is anything in the nature of severe comment indulged in, when the telling narrative of plot and intrigue is concluded. On the principle that it is of little use to threaten what you cannot perform, the mildness of the note is possibly justified. At least it is calculated to shake the self-complacency of the Soviet Government, if it imagined that its intrigues were escaping notice. The chapter and verse that the Marquess Curzon is able to give may even enhance Bolshevist respect for the British Secret Service. But the main reflexion that the reading of the Note will occasion is that it is impossible to make a silk purse out of a sow's ear, and the reader is left in wonderment why the British Government ever undertook the task. In the most backward native community in Africa it is usual to find the ruler endowed with some measure of dignity and self-respect. Russia alone in modern times has supplied an example of an administration individually and collectively lost to all sense of honour and morality. A policy of desperation will always fall short of the ideal, but neither the British public nor our Allies are satisfied that even that policy canbe urged as an excuse for the Trade Agreement between Great Britain and the Soviets. The attempt to graft upon the resumption of trade relations decent behaviour on the part of the Moscow Government renders the British Government's action still more inexplicable. Only by a far more circuitous route can Russia qualify to re-enter the comity of nations.

Through its jackal, the Third International, the Soviet Government has openly declared its policy in regard to the East. "The general guiding purpose of the Eastern Secretariat, in all its work," says the President of that section in a report to the Central Committee, "lies in exerting pressure upon the political authority of the capitalist Powers of Western Europe through their colonies, discrediting them in the eyes of the native population, and simultaneously preparing the latter to emancipate themselves from an alien yoke. The problems connected with the class struggle in the West will be incomparably easier of solution if the external power of France and England can be undermined." Starting off with these amiable intentions, the Soviet Government has every reason to be satisfied with the progress so far made. Discussions as to the best means of provoking a revolution in India have been held in Moscow with Indian revolutionaries, who have been liberally supplied with funds. A well-known Indian anarchist, who has been studying the manufacture of bombs in Vienna, has been given financial assistance to enable him to start a factory for smokeless powder in Kabul. In Persia the Soviet representative, with a staff of nearly a hundred persons, is actively engaged in anti-British propaganda, for which he is supplied with large sums of money from Moscow. At Tashkend the Soviets maintain a propaganda school as a base for their activities in India; here the future emissaries of revolution are trained and are provided with money from a special allocation of two million gold roubles. In Asia Minor the Moscow Government is exerting itself to prevent the Turkish Nationalists from arriving at a peaceful solution of their differences with the Entente Powers, and, in order to exert still stronger pressure, has assembled considerable forces on the border of Anatolia, offering their active support to Mustapha Kemal. The coping stone to all these activities is supplied in Afghanistan, the country whose territory is an important channel by which the "Communist International maintains direct contact with India." An annual subsidy is paid to the Afghan Government; in the treaty recently concluded between Moscow and Kabul provision is made for the establishment of five Soviet "Consulates" in Afghanistan, which, as they can have no commercial justification, are clearly intended to be propaganda centres; and finally Jemal Pasha has been subsidised and is being kept in Afghanistan with the object of raising disaffection among the frontier tribes against the British, and furnishing them with arms and ammunition.

Clearly this is a state of affairs that cannot be allowed to continue indefinitely without some effort on the part of the British Government to check it. Choosing the line of least resistance, the latter hoped to persuade the Soviets to confine their activities to other directions by offering them trade facilities with Great Britain. This policy has failed utterly. War against Russia is out of the question, and there remains only one method of meeting the Soviet menace. The Moscow Government seeks to reach its objective in India through the medium of the Governments and peoples in between. To counteract this scheme Great Britain must see to it that the media are made non-conducting and so interpose an effective barrier to Bolshevist influence. The chief countries concerned are Turkey, Persia and Afghanistan. To the ordinary observer it would seem as if the principal reason for the failure of British policy throughout the Middle East has been the fact that it has been fashioned in London instead of being inspired and directed "on the spot." During the war it was the custom to regard the Near and the Middle East as side-shows, and when it came to the question of peace terms, Mr. Lloyd George, quite naturally perhaps, decided that, as he was capable of settling the German part of the business, he was certainly qualified to look after what he regarded as the relatively unimportant remainder. To this unfortunate decision may be traced the steady loss of ground by Great Britain in the East, until Great Britain's prestige stands to-day at a lower level possibly than at any other period since she first had dealings with the East. We are confident that every member of the Cabinet recognizes the malady, but we are not so sure that all are agreed upon the remedy. It is obvious, however, that the combined intelligence of Whitehall has been outclassed by the Moscow representative at Angora and a M. Rothstein in Teheran, not on account of any inherent superiority in the latter two, but merely because each has been on the spot. If the intrigues and plots of Jemal Pasha in Afghanistan are foiled, it will be because the British Government has found an able emissary in Sir Henry Dobbs, who has been for some time past in Kabul. We built up our prestige in the East on personality, and it will be by personality that we shall regain it. In the case of Turkey things have gone too far for personality unaided to work a miracle, and the ground must be prepared by a just settlement. When that has been imposed, let the British Government resolve that it will pay special attention to the question of its representations in all the countries of the Near and Middle East. The men to be chosen should be of outstanding ability, with knowledge of the country and in

Digitized by Google

sympathy with their surroundings, Whitehall is near enough to the capitals of the Western Powers to cover deficiencies of its representatives in them. It has no influence in the East. If it would have it, let it take care that those who are to represent it there embody in their own persons the qualifications that have made for British prestige in the past, and when it is sure of having made a right choice, let it leave a free hand to the man on the spot. India will then have no need to fear the Soviet menace.

## ALBANIA.

### THE BIRTH OF A NATION.

(*By "Pertrella."*)

It really looks as if the Albanian question were about to be solved once and for all. This is largely due to the firmness and commonsense with which Lord Curzon has handled the question during the last few months. Albania has of course first herself to thank for the triumph of her case on account of the stout patriotism of her people and the moderation of her statesmen. She may indeed also be thankful for the lack of moderation shown by the statesmen of her neighbours. Time too has worked on her side, as time generally does on the side of righteousness. But it is due to Lord Curzon that in the last resort the labyrinth of conflicting claims has been negotiated, by his insisting on the commonsense expedient of disregarding as much as possible the various guilty and mutually inconsistent arrangements about Albania arrived at since the outbreak of the world war, and on tackling the problem once more on its own merits.

The British Foreign Office since the days of the Peace Conference has generally tried to view the question with impartial eyes, but at one time the desire to support France, who strongly backed the Greek and Yugoslav claims, and the hypnotic influence exercised by Greece's great statesman, M. Venizelos, obscured our vision to a certain extent. Since then the scales have fallen from our eyes. The British have never been in favour of the obviously unjust claims of the Yugoslavs in the North, while the eclipse of M. Venizelos and the consequent reversal of the French attitude have since brought about a reconsideration of our views on the Southern frontier, in the light of the apparent general content of the Southern population with the rule of the Albanian Government at Tirana.

When the Albanians a few months ago appealed to the Council of the League of Nations to bring about a definite solution of the problems affecting their country. the matter was—out of deference to the wishes of Italy—referred back for consideration by the Council of Ambassadors. Italy feared the impartial verdict of the League. She still hoped to obtain a privileged economic and political position in Albania, and when the matter came up for discussion before the Ambassadors, she was painfully surprised at Lord Curzon's insistence in refusing to allow the problem to be considered as part of a general settlement of various outstanding problems connected with the Near East. Italy has, of course, always backed up the Albanian claim to the 1913 frontiers, because this claim naturally coincided with Italian interests, and Italy has made a good deal of capital out of this, but the fact remains that in many respects her attitude appears not to have been sincere. It has been Lord Curzon's task to disentangle the sincere and legitimate aims of Italy, from those which, in spite of her posing as Albania's best friend, implied an ardent desire to limit Albanian independence.

When the Council of Ambassadors met, the British Representative claimed the attribution of Southern Albania to Greece, as he was logically bound to do, inasmuch as no international re-examination of the question had taken place in the interval since the British experts at the Peace Conference had reported in favour of this solution. The Italian and French Representative protested, with the result that a re-discussion of the problem took place, and in the light of the new evidence the British Representative gave way. The general principle of the 1913 frontiers was accepted and it was left to the experts to introduce minor modifications in the North-East in order to render the frontier more logical. The recommendations of the experts, however, have not proved very felicitous. On a balance, nearly 400 square kilometres of territory exclusively inhabited by Albanians have been allotted to Yugoslavia in order to satisfy what the latter regards as the minimum concession required to safeguard her hold on the Albanian townships of Dibra and Prisrend. On the other hand scant regard has been paid to Albania's much stronger claims, both on ethnographical and on strategical grounds, in the North, where it would have been possible to set off the loss of Albanian territory in the East in a way conducive to local peace, at present disturbed by the fact that the frontier divides the Albanian tribal group known as the Maltsori into two parts. The Council were legitimately empowered to do this, and it is impossible to withold sympathy from the Albanian statesmen who may now be asked to sign a document to hand over without compensation elsewhere districts inhabited exclusively by their countrymen, districts which have never been legally acquired by Yugoslavia, and where excesses have undoubtedly been committed by Yugoslav troops. It is, therefore to be hoped that it will be possible to introduce at least the above small modifications, required by both commonsense and justice.

The Council of Ambassadors furthermore recognised the general principle of Albania's sovereign independence. Italy, however, attempted to insist on certain reservations, and the question was not resolved in any definite form when the Council broke up. Since then Italy has tried to get the matter referred to the Supreme Council, where she again hoped the question might be solved in relation to other questions of general policy. To

Digitized by Google

this end she has endeavoured to delay action by the League; but meanwhile our Foreign Office has again been at work to good purpose. The debt which Albania owes to Britain's disinterested action in her favour cannot be exaggerated. Lord Curzon has laboured to find a formula satisfying Italy's legitimate aspirations which may be summed up thus: That the Bay of Valona will never be used as a base for hostile action against Italy by any Power or combination of Powers with or without Albania's consent. It appears that some much formula has been found. It should be added that Italy has also satisfied herself that the initiative of certain British firms in Albania has no political significance. If Italians have hitherto failed to obtain any important concessions in Albania they have only to thank their own Government, who instead of leaving matters to private initiative, have striven to obtain a privileged position for Italian enterprise by political pressure, and have thus alienated Albanian sympathies which would naturally have flowed towards the Italians, for whom the Albanians have always held the warmest personal regard. If, as is now likely, a happy solution, satisfactory to both the Great Powers and to Albania herself is to be the outcome of the present negotiations, Italian enterprise will no doubt quickly regain the ground lost to date, and need have little fear of the competition of others in the future. The task of building up Albania's economic prosperity cannot be undertaken by any one Power alone without retarding the process; and this would clearly be contrary to Italy's best interests, in that a rapid increase of Albania's purchasing power will redound to the benefit of Italy's manufacturers, who on account of Italy's geographical position, will always have an important advantage over all competitors.

### PHOTOGRAPHS FROM TIBET.

The Royal Asiatic Society exhibited last week enlargements of photographs of the peoples, scenery, and temples of the Western Himalayan countries between Simla and Kashmir, taken by Mr. H. Lee Shuttleworth, of the Indian Civil Service, in the course of his travels. Included in the collection are several views of the arid valleys and snowy mountain ranges of parts of Tibet, and the habits, customs, and pastoral pursuits of the inhabitants.

## PRESS ON THE NEAR EAST

### The Near East.

Writing in the *Morning Post* of September 20, the Hon. Aubrey Herbert, M.P., discusses the futility of British Policy in the Near East, and describes how it has resulted in complete chaos. He traces the steps by which we have lost the confidence both of the Greeks and of the Turks.

The fact remains that owing to the actions of the British Government Great Britain is regarded as an enemy by the Turks and as a false friend by the Greeks. The consequences of this policy have been to waste a fertile land that is crying aloud for development and to antagonise a people who desire our help in the development of its territory, to kill British commerce in the Near East, and paralyse the ports of Smyrna, Salonica, and Constantinople. Those who know this country and the possibilities that it holds cannot contemplate the present state of things without wondering if our worst enemy could have done us and our interests more harm. Chaos and war reign everywhere. Constantinople itself is nothing less than a European scandal. With the best will in the world it is impossible for the High Commissioner or the Allies adequately to cope with circumstances for which they are not responsible. In the old days there was a mixed company in the Grand Rue de Pera. It was mixed and quaint, velvet and rags, camels and motor-cars, but the Turks insisted on the decencies of civilisation. To-day there is an endless exhibition of immorality without a parallel. Half Constantinople and a great part of Scutari have been burnt. The European and Asiatic city is packed with thousands of miserable refugees, and to complete the picture winter and starvation are approaching. This is a black picture to paint, and there are other colours that might be used if we were fortunate enough to have another foreign policy or the prospect of it. But the truth of it is is we have no foreign policy beyond the spasmodic zig-zags of Mr. Lloyd George. It is possible to forgive the passion and ignorance which at the Conference of Paris did so much to destroy our own interests. It is more difficult to pardon the fatuousness of a policy which continues to lay British commerce and British prestige in ruin. We hold the East with a minimum quantity of troops, and we impose conditions upon the East only possible of application with a maximum of force behind them. There is logic, if there is not morality, in Prussianism when it is backed by cannon; it is folly when its only weapons are pins. And the obvious consequences follow. Those whom we antagonise turn from us to see what can be obtained from our Allies or from our active enemies, the Bolsheviks.

And he concludes with a note on the chance of intervention:—

Meanwhile the war goes on. Organisation, locomotion equipment, are on the side of the Greeks. Geography and history fight for the Turks. In this war there is no Waterloo in sight. The Greeks, it is clear, will not now get to Angora, nor, if they did, would that bring the war to a successful conclusion. Greek victories, indeed, help no one except Greek newspapers, since the price of the drachma actually falls after a Greek success. The Greeks are paying a high price in men and in money for their temporary laurels. Their money, however, appears to be abundant, and there is little doubt that they can get through the winter by living on the local supplies of corn and cattle in and around Eski-Shehir. At the next pause of hostilities there will come yet another chance of an honourable intervention, and terms which both parties could agree to, and which both would be likely to prefer to the chance of winning a barren victory at the end of a further struggle. But for this a change of heart and a change of mind in the British Cabinet is necessary. Constantinople has not as yet figured actively in the British Press. The positive moral and financial losses which we are suffering in Turkey and the negative disadvantages which we are incurring while the resources of this country are debarred to us have not yet figured in an anti-waste campaign, and consequently until pressure is brought upon the Government we are likely to continue upon our bankrupt course. In Constantinople there are Englishmen who favour the Turks and Englishmen who favour the Greeks, but there is not a single Englishman that I have met who supports the Near Eastern policy of the Government, which is indifferent to the fate of our prisoners, to the prestige of our name, and our secular interests in Turkey.

### The Middle East.

In the *Sunday Times* of September 18, Mrs. Rosita Forbes writes down some of the impressions she gained during a recent tour in the Middle East. She shows how changed the point of view of the Eastern has become:—

To a certain extent the war has altered the point of view of the Eastern, for it has undermined his fatalistic idea of Kismet. Ten years ago he endured his wrong with very little expectation of redress. We have taught him to appreciate the spirit of change, and he has lost his age-old patience. Moreover, he is beginning to understand that his own particular country does

Digitized by Google

not stand alone in a universe, hostile or friendly, as the case may be, but is likely to be affected by the political situation in the remotest parts of that universe. Thus, in a Jerusalem café you may hear Armenians or Levantine Jews discussing de Valera's projects, or in a Delta village a couple of sheikhs following with considerable accuracy the movements of Mustapha Kemal.

Three quite definite impressions remain, she says—"ignorance, impatience, and a dawning sense of unity in purpose and outlook":—

It is surprising the ignorance displayed among the lower-class Arabians and Egyptians, not only as to England's aims, but even as to her actions. For instance, the fellaheen of the Nile Valley, in many cases, are afraid to leave their villages, for no specific reason that they can state, but because of a vague terror of what the British will do in their absence It appeared to me that there was little aversion from the English, merely a wide-spread fear, fostered, of course, by Nationalist agitators from Cairo. By three different races I was told (a) that the English were making war on the Arabs in Palestine (b) that they were fighting the Egyptians in the Delta, (c) that the Hejaz railway could not be reopened because of English raids south of Ma'am. These three ludicrous statements show the necessity of some sort of British propaganda to counteract the effect of the flood of Kemalist, Bolshevik, and Egyptian Nationalist literature that is scattered broadcast through the Middle East.

She then states that Mustafa Kemal has now taken the supreme place as the champion of Islam in the minds of the Arabs of Syria and Palestine; and she proceeds to discuss the Zionist versus Arab question:—

When two elements are as profoundly distrustful of each other as the Zionist and the Arab, even the tact and statesmanship of Sir Herbert Samuel are of little avail. Every action of the Government is regarded with distrust. As an instance, take the recent Land Act, which was framed chiefly to protect Arab interests by insisting that only a bona fide resident in Palestine could buy land therein, thus preventing its purchase by wealthy aliens. The Arabs now complain that they are forced to sell to the local Jew, who is generally the richest man in the place, because their Syrian and Arabian friends have been put out of the market.

It is useless now to quote the promises made by Lord Curzon and Sir Henry McMahon concerning the Arab National kingdom, which was to include the four towns of Hama, Homs, Damascus, and Aleppo, but if British statesmen have forgotten their guarantees, it is idle to hope that the Arabs have equally short memories. Irak is but a sop to Cerberus, and, as my Trans-Jordanian friend writes:" The Arab is still waiting."

And she concludes with a few words upon the new type of British official in the East:—

It is possible that the new type of British official who has of necessity, not of choice, gone East during the last few years is responsible to some extent for the distrust with which England is regarded. Just as the Western Jew who is to make his home in Arab Palestine has no respect for the Mufti or the Qadi, so the new Englishman has no knowledge of native customs and manners. The inspector of old used to be father, mother, and god of his district, and he could tell the old men their own jokes in their own language.

Just before the end of my Arabian August I had some small difficulty over my return permit so I went to a young British official who strongly objected to being asked to exert himself in a shade temperature of 102 degs. to help an unprepossessing native woman. After emitting disjointed sounds which presumably he imagined were some form of Arabic, he disgustedly sent for an interpreter. "Tell that woman she can't speak her own language," he ordered; but what the interpreter said in melliflu ous Egyptian, while his employer nodded smiling, was, "Oh, lady, they think they understand our language, just as they think they understand our feelings; but Allah knows they do neither the one nor the other!" Perhaps that is the last word that can be said about the Middle East.

**Britain and Turkey.**

The Constantinople corespondent of the *Morning Post* had recently an interview with H.I.H. Prince Abdul Mejid, Heir-Apparent to the throne of Turkey, who is reported to be "exceedingly Anglo-phile" and a very democratic prince. The interview was published in the *Morning Post* on September 16, and made extremely interesting reading. After deploring the War in Asia Minor, which, the Prince rightly declares, can be profitable to neither of the belligerents, and endeavouring to show that Turkey has for centuries had to defend herself against diplomatic intrigue and military aggression on the part of Europe, the Prince turned to the subject of Great Britain's policy towards his country.

"In the years preceding the war Great Britain, in order to assure the loyalty of Russia in the Great War with which she was menaced, felt herself obliged to sacrifice her Oriental policy to the whims of her great rival in the East. Most especially Turkey, who in 1908 asked for nothing better than deliverance from the German yoke, was repeatedly rebuffed in her endeavours to gain British help in her work of reform and regeneration. Finally, at the beginning of the war, Great Britain felt herself obliged to promise the very capital of Turkey to Russia as the price of her Silesian offensive. It is not for me to judge whether this policy was necessary or not, but, in any event, it had the inevitable effect of throwing Turkey into the enemy camp. If England had expended in Turkey a small part of the efforts she concentrated on Russia she could have had Turkey as an unflinching Ally during and after the Great War.

This, says his Imperial Highness, concerns the past; but what of the Turkish appeals for English help and support at the time of and since the Armistice? Then—

There was no Russia in the field whose jealousy might be excited by a friendly policy towards Turkey. Turkey was ready to abandon all her colonies and to start again her work of reform and regeneration strictly within her ethnological frontiers. A new Sultan was on the throne; the oligarchy of adventurers, who had brought Turkey into the war, was expelled; and the entire people was filled only with thoughts of peace, and basing all its hopes on repentant and sincere reconciliation with its recent enemies and old friends. What use was made by England of this eminently favourable state of affairs? The Turkish question was cast aside and ignored for eighteen months by the Supreme Council, except during the fatal month of April, 1919, when, without even calling upon their representatives in Turkey to express an opinion, the Supreme Council accepted the views advanced by Greek propagandists and authorised the occupation of Smyrna with its horrible scenes of massacre and atrocity, the reality of which has been abundantly certified by the official International Commissions. The terms of the Armistice were ignored, and hundreds of Turks were arrested and deported on the mere denunciations of their political enemies. The official correspondence that passed between the Allied High Commissioners and the Turkish Government during this period prove abundantly how sincere were the Turkish efforts at reconciliation, and how persistent was the Allied rejection of their advances.

Later, after quoting from speeches by Mr. Joseph Chamberlain, in 1895, and Lord Grey, in 1909, the Prince went on to say:—

"Is the policy of this majestic British Empire placed to-day under the tutelage of intriguing demagogues invited to London at every crisis? I am, and remain, profoundly convinced that the future is not distant when the great British nation will finally see clearly through the narrow and harmful policy conducted in its name, and will suppress it by a decision of its sovereign will and return to the great policy of Beaconsfield based on the great reciprocal interest of the British and the Moslem worlds.

"The important decisions taken recently in London and Paris are of a kind to prepare the ground for a speedy solution of the difficulties which prevent the re-establishment of peace. I feel convinced that from their present attitude of strict neutrality towards the belligerent Powers the Allies may well enter upon a phase of negotiation with Greece and Turkey, and in the event that the former again rejects the decisions of the Supreme Council as she rejected them in March of this year, it should be possible to extend the British declaration of the termination of the state of hostilities to Turkey, also after the latter has undertaken to accept terms of peace based on justice and benevolence.

And he concluded the interview by declaring:—"I say with all conviction that Turkey is only awaiting the opportunity afforded by peace of starting her work of regeneration and reform. This peace will bring calmness and satisfaction to the whole Moslem world, and do much to solve questions geographically, but not sentimentally far separated from that of Turkey."

—OMAR KHAYYAM—

During the last war a story was told about a sailor boy who wrote home to his mother somewhat on these lines :—" Dear Mother ; This war is a terrible thing. Yesterday we were attacked by one of the enemy's ships, and had hardly got away safely from her when we were chased by a submarine. Things looked pretty bad, and I thought it was all up with us, when I remembered your telling me always to look above for help. Well, I looked up, and there was an enemy aeroplane just ready to drop bombs on us." I was reminded of this by the terms of a proclamation issued lately by the French Military Authorities to those Syrians who failed to appreciate French rule. This proclamation informed the restless inhabitants of Jebel el Druse: " Airmen are flying over your country and important French forces are marching on Suweida. Whether you lift up your eyes to heaven or look down on earth you see displayed before you the might and prestige of a great Power," etc., etc. Well, well ! I wonder whether this notable production induced the rebel Druses to appreciate the ' might and prestige ' of the great Power? It seems not unworthy to rank with the production of the German pastor, who, in the course of the war, wrote a hymn which began with a verse about the Almighty reigning over Cherubim, Seraphim, and even Zeppelin.

The change in the weather has brought about a mitigation of the plague of mosquitoes in this country ; but there are still many of the pests about, and I fully expect that they have come to stay. A very cold winter may kill them all off, or greatly reduce their numbers, of course ; but the chances are, I think, that we shall have them with us next summer, even if their numbers are seriously reduced. And in any case I dare say that some readers will be interested in a hint sent me by a kind correspondent, who read my remarks about the wretched insects the other day. His remedy is as follows :—

> Place a pot containing a cultivated castor oil plant in the room. It appears that it has the property of attracting mosquitos and other insects, and eventually killing them. It is an easy and inexpensive remedy, simple to try.

My correespondent has lived many years in the East, but he omits to say whether he has tried his remedy himself. Perhaps some folk will wonder whether it is worth " attracting mosquitoes and other insects," for, even though the plant may kill them eventually, they may have time to get a few blows—or stings—in first. And when it comes to defeating their wiles outdoors, what can we do ? Carry castor oil plants about with us ? To deal effectively with the pests we should have to fill our parks and gardens with the plant, and to grow it all over our commons and open spaces ; and though I, personally, rather admire its foliage, I fancy we should get tired of it if it met us everywhere. A young friend of mine, who is at present on the sick list, tells me with strong emphasis, that he is perfectly sure that the plant *would* kill the mosquitoes, or any other insects, *if* only they could be persuaded to sample it. But he declines to believe that it could possibly " attract " them.

" The Near East," as I have remarked on more than one occasion, is a highly respectable journal, and its pages may be read by the Young Person without any risk of its bringing a blush to his, or her, cheek. But that it remains so is due entirely to an effort on my part. Thus—The other day, calling upon the Editor, I was privileged to read a letter which he had just received, for publication, from his Zagreb Correspondent ; and in it I came across the following paragraph :—

> The young ladies of Zagreb, and a very good-looking lot they are, have invented a new game, which is said to have come from Dalmatia ; they bask in the sun when bathing in the Save. The game is to see who can get the most tanned, with the result that ones sees young women walking bout, often enough with fair hair and eyes, showing very decolleté neck and shoulders, bare arms, and sometimes even bare legs with only sandals on, with complexion like Malays. It is often deeper than café au lait, and commonly enough ones sees an actual deep chocolate tint. As they presumably wear bathing-dresses when basking, one inevitably wonders whether they are piebald.

There, I am glad to say, the ' evil communication " ceased from its attempt to ' corrupt good manners.' But only think what might have happened if it had found its way into " The Near and Middle East," And the Zagreb Correspondent was indiscreet enough to add a footnote to the effect that the game was an " attractive " one !

CORSAIR.

### THE PRINCE OF WALES' TOUR.

It is understood that recent events in India have not in any way affected the programme arranged for the Prince of Wales' forthcoming tour, says *The Times*. As already announced, his Royal Highness will leave Portsmouth in the Renown on October 26. After a day at Gibraltar on the 29th, the Prince will proceed to Malta, and during his visit there, lasting from November 1 to November 3, he will open the new Maltese Parliament. He will reach Bombay on November 17, and after a stay in India of precisely four months, will leave Karachi on March 17.

On leaving India the Prince will pay short visits to Ceylon, the Federated Malay States, the Straits Settlements, and Hongkong, whence he will proceed to Japan, landing there about April 13, and departing three weeks later. On the return journey, the Renown will follow the same route as the outward voyage, through the Suez Canal. His Royal Highness will arrive in London some time in June of next year.

The Prince and his staff and Captain Meade, Commander of the Renown, are to mess together in the Royal suite, which has a separate galley, as well as secretaries' offices and a special printing office. The Rev. Thomas Crick, who was chaplain on board the Malaya during the Duke of Connaught's tour, has been appointed chaplain to the Renown. Among the 65 officers is Prince Charles, second son of King Albert, now in his 18th year, who was a cadet with Prince George on the Thunderer during her Mediterranean tour, and has just been appointed to the Renown as a midshipman.

## NOTES AND NEWS.

Devonshire Square.
E.C. 2,

**The Rupee Problem.**

The question of Indian Exchange is dealt with on another page in an article by "Gold Mohur," whose knowledge of his subject renders his view of the outlook of particular interest. An unqualified forecast is out of the question, but it is not difficult to see, reading between the lines, that he is for the moment optimistic. An ultimate advance of the rupee to 2s., however, would seem to be dependent on the extent to which American exchange finds it way back to parity. In the meantime there are enough factors within sight to render fluctuations almost inevitable.

**Indian Trade.**

The published trade returns for last July lend significance to the more recent movements to which "Gold Mohur" calls attention, June and July, we may hope, touched bottom. In July there was a further decline in imports into India, the value of the goods imported being less than eighteen crores of rupees, the lowest figure since December 1919. Exports showed a slight improvement of seven per cent. on the figures of the previous month, when the lowest total was reached, but are twelve per cent. down on the returns for July 1920, as compared with the drop of 37 per cent. in imports. Thanks to a net export of treasure amounting during the month to Rs.1.23 lakhs there was for the first time after a lapse of fourteen months a balance of trade in favour of India. Raw materials and manufactured articles declined, but larger shipments of rice helped to bring the improvement in the exports of Indian produce, food, drink, and tobacco to nearly two lakhs.

**Customs Duties in Turkey.**

The Constantinople Government has issued a Decree fixing until the re-establishment of peace an *ad valorem* tax of eleven per cent. on all foods imported into any of the Customs Zones of the Ottoman Empire. A mixed commission composed of officials and business men is to determine the value of goods for duty purposes, and until the new duties are fixed the taxes will be collected according to the system in force before the existing differential duties were introduced by the law of March 1916. In other words, it must be inferred, the eleven per cent. *ad valorem* duties to which the Powers gave their assent in 1907 will be reimposed at once, except in the case of (*a*) goods in the hands of the Customs before the publication of the present decree and during one month from the date of its publication: and (*b*) goods ordered before the publication of the Decree and consigned within thirty days of its publication, on the condition that they be submitted to customs formalities during the month following their arrival in a Customs Zone of the Ottoman Empire.

**A Question of Grace.**

The Treaty of Sèvres, it will be remembered, provided for the re-establishment of the 1907 convention regarding imports duties. It was also left to the Financial Commission appointed under the Treaty to make any modifications in existing duties or to impose new duties, subject to a period of six months' notice being given to all the Allied Powers. Whether merchants were also to have the benefit of that long notice was not stated, but they would not be likely to remain in ignorance of any proposed change. In the present case the period of grace given in regard to the new duties is restricted to one month, a concession which in view of the fact that most goods must take nearly that length of time to reach Constantinople, at least from Great Britain, practically limits the benefit to goods already on order. This, however, is more than the authorities want to allow in Smyrna. According to our Correspondent there, the new duty is to be enforced at once, but I can only suppose that this is due to an oversight on the part of the Greek Administration, and that, when their attention has been called to the procedure in Constantinople, they will also allow a similar period of grace.

**The Smyrna-Aidin Railway.**

It is an ill wind that blows nobody any good. While Smyrna itself is complaining of stagnation—the picture drawn by one correspondent, "business at a complete standstill, crops rotting, mines closing down, all other products held up for want of labour, transport and capital" is, I hope, overdrawn—the Smyrna-Aidin Railway has a very different story to tell. By June 30 last it had completed the first twelve months during which the line has been worked by the Company since the outbreak of war. In that period, owing partly to the use of the railway for military purposes by the Greeks and partly to accumulations of freight waiting to be carried, both passenger and goods traffic exceeded all previous records. When to this exceptional activity is added an increase in rates, it is not surprising that the company can show a satisfactory balance sheet. Gross receipts amounted to £1,255,900, of which less than £190,000 is accounted for by military traffic. There was a net profit of £216,900 which enables the debit balance accumulated in the years of the war to be reduced by that amount to £701,000. The comparatively small proportion, fifteen per cent., of the revenue derived from military traffic suggests that the railway has almost as much to hope for as the port of Smyrna from the cessation of the Greco-Turkish war and a satisfactory settlement of the Asia Minor question.

REPORTS FROM OUR OWN CORRESPONDENTS.

## EGYPT.

*Cairo, September 9.*

**Reaction of Prices.**

Decades behind Western countries in general commercial procedure, Egypt is yet in some ways well in the van in economic reaction. We are experiencing an instance at the present moment. For the past fortnight there has been a steady rise in the price of cotton. The rise had been awaited with more than ordinary eagerness, because the vast majority of the people of Egypt, though they would have been totally unable to give any coherent explanation of what the rise portended, were thoroughly aware that its main effect would be to ease the tightness of money in the country. Consequently, now that the price has advanced to over 40 dollars, there has been an immediate advance in retail prices of food-stuffs produced and supplied locally. For instance, within the last week, the price of wheat in Upper Egypt has risen from 200 piastres to 288, dura from 96 piastres to 132, and beans from 140 to 192 piastres the ardeb. In many cases the vendors of these foodstuffs are also cotton-growers, and they are unable to comprehend why a rise in the price of cotton is not incontrovertible proof that other agrarian products should not rise also. The native press already is calling loudly to the Government to produce a remedy; but it is more than likely that, in view of the approaching winter season, the general tendency of prices will be upward.

**Passing it on.**

It will be unfortunate if this is so, for more than one reason. Primarily, the bad effect of the continued slump in business in Egypt has been too severe to enable the purchasing power to recuperate with the same rapidity as cotton has risen. In the second place, there is ample evidence at the moment that the winter season is likely to be a nearer approximation to pre-war seasons than any since 1913, and it would be tragic if those who do come are stalked by the bogey of an inordinately high cost of living. Reference has been made to this subject recently in these letters, and it is gratifying to be able to report that the hint given on that occasion has been considered by hotel proprietors and other caterers for the tourists. But apart from these hotel companies there are thousands of smaller businesses in Egypt which supply the various needs of passing visitors and the prices of these merchants must always be subject to current economic conditions. On the other hand, visitors must not expect that the inordinately low prices of pre-war days are likely to return. The war, amongst other things, educated the Egyptian merchant to a standard of higher prices and from it he is not likely to depart.

**The Coming Season.**

As already pointed out bookings for the coming season have been encouragingly heavy. Apart from four big tours that have been arranged, a large number of intending visitors have written direct to the various hotel managements, asking for rooms to be reserved far ahead. Further the announcement of the resumption of the Cunard sailings from New York to Naples has, according to information from America, attracted numerous applications for berths and many of the applicants have signified their desire to go on from Southern Europe to Egypt. I understand that the Cunard direction is deciding to accede to these requests and that a Cunarder will be run on to Alexandria towards the close of the season to pick up the tourists who come on to Egypt. Arrangements are also being made in Egypt to afford visitors varied and full entertainment. All the Nile Steamship Companies are re-starting their normal services, with the addition of a number of new and luxuriously-equipped boats.

## ROUMANIA.

**General News.** *Bucharest, September 13.*

The economic convention with Greece having lapsed on September 3, the general tariff has been put into force for all kind of goods of Greek origin. The Greek commercial agent at Galatz has dispatched a memorial to his Government urging the necessity of the immediate renewal or prolongation of the convention as otherwise Greek produce will practically be debarred from entering Roumania. He calls attention to the great loss that is being caused to Greek importers in consequence of the expiration of the convention.

The commission sent by the Régie to Macedonia to purchase tobacco has returned after having acquired a large portion of various superior qualities, which will be utilized for mixing with Roumanian tobacco for cigarettes.

During the last fortnight about 50,000 head of cattle have been exported from Transylvania. A large number of pigs have also been sent from Bessarabia to Poland.

The nickle money which was ordered last May from a Swiss firm is ready for delivery; it represents an aggregate sum of 20 million lei in coins of 25 and 50 centimes. The cost amounts to 6,900,000 lei. The whole bulk will be dispatched in six truck-loads, which will be successively forwarded from September 10, up to the end of October.

With reference to the pending removal of restrictions on imports it is stated that there will be complete abolition of all restrictions, and that importation will no longer be hampered by any kind of formalities.

Delegates of the Polish Railways have arrived in Bucharest to discuss details for the transit of wagons between Roumania and Poland.

Negotiations are in progress between the Government and local banks with a view to the latter financing, on commission, the exportation of a large quantity of grain on behalf and for the account of the State. The banks have, in principle, accepted the Cabinet's proposal, and it only remains to settle points of detail with regard to the carrying out of the scheme.

Export taxes for cereals have been reduced as follows, per 10,000 kilos:—Malting barley, 2,000 lei; malt, 1,500 lei; decorticated barley, 1,500 lei; maize, 2,000 lei; oats, 2,000 lei; millet, 400 lei; dried peas, 4,500 lei; peas, 2,500 lei; maize meal, 1,200 lei; haricot beans, 2,000 lei; yellow mustard seeds, 3,000 lei.

## BULGARIA.

*Sofia, September 17.*

**The Free Export of Grain.**

The abolition of the Consortium's monopoly of the export of grain has led to the raising of the bogey of "famine" in Bulgaria. The cry is, undoubtedly, a potent one, more so than ever to-day in view of the situation in Russia, and the Agrarians show a tendency to make as much use of the word as possible in order to gain support for the contention that free trade in cereals will expose the country to the risk of hunger.

The facts of the case are as follows: the Government authorities estimate that twenty per cent. of the population of Bulgaria, *i.e.* roughly, a million people, are non-producers of cereals. Each person consumes annually on an average 200 kilograms of wheat, the equivalent of 160 kilograms of flour. In all 20,000 wagons of wheat are required each year to feed the non-cereal producing element of the population. It should not be difficult to obtain this amount with four million people engaged in producing cereals. Capable administration and a sound system alone are needed to divert the necessary supplies to the towns, where the great majority of the

Digitized by Google

million who have to be fed live.

The point, however, is raised whether a Government composed entirely of Agrarians can be relied upon to take effective steps for the rationing of the townsfolk, and even if their intentions were good, it is doubtful, so argue a section of the population, whether their officials are capable of carrying out their orders. The Consortium, it has to be remembered, was one of the main planks in the Agrarian Party's programme. Its abolition, or rather the modification of its monopoly privileges, has been forced upon the country in the Party's despite, and the policy to which the Government is now perforce committed is in conflict with the Party's declarations and the speeches of its leaders. Everyone is agreed that it would be a grave mistake to let the grain merchants have things all their own way and to export unlimited supplies of grain ; but the Government can always retain a portion of the contents of each wagonload destined for export, and use this portion for the rationing of the non-producing fifth of the population. No fears need be entertained that the peasants will run short of supplies, as they are far too shrewd for that to happen.

## YUGOSLAVIA.

*Belgrade, September 19.*

**The Fall in Exchange.**

The collapse of the dinar is the most absorbing topic, both of conversation, and in the press. The causes are manifold and complex. The long drought, which has had so bad an effect on the harvest is certainly a large contributing factor. It is confidently believed that at Zurich there is a committee of Polish Jews who are interested in beating down the exchange in the east of Europe generally, and in Yugoslavia in particular. Italy is interested, from political as well as from economic reasons, in seeing the dinar low. But the short-sighted policy of the Government, expecially its xenophobism since the Armistice and its export duties, is largely to blame for the want of confidence abroad. The Cabinet is considering a whole series of measures with a view to propping the dinar up, for the depreciation is hitting the country very hard, in particular commercial circles, who have to face heavy losses on goods bought abroad a month or two ago when the dinar had been standing firm for a considerable period. Merchants have now to meet their obligations in foreign currency with the dinar at the record limit. There has been certainly a great deal of speculation, and wild dealing, but a slight improvement was noticeable last week. It is reported that the Government proposed to take off a number of export duties, and to reduce others, and again to control dealing in foreign currency.

**The Internal Loan.**

The authorities are busy booming the internal 500,000,000 dinar loan. Although it is stated that the banks have underwritten the issue, it is very desirable for several reasons, and, not the least, a political reason, that the country as a whole take it up. The papers frequently report the subscription of a million dinars by sundry millionaires, and it is noteworthy, and characteristic, that a very large number of organised bodies, associations, and clubs, are subscribing to the utmost of their power, and even placing all their reserves in the loan. The commercial classes, however, are too hard hit by the fall in the dinar to be able to do their proper share.

## ABYSSINIA.

*Khartoum, September 5.*

**Slow Progress.**

Reports from Adis Abeba state that during July there has been very little apparent revival in trade, although a better state of affairs is manifested in the hide market.

The average rate of exchange of Maria Theresa dollars is igven as 11.55 to the pound sterling.

## INDIAN EXCHANGE.

### THE OUTLOOK.

*(By "Gold Mohur.")*

**The Monsoon and Other Factors.**

Now that the Monsoon in India has practically ceased it may be of interest to try to forecast the probable results and its effects upon Indian trade during the next six months.

On the whole the Monsoon has been good. In some districts, no doubt, there has been a shortage of rain, but it may as well be borne in mind that over such a vast area there is almost always certain to be a scarcity in several districts. Crop reports, both public and private, are very satisfactory and the prospects are most encouraging.

Other factors have appeared which should go far towards enriching the country, and one which should prove welcome to the cotton cultivator is the recent sensational rise in the price, which gave such a stimulus to the Bombay market that local quotations for Broach cotton advanced fifty rupees per bale in the first week of September. Such a market appreciation is not all due to speculation, as private reports to hand indicate that a large business has been booked by exporters to Japan and Europe.

This activity has no doubt had an influence on exchange, which during the past two months has registered a decided advance only broken by one or two temporary relapses, and the rupee may now be called within sight of 1s. 6d. When one considers that quotations only a few months ago were marked down to 1s. 3d., the improvement has been substantial. Although the favourable Monsoon gives every promise of prosperity, there are untoward influences to be reckoned with which may obscure the outlook. Labour troubles in India lately have been a frequent cause of anxiety, and profiteering in grain and foodstuffs, particularly in Northern India, has compelled the Government to investigate the matter.

A fair amount of Welsh coal has been booked for shipment to India, and it may come as a surprise to many that heavy shipments of wheat are being made from Australia. Several cargoes were shipped in June and July, but well over a dozen more have been settled for September-October loading of which the value must run to over a million pounds. These imports will act as a set-off to a small extent, but it need not be assumed that they will exert more than a trifling influence on exchange.

Should a further pronounced rise in the rupee take place, it would, of course, tend to check exports, but a higher rate will prove a godsend to the country, and to the Manchester merchants especially, who are interested in very large stocks of piece goods, the delivery of which was refused on account of low exchange.

**Will the Rupee Rise ?**

The question which many would like an answer to now is : Will the Rupee rise further and, if so, will it reach 2s. ? The only answer is that it depends entirely upon exports. Some authorities say that there will be very little to export. The jute mills in Calcutta are running only four days a week, and this restriction will continue until the end of the year. On the other hand it cannot be denied that a certain amount of business is moving in exports and although speculation had its share in pushing rates up recently, nothing more than a temporary reaction has taken place.

# INDIA'S TRADE IN 1920.

## GREAT BRITAIN'S RECOVERY OF POSITION.

**A Valuable Report.**

The Chapter in the Government of India's progress report for 1920 dealing with the economic life of the country during the period is so interesting and informing that one cannot but regret that it should be entombed in a Blue Book, a class of publication against which the public is so hopelessly prejudiced that the mere name has come to be regarded as a danger signal to keep off all who would avoid boredom. Well written, admirably put together, and instinct in every line with a sense of proportion this "Annual Statement exhibiting the moral and material progress and conditions of India" would, we believe, achieve a large circulation, and find a place in the lists of all the circulating libraries if the India Office had issued it in an illustrated cover conspicuously marked with the compiler's name and concealing all trace of its official origin. Failing this, however, it would, we think, be greatly to the public benefit, if the economic section could be issued separately as a cheaply priced pamphlet in order that it might be brought within reach of the great public interested in Indian trade, who are not prepared to pay half a crown for a Blue Book three-fourths of which is devoted to political matters. This economic section dealing with the events of 1920, needless to say, tells anything but a cheerful tale, but it is all to the credit of the author that when one has indulged one's pessimistic bias to the utmost and dwelt as long as possible on the dark side of the picture it presents, one is still left with the feeling that India may well congratulate herself on having escaped some of the more trying experiences of other countries harder hit by the sudden collapse of the post-war trade boom.

The effect of the revolution in Indian internal finance brought about by the establishment of the new system of Government had yet to be learnt when this report was compiled. Whether an arrangement which makes the Central Administration to a large extent dependent on the Provincial Governments for the bulk of its revenues is calculated to make for harmonious working remains to be seen, but it is obvious that it makes for the simplification of public accounts and has at least the merit of testing the efficiency of the Provincial Governments in what is after all the most important department of administration—the raising of the maximum amount of revenue with the minimum amount of friction. "Seldom in India has there been a contrast so extraordinary between the conditions obtaining at the beginning and the end of a period so short" states the writer of the report, and if he had substituted "never" for "seldom" as the opening word of the sentence few would have been disposed to charge him with exaggeration. In the matter of exchange alone representation that the conditions experienced were unique could hardly be disputed, and with this melancholy subject, needless to say, the report deals fully. It is, however, somewhat startling to find in an official report a criticism on the policy of the Government as unsparing as the following:—"It would seem from this brief sketch of the exchange history of the year 1920, that the expectations of the Government of India have been falsified, and that the attempt to make them good has weakened India's sterling resources, besides undoubtedly to some extent contributing to the excess of imports by encouraging over-buying on the part of the importer." That things will probably settle themselves in time is the best that the report can offer India in the way of consolation. "The absorption of available stocks of India's produce in America and elsewhere cannot be long delayed and some at least of her customers must shortly resume their purchases." It is also pointed out that the fact that there has been a large return of rupees into circulation is full of hopeful augury and it is certainly satisfactory to note that the percentage borne by the metallic portion of the currency reserve to the total note circulation at the time the report was compiled was no less than 53 as against 46 in 1919.

In the paragraph dealing with the 1921-22 Budget we get some measure of the extent to which India has been affected by the political and financial confusion prevailing all over the world. Faced with a deficit of 18,1-3 millions it has been the misfortune of the new Government to begin its operations with the imposition of heavy additional taxation on a country little disposed to accept the necessity for shouldering its share of the financial burden of the great war. When, however, one realizes that the end of that war sees India carrying a public debt of no more than £378,000,000, and that a very large proportion of this is covered by substantial assets in the shape of reproductive public works, the relative financial strength of India under present world conditions is apparent.

**Trade Statistics.**

Turning to trade statistics, we find that, while the volume of imports decreased by 45 per cent., and that of exports by 19 per cent., the average prices of imports increased by 105 per cent., and of exports by 56 per cent. In dealing with imports it is pointed out that the quantity of imported cotton twist and yarn was the lowest recorded since 1866-67, showing a heavy drop in the figures for the preceding year, being only 15 million lb., as against 38 million lb. In cotton piece goods a decrease in the quantity of grey and coloured goods imported of 70 million yards was partly set off by an increase of 30 million yards of white goods. Nevertheless the proportion contributed by the United Kingdom to India's imports of piece goods showed a marked increase over her competitors, Japan and the United States, affording welcome evidence of the revival of British manufacturing enterprise after the war. The demand for iron and steel goods of all descriptions led to a great increase in the quantities imported—0.43 million tons as against 0.18 million tons in the preceding year; an increase in quantity of 135 per cent., but owing to the lower level of prices the value of the imports showed an increase of only 31 per cent. As regards exports it is pointed out that the figures for these were the highest on record amounting to £309 millions an increase of 29 per cent. over the preceding year's and of 27 per cent. over those of the pre-war year." The principal articles of export in 1919-20 in order of importance were: First, cotton raw and manufactured; second, jute, raw and manufactured; third, hides and skins; fourth, seeds; fifth, tea; sixth, grain pulse and flour; and seventh, lac, Food stuffs which during the past 30 years have held the lead on no fewer than six occasions, sank to the sixth place in the year under review." Nothing in this report is more striking than the evidence it affords of the success of British trade in recovering the place in the Indian market she temporarily lost during the war years, and the failure of the competitors who then displaced her in holding their own against her. "One of the outstanding features of the year was the comparative collapse of the Japanese import trade and her consequent descent to third place among India's commercial customers. She has shown herself unable to withstand the pressure of unhampered British competition in cotton manufactures and has lost almost all the ground she had gained during the war."

It is impossible to deal within the compass of a short article with more than a tithe of the matter included in this voluminous report, and considerations of space preclude more than a passing reference to its very important railway section. The best one can say of it is that it records a gallant struggle on the part of the sorely tried railway administrations of India to restore efficiency to systems starved and disorganized by the imperative necessities of the State in war time. Nevertheless the gross earnings of the Indian railways reached the record figure of £59 43 millions from which the Government reaped a handsome revenue.

**Some Satisfactory Features.**

That India has been hard hit by the set back international trade has experienced in the past twelve months no Government report is needed to bring home to us, but some of the commercial Jeremiahs who are inclined to see in her present troubles merely a mild foretaste of those in store for her may be reminded that not one of the misfortunes she has experienced but has its counterpart in those of other countries at the present time; and one is even inclined to think that, when her future prospects are dispassionately examined, they will be found to be much more hopeful than appears at first sight. In the first place a country which has escaped any great increase in her State debt as a result of the war starts the era of reconstruction at a great advantage over nations on whom it has imposed crushing burdens, from which they cannot hope to be relieved for centuries. In the second she is in the happy position of still having at her command many sources of potential wealth in the shape of untapped resources, commercial, industrial and agricultural, only waiting to be exploited when her rulers have the enterprise to develop her internal communications up to the European and American standard. At present India's restoration to commercial health is hampered by the destructive activities of misguided agitators who hope that by the creation of widespread misery, they may

Digitized by Google

rouse in the people the discontent necessary for the furtherance of their political ends. But these political obstacles to commercial and industrial rehabilitation far from being peculiar to India exist to-day in practically every country in the world, and her future turns mainly on the capacity of her new rulers to bring home to her people the folly of allowing their energies to be deverted into useless political channels when every ounce is needed for the development of her material resources. Under the old bureaucratic regime a disposition was often shown in high places to regard the enterprising capitalist as a selfish individual bent on exploiting the country solely in his own interests, and as such a person to be discouraged as much as possible. Under the new regime the commercial element being far more in evidence in the councils o the State it is not too much to hope that its influence will be fexerted in the interests of those who in their efforts to create wealth for themselves are compelled by the operation of inexorable economic laws to distribute it among the people without whose assistance they can accomplish nothing. It was for many years the stock grievance of the nationalist politician in India that the exploitation of her wealth by foreign capitalists had reduced the mass of her population to the lowest depths of poverty. This theory, honestly believed by most of the men who advanced it, never rested on a substantial basis of facts, but with the disappearance for a season of the foreign capitalist ready to invest his wealth in Indian enterprises the subject is reduced to one of purely academic interest and to-day is hardly worth discussing. For many years to come it looks as if India would have to finance herself, if she is to make any progress in the world, and the most serious task demanding the attention of her new rulers is the economic education of the country with a view to utilizing its hoarded wealth for its commercial and industrial development. As for India's present commercial difficulties due to the temporary inability of the nations of Europe to pay for the raw material she produces in such abundance and of which they stand so badly in need, balanced by her own temporary inability to pay for the costly manufactured goods they offer her in exchange, these will disappear with the breaking of the vicious circle in which the trade of the world is for this time being involved. In India, as in all the countries of the world, the slump in trading has already spent its force, and in the revival, signs of which are beginning to manifest themselves, she is likely to secure a greater share than some less happily placed nations.

## CLAIMS ON BULGARIA.

According to a Board of Trade announcement the Mixed Arbitral Tribunal between the British Empire and Bulgaria has been constituted and is about to commence work in London. The President is Mr. B. C. J. Loder, Judge of the Supreme Court of the Netherlands; the British Member is Mr. Heber Hart, K.C., and the Bulgarian Member is M. Alexandre Ludskanoff, Member of the National Assembly, and formerly Secretary of State in Bulgaria. As the system of clearing offices has not been adopted between the United Kingdom and Bulgaria claims in respect of disputed debts due by Bulgarians to British subjects will be dealt with directly by this Tribunal. It has also jurisdiction under Section IV. ("Property, Rights, and Interests"), Section V. ("Contracts, Prescriptions, Judgments"), Section VI. ("Mixed Arbitral Tribunal"), and Section VII. "Industrial Property") of Part X. of the Treaty.

## TENDERS INVITED.

*(Particulars of tenders marked (D.O.T.) are to be obtained from the Department of Overseas Trade, 35, Old Queen Street, S.W.1.)*

*Tenders are invited for the following contracts and must be made by the dates mentioned,*

**Yugoslavia.**

Indiarubber Covers.—The Artillery Section of the Ministry of War and Marine, Belgrade, invites tenders for the supply of the following articles:—

270 indiarubber covers for one ton automobiles marked "Berliet," dimensions 940 x 130. 400 indiarubber covers for three tons automobiles marked "Berliet," dimensions 1,000 x 130. 100 indiarubber covers for automobiles marked "Paccard" dimensions 34 x 3½ or 715 x 100. 120 indiarubber covers for two ton automobiles marked "Paccard" dimensions 34 x 3½ or 715 x 100. 40 indiarubber covers for two ton automobiles marked "Garford," dimensions 36 x 4. 120 indiarubber covers for two ton automobiles marked "Garford," dimensions 36 x 7. 12 indiarubber covers for two ton automobiles marked "Tracteur Latil," dimensions 1,000 x 140. Four indiarubber covers 37 x 6 for moving workshops.

Further particulars may be obtained on application to the Banque Franco-Serbe, 30, Coleman Street, E.C.2. Tenders close October 22.

**Roumania.**

Sacks.—The Roumanian Ministry of War invites tenders for the supply of 250,000 sacks. The fibre to be of hemp or Calcutta jute. The number of threads by square centimetres to be:—6—7 in warp, 5—6 in woof. Resistance:—In warp 90 Kgrs; In woof 60 Kgrs. Elasticity:—In warp 11—14 mm. In woof 10—11 mm. Size of sack:—Length, 1m. 10cm. Width, 0m. 70cm. Weight of sack—1 kilo 100 gr.—1 kilo 200 gr. The sacks to be made of a single piece, the sides of which should be sewed with very strong hemp or jute thread and the top hemmed. All tenders, which should be addressed to "Inspectoratul Technical Intendentei, Cala Grivitei, 28, Bucharest," must be accompanied by samples and a bank guarantee of 10 per cent. of the total value of the tenders to be returned to firms whose tenders are not accepted. October 15.

Pipe Line Construction.—In connection with the laying of a pipe line, 26 kilometres in length, for the supply of natural gas to the town of Targul-Mures in Transylvania. H.M. Consul at Cluj has received from the Engineer in charge of the scheme a statement of the material which will be required. This includes: 8,000 metres Mannesmann steel pipe; 21,600 metres steel pipes of various diameters; 17,700 metres drilling tubes of various diametres; 15,000 kilogrammes steel for hand tools; 40,000 metres galvanised iron or copper wire. Various valves and fittings; spades, shovels, mattocks; also tools for two iron workshops and two mechanical workshops; 500 metres camel hair belting pulleys, etc. Quotations for the supply of this material are desired from United Kingdom firms who would be prepared to grant a long credit of three or more years. (D.O.T.).

**Bulgaria.**

Tin Ingots and Tin Rods.—The Directorate of State Railways, Bulgaria, invites tenders for the supply of tin ingots and rods as follows:—Tin ingots (10,000 kgs.); estimated price 140 leva kg, 1,400,000 leva; tin rods (5,000 kgs.); estimated price 140 leva. 700,000 leva. Tenders, preferably in French or German, and should be addressed to Director-General des Chemins de fer, Sofia, Bulgaria. Delivery in three and a half months c.i.f. Bulgarian Black Sea or Danube port. October 8 (D.O.T.).

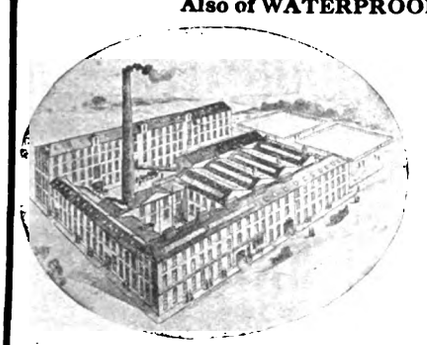
Hardware.—The Bulgarian Ministry of Railways, Telegraphs and Telephones, invites tenders for the supply and delivery of brackets, belts, and other hardware furniture of telegraph and telephone lines. October 12.

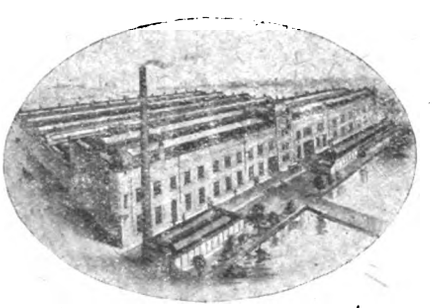
**Egypt.**

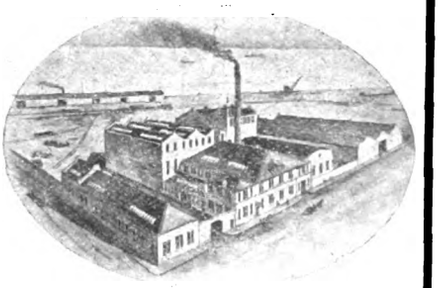
Wood:—The Secretary-General, Ports and Lighthouses Administration, Arsenal, Alexandria, invites tenders for the supply of wood. October 5.

Cable Address: "Lobo, Dundee." **LOW & BONAR, Ltd., Dundee, Scotland.** Codes used: A.B.C., 4th, 5th & 6th edns., A.1, Lieber, Lieber 5 Letter, Bentley's, Marconi International

**Manufacturers of SACKS and BAGS of LINEN, COTTON and JUTE, for all purposes.**
**Also of WATERPROOF CANVAS and TARPAULINS, Specially prepared for tropical climates.**







*Speciality:* **ELASTIC FIBRE-LINED JUTE BAGS, Securing Absolute Purity of Contents.**
DAMP-PROOF BAGS, WATERPROOF BAGS, FIREPROOF BAGS, Etc.
Shippers of all classes of JUTE, LINEN and COTTON FABRICS.

# Engineering Topics.

*By our Engineering Representative.*

### The Engineering Profession.

Even before the war there were those who held that the engineering profession was overcrowded, and who urged parents and guardians to give up all idea of allowing their sons or wards to enter the ranks of the profession. "Far better make the boy a grocer or an undertaker," they would say, implying that he would then make a living at any rate, and a living which would be denied him as an engineer.

It is curious to note that this altogether erroneous impression still survives. Dr. Hillard, High Master of St. Paul's School, has recently said that engineering is a much overcrowded profession to which too many boys are looking for their future careers. Admitting the statement that the profession is overcrowded, the equally true statement must be made that it is overcrowded with unsuitable, semi-trained men, the mere fact that these have been admitted to the ranks showing in itself the urgent need that exists in the profession for men who have some engineering knowledge and aptitude, however slight. This strong insistent need is shown by the efforts being made by employers to educate and train their shop boys, to persuade youths to become apprentices, to induce employees to attend technical schools and to the giving up of time and money in instituting works' training schools in which training is given in the firm's time, at the firm's expense, and full wages are paid during the hours of instruction. Were the profession overcrowded with the right sort of men we should find the natural law of supply and demand at work, and efforts being made by employers and mens' unions alike to dissuade any boy or youth from wasting time in obtaining engineering knowledge.

As a matter of fact there has never been a time in the history of the engineering profession when there was so insistent a demand for trained men as at present. In partial excuse for Dr. Hillard's statement it may be urged that it is the work of the mechanical engineer which parents generally have in mind when they speak of engineering, and it is just that branch of the profession which is best supplied with good men. The works' schools of the Midlands and North have seen to that; the expense has been great, the efforts gigantic, but they have borne some fruit, and the men to an extent exist. But even in the ranks of the mechanical engineers there is a growing demand for men with brains and with engineering aptitude and knowledge. Of those already in the profession only a very few are capable of administrative and supervisory work; there are few of original ideas, few who have sufficient imagination to make advancements and to assist in development. Here then is ample room for the well educated youth who has a mechanical bent of mind and who is not afraid of intensive study and hard work.

But the mechanical engineering profession is not the only branch, although it perhaps ranks highest in importance. Electrical engineering, although fairly well supplied with men by reason of the efforts the leading firms have made to bring this about, has innumerable openings; openings which are increasing in greater ratio than could be believed by anyone not closely in touch with the situation.

The chemical engineering branch of the profession can absorb any number of well trained men who combine a knowledge of chemistry with that of engineering. If ever a profession was "in its infancy" in this country, it is that of the chemical engineer, whilst the prospects, the rewards it offers for aptitude, knowledge and hard work are perhaps higher than in any other profession, new or old, under the sun. Hydraulic engineers are few in number and always eager to add to their ranks. A huge amount of hydraulic work is to be done and everything carried out in this line seems to bring further and greater tasks in its trail. Mining engineers are not by any means over crowded; there is any amount of room for the trained metallurgical engineer and whilst it is true that internal combustion engineering generally has at the present time quite as many in its ranks as it can do with, aeronautical engineering, on the other hand, is practically only just enrolling its members; has vacancies for everyone who possesses the necessary knowledge and skill, and will probably, in a few years, be one of the most prominent and lucrative branches of the profession.

### Screw Gauges.

I have already referred to the large production of limit and other gauges by Wolseley Motors, Ltd., and I gather that their patented method of thread grinding, by which the threads are ground on each unit after the hardening operation has been completed, has proved successful in every way. This method enables gauges to be produced at a cost which closely approximates to that of the inferior and often inaccurate gauges made and sold before the war. A pamphlet sent me gives a complete list of the National Physical Laboratory Workshop inspection and reference limits to which these screw plug and ring gauges can be made, and it points out incidentally the very great advantages derived, in manufacturing work, from the use of absolutely accurate gauges. For example, if a designer can place complete reliance on the accuracy of the screws, bolts, or nuts he considers should be used, he can frequently specify a bolt or similar part of smaller diameter. Assembling work will cost less when the parts dealt with are made strictly to size, the percentage of scrapped parts will be lower, and the finished products will wear, or do their work better, as the case may be. All readers interested in production should make a point of obtaining a copy of the pamphlet which contains a considerable amount of very useful information.

### Magnetos and Motor-Cycles.

The Norton motor-cycle—always renowned as a prolific record maker—and breaker—suffered somewhat of a set back on August 24th at Brooklands when two records, the flying five miles and standing ten miles which had been held by Nortons since 1914 were captured by a rival make. On September 5th, however, Norton riders recaptured both records at a speed of 81.52 and 78.23 m.p.h. respectively, both of which runs constitute British and worlds class records, demonstrating once again the remarkable speed and acceleration of these machines. As in other notable events, the Nortons pinned their faith to the All-British C.A.V. Magneto, which thus adds further to its long list of successes.

### Brass Failures.

The subject of brass failure was dealt with at the annual conference of the Institute of Metals, more particularly with regard to those failures which take place more frequently than manufacturers like, when hollow drawn articles are being made from brass rod. It appears that these failures have generally been found to be due to the presence of non-metallic inclusions which originated in the cast ingot. In articles drawn from cupped discs, punched from rolled strip, the inclusions in the walls are circumferential in direction and of less effect on the wall strength. Naturally there are many methods of casting brass ingots, every foundry having ideas of its own. Generally, chief consideration is given to the saving of rolling, and ingots are made in a correspondingly suitable form, those used for the making of rod commonly being very long and narrow. Such forms are not particularly undesirable when the finished product is solid, but where a hollow article, subject to expanding stresses in use, is to be made, the avoidance of inclusions of foreign matter is vital, and the form of

Digitized by Google

ingot requires considerable modification.

During the course of a number of experiments which were carried out with a view to minimising the occurrence of non-metallic inclusions, a form of ingot was adopted the length of which was not great in proportion to the cross sectional area. The ingots made were 3-in. square and 30-in. in length, as compared with the ingots 6 to 7-ft. in length, and 1½-in. square section in common use. Steel-making practice was followed in introducing a hot sinking head or "dozzle." The molten brass is poured through the dozzle, which is filled to the top. No pipe is formed in the ingot proper, and additions of metal may be made at any time to the metal in the dozzle without risk of introducing defects into the ingot, any dross rising to the top of the still fluid head. The moulds were tapered, the top being enlarged by increasing amounts in successive experiments, and ingots were cast at the usual foundry speed. It was found that with a mould 3½-in. square at the top, tapering to 3-in. at the bottom, no shrinkage cavities were formed, and the ingot appeared to be practically perfect as regards soundness. By these methods, failures which previously reached large percentages were reduced to practically nil.

**Hill Records Broken.**

The annual hill-climbing competition of the Midland Automobile Club affords each year evidence of the engineering skill of our fast car designers. The tests to which the cars are subjected in this are exceptionally severe, and as the hill on which they are held is on private ground no limits are placed on the speeds attained. Consequently every competitor does his level best to break records in the four events, Open, Closed, Light Car and Team, into which the programme is divided. There were prizes for the fastest time and for the best handicap performance on formula, and it is of interest to note that the chief prize of the meeting, the President's Cup, given for the best handicap performance was won on an Austin "Twenty." The fastest time of the day was made on a 6-cylinder Sunbeam by the same driver who won this distinction last year. This year, however, he was able to beat the previous record made in 1913 by the Earl of Shrewsbury's Talbot, by 5 seconds. A racing Vauxhall made the second best time, the G.N., which did the climb in just over 54 seconds being third as regards actual time of climbing. In the light car event this car actually made the fastest time of the class, beating the old record for the hill by over two seconds. The Bugatti made the second best light car climb, and the racing Calthorpe came third.

**Road Signs.**

Some unauthorised action seems to be taking, or to have taken, place in regard to certain speed limit signs and an official of the Automobile Association recently noticed that certain of these had been erected covering a greater area than that prescribed by the Ministry of Transport. The Association immediately notified the authority concerned who took the necessary steps at once to have the signs removed to the correct position. If any motorist notices any sign in a position for which there appears little or no justification, he should 'phone up the Association, or drop a card to Fanum House, Whitcomb Street, W.C.2., and give full particulars.

**Tyre Repairing.**

One of the most time-honoured names in connection with the motor industry is that of the Harvey Frost Co., which has been so closely identified with tyre repairing work, in the direction of vulcanising, for so many years that the name comes at once to the mind of the motorist directly the word 'vulcanising' is mentioned. The company I understand is about to enter on a wider field. By this I do not mean that they are going to make outer covers and tubes, but I believe they are going to do everything short of that. I hazard the opinion that repairing and retreading will form a part of their work, but whether this be so or not I am certain that they will have the good wishes of every road user in connection with this new venture.

## NEWS FROM ALL SOURCES.

Constantinople's coal imports are now reviving and American coal is being sold at a price below that for British coal.

The death is announced of M. Nicola Toccos, the Alexandria tobacco merchant.

It is reported that Poland will shortly establish a Legation at Sofia.

In a message dated September 21, Reuter's Cairo correspondent states that the Government has decided to continue the present restriction of cotton-growing areas for a further two years.

It is reported that there are some schemes under discussion for obtaining electric power from streams in the Lebanon. One such scheme is under way at the Nahr Ibrahim, north of Beyrout, but up to the present it has made little progress.

Numbers have been announced of 277 bonds, amounting to £84,000 of the Ottoman Four per Cent. Loan of 1891 (secured by the Egyptian Tribute), which have been drawn for redemption on October 10.

According to the *Journal Officiel* chemicals and drugs, except chemical manures, may be exported from Egypt to any destination with which trade is allowed until further notice, without a specific licence from the Department of Supplies.

The Bulgarian grain Consortium has deposited 160,000,000 leva in the Agricultural Bank at Sofia as a preliminary to the scheme for the erection of grain elevators in various parts of the country.

Large allotments of coal permitted a greater output of steel in Czecho-Slovakia during last year, the production amounting to 972,976 tons, or an increase of 186,954 tons, or 23.8 per cent. over the output of 1919.

Japanese trade prospects with Egypt are said to be good and cotton fabrics appear to be the most important articles exported from Japan to Egypt, while raw cotton is the chief import from Egypt.

It is announced that the Greek moratorium has been extended until January 13, 1922, with the exception of one or two clauses, which have been further prolonged till February 13, 1922. The moratorium should have ceased to operate this month.

The s.s. Prahova, a 6,235-ton cargo steamer, built by Messrs. Armstrong, Whitworth, and Co. (Limited) to the order of La Premiere Societe Nationale de Navigation Maritime, Roumania, was launched from the Walker Shipyard, Newcastle-on-Tyne, on September 23.

It is announced that the exportation of gold from the mines of Transylvania and Roumania has been authorised by the Roumanian Government for a period of one month, provided the parties interested make a deposit in lei for an equivalent sum at the Roumanian customs or at one of the Roumanian Legations abroad.

The forecast of India's cotton crop shows that an area of 11,976,000 acres has been sown during this year as against 13,293,000 acres for the same period last year. Weather conditions at sowing time were favourable except in Northern India, where the rains arrived late. The present condition of the crop is generally good.

The total quantity of photographic paper imported into Greece during 1920 was 42,439 kilograms as follows:—France, 16,110 kgs.; United Kingdom, 12,203 kgs.; Italy, 7,577 kgs.; Germany, 2,734 kgs.; United States, 1,928 kgs.; Egypt, 1,761 kgs.; Holland, 423 kgs.; Spain, 380 kgs.; Switzerland, 132 kgs. Belgium, 92 kgs.; Austria, 53 kgs.; Russia, 26 kgs.; Japan, 5 kgs.; Turkey, 4 kgs.; and other countries 2 kgs.

164,999 kilos of aniline dyes were imported into Greece during 1920 from the following countries:—Holland, 61,290; Belgium, 22,005; Switzerland, 19,899; Italy, 16,820; France, 13,626; Germany, 11,513; United States, 9,470; United Kingdom, 7,893; Turkey, 1,100; Bulgaria, 695; Yugoslavia, 428; Czecho-Slovakia 100; Spain, 54; Denmark, 29; Austria, 29; Roumania, 9 Egypt, 5; Norway, 3; and other countries, 31 kilos.

It is announced that subscriptions in India and London to the Indian Government's Six per Cent. Rupee Loan (free of Indian income-tax) amounted to Rs.45,90 lakhs up to September 10. This figure does not include the final results of the conversion of 1921 and 1922 Indian War Bonds. Conversions of 1922 War Bonds ceased on September 15, but holders of 1921 War Bonds may convert into the new loan up to October 29, either in India or in London.

# Near East Markets.

## LONDON PRODUCE REPORT.

Coffee.—The market has been steady. Costa Rica is unchanged at 122s. and Indian is the same at 110s. Nairobi at 104s. has gained 2s., while Jamaica at 130s. is unaltered. Futures are :—September, 51s. ; December, 49s. 0d. ; March, 50s. 6d., ; and May, 51s.

Sugar.—Home refined has been in moderate demand at official rates. White Mauritius is 1s. down at 48s., and Czecho-Slovakian at 23s. 6d. has shed 2s. 6d. Other transactions include West Indian crystallized at 40s. to 46s., White Java at 24s., and beet sugar at 20s.

Oilseeds.—Prices are lower in all cases. Indian linseed has shed 3s. to 21s. 9d., and La Plata at 17s. 9d. has lost 1s. 6d. Rapeseed is lower with Toria at 22s., bold Ferozepore, 21s. 3d., and brown Cawnpore at 20s. 3d. ; decreases of 6d., 3d., and 3d. respectively. Indian cottonseed at 11s. 6d. is 6d. down, and Egyptian black has shed 3d. at 15s.

Seed Oils.—Unsteadiness has prevailed during the week. Linseed oil is 2s. 9d. down at 35s. 3d. Crude rape oil at 55s. is unchanged, but refined has dropped 2s. to 58s. Cotton oil is higher with common edible at 55s., Egyptian crude at 47s. 3d. ; and deodorized at 62s ; increases of 1s., 2s., and 1s., respectively.

Oilcakes.—Business has been quiet. Linseed cake is the same at 330s. ; finest Arachis cake has lost 2s. at 290s. ; while London-made cottonseed cake is unaltered at 220s.

## GREEK CURRANTS.

With the advent of autumn the question of supplies of currants for Christmas begins to assume some importance. It would appear that the prospects this year are much better than they were twelve months ago.

In an interview with a representative of "The Near East," Mr. G. A. Burlumi, of Messrs. Burlumi and Co., outlined the position. Dealing with the past year he pointed out that the 1920 crop which was estimated at 90,000, tons actually worked out at about 88,000 tons. "At the time of the arrival of the new fruit in this country" he went on there was, however, a large Government stock of old fruit, about 20,000 tons in all. Prices opened very high, the rate being round about 108s., and the demand was in consequence very small, and as the Government could not make progress in disposing of the old stock the Food Ministry had to reduce the price of currants to 45s. That decrease created a panic in the fruit market, and little business was done during the winter, dealers, adopting a hand to mouth policy. In February last a syndicate was formed which brought the whole Government stock at a very low figure. About one-third of the stock has been exported to Holland, Germany, and America at very low prices."

"So much for the past season. The new crop is estimated at 120,000 tons, and the Retention is 18 per cent. in kind, and 17 per cent. in cash. Therefore the available quantity for export is computed to be about 95,000 tons, which will be quite sufficient for the requirements of all consuming markets."

"The prices of the new crop" added Mr. Burlumi "are about half what they were at this time last year, and with a small stock remaining now in this country—estimated at about 10,000 tons—the prospects are that trade will be good and prices steady.'

In conclusion Mr. Burlumi touched on the position with regard to sultanas. "The Smyrna crop" he said "is about double what it was at 35,000 tons as against 12,000 tons. Prices have opened at a very high level at 88s. c.i.f. to 110s. c.i.f., according to quality, but it is improbable that these high rates will be maintained for long. Stocks here are absolutely nil as all the old stock has gone into consumption.

## SUDAN CROPS.

*(From Our Own Correspondent.)*

*Khartoum, September 1.*

Considerable damage to crops is reported from the Fung and Kassala Provinces, due to birds and rats. It is understood that measures are being taken to deal with these pests.

The Gash flood reached Kassala on July 6, and has flowed since without intermission. The floods are however, very low, and irrigation is proceeding slowly. The total cotton crop marketed up to the end of June from the Gash Delta was 38,710 Kantars, the anticipated total for the season being 40,000 Kantars, of which some 5,000 Kantars will have to stand over until after the rains for ginning.

The cultivation of banana trees has been seriously undertaken at Mongalla, where some 1,000 trees have been planted, with a view to supplying Khartoum with fruit.

## CURRENT PRICES.

*General Produce.*—Bacon (Continental), 156s. cwt ; bacon (Canadian), 130s. cwt. ; bacon (American), 107s. 6d. cwt. ; butter (Danish), 228s. cwt. ; butter (Australian), 196s. cwt. ; butter (New Zealand), 220s. cwt. ; cheese (Canadian), 108s. 6d. cwt. ; cheese (New Zealand), 115s. cwt. ; lard 80s. cwt. ; eggs (Danish), 23s. 9d. per 120 ; eggs (Styrian), 17s. per 120 ; chillies, 155s. cwt. ; cloves (Zanzibar), 1s. 3d. lb. ; cocoa (Ceylon good to fine), 87s. cwt. ; coffee (Costa Rica), 142s. 6d. cwt. ; coffee (East India), 140s. cwt. ; coffee (Central American), 120s. cwt ; coffee (Jamaica), 67s. 6d. cwt ; coffee (Mocha Long-berry), 113s. 6d. cwt ; coffee (Santos, superior), 65s. cwt. ; ginger (washed Cochin), 47s. 6d. cwt. ; nutmegs (110s to 80s) 11d. lb. ; pepper (Singapore black), 4d. lb. ; pepper (Muntok white), 9d. lb. ; pimento 2½ lb. ; raisins (Valencias), 105s. cwt. ; sultanas (Smyrna), 80s. cwt. ; currants (Vostizza), 71s. 6d. cwt. ; currants (Calamata), 46s. 6d. cwt. ; sugar (Tate's cubes), 59s. 3d. cwt. ; sugar (Lyle's granulated), 54s. 1½d. cwt. ; sugar (Mauritius crystals), 49s. 3d. cwt. ; sugar (West India crystallized), 45s. 6d. cwt. ; sugar (centrifugal), 19s. 3d. cwt. ; tapioca (fair Singapore), 2d. lb. ; sago (small pearl), 26s. 6d. cwt. ; rice (Rangoon No. 2), 21s. 9d. cwt. ; rice (bran Rangoon), £8 12s. 6d. ton. ; cinnamon (firsts), 1s. 4d. lb. ; mace (fair Singapore), 1s. 2½d. lb. ; tea (Indian, common to good common), 8½d. lb. ; tea (medium to good), 1s. 3½d. lb. ; tea (fine to finest). 2s. 4d. lb. ; tea (Ceylon, common to good to good common), 10d, lb. ; tea (medium to good), 1s. 4d. lb. ; tea (fine to finest) lb. ; tea (Java, common to good common, 6½d. lb. ; wheat, (English white), 61s. 0d. qr. ; wheat (La Plata), 82s. qr. ; wheat (Australian), 74s. 1½d. qr. ; barley (malting), 68s. qr. ; barley (feeding), 38s. 3d. qr. ; oats (English), 34s. 6d. qr. ; oats (La Plata), 30s. 3d. qr. ; maize (La Plata), 37s. 3d. qr. ; flour 52s. sack.

*Metals.*—Aluminium, £122 10s. ton ; antimony (English Regulus), £39 10s. ton ; bismuth 7s. 6d. lb. ; copper (standard), £67 16s. 3d. ton. ; copper (electro), £73 5s. ton ; gold bars, 110s. 4d. oz. ; iron (No. 3 Cleveland), 134s. 0d. ton ; hematite (mixed number), 160s. ton ; galvanized sheets (24 G), £20 5s. ton ; lead (soft foreign), £22 18s. 9d. ton ; manganese Poti, 1s 1½d unit ; molybdenite, 41s. 3d. unit ; nickel, £190 ton ; platinum 365s. oz. ; plumbago, £20 ton ; quicksilver, £10 2s. 6d. bottle ; silver bars 30d. oz. ; spelter (G.O.B.), £25 2s. 6d. ton ; tin (standard), £154 7s. 6d. ton : wolfram, 13s. unit ; zinc sheets, £35 10s. ton ; tin plates (20 by 14), 21s. 6d. box.

*Chemicals.*—Acids : Boric, 66s. cwt. ; oxalic, 7¾d. lb. ; citric 2s. 4½d. lb. ; tartaric. 1s. 5½d. lb. ; ammonia (sulphate), £13 11s. 6d. ton ; arsenic (white powdered), £31 5s. ton ; benzole (standard), 2s. 5d. gallon ; bleaching powder (35%), £16 10s ton ; borax crystals, 30s. 6d. cwt. ; cream of tartar, 127s. 6d. cwt ; Potassium : bichromate, 8¾d. lb. ; chlorate, 5d. lb. ; caustic £3 10s. ton ; nitrate £48 10s. ton ; permanganate, 11½d. lb. ; prussiate yellow, 1s. 2½d. lb. ; sulphate (90%), £17 ton ; Sodium : crystals, 141s. 3d. ton ; bi-carbonate, £12 5s. ton ; bi-chromate, 7d. lb. alkali (58%), £8 5s. ton ; chlorate, 4d. lb. ; caustic (70%), £24 10s. ; ton ; hyposulphate, £17 ton ; prussiate, 7d. lb ; nitrate, £18 7s 6d. ton ; glycerine, (crude 80%), £80 ton ; glycerine (industrial 1200%) £110 ton ; lemon oil, 4s. 1d. lb. ; quinine, 4s. 0½d. oz. ; red lead, £39 15s. ton ; white ground lead, £53 ton ; white dry lead, £42 12s. 6d. ton ; sulphate of copper, £30 10s. ton ; sulphate of iron 117s. 6d. ton ;

*Hides and Skins.*—Ox and heifer (first), 90 lbs. and up, 10½d. lb. ; 80 to 89 lbs. 10½d. lb ; 70 to 79 lbs., 10½d. lb. ; 60 to 69 lbs., 10d. lb. ; 59 lbs. and under, 8d. lb. ; (second) 90 lbs. and up, 9d. lb. ; 80 to 89 lbs., 9¼d. lb. ; 70 to 79 lbs, 9d. lb. ; 60 to 69 lbs., 8d. lb. ; 59 lbs. and under. 6½d. lb. ; Cows (first), 60 lbs. and up, 8d. lb. ; (second), 60 lbs. and up, 6½d. lb. ; 59 lbs. and under 6d. lb. ; Bulls (first), 5½d. lb. ; (second), 5½d. lb. ; Kips (first), 6½d. lb. ; (second), 5½d. lb. ; (third), 3½d. lb. Calcutta Market. Prices in rupees per 20 lb. :—Arsenic hides (cows) : Agras, 10 to 13 ; Durbhangas, 7 to 8.8 ; Patnas, 5 to 7. Salted cows : 3.8 to 6.8. Arsenic hides (buffalo) : 3 to 5. Skins : Calf, 8 to 10 per 20 lb. ; goat 250 to 285 per 100 pieces ; sheep good quality, not quoted.

## BRITISH CLAIMS AGAINST TURKEY.

The Journal of the British Chamber of Commerce of Smyrna, in a leading article discussing the general outlook, says :—A very great push to British trade would be given by even a partial settlement of some of the claims made by members of the Smyrna Colony against the Ottoman Government and at the same time conditions here would be very much relieved. Large sums of money are being and have been expended in relief to Belgians, Serbs and Russians, and it has been pointed out that the already heavily overloaded taxpayer at home cannot be asked to overload himself with further burdens.

It is the duty of every nation to help to the best of their ability with the work of post-War reconstruction, and the British Colony of Smyrna has at least as good a claim as anyone else for the settlement of their claims, more especially as by far the greater proportion of the money would be spent in the United Kingdom in placing orders for goods which are urgently needed here and which are now being supplied to an increasing extent, by non-British manufacturers.

To be able to recover to anything like its pre-War high level of prosperity, British trade will need all the assistance that can be obtained for it, and it is to be hoped that some steps will be taken to assist it here in the way that will also assist it at home, that is, by the payment of the many legitimate claims against the Ottoman Government, which can be effected without making further demands upon the Treasury.

## THE ECONOMIC SITUATION IN PALESTINE.

The following is an extract from a report by Mr. R. A. Harari, Director of the Department of Commerce and Industry :—

Palestine, as at present constituted, has an era of roughly 9,000 square miles, and supports some 700,000 inhabitants, of whom about one third is located in 22 small towns and large villages. Although economic conditions are still primitive, modern methods are making headway and hold out hopes of development and progress. The country is under-populated and under-cultivated, and lacks capital and foreign trade, but the wants of the rural districts, other than those they can satisfy by their own production, are few, and there is little poverty.

**Finance.**

(a) Public Debt.—A share of the revenues of Palestine, in common with those of other provinces of the late Ottoman Empire, was allotted to the Ottoman Public Debt. The Treaty of Sèvres has replaced these charges by a fixed annuity, provisionally estimated at not more than £E200,000. Further the Administration proposes, as soon as the Mandate is ratified, to float a loan, the proceeds of which will be devoted to urgent capital expenditure.

(b) Revenue.—The financial year runs from April 1 to March 31, but in the course of the period under review, Palestine on July 1, 1920, passed from a Military to a Civil Administration, and the figures for expenditure during 1920-21 would be misleading as regards conditions. A truer picture is presented by the Estimates for 1921 - 22. They show a revenue of £E2,214,047, and an expenditure of £E2,286,133, or an estimated deficit of £E72,086. It is hoped that the year 1920-21 will result in a surplus of £E75,000 which if realised will cover the deficit.

## A BLACK SEA DISASTER.

*(From Our Own Correspondent.)*

*Bucharest, September* 13.

News of the foundering of the Italian steamer *Santa Teresa* in the Black Sea has recently been received. The vessel, bound from Varna with passengers and cargo, struck a mine on the night of September 4. The passengers were saved by the steamer *Sardinia*, but some of the crew perished.

## BLACK SEA FISHING.

The Black Sea and Azoff Sea fisheries despite the most backward and wasteful fishing methods imaginable, were producing yearly before the war about 2¾ million pouds (one poud equals 36 lb.) of highly valuable food, says the *Manchester Guardian Commerical* in a recent issue. Expressed in terms of money it means more than double the value of the entire annual output of the Italian sea fisheries. With other albuminous foodstuffs, such as meat, fowl, and eggs rapidly disappearing from the regions surrounding the famine-striken area, fish food attains unusual importance. It could rightly be expected, therefore, that if international or national credits were granted for the purpose of provisioning Russia, funds would be made available for tapping the rich resources of food, to which Russia, under the circumstances, is quite unable to help herself without foreign assistance. The Black Sea fisheries, have up to now, not been among the most important fisheries of Russia. They could not bear comparison, for instance, with the Caspian fisheries which have long been on an industrial basis, yielding about 35 million pouds of first annually. But, next to their geographical propinquity to Western Europe, it is just by their dire need of industrial organisation that the Black Sea fisheries commend themselves to foreign enterprise as a particularly tempting objective, at least for the start.

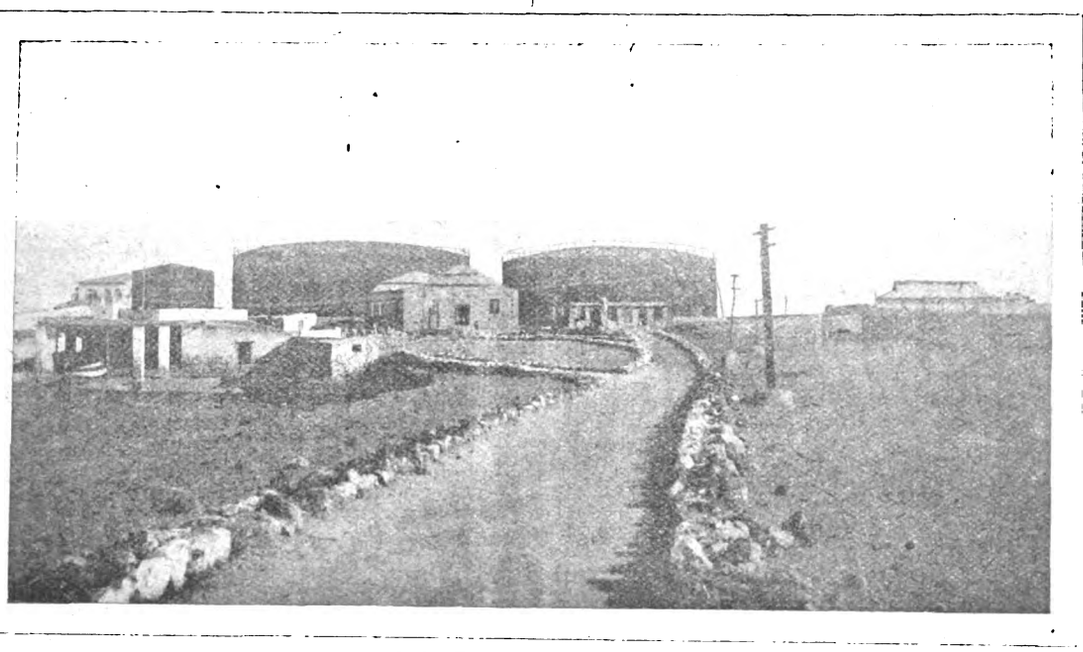
Evidence, and on rather good authority, is now coming forward which suggests that owing to the hopeless state of the local fishing industry any foreign enterprise of good standing, particularly if backed by the Relief Organisations for Russia, would meet with no difficulties whatever in securing reasonable terms and perfect safety for their activities.

## PERIM ISLAND.

The average traveller to and from the East is well content with a fleeting look at Perim Island, in one and the same breath congratulating himself that he does not live there and commiserating with those who do. Perim itself, however, resents this patronising air; it may not be bejewelled, but it has no doubt as to the stoutness of the link that it contributes to the British Empire. A low bare island, without vegetation or water, it can yet boast a deep harbour commanding the narrowest part of the outlet from the Red Sea where the channel is only about twelve miles wide. Thus it is situated directly in the main track of the Eastern trade route, and keeps its eye on much more of the coming and going than its supplanter Aden, a hundred miles to the east, which has arrogated to itself the title of Key to the Red Sea.

Perim, occupied by Great Britain, some sixty years ago, was intended by nature for service rather than ornament, and as a British coaling and cable station well fulfils its destiny. Here Lloyd's maintain a signal station on the highest point of the island, 214 feet above sea level, and the Eastern Telegraph Company also have a station. It has been left, however, to the Perim Coal Company, whose London agents are Messrs. Lambert Brothers Limited, and from whose illustrated pamphlet our illustration is taken, to supply the main business activities of the island. A feature of the Company's property is the huge storage sheds for coals, while nearly a thousand tons are continually afloat on lighters to enable ships to coal without delay. Fresh water is manufactured by two plants, each capable of making sixty tons of water in twenty-four hours; an ice plant turns out six tons of ice per day, and insulated storage for twenty-five tons is provided. In conjunction with the Asiatic Petroleum Company a fuel oil installation has just been completed, consisting of two 8,000-ton tanks, fitted with pipe-line equipment, which is carried out from the shore on a trestle pier and floating pontoons to a specially prepared berth where the ships are supplied.

Thus Perim we may hope, experiences the divine content that comes from minding its own business, and it will probably be glad to know that with fuller knowledge of the part that it is playing in the scheme of the world some of those who pitied it before will come to envy it.



**Perim Fuel Oil Installation.**

The Gemsah production of the Anglo-Egyptian Oilfields, Ltd., for the week to September 9 amounted to 75 tons (previous week 71 tons).

According to a recent report from Palestine this year's olive crop is poor, but an average yield is anticipated of almonds, figs and cucurbitaceous fruits, although in some places insect pests have caused considerable damage.

The traffic receipts of the Suez Canal from August 26 to 31 amounted to 2,510,000 francs, against 2,590,000 francs for the corresponding period of last year.

The Egyptian cotton crop is unofficially estimated at 3,500,000 kantars, says Reuter. On the Bourse there had been excited buying.

517,134 tons of coal were imported into Alexandria during January 1 and July 31. For the corresponding period of last year 262,755 tons were imported.

The Yugoslav Minister of Finance has granted permission, as from September 1, to export the bonds of the new interior loan for 3,000,000 dinars at 7 per cent.

## FORTHCOMING SAILINGS.

*The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parentheses :—*

*Anchor Line.* — S.s. Elysia for Bombay (Liverpool, October 11).

*Anchor Brocklebank Line.*—S.s. Mathura for Calcutta (Birkenhead, October 1) ; s.s. Anchoria for Port Said, Colombo, Madras and Calcutta (leaves London, October 8) ; s.s. Macharda for Calcutta (Birkenhead, October 12) ; s.s. Malia for Calcutta (Manchester, November 5).

*Byron Steamship Line.*—A steamer will sail from Liverpool on October 15 and October 28, for Patras, Piraeus, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Galatz and Braila.

*Clan Line.*—S.s. Clan Kennedy for Colombo, Madras and Calcutta (Birkenhead, October 6) ; s.s. Clan Macvicar for Bombay and Persian Gulf (Birkenhead, about October 7).

*Cunard Line.*—S.s. Phrygia for Gibraltar, Genoa, Leghorn, Naples, Palermo, Messina, Catania, etc. ( Swansea, October 4) ; s.s. Brescia for Ceuta, Gibraltar, Algiers, Malta, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Odessa, Novorossisk and Batoum (Glasgow, November 3).

*Ellerman Line.*—S.s. Malatian for Gibraltar, Malta, and Alexandria (London, October 1) ; s.s. Asturian for Gibraltar, Malta, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, and Varna (Liverpool, October 8).

*Ellerman's "City" Line.*—S.s. City of Manila for Calcutta, (Birkenhead, October 3) ; s.s City of Baroda for Calcutta (Birkenhead, October 15).

*Ellerman's "Hall" Line.*—S.s. Trafford Hall for Bombay, Karachi, the Punjab, and Malabar Coast ports (Liverpool, October 1) ; s.s. City of Palermo for Karachi and the Punjab (Liverpool, October 15).

*Glen Line.*—S.s. Glenogle for Port Said, Port Swettenham, Singapore, etc. (London, October 6) ; s.s. Glenluce for Port Said, Port Swettenham, Singapore, etc. (London, October 20).

*Harrison Line.*—S.s. Inventor for Calcutta (Liverpool, October 1) ; s.s. Professor for Port Said, Port Sudan, Aden, etc. (Birkenhead, October 6) ; s.s. Diplomat for Calcutta (Birkenhead, October 6).

*Henderson Line.*—S.s. Henzada for Port Said and Rangoon (Birkenhead, October 5) ; s.s. Bhamo for Port Said and Rangoon (Birkenhead, October 19).

*Johnston Line.*—S.s. Inchmore for Piraeus, Syra, Smyrna, Volo, Salonika, Constantinople, Bourgas, Varna, Constantza, Sulina, Galatz, and Braila (Liverpool, October 1) ; s.s. Dromore for Piraeus, Volo, Salonika, Bourgas, Varna, Constantza, Sulina, Galatz, and Braila (Liverpool, October 22).

*Moss Line.*—S.s. Lugue for Casablanca, Gibraltar, Malta, Haifa, Beyrout, and Cyprus (Manchester, October 4).

*P. and O. Line.*—S.s. Novara for Colombo, Madras and Calcutta (London, October 7) ; s.s. Devanha for Bombay (London, October 7).

*P. and O. British India Line.*—S.s. Nevasa for Bombay and Karachi (London, October 7) ; s.s. Manora for Colombo, Madras, and Calcutta (London, October 14) ; s.s. Neuralia for Bombay and Karachi (London, October 21) ; s.s. Margha for Colombo, Madras and Calcutta (London, October 28).

## RADIUM IN CZECHO-SLOVAKIA.

Special interest attaches to the announcement that an agreement has been concluded between the Czecho-Slovak Government and the Imperial and Foreign Corporation Ltd. for the lease of the Joachimstal radium mines for a period of fifteen years. The lessee company is to be known as the Czecho-Slovak Company for the Exportation of Radium ; it will have a capital of ten million kronen contributed in equal shares by the Government and the Corporation.

It is claimed for the radium of the Joachimstal mines that, being the pure Ra, unmixed with mesothorium as is the case with American radium, it retains its activity for an indefinite period—1,600 years is the estimate. Not only are these mines the sole source known at present of pure radium, but they are also said not to be threatened with exhaustion, whereas in the United States it is reported that there is already a considerable decrease in the quantity of available ores.

The intention of the Czecho-Slovak Government is to retain ownership of the radium produced, merely lending it for use for certain periods. To this end the Government undertakes to lend the new Company radium, the minimum amount from the supplies available on the day of the signature of the agreement being two grammes. It also undertakes later on to supply the company with all the radium it may require, in so far as it is not needed by the State for public puposes. Any radium beyond this may be disposed of by the State as it thinks fit. The Czecho-Slovak Government also undertakes to let the Company have the radio-active fragments and minerals obtained during the production of the ores and the manufacture of radium, in so far as it does not need them for further mining operations and does not incur any outlay in connection with them.

In 1919 radium element was produced in the Czecho-Slovak mines to the amount of 1.1 grammes, and uranium dyes to the amount of 448 kilogrammes, the expenses incurred in production being 3,292,520 Czecho-Slovak kronen. In 1920 the amount of radium element produced was 1.88 grammes, with 9,098 kilogrammes of uranium dyes, the expenses being 8,259,159 kronen. By the end of this year the Government will have at its disposal a total amount of five grammes of radium element, the above quantities included, and of this supply, in accordance with a resolution of the Ministerial Council passed in June, the Ministry of Public Health and the Ministry of Education are to receive each a loan of eight grammes. The quantity left after the fulfilment of these obligations is entirely at the disposal of the new Company.

For the use of the radium the agreement ensures the Czecho-Slovak Government an annual percentage based upon the value of all the radium lent within the period concerned, according to a definite scale of percentages, irrespective of whether there has been any profit. This scale ranges between 8 and 15 per cent., and the value of the radium will be reckoned according to its price on the American market, which will be increased by 15 per cent.

The Government reserves the right of buying the English Company's share in the joint company after ten years have elapsed. Should the project be unsuccessful, the English company has the right of withdrawing from the agreement within two years, provided that it has settled its obligations with the Government. Without prejudice to this right, the Czecho-Slovak Government may also withdraw from the agreement at any time, if it has not received the sums to which it is entitled.

Radium preparations are now supplied for medical purposes in special platinum needles or in tubes, each containing 25 millicures of emanation. The Radium Institute in London charges £6 6s. for using this amount for 24 hours. The strength of 25 millicures decreased by 50 per cent. within four days, and after use the preparation is returned to the Radium Institute, where it is brought up to its former strength.

The emanations given off by one gramme of radium for 24 hours represent 150 millicuries, or 54,000 millicuries per annum, thus allowing of 4,320 applications, each of 12½ millicuries. Mr. S. Reilly, the representative of the English Company, has computed that one gramme of radium, used in this way, would yield an annual profit of £12,000 or 3,000,000 kronen. As the annual expenses decline in proportion to the increasing quantity of radium, the net profit will also rise. According to the same estimate, the profit for two grammes would be about £28,000, for three grammes about £40,000.

## ON 'CHANGE.

### EGYPTIAN SHARES FIRM.

*(From Our Own Correspondent.)*

*London, Monday.*

Conditions during the week have again been adverse, and the fact that the bank rate remained unchanged despite the lowering of the Federal Bank of New York rate from 5½ per cent. to 5 per cent. has had a damping effect on business generally, while naturally the protracted uncertainty with regard to Irish affairs has not been without its effect.

The gilt edged group has been distinctly dull in tone. Consols are 1-8 up to 4½, while War Loan Fives are down to 88,7-16 a drop of 3-8, and Fundings have shed ½ a point to 72¾. In Near Eastern securities which rank as British Government stocks, Egyptian guaranteed 3 per cent. are 68; Greek guaranteed 2½ per cent., 1898 are 66 at which prices there were buyers, while Turkish guaranteed 4 per cent., 1855 are 69. The Sudan 5½ per cent. Loan is now 94½, while the India 7 per cent. Loan is ¼ down at 102¾.

The industrial market has been irregular. Iron and steel shares have shown a downward tendency. Textiles weak at first have shown a decided upward move during the last few days. Shipping securities are steady on the whole. P. and O. deferred have still further advanced 7½ points to 372½ in spite of the fact that freights are falling on some routes. This has provided the outstanding feature of a dull week. Furness Withys are unchanged at 24s. 3d.

Oils are unsteady. Anglo-Egyptians have shed 5-16 at 1,1-16, while Roumanian Consolidated at 9s. 9d. are unchanged. Steaua Romana have gained 3d. at 11s. 6d., while Phoenix at 9s. is unaltered. Burmahs now at 5,3-16 have dropped 7-16.

Bank shares have been firm on the whole. Agricultural 3½ per cent. Bonds are 1 up at 54, while the Agricultural 3½ per cent. Guaranteed Bonds are unchanged at 55¾. Imperial Ottoman Banks are the same at 7,7-8 while National Bank of Egypts are 1-8 down at 19,7-8. Bank of Athens and Ionians are unaltered at 2,3-8 and 3¼ respectively.

Greek shares are down all along the line, in consequence of the set back at Angora. The 5 per cent. 1881 Loan is 3 down at 30, while the 5 per cent. 1884 issue is 1 down at 38. The 4 per cent. 1902 Loan has lost ½ at 34. The 5 per cent. Funding Loan at 38 has shed 1 point, and the 5 per cent. 1914 Loan is ½ lower at 41.

**Egyptians Steady.**

A firm tendency has again prevailed. Beheras are 11 while Behera Prefs are 3¼. Egyptian Delta Lands have shed 3d. at 9s. 3d., while Egyptian Consolidated Lands are the same at 1s. 3d. New Egyptian are 25s. 6d., and Sudan Plantations are 3,1-8. Union Foncieres are unchanged at 2,7-8.

## INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated September 19:—Season. September — Monsoon active in Gangetic Plain and Assam. September 14—Strengthened in Peninsula. September 17 and 18—Heavy and widespread rain in Northern half of Peninsula. Crops.—September 15—Punjab—Rain much relieved situation. Crops generally good. Large acreage expected to be sown with wheat and grain. Central Provinces and Assam—unchanged. Markets.—Cotton—Bombay cotton market, September 14—firm. Oomras Rs. 496 September; Rs. 448 December-January. Cotton arrivals September 1 to 7, 23,000 bales as compared with 9,000 bales in corresponding period last year. Piece-goods.—Bombay piece-goods market quiet. Local goods moving steadily. Jute and Gunnies.—Calcutta jute market on September 16, firm but quiet. September 17—Hessians very strong with rates tending upwards. Heavy goods very firm. Tea.—At the tea sale on September 13, quality very good. Medium orange Pekoes with Tip three pies lower and cut leaf broken Pekoes with thin liquors weak. Keen competition for low medium broken Pekoe; Souchongs and Dusts steady. August crop figures 11¾ million pounds less than same month last year. 182,335 packages sold to date at an average price of nine annas one pie per lb. Rice.—Rangoon special rice, September 16—Rs. 645. No change in bank rates.

A further cable dated September 20 states:—Reports of Committees appointed at Bombay and Calcutta to advise Government regarding rehabilitation of Government securities published Both Committees oppose any concession such as raising rate of interest which would benefit holders of securities at the expense of taxpayer. Calcutta Committee recommends that long period 5 per cent. tax free loan, issued at a discount if necessary, should be basis for all future borrowings, and that 3, 3½ and 4 per cent. Bondholders should be given the option of conversion on payment of cash subscription. Bombay Committee suggests that Government should announce that they will pay off 3 and 3½ per cent. loans between 45 and 50 years from now and should undertake purchases by public tender of 2 per cent. of outstanding securities each year.

The final Jute forecast for 1921 is acreage, 1,513,358 acres, and yield 40,52,609 bales. The similar forecast for 1920 was: acreage 2,502,273 acres, and yield 59,62,192 bales.

## ALEXANDRIA EXCHANGE.

*Supplied by G. L. Mortera, Alexandria and Cairo.*

Fr. 105, Egypt and Levant, S.S. Ord., 27s. 6d.; Egyptian Delta Light Railways, £4,5-32 ex.; Filature Nationale d'Egypte, £11¾; Immeubles d'Egypte Soc. an des., £5, 9-16; Khedivial Mail S.S. Ord., 110s.; Khedivial Mail S.S. Co., Pref. £2 9-16; Kom Ombo Ste. An de Wadi, £5,1-16; Kom Ombo Ste., Fondateur, £33 9-16 ex.; Land Bank of Egypt, Parts de Fond, £38; Lots Turc., Fr., 36¾; Menzaleh Canal Navigation Pt., 270; Nungovich Hotels, £6,13-16; Ramleh Railways, £3,1-32; Salt and Soda, Pt., 35s. 3d.; Tram d'Alexandrié Priv., Fr., 49; Tram d'Alexandrié Div., Fr., 55; Union Fonciere d'Egypte, £3,3-32; Egypt Hotels, £1 7-8; Urbaines et Rurales, £3.

## TAILORING AT CASABLANCA.

At Casablanca, in the French Zone of Morocco, there exists an excellent opportunity for the establishment of a first class tailoring business, says the *Board of Trade Journal*. Casablanca is the commercial centre of the French Zone, and has a population of some 100,000, chiefly European, and is the constant centre of attraction for the whole population of the Zone. Once a concern is established in Casablanca, it will probably be found desirable to open branches in Rabat, and subsequently in Meknez, the present military centre, and the future commercial centre of North Morocco.

# COTTON & COTTON GOODS.

## LIVERPOOL REPORT.

Messrs. Reynolds and Gibson report as follows for the week ended September 22 :—

A much improved business has taken place during the past week, the early part of which was quiet, as the market showed a declining tendency, but, subsequently, the tone became steadier, and prices continued their upward trend. Opinions are still very divergent as to whether the rise is justified or not, but there is no gainsaying the fact that a considerable amount of the buying has been for the trade, more in fact than we have witnessed for a long time. Spinners are showing distinct signs of nervousness, and whilst many of them still persist in the "nothing doing" theory, other sources no less reliable admit that an improvement has taken place. Apparently, the Near East is showing an increasing interest in the Manchester market, and an improved enquiry for yarns has been noted, even the finer counts coming in for a share of attention. The enquiry for the raw material has covered practically all classes of cotton and, generally speaking, sellers are doing all they can to meet the demand.

The feature of the week has been the amount of Sudan and Tokar cotton which has changed hands ; on one day alone a line of about 1,000 bales was purchased for the Continent, and since then further sales have taken place. As we have pointed out on several occasions, this Tokar cotton is relatively cheap when compared either with American staple cotton or Upper Egyptian. We would advise any holders of this class of cotton to seize the opportunity and meet the demand as far as possible, before the arrival of new crop cotton. There is a large stock of Sudan and Tokar in this market, and it is only at the end of the season, when spinners find a shortage of their normal supplies, and the price is put up against them that they can be induced to take an interest in it. Rather more c.i.f. business has been noted, and the special Manchester report, issued daily, have shown an increasing tendency towards optimism, particularly to-day, Total sales, 4,800 bales, which includes 1,400 bales Sudan. Quotations are all advanced 400 points, with the exception of good Sakel, which is raised 450 points, and extra fine Sakel, which is 300 points higher. Fully good fair Sakel 26.00d. per lb.

## COLOURED COTTON.

A correspondent writing to the *Egyptian Gazette* states :— "It is true, that khaki coloured cotton has been produced and other experiments are taking place here, but elsewhere still more remarkable ones are being made and the question is, will the much-talked of extension of the dye industry become unnecessary after all ? It would almost seem possible if certain experiments carried out in America and India continue to prove as successful as they have been so far. In South Carolina four samples of cotton in natural colours have been produced, which are light and dark green and light and dark brown. The cotton is of a beautiful soft texture. An expert is consulting with native Indian growers, who are said to have produced cotton in India of blue, grey, and pink shades ; and in Peru, also, cotton has been grown of various shades. Experts believe that it will be possible to have a great variety of colours in natural grown cotton.

"The expert alluded to expects to be able to raise even black cotton in two years by crossing red and blue varieties. Not cotton growers and textile makers only, but the big dye manufacturers of various countries, are watching these amazing experiments with keen interest."

## MANCHESTER REPORT.

(*From Our Own Correspondent.*)

*Manchester, Friday.*

The market this week has been under the influences of higher rates in raw cotton, and in all quarters the tone has been firmer. Traders are beginning to show increased confidence in the higher prices, and demand has been stimulated. Private cables relating to the Egyptian crop have been unfavourable. It is said that the plants have been damaged to a greater extent than usual by the pink boll worm. There is a tendency to reduce estimates of the crop, and according to some advices the yield will not be more than 3,500,000 kantars. Lancashire spinners have bought more freely. The rise in Egyptian yarns has forced out some orders but many users do not seem able to follow the advance. Spinners however with stocks are benefiting by the appreciation in values. In American yarns rates have hardened, and the sales have been more encouraging. In cloth for the Near Eastern outlets demand has been active. Undoubtedly during the last two or three weeks extensive buying has taken place, especially in bleaching and printing styles for Egypt and the Levant and the requirements of our customers are not yet satisfied. Mixed reports have come to hand from India. Although the Gandhi agitation causes some nervousness some telegrams have been received from Calcutta and Bombay asking for Lancashire manufacturers to wire out the lowest quotations for standard makes, and a few more sorting up lots have been sold. Grey staples have moved off more freely for China. Rather more inquiry is now being met with for South America. Distribution in home trade circles continue to improve.

## ASIA MINOR FRUIT REPORT.

Messrs. C. J. Giraud and Co., Smyrna, reports as follows for the week ended September 10 :—

Sultanas.—The total estimated arrivals to-date amount to 54,540 bags compared with 27,960 bags for the corresponding period of last year. The total estimated sales are 46,540 bags, as against 25,960 for the same period last year, and the estimated stock unsold amounts to 8,000 bags for 1920.

Figs.—The total estimated arrivals to-date are 28,800 loads as compared with 38,000 loads for the corresponding period of last year. The estimated sales are 28,800 loads as against 38,000 loads last year.

Shipments.—The estimated shipments are as follows:— 30,662 boxes of sultanas ; 590 cases of figs, 647 boxes of figs and 4,332 bags of figs which are being loaded on the s.s. Malatian for Liverpool ; s.s. Antigone for London ; s.s. Brescia for Liverpool ; s.s. Destro for London and Hull ; s.s. Canadian Rancher for Montreal and s.s. Haddon for New York.

Markets.—The s.s. Ganymede has sailed for Amsterdam with about 3,000 tons sultanas and figs. Details of quantities loaded will be given in our next report. Sultana sales for the week amounted to about 20,000 bags or 2,500 tons, being in excess of the week's arrivals. The market is firm with advancing tendency and owing to the heavy engagements still on hand may improve still further. Higher foreign exchanges however, offset any marked change in foreign parities. Prices have grounded for the month and any modification is likely to be in favour of advance. Business is increasing in activity on all markets and large American and Colonial orders are also being placed.

Figs are a steady market with sufficient supplies for current wants.

## OTTOMAN RAILWAY.

The earnings of the Ottoman Railway from Smyrna to Aidin for the half-year to June 30, amounted to £265,218, of which military traffic produced £91,000. Expenditure was £160,847, showing a net profit of £104,370. Mileage worked during the half-year was 193 miles, about one-half of the company's entire system, same as at the period of last report, remainder of railway still being in the possession of the Turkish Nationalists. Meeting, Winchester House, E.C., September 30, at noon.

## NOTES OF THE WEEK.

### *The Situation in Asia Minor.*

The return of King Constantine to Athens is, we trust, a sign that Greece at any rate is content that diplomacy should now step in where military measures have failed and try once more to effect a settlement in Asia Minor. Whether the Turkish Nationalists hold the same view may be regarded as doubtful; but if the Entente Governments are now resolved to impose a just peace on the belligerents, and can communicate their intentions to Angora, Mustapha Kemal is not likely to find much advantage in continuing a campaign which must press hardly on his sorely-tried followers. It is to be hoped that there will be no delay on the Allies' part to take definite action. Any further withdrawal westwards of the Greek army means more destruction and desolation in Asia Minor, and a larger heritage of bitterness between Turks and Greeks. The winter—usually severe—is approaching in those regions; the ebb and flow of the contending armies will have left the country a wilderness, and some provision ought to be made for the inhabitants. This is an aspect of an unsuccessful campaign which will not have been taken into consideration by those who ordered the Greek advance. It will, however, appeal very strongly to the Greek and other merchants of Smyrna, who will find their trade with the interior dislocated for years to come, unless the people can be repatriated at an early date.

### *King Constantine and His People.*

The welcome accorded to King Constantine on his arrival in his capital is of good augury that the Greek people will take a level-headed view of the whole question. There has been no decisive victory over the Turks; the campaign was successful up to a point, and the army, inspired by the King's presence, has a great achievement to its credit. But the situation in Asia Minor remains *in statu quo*. Greece may hold more territory than she did before the advance; whether she is to be allowed to retain it is another matter. The point that is of the utmost consideration to Greece at this juncture is that she should hold together as a united people. If she does so, it will be due to the King's presence on the Throne. The danger to her in the rejection of her claims in Asia Minor lies in the opportunity it gives to political opponents to disturb Greece, rather than in any deeply cherished aspirations from the sacrifice of which trouble may come. (There was a minimum of interest manifested in the original occupation of Smyrna in 1919). But King Constantine has identified himself with the effort to secure a territorial hold on Asia Minor, and if he realizes the necessity of accepting the Allies' settlement, less political capital is likely to be made out of Greece's discomfiture in the face of his popularity.

### *The Question of Albania.*

The settlement of the Albanian question is not yet complete. Italy, it is understood, takes exception to the proposed modifications on the northern and north-eastern frontiers in favour of Yugoslavia. When the subject came up before the Ambassadors' Conference last week the particular interest of Italy in the fate of Albania was recognised, and she was accorded the right to intervene in Albania in the name of the Allied Powers, if the League of Nations should be unable to safeguard the country's independence and integrity. In the meantime charges and counter-charges are being exchanged between the Serbians and Albanians in Geneva, and as far as can be judged from the reports of correspondents on the spot, the audience is more impressed by the latter than by the former in regard to the inherent probability of the statements made. The time would seem to have come for a long-sighted view on the part of the Yugoslav Government. It is difficult to believe that Yugoslavia stands to gain as much from any minor rectification of the frontier as she does from an immediate settlement, which will deprive the Albanians of any excuse for being other than good neighbours. Reports of General Wrangel's refugees being used for a Serbian offensive against Albania continue to be current; but, as the League of Nations has decided to appoint a fresh Commission to deal with the boundary question, a truce will presumably be imposed on both sides,

### *Travellers in the Balkans.*

While Sir Harry Brittain's party is seeing Roumania through luncheon and dinner glasses, Mr. Noel Buxton and Mr. Leland Buxton are applying a political stethoscope to Yugoslavia. A Zagreb contemporary, the *Agramer Tagblatt*, is exercised over the latter visit on the ground that the visitors first called on M. Stjepan Raditch, the declared enemy of the present union and of the Government, and only after making a tour with him found time for a visit of courtesy to the Government representatives in Zagreb. To support its case the organ of the Yugoslav Democrats attributes to the visitors an international importance that they would

Digitized by Google

probably be the first to repudiate, and the incident would not call for notice, if an attempt had not been made to implicate the British Consulate in Zagreb. In acceding as a private individual to a personal request for an introduction, the acting British Consul could not be expected to instruct his visitors in matters of etiquette. The strictures of the *Agramer Tagblatt* suggest an over-eagerness to visit upon a nation, which is not very popular at the moment in Yugoslavia, the shortcomings of one or two individuals. In justice to the latter it must be said that the ordinary British traveller imagines that his movements never come to the knowledge of and have no interest for the officials of a country, while in his blissful ignorance prosecuting his search for local or national curiosities. Messrs. Buxton, fresh, no doubt, from the contemplation at a distance of our own de Valera, Gandhi, Hertzog, Zaghloul, etc., seized the first chance that offered of inspecting the Yugoslav variety at close quarters. *De gustibus non disputandum.*

## *Mr. Churchill on Mesopotamia.*

Speaking at Dundee last week, Mr. Churchill said that he saw every prospect of saving twenty millions as between this year and next on the expenses of Mesopotamia. Our troops, he added, are rapidly leaving the country; the expensive establishments which have been created there are being broken up, and a King and Government chosen freely by the people have come into existence, and will, he hopes, soon take the burden completely off our shoulders. These cheerful assurances have afforded as much satisfaction throughout the country as they did to Mr. Churchill's immediate hearers, and it is to be hoped that nothing will occur to shut out the pleasing prospect. Although we have never supported the policy of scuttle so persistently urged by a section of the press, we have always recognised that there was ample room for effecting economies in Mesopotamia, as elsewhere. Perhaps the disappearance of the Motor Transport and certain other departments which are commonly reported to be not only expensive but undesirable in other ways, will account for some of the twenty millions' reduction that the Secretary for the Colonies has in mind. If so the cut will be welcomed for more reasons than one. Conditions have doubtless improved greatly within the last twelve months, but there appears to be room still for further improvement.

## *King Faisal's Task.*

With regard to the ability of King Faisal and his Government to take the burden completely off our shoulders at an early date, we are not quite so confident as Mr. Churchill. Of the excellence of the newly elected monarch's intentions there can be no doubt, and his ability has been shown to be of a very high order; but the task before him is a truly stupendous one, and it remains to be seen what measure of help his own people will be able to give him, and how far he will still have to rely upon us. We hope it will not be found that, in response to the clamour for 'economy,' our troops are leaving the country too rapidly, and that too much reliance is being placed upon the aeroplane. In the recent operations against the Kurds in the Rowanduz district, the R. A. F. rendered very valuable service, and the moral effect of its bombing operations must have been considerable. But it is not a very cheap service to maintain, especially when 'planes get lost, as was the case in the recent operations; and it would be instructive to know just what the expense of this aerial bombardment amounted to. Moreover, as we have hinted before, the slackening of the strain on the Angora front is very likely to be followed by activity on the Kemalists' part on the 'Kurdish' or 'Mesopotamian' front. And finally it is well to remember that Irak never has been remarkable for its peaceful character, and that it has not yet given any marked indication of having put off the old man and put on the new.

## *Roumania and the Balkans.*

We have been taken to task in a very friendly manner by the Roumanian Royal Geographical Society for a tendency to regard Roumania as part and parcel of the Balkans. It is quite true that geologically, geographically, ethnographically and anthropologically, Roumania does not belong to the Balkans, and before the Balkan wars it may be said to have been wrong to group the country politically with the Balkan States. But we imagine that to-day Roumania would feel hurt if the future development of the Balkan Peninsula were to take place with as little reference to her or consideration for her interests as could be claimed, let us say, by Belgium or Poland. One effect of the war, as we have previously pointed out in these columns, has been that the sharp line of cleavage that formerly separated the Balkans from the rest of Europe has gone. Whether Central Europe has absorbed South-Eastern Europe, or whether the Balkans now overlap Central Europe need not be discussed; the important fact is that the world is likely before long to be confronted with a new grouping of States that will include the countries lying between the Erz Mountains and the Aegean Sea. A nucleus already exists in the Little Entente; but although the tripartite agreement is sufficient while it points, so to speak, inwardly, it will clearly be in a much stronger position in Europe's council-chamber, if instead of being merely directed against Hungary, it becomes the voice of the whole of South-Eastern Europe. In the busy world of journalism the short word "Balkans" may still occasionally slip from the pen, unless the countries concerned cultivate the federal instinct so strongly that "Danubia" can be more appropriately substituted for it.

## *A Sudan Raid.*

From the Sudan comes news of another small fight, in which, we regret to note, two British officers and three civil employees are reported to have been killed. The lately-added province of Darfur was the scene of the trouble, which took the form of a raid upon a post at Nyala, in Southern Darfur; the attacking force being led by a fanatic whose name is given as Abdullahi-es-Soghayer, and apparently consisting of Arabs of the Masalat tribe. The attack is reported to have been repulsed with heavy loss to the tribesmen, and its leader is said to have been killed, by a defending force composed of mounted infantry and police. In all probability the rising is a mere echo of the events of 1916, a manifestation of the restlessness of the Masalat under new conditions; and it is easy to accept the assurances that no political significance need be attached to it. It is the latest, but almost certainly not the last, of a number of such incidents; and while we must deplore the loss of life involved—the latest messages put the insurgents losses at 600 and our own total at over 60—we must recognize it as part of the price which this country has to pay for the privilege of carrying the benefits of civilization into the jungle and the wilderness.

### *A 'Plot' at Teheran.*

A plot has been discovered—or is said to have been discovered—in Teheran, for the assasination of Kavam es-Sultaneh, the Prime Minister, and the Sardar-Sipah, the Minister for War; and as a first result a number of prominent personages have been arrested, while others equally exalted, have escaped arrest only by taking *bast*. Colonel Riza Khan (if we may refer to the Minister for War by his former title for the moment) has had so much experience of organising plots himself, and has shown himself so skilful at the work, that we shall probably not be far wrong if we conclude that the discovery of this attempt was due to him. On the principle of setting a thief to catch a thief, a successful plotter ought to make a good detector of plots. But it must be an anxious time for a good many prominent Persians when the sleuth hounds get to work, for, as it will be recalled, the new-style Government in Persia has original notions in the matter of raising money among its political opponents. And it is painful to note that the Sardar Sipah and his associates do not boggle over arresting even such a distinguished and doubtless pious person as a former keeper of the famous shrine of Imam Riza at Meshed, to say nothing of mere laymen like the former Secretary of the Russian Bank. The Teheran correspondent of *The Times*, who reports the occurrence, mentions that Mushir el-Mulk, the Minister of the Household, escaped arrest by taking *bast* in the Shah's palace; but if the modern spirit spreads at this rate in Persia the institution of *bast*—and even the Shah's palace itself—may speedily be swept into the limbo of premillenial days.

### *Armenian Refugees.*

The Armenians' cup of misfortune is surely full to overflowing. The prospect of an independent Armenian State is as remote as, if not more remote than, in the days before the war; for with the Bolshevist hordes overrunning the country, the Armenian Republic has about as much freedom of action as a prisoner on the rack; and the majority of the Armenians who looked forward to living in a land of their own are now either dead or scattered up and down the earth. Reports from Armenia state that twenty-four deaths from cholera or starvation occur daily in Alexandropol alone; and half a million people are said to be homeless. Their case, it is to be feared, like that of the Georgians, is almost hopeless. In Irak, too, there are many Armenian refugees who have been supported by the British Government. The funds provided by His Majesty's Government for this purpose are now on the point of exhaustion, and in view of the heavy burden of taxation already borne in this country, it has been found necessary to intimate that no further supplies for this particular purpose will be forthcoming. The announcement has, very naturally, caused much regret in philanthropic circles here, and great efforts are being made to meet the problem presented.

### *An Armenian Proposal.*

With the distress both of the Armenian refugees and of their friends in this country we sincerely sympathise. At the same time, with so many urgent calls nearer home it seems very doubtful whether it will be possible to raise funds sufficient to do much for the refugees in Irak, who are said to number over 14,000. It is to be hoped, therefore, that some project such as that proposed lately by an Armenian in a letter to the *Times of Mesopotamia* may be successfully put into practice. The writer, who points out that all the refugees in question were formerly Turkish subjects, and that Constantinople is the seat of the Patriarch of Armenians in Turkey, suggests that the 150,000 Armenians of Constantinople, "of whom many are fairly wealthy," should form a committee presided over by the Patriarch, which could solve the problem. The refugees, he thinks, might be sent either to Cilicia, subject to French approval, or to Constantinople," where surely the Armenians will have to share the burden of their brethren." The scheme seems quite as practical as others put forward, and in the present impoverished state of Europe it has at least as good a chance of success as any other with which we are acquainted.

### *The Moplah Rebellion.*

The latest news from Malabar is somewhat disappointing. We may assume that the authorities are careful not to understate the difficulties of the situation, because they have to justify the retention of martial law before a legislature which is intensely suspicious of that particular method of restoring order, but all the same the official statement that the resistance of armed gangs totalling ten thousand men is still strengthening shows that the progress made hitherto has been less than was generally expected. The lurid stories of the sufferings of the Hindus under Moplah terrorism are the inevitable result of the delay, for religious fanaticism is at all times the most marked characteristic of the rebels, and outrages will continue until the last gang has been accounted for. The whole thing is a bitter object lesson for Indian politicians, and the ultimate results may be salutary, but the need of the moment is not discussion but such vigorous action as shall bring the outbreak quickly to an end.

### *Questions in the Indian Legislature.*

There will be general approval in well-informed circles of the steps taken by the President to check the flood of questions which has threatened to submerge the Indian Legislative Assembly. The trouble really dates from the days of the old Councils, when members could do little but ask questions; the habit thus grew, and its present extent may be inferred from the samples given by Mr. Whyte, which include an inquiry regarding the prices of food which prevailed a thousand years ago. The measures now announced are, first, the stricter application of the rules under which questions can be disallowed by the President, and secondly, the introduction of the "Star system," under which oral answers will be given only when specially desired by the questioners. Mr. Whyte's record as President affords ample guarantee that the former measure will be applied with judicial fairness. The value of the Star system will depend on the way in which it is utilised by members; the House of Commons has made it a great practical success, and we trust that in this matter, as in others, the Assembly will follow the good example, for otherwise more drastic measures will become inevitable.

### *Legislative Esurience.*

We are not greatly concerned at thesnub administered to the India Office by its favourite offspring, the Legislative Assembly, which has refused to provide funds for the travels of Lord Lytton's Committee on the grievances of Indian students. It is at least arguable whether a visit to India is nece sary for the Committee's objects, though it was contemplated in the terms of reference; and the number of such peripatetic inquiries has become so large that it was time somebody should call a halt. The

Digitized by Google

contention of Indian legislators that the Committee should devote its efforts to securing freer access to the universities in this country is a very different matter, and, coming on top of the recent petition for a share in the Rhodes scholarships, indicates that "slave-mentality" is not yet entirely extinct. How much have Indians contributed to the endowments by means of which Oxford and Cambridge offer an education much below cost? Have the Rhodes Trustees legal power to divert funds to purposes which the donor certainly never contemplated? Surely the time for cadging for such doles is past, and if Indian politicians want to secure cheap education in this country, the new national self-respect should teach them that the first step is to provide the necessary funds.

## THE WEEK AT HOME.

**Beginning Again.** London, Monday evening

The Irish correspondence has ended, and the conference will begin in a few days. Looking back on the series of letters and telegrams exchanged between the Prime Minister and de Valera, it is evident that the latter has had the worst of the exchanges, and that there is nobody to blame but himself for getting the worst of it. He tried to get an unconditional conference, and it was agreed to. He then tried to get Ireland acknowledged as an independent republic, and that was refused; but he preferred to make the demand and then climb down. To the ordinary intelligence it does not seem particularly good strategy; one cannot wonder that the Cabinet was puzzled by his way of going about the thing, as Mr. Winston Churchill admitted a few days ago that they had been puzzled.

However, all's well that ends well, or rather begins well; for the end of the chapter is by no means the end of the book. The upshot of the whole thing is that there is to be a conference to discuss the relations of Ireland and England, and that the conference is to be free and unfettered save in one respect—the solution of separation is ruled out in advance. Since Mr. de Valera is understood to have expressed his conviction that separation was impossible even before the negotiations had begun, it is not easy to see what particular object was achieved or anticipated, by claiming an independence on paper which could not be obtained in fact, and which was not in the end even attained on paper. But there are proverbially more things in Irish politics than are dreamt of in our philosophy.

That is, however, by the way. The conference will meet, and it is possible that Ireland will be represented by more experienced politicians—and incidentally more practical men—than Mr. de Valera, whose stock appears to have fallen a little in Dublin during the past few weeks. It is suggested that Mr. Austin Chamberlain will preside over some of the meetings as chairman, although Mr. Lloyd George will control the course of the negotiations; probably there will be four delegates on each side. More would lead to protraction and probably to the introduction of unnecessary side-issues; fewer would hardly insure adequate weight or balance. It is recognised on all sides that the task before the October conference will be as momentous as that which faced Pitt with his proposals for nearly a century and a quarter ago.

**Work for Parliament.**

It is said that Parliament is likely to sit for only two or three weeks; to meet on October 18, and to rise by November 10. I rather doubt this hopeful prophecy. The House of Commons is interested not only in Ireland but in unemployment. It wants to hear the Government's proposals, the Labour Party's comments—indeed the Labour members have a rare opportunity ahead of them of which they are hardly likely to take full advantage—but any discussion on unemployment is bound to take a wide sweep, since it must lead to the question of wages, and from that to prices.

We are likely to hear some lively protests at the discrepancies between wholesale and retail prices; obviously there is bad profiteering between the middleman and the retailer. The result is that while wages must be reduced in order to get business going again the working man (and the rest of us) find that the cost of living does not fall in proportion; and hence much of the trouble and discontent. These matters require to be ventilated in public, and if Parliament once gets its teeth into them, it may sit a good deal longer than is at present anticipated.

**Platform Politics.**

There is to be a flood of political oratory this autumn; the Coalition leaders, the Wee Frees, and the Labour Party are all to take part in the deluge of wisdom, or at least of words, which will descend, like the autumn rains on a parched and thirsty people. We shall hear what we shall hear, but only the extravagantly conscientious will read through these declarations in the next day's paper. For the fact must be faced that political leaders hardly lead any longer in the old sense; the new electorate is critical and independent, and it likes to think for itself, or at any rate to think it thinks for itself. In that respect I fancy that votes for women has had a good effect. Women, being new to politics, are less tied to party views than the inferior male; and indirectly this has the consequence of making men less tied to the one particular organization in view.

**A 1922 Election.**

All this outburst of activity is thought to portend an election early in 1922—it would probably have come this autumn had the Irish question been settled one way or the other. But the early spring would be a fairly convenient time to have an election, and although the House of Commons need not expire till the end of 1923, it is admitted by all parties that the public advantage lies in an earlier appeal to the constituencies.

The result of the election is hardly in doubt. The Government would return, probably with a diminished majority, but with perhaps greater authority, and, barring accidents, would survive its full five years. A writer in one of the weekly reviews this week makes the interesting point that the swing of the pendulum takes more time to operate now that electorates are larger. In the old days Liberal and Conservative changed places every five or six years. But in 1895 the period was unconciously lengthened to ten years; th Unionists were in till 1905, then the Liberals till 1910. The remainder of that year and the whole of 1916 were the first Coalition, a transition period; the real Coalition began at the end of 1916. According to this calculation, therefore, the present Coalition Government should last until 1926-7. It is an ingenious theory; and unlike a good many political theories, it seems probable that it may be borne out by the facts.

**The New Liberals.**

It is to be noted, by the way, that the new Manchester Liberals held last week a conference to discuss and define their industrial and social policy. Some quite good speeches were delivered, without any definite conclusions being arrived at. But the most noteworthy feature of the Conference was not in anything said or done, but in

Digitized by Google

the fact that it was boycotted by every Wee Free member of Parliament and every paid organiser of that party. The Wee Frees are taking up that same attitude of chilly disdain towards the young Liberals without the House that it does to the Coalition Liberals within. Mr. Asquith's attitude is becoming increasingly like that of the Quaker who told his wife that "All the world is queer, my dear, except me and thee; and thou art a little queer." Orthodox Liberalism will soon be confined to the ex-Prime Minister.

**Panels, Patients and Pill-slingers.**

There is a crisis in the medical world, and the panel doctor is trembling in his surgery. Like almost everybody else, he received his war-bonus in the shape of a higher capitation fee; and Sir Alfred Mond, at the Ministry of Health, now suggests that the cost of living having fallen, this should be cut down in the interests of economy. There have been a good many criticisms of the panel service of late, and it is quite certain that in many cases the standard of attendance has fallen off; panel doctors have been tempted to take too many patients, and have been unable to attend to them properly. Some of the largest incomes of the faculty (at least among the general practitioners) are now made on the panels; but hardly by the medicoes who have the highest qualifications.

A doctor tells me that, taking things by and large, he calculates his panel work brings him in about three shillings a visit, and that, he says, is more than he got in the old days from his poorer patients. In those days, too, there was no security for the money; now the cash comes in automatically every quarter from the Government. In his view, there is a case for a reduction, but he is admittedly in a minority.

There is some idea that the whole working of medical insurance may have to be revised. It is by no means economical. It does not appear to give the best possible service for the money. And it is far from popular in many districts. At any rate, the idea of a state medical service, which was favoured by Dr. Addison and Sir George Newman, has gone by the board, and is not likely to be revived. This may be regretted by certain panel doctors and many bureaucrats, but it is a good thing for the independence of the profession at large.

**A Town for Sale.**

Does anybody want to buy a town? The pleasant and prosperous little borough of Reigate, for many years the property of Lady Henry Somerset, is in the market, shortly to be knocked down to the highest bidder. Although the motor bus runs to Reigate—from Camden Town, of all places in the world—this half-way place on the main Brighton road still preserves a good deal of the old-world atmosphere. In the Church is buried the victor of the Spanish Armada, but the main atmosphere of Reigate is still eighteenth century—although its caves enshrine the memory of a far older age, and on the hills above the town the track of the Pilgrims' Way recalls the mediaeval march to Canterbury. It is an attractive place, and for once the auctioneers have not exaggerated the charms of their bargains.

**The New Law Term.**

The reopening of the Law Courts finds the Bar quite reasonably cheerful. I am told that the lists are long, and that litigants have been displaying a properly litigious attitude. Divorce is a little down—the pace was too hot to last—but not alarmingly so, from the point of view of those who practise in that court; and there are some good commercial cases which should "cut up" well. There has been rather a falling-off in crime, however, both in quality and quantity, of late years; in fact, as a lawyer recently remarked, "it is one of the many lamentable consequences of the war that even the criminal classes seem to have lost their cunning."

**Ocellus.**

A *communique* issued from the India Office on September 29, says:—"The military authorities in Madras take rather a serious view of the strong resistance of the Moplahs, and this may entail a more vigorous prosecution of the campaign against them. Recent actions at Nilambur and Nennini show that the resistance is framed on guerilla lines, plunder, terrorization and avoidance of open battle. Armed gangs are getting stronger, and it is probable that the numbers joining the rebels are on the increase.

## THE ARAB HORSE SOCIETY.

The five-day endurance test of Arab horses, held by the Arab Horse Society, finished at Lewes on September 30. The horses had to travel sixty miles a day over the chief heights of the South Downs. Eight started on Monday, but only two competed on the last two days. Of these the winner was Mr. H. V. H. Clark's Belka, ridden by the owner, whose time for the 300 miles was 37hrs. 38min. 49½sec., and Shahzada, belonging to Mr. L. Edmunds, and ridden by Mr. Morgan Blair, finished second in 38hrs. 43mins. 20sec.

## "THE NEAR EAST" INDEX TO VOLUME XIX.

JANUARY 6—JUNE 30, 1921.

The Index to Volume XIX is now ready, and subscribers wishing to receive copies should apply to THE MANAGER, "THE NEAR EAST," 1, Devonshire Square, London, E.C.2

## TO OUR LADY READERS ABROAD.

*"THE NEAR EAST"* invites its *Lady Readers overseas* to enter a competition in which the Prizes will be as follows:—

**1st Prize £10.**
**2nd Prize £5.**
**3rd Prize £3.**

and five Consolation Prizes, taking the form of a year's subscription to *The Near East*, for the *best letters or articles* submitted in accordance with the following conditions:—

Competitors must forward to the Editor a letter or article dealing

(1) with the country or region in which the writer is resident or travelling (or has been resident or travelling) its people, its scenery, customs, folk-lore, or some kindred topic; or

(2) with some personal experience of the writer in the region or country.

Length 1,000-1,800 words.

The letter or article may be either serious or humorous in character; literary style is less to be aimed at than freshness of outlook. In other words, a competitor who writes as she would to an intimate friend and gives an interesting account or description of what she sees or experiences, will have as good a chance of winning a prize as one who sends in a more "correct" article on some well-worn subject.

Each letter or article must be legibly written (or typed) **on one side of the paper only**; it must be accompanied by a coupon (to be found on the last page) duly filled in; and must be addressed:

The Editor,
*"THE NEAR EAST,"*
1, Devonshire Square,
London, E.C. 2. England.

Competitors may adopt a pseudonym, if preferred, for purposes of publication; but correct name and address must be given for the Editor's information.

The Editor's decision will be final.

Unsuccessful articles or letters will be returned, if accompanied by an addressed envelope.

The Editor reserves the right to publish, at the usual rate of payment, any articles submitted which do not win a prize.

The coupon (on last page of cover) will be repeated in the next issue. Competitors are restricted to three letters or articles; but each must be accompanied by a coupon—not necessarily of the same date.

See coupon on page xii of cover

# THE NEAR AND MIDDLE EAST.

*(From Our Own Correspondents).*

## EGYPT.

*Cairo, September 20.*

**The Government's Action.**

In my last letter I dealt with the growing disrespect for authority in Egypt. I had no knowledge then, nor was there any evidence to infer, that the Government was likely to take any steps to deal with what was becoming an ominous situation; but, during the last few days, events have moved rapidly. The Government has suddenly asserted its authority and there has been a sharp radical change for the better. There is, of course, the usual talk in the Opposition native Press of repression, coercion and veiled British tyranny, but even the most virulent papers have been unable to do anything but abuse the Government for its timely action—and abuse is not argument. Saad Pasha Zaghloul's intended itinerant speech-making tour, which must have resulted in inflaming the ignorant mass against constituted authority, has been checked; the arrest of two notables for respective authorship and publication of a scurrilous article alleging that Lord Curzon had bullied the Egyptian Official Delegation into frightened silence, has led the extremist native Press to adopt a more moderate tone; the announcement of the decision to deport Aly Bey Fahmy Kamel the leader of the ultra-Nationalists—really the out-and-out extremists—has caused the other extremist leaders to reconsider their positions; and, finally, the Government's warning on the eve of the arrival of the visiting Labour Members of Parliament that demonstrations would not be permitted in the streets, reduced the reception of the Members to a weak partisan effort by the official adherents of Zaghloul.

**An Exciting Week.**

Thus it has, on the whole, been an exciting week. With the Government in this sort of temper, Zaghloul Pasha's doctrine that "the will of the people," as expressed by small provincial delegations to himself, must be above the law, is seen in its true perspective: foolish propaganda, like most of the Pasha's recent utterances. It was time that the growing menace of his disturbing interpretations of "the will of the people" was stopped. And the Government stopped it in a clever and statesmanlike way. As already reported, Zaghloul Pasha had attempted to take up the absolutely untenable position that because a delegation had approached him and asked him to visit its district and address the people, he must obey the people's mandate, regardless of the law of the land, which states that unauthorised public meetings are forbidden, and lays down that an authorised meeting of five or more persons in a public place is a meeting within the meaning of the Act. Accordingly, some little time ago one of Zaghloul's lieutenants was passing, in a train, a town not far from Alexandria. The local Chief of Police warned some students that they were not to gather on the platform as such gatherings were forbidden. The students disobeyed, and on Tuesday last they were brought to trial for having contravened the Law of Assemblage—the law referred to above. Counsel for the defence, a prominent Cairo lawyer intimately connected with the Zaghloulists, argued that as the law had been passed as an emergency regulation in 1914, and that as it had never been adopted by the Egyptian Legislative Assembly, it was not valid. The Court reserved judgment.

**Zaghloul Pasha's Plans.**

That case is the answer to Zaghloul's intention to hold an electioneering campaign, complete with meetings and demonstrations. Reservation of judgment is not uncommon in Egypt, and in this case it is of no particular significance. Even if the Court held that the argument of the defence was valid, the Government could still get over the difficulty either by again issuing the law, as it did in 1914, or by getting it legalised under martial law. In any case, without referring to Zaghloul Pasha in any way, it has checked his latest scheme for subtly overthrowing the power of his hated rivals who held office. At the same time, it is difficult to understand exactly what Zaghloul Pasha wants to do. In an interview a few days ago with *The Times* correspondent—which has since been published locally—he stated that he would be prepared to co-operate with the Adly Cabinet, if the Official Delegation succeeded in bringing back an agreement acceptable to Egypt. He went further, indeed, and intimated that he would be prepared to consider an invitation to join in the official negotiations in London. What does the man mean? If he wants to co-operate, he is showing his willingness in a very curious manner, as in the very interview in which he mentioned his willingness to co-operate he spoke of the Adly Cabinet as men, in effect, who should be shunned by all true Egyptians. His opinions and his declarations seem to fluctuate with each passing mood. If he had any public opinion to guide him it might be a different matter; but he has not. He is, in his own sphere, as much an autocrat as the ex-Kaiser, and his imperious whims are subject to passing circumstances. Manifestly, that sort of instability would prove quicksand if it were used as a foundation for any political edifice.

**The Labour Members' Visit.**

Now his cause is to be championed by the "Swan Travelling Company," as the four visiting Labour members of the British House of Commons have been nick-named locally. The deputation arrived yesterday afternoon and proceeded to their hotel through a crowd of comparatively unenthusiastic watchers, who were either active partisans of Zaghloul Pasha or the irresponsible street elements. What was of some significance was that not during the whole journey from the boat to the hotel did one hear a single cry against the Government. There were the usual fashionable shouts, the catch-phrases of the movement, but neither by word nor act did the crowd infer its dissatisfaction with the present Cabinet. The visitors have asked to be excused from interviews for the Press, but they issued a statement this morning which might have been—and probably was—written by the Zaghloulist organisation. It stated that the visitors did not wish to interfere with the internal affairs of Egypt, but that the object of their visit was to obtain first-hand knowledge upon which to base conclusions concerning the best policy to be followed to promote real friendship between the two peoples; and they declare their adherence to the following principles: (1) Complete independence for the Egyptians, *subject to reasonable guarantees of British and other foreign interests in Egypt*, such guarantees not to prejudice the complete independence of the country; (2) the selection of the official negotiators should be made from among the elected representatives of the people; and (3) the abolition of martial law and other repressive

measures should precede such election. So far, so good. They had yet to learn how the Zaghloulists interpret their first condition. If they manage to complete their visit without causing any hostilities among the opposite sections of Egyptians, they will have done no harm, ill-timed and tactless as their visit at this juncture is.

**Government Announcements.**

There have been four interesting official announcements during the week. One announced that the Government has decided to continue the payment of the war-bonus to officials on the present scale indefinitely, and that two months' notice would be given of any intended change. The announcement was not unexpected, and therefore, has occasioned little comment. Another *communiqué* directed public attention to the fact that mosques are religious institutions and that politics were not a fit subject for inquiry within their walls, and advised that the police have been instructed to remove from a mosque any person who endeavours to foster political feeling therein. The third announcement was rather curious. The Zaghloulist and ultra-Nationalist Press has been publishing allegations of thousands of Egyptians having been forced to serve in the Greek army against the Turks, when the Egyptian had really desired to serve with the Kemalists. The Government, after first ignoring the statements, volunteered the information that it "had no knowledge" of the facts alleged by the Press. *Ergo*, I presume, the allegations are untrue. The fourth statement advising that the Government was preparing a decree restricting the area under cotton cultivation for a further period beyond the term about to expire is dealt with elsewhere.

## SUDAN.

*Khartoum, September* 10.

The July reports from Mongalla Province state that the rainfall has been better than 1920, but is still much less than that of 1919. On the whole the rains have been fair throughout the Province with the result that cultivation is very promising in all districts with the sole exception of Bor Merkaz.

During the latter part of July some severe thunderstorms were experienced in Mongalla, a house was struck by lightening but the inmates were fortunate to escape undamaged. A certain amount of excitement was caused on July 9 by a pair of lions promenading the town that night. After creating a minor panic, they finished up their efforts by breaking into a house in the civil village and slaughtering 13 goats.

## YUGOSLAVIA.

*Zagreb, September* 21.

**The View of Great Britain.**

Gratification is felt in Belgrade at the news that the British officer who was guilty of indiscretions in the recent affair in the Baranya has been recalled, and that a commission has been sent to inquire into the allegations and the alleged excesses of the Magyars in their new territory. The apparently hostile attitude of British officials has wounded the sensibilities of the Serbs, with whom we were extremely popular during the war,— more so than any other of their allies. But considerable damage has been done to our prestige and popularity in the country lately. The Zagreb comic paper *Koprive* (*i.e.* "Stinging Nettles"), has recently had two cartoons at our expense. In one, entitled "Our Great Friend," a British 'Tommy,' carrying in his left hand a flag with the inscription in Hungarian "elyen Magyarorszag." ("Long live Hungary"), and bearing on his back a Maygar soldier is seen stepping across the river which divides the Baranya from Yugoslavia; while a Serbian soldier is beating a hurried retreat. The legend reads: "I give thee the Baranya, that you may know us as the recognised experts in the settlement of national problems, as we have so successfully settled the Irish question." In the other, a lean British officer, with a pipe in his mouth, is elbowing out an angry Serbian soldier, to make way for two Budapest Jews, holding money-bags. The legend in this case reads:—"Now, my little friend, you may be off, because we do not want any troops now, and, you know, you do not understand anything about business."

**A New Party.**

Since 1920 there has been appearing in Zagreb a political, literary and economic review called *Nova Europa*, admittedly on the model of *New Europe*. It is always full of interesting matter and its moving spirits are some of the most thoughtful men in Yugoslavia, several of whose names are familiar in London and Paris. It is a non-party production, and its ideals are the spread of education and knowledge—to avoid the much prostituted word "culture" — in Yugoslavia, clean politics and the union of the people. Its influence has hitherto been purely academic; but its movers now propose to enter the political arena, and are preparing to form a party. It will be interesting to see the effect of the activities of this "intelligentsia" in the purely materialistic field of politics, but it is sure to be for the good of the country. For purposes of future reference, it is useful to quote the names of the inspirers of this movement. They are: Dr. Jovan Tsviyitch the distinguished geographer, I. Sekulitch, and M. Grol, from Belgrade; Tih. Ostokitch from Skoplje; I. Kolbe from Bosnia; M. Murko, and L. Pitamitch from Slovenia and J. Deneskitch, B. Livaditch, V. Novak, L. Popavitch M. Kostrenchitch, and Dr. Milan Curchin, the editor, from Zagreb.

**A Story of M. Pashitch.**

In spite of, or perhaps owing to, his undoubted political success, M. Pashitch has very many enemies. One of these recently showed a pleasing touch of humour, which is a scarce ingredient in politics in any country. He began by quoting a contemporary newspaper describing the last hours of the late King. As the aged monarch lay dying, his glance fell upon M. Pashitch, who was sitting near him, and when he saw his old comrade in exile and fellow-worker in the cause of union, a tear rolled down the Sovereign's cheek. This provoked a comment from one of the Prime Minister's opponents, to the effect that the thoughts that passed through the old King's mind at that moment are now a secret for all time; but anyone ought to be able to guess why a tear should be shed at the sight of M. Pashitch.

**An Export of Dollars.**

A few days ago an official of the Wiener Bank Verein was travelling from Zagreb to Vienna; at the frontier at Maribor he handed over to a messenger from Vienna a parcel of 100.000 American dollars, representing at the then rate of Exchange about 21 millions of Yugoslav kruna. Shortly after the train left the station, but before it crossed the frontier, a detective stopped the train arrested the messenger and confiscated the money. The matter was referred to the Ministry of Finance at Belgrade, for the regulations against the export of money have been very strict; but the reply came that by a decree of July 27 last the export of foreign currency, with the exception of bullion, was free, so that the procurist of the Bank was released and his money restored to him. He was within his rights, and the police were a little over-zealous, for they had been expecting every moment to hear that this decree was rescinded in order to support the falling dinar.

**Croats in Hungary.**

In that part of Western Hungary which the Magyars have to hand over to Austria, the population consists of about 250,000 Germans, but the Magyars claim 50,000 of their nationals in it. It is interesting to note that there are also the same number of Croats, who have no hope of being incorporated in Yugoslavia, but would certainly prefer the mild rule of modern Vienna to the chauvinism of the Hungarians.

**The Belgrade Geographical Society.**

Those cynics who maintain that the Yugoslavs in general and Serbs in particular, are fit for nothing but fighting and violent politics, would do well to read the

Digitized by Google

recent *Bulletin* of the Geographical Society of Belgrade. The Society was founded before the war by Dr. Yovan Tsviyitch, one of the most distinguished geographers of Europe, and has resumed its good work; and the fifth number of its *Bulletin* has recently been published in Belgrade, at the very reasonable price of 30 dinars. A glance at the contents shows the scope and variety of its matter. The first is an article by Dr. Tsviyitch on the geographical, economic, communicational and ethnical significance of the provinces of Yugoslavia and their boundaries: Professor Goryanovitch has one on the morphological and hydrographical peculiarities of the loess of Srem: P. Vuyevitch on Climatology; and articles by J. Erdelyanvitch on the tribal system of the Dinaric Serbs, and T. R. Georgyevitch on the migrations of the Serbs at the time of Prince Milosh Obrenovitch. There are also papers on the phenomena of the "karst", on spelaeology, a suitable subject, for the karst formation is very rich in caverns, of which the Adelsburg is the most famous, on interglacial marine terraces on the island of Prinkipo, on lacustrine formations in the Shumadia, on phytogeography, with other extremely interesting contributions dealing with Anthropology, on the influence of mental characteristics upon history, and on statistics. There are interesting papers on the populations of the new states of Central Europe, on the history of civilization among the Slovenes, on village education in the Voivodina, on pastoral life among the Mijaks, a group who live in the Podrimlye country, a history of some important families in the provinces of Valyevo and Uzhitse, on some popular geographical expressions in Montenegro, and other matters of a purely local interest.

**Slovenia in the Census.**

According to the latest census, the population of Slovenia is 1,056,464: of these, Slovenish is the mother tongue of 985,155, Serbo-Croat of 10,721 other Slavonic tongues, mainly Russian, of 4,196, German of 39,631, Magyar of 14,897, and Italian of 860. There are to-day no less than 14,063 non-Yugoslav subjects in Slovenia and 16,454 whose nationality has not yet been decided. There are 6,627 Orthodox Christians, 501 Greek Catholic, 27,253 Evangelists, 650 Mohammedans, 946 Jews and the remainder are Roman Catholics. It is believed that the number of Slovenes handed over to Italy in Istria, and the hinterland of Trieste and round Goritza is about half a million.

## ROUMANIA.

*Bucharest, September 21.*

**The Opposition's Campaign.**

Coincident with the return of the King from abroad, the different political parties in the Opposition have restarted their campaign for the overthrow of the Government with exceptional vigour. Some are publishing manifestoes in the papers, and others are addressing meetings at different centres in the country condemning the present Government's administration and laws, and especially the new Fiscal Bill, which they consider much too drastic and complicated. Another circumstance in favour of the Opposition is the recent sudden collapse of the Roumanian rate of exchange, and the resultant present financial and economic crisis, for which they hold the Cabinet responsible. The weak point of the Opposition's campaign is, however, that each party is working independently, and does not seem able to come to an understanding to co-operate with the others, although all sections readily admit that they could only come to power by forming a coalition of at least two of the opposing parties. As there is still a month and a half before Parliament reopens, there is plenty of time for some kind of arrangement in this direction to be made. They all, however, suggest, that should the present Cabinet resign, a provisional one would have to be appointed consisting of officials, or magistrates, for the purpose of presiding over the general elections, thereby indicating the true pulse of the country.

The Government, on the other hand, does not seem very alarmed by this campaign, and is still confident that it will be able to win through provided no domestic dissension crops up among the members of the present Cabinet. There are rumours that M. Titulescu, the Minister of Finance, resents the decision of the last Ministers' Council, which postpones the declarations of capital and income for the new taxes to be levied. There are also other minor frictions, but only after the return of M. Také Jonescu and M. Titulescu will it be known whether these rumours are well founded or not.

At the last by-election at Tulcea for a seat in the Senate the Tzaranist (peasants) Party scored a success over the Government, M. C. Lupu having obtained 4,804 votes against the Government candidate's 2,453 votes.

**General News.**

The King and Queen of Roumania and Princess Ileana returned on Tuesday from France and have gone straight to their summer residence at Sinaia.

Sir Herbert Dering, British Minister at Bucharest, arrived to-day by the Simplon.

On September 15, a Yugoslav delegation arrived at Temesvar (Banat) to meet a Roumanian delegation for the purpose of terminating the work in connection with the definite settlement of the Yugoslav-Roumanian frontier. The new boundary will be based on the Sèvres Treaty, but will also take into consideration the estates of the population affected.

The French steamer "Sofia," carrying 800 tons of coal, bound for Galatz sunk at a distance of 12 miles from Constantza port, having struck a stray mine. The crew, consisting of 20 men and one woman, were saved, thanks to the lucky chance that the mishap had been witnessed from the Constantza pier and a salvage party was sent in time.

Following on the report of General Rascanu, Minister of War, after his recent visit to the Bessarabian frontier, the Ministers' Council decided to postpone the calling up of the 1922 class from November 1, 1921, to February 1, 1922.

## BULGARIA.

*Sofia, September 25.*

**A Respite for the Army.**

The decision of the Council of Ambassadors allowing Bulgaria to retain temporarily 10,000 Gendarmes, 3,000 Frontier Guards, and a few hundred cavalrymen on a compulsory basis was made known to the Bulgarian War Office by the Inter-Allied Military Commission of Control a few days ago. The War Office have, for reasons best known to themselves, decided not to make this news public; but it is already gradually becoming known throughout the country. Although this is only a temporary respite, it is regarded as an excellent omen for the future; and great hopes are entertained that the authorities at Paris will allow Bulgaria to keep the above number of conscripts until she is able to raise 33,000 volunteers.

The present situation is that Bulgaria has an armed force of 17,000 men, composed of 13,500 conscripts and approximately 3,500 volunteers. As 17,000 is considered a sufficient number for the maintenance of internal order, there is no need for the moment to worry about this aspect of the case. An army composed of both conscripts and volunteers cannot, however, work very smoothly, and as it is understood that the Council of Ambassadors is again discussing the question of Bulgaria's future army, it is to be hoped that they will speedily arrive at a final decision.

The chief difficulty that now confronts the Bulgarian authorities is the difference of pay between the conscript and the volunteer, and it will not be surprising if the conscript soon begins to rail against a system which makes him perform the same duties as the volunteer, but which gives him only a fraction of the pay that the latter receives. The question of leave will also come up,

Digitized by Google

as the volunteer has been promised four months' leave a year on full pay, a privilege which has never been granted to the conscript. Other difficulties will no doubt soon make themselves felt, but they are all more than counterbalanced by the fact that the Council of Ambassadors has realised that grounds do exist for considering whether the military clauses of the Treaty of Neuilly should be revised.

The action of the Bulgarian War Office in prohibiting the news from being published has, of course, somewhat detracted from the outward enthusiasm which would have been shown over the decision; but there is nevertheless a strong feeling of quiet satisfaction in Government circles, because it is realised that this respite is primarily due to the efforts of the Allied representatives at Sofia.

**The Plight of State Employees.**

It is announced that when the Sobranye meets again at the end of October, one of the first measures which the Government will bring before the Chamber will be a law providing for an increase in the pay of Government employees. During the last three years the position of these employees has been growing steadily worse, and to-day, with the lev worth four Swiss centimes and the cost of living abnormally high, it is very necessary that prompt steps should be taken to augment their salaries.

At present the average monthly payment of an employee is 643 levas (twenty-four shillings in English money). That this is ridiculously inadequate no one will contest, for even the most economical person will spend upwards of 700 levas a month on food alone; and bearing in mind that bread costs five levas, and meat 18 levas a kilo, it is clear that 23 levas a day cannot go very far. Besides this, the employee has to house and clothe himself, not to mention the purchase of such items as fuel and other necessaries. He is thus placed in the position of having to make money in order to cover these extra expenses, and it is only natural that he becomes addicted to "bribery and corruption."

These two evils are greatly on the increase, and they will continue to be so until the Government decide to better the lot of the unfortunate employee. Even the more highly-paid officials, such as Chiefs of Sections at the Foreign Office, receive only 2,000 to 2,500 levas a month, and they are expected to keep up appearances befitting their position.

**Cost of Living.**

There is no "index" of the cost of living in Bulgaria, but living is now at least 30 times more expensive than it was three years ago. The lev has fallen 25 times, so to speak, and the price of commodities has also risen. For the foreigner whose currency has not depreciated Sofia is, however, one of the cheapest capitals in Europe, flats being obtainable at £9 a month, a room at a good hotel costing four shillings to five shillings, while one can lunch or dine very well on 60 to 70 levas, which is only about two shillings and threepence.

In the provinces, things are much cheaper, as Bulgaria is a self-supporting country, and the reason for the great rise of prices in the towns is that the peasants are practically able to name their own prices, there being no Government Control of prices.

**The Radoslavoff Cabinet.**

On October 11 the trials of M. Radoslavoff, who was the Prime Minister during the war, General Jeckoff, the late Commander-in-Chief, and General Boyadjieff will begin. None of the three accused persons is here, Radoslavoff being in Germany, and the others in Switzerland and Austria respectively. They will nevertheless be tried *in contumaciam*. General Jeckoff has expressed his willingness to return, but has asked the Bulgarian Government to furnish him with a safe conduct pass in order that he may travel through Serbia. This, however, has not been sent to him, and he is consequently unable to return. It is expected that the trials will continue for a considerable time, as there is a mass of evidence and a great number of witnesses ready to be produced.

**The Death of Ivan Vazoff.**

Bulgaria is plunged into gloom this week owing to the death of her national poet, Ivan Vazoff. He died suddenly of heart failure at Sofia on Thursday the 22nd, and will be accorded a national funeral next Wednesday, which will be observed as a day of mourning throughout the country.

Vazoff, who came of humble stock, was born in 1850 at the village of Sopot, near Phillippopolis, and at the early age of six began to show a talent for the art in which he afterwards became so famous. He was a most prolific writer of both poetry and prose. Amongst his works of the former class may be cited "Stara Planina" and "L'Epopée des Oubliés." He also composed the Bulgarian National Anthem, whilst his drama "Borislave" enjoys great popularity on the Bulgarian stage.

Vazoff passed several years of his life in exile at Bucharest and Odessa, and it was at the latter place that he began "Under the Yoke of the Turks," which was his best-known work and was translated into English, and many other European as well as Asiatic languages.

For two years, 1897-99, Vazoff acted as Minister of Public Instruction, but afterwards he returned to his literary work, and was busy at this until his death. On October 24 last year he celebrated his double jubilee and on this occasion the Sobranye granted him a sum of 100,000 levas from the State, whilst all his fortune and property were declared free of taxation.

## TURKEY.

*Constantinople, September 21.*

**Another Failure.**

For the last two months the Greek Government has left no stone unturned to prevent the publication in the European press of any information not in accordance with its own propaganda; but now that the Greek army has withdrawn to the west of the Sakaria River, it will be impossible to disguise the fact that the offensive has failed definitely; for its objectives were the capture of Angora and the destruction of the Kemalist army. Neither of these things has been accomplished; and the Greeks have therefore suffered a defeat, in spite of their previous successes. It is impossible at present to obtain full and accurate details of the campaign which was to have brought about the fall of Angora and of Mustapha Kemal; but it is certain that the Sakaria River battle, which lasted nearly a fortnight, was marked by some most desperate and bloody fighting. The total losses on both sides probably amount to at least 30,000 men; which is an enormous figure in view of the numbers actually engaged, and the relatively restricted area of the fighting.

The Greek infantry once again distinguished itself by its extraordinary endurance and reckless bravery, but it would appear that, as on previous occasions, the Greek army was badly led and handled. This is attributed to the inevitable confusion arising from the existence of two General Staffs, that of General Papoulas and that of the King. How far this really affected the result, it would not be fair to affirm at the present moment; but the fact remains that the Greek plans seem to have been changed more than once at a critical juncture. The Greek artillery also seems to have been inefficiently handled, and the Turkish artillery, although inferior in weight and number, is said to have been far more effective. This was possibly due to the fact that the Greek lines of communication were constantly raided by Turkish cavalry and light infantry, which

**Travellers to the Near East**

Digitized by Google

resulted in the frequent interruption of the supply of munitions and rations at the front. In any case, after nearly a fortnight of desperate fighting, the Greeks only succeeded in forcing back the Turkish centre as far as Polatli, and failed to make any serious impression upon the Turkish flanks. In view of the increasing difficulties of maintaining communications, especially with the approach of bad weather, there was nothing else to do but retreat; and this is what the Greek army has been doing for the last week. The Turks are almost powerless to press the retreating army very hard, owing to the imperfection of their own transport; but at the time of writing Kemalist troops are said to have reached a point some 20 kilometres east of Seyyid Ghazi. This is the apparent position on the right flank of the Greek army, but exactly how matters stand with the centre and the left flank is not yet clear. It is probably that the retreat will continue until the Eskishehir—Afion Kara Hissar line is reached, but it is by no means certain that the Greeks will not eventually be compelled to fall back to the impregnable Ushak-Brousa positions.

The net result of the offensive, as might have been foreseen, leaves the position much as it has been for the last twelve months. The judgment of Marshal Foch and of General Gouraud has been fully vindicated, and Fate has given General Gouraud ample satisfaction for the impertinent Greek rejoinder to the effect that there were no Greek troops in Cilicia, when the French general recalled the difficulties which the French had experienced in Cilicia.

**Bad Policy.**

If Greek strategy has been defective, Greek policy has been distinctly bad. It is never wise to attempt to stifle the truth, for facts can never be concealed entirely, and when suppressed truth is released, it bursts with devastating effect. The British press has been systematically hoodwinked with regard to the true state of affairs during the progress of the fighting in Anatolia. After the fall of Eskishehir, it was announced on all sides that the Kemalist army had been completely routed, and no longer existed as a fighting force. Thanks to the advantage of possessing control of one of the cable stations between Turkey and Europe, the Greek Government succeeded in preventing the Turkish version of affairs from reaching the outside world, and in this manner the entire British press was flooded with what an Athens paper stigmatised as "wireless bombast." The few correspondents who attempted to get in a word as to the true state of affairs were assailed as pro-Turksh and liars. Even in Constantinople it has been realised that the official information of the Greek Government is doctored at least to the same extent as the official *communiqués* of the Kemalists, and the latter are now being accepted with much less reserve than is usual with official Turkish *communiqués* of any kind. It is exceedingly unfortunate that the use of wireless telegraphy is restricted to the naval and military authorities; for there is no other means of enabling the British public to obtain an approximately accurate impression of what is taking place, by comparing the Turkish and Greek versions at the same time. Thus, when the Greek army had fought itself to a standstill, and preparations were being made for a withdrawal, the London press was announcing the complete defeat of the Turkish forces, and the speedy resumption of the "advance" upon Angora.

**The Plot.**

The discovery by the British authorities of a conspiracy for the fomenting of a revolution and the assassination of the British Commander-in-Chief, has added a spice of melodrama to the Near Eastern tragi-comedy. Flippant people were reminded of the now defunct celebrations of November 5, and of cloaks, daggers, and false noses. All the same, there is not the slightest doubt that the Kemalists possess the machinery for the execution of such a scheme; for it is a secret to nobody that the Kemalist Government has thousands of devoted agents in the capital, and that the Government itself is at least completely passive in regard to their actions. It was a pity perhaps that the British authorities did not decide to effect the arrests themselves, and to communicate with the Government afterwards; for as there would be no useful purpose served in bringing about a change in the present administration, a weakening of the original attitude of the British authorities was inevitable. Of course, the action was nominally taken in the name of all the Allies, but it is quite certain that no action would have been taken by either the French or the Italians alone, and the French have quietly laughed at the whole affair, affirming that it was only a British manoeuvre to strengthen their hold upon the Turkish capital—which is absurd, but readily accepted by the Turks.

## CYPRUS.

*Nicosia, September 20.*

**The Legislative Council.**

The coming elections to the Council occupy attention, and the names of those likely to stand are being discussed. One of the oldest members, M. Eugenios Zeno will not seek re-election, but efforts are being made to induce him to reconsider his decision. A leading paper strongly urges that all the members should be re-elected, as having done all that was possible by their patriotic efforts. It is, however, likely that they will be opposed by a considerable number of candidates in each of the three electoral districts. The number of elected members is one Moslem and three non-Moslem for each division.

**Forest Prospects.**

The appointment of a new Principal Forest Officer should inaugurate an entirely new policy in respect of the forests. Without disparagement of the zealous officials who have been at the head of the department,

it must be confessed that except during the first two or three years after the British occupation, the Government has merely played with the forests of Cyprus, and that the 40 years which followed the initial effort have been practically lost. The havoc which was destroying them under Turkish rule was indeed stopped, but the work of recovery, which necessarily depends on judicious expenditure, has been sadly neglected. At the outset the British Government borrowed the services of an able Forest Officer from France, M. Madon, whose admirable reports are among the most interesting and important of all essays on Cyprus affairs. Then came Dr. Dobbs, an Anglo-Indian official; but his work was the delimitation of State forests, and he remained but a short time in the island. Since their departure no official possessing scientific knowledge of forestry has been in charge, and the results may be imagined. Moreover during the war much timber was cut for the needs of our troops in Palestine and Egypt. It is to be hoped that the important work of re-afforestation will be now accelerated, and a sufficient vote sanctioned.

Another promised work is the measurement and enumeration of trees in certain areas. This work will require an increase of the Staff, by at least 12 officers. The Nicosia paper *'Phone tes Xyprou* in a good article on forest needs, touches the subject of the prevention and limitation of forest fires. It counsels more moderation and leniency in dealing with the rights and needs of villages and monasteries which draw timber and pasture flocks inside the forests. It believes that malicious incendiarism would be less frequent if such leniency were observed. On the other hand there can be no doubt forest offences and depredations must be strictly dealt with. As it is, the goat-herd or other man with a grievance, as long as he can gratify his thirst for revenge—against the Government—has no regard for results when he lights a fire or for the fact that there will be so much less forest in which to trespass. The difficulty is to steer a middle course, and much must always depend on the character of the forest guards selected. It is satisfactory that several papers, and some members of the Legislative Council strongly support a strict forest policy.

**Presentation of Medals.**

The High Commissioner on September 12, presented medals to about 700 Cypriot muleteers who served during the war in Macedonia, and who were reported to have done very good work. The presentation took place in the "Moat" at Nicosia. The Governor was attended by the Acting Chief Secretary, the Chief Commandant of Police, and Mr. Kareklas, of the Police, who acted as A.D.C. Mr. Stevenson thanked the men in the name of the King, and congratulated them on the honour bestowed by His Majesty. The medals bear the head of the King, and on the obverse the figure of St. George: the words "Muleteers of Macedonia" being engraved upon them.

**The Cruelty to Animals Law.**

This very necessary act only became law after much difficulty, and many Cypriots no doubt regard it as strange interference with the liberty of the subject. One of the papers now protests against a too severe application of its provisions during the season of collecting carobs, and the reasoning is quite characteristic of the view generally taken. The animal is regarded as a mere chattel, and until recently (for there has been some improvement) the first warning given to a villager by an enemy was only too often the mutilation of his mule or ass. That is why so many of these animals appear without ears or tail. The paper points out that for the transport of carobs the producer is entirely dependent on his animals, often over very bad roads. There must therefore inevitably be cases of overworking, and the police should show leniency in applying the law, and "protect the villager." The unfortunate animal does not count.

**A Letter from Smyrna.**

The Smyrna Correspondent, extracts from whose letters have been published by the *Phone*, writes :—

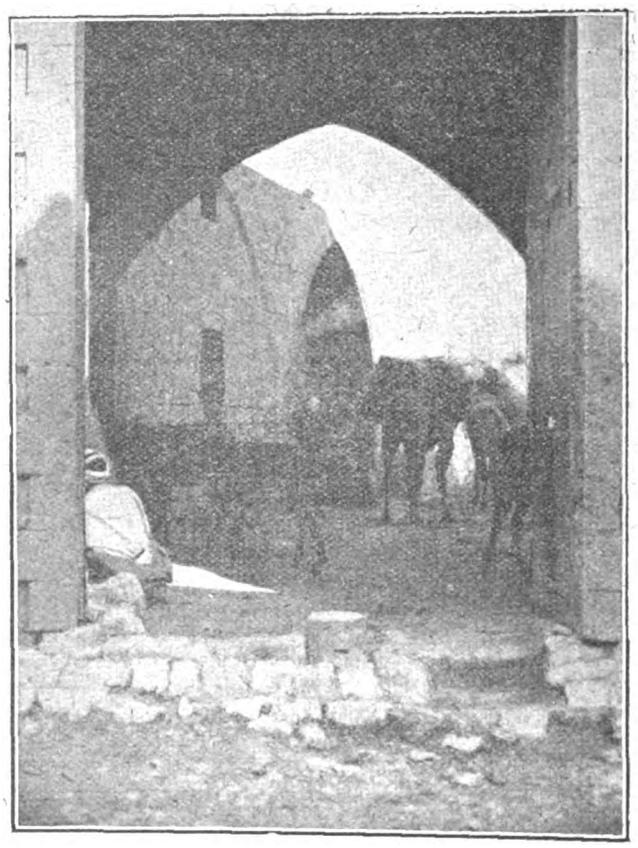
"Our Great King, who has happily recovered, will—as I am informed from an official source—proceed immediately after the conclusion of the war to England. This news is very gratifying, as showing, together with other indications, that before his departure he will be fully recognised, in the first place by England and then by the other Powers. Let us hope that after the triumphant termination of the war, not only will the information about the King's departure for London be verified, but also the report that M. Venizelos will be elected to represent Greece, so that these two great men of Greece who, each in his own sphere of action, has glorified and magnified Greece, may again co-operate to foil the machinations of her enemies, and to avert the evils which threaten her national interests."

**General News.**

The High Commissioner announces that the Proclamation of 1914 which placed Cyprus under martial law is cancelled and annulled.

The heat has abated, and this change coincides with news of a similar relief in Egypt, and even of "cold weather" at Alexandria. Many visitors are leaving for Egypt. The Government offices will be moved from Troodos about the middle of October.

The Hellenic Consul is calling upon all Hellenic subjects of age, and up to 40 years, to be enrolled and to obtain their papers for Athens.



[*Photo by Martin Briggs, F.R.I.B.A.*

**A SCENE IN HAIFA.**

Haifa, which bids fair to become the chief port of Palestine and had a prosperous German colony before the War, still possesses a few picturesque corners where one may see the traditional life of the East.

**SOUVENIRS OF PALESTINE.**

A novel scheme has been devised by way of financially assisting hospitals and charities in Palestine. The High Commissioner for Palestine has requested the Crown Agents for the Colonies, 4, Millbank, London, S.W.1., to undertake the issue of boxes made in Palestine and containing the following articles :—

Jordan water in glass vial made in Hebron.

Earth from Mount Moriah in silk sack from Damascus hand looms.

Fragment of Roman pottery from the excavations at Ascalon.

Pressed flowers from the hills of Judea.

Shells from the Lake of Galilee.

The price is 5s. for plain wood boxes and 7s. for olive wood boxes, but quantities of not less than 20 will be supplied for the purpose of religious and charitable bazaars at a reduction of 1s. per box. The proceeds will as stated, be devoted to hospitals and charities in Palestine. Boxes can be obtained at the Crown Agents Office, or will be sent post free to any address in the United Kingdon on receipt of remittance. Cheques should be made payable to the Crown Agents or bear, and crossed "& Co." Postal orders should be similarly crossed Postage stamps, it is added, cannot be accepted in payments.

## PRINCE MAHMOUD HAMDY.

*To the Editor of "The Near East."*

Sir,—With reference to the notice of the late prince, in "The Near East" of this week, there is a slight error in one word which should, I think, be pointed out. In the sentence 'He alone retained his love of the English language '. . . . , for *alone* should be read *always*. It might be inferred that Prince Mahmoud alone of the Viceregal family appreciated the English language and character. It may be mentioned that the 4th son of Ismail, Ibrahim Hilmi Pasha (who recently contributed letters on Egypt to *The Times*) speaks English perfectly, and has retained many English sympathies. The 3rd son, the late Hassan Pasha, was for some years at Christ Church, Oxford; spoke English fluently, and was in most respects the most English, so to speak of all the family. Hussein, the 2nd son, was educated in France and Switzerland, but as Sultan he showed his ability, and had learned to appreciate the influence of English friends and counsellors. The eldest son (the Khedive) Tewfik, whose early death was a great misfortune, always regretted very much that he had not learned English, as a boy. He alone of Ismail's sons was not sent to Europe for a part of his education.

I am, etc.,

THE WRITER OF THE NOTE.

Sept. 30.

## THE STATE OF SALONIKA.

*To the Editor of "The Near East."*

Sir,—The editorial comments on my letter of the 14th September, which was headed "The State of Salonika," in no way surprised me; in fact, they only confirmed my opinion that very little is known here of the true situation in the Near East. Either that; or for some reason the policy is to conceal it. One of the comments is that "financial stringency has been the main obstacle in regard to the rebuilding of Salonika." Now, sir, when I wrote that letter I had quite appreciated this factor; but maintain it would have been got over to a very considerable extent had it not been for the cupidity and short-sightedness of the Greek administration, who deemed it an opportunity, not to be missed, for further exploiting the already much overtaxed inhabitants. What happened? To begin with, these authorities at once expropriated the whole of the land of the burned-out area, appointed their own commissioners to value it, and then gave "scraps of paper," which were not negotiable, to the owners in payment thereof. No cash, only bonds which would have, at no fixed date, an uncertain value. To justify this drastic procedure, the reason was given that advantage must be taken of this wholesale destruction to rebuild the town on modern lines; and to show their earnestness in carrying this out, they secured the services of an eminent English architect, who went out to Salonika to study the requirements of the place, and to elaborate a plan for its reconstruction. This gentleman happened to be imbued with noble ideals and he, after mature study, evolved a scheme according to which Salonika was to become the "Pearl of the Aegean Sea," the rival of Paris in beauty, with wide boulevards, parks, gardens, squares, a university, underground tubes, etc., etc. One could imagine he had been inspired by visions of the old Greek divinities watching, from the heights of Mount Olympus across the bay, the rising, from its own ashes, of a glorified Salonika phoenix. Whether he also expected these same deities to shower gold upon the town to carry out these plans was never known; but the ordinary mortal was lost in amazement, wondering where the money would be found to carry out this gorgeous scheme. Naturally all this took time; and then the plans, after acceptance by Ministers, had to be submitted to the Greek Chambers, discussed, adjourned, and so on, in the usual eastern fashion. Meanwhile, the authorities had marked the building sites off into plots, some large, others small, according to the locality, upon which they set varying prices, apparently on the basis of what they estimated would be their value when the reconstruction of the town was finally completed. Of course, while all this was going on the original landowners, holders of these useless bonds, were living in temporary shanties, cellars, huts, tents, in fact anywhere they could. They were crying out for decent places in which to make their homes; but they had to be satisfied with promises of what the town would be at some future time, if only they had patience to wait for it. So things dragged on, and when the greatly modified plan, much pruned down, had been finally decided upon, the bond-holders and other buyers were invited to bid for the arbitrary lots fixed by the authorities. Many of these were too large for single buyers, others not suitable, all far too dear, so there was very little response to the invitation. Instead, as land was cheaper at the further end of the town, many turned their attention to that quarter and began to build there. This course, however, did not suit the views of the authorities, so they quickly put their veto on that, and absolutely prohibited all further building, in that direction, which was tantamunt to saying: if you will not buy our land, in the burned-out area, we will take good care you shall not build elsewhere. This was so flagrantly unjust, and there was such a great ontcry about it, that the Government had to rescind that order and allow building to go on outside; but the authorities only did so under many restrictions, and did all they could to hamper it. In the course of time there was a gleam of hope that the difficulties regarding the destroyed area were being overcome, that final schemes had been approved, and that at last it would be possible to begin the reconstruction of the stricken town. Then came the elections, and M. Venizelos with his Government had to go: his successors would have none of his works, and the upshot was that all the previous Government's legislation regarding the rebuilding of the town was formally annulled, and the whole question referred back for further examination. As far as I know, the new plans have not yet been finally passed by the Chamber, although over four years have elapsed since the fire.

Further, as regards finance, it must be remembered that very shortly after the fire the British Insurance Companies concerned sent our representatives who quickly settled all claims against them; so they were not a factor in the matter of delay.

One result of all this is that, in view of the hopeless outlook, all who can possibly do so are leaving the unfortunate place, for France, Italy, the United States, even Constantinople, in fact anywhere to get away from Greek mal-administration. I do not hesitate to say that if the old residents of Salonika could be polled they would joyfully vote for the return of the old Turkish régime, were it possible to revive it as it was some twenty years ago.

I am etc.,

A WANDERER.

Liverpool, October 1.

## SOME COPTIC CLERGY I HAVE KNOWN.

*(Being extracts from a paper read by Mr. T. D. Moscona at Manchester University on February 10, 1921.)*

*(Concluded).*

Foreign propaganda has been felt by the Copts. The Latin Church founded a Patriarchate with two archbishoprics for nearly 16,000 Copts who joined Rome. The American Mission has done a tremendous work towards the proselytism of Copts, as also has St. Mary's Church of England Mission in Cairo. And so the Coptic Press keeps writing about the need of reformation. The dogmas, rites and all that concerns the constitution of the National Church are to-day more or less exactly as laid down by the Monophysite reformers. The agitation mainly concerns the clergy and the revenues of the monasteries. It is a fact that the Coptic Clergy from the highest to the lowest are insufficiently educated. Of course thay know their three R's, at least in Arabic, but beyond this they are shamefully ignorant, and strange to say, many pastors of the Coptic Church are incapable of preaching, and employ a teacher of the school of Theology to preach on Sundays and other festivities, for which services thay receive a special bonus from the Patriarchate. The ignorance of the secular clergy is indescribable. In the provinces the Copts are very similar to the Mohammedan Fellaheen, and the priest is no better than his flock. Arabised for over thirteen centuries the Copts have lost all their national habits, but they have stuck to their religion. No one need be surprised at the Copt being uncommunicative by nature and rather sly and suspicious. Persecution has made him so. He and the Greek suffered much under Moslem rule in Egypt. Their churches and their Ethnarchs were burnt down or martyred very often; they were tracked as beasts, they were compelled to bear long wooden crosses suspended from their necks and horned masks on their faces. In 1080 A.D. Badr el Jammal, the Armenian renegade, a vizier of the Sultan of Egypt, swore to leave not a Christian Church in Egypt, and he would have kept his word if the Negus had not cautioned him that if Badr el Jammal executed his menace, he, the Negus, would send unto him broken stones of the Ka'aba in Mecca.

The ignorance to which I have referred reminds me of an amusing episode reported since in the Egyptian Press. A good old ignorant Coptic priest of Upper Egypt who knew not a word of Coptic except the parrot-like liturgical *euchologia*, suddenly discovered a papyrus which, he claimed, contained a prayer in Coptic against the calamities of war. As the Great War was then in full sway, that prayer was regularly recited every Sunday in the little village church, to the great edification of the congregation. Suddenly the inevitable happened. A Coptic scholar who attended the Liturgy was highly incensed and scandalised to hear the priest reading "the will of a Copt who died some four or five centuries ago in which he gave instructions as to his oxen and his cattle, his cows and his goats." The reading was of course discontinued.

When I left Alexandria for Cairo in 1915 I made friends with many Coptic churchmen at the Patriarchate, situated now at Haret el Nassara (the Christian quarter) and amongst others, I knew Abbot Peter Abd Ul Melik, the "Eminence Grise" of the Coptic Patriarch. Abbot Peter posed as a progressivist but I know he is not. Like his apostolic namesake he holds the keys of the Patriarchate and is very much respected and dreaded by every body. I saw only once His Blessedness, the Patriarch, through the kind invitation of my friend the late Prof. Dr. Claudius Bey Lebeeb, after permission was granted by the Eminence Grise. Cyril V. is now a centenarian. He was elected in 1869, succeeding Demetrius II. The venerable Patriarch received me very kindly. He was wearing a large violet turban and was listening to his reader who never leaves him alone for a minute.

In the early days of the Great War John Bishop of Godjam of the Abyssinian Church was expelled from Ethiopia by order of the notorious Aboona Mathew, "the King Maker" of Abyssinia. He sought refuge first among his own people and later on with the Greek Church. Bishop John was as I remember, a guest at the Greek Monastery of St. George, Old Cairo, and he used to denounce most vehemently his Coptic brethren. The Greek Patriarch tried to reconcile the rebel with his Church and John persisted in joining the Greek Church. As he was not accepted by the Greeks he was eagerly accepted by the Latin Church and is now, I think in Turin.

The Copts number nearly 1,000,000 throughout Egypt. They are intelligent and have proved to be good Government officials. During the recent political events in Egypt they sided with their Moslem countrymen "for the fear of the Jews." It is interesting to note that since Great Britain occupied Egypt the Copts have been more or less "enfants gatés" of the Residency, and have been better treated than the Arabs themselves.

The question of the Coptic Clergy has become very acute during these last few months owing to the famous trials of the turbulent priest, Marcus Sergius, and the Amba Basil, Metropolitan of Abutig, who was condemned to three years' seclusion in a convent because he dared to protest to the Patriarch against the abuses of the Church. There has been another scandal, the case of the Monks of the Moharrak Monastery against their Abbot, whom they accused of having prodigally spent the fortune of their wealthy monastery. The scandal was hushed up by the camarilla at the Patriarchate, and the Monks apologised and went penitent to the desert.

We therefore see that around the centenarian Patriarch the ambitions of his Metropolitans are turning incessantly. Johannes of Behera is ambitious and of an old school. Timotheus of Jerusalem has made himself known since the National movement, Basil of Abutig has dreamed of a revival of his church, Marcus of Esneh, Isaac of Beni Suef, Thomas of Minia, Severus of Sanabo, Joseph of Fayum and Theophilus of Manfalut sided with the Patriarch on the question of the veto against any Reform in the Church, Makarius of Assiut and Lucas of Keneh are progressivist, Pachomius of the Moharrak Convent acquired a reputation as the "Abbé Mitré of the Middle Ages," and as for Serapamon of Nubia his diocese is so far away that he does not count at all.

The Patriarch is a staunch partisan of the old things, as is his kinsman Abbot Peter, and thinks and sees only through the dark spectacles of his Eminence Grise. In the opinion of many of my Coptic friends, this state of things must necessarily endure until the time comes to elect a new Patriarch, and the Coptic Church has never been more in need of a strong Pastor of the type of the late Patriarch, Cyril IV., the predecessor of Demetrius and the actual Patriarch. Cyril IV. was not only ambitious but also a great reformer. He had dreamed of a United Greek and Coptic Church with himself as head of that Patriarchate. He was planning the fundamental reformation of the Coptic Church, when he died rather mysteriously. Nearly sixty years have passed since his death, and the truth may now be written:— This valiant Patriarch, the "Father of the Reform," as his people claim him to be, was dastardly poisoned by order of the then Khedive Said, who was afraid of Russian influence in Egypt, because it is an open secret that the idea of a United Orthodox Patriarchate in Egypt was due to the Archimandrite Porfyrii Uspenski, a great friend of Cyril IV., and an emissary of the Panslavist Movement in the East.

---

The Angora Assembly has conferred the rank of Marshal upon Mustapha Kemal Pasha, together with the title of "Ghazi" (victorious).

While allowing Bulgaria to enlist 13,000 gendarmes and frontier guards the Council of Ambassadors is asking the Government to formulate a scheme whereby no large reserves may be accumulated.

## MUSICAL NOTES.

### British Ballet.

Prominent amoug the signs that the impulse of British musical life is quickening is the marked taste for Ballet. This taste, it is true, was first cultivated and is still fostered by Society, but the movement towards the formation of British ballet has survived this unfortunate, though perhaps inevitable, experience, and is now well on its way to completion. During this month, indeed, a British ballet is to be performed at the Kingsway Theatre.

There are those who believe that all music can be interpreted choreographically, that in the various forms of the dance can be reproduced the thought of the music. For myself I do not go so far as this, but there is no doubt that the ballet is a pure form of art, just as, for instance, the cinema may be. On this subject there is in the recently published "Proceedings of the Musical Association" a very informing and readable article called "Why not British Ballet?" written by Mr. Mark E. Perugini. In his paper the author briefly sketches the history of the ballet, noting that the composite parts of the Ballet as we know it to-day–dancing, miming music, and *decor*–were really only amalgamated in the eighteenth century. He interestingly points out that though the Egyptians and the Greeks had mimetic dances, they had no Ballet in our modern sense—a distinct and developed form of theatrical spectacle—, and that though the Greeks brought to perfection the natural school of dancing, it is to the Romans that we chiefly owe the art of miming. On the fall of Rome dancing and miming of course suffered, for during the Dark and much of the Middle Ages there were no theatres; but later a revival of dancing came about, manifesting itself in the forms of the ballet-banquet, the masque, and the Court entertainments, which for the first time permitted the inclusion of women. Then in the eighteenth century came the popularisation of the art of Mime, doing away with the necessity for words; and since that time the Ballet has, off and on, been a fashionable indulgence. It will be easily remembered how in this country Queen Victoria in the 'forties made Ballet almost more popular than Opera, and how a rage for it was created by the opening of the Alhambra and the Empire in the 'eighties.

And still a British Ballet has not yet been founded, a ballet, that is, owing its inspiration to British dancers, musicians, and designers. Every foreigner recognises the genius of the British dancer; the material in fact has always been there; but it was not until the incomparable Russians came that the passion for Ballet as a form of art was awakened within us. Under the stimulus of such personalities as Kyasht, Pavlova, and Karsavina (to me the most glorious artist of all) English ballet-designers, dancing-masters, dancers, scenic artists and musicians have already accomplished much, though a perfect combination has not yet been achieved. Very certainly we have the dancers—one need only think of Phyllis Bedells—, and the musicians (*e.g.* Holst and Bliss), and the scenic artists: all that is needed is a fusion of these, and the consequent establishment of British Ballet upon a financial basis. It is with the keenest sympathy and attention, therefore, that Miss Marion Wilson's resuscitation of an old Mozart piece at the Kingsway Theatre will be watched.

To all those interested in this subject I cordially recommend Mr. Perugini's paper in the "Proceedings." He is justified in being perhaps a little diffident about the future of Ballet in this country, but, personally, I have have very strong hopes that this graceful form of theatrical production will usurp the places at present occupied by inane *revues* and sugary musical comedies, the continued co-existence of which with our certain musical progress in other ways is almost inconceivable.

### British Song.

The cause of English song is not yet satisfactorily proved, but it is in far better condition than would have been thought possible a year or so ago. This is due, not so much to the developed musical ability for appreciation of our audiences, as, first, to the persistent enthusiasm of a handful of artists, and secondly, to the enterprise of one or two publishers. Chief among the singers is Mr. John Coates, who untiringly proclaims his belief in the value of English song-writers. There is no singer who more intimately than he enters into the spirit of each song he sings; and it is fair, therefore, to measure through his interpretation the worth of the new songs he brings forward. In a series of recitals at Chelsea Town Hall he is introducing many new settings; and though his scheme does not permit of any one recital being a complete artistic success—excellent English songs are not sufficiently numerous for that, and there must be some that fall short of greatness—his work should be judged as propaganda and lauded as such. To praise Mr. Coates' own personal artistry is superfluous; all the singer's meed is his, and he should now be considered as a prophet.

His last recital, on September 29, was divided into four groups of five songs each, representing twenty different composers. All of these were removed, but some not so very far, from the ballad type, the shadow of which still heavily stalks our composers. Of this impermanent, really undesirable sort were such songs as Harold Samuel's "Oh, my swetynge," Frederic Austin's "My dear Mistress," and Balfour Gardiner's "Winter." Others again in a conscious effort at originality showed more cleverness than anything else, they had many points and much evidence of cerebral ability, but their greatest merits were technical. Of such were C. B. Rootham's "Everyone Sang," Felix White's "The Theft," and Eric Fogg's "Broken Tryst." And finally these were the songs which really counted, such songs as give one absolute confidence in the future of British song-writing. One of these was the late Denis Browne's "To Gratiana dancing and singing." Denis Browne was killed at Gallipoli, and it would seem that in him and George Butterworth we lost two of our finest song-writers. This song, with a magnificently rhythmical melody and a richly chorded accompaniment, was recognised by the discerning as one of uncommon merit when first it was sung by Mr. Steuart Wilson at one of his recitals; and why it should still be in M.S. is a lamentable mystery. Another great song of which Mr. Coates gave a first performance was Owen Mase's "There is no more to say." Of this young composer's ability there is no question at all; his treatment of one of Bliss Carmen's Sappho Lyrics has the impressive mark of genius in it. With but a bare, chill background of discord in the pianoforte accompaniment, the voice sings, unsupported for the most part, sorrowfully sustained phrases of sombre beauty. It is a thousand pities that this song, which to me was the most memorable of all the evening, cannot, owing to a question of copyright, be published. Mr. Coates sang these two difficult songs admirably, but perhaps he was his own perfect, unsurpassable self only in the lighter things, like Walter Whittaker's "Diaphenia," a rarely finished, quasi-mock setting of Henry Constable's words.

Mr .Coate's next English song recital will be given at Chelsea Town Hall on October 18, when his programme will be drawn from twenty more contemporary composers.

ANDANTE.

## FLYING IN MESOPOTAMIA.

**"In the Clouds above Baghdad; Being the Records of an Airman Commander." By Lt. Col. J. E. Tennant, D.S.O., M.C, (London; Cecil Palmer.)**

This is a war book, but we can safely say that it is not at all likely to bore any readers. When it came into our hands we were suffering from a surfeit of war impressions and war records, aud we put it by for future reading. We have read it now, and have enjoyed it thoroughly. The author saw Mesopotamia from—literally from— a new angle and he gives us a very graphic account of what he saw, of the fighting in which he and his command took part and of the experiences that befell him by the way. In places the book is as exciting as any fiction could possibly be; and high though our opinion of our flying men was before the we read it, it is now higher than ever. Mesopotamia, we know, was not unduly favoured in the matter of flying machines, but this book shows us how the R.F.C. rose above all difficulties and how it asserted its superiority to the enemy's service. At the same time it does justice to the other side; and it seems that in Mesopotamia, as elsewhere, the feeling between our own flying men and the enemy's was much better than that between the surface forces —if we may so describe them.

The first thing that most people learn about Mesopotamia is that it has one of the hottest climates in the world, and this belief is by no means disturbed by Colonel Tennant's pages. He tells us that, "as usual, the British troops withstood the climate and trying conditions far better than the Indians, who went down like flies;" but with the thermometer standing "well over 130 degs. Fahr, during the day" within the tents, and apparently running much over that in the open at times, it is not wonderful that the many hospitals were filled with cases of heat-stroke, and that the hospital ships went out full every voyage. In an early chapter we read :—

> While the weather was still hot aerial work during the day was limited to the early hours, for the late afternoon was as hot as midday till the sun went down; then it was dark. Cooler air was not to be found under an altitude of 3,000 feet, and little difference could be felt much under 5,000 feet. Flying in the night one would start in fairly cool atmosphere, but on reaching 500 feet one entered the hot air of the day. It was a curious phenomenon; the belt of hot air on the ground during the day rose up at night, being lighter than the air cooled by the radiation of the earth. . . . . After service in France, it was odd to see a pilot going off for a long flight dressed only in shorts, stockings, and shirt, with a helmet bound down on his head, for at 5,000 feet the sun's rays are as fierce as on the ground.

Later we read of night flights taken on purpose to get some relief from the still, close heat of the earth, and when we came to the real business we find mention of trouble with the radiators, and seizing up of the engines again and again. Thus, on page 142, and 143 we read :—

> Heat was beginning to restrict the performance of aeroplanes. . . . . Those without special radiators were now no use and out of action, as the water boiled away even if flown at dawn. It was a gamble how long the Bristol Scouts would last; they were already coming down with "blued" cylinders, and making forced landings with pistons seized.

and there are very many passages of the same character. Moreover the flying men themselves felt the heat and were put out of action by it almost as much and as often as their machines. Here is a description of what befell No. 63 Squadron, when it reached Basrah, in the very trying month of August.

> Till they arrived in port the health of the squadron had been excellent, but the Busrah climate immediately drove 50 per cent. into hospital; two died of heat-stroke within the first few days. They were a well-trained crowd, mostly air veterans from the Western Front, and they arrived with a morale superb, ready to finish the war. But climate had been out of their reckoning, and by the time I arrived the remaining half had mostly succumbed. This remnant was lying on its back at Aircraft Park, and even those who could stand up were badly shaken. I had feared such a débacle. Busrah was doing its damnedest to destroy humanity. At the Aircraft Park there were about sufficient left to make up the funeral parties in the evening. I spent the whole of one afternoon rubbing C., a new pilot, with ice from the chest that kept the soda-water cool. He had rolled over with heat-stroke while taking an afternoon siesta. We pulled him round just before the last small lump of ice melted away.

That passage gives some idea of what Basrah *can* do in the way of heat, and, we may add, of what manner of commander, Colonel Tennant was. When he himself went sick, we may note, and was ordered "down river," he contrived to recuperate on "a brew of rice water" which "must have been good;" and promptly returned to the front.

Of the reconnaissance work and the actual fighting we need here say nothing more than that they are dealt with in very interesting fashion by the author. His description of the capture of Baghdad is clear and vivid —notably the part in which he refers to the Loyal North Lancashires' gallant deed at the Diala crossing; and we like well the account of the fighting at Ramadi, when General Brooking won such a complete victory. The narrative of events following is also very well done. The devotion with which the airmen did their duty is clear throughout the book, but the reader is not bored with technical details. In this connection we may note the illustrations, which are an admirable feature of the volume. Some of them, notably the air-view of Samarra, at page 151, suggest that aerial photography will be found extremely useful to the archaeological excavator.

The author is generous in his praise of others, though so modest about his own achievements. His admiration of and affection for that fine soldier, General Maude, will warm the heart of many readers, and his references to the part played by the Navy in this theatre of the war show all the true Englishman's love of the senior service. He is, too, an admirer of Colonel Leachman, of whom he writes: "His prestige was amazing, and his name known to every Bedouin from Aden to Mosul." We could wish, by the way, that Colonel Tennant had not fallen into the common error of using 'Bedouin' as a singular and making the plural by adding an s. Even the Arabs, who come in for so much abuse from some writers on Mesopotamia, get a good word for their virility (p. 231), though the compliment may be only for the people of Nejef. The praise of the little Armenian girl, about 14 years old, who was found in the hospital at Baghdad, the sole person, apparently, looking after the wretched Turkish wounded, is surely well merited—"this gallant little soul had been a godmother to the wretched men since the Turkish medical staff had packed up and left them to their fate."

We have left ourselves no space to refer to a score of things we should like to mention, but we must give two more short quotations. The first refers to the arrival of one of our airmen in Teheran :—

> The natives of Teheran could not understand that the aeroplane itself was the means of flight, but thought it only the carriage to sit in, and that the propeller merely acted as a fan to keep the airman cool while he exerted himself with some hidden wings, which they were very intent to discover on the person of the pilot.

The second is an unsolicited testimonial, in the form of a Turkish message which fell into our hands, and ran :—

> "The German aviator told me that he could not report clearly on the body of troops north of Samarra this morning, as the fire of the British Anti-Aircraft was heavy and accurate."

On which our author comments: "One can imagine the reception afforded to the British petrol who would volunteer such a report!" Indeed, pilots who went through experiences such as are to be found in plenty recorded in this book would be unlikely to submit any report of the kind.

## PERSONAL AND GENERAL.

**To-day.**
October 6. (New Style).
September 23 (Old Style).
Safar 4, 1340 A.H. of the Moslem Calendar.
Tishri 4, 5682 of the Jewish Calendar.

Princess Bibesco returned to London from Paris by air on September 30.

Lord and Lady Islington have returned to town from Lennoxlove, Haddingtonshire.

Lady Oranmore and Browne arrived in London last week from Sunningdale for a short visit.

The Persian Minister left London on October 1 for Paris to meet the Persian Crown Prince.

M. Gennadius, formerly Greek Minister, and Madame Gennadius have left London for Versailles.

Sir John Norton Griffiths, M.P., and Miss Norton Griffiths sailed for Brazil on the s.s. Almanzora.

The Hon. W. A. F. Erskine, M.V.O., the newly-appointed British Minister at Sofia, has left for Bulgaria.

Sir Charles Stewart-Wilson, K.C.I.E., has arrived in England from Bulgaria.

M. Petrow-Tchomakoff, First Secretary to the Bulgarian Legation, arrived in London last week from the country.

The Senate of the Calcutta University has agreed to confer on the Prince of Wales the honorary degree of Doctor of Laws.

Our Smyrna Correspondent writes (September 25):—Mr. Edwyn Hole returning from leave has resumed his duties in the Smyrna Consulate-General.

Admiral Sir John de Robeck arrived in Bucharest on September 26, and proceeded to Sinaia to wait upon the King and Queen of Roumania.

Our Zagreb Correspondent writes (September 21):—2nd.-Lieut. Flora Sandes has returned from her tour in Australia and resumed her military duties with the 2nd Infantry Regiment in the Belgrade garrison.

The Greek Minister and Madame Rangabé returned to 51, Upper Brook-street, last week from The Birches, Penshurst, where they have been staying the summer.

The Rev. D. R. Mitchell, Minister of St. Andrew's Church, Alexandria, and Consular Chaplain, who has been in England during the summer, has returned to Egypt.

M. Také Jonescu, Roumanian Foreign Minister, was expected to pay a flying visit to London this week. He was due to arrive on Tuesday and to leave the country on the following day.

The Very Rev. C. Pagonis, the Great Archimandrite of the Greek Church, has removed to St. Sophia's Vicarage, Moscow-road, W.2., which is henceforth his permanent address.

Madame Stancioff, wife of the Bulgarian Minister, has returned to London from Haute-Savoie, France, where she has been staying with her brother, the Comte de Grenaud.

The engagement is announced of Charles William Gibbon, youngest son of Mr. and Mrs. Charles Gibbon, of Wattegama, Ceylon, and Gladys Bergg, daughter of the late Thomas R. Bergg and Mrs. Bergg, of Eastbourne, Sussex.

The marriage was celebrated on September 23, at St. Thomas's Cathedral, Bombay, between Wilfred Philip Barron, Assoc.M.Inst.C.E., Chittagong, and Dorothy, elder daughter of Mr. and Mrs. Cunliffe Shepherd, Ranworth Hall, Norfolk.

A marriage has been arranged, and will take place at All Saints' Cathedral, Allahabad, on October 17, between Cyril, only son of Major W. H. Newham, O.B.E., T.D., late R.A.S.C., and Elaine, only daughter of Bertram H. Burton, Indian Police, U.P.

At the Greek Church, Moscow-road, Bayswater, on September 29, the christening of the infant daughter of M. Dimitri Bikelas, Secretary to the Greek Legation, and Madame Bikelas, took place. The Great Archimandrite, Dr. Pagonis, performed the rite. The child receive the name of Patricia.

A grandson was born to the Maharaj Rana of Jhalawar at Oxford on September 28. His Highness is now with his son, the heir apparent, and his daughter-in-law at Oxford, where they have been residing since October last. This is the first case of an Indian Prince of Rajput family being born in England.

The Garden Cities and Town Planning Association have arranged a series of illustrated lectures on the great cities of the world at King's College, Strand. The first lecture will be given by Professor Patrick Geddes on Thursday, October 13, at half-past five o'clock. His subject will be "The City of Jerusalem."

The E.E.F. Staff Dinner Club announce a dinner for all Staff Officers and Officers attached staffs G.H.Q., Corps, Div., Brig., Force in Egypt, and the Hejaz, from July 31, 1917, to July 31, 1919. Field-Marshal Viscount Allenby will preside at the dinner, which will be held on Wednesday, October 12, at 7.15 for 7.45 p.m.

The marriage was celebrated on September 24 at the Parish Church, Moffat, by the Rev. Wellwood Landale, M.A. (cousin of the bride), between Leslie Gwatkin Williams, C.M.G., D.S.O., Lieut.-Col., 5th Cavalry, Indian Army, and Helen Mary (*nee* Landale), widow of Dr. W. B. Grandage, 74, Gloucester Road, London, S.W.

The passengers who will leave Marseilles in the P. and O. s.s. Caledonia on October 9, for Alexandria include the Bishop of Jerusalem, Sir W. and Lady Willcocks, Brigadier-General R. B. D. and Mrs. Blakeney, Mr. Justice and Mrs. Cator, Mr. Justice Fleming, Mr. Justice Vaux, Sir W. and Lady Taylor, Mr. Justice Van Horne, and Mr. Justice Hill.

---

An American Correspondent writes:—Mr. Roland L'E Bryce, formerly Secretary of the British Legation at Belgrade and Secretary-General of the Carinthia Plebiscite Commission, is visiting America with his uncle, Viscount Bryce. They have been staying in Massachusetts with Mr. Hamilton Fish Armstrong, at one time Military Attaché at the American Legation Belgrade.

---

The marriage took place on September 29, of Captain Herbert Pease, D.S.O., Durham Light Infantry, a kinsman of Lord Gainford, and the Hon. Cynthia Chaloner, third daughter of Lord and Lady Gisborough, of Gisboro' Hall, Guisborough. The Rev. the Marquiss of Normanby and the Rev. H. E. Hubbard were the officiating clergy. Lord Gisborough gave away his daughter. She was attended by her sisters, the Hon. Ursula and the Hon Elizabeth Chaloner, and the Hon. Eileen Plunket, Miss Wharton, Miss Margaret Stillwell, Miss M. Drake, Miss Rachel Pease, Miss Margaret Bruce Chaloner, and Miss Helen Medlicott. The bridegroom's brother, Mr. Rivers Pease, M.C., was best man. A guard of honour was formed by the local troop of Boy Scouts. Those invited to the ceremony included, among many others: The Marquess and Marchioness of Zetland, Lord and Lady Southampton, Captain the Hon. Eric and Mrs. Long, Sir Alfred and Lady Pease, Mr. and Mrs. Pike Pease, Lieutenant-Colonel George Gibbs, M.P., and Miss Gibbs, Lieutenant-Colonel and Mrs. William Long, Mr. Robert Mond, Mr. and Mrs. Whitley, and Mr. and Mrs. C. Peel.

---

The Queen of Roumania, with Princess Marie and Princess Helen of Roumania (the former of whom, according to Roumanian custom, gave away the bride), was present at the marriage on Sunday at Manastirie, Sinaia, Roumania, of Captain Philip George Bateman, London Irish Rifles and Royal Air Force, son of the late Dr. A. G. Bateman and of Mrs. Bateman, of 7, Queen Anne-street, W., and Mademoiselle Marie-Louise Blanc, eldest daughter of Mme. Irène Procopiu, lady-in-waiting to the Queen of Roumania, and of the late M. Louis Blanc. M. Misu, late Roumanian Minister in London, was best man. The Staritz Dionisie, Superior of the Monastery of Sinaia, officiated. The bride was attended by Mlle. Alice Cantacuzène, Mlle. Colette Blanc, Miss Dorothy Hibbard, Mlle. Lily Misu, Mlle. Rodica Hurmuzescu, Mlle. Irène Pherikidi, and Mlle. Dina Berindei, Mlle. Lila Procopiu carried the bride's train. After a reception held at the Villa Caprita, Sinaia, the bride and bridegroom left for Constantiniople, where the honeymoon will be spent. Those present at the marriage, which was attended by almost all the members of the diplomatic corps in Roumania, included among others: Signor Martin-Franklin (Italian Minister of Bucharest), and Signora Martin-Franklin, Mme. Lahovary (lady-in-waiting to the Queen of Roumania), Princess Nadige Stirberg, Mr. and Mrs. Boxhall, Count and Countess Tchikowsky, Mme. Marie Barindei, Mme. Radu Costinesco, Mlle. Adèle Cantemir (lady-in-waiting to Princess Marie of Roumania), and Count and Countess Quarnata di Zulino.

---

## APPOINTMENTS & PROMOTIONS

M. Vladimir Milanovitch has been promoted to First Secretary of the Legation of the Kingdom of Serbs, Croats, and Slovenes.

Captain F. Burnett, M.C., has been appointed a Divisional Agricultural Officer in the Department of Agriculture, Ceylon.

---

Major Victor Frendo Azopardi, LL.D., has been appointed a member of the Executive Council, and an official member of the Council of Government of the Island of Malta.

---

Our Cyprus Correspondent writes (September 20):—Lt.-Col. A. C. Tompkins has been appointed Commissioner of Papho: and Captain A. M. Fleury, Commissioner of Famagusta.

---

Captain Wardle, who has been selected as chief of staff to Rear-Admiral Aubrey Smith, head of the British Naval Mission to Greece, joined the Naval Intelligence Division at the Admiralty on October, for one month's service before proceeding to Athens.

---

El Lewa R. M. Feilden Pasha, C.B.E., Civil Secretary Sudan Government, has retired on pension. He was appointed Civil Secretary in 1917, and has filled the position with marked success. He joined the service in 1904, as Junior Inspector, Red Sea Province, and has been Assistant Civil Secretary, Senior Inspector and Governor of Bahr el-Ghazal Province.

---

Professor Edward Driault, who has been commissioned by the Greek Government and the French Govermnent to write a History of Greece from 1821 to 1925 from diplomatic sources and Government archives, has returned to France after a stay of several weeks in London during which he has been studying the State records bearing on the subject. M. Driault, who is Professor of History at the Lycée de Versailles and l'Ecole Normale Superieure de St. Cloud, and is well known as the author of "La Question d' Orient" published in 1898, and now in its eighth edition, will deliver this winter at the Sorbonne, a public course of lectures on the history of Greek Independence.

---

## OBITUARY

The death is announced of Mr. Henry Adair Richardson, for many years chairman of the Anglo-Egyptian Bank, only surviving son of the late Mr. William Richardson, M.R.C.P. of London and Tunbridge Wells. By his death the only two living near relatives (on his father's side) of John Ruskin are Mrs. Ruskin Wolseley, of Steyning, and her sister.

## GREECE AND THE LARGER OUTLOOK.

Disappointment, it is to be feared, is in store for the Greeks, and it is from a desire to see the blow mitigated that we would urge them to adopt a wider outlook than they have been accustomed to in the past. With this wider outlook not only will their disappointment pass, but they will also find in it an incentive to greater things than they have achieved before. No bitterness exceeds that which attends superfluous sacrifice. From a purely military point of view the Anatolian campaign has added lustre to the Greek arms; the advance to the Sakaria River was a triumph of strategy, organisation, and endurance: the battle for Angora marked the limit of the possible, and the Greek authorities very rightly decided to withdraw to the Eskishehir district. Their duty to-day, as they conceive it, is to hearten their own people, to intimidate the Turks and generally for their own sakes to make the worse appear the better cause. Hence the announcement of the permanent occupation of a large expanse of Turkish territory and the preparations for its administration. In the meantime the Allied Governments will be approached, and quite sincerely, with genuine conviction, every available argument will be marshalled to prove to them that there is no other possible solution of the Turkish question than the Greek method. The arguments, we believe, will carry no weight with the Entente, and Greece will be called upon to abandon territory that she has come to regard as her own by inalienable right. The blow must be a severe one, and it is because in such circumstances anything may happen, that we would fain have the Greek nation, as becomes a people who rightly aspire to play a role in the world, face the situation betimes, and make up its mind that only good shall come out of it. Unfortunately the difficulties of the position are enhanced by the unjust treatment to which Greece has been subjected by the Allied Powers. King Constantine's Government ought not to have to regard the Allies as hostile; but if they are otherwise, it may well urge that they have a peculiar way of showing friendliness. The settlement in Asia Minor which will now have to be imposed will be held in Greece to have been dictated by personal spite against King Constantine and the present regime, whereas a loftier conception on the part of the Supreme Council of its duties and responsibilities since the King's return would have helped the Greeks to acquire a sense of solidarity with the new order of things in Europe in sacrificing their aspirations in Asia Minor.

Greece, in effect, will have to assimilate the lesson that has already been acted upon by Great Britain. Just as the British, as a result of war in which they have been victorious, have had to modify their views in regard to India, Egypt, and Mesopotamia, to say nothing of events in Ireland, so the Greeks must prepare themselves for a revision of pre-war standards and prejudices. Nothing can alter the Turkish past or the world's judgment of it; but one effect of the Great War has been to impose the necessity of a fresh start throughout the world, and the countries that kick against the obligation may gratify their *amour propre* for a season, but will certainly pay heavily for the mistake hereafter. The Greeks themselves repudiate all imperialistic designs and in their Asia Minor policy are concerned only to save their nationals from oppression and the blight of Turkish rule. Before the war it would have been reasonable to contend that the only way of achieving this end was by removing the Christian populations from Ottoman jurisdiction. To-day this policy, in common parlance, will not work. It is of no use for Greece to contend that it will. While she is trying to prove her point, a large part of the world, containing some two hundred million Moslems, is seething with unrest; the bulk of trouble, entailing heavy expenditure and loss of life, falls upon the British Empire. The question, therefore, which responsible statesmen in Athens, and the Greek people as a whole, have to answer is whether it is reasonable to expect that the Allied Powers should continue to bear indefinitely the brunt of the Greek experiment when an easier solution offers itself. For the moment the strain on Greece imposed by her own method and the ultimate benefit accruing to her from the alternative policy may be left out of account. The easier solution is to admit the existence of the new spirit pulsating through the peoples of the world, as Great Britain is doing in the case of India, Egypt and elsewhere. The Turks are satisfied that they can do better as an independent nation than they have done in the past; they are prepared to fight for their belief, and circumstances enable them to embroil the world to an extent that renders Greece's valour and good intentions of no avail. They must be given their chance of proving their point or of having its fallacy established above all challenge. If the Greeks urge that the risk to their nationals is too great, they must be reminded that the same risk is being run by others in India and Egypt. Should the new order in any of the countries where it is introduced, Turkey included, endanger life and prosperity, there will be such an overwhelming case for its suppression that the task will labour under none of the disabilities which make it impossible to-day.

The problem of Greek as well as of Allied statesmanship is to look facts in the face. Much heartburning will be caused by the process. The Entente Powers will have to scrap the false foundation on which they erected the Treaty of Sèvres; Greece must sacrifice some cherished aspirations. We hope and believe that she will go farther, and will convince the Turks that she is prepared not only to give them every chance to make good, but also to assist them, if they will accept her co-operation. Smyrna as an autonomous State, under a joint Greco-Turkish administration, can become the radial centre of this co-operation, and will indicate to the new Turkey how she can encourage to the full for her own benefit the business instincts of the Greeks without impairing her independence and integrity. The new role admittedly implies a new spirit in Greece, or rather the resumption of the old spirit, submerged under centuries of foreign dominion, that made her twenty-five centuries ago a pioneer of civilisation. Her scope to-day covers almost the same ground., for who can doubt that, if she assumes her new responsibilities towards Turkey, she will give a lead which every Balkan State will feel obliged to follow. Her services to Turkey can be duplicated for Albania, where the Greek-speaking Albanian can be encouraged to place his ability with undivided loyalty at the disposal of the young State. This policy will bring peace to the northern frontier of Albania more effectually than a mere demarcation of territory imposed by the Ambassadors' Conference. For neither Yugoslavia, in regard to Albania or Bulgaria, nor Roumania, in the case of the Dobruja, will deliberately adhere to the traditional methods of the Balkans when Greece with a larger outlook has shown them the way with a better plan.

## THE SLOVENES.

*By our Zagreb Correspondent.*

Of the three branches of the Kingdom of the Serbs, Croats and Slovenes, it is the last who are the least known in Europe, although they are the most westerly of the Southern Slavs, have been for the longest time exposed to the influence of German and Italian civilization, have absorbed more than the others Western influence and have become essentially Europeans. But they have preserved their national identity, consciousness and language.

The name "Sloven" in Serbo-Croat means "Slav" in the wide sense. The Slovaks, who are nearest in every way to the Czechs call themselves "Sloveni." But the people whom we call Slovens, and the Germans, until recently, Weden, are "Sloventsi," and their language is "Slovenacki." This is the most nearly allied language to Serbo-Croat, but yet is quite distinct, and the two tongues are only to a moderate degree mutually intelligible. Slovenish contains many archaic forms, such as the dual number, for paired objects, which is completely declined in the substantive and conjugated verb. Other archaisms of form and structure there are which have disappeared from Serbo-Croat, such as the persistence of the "v" for "u" and the final -l of the past participle; but many of these have been preserved too in Macedonian.

The Slovenes have never been exposed to the influence either of Byzantium or of the Turks. Their language is free from orientalisms, which are numerous even in Croat, and very much so in Serb, especially in the southern dialects. Old Greek writers do not refer to them. They are, in fact, in no way a Balkan people, but intimately associated with Central European history. In Zagreb even, a *kranjec*, or Carniolan, is regarded as essentially a representative of European civilization.

The first we hear of them is from Lombard sources, in the latter part of the VIth Century, when they were surrounded by three powerful, military and numerous peoples, the Lombards, Bavarians, both Teutonic, and the Avars, who were Turanians. Until the middle of the VIIth Century they were subject to the last, the only Asiatic influence to which they have been exposed, of which no trace has survived. We next hear of them invading Istria in company with the Avars and Lombards, their allies for booty alone, but the Slovenes for purposes of colonisation. Many settled in that rocky peninsula, and some overflowed into Lombard country, into the Friuli and eventually became absorbed into the Friulian Italians. They helped the Lombard king Agilulf to take Cremona, but remained in a state of permanent hostility to the Bavarians. We read that Raduald, Duke of Benevento, a Lombard, could talk with the Slovenes in their own tongue. For many years there was intermittent fighting between them and the Lombards, and by the early part of the VIIIth Century, large numbers had permanently settled in Lombard Friuli. About 740 they called in the help of the Bavarians against the Avars, but, as their numbers were inferior, the Bavarians took them for themselves and nominated their princes. Hotimir, who died in 770, and had been educated in Bavaria, was the first to accept Christianity. By the end of that century the country was practically Christianised throughout, and brought under the Archbishopric of Salzburg, which, of course, brought them more than ever under German influence and tended to destroy their national character. By the beginning of the IXth Century, all the Slovenes, including even those settled in Istria, were brought within the Frankish Empire. They had a degree of autonomy under native rulers for a few years, but from 861 onwards they lived permanently under a foreign ruler, and became simply "cannon-fodder" for the Germans, ceasing to have any further history of their own.

The people were scattered in the Friuli country, in Istria, and so far north as the southern parts of the Tirol and of Upper Austria, where they were soon absorbed by the Germans; but the main mass were, and still are, in the three provinces of Korushka, or Carinthia, Krajnska or Carniola and Shtejersja or Styria. Korushka, the German Karnthen, is a corruption of the Latin name Carnatania, said by Shafarik to be derived from the Keltic *karn* and *tan*, that is, the Rocky Land, for it is known that two Keltic tribes, the Taurisci and Norici, formerly inhabited this country. Kranjska is also from the Keltic *karn*, a rock, which we find in our British *cairn*, or else from a Keltic tribe called Karni. The name Shtejerska, Styria, must be derived from the little river Steyer, a name the origin of which is unknown and may be connected with our equally unknown and ancient river name Stour. At present the Slovenes inhabit only the lower portion of Styria, but a thousand years ago they overflowed the northern borders into Austria.

In the early Middle Ages, the Slovenes extended away into Hungary and formed a direct connection with the Czechs and Slovaks. Their intellectual centre was Blatni Grad, the City by the Lake, the Blatno Jezero, shown on our pre-war maps as Lake Balaton or Platten See, to-day an essentially Magyar country. The Hungarians swamped them out and absorbed them in the XIth Century, but no Slav can forget that it was here that St. Cyril and St. Methodius translated the Scriptures into the ancient Pannonian Slavonic tongue, of which Slovene is the direct descendant.

Slovenia is a mountain country, with beautiful scenery, lakes, forests and Alps; the people are industrious and hard-working. They are as pure a Slav type, probably, as could be found. Big-boned men, fair or reddish, with blue eyes and prominent cheek-bones are common. They are one of the few Slav groups who make good domestic servants. Agriculture is well developed, but it is not the vital element in their lives that it is in the alluvial districts; they are more industrial, engaged in mining, especially for coal and mercury. The people are thoroughly civilised, preseverings to a degree of obstinacy, a feature which has enabled them to retain their individuality in the teeth of the Germanisation of the country through so many centuries.

Their boundary runs down eastwards almost to Samobor, a popular resort near Zagreb. They are connected with the true Croats through the Zagortsi, the *kaj*-speaking natives of the three countries of Zagreb, Varazhdin and Krizhevtsi. This district, smiling and densely populated, was the home of the old Croatian aristocracy, conservative to a degree, which has been so delightfully described by Djalski. In temperament, generous hospitality, "broad-breastedness" and in true *joie de vivre* this conservative old nobility resembled the Serbs of the Shumadia and Podrinje, but they died out during the last century. The peasants or *muzhi* of the Zagorje, are industrious, rather obstinate, but docile folk, very friendly once their confidence has been

Digitized by Google

gained. Jagitch, the greatest modern Slavonic philologist, is a Zagorats. Their dialect more closely resembles Slovenish, but the Zagortsi consider themselves the very elect of the Croats, though the home of the historical Croats is further to the south and nearer to the sea.

After being exposed for a thousand years to systematic Germanisation and foreign rule, it is remarkable that the Slovenes have any vestige of national feeling left. But it received a tremendous impulse from the invasion by the French in the Napoleonic wars, who recognised their language and issued proclamations in it. The national movement became vigorous, and Liubliana became the seat of a widespread system of espionage and merciless repression from the Austrians, as it was the heart of the Illyrian movement, the precursor of the Yugoslav gospel. It produced such philologists, which in this case means patriots, as Kopitar and Miklositch. The intellectual impulse became irresistible. The Slovenes had learnt method and organisation from the hated Germans, and applied it to their own cause. They followed Serbian progress with the most intense interest, helped in every way possible, thus drawing on their head vials of wrath from Vienna, and looked to Serbia as the Piedmont of the Yugoslav cause. Too few in numbers to stand alone in the pincers between the Germans on the north and the Italians on the south, they looked to the Serbs for the great liberation, in which they joined with enthusiasm, and contributed their many fine qualities to the common cause.

## PRESS ON THE NEAR EAST

### The Anatolian War.

The Special Constantinople Correspondent of the *Manchester Guardian* gives, in the issue of that journal for September 23, his impressions of Greece at war. Generally he found the Greek country people puzzled over the situation: they believed in their many victories, but why was there no end to the war? Further, they were uneasy over the fall in the value of the drachma; and the writer speculates upon the result which the possession of fuller information will have upon the Greeks:—

When the truth is known (and the Government cannot conceal it for long) I still do not think that there will be a revolution in Greece, but I do prophesy with some confidence that the Greek public will be more inclined towards peace (even a peace involving the evacuation of Anatolia) than it has been since the failure of the March offensive—or, in fact, than it has been at all, for after March there was still all the summer in which to try again, while now the winter is near, the drachma is lower, and unhappily many more young men are disabled or dead. In fact, the moment is as favourable now for mediation by the Powers as it has been unfavourable during the latter part of the summer.

And, as far as Great Britain is concerned, it is high time that we cleared up our position. In every Greek village, as in every battalion and battery that I have visited, I find the same conviction that Greece has not only our moral backing but our secret assistance. "If Great Britain had not supported us we should have been lost months ago." "You are not assisting us? Then where do all these munitions and lorries come from and all the money? We are a poor country, they can't be ours." "You are going to let us enter Constantinople, aren't you? You say no? Your Government declares that it will resist us? Oh, we know you English. We know that that is only your little joke—dust in the eyes of our friends the French. We know you will let us through." Everywhere the English traveller in Greece is embarrassed by such pronouncements, and still more by the kindness and hospitality which the genuine conviction behind them calls out. There is no doubt that the conviction is genuine, and that, more than anything else, it is encouraging the Greeks to carry on the war.

To put our conduct at its best, we have been culpably negligent in failing to undeceive them. At its worst, we have landed them as well as the Turks, in a slough of confusion and suffering from which it is our business to help both nations to find an issue. Now is the moment for us to build a bridge, and we have the materials for a golden one. On grounds of statistics and self-determination Cyprus ought to be a part of Greece, as Western Anatolia ought to be a part of Turkey. It is notorious that the Greeks of Cyprus (three-quarters or more of the whole population) desire union with Greece as strongly as the Turks of the Aidin vilayet desire reunion with Turkey. Let us put Cyprus into the pool and take an active hand promptly in the long-overdue settlement of this miserable Graeco-Turkish war.

Writing under the same heading in the *Fortnightly Review* for September Mr. H. Charles Woods traces the recent history of events up to the Anatolian War, and having looked at the position form all sides, he gives his views upon the possible grounds upon which the Western Powers might intervene:—

Although the Near East is an area in which the unexpected generally occurs, no such article as this would be complete without brief reference to a possible basis for ultimate mediation and to the kind of terms by which the present war may be terminated. In this connection I think that two conditions should be excluded. Firstly, to whatever degree one may be critical of the post-war distribution of what was formerly Turkey in Europe, it appears to me impracticable that there can be any immediate change in the status of Eastern Thrace. Such a change would not only be resisted by Greece, but it would also be opposed by Roumania and by Jugo-Slavia on account of its probable bearing upon the stability of the Treaty of Neuilly. And, secondly, however unsatisfactory the maintenance of the Turks at Constantinople may be considered by some people, this is in fact the least objectionable settlement of a very complicated problem, and as such it must not be upset either by handing over that city to Greece or by appointing her a sort of mandatory for the protection of the freedom of the Straits. This said, much as I have been opposed to Hellenic expansion into Asia Minor—an expansion as dangerous to Greece as to Turkey—I recognise that a definite and far-reaching victory by the former country would of necessity change the position and entitle her to advantages which otherwise might not have been hers. Hence, whilst I still feel that in any eventuality King Constantine would be well advised to adopt an attitude of strict moderation upon territorial questions, it is obvious that this ruler would lay claim to the maintenance of many of the principles of the Treaty of Sèvres, if not to the very letter of that document itself. For example, whatever might be the exact line of demarcation between Ottoman and Greek territory, adequate safeguards would surely be demanded for the protection of the Ottoman Christians. In addition, even if the Greeks were prepared, some months ago, to consent to an augmentation in the strength of the armed forces of Turkey, such consent would hardly again be forthcoming, considering what has since taken place. And, lastly, although it seems difficult to see from what quarter compensation can be anticipated, it is not unnatural that Greece should endeavour to save herself from the necessity of bearing the military expense of operations for which she disclaims all responsibility—operations which she contends have been carried out largely in the interests of the Allies as a whole.

### The Near East.

*The Times* of September 27, in an article called "The Tangle of the Near East," lays stress on the fact that the longer the Anatolian War is allowed to proceed, the more difficult will the problems created or accentuated by it be to solve. And of an end to it there is as yet no sign:—

The fighting may die down for a time as a result of the exhaustion of both sides and the severity of the Anatolian winter, that makes big movements impossible. But the war will continue, whether in the form of raids by Greeks or Turks on enemy positions or in the form of careful preparations for some new effort in the spring; and in the meantime all the manifold resources of Oriental intrigue are being brought into play, and the whole atmosphere of the Near and Middle East is being poisoned by this prolonged and indecisive war of which Western Anatolia is the theatre.

Into this remote and dangerous area of strife European misunderstandings and rivalries are introducing strange complications. All these confused battles are being fought out with modern European weapons and under the inspiration of doctrines in which the fanaticism of the East is mingled, in a strange jargon, with the catchwords of European democracy. The discords of Europe re-echo in weird and barbarous forms throughout the East, and those whose duty it is to guard and pass on all that we still possess of civilization must be vigilant in face of this new danger. This is no time for the pursuit of petty national advantages. The problem is far too big for any one European nation to cope with it alone, or to be acrimonious in the pursuit of its own private policy. The perils in which the new movement in Asia Minor involves our own manifold interests in the East are sufficiently obvious in this country. It may be admitted that, in some respects, our own policy in Asia Minor has been short-sighted and precipitate, and we should be prepared to remedy our errors. But this is no matter in which we can act alone with any prospect of success, nor is it only our national interests that are in question. We cannot act effectively unless we have the close and frank co-operation of all our Allies. In the East the Allies are in duty bound, for the sake of their common ideals, to act resolutely together. The intolerable situation in Asia Minor has reached a pass which makes it imperative that the Allies should agree at last on a policy and make haste to carry it out with all the means at their disposal. The war in Asia Minor must be stopped, and with a disinterestedness

Digitized by Google

that corresponds to the highest interests of Western civilization, the Allies must settle boundaries and remove all possible causes of friction.

And it proceeds to state that the financial ruin of both Greece and Turkey is certain unless Western mediation is brought to bear :—

For the shifting shadows of ancient hatreds and ancient dominations a spectral war is being waged in a land of exhausted memories. Thousands of young men are losing their lives in the process, and a broad area is being wasted. The whole effort is fruitless and vain. It is a mockery of the European statecraft that has drawn into its modern struggle for world hegemony the ruder forces of the East, and has left them to go on fighting for the shadows of shadows, for the dim reflections of our hackneyed and now discarded watchwords. The danger is that we may have set in motion forces that we may not be able to check or to control.

It details the indications which show that the situation is being allowed to drift, and concludes with statesmanlike impartiality.

**Egypt.**

In its "Monthly Commentary," written by H. B. Usher, the *Fortnightly Review* of September discusses the problem of Egypt. After posing to itself the essential question "whether the wit of man is equal to the solution of the problems his progressing civilisation has created; whether, now that the efforts of multitudes of enterprising people have created an interdependent structure of civilisation, more complicated and more modern than the rival political systems in which they have been content to live, those systems can be adapted so that the salvaging of that civilisation may be possible; or whether civilisation must smash, and mankind start again far back towards its beginning," it continues :—"If it is to be saved, there must be a definite will to save it strong enough to rule out many old political ideas and methods; there must be a readiness to recognise that force can only destroy, and that it cannot maintain or create, that for the final arbitrament of force there must be substituted a permanent willingness to compromise, to reconcile conflicting interests, even sometimes to give way on points which, according to the old theories, may seem almost vital." And it comes specifically to Egypt :—

Egypt never has been part of the Empire, and there is no sort of reason why she should become so. Great Britain has one serious interest in Egypt that must be safeguarded, namely, the Suez Canal. She is entitled, therefore, to stipulate that adequate guarantees must be forthcoming for the safety of that vital waterway. Those guarantees must include the right to garrisons which can protect it, and the conclusion of a Treaty which will give us some control over Egyptian foreign policy, otherwise Egypt should be allowed to go her own way, the principal difficulty being the reconciliation to her new status of other Powers which have rights under the Capitulations. We need to understand that we cannot any longer govern a large part of the world by force. We can afford neither the men nor the money. The Empire and its appendages must therefore be held together by consent. Fortunately the manifest advantages of a common citizenship, of the elimination of all forms of international friction over a very wide area, of the mutual protection and strength which all the members gain, and of the assistance Britain is able to give out to her ripe experience in government, are bonds which should be quite sufficient to hold it together, provided there are no unsatisfied ideals striving to pull it apart. It should be our constant preoccupation to see that there are none. We shall then be able to feel at peace with ourselves, and at the same time to confront the world as an organisation which bears no resemblance to a military empire in the older sense, which threatens no one, and stands across no one's path, but which does on the other hand present a striking example of the benefits which unity and co-operation can bestow. For an Empire of that sort there should be a great future, for unity and co-operation are what the world most sorely needs. For one of the older sort, it is difficult to foresee any but a disastrous future, in which the one thing certain is that Britain herself will sink under the weight of her obligations.

## "PASSIVE RESISTANCE?"

Under the title "August the First," the *Civil and Military Gazette* publishes some amusing verses which offer advice—the character of which it is not for us to criticize—to the Indian extremists. We quote the first four verses :—

"India expects that every man this day will burn his Dhoti."

Brothers, Freedom's Day is nearer!
Hail the Dawn of the New Era,
Purged by sacred fire!
Give three cheers, three regular rousers:
Gather round, and burn your trousers
On the funeral pyre!

High and low, whate'er your stations,
Set on fire your combinations;
Let the rites begin!
Liberty's alert Defenders,
Char to atoms your suspenders,
Do your *dhotis* in!

Manchester will mourn and grizzle,
While the pink pyjamas sizzle
In the blazing vats:—
Clothed in khaddar cloth (your best coats),
Burn the foreign devil's waistcoats.
And cremate your hats!

Learn the lesson Soul Force teaches!
While the flames consume your breeches
Cleanse your minds of wrath!
Love your very souls inspiring,
Heap a crore of mounds of firing
On the hated cloth!

## NEWS IN BRIEF.

Monsignor Bartolomasi, Bishop of Trieste, who was head of the chaplains on the Italian front during the war, has had an audience of the Pope, who wished to be informed of the conditions of the clergy and Catholics in the new provinces, especially among the Slav population.

The Maharaja Holkar of Indore has sent a donation of £500 to the funds of the Mental After Care Association, Church House, Westminster, to assist them in dealing with patients in their care who have suffered from nervous or mental trouble caused directly by war service.

Salonika City has passed a resolution deciding that one of the central streets shall be named after Dr. Russell S. Wingfield, the American Red Cross Surgeon, who died a few weeks ago of burns received in a fire at the Red Cross Children's Hospital there.

Dr. Karabeily, president of the most popular and influential Moslem party in Azerbaijan, has been arrested by order of the Bolshevist authorities at Baku, and with another forty members of that party has been sent to Moscow and imprisoned.

Lord and Lady Reading were at Simla last week, entertained at dinner by the two Punjab Ministers, Khan Bahadur Mian Fazl-i-Hussein and Lala Harkishon Lal. Replying to the toast of his health the Viceroy said that he was not in the slightest inclined to lose the hope with which he came to India.

A Constantinople message says that a Kemalist Mission under Ismail Hakki, including two commercial representatives, has started from Angora for Sofia. The report probably emanates from a source hostile to Bulgaria.

M. Stergiades, the Harmost of Ionia, and the Hellenic High Commissioner in Constantinople have been summoned to Athens to consult with the Cabinet.

A great advance in improving the treatment of leprosy is being made in India, in which the Rev. Frank Oldrieve, Secretary of the Mission to Lepers, is taking a prominent directing part.

On the ground that the authorised quota of Greeks admissible into the United States for one year under the new Immigration Law, has already been completed, the New York immigration authorities on Saturday, says Reuter, refused admission to 371 Greeks.

# THE CARAVANSERAI

*Think, in this batter'd Caravanserai*
*Whose Doorways are alternate Night and Day*
*How Sultan after Sultan with his Pomp*
*Abode his Hour or two and went his way.*
—OMAR KHAYYAM—

A traveller, lately home from the Balkans, tells a true story which illustrates well one of the pitfalls of our language. In Belgrade he was invited to lunch by a leading citizen, and during the meal a rather well-known Englishman who had visited the country was mentioned. "Did you meet him?" asked the visitor. "Yes," replied the host, and added puzzlingly: "He is a big potater, is he not?" The Englishman did not know just what the other meant—"a big potato?"—but politely agreed nevetheless. But he had to cudgel his brains for a long time before the riddle was solved. "A big potatoe?" Then, suddenly it dawned on him, when in thinking over the other Englishman's characteristics, he remembered that he was by way of being "a two-bottle man." Potations—potater—the riddle was answered.

Before the great war we were often told that the Serbs were the "Irish of the Balkans." I have not seen the statement made lately, but I suppose it still holds good. At any rate the Serbs' brothers, the Croats, appear to have certain Hibernian characteristics, if one may judge from a little incident reported by a correspondent. A Croat peasant was lately grumbling about the "tyranny" of the Serbian police authorities. He had been punished, he declared, with great bitterness, merely for eating a goose. "Too bad" said a sympathetic friend, "but where did you get the goose from?" "Oh, I stole it," replied the Croat cheerfully. Talk about "grievances!"

I am very glad that the Lord Chamberlain has stood by his decision not to allow the new play that Mr. Oscar Asche purposes putting on at His Majesty's Theatre to be called "Mecca." The point was quite a simple one, after all:—Should the spectacle be called "Mecca"—to satisfy Mr. Asche, apparently—at the risk of offending susceptibilities of Moslems, or should it not? It is beside the point to argue that Moslem susceptibilities ought not to be upset by the use of the word; that Moslems ought rather to like an advertisement given to the name of their most sacred city by its association with a show such as those lately produced at His Majesty's; that the risk of giving offence is small, and so on and so forth. The point is that the risk is there; and that being so, the Lord Chamberlain presumably considered that if he must choose between offending the manager of "His Majesty's" and His Majesty's Moslem subjects, he preferred the former course. It was purely a matter of taste, of course. For my part my taste agrees with the Lord Chamberlain's, on this subject at any rate, and I am rather surprised that Mr. Asche should have pressed the point at all; for, unlike some London stage-folk, he is a travelled man, and a man whose views are not bounded by his own footlights. But the discussion has given the new show a pretty good "advert," hasn't it?

Why is it that the Rabbit is always regarded as a contemptible coward? Admittedly, he is not exactly lion-hearted; but then he has not the lion's armoury; and on occasions he does show fight in his own way. So why insult him by calling "conscientious objectors," and other objectionable beings "rabbits?" As a matter of fact, I myself have seen a rabbit show fight against a human being who endeavoured to capture him. He was a tame rabbit, and his owner—a very big boy—wished to capture him after a run on the lawn; but bunny objected, and when the youngster tried to drop a cloth over him, he caught it in his teeth and shook it, much as a dog might do, but in very real anger. Eventually he was caught, of course; but he showed pluck in fighting for his liberty—a thing which, as a Briton, I admired greatly. Again, bucks will fight fiercly at the breeding season; and lately I have learned that they will engage in combat for a choice bit of food. At any rate, a friend who has lately returned from a holiday in Norfolk tells me that a countryman there assured him that whereas the soil is now rich it used to be so poor that "two rabbits would fight for one blade of grass." And yet—and this is the *raison d'etre* for this excursus on the habits of rabbits—a correspondent who was travelling in the Balkans lately wrote that at one place he was "lucky enough to get a drop of arak that would have made a rabbit spit at a dog." As if a rabbit needed any such "Dutch courage."

CORSAIR.

## CASTOR OIL FOR MOSQUITOES.

(*To the Editor of "The Near East."*)

Sir,—As regards Corsair's reference to the castor oil plant and mosquitoes, I read while in Cyprus that the plant was very efficacious against flies, and that branches of it hung up in rooms would keep them off. I tried this, and I also grew large, luxuriant bushes of it outside both dining room and kitchen windows. My experience was that it really does keep away flies to some extent, but not so that other and stronger remedies can be dispensed with—far from it. As regards mosquitoes, the only efficacious remedy at present is that laid down by Sir Ronald Ross,—the destruction of larvae in breeding places and areas.

I. am, etc.,

R.M.

## MILITARY CROSS AWARDS.

A supplement to the *Gazette* announces that a Bar to the Military Cross has been awarded to Captain J. G. Simons, Gurkha Rifles and the Military Cross to Captain Atul Krishna Kar, Indian Medical Service, and Lieutenants J. G. Pargiter and C. H. B. Rodham, Indian Army, for distinguished service in the field with the Waziristan Force, India.

The Military Cross has also been awarded to Captain W. H. Butcher, Indian Army Reserve of Officers, for distinguished service in the field in Mesopotamia.

## NOTES AND NEWS.

Devonshire Square.
E.C. 2,

**The Exchanges.**

The problem of the hour—the stabilisation of the exchanges—is dealt with in an article on page 425. The exchanges are, indeed, rapidly becoming something more than a problem, for it is now recognised that it is a matter of vital necessity for Great Britain and every other country that the obstacle to trade imposed by the exchanges should be overcome. At present international trade is simply strangled because commerce cannot be carried on with the rates at their abnormal levels, and the consequence is widespread unemployment and distress. It was only after a prolonged experience of the "slump" that the seriousness of the situation has come to be generally recognised; for the "boom," short-lived as it was, which followed the termination of hostilities, gave grounds for the view that the economic difficulties arising from the war would not be difficult to overcome. It is realised now that the situation which the world has to face is no whit less serious than that with which the Allies were confronted during the war.

**The Outstanding Problem.**

As pointed out in the article to which I have referred the action the Government will take to meet the situation as it affects ourselves will no doubt include a much more extensive export credits scheme. But while that step will no doubt relieve the situation to the extent of enabling our manufacturers to export their goods, it is not going to help in the achievement of a permanent settlement of the exchanges, without which anything that may be done can have no lasting effect. The exchanges represent the internal position of the country, and their adverse movements indicate, among other things, that progress is not being made with reconstruction. The development of the export credits scheme is essential to enable us to tide over the period of abnormal conditions, but it is even more necessary that at the same time we should give what assistance we can to the countries with the adverse exchanges in the shape of credits for reconstruction. Given that they are placed in a position in which they can recuperate, and given also that there is a real tendency to settle down to work, then we shall be well on the way towards solving the problem of the exchanges.

**The Gezireh Scheme.**

The Gezireh project comes in for further criticism in the current issue of the *Journal* of the Sudan Chamber of Commerce. The writer of the article in question, whose previous comments I referred to recently in these columns, declares that the scheme can only be achieved "at a very heavy charge on the country, and only to the extent of 50,000 feddans out of the 300,000 spoken of. It will be, in my opinion, many years before the total area planted yearly in the Gezireh with cotton will exceed 50,000 feddans." He proceeds to deal with the present position of private agricultural enterprises in the country, and points out that there are more than 50,000 feddans to some extent planted in the Khartoum district north of Khartoum, Kassala, and Tokar. "These areas" the writer adds "have been at a standstill for some time owing to local difficulties, and must be reduced unless present conditions are changed, but with Government assistance the areas could be increased right up to the full extent of the available labour in the country."

**State and Private Enterprise.**

Given sufficient labour, which is one of the great problems in the Sudan, and provided cotton growing in the country proves profitable, the writer argues that individuals will go in for cotton cultivation to the greatest possible extent. "If cotton growing is not profitable for private enterprise" he says, "I cannot understand how it can become a profitable undertaking for the Government, particularly as it is now generally recognised throughout the world that Government controlled enterprises are not usually conducted on the most economical lines." In conclusion he declares that the 50,000 feddans of the Gezireh will only be a substitution of what individuals will have to give up so that the position will be unchanged as regards production, that the result will be the end of private enterprise, and that "massing labour in one place is not good, and the dangers of disease to the crop will be much greater."

**"An Intolerable Burden."—**

A correspondent comments very pointedly on the anomaly presented by the rates of the Bank of England and the Imperial Bank of India, and those of the Exchange Banks. While the bank rate is 5½ per cent., and the Imperial Bank of India rate is 5 per cent., the rate of the Exchange Banks is 8 per cent. This has to be paid by merchants on goods shipped to India and lying in the godowns. When goods were going into consumption rapidly the rates charged by the Exchange Banks were not felt to any great extent, but developments in India during the last year have brought about conditions in which the rate has come to represent, says my correspondent, "an intolerable burden" on merchants. They cannot tell when the Indian market will improve, but in the meantime they have to go on paying the 8 per cent.

**---and the Remedy.**

As my correspondent points out it is not merely a question of payment for advances against merchandise.

Digitized by Google

All the time the goods are in the warehouses heavy rental and insurance charges are being piled up, the consequence being that in the best circumstances British firms are compelled to face a very heavy loss on their goods, sometimes amounting to as much as 30 per cent. In this connection my correspondent makes the suggestion that as things are it is the duty of the Exchange Banks which have flourished exceedingly over a long period of years to bear their part in the necessary sacrifices by a considerable reduction in their rate of interest and other charges. On the face of it this seems an eminently reasonable view to take.

**Roumania's Financial Position.**

Our Bucharest Correspondent gives details this week of the proposals made by the principal Roumanian banks with a view to meeting the critical financial position in which that country finds itself as the result of the depreciation of the exchange. Broadly speaking the programme would appear to be drawn up on useful lines. It is an axiom that the way to economic recovery lies in the acceding of the greatest possible amount of freedom to the individual, but if Roumania's circumstances make further restrictions necessary for the time being, and those who are on the spot and are thus in a position to know evidently think they are, it would appear that the proposals as a whole are as little open to criticism (if I except the clause restricting trips abroad) as anything that could be devised.

**Roumania's Railways.**

In an article on the forests and railways of Roumania in the *Daily Telegraph* Lieut.-Colonel Repington comments on the obstacles to progress presented by the inefficiency of the railways, and the congestion at the ports. Of these two factors the former he places as "first among the deterrents to business." Roumania, has now, he points out, about 1,300 locomotives in use, and it is hoped to have 2,000 by April, and ultimately 4,300. America, Germany, and Canada are supplying locomotives, and "there is also one large contract for locomotives under consideration with a British house on favourable terms for Roumania, but it hangs fire though the need is imperative." Why in the circumstances there should be delay is difficult to understand, seeing that it is in Roumania's interests that normal conditions should be attained as quickly as possible.

**The Haifa Report.**

The report, so far unconfirmed, regarding the award of a contract for the development of Haifa to Messrs. S. Pearson and Co., reference to which will be found elsewhere in this issue, takes the memory back to pre-war days when the question of the development of Haifa, Beyrout, or another port was constantly on the *tapis*. Nothing happened because the Turkish authorities could not make their minds up as to what they wanted done, and then the war came to cut short any schemes that were under consideration. There is I think, no question, that of the various possible ports for Syria, Haifa offers the best prospects for development, and given favourable conditions should grow into a most important centre, though it is going a good deal too far to speak of it as a contemporary does as the "natural port of Mesopotamia." It certainly is not that, though the development of communications with that country will naturally divert much trade that would otherwise flow to the Gulf.

**Commentator,**

**NOTICE TO SUBSCRIBERS.**

*We regret to learn that a certain number of subscribers received last week's issue late owing to a strike at one of the Firms of Newsagents who help to distribute the Paper. All copies despatched from the Office of "The Near East" were sent off as usual on Thursday.*

## THE RIDDLE OF THE EXCHANGES.

In the discussions in the press and elsewhere regarding the trade crisis it is satisfactory to note that the tendency to obscure the issue by an insistence on relatively unimportant factors is disappearing, and is being replaced by the recognition that the principal obstacle to the development of British commerce, and indeed to any trade revival at all, is presented by the collapsed exchanges. There are many other factors, it is true, some obvious, some obscure, but compared with the problem of the exchanges they are comparatively negligible.

Unfortunately the course of the exchanges since the Armistice provides small encouragement for the belief that they will right themselves within any reasonable period; on the contrary a number of them have been going further and further from parity, this movement being specially pronounced during the last few months. It is idle to urge that in most cases the rates utterly misrepresent the actual position, for there is nothing to show when they will become representative, and in the meantime manufacturing countries like our own must have markets and the countries whose exchanges have depreciated must be in a position to import the goods they require. That, in short, is the problem which the Government have now to solve, and it is not rendered less difficult by the comparative lack of success that has attended previous efforts in that direction. The first export credits scheme was distinctly a failure. Its successor, which was intended apparently to tide over the period that would intervene before the Ter Meulen scheme came into operation, was in many essentials a great improvement, but while advantage has been taken of it to an increasing extent it would be futile to assert that it has promised to prove equal to the emergency. The last attempt—the Ter Meulen scheme, fathered by the League of Nations—appears to be still in the organisation stage. At any rate so far as is known, none of the countries it was designed to help has taken any steps towards making the necessary issue of bonds. Obviously, therefore, fresh means must be devised to cope with the emergency.

It may be assumed that the policy of the Government will be to provide a much more comprehensive export credits scheme which will really appeal to our traders. But in addition to this there would seem to be a good deal in favour of the suggestion that has been made by Labour that the Government should enter into direct dealings with countries requiring certain goods. Payment in this case could be in the form of short dated loans. The Government would be responsible for paying the manufacturers and exporters, while there would be no actual transference of credit to the importing countries. The main disadvantage would be that the resultant borrowing would necessitate further inflation followed by a new rise in prices, but that seems inevitable, and if the problem of unemployment can be solved at no greater cost the price will be cheap.

Obviously the adoption of expedients such as these will only relieve the position temporarily as far as we are concerned, and will only indirectly affect the exchanges by enabling the resumption of trade. It is a negative policy, and must if possible be supplemented by positive measures if it is to achieve really useful results. In the language of metaphor it would be like applying ice to the head of a feverish patient while neglecting to administer anything to remedy the cause of the illness. There are many ailments, however, that are incurable by the doctors without the very active assistance of the patient, and this very aptly exemplifies the position with regards to the collapsed exchanges. There are ways in which we, and other countries situated like ourselves, can assist, as for instance by the postponement of payment of reparations, should such a course be deemed advisable, but in the main help must come from within. Unless internal conditions are satisfactory it is hopeless to look for any permanent improvement in the exchanges.

The main factors necessary for the stabilisation of the exchanges were emphasised at the Brussels Financial Conference of last autumn, and the fact that since then the position has become worse is due simply to the fact that in many cases there has only been a half-hearted attempt to follow the principles laid down.

One of the most thorny questions throughout has been finance. It goes without saying that the restoration of a country's credit must depend on its monetary situation. Budgets must be made to balance, and there must be an end to inflation. But with the burden of debt imposed by the war this is easier to recognise than to accomplish, for the necessary economies can only be achieved by the curtailment of expenditure in directions which the authorities concerned view with anything but favour. It means, for instance, the minimum expenditure for military purposes, and the recognition that in the future no State will be able to undertake large responsibilities in this direction, takes time for appreciation. The trouble is, of course, that no State cares to take the risk of inviting an attack by a neighbour whose financial policy has been framed on more reckless lines, and until really stable conditions are established any advance in this direction must be difficult.

Apart from the fundamental question of the re-establishment of the currencies by the adoption of sound financial methods, there are a variety of other factors essential for the stabilisation of the exchanges, the most important of which are the relations between adjacent countries and the policy of the various Governments in regard to commercial matters in general. Since the war the tendency has been for States to erect formidable barriers between themselves and their neighbours by means of tariffs, prohibited imports or exports, and by similar expedients. Some of the regulations are no doubt justified by local conditions, but they are only too obviously framed, broadly speaking, without any regard for the general well-being, and their effect is simply to hinder the flow of commerce, and thus to check the natural progress of reconstruction. Free trade is an ideal, and can never be realised literally, if a country's real interests are to be protected, but it is a fundamental proposition that the freer trade is at the present juncture the greater the prospects of regaining normal conditions within a reasonable period. Government interference with the economic life of a nation is open to objection on precisely the same grounds. The grant of subsidies, the fixing of maximum prices, and similar measures are alike open to objection in that they serve no lasting purposes, and simply hamper reconstruction.

### Indian Treasury Bills.

The India Office has issued the following statement on Indian Treasury bills:—Outstanding with public on March 31, 1921, Rs. 43,73,55,000; September 17, 1921, Rs.27,32,60,000; In paper currency reserve March 31, Rs. 61,26,00,000; September 17,1921, Rs. 60,000,00,000; Total, Rs. 104,99,55,000, and Rs.-87,32,60,000.

REPORTS FROM OUR OWN CORRESPONDENTS.

## EGYPT.

*Cairo, September 20.*

**Further Restriction of Cotton Area.**

An announcement has been issued that the Government is preparing a decree restricting the area under cotton cultivation for a further period. The statement adds that the Government regrets its inability to abolish the tax of P.T.35 per kantar on cotton, but will consider a modification of the tax on inferior grades, and also promises consideration of the question of the reduction of the railway freights on the staple.

**The Economic Position.**

The cotton market has been weaker during the week, but the closing hour on Friday brought a revival and November staple closed at 44 dollars.. One hears on all sides of a more hopeful outlook for business during the season, but unfortunately there has been a simultaneous increase in the prices of most foodstuffs apart from those controlled by the Government and it seems as if the rise in cotton is to have as a corollary a quicker rise in the cost of living. The native Press is protesting indignantly against the suspiciously sudden increase in the prices of foodstuffs and is demanding Government intervention, but I understand that the Government is inclined to let the natural forces of supply and demand regulate matters for a time until developments prove whether the inflation of cotton prices is likely to be permanent. If cotton prices do remain in the neighbourhood of 50 dollars it is certain that there will be an attempt at exploiting householders, but previous experience has taught that official control of prices of locally-produced foodstuffs is unwise. The Government will achieve much more satisfactory results if it endeavours to keep the markets well supplied by preventing hoarding, and by supporting the co-operative societies which 18 months ago were found to be the best weapon with which to bring the profiteers to their senses.

## GREECE.

*Athens, September 16.*

**Finance and the Exchange.**

The efforts of M. Maximos in the United Kingdom and other countries to raise a loan on behalf of the Greek Government would appear to have met with no success, and the Governor of the National Bank is, for the second time, returning to Athens empty-handed. His apparent non-success has already been reflected on the Stock Exchange. On Wednesday last the rate of exchange on London which is fixed by the Committee of the Consortium of Banks, was raised from 66.25 to 69.50, and has since been steadily raised daily. In the free market sterling is quoted to-day at 83.50, whilst in Smyrna one could get as much as 85.50, and there is every tendency for the increase to be maintained..

The Consortium of Banks which was established last June, on the passing of the law regarding the control of the exchange, has, to a certain extent fulfilled some of its objects. It has practically stopped speculation on the Exchange in Athens, which in view of the present situation might have become a serious menace to the nation. In some respects, however, it has failed rather lamentably, inasmuch as balances of foreign currencies abroad have been seriously depleted by constant sales here which had been effected without corresponding purchases, the rate fixed by the Consortium for such purchases being considerably lower than the prices which could be obtained in the free market.

Various rumours, originating from Italian sources, are in circulation here to the effect that either a loan has been raised, or conversely that Great Britain has agreed to pay the balance still outstanding of the £10,000,000 granted to the previous Government. But confirmation of either of these reports is still lacking, and meanwhile the depreciation of the drachma continues.

**General News.**

The Minister of Supplies has prohibited the export of fruit on the ground that this year's production is not sufficient for local consumption.

The Greek Chargé d' Affaires at Berlin has telegraphed to the Government that there is very little demand for Greek tobacco in Germany, the Germans having suddenly developed a great liking for Virginian tobacco. There, is, however, a small demand for Kavalla tobacco.

## ROUMANIA.

*Bucharest, September 21.*

**The Bucharest Fair.**

The official opening of the Bucharest Fair took place on September 16 in the presence of Prince Carol, the Cabinet Ministers, the members of the Diplomatic Corps, and other high officials. The town has a festive aspect, and visitors are streaming in from all parts of the country The fair is being held in the Carol Park. The undertaking is well organised, and the products exhibited are worth seeing even by visitors from the Occident.

A British Press delegation, which has recently arrived in this country to study Roumania's economic conditions, has visited the fair. The mission consists of Sir Harry Brittain, M.P., K.B.E., President of the British Press Association, Mr. Leon Gaster, secretary of the association, Mr. Walter Jerrold, author and journalist, and Mr. Walter Lee, economist and journalist.

**The Financial Crisis.**

The sudden rise in the exchange to 492 lei to the £ has had a most alarming effect on the country, and many of the local merchants even favoured a moratorium as it would have meant ruin to a good many of them to be compelled to meet their engagements at such a rate. The danger of the enforcement of a moratorium was recognised, however, and the principal banks, headed by the Banca Nationala, convened a meeting for the purpose of impressing upon the authorities the necessity for measures to support the exchange. They are now drawing up a programme, which it is proposed should be carried out by the State and the banks, the main proposals of which will, it is rumoured, be as follows:—(1) the import of all goods that are not necessary for production and reconstruction to be prohibited; (2) the State's expenses abroad to be reduced by the recall of legations, missions, and delegations that are not absolutely essential; (3) pleasure trips abroad to be prevented; (4) production and the means of transport to be encouraged by every means; (4) freedom of export to be allowed; (5) the State to cease interfering in economic questions, and, in particular, to cease trading on its own account which has only resulted in heavy financial losses and unpleasantness, while discouraging production, an example of which is forthcoming in the decision of the farmers not to plant the cereals which the State specially desires; (6) to arrange to deal with the Roumanian Treasury Bonds in circulation abroad. By carrying out this programme the State will automatically reduce the budget by abolishing many Government offices and posts. The Banks will assist the State by stopping all speculation in the leu, and will also do all in their power to give credit for the imports of goods that are indispensable to the country, and will give the State their utmost financial support whenever needed. Should the Government accept these conditions, the banks and merchants will gladly set aside any idea of a moratorium.

Digitized by Google

**Export of Gold.**

The Government has at last decided to allow gold producers to export their available supplies. This privilege has been granted for one month and on condition that the counter-value of the exported gold is paid in lei and imported into the country in order to improve the rate of the lei. The gold in question is, of course, that of private gold mining companies and not of the State mines the latter's stocks still going to the Banca Nationala at the old fixed price. If the private companies had been compelled to dispose of the gold in the country at the price fixed by the State, it would have meant selling below cost of production. The export tax will probably be 22 per cent. *ad valorem*.

**Miscellaneous.**

According to Transylvanian newspapers the export of cattle from that province has proved considerably larger as a result of the abolition of the annoying formalities and greater transport facilities. Three trains daily are now running between Transylvania and Galatz for this purpose. Most of the cattle are destined for Constantinople and Italy.

In view of the very slow progress made in the declarations of capital and income for the new taxes, the Government has been obliged to extend the time for making their returns by another two months, *i.e.*, December 1, for people in the country and December 15, for those abroad.

The town of Bucharest is now floating an internal loan of 100 million lei, which amount is very urgently needed for sanitary and other municipal work. This loan is issued in bonds at 88 lei per cent. redeemable in 60 years and bearing an interest of 3½ per cent. per annum. There will be three prizes yearly.

It is reported that M. Titulescu has been successful in obtaining in Switzerland a loan of 40 million Swiss francs. This money will be used to pay some of the urgent coupons in arrears and also to form a fund to counteract any sudden fluctuations of the lei on the Paris Exchange by buying large amounts of lei at the right moment.

## ASIA MINOR.

*Smyrna, September* 15.

**Increased Customs Duty.**

Without warning to merchants the Greeks Administration has suddenly applied the old Turkish tariff of 11 per cent. *ad valorem* on all goods passing through the Smyrna Customs House. This tariff entails a considerable increase in the duty on many classes of goods, especially those needed for industrial purposes. For the time being merchants have refused to accept this sudden change in the customs tariff and have appealed to the Allies to insist that proper notice should be given to traders before any change is made in the existing tariff, which has been in operation since 1915. It is a fact that the High Commissioners in Constantinople have approved of the old Turkish Customs tariff being applied "in Turkey" and hence the Greeks are in order, in imposing the increased tariff, although it is natural that merchants should ask for a reasonable period in which to rearrange contracts. The Greeks claim that they have applied the tariff without warning to avoid speculation; but this is small consolation to the trader who suddenly stands to lose several thousands pounds through the change.

It is also announced that an additional duty has been placed on coal of Ps.20 per ton.

*Smyrna, September* 24.

**Application of Tariff.**

Sir Harry Lamb, Representative in Smyrna of the British High Commissioner, has induced the Greek authorities to give one month's notice from September 13 to merchants before applying the 11 per cent. *ad valorem* customs tariff. The Chambers of Commerce are also appealing to him to persuade the Greek authorities not to impose the tariff on goods contracted for before the change was promulgated even if they reach Smyrna after the month's delay.

**Sanitary Restrictions.**

Agents of shipping companies in Smyrna have appealed to the Greek High Commissioner, M. Stergh-lades to put a stop to the vexatious regulations ordered by the sanitary inspector. Coasting steamers arriving at Smyrna after calling at the Port of Adalia have been ordered to undergo 10 days quarantine in the Port of Pireas. A single case of cholera had been reported at Adalia on September 7. The chief cause of complaint is that the sanitary inspector did not advise the agent that such a measure would be enforced against ships calling at Adalia, thus enabling the agents to cable their respective captains to omit calling at the infected port.

## LOCOMOTIVES FOR INDIA.

In pursuance of their expressed policy of making India as far as possible independent of outside sources in the supply of materials for railways, the Government of India have had under consideration the question of the construction of locomotive engines in India, and they are now in a position to give a general undertaking that tenders will be invited annually in India for all the railway locomotive engines and locomotive boilers required by Government during the 12 years commencing with 1923. It is estimated that the average annual requirements of Government will be 160 locomotive engines and 160 additional boilers during 1923 and 1924, and thereafter 400 locomotives and 400 additional boilers. The first tenders will be invited on October 1, 1922.

The following general conditions will be observed:—(*a*) The invitation to tender will be published simultaneously in India and England, and will remain open for at least three months. (*b*) The qualities of the article offered must satisfy in every respect the specifications laid down. (*c*) The prices in the case of tenders made in India must compare not unfavourably with the imported article. (*d*) Tenderers in India must satisfy Government in the earlier years that an appreciable part of the manufacturing will be done in India. This condition may be expected to become gradually more stringent, until eventually tenderers, in order to be successful, will be required to show that they can carry out in their works in India all processes usually carried out in locomotive works in England. (*e*) Government will reserve the right to insist that the proposed sources of supply of parts which cannot be manufactured in India, should be stated in the tender, and should be subject to their approval. (*f*) Government will reserve the right of inspection at any stage of the process of manufacture, both in India and elsewhere. (*g*) Firms receiving orders in India will be expected to provide facilities in their works for the training of Indian technical students, and where such firms have their main works outside India, or are subsidiary companies promoted by or closely connected with firms which have their main works outside India, they will be expected to provide thereat similar facilities for students recommended by the High Commissioner for India in London.

Firms interested in the above announcement are invited to apply for further information to the Secretary, Railway Department, India, or the High Commissioner for India, London.

## COX'S SHIPPING AGENCY LTD.

We are informed that Cox's Shipping Agency Limited, of London, are about to establish a subsidiary company under the style of Cox's Shipping Agency (Roumania), Limited, with a Head Office in Bucharest, and Branches at Braila, Constantza and Galatz.

## "BRITISH CONCESSIONS" IN ALBANIA.

An article in a recent issue of *La Vita Italiana*, entitled "Réalistic Politics: How England conquers Albania," give the clauses of a convention for twenty years, between the Albanian Government and an English Group for Cigarette and Tobacco manufacture. The names of the original beneficiaries of this concession are given as Messrs. Barnes and Wallace.

The clauses of another convention "about to be signed" in favour of the "D'Arcy Exploration Company, Limited" for petroleum, benzine and natural gas are also given.

Messrs. Barnes and Wallace are declared to be treating, in addition to their tobacco concession, for the following:—

(*a*) Exclusive match concession.
(*b*) Exclusive telephonic plant and telegraphic material.
(*c*) Hydro-electric concession.
(*d*) Constitution of a Bank "on the lines of the Persian Bank."
(*e*) Concession for Agricultural undertakings.

Our contemporary suggests that the Consulta is quite ignorant of all these fast ripening Albanian plums. But it is to be noted in this connection that since the writing of this article the Anglo-Italian Convention has been signed.

# Engineering Topics.

*By our Engineering Representative.*

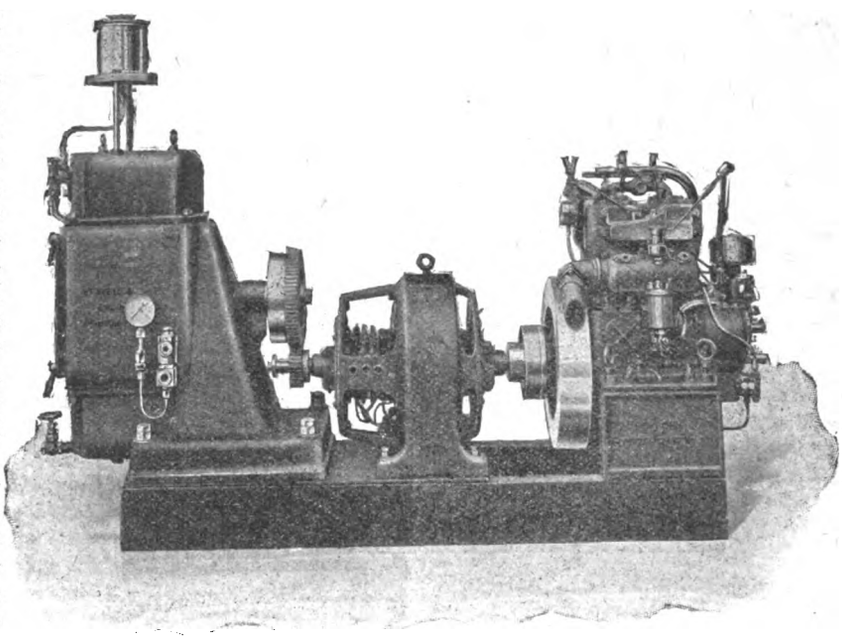
**Brass Fittings.**

The art of producing brass fittings and parts for the engineering trades has now reached a very high stage of development, and in this direction specialization has been carried to as closely approximating a perfect state as possible. We have just had an opportunity of studying a few of the specialities manufactured by that well known British firm, Messrs. United Brassfounders and Engineers, Ltd., who have so large and well-equipped a factory at Cornbrook, near Manchester. This firm pay special attention to the production of all kinds of high grade gun metal valves, cocks, and general steam fittings, plumbers' brass work, sanitary fittings, injectors, ejectors, and general jet appliances, semi-rotary double and quadruple acting &c., pumps, cast-iron stop and sluice valves, cocks and fittings. Of these their range is so extensive that it is to all intents and purposes comprehensive, and I should imagine it would be difficult to find anything of this kind that the firm do not make. I would point out, also, that they are makers of bronze and extruded brass bars stampings and special alloys suitable for all kinds of machine tool and other operations.

**Metal Research.**

Emphasis has always been placed in these columns on the need for scientific research into industrial methods in order to improve efficiency, and a few days ago before an audience of the leading engineers and metallurgists of this country, Mr. F. Adcock explained the direction in which science is now aiding the commercial production of finer and purer metals.

With some of the non-ferrous metals and their alloys, not perhaps so much with zinc and copper as with some of those which are not in such general use, it has not been easy hitherto to make proper microscopic examinations owing to the difficulty of preparing suitable micro-sections. Particularly has this been the case in connection with nickel and copper nickel alloys, nickel silver and certain grades of gun-metal. For this reason an element of uncertainty has always existed in connection with their productions.



14 h.p. Ships Auxiliary Set.

Continued research work, however, has resulted in the discovery that electrolytic methods of etching these metals can be employed and that by this means useful micro-sections of practically any non-ferrous metal or any alloy, can be prepared. The apparatus required is simple and beyond the cost of the necessary electric current, but little expense need be incurred.

**Citric Acid Bath.**

A variety of chemical compounds was tried in the etching bath, ranging from dilute acids to metallic salts and compounds, but it was not until citric acid was tried as an electrolyte that really satisfactory results were obtained. This bath is most successful with silver, copper-nickel, and nickel and silver alloys, and it was noticed that silver and nickel silver specimens which had been comparatively roughly treated during the polishing process often gave clearer etchings than the specimens which had been polished with great care. One of the most amazing discoveries was that certain specimens of silver showed on etching a cell structure of the net work which was not only smaller than the existing crystaline and granular composition of the metal but was in some cases actually independent of it.

A further discovery has been made in this connection, and it has been found that molybdic acid dissolved in excess of an ammonia solution will give somewhat similar results. The use of this solution has revealed a curious network, or subsidiary cell arrangement in brass containing 6 per cent. of aluminium.

Such reagents as hydro-fluoric acid, chronic acid, and bromine water have been used in this new field of scientific research, the investigations into which will probably have a widespread effect on the commercial production of non-ferrous metals.

**A Boiler Installation.**

The new boiler house plant erected in connection with the Wimbledon electricity undertaking consists of two Spearing water tube boilers, each having an actual evaporative capacity of 25,000 lb. of steam per hour at 250 lb. per square inch pressure, with a superheat of 250 degs. Fahr. It is interesting to learn that these boilers are fitted with "Bennis" chain grate stokers and super heaters of the Ferguson type. The gases pass out at the back of each boiler along flues, which converge into a short main flue leading to a steel chimney about 70 feet high. A "Sirocco" motor driven induced draught fan is installed at the base of the chimney, with the usual damper arrangements. An ash tunnel is built beneath the boilers and the flues and this battery of boilers is actually in itself a complete, self-contained steam raising unit.

**Lead and Gun Metal.**

It has not been altogether clear as to whether the addition of lead when the metals were in a molten state to gun metal was actually a detriment, so long as the quantity added was of a reasonable and not an excessive amount. It appears now that the effect of lead on Admiralty gun metal has been studied in a most exhaustive and highly scientific manner. A number of sympathetic alloys have been produced containing gradually increasing proportions of lead up to 1.68 per cent., subject to control as regards compositions, casting temperatures and general conditions. In sand cast gun metal lead gradually increases the strength, and softness of the alloy up to about 1.5 per cent. of lead, but above this proportion causes a decrease in these properties.

In chill-cast gun metal the effect upon the hardness parallels that of the sand cast metal, with a change point at about 1.5 per cent. of lead, but associated with a minimum rather than a maximum strength figure. If the lead is increased the ductility decreases, a result one would hardly expect. It also increases the impact figure of the metal when subjected to a second melting, it being found that metal melted once only gives still more irregular results.

**A Ships Auxiliary Set.**

I referred in my review of the Shipping, Engineering and Machinery Exhibition to the interesting stand of of the Parsons Motor Co., showing among other things a Combined Generating Set, a Marine Set and 14 H.P.

Digitized by Google

Ships Auxiliary Plant. The last of these is illustrated on the previous page.

**Humber Prices.**

On several occasions I have dealt in these columns with the merits of the Humber cars, and I hear that important reductions have now been made in the prices for their range of models for 1922. These new prices took effect as from September 19, and it is particularly stated that they are established for the entire 1922 season, a procedure which seems like looking a long way ahead.

The 11.4 h.p. 2-seater with double dickey seat has been reduced from £660 to £595, the 11.4 h.p. 4-seater will be sold at £620; the 11.4 h.p. Coupe with double dickey seat has been brought down for £790 to £725, and a new 11.4 h.p. model, a saloon car, has been added to the Humber range at £750. My especial favourite amongst this firm's productions, the 15.9 h.p. five seater which has hitherto been £950 is now to be sold at £850, and the 15.9 h.p. saloon-de-luxe is now reduced from £1,350 to £1,200.

**Hardness of Metals.**

It appears that certain scientifically based but imperfectly applied tests may have given rise to numerous mistakes, some of which may have had serious results. Metals manufacturers and users generally will await with interest the scientists' reply to the serious charge, for that is what it amounts to, made by Mr. F. S. Tritton, at the annual meeting of the Institute of Metals at Birmingham.

Dealing with that particularly important subject, the hardness of metals, he stated that he had conducted a number of experiments in the use of the scleroscope, an instrument devised for the purpose of testing and ascertaining with absolute exactitude the degree of hardness possessed by the metal tested. In the course of these he had occasion to test a number of small pieces of metal in the laboratory, for hardness and other attributes.

In his opinion the results he obtained were unsatisfactory and he was led to doubt whether the real hardness values of small samples were obtained in spite of the usual precautions taken, to support the specimens in as rigid a manner as possible. He explained that the experiments were undertaken with the view of finding out whether errors existed when the ordinary methods of support were used, and, if so, to find some method of eliminating them.

Errors were detected, from which it would seem that any deductions based upon similar, and similarly conducted, tests in the past must be more or less faulty. The mere suggestion that errors have escaped notice in connection with laboratory and practical hardness tests in the past is disquieting. The definite statement that such errors have existed and passed undetected may necessitate a lengthy series of fresh experiments in order to correct inaccurate data.

To reduce these errors the experimentalist selected two materials, pitch and glucose, for supporting specimens in the scleroscope, a special form of clamp being required when pitch was used. It was said that by the aid of these substances as supports the hardness of materials with curved as well as those with flat surfaces could be readily and exactly tested.

**Geared Diesels.**

Up to the moment very little has been allowed to transpire regarding the new mercantile fleet which Germany is now building up, although sufficient is known to show that German shipowners intend to construct vessels of the most modern and economical type. The Hamburg-America Line, according to the *Motor Ship* has just put into commission a particularly large vessel said to be of 4,000 tons, in which some 6,000 h.p. of Diesel machinery is installed. The statement is made that this is the first time such plant has been utilised, and is no doubt the result of success which has been achieved in reduction gearing in connection with turbine vessels.

Quite a number of advantages are claimed for the new system, about which a good deal is likely to be heard in the near future. We are all aware of the economy in fuel which results from the use of Diesel engines in place of oil-fired furnaces, but it appears that the geared Diesel machinery is much lighter and occupies much less space than any other type of marine propelling plant. I understand that a second and similarly equipped vessel has also been launched at one of the big German yards, and will be completed in the course of a few month months.

**A Huge Motor Ship.**

A short time ago the construction of a 20,000 ton motor ship would have been far too risky a proposition to undertake. Since the armistice, however, progress and development in this direction has been so rapid that no hesitation need now be felt in equipping a vessel of this size with internal combustion engines. So far as my information goes, the first 20,000 ton liner in which such plant will be installed, is the new British trade ship which is to be specially built for exhibition purposes. The intention is that this ship shall make an eighteen months' tour of the world, sailing on her first voyage not later than August, 1923. According to the above-mentioned authority, three Diesel engines, each of 3,000 h.p., will be installed, and in this instance the employment of internal combustion motors offers even greater advantages over steam than in the ordinary cargo ships. Extra space will be rendered available for the goods exhibited, additional cabin accommodation will be provided, no funnels will be needed, and coaling will be entirely eliminated. Moreover, the propelling machinery will represent the very latest developments of modern marine engineering, and as such will be of the utmost interest to visitors at the overseas ports at which the ship will call.

**Detachable Wheels.**

The degree of favour with which wire wheels of the detachable type are regarded was clearly shown in the Paris Motor Show, which opened on October 5th. I noted altogether some 47 makers had fitted their cars with wheels of this type, amongst these being such well-known names as Chenard-Walcker, De Dion, Darracq, Peuggot, Brasier, Delahaye, Ballot, Sizaire Berwick, Panhard and Delage. In addition, the makers who exhibited wheels made under the Rudge-Whitworth detachable wire wheel patents included such firms as Rolls-Royce, Sizaire, Charron, Delaunay, Hotchkiss and Hispano Suiza. It would seem that it would be only a matter of time before all makers fall into line in this matter of standardising road wheels.

# SHIPPING INTELLIGENCE.

## HAIFA : REPORTED CONTRACT.

The report that Messrs. S. Pearson and Co., the well-known firm of contractors, who have many great undertakings to their credit, have been granted a contract for the construction of harbour works at Haifa lacks confirmation as yet. A representative of "The Near East" was informed that the firm had heard nothing of the report, though it was admitted that this did not necessarily invalidate its accuracy.

## CONDITIONS AT BUSREH.

The following particulars are taken from the recently-issued Administrative Report of the Port Directorate, Busreh, for the two years ended March 21 last :—

The Port of Busreh is very convenient for the handling of ships. The river is of uniform ample depth, and the width in the vicinity of the wharves allows the largest ships likely to visit the port for some time to turn round. The current is moderate and adequate facilities exist for landing goods and mooring ocean craft. Some transit sheds have been constructed and others are in the process of construction. Adequate safe storage for petrol and petroleum has been provided and dangerous fuel is stored at some distance from the wharves.

The Port has abandoned stevedoring work on privately owned steamers, and local agents make their own arrangements to stevedore their ships, and when necessary import their own labour for this purpose. It is understood that the Port is able to quote an "all in" rate of Rs. 7 to Rs. 8 per ton for the landing, storage and delivery into rail or barge of up-river cargo. For this charge three weeks' free storage is provided. Shipping firms can, however, hire out sections of the transhipment cargo sheds at a monthly rental, if they prefer it.

The Port Director has the power to order any sea-going vessel within the port to come alongside any wharf, pier, etc., within the port in order to land or ship cargo, and he may also direct that no goods shall be landed or shipped from or in any sea-going vessel within the port, except to and from such wharves, piers, etc., as he may determine. So far as the funds at his disposal will allow the Port Director provides and maintains wharves, piers, warehouses, etc., and he is not bound to land, ship, or move any single article exceeding 35 cwt.. in weight, except at special rates. He may permit goods to be landed and shipped by other than his own servants, subject to special agreement with the masters of vessels, agents or owners of goods. Commercial goods can be conveyed direct up country from the wharve either by railway or by river craft.

The traffic receipts of the Egyptian Delta Light Railways for the week ended August 31, amounted to £E10,835. For the corresponding period of last year, receipts amounted to £E14,900.

## NOTES FROM SMYRNA.

*(From Our Own Correspondent.)*

*Smyrna, September 23.*

The strike of stevedores in Smyrna Port only lasted one day owing to the efficacious intervention of the Captain of the port. The men claimed double pay for each day's work or to be paid at the usual rate for days on which there was no work. Their claim was not entertained by the shipping agencies and the strike collapsed.

The United Chambers of Commerce in Smyrna have succeeded in obtaining a reduction in landing, loading, and stevedore charges at the port of Smyrna equal to about six shillings per ton.

## FORTHCOMING SAILINGS.

*The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parentheses* :—

*Anchor Line.*—S.s. Elysia for Bombay (Liverpool, October 11).

*Anchor Brocklebank Line.*—S.s. Anchoria for Port Said, Colombo, Madras and Calcutta (leaves London, October 8); s.s. Macharda for Calcutta (Birkenhead, October 12); s.s Malia for Calcutta (Manchester, November 5); s.s. Matheran for Port Said, Colombo, Madras and Calcutta (leaves London, November 5); s.s. Imani for Port Said, Colombo, Madras and Calcutta (leaves London, November 19).

*Bibby Line.*—S.s. Lancashire for Port Said, Colombo, and Rangoon, (London, October 12 and Birkenhead, October 26); s.s. Oxfordshire for Port Said, Colombo, and Rangoon (Birkenhead, October 12).

*Byron Steamship Line.*—S.s. Lord Broughton for Patras, Piraeus, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Galatz and Braila (Liverpool, October 15); a steamer will sail from Liverpool on October 28, for Patras, Piraeus, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Galatz and Braila.

*Clan Line.*—S.s. Clan MacNair for Bombay and Persian Gulf (Birkenhead, October 19); s.s. Clan MacNaughton for Colombo, Madras, and Calcutta (Birkenhead, October 20).

*Cunard Line.*—S.s. Brescia for Ceuta, Gibraltar, Algiers, Malta, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Odessa, Novorossisk and Batoum (Glasgow, November 3).

*Ellerman Line.*—S.s. Asturian for Gibraltar, Malta, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, and Varna (Liverpool, October 8).

*Ellermans "City" Line.*—S.s. City of Baroda for Calcutta (Birkenhead, October 15); s.s. City of Harvard for Bombay and Karachi (Birkenhead, October 22); s.s. City of Exeter for Calcutta (Birkenhead, November 3).

*Ellerman's "Hall" Line.*—S.s. City of Palermo for Bombay, Karachi and the Punjab (Liverpool, October 15).

*Glen Line.*—S.s. Glenluce for Port Said, Port Swettenham, Singapore, etc. (London, October 20); s.s.—Glenavy for Port Said, Port Swettenham, Singapore, etc. (London, November 3).

*Harrison Line.*—S.s. Diplomat for Calcutta (Liverpool, October 15).

*Henderson Line.*—S.s. Bhamo for Port Said and Rangoon (Birkenhead, October 19).

*Johnston Line.*—S.s. Pomaron for Galatz and Braila (Liverpool, October 12); s.s. Dromore for Piraeus, Volo, Salonika, Bourgas, Varna, Constantza, Sulina, Galatz and Braila (Liverpool, October 22); s.s. Peruviana for Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Galatz and Braila (Liverpool, November 5)

*Moss Line.*—S.s. Sitra for Gibraltar, Malta, Syra, Piraeus, Salonika, Constantinople, Bourgas, Varna, Constantza and Sulina, (Liverpool, October 15).

*Papayanni Line.*—S.s. Gerano for Algiers, Malta, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas and Varna (Liverpool, October 22).

*P. and O. Line.*—S.s. Novara for Colombo, Madras and Calcutta (London, October 13); s.s. Kaisar-I-Hind for Bombay (London, October 14); s.s. Macedonia for Bombay (London, October 21);

Digitized by Google

*P. and O. British India Line.*—S.s. Nevasa for Bombay and Karachi (London, October 7); s.s. Manora for Colombo, Madras, and Calcutta (London, October 14); s.s. Neuralia for Bombay and Karachi (London, October 21); s.s. Margha for Colombo, Madras and Calcutta (London, October 28); s.s. Merkara for Bombay and Karachi (London, November 4).

## SHIPPING DIRECTOR'S RETIREMENT.

The retirement is announced of Mr. William Miles Moss, managing director of the well-known Liverpool shipping firm of Messrs. James Moss and Co. The association of Mr. Moss with the concern has extended over a period of 37 years, during which he has made many friends in this country and the Near East, who will regret to hear of his severance from business life. Mr. Walter Harding who has been a co-director with Mr. Moss for many years, has been appointed to the position thus vacated.

Mr. Moss, who is an ex-Chairman of the Liverpool Steamship Owners' Association, has played an important part in the development of the Mersey port, having been actively identified with the Mersey Docks and Harbour Board, of which body he has been a member for 16 years. He has, however, relinquished his position with the Board, and is now resident in Hampshire.

## SIDKY PASHA IN MANCHESTER.

On the occasion of the banquet given in honour of Sidky Pasha and Shefeek Pasha during their recent visit to Manchester by the Egyptian section of the Manchester Chamber of Commerce, at which Mr. T. E. Casdagli presided, an Arabic address of welcome was read by Mr. J. Jebara, honorary secretary of the section.

The following is a translation of the address :—

"It is with much pleasure that I extend to you, on behalf of all our members, our warm welcome, on the occasion of your visit to our city. It give me also a special pleasure to address you in your beloved Arabic language. I believe this is the first time that any Egyptian Ministers have paid a visit to our city which is the greatest industrial centre of the United Kingdom, and I feel certain that such visits tend to improve the commercial relations of the two countries, as the best means of furthering business undertakings are the exchange of personal visits, personal acquaintance, and mutual confidence.

We know of your Excellencies' influence, and your presence in our city to-day is a guarantee of the deep interest you both take in Egyptian commerce generally and Manchester trade with Egypt in particular. Knowing this, we are entitled to look to the future with full confidence. You know as well as we do that the mainstay of a country's finance is the furtherance of its commerce. On this point, you and we have an undoubted community of interest. Further, it is admitted on all hands that the first condition of a prosperous trade is confidence, and to create this confidence there must be general safety and peace as well as laws by which the rights of men are safeguarded, along with the sanctity of commercial morality.

The magnitude of the present commercial relations between us is a proof of the existence of mutual confidence, and we cherish the hope that, through the personal efforts of your Excellencies, we shall have, in the near future, still closer bonds based on the unassailable foundations of an even fuller mutual confidence, so beneficial to the welfare of the two countries.

## BENGAL IRON.

The net profit of the Bengal Iron Company for the year ended March 31, 1921, including £8,157 brought forward, was £318,710, less depreciation and colliery sinking fund £28,264, transfer to taxation reserve £54,000, to general reserve £16,168, preference dividends £37,496, leaving £182,781. The directors recommend a 10 per cent. divided on Ordinary shares, subject to tax at 3s. 7d. carrying forward £25,378. Floods on railways interfered severely with supplies of raw material during the last six months of 1920 and caused a large reduction in output. The completion of new blast furnace has been delayed, but the work is well in hand, and it is expected that the furnace will be in blast early in 1922. Works are still well employed, but the fall in price has tended to make customers hold back their orders. Meeting, Central Hall, Westminster, S.W., Oct., 13. noon.

## TENDERS INVITED.

*Tenders are invited for the following contracts and must be made by the dates mentioned.*

(*Particulars of tenders marked D.O.T. are to be obtained from the Department of Overseas Trade, 35, Old Queen Street, S.W.*)

**Egypt.**

Timber.—H.M. Commercial Agent for Egypt has forwarded specification and copy of the conditions of tender for the supply of the undermentioned timber required by the Ports and Lighthouses Administration of the Egyptian Government at Alexandria:—100 pieces of beech, 16 ft. x 4 in. x 4 in. 10 pieces of elm, 20 ft. x 12 in. x 12 in. 10 pieces of ash, 20 ft. x 12 in. x 8 in. 10 pieces of teak, 20 ft. x 12 in. x 12 in. 4 pieces of jarrah, 20 ft. x 12 in. x 12 in. 4 pieces of jarrah, 20 ft. x 12 in. x 6 in. 2 pieces of lignum vitae, 6 ft. x 12 in. diameter. October 5 (D.O.T.)

Pumping Machinery.—The Director-General, Cairo Tanzim Department, Ministry of Public Works, invites tenders for the supply and erection of pumping machinery for Giza, Gezireh, and Agouza Waterworks. October 15.

Paper etc.—The Central Stores, Ministry of Finance, Cairo, invites tenders for the supply of paper and stationery. December 15.

**India.**

Copper Wire.—The East Indian Railway Company invites tenders for the supply and delivery of bare copper strip and wire, October 5.

**Yugoslavia.**

Indiarubber Covers.—The Artillery Section of the Ministry of War and Marine, Belgrade, invites tenders for the supply of the following articles :—

270 indiarubber covers for one ton automobiles marked "Berliet," dimensions 940 x 130. 400 indiarubber covers for three tons automobiles marked "Berliet," dimensions 1,000 x 130. 100 indiarubber covers for automobiles marked "Paccard" dimensions 34 x 3½ or 1715 x 100. 120 indiarubber cover for two ton automobiles marked "Paccard" dimensions 34 x 3½ or 715 x 100. 40 indiarubber covers for two ton automobiles marked "Garford," dimensions 36 x 4. 120 indiarubber covers for two ton automobiles marked "Garford," dimensions 36 x 7. 12 indiarubber covers for two ton automobiles marked "Tracteur Latil," dimensions 1,000 x 140. Four indiarubber covers 37 x 6 for moving workshops.

Further particulars may be obtained on application to the Banque Franco-Serbe, 30 Coleman Street, E.C.2. Tenders close October 22.

**Roumania.**

Sacks.—The Roumanian Ministry of War invites tenders for the supply of 250,000 sacks. The fibre to be of hemp or Calcutta jute. The number of threads by square centimetres to be :—6—7 in warp, 5—6 in woof. Resistance :—In warp 90 Kgrs; In woof 60 Kgrs. Elasticity :—In warp 11—14 mm. In woof 10—11 mm. Size of sack :—Length, 1.m. 10cm. Width, 0m 70cm. Weight of sack—¾ kilo 100 gr.—1 kilo 200 gr. The sacks to be made of a single piece, the sides of which should be sewed with very strong hemp or jute thread and the top hemmed. All tenders, which should be addressed to "Inspectoratul Technical Intendentei, Cala Grivitei, 28, Bucharest," must be accompanied by samples and a bank guarantee of 100 per cent. of the total value of the tenders to be returned to firms whose tenders are not accepted. October 15.

Pipe Line Construction.—In connection with the laying of a pipe line, 26 kilometres in length, for the supply of natural gas to the town of Targul-Mures in Transylvania. H.M. Consul at Cluj has received from the Engineer in charge of the scheme a statement of the material which will be required. This includes : 8,000 metres Mannesmann steel pipe; 21,600 metres steel pipes of various diameters; 17,700 metres drilling tubes of various diameters; 15,000 kilogrammes steel for hand tools; 40,000 metres galvanised iron or copper wire. Various valves and fittings; spades, shovels, mattocks; also tools for two iron workshops and two mechanical workshops; 500 metres camel hair belting pulleys, etc. Quotations for the supply of this material are desired from United Kingdom firms who would be prepared to grant a long credit of three or more years. (D.O.T.).

## TENDERS FOR PUBLIC WORKS IN MOROCCO.

H.M. Agent and Consul-General at Tangier reports that the question of public adjudications was discussed at a recent meeting of the Counseil de Gouvernement, when the Casablanca Chamber of Commerce drew attention to the practice of certain contractors of undertaking work which they were incapable of completing, with the result that it was left to the State to finish the work. The question has been studied by the Public Works Department and instructions have been given that in future, the guarantee exacted should be in proportion to the importance of the work to be executed, and that a stricter examination of the certificates presented by the contractors should take place.

The directors of the National Bank of India have appointed Mr. Charles Nicoll, the London manager, to succeed the late Mr. H. Chalmers as general manager of the bank, and Mr. James Young Munro inspector of branches, to be London manager.

# Near East Markets.

## LONDON PRODUCE REPORT.

Coffee.—The market has been firm. Costa Rica is unchanged at 122s.; and Indian is the same at 110s. Nairobi at 104s. is the same, but Jamaica has gained 10s. at 140s. Futures are :—December, 50s. 6d.; March, 51s. 3d.; and May, 52s. 3d.

Sugar.—Home refined has been in fair demand at the official rates. White Mauritius at 48s. and Czecho-Slovakian at 23s. 6d. are unchanged. Other transactions include West Indian crystallized at 40s. to 46s., White Java at 51s., and beet sugar at 121s.

Oilseeds.—All prices are lower. Indian linseed at 17s. 6d. has dropped 4s. 3d. and La Plata at 17s. 1½d. has shed 7½d. Rapeseed is lower with Toria at 20s. 6d., bold Ferozepore 21s., and brown Cawnpore at 20s., decreases of 1s. 6d.; 3d., and 3d., respectively. Indian cottonseed is 1½d. down at 11s. 4½d., and Egyptian black has lost 3d. at 14s. 9d.

Seed Oils.—Prices are unsteady. Linseed oil is 3s. 9d. down at 31s. 6d. Cotton oil is variable with common edible at 54s.; 1s. down, while Egyptian crude at 48s., and deodorized at 63s. are 9d. and 1s. up respectively.

Oilcakes.—Business has been dull. Linseed cake is 1s. down at 320s.; finest Arachis cake is 14s. up at 310s.; and London-made cottonseed cake is 10s. down at 210s.

## SUDAN NOTES.

*(From Our Own Correspondent.)*

*Khartoum, September 5.*

Information from Kassala is to the effect that the Gash flood has so far been exceptionally weak. No big spates have come down, and the flow has on several occasions during the month been reduced to a mere trickle. In consequence there has been great difficulty in filling the Feddadin Canal.

News comes from Darfur Province that rains in the capital (El Fasher) have been much below average. This however is set off against the cheering reports from outlying districts, where the rainfall is stated to be sufficient and all crops doing well. There has been a distinct revival of the cattle trade with Wadai (French Military Zone), some 240 head of cattle and 420 sheep having reached El Fasher from there during the month under review. Livestock prices averaged PT 300. for cattle, PT 48. for sheep, PT 220. for donkeys, PT 962. for camels, and PT 28. for goats. There has been considerable activity on the part of the Public Works Department in connection with the completion of new Government buildings, the Zaptia and Mudirieh being very nearly finished.

Reports on the cultivation in Kassala Province are promising as also from Kordofan with the exception of the Nuba Jebels of Rahad District where the maraig crops have suffered severely from the depredations of rats. The southern maize crop in the Fung Province is stated to be in excellent condition. Sesame crops are stated to be good, and dhurrah fair but showing signs of improvement.

## NEWS FROM ALL SOURCES.

The traffic receipts of the Smyrna-Aidin Railway for the week ended September 17 amounted to £13,578.

A new branch of the Crédit Foncier d'Algérie et de Tunisie has been opened at Castiglione (Algeria).

It is understood that the tractor trials, which were to have been held at Constantinople this month, have been postponed until May of next year.

H.M. Consul-General at Algiers announces that the export from Algeria to all destinations, except France, of sheep, cattle, horses, mules and donkeys has been prohibited, except under licence.

It is reported that the *Idea Nazionale* is raising a protest because British companies have obtained or are trying to negotiate for the exploitation of Albanian tobacco, matches, oil, electrical and telegraphic installations, banks and agricultural concessions.

## BUSINESS OPPORTUNITIES.

City marchant proceeding to Roumania, Greece, Turkey, etc., in order to dispose of large consignments shipped by his firm is prepared to undertake for others the disposal of stocks available in these countries, or the sale of goods shipped on consignment. Good outlet assured for Textiles, Hardware, Produce, etc. Will interested Merchants, Bankers, Liquidators, communicate with Box 188, "*The Near East*," 1, Devonshire Square, E.C.2.

## OPIUM MARKET REPORT.

Messrs. Barker Bros., Smyrna, report under date September 19 :—Since writing our last report of August 13, our market has been fairly active for Continental markets; the total sales amounting to 146 cases at prices ranging from 8s. 6d. to 11s. as to quality and exchange rates. Our exchange last month oscillated from 550 to about 570 piastres per pound sterling, and from 0.75 to 0.67 dollars for one Turkish pound, and to-day it is Ps. 616 for sterling cheque, and 0.60 for the dollar. With those extraordinary big fluctuations firm offers are impossible unless the shipper decides to run the chance of either gaining a handsome profit or sustaining heavy losses. The arrivals are 360 cases against 301 at same date last year, and our stock in first and second hands is now 1272 cases.

## LEVANT MARKET REVIEW.

We give the following extracts from the market review of the National Bank of Turkey for August :—

A series of disastrous fires broke out during the month, the biggest being at Scutari, where it is estimated that about 1,000 houses were destroyed. Most of these houses were built of wood, and this, coupled with the fact that there was a strong wind blowing from the North at the time, accounts for the enormous loss of property. The lack of water and proper fire fighting appliances also contributed to this disaster. In view of the almost daily occurrence of fires in this city, it is to be regretted that the Municipality is unable to provide efficient material to combat these conflagrations. It is understood, however, that this question is at last going to be gone into and, provided the necessary sanction from the Allied Finance Commission is forthcoming, it is proposed to raise the tax on house property in order to defray expenditure entailed in the buying of new fire engines.

**Produce.**

Flour.—The total imports for the month were as follows :—130,000 sacks from the United States, 40,000 sacks from Egypt, 10,000 sacks from Bulgaria ; Total 180,000 sacks. Of this 4,000 sacks were re-exported to Batoum and the Sea of Marmora. Most of this flour was of second and third grade quality. In addition to the above, between 1,700 and 2,000 tons of wheat were imported, as it is cheaper to import wheat and mill it locally, in view of the relatively higher duty which has to be paid on flour.

It is estimated that this stock is sufficient for local requirements for a period of 25 days, calculating a daily consumption of 5,600 sacks of 63 kgs. each.

Barley.—Information from Roumania indicates that the harvest has not been so favourable as was expected and it is reported that a new tax has been imposed on cereals, whereby any person wishing to export has to sell to the Government an equal amount of the quantity exported, at a fixed maximum price. The figure for Roumanian barley was 7½ piastres per oke f.o.b. Roumanian ports. Prices from the United Kingdom and the Continent are low and render business difficult on account of the exchange. The local price closed at 9-9½ piastres per oke.

Sugar.—Imports were 7,000-7,500 tons from Holland and the United States at £30-32 ton c.i.f. 2,000-2,500 tons were exported to Bulgaria and Batoum. Closing price at the end of August £27-29, according to quality. Owing to heavy arrivals, prices have dropped below those ruling in the producing centres and for a month or so, no new orders will be placed which may improve prices. Stocks on hand 5,500-6,000 tons. It is estimated that the daily consumption of sugar in this city is 59,500 kgs.

Rice.—3,150 tons arrived from Burma, Saigon and U.S.A. Exports amounted to 2,500-3,000 tons, chiefly to Roumania and some to the Black Sea. After a sharp advance, prices began to drop on account of fairly big arrivals. Stocks are about 800-900 tons The daily consumption of rice in Constantinople is estimated at 35,000 kgs., which gives a stock for 25 days.

Coffee.—1,500-2,000 bags were imported from Brazil, Rio Rio and Santos and 1,000 bags were sent to Bulgaria and Roumania. The stocks on the market are very small.

**Dried Fruits.**

Raisins.—As has been feared, the drought has caused considerable damage and the crop is now estimated at 500 to 550,000 quintals. Arrivals for the month amounted to 18,000 bags or 50,000 quintals. 12,000 bags which are equivalent to 30 to 35,000 quintals, were exported, most of them going to Liverpool. Very high prices were realised for early lots, as much as Piastres 85 per oke. being paid, but towards the end of the month, a heavy fall occurred and quotations are now from piastres 50 to 70.

A railway train, consisting of 33 coaches and containing samples of Czecho-Slovak industrial products, will leave Prague on October 10 for a two months' tour of Roumania, Bulgaria, and Poland.

## INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated September 26, 1921 :—September 19—Moderate rain has fallen in Gujerat and extreme North. Monsoon strengthened in South Burma. September 20 to 24—Widespread rain has fallen in United Province of Agra and Oudh and South East Punjab. Monsoon very weak in Peninsula. September 25—Strengthened in North East India and Peninsula. The figures of rainfall from June 1 to August 31 for different tracts in India show that the total fall in every tract has been normal except in South East Madras, Kashmir, the North West Frontier Provinces, South West Punjab and Sind, where the fall has been more than 20 per cent. in excess of the normal. Only in Eastern Rajputana had there been a deficit exceeding 20 per cent. of the normal, viz., a total fall of 13.3 inches as compared with an average of 17.5 General reports throughout September have continued to be good. Very satisfactory crops now seem assured throughout India and Burma. September 24—Punjab Crops generally improved by rain but too much in some places. Probably area to be sown with wheat and grain will now be about normal. Central Provinces—unchanged. Assam—sugarcane, tea and cotton normal. Autumn rice poor, winter rice excellent Bombay cotton market, September 22—firm. Oomras Rs. 516 September 21 ; Rs. 459 December-January. Cotton arrival September 1 to 16, 59,000 bales, as compared with 23,000 bales in corresponding period of last year. In Bombay piece-goods market, retail demand slightly more active, particularly in white staples. Local goods improved. Calcutta jute market on September 23, quiet but steady. September 24—Hessians fairly steady. Heavy goods quiet but steady. T.N. Shellac Rs. 142 sellers. At the tea sale on September 20 fewer Assams and Darjeelings and selection less attractive. Prices generally unchanged. Keen competition for good liquoring kinds, but plain medium kinds sold slowly. 201,535 packages sold to date at average price of nine annas per lb. Special rice, September 23—Rs. 635. Agra-Ajmer-Karachi railway survey by Bombay, Baroda and Central India Railway Company sanctioned with a view to investigate possibilities of aligning proposed Agra-Karachi Broad Gauge Connection Railway through Ajmer. No change in bank rates.

## CURRENT PRICES.

*General Produce.*—Bacon : (Continental), 159s. cwt. ; (Canadian), 125s. cwt. ; (American), 101s. 6d. cwt. ; butter : (Danish), 228s. cwt. ; (Australian), 200s. cwt. ; (New Zealand), 220s. cwt. ; cheese : (Canadian), 106s. cwt. ; (New Zealand), 98s. cwt. ; lard, 92s. 6d. cwt. ; eggs : (Danish), 25s. 9d. per 120 ; (Styrian), 10s. 6d. per 120 ; chillies, 155s. cwt. ; cloves (Zanzibar), 1s. 3d. lb. ; cocoa (Ceylon, good to fine), 86s. 6d. cwt. ; coffee : (Costa Rica), 144s. 6d. cwt. ; (East India), 140s. cwt. ; (Central America) 120s. cwt. ; (Jamaica), 67s. 6d. cwt. ; (Mocha longberry), 113s. 6d. cwt. ; (Santos, superior), 65s. cwt. ; ginger (washed Cochin), 50s. 3d. cwt. ; nutmegs (110's to 80's), 11d. lb. ; pepper : (Singapore, black), 4d. lb. ; (Muntok white), 9d. lb. ; pimento, 2½d. lb. ; raisins (Valencias), 142s. 6d. cwt. ; sultanas (Smyrna), 125s. cwt. ; currants : (Vostizza), 71s. 6d. cwt. ; (Calamata), 46s. 6d. cwt. ; sugar : (Tate's cubes), 57s. 9d. cwt. ; (Lyle's granulated), 52s. 7½d. cwt. ; (Mauritius crystals), 48s. 6d. cwt. ; (West India crystallized), 44s. 3d. cwt. ; (Centrifugal), 18s. 3d. cwt. ; tapioca (fair Singapore), 2d. lb. ; sago (small pearl), 26s. 6d. cwt. ; sago flour, 17s. 3d. cwt. ; rice (Rangoon, No. 2), 22s. 3d. cwt. ; rice (bran Rangoon), £8 12s. 6d. ton ; cinnamon (firsts), 1s. 1½d. lb. ; mace (fair Singapore), 1s. 2½d. lb. ; Tea : (Indian common to good common), 10d. lb. ; (medium to good), 1s. 5d. lb. ; (fine to finest), 2s. 5d. lb. ; Ceylon (Common to good common), 10½d. lb. ; (medium to good), 1s. 5d. lb. ; (fine to finest) 2s. 7½d. lb. ; Java (Common to good common), 6d. lb. ; wheat : (English white), 60s. qr. ; (La Plata), 82s. qr. ; (Australian), 73s. 9d. qr. ; barley (malting), 75s. qr. ; barley (feeding), 40s. qr. ; oats (English), 33s. 3d. qr. ; oats (La Plata), 28s. qr. ; maize (mixed American), 37s. 3d. qr. ; maize (La Plata), 36s. 3d. qr. ; flour, 53s. 9d. qr.

*Metals.*—Aluminium, £120 10s. ton ; antimony (English Regulus), £39 10s. ton ; bismuth, 7s. 6d. lb. ; copper (standard), £97 16s. 3d. ton ; copper (electro), £73 ton ; gold bars, 110s. 10d. oz. ; iron (No. 3 Cleveland), 125s. ton ; hematite (mixed number), 100s. ton ; galvanized sheets (24G), £19 5s. ton ; lead (soft foreign), £22 12s. 6d. ton ; manganese Poti, 1s. 1½d. unit ; molybdenite, 41s. 3d. unit ; nickel, £190 ton ; platinum, 365s. oz. ; plumbago, £20 ton ; quicksilver, £10 3s. 9d. ton ; silver bars, 40¾d. oz. ; spelter (G.O.B.), £25 11s. 3d. ton ; tin (standard), £156 6s. 3d. ton ; tin plates (20 by 14), 21s. 6d. box. ; wolfram, 13s. unit ; zinc sheets, £35 10s. ton.

*Chemicals.*—Acids : Boric, 66s. cwt. ; oxalic, 8½d. lb. ; citric, 2s. 4½d. lb. ; tartaric, 1s. 5½d. lb. ; ammonia (sulphate), £13 11s. 6d ton ; arsenic (white powdered), £31 5s. ton ; benzole (standard), 2s. 5½d. gallon ; bleaching powder (35 per cent.), £16 10s. ton ; borax crystals, 30s. 6d. cwt. ; cream of tartar, 127s. 6d. cwt. ; Potassium : Bi-chromate, 8¾d. lb. ; chlorate, 5d. lb. ; caustic, £30 10s. ton ; nitrate, £48 10s. ton ; permanganate, 11½d. lb. ; prussiate yellow, 1s. 2½d. lb. ; sulphate (90 per cent.), £17 ton. Sodium : Crystals, 141s. 3d. ton ; bi-carbonate, £12 5s. ton ; bi-chromate, 7d. lb. ; alkali (58 per cent.), £8 5s. ton ; chlorate, 4d. lb. ; caustic (70 per cent.), £24 10s. ton ; hyposulphite, £17 ton ; prussiate, 7¾d. lb. ; nitrate, £17 17s. 6d. ton ; glycerine (crude 80 per cent.), £80 ton ; glycerine (industrial 1260 per cent.) £110 ton ; lemon oil 3s. 10½d. lb. ; quinine, 4s. 0½d. lb. ; red lead, £39 15s. ton ; white dry lead, £42 12s. 6d. ton ; white ground lead, £53 2s. 6d. ton ; sulphate of copper, £30 10s. ton ; sulphate of iron, 117s. 6d. ton.

*Hides and Skins.*—Ox and heifer (first), 90 lbs. and up, 10¾d. lb. ; 80 to 89 lbs., 10¾d. lb. ; 70 to 79 lbs., 10¾d. lb. ; 60 to 69 lbs., 10¼d. lb. ; 59 lbs. and under, 8,3-8d. lb. ; (second), 90 lbs. and up 9¼d. lb. 80 to 89 lbs., 9,3-8d. lb. ; 70 to 79 lbs., 9¼d. lb. ; 60 to 69 lbs., 8¾d. lb. ; 59 lbs. and under, 6,7-8d. lb. ; Cows (first), 60 lbs. and up 8¼d. lb. ; 59 lbs. and under, 8¼d. lb. ; (second), 60 lbs. and up, 6¾d. lb. ; 59 lbs. and under 6¼d. lb. ; bulls (first), 5,3-8d. lb. ; (second), 4¼d. lb. ; Kips (first), 6,7-8d. lb. ; (second), 5,7-8d. lb. ; (third), 3,7-8d. lb. Calcutta market. Prices in rupees per 20 lb. :—Arsenic hides (cows) : Agras, 8 to 13 ; Durbhangas, 5.8 to 6.8 ; Patnás, 4.8 to 5.8. Salted cows, 3 to 6.8. Arsenic hides (buffalo) : 3 to 5. Skins : Calf, 8 to 10 per 20 lb. ; goat, 250 to 285 per 100 pieces.

*Miscellaneous.*—Cotton (American) 15.27d. lb. ; cotton (American Sakel), 25.87d. lb. ; Oilseeds : Linseed (La Plata), £17 2s. 6d. ton ; rape (Toria), £22 ton ; soya beans, £15 15s. ton ; palm kernals, £22 6s. 3d. ton ; sesame seed (China), £31 13s. ton ; Oils : Linseed, £34 2s. 6d. ton ; olive (Levant), £82 10s. ton ; palm £43 2s. 6d. ton ; rape (crude), £54 10s. ton ; soya, £44 10s. ton ; coconut (Ceylon), £53 10s. ton ; cotton (crude), £48 10s. ton ; ground nut, £55 ton ; petroleum, 1s. 4½d. gallon ; petrol, 2s. 1d. gallon ; fuel oil (ex tank), £3 15s. ton ; Shellac (T.N. second orange), 327s. 6d. cwt. ; (A.C. garnet), 287s. 6d. cwt. ; rosin (American), 20s 4½d. cwt. ; turpentine (American), 67s. 9d. cwt. Rubber : Plantation No. 1 crepe, 9¼d. lb. ; smoked sheet, 9¼d. lb. ; fine hard Para, 1s. ¾d. lb.

## SUPPLIES AND PRICES IN THE NEAR EAST.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank :—

Stamboul, September 10.

There is no improvement to record in the market position. The stagnation continues ; consignments to Roumania have notably decreased owing to the pronounced depreciation of the leu. Those made to Batoum have equally diminished because of the dues levied by the local authorities on imports of merchandise. The marked strength of sterling during the month is increasing the embarrassment of traders.

Manufactures are recovering in countries of manufacture following the great rise in the price of cotton which has risen from 8d. to 15d. per lb. in the space of twelve days. This rise has not had an effect on cotton goods here up to the present owing to the fact that the demand is almost nil, and that there are numerous importers who are pressed to realise.

*Produce.*—Sugar.—The European markets remain quiet with insignificant transactions. Buyers, foreseeing a new fall, are maintaining an attitude of reserve. Everywhere the new crop is reported to be abundant. Our market, owing to the lack of outlets, remains quiet. There have been some unimportant transactions. There is no demand for Roumania or Bulgaria as a result of the depreciation of the exchange. The arrivals of the week are 350 wagons, three-fourths of which have had to be warehoused. Stocks here amount to about 800 wagons. Prices are :—American, prompt shipment, 9.80 dollars per 100 kilos ; Dutch, prompt shipment, £30-31 per ton ; here (in transit) American £27 10s. per ton ; Dutch £29 per ton ; in Customs £T27 per 100 kilos.

Haifa.

A report dated September 2, states :—The results of the crop are far from being satisfactory both as regards quantity and quality. Although the area of land sown was greater than that of the previous year, agriculturists have obtained poor results. The causes of this are (1) the great heat that began towards the end of the spring (2) the appearance in the plains of Galilee of field rats who destroyed a great part of the crop.

The first arrivals of wheat, lentils, barley etc., besides being far from abundant have not given rise to important transactions in view of the monetary stringency, and the prices of these commodities though below those of previous seasons, are yet above those obtaining abroad. It follows that this market is in a state of complete stagnation. There have been no exports except some isolated consignments of wheat and barley to Syria and Cyprus, where prices have of late been a little higher. Prices here per 100 kilos are as follows for the principal products of this region :—Wheat £2, barley, 18s. 6d., beans 21s. 4d., lentils, 27s. 10d., vetches, 28s. 8d., chick peas 25s. 3d. sesame £4. The tendency is for these prices to rise.

Imports from Europe and Egypt are strictly limited to the needs of the country. During August there have been large arrivals from Trieste, France, etc., of construction material, which is in great demand in view of the great numbers of new buildings necessitated by the housing crisis in this town.

# COTTON & COTTON GOODS.

## MANCHESTER REPORT.

*(From Our Own Correspondent.)*

*Manchester, Saturday.*

The tone of the market during the past week has been better than for some time back, and throughout the market a feeling of optimism now prevails with regard to future developments. Of course any progress towards better times will naturally be slow, but the opinion is held by the majority of traders that before very long we ought to experience a period of greater activity. Most manufacturers have increased their prices in sympathy with the rise in raw cotton rates, and the higher values in some instances are to a certain extent checking developments. With regard to cloth the demand for Egypt and the other outlets of the Near East has kept up very well, and although the sales have not been what might be termed satisfactory the turnover has brought relief to many traders. In the yarn section Bolton spinnings have hardened somewhat in quotation, and buying has been of a hand to mouth variety. Shippers to India have reported a disappointing request in piece goods but a little more inquiry has been received from Madras. The political situation out there is still very disturbing. Buyers for China have operated more freely, and some encouraging sales have taken place in a variety of fabrics. In some instances goods shipped out there have been sent straight to the up country districts. South American advices have been a little better. Quotations for American counts have hardened somewhat. Buyers generally have not been prepared to pay the increased prices, and on the whole transactions have not been of any weight.

## LIVERPOOL REPORT.

Messrs. Reynolds and Gibson report as follows for the week ended September 29 :—Another week of good enquiries and big sales has been witnessed. Fully Good Fair to Good Sakel has been largely in request, and Tokar and Sudan cotton have once again received considerable support. Brown and Uppers have been comparatively neglected, and quotations of the latter show signs of widening out as compared with those of the finer stapled qualities. C.i.f. business has been quiet, and spinners, as yet, seem in no hurry to book ahead. Possibly, they will change their views before long, as the most recent crop reports are far from satisfactory. It would seem, however, for the present, that, until manufacturers are in a position to meet spinners on the basis of the recent advance, we can only expect a continuance of the hand-to-mouth purchasing to which we have now become so accustomed.

Manchester reports vary, but, on the whole, speak of a fairly general improvement, and are distinctly more hopeful. Two factors which will bear very directly on the course of events in the near future are (a) first picking reports from Egypt ; (b) the figure of condition (of the American crop) which will be issued by the Washington Agricultural Bureau on Monday next, the 3rd October. With regard to the first, we have to-day received the following cable from Alexandria :—" Result first picking less satisfactory than expected. Deterioration crop very pronounced many districts and yield will suffer considerably. Owing disaster Fayoum Province Upper Egypt crop expected only about million kantars." With regard to the second, the figure is anticipated variously, but is generally expected to be below 40 per cent.

If this is confirmed, the attention of spinners of American staple cotton will be directed more than ever towards the Egyptian crop. A large quantity of the Tokar cotton which changed hands during the last week or two has already gone in this direction. Holders of Tokar cotton show a disposition to withdraw their cotton from the market. We can only repeat what we said last week on this subject. There is a large stock of this cotton here, and the enquiry for it comes but seldom. Some of the lots now being pushed for sale in the neighbourhood of 18.00*d*. went through the boom year. At one time the paper profit to the holders must have been enormous, but there was no enquiry, and a considerable quantity of this cotton is still unsold at the present day ! As we write, we see no reason for anticipating any drop in prices, and the indications are rather the other way. Still, it is well to remember that the trade has not yet accorded its support to any large extent, and it is extremely difficult to predict when it is likely to do so. Total sales, 7,500 bales (includes 3,250 bales Sudan). Quotations show a further hardening all round, Sakellardis being raised 225 points, Brown 125 points and Upper 75 points on the week. Fully Good Fair Sakel 28.25*d*.

Anglo-Egyptian Oilfields—Gemsah production (week ended, September 16, 54 tons (previous week, 75 tons) ; Hurghada production (week ended September 16, 3,105 tons (previous week, 3,511 tons).

## INTERNATIONAL COTTON FEDERATION.

### HALF YEARLY STATISTICS.

Mr. Arno S. Pearse, the general secretary of the International Federation of Master Cotton Spinners' and Manufacturers' Associations, has just published statistics relating to the consumption of cotton for the half-year ending July 31, 1921, and stocks of cotton in spinners hands on August 1, 1921. In view of the present crisis in the cotton industry throughout the world questions were introduced in the inquiry forms sent to spinners asking for the number of spindles stopped, and the hours during which they were idle. These points have been answered satisfactorily by most countries. The returns have been tabulated and show that with regard to Great Britain in the half year ending July 31, the amount of short time amounted to 12.92 weeks, against 6.04 weeks in the previous half year. The figures for France are 6.92 against 2.3 ; Germany, 5.48 against 7.5 ; Spain 9.17 against 4.7 ; Belgium, 12.94 against 7.5 ; Switzerland, 3.39 against 1.39 ; Japan 21.25 weeks against .09 weeks.

The consumption of raw cotton throughout the world during the half-year ending July 31, amounted to 7,357,212 bales. Of this amount Great Britain used 630,230 bales ; France, 251,935 bales ; Germany, 457,257 bales ; Italy, 289,044 bales ; Spain, 117,529 bales ; Belgium, 82,286 bales ; India, 904,181 bales ; Japan, 971,654 bales ; and the United States of America, 2,540,000 bales.

Stocks of cotton in the hands of spinners throughout the world on August 1 amounted to 3,926,619 bales. Of this amount Great Britain held 296,997 bales ; France, 84,642 bales ; Germany 176,287 bales ; Italy, 170,780 bales ; Spain, 85,573 bales ; Belgium 59,673 bales ; India, 845,369 bales ; Japan, 700,846 bales ; China, 186,128 bales ; and the United States of America, 1,102,000 bales.

There are now in Great Britain 56,140,738 spinning spindles, and the Federation has obtained returns from the owners of 49,740,631 spindles. These consist of 38,961,707 mule and 10,778,924 ring spindles. Throughout the world there are 152,317,054 spinning spindles and the Federation has obtained returns from the owners of 129,458,472 spindles.

With regard to the short time movement in England the stoppages are equal during the half year to over 620 hours. Practically the entire industry has been suspended for a period of nearly thirteen weeks of 48 hours. More than 2,000,000 spindles have gone out of existence during the last year.

## MOROCCO'S PHOSPHATE EXPORTS.

It is announced that in future a steamer will leave Casablanca every week for various French ports with 400 or 500 tons of phosphates from the Oued-Zem beds. Normal exploitation is due to commence about 1926, when the production will reach 500,000 tons per annum. This figure is hoped to be increased to 1,750,000 tons in 1930 and 3,000,000 tons in 1940.

Bombay Labour Office estimates that the index figure of the cost of living in August was three points, or 2 per cent., higher than in July.

# RAW COTTON PRICES.

## REMARKABLE CHANGES.

In raw cotton circles the outstanding feature of the past three months has been the strong upward movement in values. On July 1 the prices on the spot in Liverpool for the recognised standards of American and Egyptian growths—Fully Middling American and Fully Good Fair Sakellaridis—were 7.85d., and 15.50d., per lb., respectively, but on September 30 the quotations were 15.22d., and 27.75d.

The average prices for the 65 days on which the market was open for business work out at 10.58d., for American and 18.65d. for Egyptian, compared with 8.60d., and 17.33d., respectively for the first half of this year. Many fluctuations have taken place during the quarter. The biggest advance occurred on September, when American rose 1.82d., per lb., and Egyptian 42½d., per lb. On the following day, however, values slumped again and the largest drop of the quarter was experienced, American descriptions declining 1.60d., and Egyptian 3d. per lb.

## LIVERPOOL COTTON ASSOCIATION.

### Annual Report.

The Liverpool Cotton Association has published its report for the season 1920-21 and the circular contains some striking figures. The average price of Fully Middling American cotton during the past season was 12.93d. per lb., against 26.32d. per lb., in the previous year. With regard to the Egyptian staple the average price of Fully Good Fair Sakellaridis qualities during the past twelve months was 30.24d. per lb., against 60.34d. per lb., in the previous year. The highest point of the market for American cotton during the season was on August 6, 1920, when Fully Middling was quoted at 28.60d., and the lowest point was on February, 1921, when the figure was 7.13d. per lb. The total import of cotton into Great Britain compared with the preceding year shows a decrease of 1,551,453 bales American, 370,939 bales Egyptian, 107,387 bales East Indian, 91,901 bales Peruvian, 64,680 bales Brazilian, 3,053 bales West Indian, and an increase of 28,842 bales African, the total decrease being 2,160,571 bales. The average weekly consumption of Great Britain during the year amounted to 40,000 bales, consisting of 31,400 American, 4,570 Egyptian, 1,490 Peruvian, 1,360 East Indian, 690 Brazilian, 370 African, and 120 West Indian, being a decrease of 26,040 bales. The total weight of cotton consumed in Great Britain during the season was 1,065,713,488 lbs., against 1,726,011,159 lbs. in 1919-20. According to figures published Great Britain continues to consume a smaller proportion of the American crop. In the period 1890-95 exports to this country totalled 37.28 per cent. of the total, but by 1910-15 the percentage had fallen to 25.45 whilst last season the amount was only 15.86 per cent. On the other hand the takings of spinners in the United States have increased rapidly, the proportion in 1890-95 being 33.05 per cent., and rising to 56.49 per cent. in 1915-20. Last year there was a drop to 49.22 per cent.

# ON 'CHANGE.

## IRREGULAR TONE PREVAILS.

*(From Our Own Correspondent.)*

London, Monday.

On the whole it has been a very dull week, with pronounced weakness in evidence in most sections, gilt-edged securities and Rubbers being among the few exceptions. The main factor in the continuing depression is, of course, the trade outlook; another influence that has not been without an effect during the week has been the commencement of what promises to be another flood of new issues. More favourable news regarding Ireland gave a fillip to the markets on Friday, but it was not sufficient to have any outstanding effect.

The gilt-edged group has been fairly firm. Consols are 48,5-8, while War Loan Fives are 88,7-8, a rise of 7-16. Fundings are 7-8 down at 71,7-8. In Near Eastern securities Egyptian guaranteed 3 per cent. are a point up at 69, Greek guaranteed 2½ per cent. 1898 are unchanged at 66 while Turkish Guaranteed 4 per cent. 1855, are the same at 69. The India 7 per cent. Loan is ¼ up at 103.

An irregular tone has ruled in Industrials. A good deal of liquidation has been going on, and, generally speaking, prices have moved towards a lower level. Iron and steel shares have been dull. There has been little doing in shipping shares. P. and O. are 2½ up at 375, while Furness Withy are 9d. up at 25s., and Cunards are 18s. 9d.

**Oils Decline.**

Substantial liquidation has been in progress in the Oil Market during the week, and in a number of directions declines are to be recorded. Mexican Eagles which have been a specially weak feature on adverse reports regarding the Amatlam Field, close at 4,7-32 after being considerably lower. Anglo Egyptians are 5,-32 up at 1,7-32, while Roumanian Consolidated are unchanged at 9s. 9d. Steaua Romana are 1s. down at 10s. 6d. while Phoenix have shed 6d. at 8s. 6d. Burmahs are 8/16 up at 5⅛.

Bank shares have been steady. Agricultural 3½ per cent Bonds remain at 54, while Agricultural 3½ per cent. Guaranteed Bonds are unchanged at 55¾. Imperial Ottoman Banks are 7 7-8, while National Bank of Egypts are 1-8 up at 20. Bank of Athens are 2 2-8, while Ionians are 3 ¼.

Quite a cheerful tone has prevailed in the Rubber Market, and a general though slight improvement in values has taken place.

**Greeks Buoyant.**

Greek shares have been buoyant. The 5 per cent. 1881 loan and the 5 per cent. 1884 issue at 41 have both advanced 2 and 3 points respectively. The 4 per cent. 1902 Loan has gained a point at 35. The 5 per cent. funding loan at 39 has gained 1 point, but the 5 per cent. 1914 Loan is 1 down at 40.

In Land Shares a firm tendency has prevailed. Beheras are 11 while Behera Prefs. are 3¼. Egyptian Delta Lands are the same at 9s. 3d. but Egyptian Consolidated Lands have shed 1½d at 1s. 1½d. New Egyptian are unchanged at 25s. 6d., while Sudan Plantations are 1-8 up at 3.3-16. Union Foncieres have gained 1-8 at 3.

Among miscellaneous descriptions Egyptian Markets are 20s., Egyptian Salt and Sodas are unchanged at 35s. 6d., and Alexandria Waters are 7 3-16,

## ALEXANDRIA EXCHANGE.

*Supplied by G. L. Mortera, Alexandria and Cairo.*

Prices on September 16 were as follows:—Agricultural Bank of Egypt, £4 21-32; Alexandria Water Co., Ltd., £7,3-8; Anglo-American Nile Steam, £2⅛; Associated Cotton Ginners, £27-32; Banque d'Orient, Fr., 56½; Behera Ord., £E 10⅜; Brasseries d' Egypte, Fr., 75; Building Lands of Egypt, £21-32; Cassi di Sconto Priv. Fr., 100; Ciments d'Egypte Priv., Fr., 55; Ciments d'Egypte Div., Fr., 30; Comptoir Fin. et Com. d'Egypte, £1; Consolidated Land, Pt., 6; Credit Foncier Fondateur, Fr. 835 ex: Credit Foncier Act; Fr 645 Credit Foncier, 1886 Oblig., Fr., 231; Crown Brewery Priv., Fr., 110 ex.; Crown Brewery Div., Fr., 130; Eaux du Caire, Capital, Fr., 80; Eaux du Caire Jouissance. Fr. 105; Egypt and Levant, S.S. Ord., 27s. 6d.; Egyptian Delta Light Railways, £4,5-32 ex.; Filature Nationale d'Egypte, £12¼; Immeubles d'Egypte Soc. an des., £5, 7-16; Khedivial Mail S.S. Ord., 110s.; Khedivial Mail S.S. Co., Pref. £2 9-16; Kom Ombo Ste. An de Wadi, £5,¼; Kom Ombo Ste., Fondateur, £33 9-16 ex.; Land Bank of Egypt, Parts de Fond, £37; Lots Turc., Fr., 34; Menzaleh Canal Navigation Pt., 270; Nungovich Hotels, £6,29-32; Ramleh Railways, £3 3-16; Salt and Soda, Pt., 34s. 5½d.; Tram d'Alexandrié Priv., Fr., 49 Tram d'Alexandrié Div., Fr., 60; Union Fonciere d'Egypte, £3,1-32; Egypt Hotels, £1 7-8; Urbaines et Rurales, £3.

## NOTES OF THE WEEK.

### *The Asia Minor Deadlock.*

Hostilities on the Asia Minor front appear to have been confined during the last week to isolated engagements, attempts probably on the part of the Turks to test the strength of the Greek line. In the meantime there is a French Mission under M. Franklin-Bouillon in Angora, the British Government has effected an exchange of fifty-one Turks interned in Malta for the seventeen British subjects detained in Anatolia, and the Angora Government has announced the execution of seventy-one Greek notables of the Pontus district on the charge of conspiring against the integrity of Turkey. The three incidents are in themselves a lurid commentary on the Allied blundering in Asia Minor. The French mission is officially stated to be concerned with a convention for the exchange of prisoners and with French economic interests within the Cilicia zone, in which France has special rights. But if any Allied Mission is to be at Angora at this time, it should be representative of France and Great Britain, and should be dealing with the question of the Turkish settlement. The mere fact that France sends a separate mission indirectly helps to make a settlement between the Nationalists and the Allies more difficult.

### *Turkish Intransigence.*

It is reported that the Angora Government is adopting a more intransigent attitude as a result of its successful defence against the Greek advance. Surprise at this development will be felt only in quarters to which psychology, whether oriental or occidental, is a closed book. The Turkish Nationalists are not the only people in the world who, if *asked* to do something to-day, will begin by refusing. It would, indeed, be interesting to discover any Government which is prepared to yield on any single point except under pressure. The form the pressure takes may vary, but it is certain that some kind of pressure will have to be exercised on Angora, if it is to fall into line with Allied wishes. It is equally certain that no pressure will be successful, if France keeps special missions of her own *chez* Mustapha Kemal. The Turks cannot be blamed for recalling their achievements in Constantinople with Germany filling a similar role *vis-à-vis* the Concert of Europe before 1914.

### *The Pontus Executions.*

If one thing more than another serves to condemn Allied policy in Asia Minor it is the execution of the Greek notables of Pontus. The Athens Government must have been well aware that in declaring war on Angora it was signing the death-warrant of its fellow-countrymen in that region. It is a matter of common knowledge that the Greeks of Pontus aspired to set up an autonomous State. Their natural desire, however, legitimate during what may be called the Armistice period when the fate of Turkey was under discussion, became at once a treasonable offence when Greece attacked the Nationalists. This is not said in defence of Mustapha Kemal's action, but the point needs to be emphasized because there is so much muddled thinking to-day with regard to events in the East. The opinion is apparently held in some circles that the Turkish Nationalists when fighting for their existence should behave as though they were at peace and on the best of terms with the whole world. It is only necessary to compare Pontus with Cyprus. Great Britain can afford good-humouredly to allow the Greek Cypriots to indulge their agitation to their hearts' content; but is it to be supposed that the British Government would be equally complacent if Greece suddenly declared war on Great Britain? (For the purpose of the comparison let it be remembered that Greece and Nationalist Turkey are evenly matched). The British might not execute Dr. Lanitis and his fellow-missioners without adequate cause; but if Greece (in this regard there is no difference between Venizelist Greece and Constantinist Greece, because the latter continued what the former began), if Greece imagined that the Turks would prove equally high-minded, further evidence of her misreading of the Turkish situation is registered against her.

### *A Concession to Realities.*

If you have no means of killing a wild elephant, the safest way to deal with it is to enclose it in a ring fence. Eventually it may be tamed and may be instructed in ways of usefulness. The Greeks were apparently not alone in supposing that they could "suppress" some eight or ten million Turks. The wild elephant, however, has turned on them, and more scientific methods of dealing with it are required. But it is useless to expect Greeks and Turks to arrive at an understanding between themselves. A settlement must be imposed 'from above,' and the necessary authority will be wanting until Great Britain, France and Italy are agreed on a

Digitized by Google

definite policy and pledge themselves whole-heartedly to enforce it. If such a policy comes more nearly to meeting Turkish claims than it does to fulfilling Greek, aspirations, it must be regarded as an inevitable concession to the realities of the moment.

### *Diplomatic Changes.*

The long-delayed change in Brirish representation in Athens is at last announced. Mr. F. O. Lindley, British Minister in Vienna has been appointed Minister to Greece in succession to Lord Granville, who becomes Minister in Copenhagen. A grave injustice has been done to an able diplomatist by the retention of Lord Granville in Greece after the fall of M. Venizelos. As he was particularly associated with the Venezelist régime, his position would have been tolerable only if free scope had been given to his charm of manner and tactfulness in the resumption of friendly relations with the Court. By insisting upon a boycott of King Constantine the British Govermnent adopted an unjustifiable and derogatory policy, and made Lord Granville's position an impossible one. The appointment of a new Minister, we may hope, implies that normal relations are about to be resumed between Great Britain and the Greek Court. Lord and Lady Granville will be missed in Athens, in Greek no less than in British circles, for they have set a very high standard of what British representation abroad should mean, both to the people of the country and to their own nationals.

### *The Question of Albania.*

A definite step in the direction of securing peace in and for Albania has been taken in the resolution passed by the Council of the League of Nations to appoint a Commission of three impartial persons " to proceed to Albania and report fully on the execution of the decision of the principal Allied and Associated Powers as soon as it is given, and on any disturbances which may occur on or near the frontier of Albania." The Commission is to arrive at Albania by November 1, but is to take no action untli the Allied decision is given. The reference is to the decision of the Ambassadors' Conference regarding the future frontiers of Albania. It is a wise course to pursue to have a commission on the spot, clothed with the authority of the League of Nations, to see that effect is given to the Entente ruling. In empowering the commission at the same time " to appoint impartial observers " it will be possible to keep watch on the more critical parts of the frontier at the same time. Nothing in the way of a final demarcation can be carried out, but it should at least be possible to avoid the open warfare that has been in progress in some districts until quite recently. If disturbances should take place, responsibility can be apportioned officially, and it might be well for the League to test its authority to exact reparations or impose penalties.

### *Refugees: Armenian—*

The question of the Armenian refugees in Irak is attracting a good deal of attention just now; and the views expressed by an Armenian correspondent of the *Times of Mesopotamia*, and referred to briefly in these Notes last week, find an echo in *The Times*. 'An Ex-Political Officer' writes to our contemporary on the subject a letter in which he suggests that the British public would loose its purse-strings the more readily to support these refugees, 'if it received a lead from the wealthy members of this much-persecuted nation domiciled here and abroad.' Writing with an experience gained while living 'for more than a year with a regular officer in charge of a camp of some 7,000 refugees,' he declares that he was 'not favourably impressed;' and that the people struck him as 'dirty, insubordinate, and practically unemployable.' He holds that they are no fit recipients for State assistance at such a time as this, that they will not work until they are compelled to do so, and that the sooner they are made to do so the better it will be. It is only fair to add that the views expressed are shared by other observers, and it seems to be the case that the refugees in Irak are not favourable specimens of their race. If they are to remain there, it would certainly seem to be advisable to get them to work, preferably on farm colonies, with as little delay as possible. But the ex-political officer's reference to wealthy Armenians here has drawn a protest from another correspondent, signing himself 'Armeneus,' who seeks to prove that 'with very few exceptions wealthy Armenians in Europe and abroad, are, unfortunately, but a pleasant myth." In any case, it seems that help from such sources is bound to be limited.

### *— and Russian.*

But it is not Irak alone that has its refugee problem to face. The upheaval in Russia has driven uncounted thousands of Slavs into other countries. Yugoslavia and Bulgaria have absorbed a great many of them, and as our Correspondents' letters show, seem disposed to make use of General Wrangel's former soldiers for their own purposes. In the case of Yugoslavia, at least, this employment of former Allies may be quite natural; but as in have it on the authority of Miss Durham that these Russian refugees are being settled upon lands formerly occupied by Albanians, we may conclude that Yugoslavia's neighbours are likely to feel less enthusiastic about the new method of spreading Pan-Slavism. Moreover, in view of recent manifestations of what the Slav can do and cannot do, it is possible that Europe as a whole may wonder whether the overflowing of the Slavs into Southern Europe is an unmixed blessing. At all events developments along the Albanian border take on an added significance in the light of this movement. But whatever the case may be with regard to Slav countries, it is certain that in Constantinople the Russian refugees are most unwelcome guests. The secular hostility between Russia and Turkey cannot incline the Turks to look with favour on these unhappy Russians, whose presence in their midst not only puts up the cost of living very seriously, but increases enormously the risk of an outbreak of some epidemic in the city.

### *A Disgrace to Civilisation.*

We do not for one moment suggest that the refugees are anything but objects of pity, or that they should be repatriated forthwith at all costs. In the case of the Armenians in Irak that would be utterly impossible; and in the case of the Russians in Constantinople and its neighbourhood it would be hardly any easier. At the present time, indeed, the Soviet Government refuses to allow any Russians from abroad to enter Russia unless they are provided with a three or four months' food supply. But it is high time that the Allied Governments did something to improve the lot of the refugees. In a letter received lately from an Englishman in Constantinople we are told that the outlook 'is worse than we have had since 1917-18, when people dropped dead in the streets from starvation, and died in hundreds through eating offal from the gutter,

Digitized by Google

Hundreds of Russians sleep on the pavements, and when the Americans cease their assistance, in October, there will be 7,000 more thrown on the streets.' It is useless, at this stage of affairs, to inquire who is responsible for the presence of these poor folk in Constantinople; but both for their own sake and for the Turks' it appears to be very desirable than an earnest effort should be made at once to deal with the problem they present. Inevitably they—or a remnant of them!—will sooner or later return to Russia. Cannot Allied diplomacy do anything to hasten that day, without sacrificing the refugees in any way? The state of Constantinople to-day is a disgrace to civilization.

### *The Teheran Plot.*

The news that with the passing of a week the 'plot' at Teheran has assumed a very much less alarming aspect will come as no surprise to our readers. Most of the people arrested on suspicion of connection with it appear to have been released, but several are still detained, and Mushir-el-Mulk is said to have been put across the frontier, into Mesopotamia. As he appears to be regarded by his late colleagues as the prime mover in the plot, it looks as if he is lucky to have got off so lightly. But perhaps while he was in *bast* he was able to make terms for himself; though, even so, we cannot forget that such bargains are not always strictly observed in the Orient. It will be interesting to see whether the Government, having 'convicted' the Minister of the Household of plotting against it, will next proceed to fly at higher game. The Sardar-Sipah's progress is certainly not slow.

### *The Outlook in the South.*

Persian affairs are still in such a tangle that it is next to impossible to know in which of the conflicting reports one can put any trust. We should hesitate to deny that there has been, or is, a plot afoot in Teheran, but we should hesitate equally to assert that the real plotters have yet been unmasked. Unless the symptoms mislead us entirely, the fact is that the country is in a condition not very far removed from anarchy. It may recover; and if we may believe the report that the trouble in Khorasan has been subdued, and Mahammed Taghi Khan killed, the Teheran Government may have more trustworthy tools available, and more skill in using them, than has been generally supposed. But British officials in Persia take no roseate view of the situation. The evacuation of all British families from Shiraz has been ordered by the British Consul, tribal disturbances being anticipated in that area as one result of the disbandment of the South Persian Rifles. And on the whole we incline to believe that the step is a wise one.

### *Indian Politics.*

The week's news from India has been concerned with anticipations rather than events. The position in Malabar appears to be described correctly in the phrase that, while the military situation is well in hand, it must be some time before order can be completely restored in the difficult hill-country where the rebels are operating. At Karachi, the Moslem agitators have been committed to the sessions, and the result of the trial must be awaited. Mr. Gandhi has announced to the country that his arrest is impending, and has offered what reads rather like a plea of guilty in advance, but no independent information is available as to the correctness of his anticipations. His principal adherents have joined him in a declaration that it is the duty of every Indian soldier and civilian to sever his connection with the Government, a hard task by the way for men whose families have for many generations looked to the State for a livelihood, but the wording of the message is not sufficiently precise to enable us to judge whether the signatories have brought themselves within the criminal law. So much however is clear, that the attitude of the Administration has stiffened since the spring, and that a large volume of Indian opinion approves of the change.

### *The Government and its Critics.*

In connection with this last point there is an interesting article by Sir Verney Lovett in the current *Asiatic Review*, the gist of which is that six months ago the Government could have counted on political support for a much stronger line of action than was actually taken, and that the results of their over-caution have been disastrous in Malabar and elsewhere. Undoubtedly this opinion is widely held, but it does not stand alone, for many observers in close touch with the situation think that the Indian Liberals in the mass were not prepared for a strong policy in March last, and that it was unnecessary for the Administration to hold its hand until opinion should have crystallised at the impact of unpleasant but indisputable facts. It would have been different, say these critics, if the Liberals had had a really great leader; but in fact no great leader has yet appeared, and a strong lead by Government might only have alienated a large proportion of the men on whom, in the new circumstances, it must depend. We are not prepared to pronounce a definite judgment on this issue, but it is only fair that the public should recognise that it exists, and that the men who were most closely in touch with the currents of Indian feeling were in a better position than the critics in this country to estimate the strength of the forces actually at work.

### *The Indian Fiscal Commission.*

The composition of the Fiscal Commission is eloquent of the new state of things in India. The main issue for investigation is whether the tariff shall be definitely protective, and the decision is likely to have a permanent effect on the whole future of the country, yet of the eleven members whose names have been published, only one is an official, and only one resident in England.

Eight are business men, three of them English and five Indian, while the remaining place is filled by Professor Coyajee, an economist of repute in Calcutta. At first sight there is a certain want of balance between the mercantile element, which, as so many commissions have shown, is apt to take rather short views, and the economists, whose business is to bring short views to the test of wider knowledge and experience; but Professor Coyajee will be reinforced by the member for this country, the redoubtable Mr. J. M. Keynes, who can, at any rate, prick bubbles as well as any man now alive. We are usually reluctant to prophesy, but on this occasion it does not seem very risky to suggest that at least one minority report may be expected from the Commission.

## THE WEEK AT HOME.

*London, Monday evening.*

**Conference Week.**

This is a week of conferences. The hygienic are holding a Health Conference. The pious are holding a Church Conference, and the Irish Conference opens with the Prime Minister tomorrow. Cleanliness and godliness, as represented by the two first, are important, but Labour and Ireland are more in the public eye than the doctors and the bishops at the moment.

The Irish Delegates arrived on Saturday; Mr. de Valera was not among them—a fact which seems to indicate that the alleged dissatisfaction of Sinn Fein at his methods of negotiation was not entirely an invention of the detestable Saxon. The new delegates, of whom Mr. Arthur Griffith is the head, are firm in their determination not to accept British hospitality during their visit; they have taken their own house in London, and in order to keep the faith pure and undefiled among the London fogs, they intend to speak Erse among themselves; it is said that some of the more ardent spirits even proposed to address the Prime Minister in that tongue when they came to Downing Street. But, on reflection, this was abandoned, for it was realised that Mr. Lloyd George might retort by replying in Welsh; and before that terrific threat it is no shame for even the bravest of Irishmen to retreat. The proceedings, therefore, will be in English.

The discussions will, of course, be secret, and it would not be surprising if they were to last for some weeks. There have been rumours that difficulties may arise at the outset, as it is suggested that the Irish intend to demand as a preliminary the release of all interned Sinn Feiners, and the withdrawal of British troops, to which the Government might reply by pointing out that the truce has been broken several times lately by the Sinn Feiners, and that the Irish boycott of British goods is maintained. That would not be a hopeful opening, and it is to be hoped that these *ripostes* may be avoided.

**Unemployment.**

On the other question of the day, it is generally held that the Labour Party have made a serious mistake in refusing the Prime Minister's invitation to co-operate with him in formulating plans for relief. The official Labourattitude is that they must keep their independence in order to criticise the Government's proposals in the House of Commons. By the narrower standards of party orthodoxy they are, of course, fully justified, but it would have probably been wise to recognise that an emergency of this kind, in which they cannot but be particularly interested, demands a broader outlook. They have missed an opportunity, and laid themselves open to the suggestion that they are exploiting the unemployed for party profit.

**The Washington Conference.**

It looked at one time as though Mr. Lloyd George would be unable to go to Washington for the Conference, in view of the many pressing problems awaiting him at home this autumn. It is believed, however, that Washington is urging him to come rather strongly. He will be unable to arrive there at the formal opening in any event, but it is thought that he will make a great effort to attend the later sittings,

**New Transport Problems.**

It is clear that we are at the beginning of a period of extreme competition in the transport world—not, as forty years ago, between different railway companies, but between different types of machines. The regrouping of the railways has made four great territorial systems with defined geographical areas, all inspired by one common purpose—to kill the motor-traffic on the main roads. The trains are quicker—we now have the old two-hour non-stop run from London to Birmingham again—and the new through trains are a marvel; particularly the Aberdeen-Penzance run. Longer as well as quicker trains are to be put on, but this raises the question of still larger locomotives, which is now being considered, with all its connected problems of heavier rails, stronger bridges, and so on. Roughly, the motor is to be allowed to take the pick-up and set-down village to village traffic, while the railways concentrate on getting back their old monopoly of long-distance express traffic. But there is danger to the railways on another flank. The commercial and passenger aeroplane is experimenting on night-flying, and if this can be successfully achieved, it will make a considerable difference to the future of aircraft, and indirectly to the railway.

**A New London Morning Paper.**

An interesting journalistic development is announced, London has long needed a first-class Liberal morning paper, and the *Westminster Gazette* is about to fill the gap. It has been an evening paper ever since the *Pall Mall Gazette* turned Tory, and the old staff of that journal left to start a new journal, and it has already been under the editorship of Mr. J. A. Spender, whose leading articles are celebrated. Indeed, the *Westminster* has always been better at views than news; its motto might almost be, the views of the day after to-morrow with the news of the day before yesterday. The old literary and political tone are to be preserved, but under the new régime it will attempt the happy mean. The sensational papers give the news before it happens, and the *Westminster* gave the news when it has become history; the new morning *Westminster* will give the latest news that is authentic. It will, of course, still be Free Trade, Wee Free, and orthodox Liberal; it will regard Mr. Lloyd George as the prodigal son, and Mr. Asquith as the Nestor, of the age. I wish it success in its new role, which will not be an altogether easy one to sustain.

**A Crisis in Clubland.**

One large West-end club has just suspended its entrance fee, and I hear that others are likely to follow. Hardly a single club, even among the oldest and most

Digitized by Google

exclusive, now has a waiting-list; and the committees are divided between reducing the standard of membership and increasing the subscription. As a fact, the latter has already been done—and the hat sent round as a sort of voluntary benevolence as well—with disastrous results. Men simply cannot afford to pay more. Ten years ago the man who had three or four clubs was fairly common; now the species is almost extinct. The raising of subscriptions has converted the three-clubmen into a one-club man, and it is the political clubs which have suffered most. When a man has to give up either his political or his social club, the odds are that he resigns from the political one. I fancy the old and staid clubs are suffering the most; particularly those few which still look on women as an anachronism to be kept on the doormat. These are those who say that the golden age of clubs is over. This is an exaggeration, but the day of heavy entrance fees and subscriptions is certainly at an end.

**Summer in October.**

The amazing summer has broken out again. Three months ago, referring to the brown pastures, I referred to October in July; now we have July in October. Humanity is more than ever like grass, which the scripture informs us is cast into the oven; in fact, the burning fiery furnace of the prophet is all round us. Learned men are discussing sunspots, and Sir Oliver Lodge says that this is only the beginning of a cycle of hot summers, and that 1920 may be nothing to what is in store for us; while Professor Moore, who is an authority in biochemistry, has been attacking summer-time on the ground that we are getting too much of a good thing. If this kind of weather continues, we shall be getting in next year's crops this Christmas. The most popular explanation is that the Clerk of the Weather resents the high price of coal and gas, and is doing his best to ruin the coal-merchants; in which he has the public heartily with him.

**Prayerbooks and Motor Cars.**

The controversy as to the reform of the Prayer-book has broken out again. A bishop startled us last week by saying that it contains too many prayers for the King and not enough for the people. The Rev. R. J. Campbell, who will be a bishop one of these days, emphatically disagreed; what he objects to is the very frank language of the marriage service, which makes the bride blush—although it does not keep her away from the altar. As a matter of fact, what one may call the more biological portions of that service are generally omitted by the curate. On the other hand, Principal Garvie, a prominent Nonconformist, says that the real root of evil is that there are too many motor-cars; more perambulators and fewer motors is his remedy. But as we produced nearly a million babies last year in this country, I cannot help thinking that the excellent divine's warning is superfluous.

**The Week's Books.**

"From Private to Field-Marshal" (Constable), by Sir William Robertson, is not a controversial book, and it contains no "sensational revelations." For that reason, perhaps, it tells us more of the war than many of its predecessors. Indeed, more than half the work is taken up with the author's own rise in the army, which appears to have been by sheer force of character, since he has notoriously no superfical cleverness or smartness, and he would be the first to disclaim the idea that he was a great winner of battles. As a fact, he has not had the opportunity of seeing much active service.

On the question of the war the disagreement between the C.I.G.S. and the Prime Minister boils down to this, that Robertson was a convinced Westerner, whereas Mr. Lloyd George was attracted by campaigns in Bulgaria, Palestine, and Mesopotamia. General Robertson frankly recognises this incompatibility of temperament which led to the divorce; but he does not rub it in. The book is a little heavy in style, like the author; but—again like him—sound and honest throughout.

A book of quite extraordinary interest is "The Blocking of Zeebrugge" (Jenkins), by Captain A. F. B. Carpenter, V.C. It contains the full story of the famous exploit of the "Vindictive," in which Admiral Keyes signalled "St. George for England," and received the reply, "May we give the Dragon's tail a damned good twist." It was perhaps the most striking feat of the whole war at sea, and even those who are rather tired of the history of 1914-18 should make an exception in this case. If you once open it, you finish it at a single sitting.

**Ocellus.**

## TO OUR LADY READERS.

*"THE NEAR EAST"* invites its *Lady Readers* to enter a competition in which the Prizes will be as follows:—

**1st Prize £10.**
**2nd Prize £5.**
**3rd Prize £3.**

and five Consolation Prizes, taking the form of a year's subscription to *The Near East*, for the *best letters or articles* submitted in accordance with the following conditions:—

Competitors must forward to the Editor a letter or article dealing

(1) with the country *overseas* in which the writer is resident or travelling (or has been resident or travelling) its people, its scenery, customs, folk-lore, or some kindred topic; or

(2) with some personal experience of the writer in an overseas region or country.

Length 1,000-1,800 words.

The letter or article may be either serious or humorous in character; literary style is less to be aimed at than freshness of outlook. In other words, a competitor who writes as she would to an intimate friend and gives an interesting account or description of what she sees or experiences, will have as good a chance of winning a prize as one who sends in a more "correct" article on some well-worn subject.

Each letter or article must be legibly written (or typed) **on one side of the paper only**; it must be accompanied by a coupon (to be found on the last page) duly filled in; and must be addressed:

The Editor,
*"THE NEAR EAST,"*
1, Devonshire Square,
London, E.C. 2. England.

Competitors may adopt a pseudonym, if preferred, for purposes of publication; but correct name and address must be given for the Editor's information.

The Editor's decision will be final.

Unsuccessful articles or letters will be returned, if accompanied by an addressed envelope.

The Editor reserves the right to publish, at the usual rate of payment, any articles submitted which do not win a prize.

See coupon on page xii of cover.

## EGYPT.

*Cairo, September 27.*

**The Labour "Mission."**

Of all the features of the complex political situation in Egypt, the visit of the Liberal-Labour Mission—Major Barnes, Messrs. Lunn, Swan, Lawson and Mills, with Professor Segal as Secretary—has been the most prominent since my last letter. The most sensational development came after the "Liblabs" had been in Cairo two days, with their host, Saad Pasha Zaghloul. The party composed of the Parliamentarians and Zaghloul Pasha and his lieutenants, was to have left on Friday last for Tanta. On the previous afternoon, however, a communication was sent to Zaghloul Pasha requesting him to abandon the journey. Zaghloul Pasha at once asked upon whose authority the request was made? It came from the Egyptian Government, through Sir Gilbert Clayton, the Adviser to the Ministry of Interior, but evidently Zaghloul suspected that there was more in the request than appeared on the surface. In response to his request for the nomination of the authority desiring the abandonment of the trip, he was informed that the military authorities had wished that the visit should be cancelled, on grounds of public security. This information was what the Pasha wanted. He immediately got the Parliamentarians into communication with the military authorities and, as a result of the conversations, the authorities decided to allow the visitors to be accompanied about the country by Saad Pasha Zaghloul, upon the condition that the party would not give notice in advance to each town upon its route. Accordingly the group left Cairo this morning, amidst the usual plaudits of those whose duties were not so pressing as to keep them elsewhere.

Whether the retraction of the decision to prevent Zaghloul Pasha moving about the country, ostensibly for the purpose of showing the visitors the depths of depravity to which the Cabinet has descended in order to maintain its prestige, but really for the purpose of furthering his own cause, was wise, is no longer of any interest. The tour has begun. But how? In a way to confirm the suspicions of those who saw that it is dangerous at the moment to allow anything to happen to inflame the latent excitement of the masses. The first big town passed was Benha. There the crowd had gathered in force, but the police, acting upon instructions, had prevented them from entering the precincts of the station. When the special train arrived the crowd in its enthusiasm, endeavoured to force its way on to the platform. The police ordered them to retreat, and upon a refusal, used their batons to force them to disperse. In the mêlée a boy was injured. The incident in itself is nothing, but it is what it stands for that is ominous. When it is realised that the party did not descend from the train, it can easily be guessed what would have happened if the excitement had been inflamed by the actual presence in the streets of the visitors. In the itinerary are several large towns at which the party proposes to stop. Everyone is awaiting the outcome with some trepidation.

**Unwelcome Visitors.**

The visit has now become transformed into something entirely different from that intended by the visitors. Their avowed intention was to inquire into the allegations made to them in London by Zaghloulist agents. They also issued a statement in which they expressed several desires about the future of the country. But the whole of Egypt, apart from a small section of rabid Zaghloulists, is watching their pregress with anxious eyes, apprehensive lest their very presence and Zaghloul-edited speeches should cause disorders. On the one side is authority, intent upon keeping public order; on the other is a section of people who allege that the legitimate actions of authority are oppression—and who are anxious that authority should be forced to severe measures in order that the blood spilled could be used in evidence against martial law and the Cabinet. To the latter what the Mission hears has ceased to be of serious importance, but what the world at large hears of disorders in Egypt is of paramount interest.

The visitors have already complained that they are not being fairly treated by the Press. The complaint presumably is because of the almost united opposition voiced against their visit at this juncture; but surely that should have been enough to show them that they are regarded as intruders at a delicate moment.

**Zaghloul and the Negotiations.**

Within a week from the time these lines are written the official negotiations will have recommenced in London. The native press has been rather curious during the last few days concerning the hint given by Zaghloul Pasha that he would be willing to consider an invitation to join in the negotiations. 'Who can invite him?' ask the leader-writers; and they answer their own question by citing the Egyptian Cabinet and the British Government. They add that the latter has no power to invite him and that they cannot imagine the former extending an invitation to him since he refused the one accorded to him in May. Apparently Zaghloul has realised that there are to be no bites at the bait he threw forth, for he is throwing himself with renewed energy into the struggle against the Cabinet. The decision of the Court that the Law of Assemblage, which was mentioned in last week's letter, is valid has prevented him from arranging a purely electioneering tour; but he has found a fairly satisfactory substitute in the visit through Lower Egypt with the M.P.'s. He is handicapped, however, by lack of knowledge of the outcome of the negotiations. Therefore, he is unable to malign fully the Adly Delegation or the British Government, but he doubtless will make it clear that unless Egypt is given a place in the very middle of the sun he is the man to whom the country must turn for guidance!

**Entertainment to Foreigners.**

On Sunday afternoon a number of prominent Egyptians entertained to tea a fairly representative gathering of foreigners. The function was supposed to be indicative of the hospitality which the Egyptians are at all times glad to accord to foreigners in the country. It was a graceful act, but if it was intended as proof that the events of last May in Alexandria were entirely without significance to the relations between Egyptians and Occidentals in Egypt, it was simply pathetic. The speeches exchanged overflowed with reciprocal expressions of good will, but one cannot help remembering what has happened in the late months, and if the promoters imagined—as their speeches seemed to infer—that the entertainment signified that the leopard had no spots now, and, indeed, never had any, they must have a poor opinion of the mentality of the foreigners in this country. Curiously enough, within 48 hours of that tea-party, Aly Fahmy Bey Kamel, who has been the acting President of the ultra-Nationalists in Egypt, and who is to leave the country on Friday at the wish of the military authorities, issued a manifesto to the Egyptians urging them to make every effort and contribute every piastre towards the cause of elimination of all foreign domination of the country.

**The Cost of Living.**

The Ministry of Finance has just issued some very interesting statistics relative to the cost of living in Egypt during the last five years. The basis chosen was the average of the cost of necessary foodstuffs in the country during the 18 months immediately before the war. In 1917 the rise was 80 per cent. above pre-war; 1918, 102 per cent.; 1919, 128 per cent.; 1920, 183 per cent.; and for the first six months of 1921, 64 per cent. It will be seen from the figures that the cost

Digitized by Google

gradually rose till it reached its apex in 1920, since when it has been steadily declining, though, as reported recently, the rise in cotton had as a complement a rise in the price of certain essential foodstuffs. Nevertheless, the figures may prove of interest to people who are contemplating making a visit to Egypt during the coming winter season, as it is unlikely that the high prices complained of last year, and which were necessitated by the high cost of living as indicated above, will obtain this season.

## YUGOSLAVIA.

*Zagreb, October 2.*

**M. Protitch's Plans.**

There is quiet at least outwardly in the political world during the recess, but as the Skupshtina will re-assemble in three weeks' time. there is plenty of underground action at work. The chief interest is centred in the personality of M. Stoyan Protitch, who has worked in collaboration with M. Pashitch for thirty years. M. Protitch has been carrying on a vigorous campaign recently, and visiting many parts of the kingdom with a view to forming a strong opposition, and it is within the bounds of possibility that he will succeed in dividing the Democrats from the Radicals, so breaking the coalition, and perhaps in splitting the Radical party itself, where he commands great prestige. In that case, the Crown would probably entrust him once more with the task of forming a Government. The main plank in his programme will be the revision of the Constitution, which is extremely unpopular with the Croats in particular, in which he would probably have the support of the Narodny Club, who were his allies in his last Cabinet: and he may possibly succeed in enlisting M. Raditch and his rustic henchmen, who must be tired of an ostrich policy. It will be remembered that M. Protitch produced a draft constitution a year ago which provided for a system of federalism, for he maintains that the country is yet unripe for a strong centralisation. The support which he gets for this scheme will be chiefly from north of the Save, for the idea is foreign and distasteful to the mass of Serbs of the old kingdom, though there are probably a certain number of thoughtful and influential men who would not be sorry to see a special position given to the Croats with Zagreb as their centre, provided that they maintained their ideal of keeping Belgrade as the moral, political, and intellectual centre of all the Serbs, whether those north of the Danube or west of the Drina. The attitude of the Slovenes is not so certain : these are in a minority, but are perhaps the most advanced Yugoslavs ; as there is no special sympathy between them and the Croats, it is probable that they, with the exception of Dr. Koroshets and his Papists, would support Belgrade. One practical difficulty is the fact that in Slavonia, Srem and southern Croatia, the population of Serbs and Croats is so intermingled that it would be difficult to demarcate a provincial boundary, especially in the great plains between the Save and the Drave. The chief point to note is that, although we must admit that there is plenty of discontent in Croatia, where interested parties ascribe most of the present day evils to the union instead of to the aftermath of the war, and although foreign intriguers, chiefly Magyar and Italian, do all they can to sow dissension between Croat and Serb, it is really a purely domestic question of internal administration.

**Yugoslavia and Albania.**

The restlessness of the Albanians along the frontier is giving a lot of trouble. The usual forays have developed into systematic fighting, with two or three thousand men engaged on each side. The Arnauts are in possession of guns of substantial calibre and range, which are obviously handled by trained artillerymen, possibly Italian. The matter is of more than domestic importance, since it has attracted the attention of the European press, who speak of it as a Balkan war. In Budapest, especially, it is magnified, as the Magyars wish to distract attention from their own frontiers, and are anxious to see the Yugoslavs obliged to remove troops from their northern to their Albanian frontier, and still more to strain relations between Italy and Yugoslavia. Besides, the matter has come before the League of Nations, where the Yugoslav delegate, M. Spalaikovitch, formerly Serbian Minister at Petrograd, made an attack upon Albania, which, although undoubtedly containing a good deal of truth, was unwise, and calculated to divert European sympathy from his side to that of the Arnauts. Mr. Balfour's crushing retort which his outburst provoked, is taken here as another proof of British enmity to Yugoslavia, and all the press credits the British Government with working hand-in-hand with Italy in supporting Albania to the detriment of Yugoslavia. Rightly or wrongly, Yugoslavia is now convinced that Great Britain is to be reckoned as an unsympathetic, if not an actually hostile Power, owing to the intrigues of Rome and Budapest. As a matter of fact, there is no reason why Yugoslavs and Albanians should not live together in harmony, as they have done in the past, for each respects the virtues of the other, and they certainly would do so if they were left alone, and more respect paid to the principle of "The Balkans for the Balkan peoples." Albania has always been a happy hunting ground for the intrigues of interested powers, and Italy is to-day playing the same game there as Austria played before.

**A French Financial Scheme.**

Considerable flutter has been caused in political circles by the offer of a group of French financiers under the title of "Omnium Serbe," who propose to erect big steel works in the Ibar valley, to work the local iron ore deposits and make agricultural machinery and war munitions. Although certain prominent Radical politicians have large mining interests in that district, the Radical Club does not appear to be at all satisfied with the proposal. The Democrats are naturally hostile, and point out that by one clause, the State is to guarantee 14 per cent. interest on the paid up capital before any dividends are partitioned between the State and the group, so that the Omnium Serbe is playing a game of "heads I win and tails you lose," for it is obvious that if in the first year there are no profits, the Frenchmen get their 14 per cent., and so have nothing to complain of, and do not even bear any portion of any loss which might be sustained. It is felt that the proposal should be discussed not by the Cabinet, but by Parliament as a whole. It will be interesting to see whether M. Pashitch is strong or clever enough to carry his point.

**A Yugoslav Insurance Act.**

As becomes an essentially democratic State, Yugoslavia is producing legislation of a marked socialistic tendency. The latest effort in this direction is an Act for the Insurance of Workmen, which is an extremely elaborate and comprehensive scheme for the compulsory insurance against sickness and accidents of all workmen employed within the kingdom regardless of nationality. It is just such a scheme as an idealistic Labour Party would produce, and, if experience shows that it can be carried out in practice without increasing the cost of labour and therefore of commodities too much, it will be an incalculable benefit to the country. Not only

are all workmen amply insured in a most generous manner against sickness and accidents, but also all their families, in the widest sense. It is probably the first legal enactment which expressly recognises the rights of "unmarried wives" and illegitimate children, for it provides that a woman who has lived with a man for twelve months as a wife and born him a child, shall be regarded as his lawful wife. Puritans may object to this as putting a premium on marriage, but the humanity of the principle is admirable, owing to the frailty of human nature, which is no less frail in Yugoslavia than it is elsewhere.

**Personal News.**

When the Austrians were hanging Serbs freely, especially in Bosnia, during the war, King Alfonso of Spain intervened by pleading on behalf of the condemned and in many cases his intervention spared their lives. In recognition of his saving by this means the lives of twelve Serbs at Banjaluka in Bosnia, that town has shown its gratitude by electing His Majesty as Honorary Citizen of their town.

Franja Supilo, a prominent Yugoslav patriot and worker for the Union, died in London during the war. It is now proposed to transfer his remains to his native city of Dubrovnik.

## ROUMANIA.

*Bucharest, September 28.*

**Political.**

The campaign for the overthrow of the Government is being conducted with increased vigour. At the head of the movement are principally the Liberals and the Transylvanian National Party, who, according to rumour will probably form a coalition, to be eventually strengthened by a certain section of the Bessarabians, under M. Inculetz, and Bukovinians, under M. Nistor, and very probably by M. Jorga's group. This coalition is said to be ready to assume responsibility in spite of the present economic situation and to restore gradually normal conditions. It is further rumoured that they will shortly address a manifesto to the country setting out their programme, of which the principal items will be: revision of the Constitution; revision of the Fiscal Reform, by abolishing the levy on capital; franchise reform; and administrative reform..

Despite the fact that the combined Opposition is affirming with confidence a coming change of Government, General Averescu still seems satisfied that his party will continue in power. The way in which he spoke at Jassy, where a large meeting took place the other day, denotes that the Prime Minister has had no indication whatever from the King that he will have to resign before Parliament opens; and the result of the last by-elections does not seem to show that the country desires a change of régime. General Averescu emphasized that the King and the People are the only two factors that can determine a change of Government. He concluded by saying that if, when Parliament opens, the Opposition members who have withdrawn still persist in not attending the sittings, their seats will be declared vacant; and only if at the ensuing by-elections they should be returned would he consider whether his party would have to withdraw or not.

There are still a few more political meetings announced to take place, of which the most important one should be the meeting of the Tzaranist (Peasants') party, when it will be decided whether they will re-enter Parliament or not. As things are, it seems as if the decision of the Tzaranist party may turn the scales for one side or the other.

Parliament will re-open as usual on November 28.

**German elements in Roumania.**

Roumania, in gaining the new provinces, has now a large number of citizens of German origin—about 800,000. They comprise the Saxons of Transylvania, the Schwabs of Banat, the Austro-Germans in Bukovina, the colonists in Bessarabia and in the Dobruja, and others sprinkled in different towns of the Old Kingdom. This German element, having decided to unite into a political party in order to form a more compact national minority in the sense of the Peace Treaty, held the other day a congress at Chernovitz (Bukovina). There were delegates from all parts of the country, as well as one from Germany. From the tone and expressions of the various speeches delivered by several leaders it was plain to understand that they were Germans first and then Roumanian subjects. It is further interesting to quote the declarations on the minority question of Herr Gaspar Muth, who said that until the question is solved in accordance with ex-President Wilson's principles and the promises made at Alba Julia, there will always be dissatisfaction. He further asserted that their duty, as Germans, is not only to contribute to the material development of this country, but also to assist in its spiritual and moral improvement.

The Roumanian press considers that the tone of the first Congress of the German element in Roumania is very tactless, considering how lenient and tolerant the Roumanians are towards the national minorities and especially towards the German element, who, however, deserve such consideration least of all when it is remembered how they behaved during the time of occupation in this country.

**General News.**

Dr. W. A. Craigie, Professor of Philology, at Oxford, was received with great honour at a sitting of the Roumanian Academy on Friday last. On this occasion he gave a very interesting lecture on the famous Oxford English Dictionary, in the compilation of which he has collaborated for the last 24 years. Dr. Craigie has since proceeded to Cluj, where he will give two lectures at the University on the history of English language and literature. On his return he will stop at Sinaia, where he will be received in audience by the King and Queen. Before his departure for Constantinople and Athens he will deliver his last lecture at the "Fundatia Carol." Dr. Craigie will have spent 50 days in Roumania, devoted to studies, visits and lectures in the principal centres of the country.

It is reported that as a result of the recent negotiations between the Roumanian and Yugoslav delegations for the definite settlement of the Banat frontier, Roumania has been alloted a territory of nearly seven hundred square kilometres, territory which was due to her two years ago in accordance with the Sèvres Peace Treaty.

Admiral de Robeck has arrived in Bucharest, accompanied by a staff of five Naval officers.

## GREECE.

*Athens, September 25.*

**The Situation.**

There is no marked change in the situation since last week. The Hellenic Army continues to withdraw from all its advanced positions, which are promptly reoccupied by the Kemalists. The latter, who had but a fortnight ago given up all hope of retaining Angora, are naturally taking full advantage of this unexpected turn of events, and are proclaiming to the whole world that they have won the war. Mustapha Kemal Pasha is once again bringing the question of Smyrna and Thrace on the carpet, and boasts that ere long he will throw the entire Greek Army into the Gulf of Smyrna. The Greeks, on the other hand, are feverishly consolidating their new positions about 50 miles east of Eskishehir, from which the Turks will find it extremely difficult to dislodge them, despite the fact that the reinforcements they received recently from the Caucasus are reported to be considerable.

The Greek Government has officially denied the rumours to the effect that it had asked the Great Powers to intervene; and though there is a chance of the latter's doing so without being asked, it is feared that their good intentions would again be doomed to failure in view of the unyielding spirit prevailing amongst the two adversaries.

Whilst the atmosphere in Athens appears—at least on the surface—to be calm, the financial question is, no doubt, causing a good deal of anxiety to the Govern-

Digitized by Google

ment. If, as anticipated, the entire Army is going to be kept on a war footing throughout the winter, the expense alone for clothing the men is bound to be enormous.

M. Maximos is not a very happy man just now. He has brought no money with him, but he is the bearer of many proposals for loans. The conditions, however, are so stiff, and would have such a disastrous effect on the future economic development of the country, that the Government, hard pressed for money though it is, is not likely to accept them. There is some talk about concluding a small loan in order to meet immediate requirements, In any case, the present situation cannot possibly continue indefinitely, and it would surprise nobody if the Government announced very shortly the issue of more uncovered bank notes (fiduciary issue).

**The Prime Minister's Declarations.**

To a number of journalists who asked his opinion with regard to the military situation, M. Demetrius Gounaris made the following declarations :—

Following the splendid victory of our troops as a result of our heroic combats near the Sangarius, the High Command, with the approval of the Government, has decided that it is unnecessary to continue operations as far as Angora. The object of these operations, as has already been stated, was not the extension of our occupation up to the point which we have reached, should this point be either Angora or the Sangarius. The real objects of the operations were to push back the enemy from the lines which had been planned as the limits of our occupation, to destroy completely intermediate communication, and above all, the railway line without which any enemy movement, should he contemplate a serious attack against us, would become difficult, if not impossible, and to use up all available resources of the region occupied by the two armies, after the retreat of ours.

All this has in a large measure been obtained. It certainly would have been advantageous to obtain the few advantages which still remained to be realized, but the desperate defence with which the enemy opposed our advance, without, however, being able in any way to stem on any part of the line the impetuous ardour of our men, and the fact that he relentlessly fought inch by inch, delayed operations until the near approach of autumn.

The advantages which would have resulted by pushing our offensive to Angora, were not considered proportionate to the sacrifices which would have had to be made, and to the fatigue and privations which, in view of the advanced season, our Army would have undergone, especially during its retreat. Our offensive has therefore been terminated, and our Army has returned to its original line of demarcation.

The enemy attempted no counter-attack and did not even harass us in our retreat. We are therefore actually on the line which was judged most convenient to cover our occupation in Asia Minor. This comprises an important sector of the railway to Baghdad, from Biledjik to Afion Karahissar, and thence 70 kilometres as far as Chai. The importance of the loss of this line to the enemy and its occupation by us will be readily understood. Our Army has been victorious, and the victory has assured us of many very important advantages.

We must now organise the country which we have occupied, in order that we may defend it with a minimum of sacrifice and expense. This is a paramount duty. We shall proceed with the organisation which we will complete as far as possible. I have already spoken on the subject to the High Commissioner, M. Stergiadis, who will arrive during this week. We shall then discuss the basis of this organisation and shall proceed with its execution as soon as decisions have been arrived at.

**Earl Granville's Wallet.**

Whilst on the 7.30 train from Athens to Kefissia, where his Lordship has been staying during the summer, the British Minister, Earl Granville, was robbed of his wallet containing a considerable sum of money and personal papers. The thief has not yet been arrested, but suspicion has fallen on a well dressed person who was travelling in the same compartment.

The *Estia* commenting on this impudent theft, writes as follows :—"The 'unknown' well dressed person whose 'traits' Lord Granville remembers quite well, is requested to return the wallet to the British Legation, and to retain the money as a reward for his honest trouble. If this is not done he will probably be sorry for it."

Strange to say, only about a month ago Earl Granville's house in Kefissia had been broken into by burglars who stole some silver and various other things. In this case, however, the thieves were caught a few days later.

On the day following the British Minister's unfortunate experience, the Consul of Portugal also had his wallet, containing about 2,000 Drachmae, stolen from his pocket on the Kefissia train.

**Personalia.**

King Constantine will probably return to Athens from Asia Minor towards the end of this week. He will be given a great reception.

Princess Elisabeth has left for Smyrna.

*Athens, October 1.*

**The King's Return.**

Athens gave a very enthusaistic welcome to the King on his return from the Asia Minor front, on Thursday last. It had been raining heavily during the night before, and with the sky overcast the outlook was very threatening on the following day. This, however, did not prevent thousands of people from waiting patiently from early morning outside the Station and along the roads through which the Royal cortège was to pass. Stadium and Hermes Streets were gaily decorated with the Greek colours and Allied flags, the Union Jack being very prominent. His Majesty, accompanied by the Crown Prince, Prince Nicolas, and the Minister of War, M. Theotokis, embarked at Mudania, on the s.s. Constantinople, and arrived at the Piraeus on Thursday morning. The Queen, and the Princesses Helene, Catherine and Irene, as well as the Council of Ministers, received the King at the Piraeus, the Royal train arriving at Omonoia Station soon after eleven o'clock. Thence continuously cheered by the crowds, the cortège proceeded to the Cathedral, where a Thanksgiving service was held, the Metropolitan of Athens officiating. All the Public Buildings and Banks remained closed on Thurs-

day, and at night the town was illuminated, but the rain had recommenced heavily and the streets were deserted.

Prior to his departure from the Front, King Constantine issued the following Proclamation to the troops :—

Officers, N.C.O's. and Men.

On the occasion of my departure for the place whither I am called by the duties that are imposed upon me to-day, I wish to thank you and to praise you, but, I fear, words cannot express all that my heart feels. The greatness of your deeds, which the entire world recognises and admires, makes me bless God for being a Greek. You have shown yourselves worthy successors of all the heroes produced by the Greek Race, and History will inscribe our epoch in letters of gold. You have shown what we Greeks are worth and what we are capable of doing when we obey the call of our country. You have struck the enemy to the heart, you have poured out your blood—that so precious Greek blood—to liberate our enslaved brothers, and to re-establish civilization in the country where our ancestors were illustrious. To attain this you have performed a task which no other Army could have done so well and so rapidly.

I have heard you cry "To Angora," "To Angora." But I did not wish to let you go there and undergo fresh fatigues and further sacrifices, as the task which you have so far accomplished is sufficient for our purposes.

I am certain that you will maintain with all your strength the country which you have liberated. You will prove to the entire world, now looking upon you with admiration, that although you have arrived by force of arms where you are at present, you have not done so in order to fight the Mussulman people who live in the country of your ancestors, but to offer to them all, without distinction of race or religion, the gifts of civilization and love which ensure peace and tend to the progress and prosperity of the peoples. You have brilliantly accomplished the task of war with which the Motherland entrusted you. It only remains now for you to hold on to the results thus obtained in order that the necessary time which the work of organization requires may be completed, as it would be a pity if so much suffering, so many struggles, so many sacrifices, and so much glory were wasted.

When you have completed the little which remains to be done, you will return to your homes, happy and proud of having enlarged and covered with glory our beloved Motherland.

Your ardour, which guides your bayonet, has taught a cruel lesson to the enemy, but he, though crushed by you, is lying in wait and hopes that you will tire so that he can recover what you are now holding. You must therefore show him that the Greek never tires when he is struggling for his country, and with your bayonet thrust forward you will cry to him: 'Come and take it." (the famous answer which Leonidas gave to Xerxes at Thermopylae in 480 B.C.)

**The Prime Minister's Journey.**

M. Gounaris will probably leave for London within the next ten days in order to lay the Greek views before Mr. Lloyd George and Lord Curzon, and also to set forth the terms on which Greece would be prepared to conclude peace with the Kemalists. It is understood that M. Gounaris, while in London, will seize the opportunity to make further attempts with a view to raising a loan for this country, or, at least, to securing payment of the unused credits opened in favour of the previous Government.

**The High Commissioner of Smyrna.**

The Greek High Commissioner at Smyrna who, it is very persistently rumoured, will, before long, be Greece's Prime Minister, arrived in Athens on Wednesday. He stayed at the Hotel Grande Bretagne, where he was visited shortly afterwards by M. Gounaris and the other members of the Government. In the evening a long Council of Ministers was held, which occupied most of its time discussing the question of administration of the recently occupied territories In Asia Minor.

M. Stergiadis was received in audience by the King half an hour after the latter returned to Athens.

**The Colonization of Thrace.**

The Governor-General of Thrace reports that the colonization is proceeding actively in the Province, and he hopes that as far as Western Thrace is concerned, thi will be completed by the end of October. Thousand of small houses have already been built, and there are many more under construction. Over and above the relief allowance allotted to the refugees and small landowners, the Authorities have decided to grant additional help, either in the form of money, or in raw material, or in foodstuffs.

## BULGARIA.

*Sofia, October 2.*

**The Question of Government Employees.**

In the course of a recent declaration M. Tourlakoff, Minister of Finance, said that the salaries of the State employees would very shortly be substantially increased. Whilst it is essential to double or even treble the pay of all functionaries it is also essential that the Government should satisfy themselves that there are no superfluous officials. For example, at a certain Department in the Ministry of Foreign Affairs there are approximately fifteen employees who perform regular work. It is, however, understood on a very good authority that there are fifteen other employees whose only duty is a present themselves at the beginning of each month in order to receive their pay. If this is true—and it would seem that it is—the Government would be well advised to get rid of these fifteen 'hangers-on.'

The above is only one instance of alleged extravagance on the part of the Government, but it would also be interesting to know what is the total number of officials employed at the Legations abroad ? It is said that the numbers are greatly in excess of the pre-war standard and that some of the officials in question speak only their mother tongue. Considerable economies might be effected by reducing some of the Legation staffs as with the Bulgarian Lev only worth four Swiss centimes, a huge sum of money must be necessary each year for the payment of the personnel.

**War Clouds.**

The recent news from Albania is very disquieting, and it would appear that we are on the brink of hostilities between Yugoslavia and the Albanians. If this unfortunate event were to come to pass, it is not easy to see how Italy could stand idly by and see Yugoslavia gradually conquer Albania, as she undoubtedly would do.

Bulgaria fortunately does not border on Albania, and there would appear to be no reason why she should be mixed up in the affair in any way whatsoever. M. Stamboliisky and his supporters always preach the virtue of strict neutrality, and it is only to be expected that they will continue their past policy. Bulgaria has everything to lose and nothing to gain by associating herself even indirectly with any foreign Power. Her role must be one of complete and absolute neutrality.

What the Yugoslavs are thinking about Albania has been reflected in their press ; but more important than this is the recently-begun press campaign inciting the Belgrade Government to take steps that will ultimately lead to the occupation of Salonika. That the Yugoslavs are not content with the present situation at Salonika is a secret to no one, but up to now their press and their politicians have maintained a praiseworthy silence on the matter. One may well ask what the somewhat unexpected outbreak portends ? It is noteworthy that it occurred when the Greeks were having the worst of matters in Asia Minor. And what of Greece and her ability to resist warlike action on the part of Albania and Yugoslavia ? Many English writers hold that Greece has been fighting continually since

1912 and that she is bearing a huge load of taxation and war weariness. Although it is worth while pointing out that during the four years, August, 1913, to July, 1917, Greece did absolutely no fighting, one is inclined to agree that Greece has enough to do in Asia Minor, which will prevent her from paying much attention to events in Albania. She cannot afford, however, to disregard the threat to Salonika, as the port constitutes a very great asset to the commercial life of the country. The only other remaining Balkan country (if I may call it so for the moment), is Roumania ; and one would imagine that she would be strictly neutral in any dispute that arose between Yugoslavia and Greece, as she is bound to the former country by the ties of the Little Entente and to the latter by the double Royal marriage, and in addition has troubles of her own which will not make her eager to interfere in any quarrel in the south-west corner of the Balkans..

**General News.**

The Bulgarian National Poet, Ivan Vasoff, was buried on Wednesday the 28th and the day was observed as a day of National mourning throughout the country. The King, the Cabinet, and many Deputies, officers, and officials attended the funeral.

General Gekoff, the Commander in Chief of the Bulgarian Army during the late war, who is due to be tried by the High Court of Justice at Sofia on October 11, is expected to arrive in Sofia on the 7th inst.

It is announced that the Soviet have refused to conduct negotiations with the Slovakian Government, who offered to act as intermediary between Sofia and Moscow with regard to the repatriation of Bulgarian subjects from Russia.

## CORRESPONDENCE.

### THE NEAR EASTERN TANGLE:

*To the Editor of "The Near East."*

Sir,—In a recent article when commenting on the tangle in the Near East *The Times* writes of "the mockery of European statecraft which has drawn into its modern struggle for world hegemony the ruder forces of the East." When the Indian troops were brought to fight our battles in Europe I have no recollection of *The Times* questioning the morality of the action ? On the contrary the whole of the British Press acclaimed the move as demonstrating to the Germans the solidarity of the British Empire ; so I fear that *The Times* must share its responsibility of this "mockery of statecraft."

Again in the same article we learn of "the danger that we may set in motion forces that we are not able to check or control" . . . . "the advance of the Greeks in Asia Minor has violently stimulated national feeling amongst the Turks and has provided an occasion for agitation among the Mohammedans throughout the Middle East and as far as India" . . . "The Bolshevists in their turn have taken advantage of Mohammedan unrest to extend their interest to Persia and Afghanistan and up to the frontiers of India" . . . . "It will be fortunate if the new kingdom of Mesopotamia, towards the establishment of which we have spent so much in British lives and treasure, is able to maintain itself intact and to affirm its independent existence." . . . . "The perils in which the new movement in Asia Minor involve our own manifold interests in the East are sufficiently obvious in this country."

I can only say that it is a tragedy that this obviousness was not made apparent to the Government and *The Times* when the Turkish Treaty was under discussion. It is difficult to reconcile the policy now preached with the article which appeared in *The Times* of February 1920. However, if the *The Times* has been converted to the views I have so repeatedly (thanks to your generosity) expressed in *The Near East* I must not grumble. And having only justice and the welfare of our Empire at heart, it is poor consolation to me to write : "I told you so." Unfortunately, it by no means follows that a policy urged in 1920 will have the same efficacy if inaugurated *now*, with the Turks strengthened by the failure of the Greeks to reach Angora. It will certainly be much more difficult to persuade the Turks that we are actuated by a sense of the justice of their cause and not by fear of the consequences of a refusal. In fact, if our change of policy is to bring forth fruit, undoubtedly there must be a change of Government, or at all events the Prime Minister must make room for someone more in sympathy with Moslems in general and the Turks in particular. He cannot get away from all his speeches ! I am one of those who *believe* that Mr. Lloyd George won us the war, but I am quite *convinced* that he has nearly lost us the Peace, if it is only by the way this Near Eastern question has been muddled.

It is often said that there is no one to replace Mr. Lloyd George ; but what about Mr. Churchill ? His speech at Dundee seemed to indicate a grasp of the requirements of the present situation. With Mr. Lloyd George "retired hurt," Mr. Churchill's ability might yet save us.

I am etc.,

COLES PASHA.

Biarritz, October 1, 1921.

### THE GREEKS IN ANATOLIA.

*(To the Editor of "The Near East."*

Sir—I beg to submit herewith the following particulars concerning the restoration by the Greek Army Authorities of the Baghdad and Anatolian railways. This information should prove gratifying to British interests in those undertakings.

Athens, October 7, 1921.

The Press announce that the first train from Afion Karahissar arrived yesterday at Smyrna. Direct railway communication between Eskishehir Smyrna and Eskishehir-Afion Karahissar has been re-established.

An article appears in the *Katherimini* describing the rapid reconstruction of the railways of the occupied territories by the Greek Control.

It was in July last that the Greek Army occupied the line Ismid Eskishehir—Afion Karahissar, as far as Chai, the part of the Baghdad Railway occupied after the Armistice by the British, and then by Kemal. At the time of its occupation by the Greeks, all rolling stock had been taken away to Angora, every bridge destroyed, while a great number of locomotives and wagons had been abandoned and left in a very broken-down state at Eskishehir. In a word, the whole system south of Ismid was unworkable. In addition, the Kemalists had left no trace of accounts of their administration of the railway.

The Greek Railway Control, established by the army, retained all the former personnel, and set itself diligently to the work of restoration, relaying the rails, reconstructing the bridges, and repairing the locomotives and wagons, so that, in a short time, seventy kilometres of the branch line from Karakeuy to Ekishehir were open, and another stretch of equal length from Ekiskehir, Beylikshir towards Angora was workable for military transport. Meanwhile the line from Kutahia to Afion Karahissar had been also repaired. By September 2 the whole line was workable, while in the direction of Angora communication was re-established to the point of confluence of the Poursak and the Sangarios, and with rails brought from Salonika, the branch line Touloubounar to Afion Kaharissar connecting with the Smyrna-Cassaba line was reconstructed.

The interests of foreign capital have been assured, a representative of British stockbrokers who visited Ekiskehir expressed warm appreciation of the work accomplished. The control of the railways and military lines have now in working order 340 kilometres of the Anatolian and Baghdad railways, with 370 kilomteres more of the Smyrna-Touloubounar line. The cost of reconstruction has been estimated at 600,000 drachmae. The accounts of the Greek Control are so scrupulously kept that it will be possible to determine exactly the damage caused by the Turks and that by the Greeks, of the line beyond the Sangarios.

According to these estimates the Turks are accountable for two million pounds Turkish, the Greeks for from six to seven thousand drachmae only, without taking into the reckoning the rolling stock supplied by the Greek administration.

The article in the *Katherimini* also explains the measures adopted by the Greek authorities for the administration of the tithes, so as to safeguard the interests of foreign shareholders represented by the administration of the Ottoman Public Debt.

I am ,etc.,

A. RIZO RANGABE.

## JEWISH TALES FROM JERUSALEM.

By Estelle Blyth.

*These short Tales out of Jewry were among the many collected by an old friend, who was long a missionary to the Jews in Palestine. He had not one drop of Jewish blood in him, but he loved the Jews greatly, and gave the best years of his life to them. These stories were told to him on different occasions by Jews whom he visited, and he wrote them down afterwards. Some of them he passed on to my sister; she has given me her notes, from which these Jewish Tales may be retold.*

### The Passing of Abraham.

It is written in the Bible that Father Abraham lived to be an hundred and eighty and five years, and then he died, and was gathered to his fathers; but the manner of his death is not told us in the Holy Book. Nevertheless, it was known to the learned Rabbis of old, for to them everything was revealed by the power of the Almighty.

After this manner, then, was our Father Abraham gathered to his rest. Because he had pleased the Lord by walking uprightly, and by his exceeding faithfulness of heart in all things, the Lord sware unto him that he should not die until he himself desired the Lord to part his soul from his body. Now Abraham was young in mind and in heart, and his body was lusty and strong as a youth's.

*Mar Saba Monastery, Near Jerusalem.*

One day, as Abraham sat in the door of his tent, re-living in thought the long years of his life, there came to him an old and trembling man, whose eyes were so dim through age that he could not see the stones in his path but fell over them, and whose body was so weak that, being fallen, he could not raise himself out of the dust. Abraham's heart was filled with pity for him, and he ran and raised the ancient stranger from the earth, and led him to his tent, and placed him in his own seat, and called to the young men to set food and drink before him. The old man blessed him for his charity, and began to eat; but his withered hands trembled so greatly that the food fell from them into his lap, and when he raised the cup to his lips the wine ran down upon his beard.

Then said Abraham, pitying him "Alas, my brother, the years lie heavily upon thee, that thou dost tremble so, and art weak."

"The days of thy servant are an hundred and threescore and seventeen," mumbled the old man.

"What!" cried Abraham, "art you then but two years older than I?"

"Thou hast said," replied the other.

"And shall I, in the short pace of two more years, become even as thou?" asked Abraham, trembling, for he felt the cold winds of death blowing around him.

"Thou hast said," replied the stranger; and as he spoke, the cup fell from his hand to the ground, and the red wine ran out like blood, and the dust soaked it up, and it was gone.

Then Abraham rose from his seat, and stretched out his hands to heaven, and cried aloud: "Oh Lord of my hope, let not the joy of my life be swallowed up in trembling! Take me, I pray Thee, now, before the darkness settles on my eyes and weakness fetters my limbs."

As he spoke, the ancient stranger sprang to his feet and his disguise fell from him, and he stood up. And lo, he was stronger than Abraham and younger than a youth, for he was the Angel of the Lord, and in Him all Youth and Strength and Life are eternal. The Angel drew from Abraham's body his willing soul, and bore it upwards to the place of rest.

### Two Legends of Elijah.

We are told that Elijah loved to frequent the place of learning, and to listen to the Rabbis as they expounded the Divine Law. It so happened that once, even on the first day of the month, he came late, and the Rabbi enquired of him the cause of his lateness. Elijah answered: "I have to awaken Abraham, Isaac, and Jacob, our Fathers, each one in succession, to wash the hands of each, and then to wait until each has ended his devotions and has fallen once more into sleep."

"Why do not our Fathers arise together?" asked the Rabbi, and Elijah made answer: "It is because the power of their united prayers would cause the Advent of Messias to take place before the time appointed."

"Are there amongst us here any such mighty men of prayer?" asked the Rabbi.

"Are not Rabbi Cheyah and his sons with us?" answered Elijah.

Upon hearing this, the Rabbi made haste to proclaim a solemn fast, and he caused Rabbi Cheyah and his sons to come down to keep it also. The Rabbi Cheyah and his sons offered up their prayers, and when they came to the words in the Eighteenth Benediction, "Thou causest the wind to blow," a mighty wind arose; and when they uttered the words: "Thou causest the rain to fall," the water fell from heaven in torrents. Before they could say: "Thou restorest life to the dead," the world was convulsed by a fearful earthquake. Then was the question asked in heaven: "By whose mouth has the secret been revealed?" And Elijah confessed that it was by his, and there was laid upon him the infliction of sixty lashes of fire. He then rushed amongst the congregation in the likeness of a fiery bear, and scattered them.

It is related of Rabbi Joshua ben Levi that one day he found Elijah standing before the entrance of the tomb of Rabbi Simon ben Yocha.

"Shall I enter into the world to come?" asked the Rabbi.

"That is as the Lord shall will," answered Elijah; and though the Rabbi saw no other person standing there, he heard most clearly the voice of another.

"When will Messias come?" asked the Rabbi.

"Go and ask thy question of Messias Himself," replied Elijah.

"Where is He, that I may find Him?" cried the Rabbi, with the cry of all the nations throughout all the ages.

"Thou shalt find Him this day at the entering-in to Rome."

Digitized by Google

"Give me a sign by which I shall know Him," pleaded the Rabbi.

"Thou shalt find Him amongst the poor and the sick that ask for alms at the gates," answered Elijah, "and thus shalt thou know Him,—all the others change the wrappings round their sores at one time, but He changes them one by one, lest if the time appointed come and He be called whilst He is changing the cloths, He must stay to finish the work and so His coming shall be delayed."

So Rabbi Joshua ben Levi went to Rome, and there he found Messias amongst the poor and the sick and miserable, even as Elijah had said.

"Peace be unto Thee, my Rabbi and my Teacher," the Rabbi said.

"Peace be unto thee, thou son of Levi," Messias answered.

"When will the Master come?" asked the Rabbi. Messias answered him: "To-day."

Immediately the Rabbi was back at the cave, and there he found Elijah, to whom he told his story.

Then said Elijah: "In calling thee 'the son of Levi,' He gave thee His promise that thou shalt enter hereafter into the world to come."

By now the sun had set, and night was falling.

"Alas!" cried the Rabbi, "the day has passed and He has not come! Oh my father, has He then deceived me?"

"Nay," answered Elijah, "for He meant, 'To-day, if ye will hear His voice!'"

**The Sea Walls at Acre.**

## M. GAVRILOVITCH ON SERBIA.

The story of the struggles by which Serbia arose out of her subjection to the Turk was the theme of a lecture given by M. Gavrilovitch, Yugoslav Minister, on Thursday last at King's College, London. He said that after the fall of mediaeval Serbia the country was dismembered and distributed into a number of areas, in each of which ruled a Pasha, exercising absolute power. Each such pashalik was divided into *nahis* presided over by a kadi assisted by an executive officer; and these officials, not being paid by the Porte, paid themselves at the expense of the persons amenable to justice, whom they tried by the Koran, ignoring their language and their customs, and admitting none other than Mussulman evidence. The mass of the people remained Christian, professing the Orthodox Greek faith; and were chiefly occupied as tillers of the soil and exploiters of the woods, practising especially the breeding of swine. There were two military castes, both of Moslem creed. To the first of these belonged the Spahi, master of the village, which on condition of military service he held in fief from the Porte. The Spahi levied tithes and taxes from the villagers, and compelled them to all sorts of labour. The other military caste was that of the Janissaries, who garrisoned the towns. There was another privileged class, that of the Turks who lived in the towns, in whose hands were the industry and commerce of the country.

The lecturer told how the opressions of the Janissaries led at the very end of the eighteenth century to a revolt, which at first was looked upon kindly and even assisted by the Porte. Later, when success had emboldened the insurgents, their demands became greater, and the rebellion was directed against the Turkish Government. The lecturer detailed the various stages through which the movement passed, and the part played by the Great Powers who felt themselves chiefly concerned. Karageorge, he said, was the great leader of the movement; he was a colossus, quite illiterate, brave to recklessness, and subject to fits of blind temper. In October, 1813, Karageorge lost heart and fled to America, followed by many of his chiefs. Among the chiefs who did not fly was Milosh Obrenovitch, who rallied the people for another insurrection, and this in 1815 had a large measure of success—due to the intervention of Russia, whose hands had previously been tied by fear of Napoleon. Obrenovitch gained his ends by diplomacy and oriental lack of scruple rather than by fighting; he was the statesman as Karageorge had been the soldier of the movement. In 1830 Serbia became a semi-independent principality, with Obrenovitch as hereditary prince. The Berlin Treaty brought the country complete independence, and after the recent war the kingdom of Yugoslavia was set up, into which Serbia merged.

## NEWS IN BRIEF.

M. Pierre Loti, who is resting at Rochefort, is indisposed, and though not dangerously ill, is very weak.

From an anonymous Greek citizen, resident in Great Britain, the Greek Red Cross has received a donation of £1,000.

According to the Paris newspapers Ivan Mitrowan, Trotsky's confidential secretary, has been arrested at Belgrade.

A Bolshevist mission is reported to have arrived at Varna, where it is awaiting permission to proceed to Sofia.

Sofia Communists have lost a considerable number of seats to the Agrarian and Middle Class Parties in the municipal and communal by-elections.

Father Dunstan has been given the charge of the British R.C. Community in Alexandria, in lieu of Father Felix, who has come home.

A writer in the *Outlook* of October 1 states that 'Palestine is honeycombed with secret societies, the object of which is to prevent the further importation of Jews.'

The Colonial Office states that a further aeroplane attack was carried out in the Nasiriyeh area of Mesopotamia on September 30, against the section of the Beni Said tribe, which had adopted a defiant attitude. Rowanduz area is now quiet.

It is officially stated that, according to present arrangements, the *personnel* of the 5th Lancers, 21st Lancers, and 19th Hussars due for disbandment, will leave India in the Braemar Castle on October 15, while the *personnel* of the 20th Hussars, now with the Army of the Black Sea, but also due for disbandment, will embark on November 1 in the Bahia Castillo.

The Persian Legation in London, has received the following official communication from the Persian Foreign Office; Colonel Mohammad Taghi Khan, who for some time has been causing trouble in Khorassan, has been defeated, and killed in action, while his followers have surrendered to the Government troops.

The Armenian Refugees (Lord Mayor's) Fund has completed the transference of the Armenian orphans who were in its charge at Cyprus to permanent quarters on the outskirts of Constantinople. For aid in maintenance of its work at Constantinople, at Erivan (where 78 destitute orphans have recently been taken over), and elsewhere, the fund, whose offices are at 96, Victoria-street, S.W., makes a further appeal for help.

A new law has been promulgated in Khartoum, relating to those persons found in the street in a drunk and disorderly state. By this enactment the transgressor will be liable to arrest, and to a punishment of 7 days' imprisonment, together with a fine amounting to P. T. 100. A second offence within the space of six months will be punishable by 21 days' imprisonment and P.T.150 fine. A third offence will carry with it six months' imprisonment and P.T.300 fine.

## KING FAISAL'S CABINET.

It is officially announced that King Faisal having called on the Nakib of Baghdad, President of the Provincial Council of State in Irak, to form a new Cabinet, portfolios have been distributed as follows:—

| | |
|---|---|
| His Highness the Nakib, G.B.E. .. | Premier |
| Haji Ahmed Namji .. .. | Interior |
| Jafar Pasha al Askari .. .. | Defence |
| Sassoon Effendi Haskail .. .. | Finance |
| Naji Bey Ibn Yusuf al Suwaidi .. | Justice |
| Saiyid Muhammad Ali Effendiel Fathli | Wakfs |
| Abdul Latif Pasha Mandil .. .. | Commerce |
| Izzat Pasha .. .. .. .. | Public Works |
| Sheikh Abdul Karim Jazairi .. .. | Education |
| Dr. Hanna Khaiyat .. .. .. | Health |

**SCHOOL OF ORIENTAL STUDIES.**
London Institution Finsbury Circus, E.C. 2

## A MODEL FRONTIER CAMPAIGN.

**"THE RAIDERS OF THE SARHAD" By Brigadier-General R. E. H. Dyer, C.B. (London, H. F. and G. Witherby. 15s. net.)**

In February 1916, Colonel R. E. H. Dyer received orders to "take charge of military operations in South-Eastern Persia." The world-war was then in full swing, and Persia swarmed with German emissaries, who sought access to India and Afghanistan, in order to carry on their poisonous propaganda. The northern routes thither were barred by long stretches of waterless desert, and the hostility of Shia Hazaras in Afghanistan. A more favourable field lay open to these vermin in the Sarhad, *lit* "Boundary," which is sandwiched between Persia and Baluchistan. It is a region of volcanic mountains and sparsely-cultivated valleys, inhabited by nomad tribes who gave allegiance neither to the British Government nor to the Shah. Owing to falsehoods disseminated by German spies, the whole of Sarhad was aflame, and on Colonel Dyer devolved the heavy task of restoring order. He lost no time in reaching Nushki, the terminus of a light railway running west from Quetta; and started thence by motor-car for the frontier post of Robat, which lay at a distance of 300 roadless miles. Here began a series of mishaps, each of which was surmounted by courage and good luck. The most serious was the loss of all Colonel Dyers' petrol, which escaped from the tank owing to a car accident. He was spared a tramp of 200 miles by finding a large quantity of the precious fluid derelict in a wayside rest house. Pursuing his journey after nightfall, he came within an ace of death at the hands of some friendly Irregulars, who mistook the car's lights for those of a German airship! Their Havildar, Idu by name, was highly intelligent, and had Sarhad politics at his fingers' ends. From him Colonel Dyer learnt that the debateable land was occupied by four clans, all fanatical Sunnis, inveterate raiders, and armed with repeating rifles of the latest type. A certain Jiand Khan was recognized as overlord, but his brother-chiefs, Halil and Juma, had to be reckoned with. By a wonderful stroke of luck Colonel Dyer lit upon a man who became his *alter ego* throughout the ensuing campaign.

On reaching Robat, he found to his dismay that the only force available for field operations consisted of 17 cavalrymen, nine trained foot soldiers, 65 raw levies, two mountain and as many machine guns, and 600 camels. But fortune favours the brave; Colonel Dyer resolved to take the field with this insignificant force against 6,000 odd tribesmen armed to the teeth. As a first step he telegraphed to Simla for local rank as Brigadier-General; it was promptly conferred, and Colonel Dyer found himself in possession of the smallest brigadier's command on record. Then propaganda engrossed the brand-new General's attention. In concert with the indispensable Idu, he started a rumour to the effect that a British army 5,000 strong was approaching; and his harmless, necessary motor-car was fabled to be a tank capable of spitting live shells. These 'shaves' found credence throughout the Sarhad, and the delusion was fostered by General Dyer's enormous camel-train. So, by dint of bluffing he induced Halil, Jiand and Juma to surrender themselves as prisoners. To disarm them was impossible, and for several weeks the little force was in hourly danger of being wiped out by the suspicious tribesmen. Nothing daunted, General Dyer took possession of Khwash, the Capital of the Sarhad; but was himself besieged therein by Jiand and Halil, who at last discovered that they had been victims of a huge practical joke. Rescued in the nick of time by a small cavalry force under Major Landon, Dyer had a few days' breathing space, which he utilized in blowing up the walls of Khwash, and replacing them with an entrenchment. But supplies running short, the General started with Major Sanders to take possession of a large stock of *bhusa* (fodder) stored in a village three-quarters of a mile from Khwash. Learning *en route* that it had been fired by one of Jiand's followers, the Europeans pushed forward with an escort of 15 cavalrymen. On arriving at the depot they found it occupied by at least ten times as many tribesmen. Their tiny force was soon surrounded by an angry crowd fingering loaded magazine rifles, Jiand and his evil genius, Nur Mohammad by name, being well in the foreground. What followed was perhaps the most thrilling episode in the campaign, and it must be described in General Dyer's words:—

> It was obvious that I had allowed myself to be caught in a trap; we all knew it, though not one man with me showed it by the quiver of an eyelid. I turned to the man whom Murad had brought forward and placed before me as the burner of the straw—"How dare you burn my Thusa, what reason had you, and who ordered you to do it?" Before the man, who was trembling like a leaf, had time to answer, Nur Mahommad sprang up, and shouted—"The country is ours, and everything in it. We will burn the Bhusa and anything else we like!" And he glared at Sanders and myself in a way which left no doubt as to his meaning." I told him angrily to sit down, as I was not talking to him. For answer he assumed a threatening attitude, and openly sneered at me for attempting to give orders which I could not enforce. I ordered a sepoy to arrest him. What followed all happened in a flash . . . The sepoy had scarcely moved a step, when every one of Jiand's men leapt to his feet and brought his rifle to the present. I must confess having acted automatically; indeed there was no time to think or do otherwise. I literally roared at them—"How dare you, you dogs? Sit down this instant!" I stretched out my hands towards Jiand, who was crouching and, in a paroxysm of rage, forced him to sit down by my side. "Sit down!" I roared again into the dark faces of the men surrounding us. Hesitation and doubt spread amongst that threatening crowd—and the bulk of them sat down! They were given no time to recover their poise; Sanders and the escort were at once ordered to disarm the men who remained standing. Like a flash my men darted forward, only too thankful to take action instead of waiting to be shot down; and in a twinkling had wrenched their rifles from the scowling brutes, who were hesitating whether to shoot or submit. They looked to their chief for a lead; but Jiand, that once invincible warrior, had lost his nerve, and now sat cowering, unable either to make a decision or dominate his own men. So whilst they stood, furtive and undecided, they were disarmed and left helpless. "Now," I shouted, turning to those men who had sat down, "get up and place your rifles against that wall there," pointing to the wall of the mud fort," and if there is the slightest sign of treachery I will shoot you down, like the dogs that you are!" Like a lot of beaten sheep they got up and obeyed; the danger was over before we had time to realise it.

Thus did General Dyer extricate himself from one of the tightest corners on record by methods which should be taken to heart by every frontier officer. It is needless to add that the "prisoners" soon escaped and raised the whole countryside against him. Receiving a welcome reinforcement of 300 Hazara levies, he started on an expedition to seize Jiand's enormous herd of sheep and goats, which had been sent for safety to a distant valley. Their owner, with Halil and 1,500 tribesmen also set out to intercept the British. In the battle that followed they were completely outmanoeuvred, and Dyer won a crushing victory; Halil himself biting the dust. The result of a brilliant eight months' campaign was that the whole Sarhad came to heel, and is now as peaceful as any frontier tract.

General Dyer's preface renders ample justice to the brave men who aided him in an apparently desperate enterprise, but is unduly reticent with regard to his own share in bringing it to a successful issue. It is devoutly to be hoped that his splendid qualities as a leader, and his intimate knowledge of frontier warfare will find scope in the Empire's service.

## MUSICAL NOTES.

### English Song Again.

While the outer world mourns its Carusos, is stirred by its Chaliapins, and smothers in bouquets its Tettrazinis, the little band of faithful English singers still holds aloft to its little group of followers the high banner of English song. Among such singers one who matters very much is Mr. Steuart Wilson, a young tenor full of musical sincerity. That his voice is improving I am not sure; he has a beautiful *mezzo voce* and a most engaging *piano* tone, but there is still that lack of vibrant strength and of variety in tone-colour, inevitably tending to monotony, which bars his attaining to a position for which otherwise he is fully qualified. His recital at the Æolian Hall on October 4 was made up of six groups of English song, mostly new. Some of the things of which he gave a first performance were important:—for instance, John Ireland's "The Lent Lily," R. O. Morris's "Four Elizabethan Songs," and Vaughan Williams' "Since I from Love escaped am so fat." But others did not greatly count. The chief disappointment was Ireland's new cycle, "The Land of Lost Content." It is a set of six songs from Housman's "Shropshire Lad," and, with the exceptions of the first, "The Lent Lily," which, sung with rare beauty and insight, raised high hopes, and of the last, "Epilogue," in which poetry and philosophy were for the first time in the cycle really fused, it well merited Chesterton's description of it—"And the song of the cheerful Shropshire Lad I consider a perfectly horrid song." Three songs of Rebecca Clarke were curiously unsatisfactory, having neither the savour of the old nor the flavour of the new. All four of R. O. Morris's songs were excellent: here is a composer who can write with Elizabethan freedom of rhythm and with a poet's respect for the value of words. Of the four, Campion's "It fell on a Summer's day," though not the best, was the most popular; whether this fact was due to the delicious rhythm of the song (which, incidentally, the accompanist, Mr. Thornton Lofthouse, was a little slow in securing) or to the delightful naughtiness of the uncensored words I cannot say. Mr. Wilson's singing of four Lutenist songs was beautiful; though occasionally imperfect in detail and in intonation, he gave them with such easy reserve as bespoke an exquisite musical sense, making one hope more than ever that the progressive sincerity of his art will overcome the serious monotony of his interpretations.

### The Philharmonic String Quartet.

It would be interesting for the student of business psychology to discover why, when any series of concerts aims at the popularization of good music, they should be called "Pops." It is a vile word, reeking of middle-class complacency. However, there is no doubt that the Chelsea "Pops," a series of ten Chamber concerts to be given at the Chelsea Town Hall, do deserve all possible support. For in them the Philharmonic String Quartet hope to popularize the chamber works of the leading composers of to-day, and if any one can do this it is this Quartet. They are a very fine organisation, potentially better, I should say, than any similar body in the country. At present they have one drawback, the lack of individuality in the second violin; but the first violin, the viola particularly, and the 'cello are all excellent artists. At the first concert of their series on October 6, they played Hugo Wolf's long quartet in D minor, Beethoven's second Rasoumovsky, and Holbrooke's quintet for piano and strings (Diabolique). The first they played with superb unanimity, the unusual strictness of the *ensemble*, in the *langsam* movement in particular, compensating for a slight want of richness in tone. (Incidentally, I may be wrong in ascribing to them a thinness of tone—which seemed to me again apparent in the *adagio* of the Beethoven:—it may have been due to my position in the hall). The *allegro* and *allegretto* of the Beethoven they performed perfectly; in the third movement I have never heard the difficult rhythm better secured or the part-writing of the "Thème Russe" more deftly balanced. For the Holbrooke I moved farther back in the hall, and though the first movement was satisfactory enough, the sentimental slush of the slow movement, the facile insignificance of the "Valse diabolique," and some strange intonation on the part of the higher strings, made me think of retreating still further. However, as I have said, this is an excellent series of concerts, with a most worthy aim, and I hope to see it successful. The next concert, at which Mozart's heavenly quintet in G minor, and Goossens' "Fantasy" Quartet, are to be played, is on October 25.

### General News.

A recent report in a Sofia newspaper states that in view of the present economic crisis it has been decided, in the interest of Bulgarian artists, to forbid all performances by foreign musicians Such a step as this seems to me very regrettable, for although trade-unionism, with its protective measures, is an essential element in the economic side of music, this exclusive spirit can but react adversely upon Bulgarian musical life.

There is at present little definite news of the newly formed British National Opera Company, the association upon which the main hopes for a high standard of opera in this country are based. We know, however, that it has purchased the Beecham assets, and anyone who remembers how Sir Thomas Beecham staged such things as the Russian operas will be joyful at the prospect of seeing once more these operas in their magnificent setting. This company intends to begin its work at Covent Garden next January.

The Royal Carl Rosa Opera Company, whose season at Covent Garden extends from October 17 to December 10, has issued its repertoire for the first four weeks. In addition to the stock operas—"Faust," "Tales of Hoffmann," "La Boheme," and so on—it is performing "Lohengrin," "The Mastersingers," and "The Rhinegold," among other things. The English public owes very much to the company, which has carried on with modest courage though great difficulties.

But perhaps the most attractive immediate prospect is Mozart at the "Old Vic." There is no need here to reiterate my admiration for the "Old Vic" productions, but I remember a performance there last season of "The Marriage of Figaro," which for pure team-work I have not seen excelled. They are doing "Figaro" again, as well as "Don Giovanni," besides a good many more frankly popular operas.

Of immediate interest to readers of this page are the pianoforte recitals to be given by Mr. Herbert Fryer at the Æolian Hall on October 19 and 26. Mr. Fryer, whom I remember chiefly as a Bach specialist, has recently returned from Ceylon, where I believe, his merits were quickly recognised.

On October 21, at the Wigmore Hall the Flonzaley String Quartet are to play, among other things, a quartet written by and dedicated to them by Enesco, the Roumanian composer. The work is still in M.S., but I believe it has already become popular in America and elsewhere.

Owing to another engagement I could not hear Santoliquido's "Il Profumo delle Oasi Sahariane" at the Queen's Hall on October 6, but I gather that it was not well received, some critics even denouncing it as Pseudo-Orientalism.

## PERSONAL AND GENERAL.

**To-Day.**

October 13 (New Style).
September 30 (Old Style).
Safar 11, 1340 A.H. of the Moslem Calendar.
Tishri 11, 5682 of the Jewish Calendar.

The Persian Minister arrived in London last week from Paris.

Sir Adly Yeghen Pasha, the Egyptian Prime Minister, has returned to London from Paris.

The Rev. F. G. Waterbury has resigned the vicarage of St. James, Bath, in order to take up work in India.

General Sir Claud Jacob, Chief of the General Staff in India, and Lady Jacob have arrived in London.

The Queen of Roumania paid a visit on October 4 to H.M.S. Iron Duke, which was lying off Constantza.

M. Boeresco, Minister Plenipotentiary and Chargé d'Affaires of Roumania, has returned to London and resumed his duties.

Rear-Admiral Aubrey Smith, the new Chief of the British Naval Mission in Greece, has arrived at the Piraeus.

The Hon. Lady Lloyd has returned to 18, Wilton-crescent, where she will be staying until she leaves for Bombay on October 28.

Mme. Gavrilovitch, the wife of the Minister for the Kingdom of the Serbs, Croats, and Slovenes, returned to London last week from Belgrade.

King Alexander of Yugoslavia was well enough to lunch on October 6 with President Millerand, among other guests present being the Serbian Minister.

Lieutenant-Colonel Douglas Capitaneano, Military Attaché to the Roumanian Legation, returned to London last week from Bucharest.

It is understood that M. Gounaris, Prime Minister of Greece, expects to arrive in London towards the end of the month.

M. Pashitch, the Serbian Premier, arrived in Paris on October 8, to confer with King Alexander on the internal situation of Yugoslavia.

Sir Percy Loraine, Bt., (who kissed hands upon his appointment as His Majesty's Envoy Extraordinary and Minister Plenipotentiary at Teheran) had an audience of the King at Buckingham Palace on October 10.

A meeting of the Anglo-Hellenic League was held at King's College last week, when Mr. A. W. Gomme gave a lantern lecture on "The Scenery of Greece." Mr. W. Pember Reeves presided.

The Union of East and West will give a performance of the English version of an ancient classical Hindu play the "Malati and Madhava," by Bhavabhuti, at the Wigmore Hall on October 22.

The engagement is announced between Major N. S. Bostock, M.C., of Colombo, and Elizabeth, daughter of Fred. H. Pyman, of 82, Fitzjohn's Avenue, N.W.3. The marriage will take place in Ceylon next spring.

Bishop Dunn and party, says the *Egyptian Gazette*, arrived in Alexandria on September 20, from America *en route* for Jerusalem. They left for Palestine the following afternoon.

Mr. Wasey Sterry, C.B.E., the Legal Secretary in the Sudan Government, and Mrs. Sterry are returning to Khartoum. They sailed from Marseilles in the s.s. Caledonia on October 9.

The engagement is announced between Hugh Arbuthnot Inglis, Indian Police, son of William Arbuthnot Inglis, C.S.I., late of Kingsmills, Inverness, and Sylvia Stewart, daughter of Gilbert G. Blane, of Foliejon Park, Windsor, and Alltan Donn, Nairn.

To celebrate the third anniversary of the Republic of Czecho-Slovakia, on Anglo-Czech service will be held on Sunday afternoon at 3.15 p.m., in Christ Church, Westminster Bridge Road, S.W.1. Appropriate Czech music will be rendered.

M. Venizelos, and Madame Venizelos, who came to London from Paris a few days ago, are now on a visit to Lord Cowdray in Scotland, and are later proceeding to the United States.

The engagement is announced of Gladys, daughter of Mr. and Mrs. H. R. Dunk, of Ootacamund, S. India, late of South Godstone, Surrey, and Mr. E. Conran Smith, I.C.S., private secretary to H.E. Lord Willingdon, G.C.S.I., G.C.I.E., G.B.E., Governor of Madras.

The engagement is announced between John Reginald William Bennett, Indian Civil Service, elder son of Mr. and Mrs. Bennett, of Elmore Back, Gloucester, and Margaret Winifred, fourth daughter of the Rev. J. H. and Mrs. Seabrook, of Brockworth Vicarage, Gloucester.

The marriage arranged between Captain C. E. Gray, I.A., elder son of Mr. and Mrs. E. W. Butler Gray, of Chorley Hall, Bridgnorth, and Ruby Kathleen, third daughter of Mr. and Mrs. Arthur Baker, Constantinople, will take place in November.

An engagement is announced between Commander B. Hughes Hallett, Royal Indian Marines, second son of the late Colonel Wyndham Hughes Hallett, Indian Army, and the Hon. Frederica Somerset, second daughter of Lord and Lady Raglan, 24, Sloane Gardens. S.W.

The engagement is announced of Captain J. L. Maxwell. M.C., R.F.A., only son of the late Captain J. M. Maxwell, Royal West Kent Regiment, and Mrs. Maxwell, of Woodlands, Penn, Bucks, and Mercia Violet, only child of Lieutenant-Colonel L. M. Bell, late 16th Rajputs, and Mrs. Bell, of Northview, Kasauli, India.

The engagement is announced, and the marriage will take place at St. Paul's Church, Knightsbridge, on Thursday, October 27, at 2.30, between Sir Lancelot Hare, K.C.S.O., C.I.E., and Marjorie Edith, eldest daughter of the late Captain Eustace Maudslay and of Mrs. Eustace Maudslay, Hollies, Streatley, Berks.

The marriage was celebrated on October 1, at Bombay between Captain J. D. MacKenzie, 1-41st Dogras, Indian Army, son of Mr. N. F. MacKenzie and Mrs. MacKenzie, Oxford, and Phyllis Mary, younger daughter of Professor Arthur Thompson, LLD., D.C.L., and Mrs. Thomson, Oxford.

The marriage of Captain Dmitri Papalexopoulo, C.M.G. of the Royal Hellenic Navy, and Miss Dorothy Elliadi, daughter of Mr. and Mrs. Elia Elliadi, took place on October 6 at the Greek Church, Moscow-road, Bayswater. The Chief Archimandrite, Dr. Pagonis, officiated, assisted by Dr. Basdecas and Dr. Moscorvacus.

The marriage was celebrated on October 3, at Bath, between Captain Henry Noel Brown, 32nd Sikh Pioneers, only son of Mr. W. H. Brown J.P., and Mrs. Brown, of Acton, W., and Constance Mary, youngest daughter of Mr. and Mrs. Stephen Fox-Andrews, of Elmsleigh, Bath.

Digitized by Google

The engagement is announced of Captain E. Horace Whitford-Hawkey, 16th Cavalry, Indian Army, only surviving son of Mr. and Mrs. E. T. T. Whitord-Hawkey, of Bospolvans, St. Columb, to Marion Florence, only daughter of Lieutenant-Colonel and Mrs. W. L. Harvey, of Tredarvah, Penzance.

The engagement is announced between Captain F. Oliver St. John, D.S.O., M.C., the Royal Scots, eldest son of Sir. F. R. St. John, K.C.M.G., and Lady St. John (Villa Sunny, Bordighera), and Barbara, younger daughter of Mr. and Mrs. Dugald Ritchie (Resthome, Liss, Hants).

An engagement is announced between Mr. Cecil A. H. Harrison, eldest surviving son of the late Major William Harrison, X.I. Hussars, of West Hill, Cheshire, and the late Honourable Lady McDonnell, of Dalvers, and Miss Norah Bentley, eldest daughter of the late Captain Frederic Bentley, of Sara, Bengal, and Mrs. A. Seaton-Bentley.

The marriage between Major Hew Congreve Kennedy, of Kildrochat, Stranraer (late of Ceylon), only son of J. C. Kennedy and Mrs. Kennedy, and Joyce Erene Menzies, daughter of the Rev. A. S. and Mrs. Menzies, of Basley-on-the-Hill, Rutland, took place at St. John's Church, Stranraer, on September 22. The Rev. A. Smyth officiated, assisted by the Rev. W. West.

The marriage was celebrated on October 6 at the Parish Church, Hampstead, by the Rev. Charles Stranack M.A., cousin of the bridegroom, Vicar of Wychbold, between Basil H. A. Stranack, youngest son of Mr. and Mrs. E. F. Stranack, of Southern India and Batheaston, and Kathleen V. Cleworth, of Middleton, Lancashire, and Mrs. Cleworth, 77, North Gate, Regent's Park.

A marriage has been arranged, and will take place in Rangoon Cathedral, Burma, early in January, between Captain C. W. Stevens, 93rd Burma Infantry, only surviving son of Mr. and Mrs. Stevens, of Radlett, Herts, and Doris Mabel, daughter of the late Ernest H. Robinson and Mrs. H. M. Macnaughton-Jones, 63, Eaton Avenue, N.W.

The announcement is made of the engagement of Patrick Gardner, manager of the British Egyptian Cotton Company, Limited, Alexandria, second son of the late manager of the Hong Kong and Shanghai Bank, and Mary Clements Ambrose (Molly), eldest daughter of Dr. Thomas D. Ambrose and Mrs. Ambrose, of Floss Lawn, Dewsbury.

A marriage has been arranged between Major Edward S. J. Anderson, Indian Army, youngest son of the late General Sir Horace Anderson, K.C.B., Bombay Staff Corps, and the late Lady Anderson, of Fay Gate, Sussex, and Leila, niece and adopted daughter of George Bellamy Clifton, M.I.Mech.E., F.R.P.S., and Mrs. Clifton, of 3, Bardwell-road, Oxford.

An engagement is announced between Captain W. A. J. Pollock-Gore, 1st Battalion 128th Pioneers, Indian Army, eldest son of Lieutenant-Colonel W. A. M. Pollock-Gore, late of the Royal Scots, and of Mrs. Pollock-Gore, Oaklands, Jersey, and Lynette, daughter of Mr. and Mrs. Brigstocke, of Blaenpant-Cardiganshire, and Blaenpant, St. Saviour's Jersey.

The marriage was celebrated on October 4, at Wimborne, Minster, by the Rev. C. Bower, assisted by the Rev. A. L. Keith, Vicar of Wimbourne, between Kyrle Arthur Stewart, Lieut., R.F.A., attached Allied Police Commission, elder son of Colonel Herbert Chapman, C.B., and Mrs. Chapman, Tarrant Keynston House, Blandford, and Katherine Granville Martineau, daughter of the late Rev. John Lonsdale and Mrs Lonsdale, Further House, Wimbourne.

The engagement is announced between Lionel Westropp Jardine, Indian Civil Service, third son of the late Sir John Jardine, Bt., of Godalming, K.C.I.E., and of Lady Jardine, of Black Gates, Byfleet, and Marjorie Mildred, daughter of Major R. J. Woods, O.B.E., Indian Public Works Department (retired), and Mrs. Woods of Englewood, Englefield Green, Surrey, and granddaughter of the late General Sir Alexander Taylor, G.C.B., R.E.

The lecture programme of the Royal Asiatic Society for the coming session was opened on October 11 by Sir E. Denniscn Ross with a paper on "The Red Sea at the beginning of the 16th century." Professor A. D. Sayce will speak, an November 8 on "New Light from the East," and on December 13, Mr. Campbell Thompson will give a lantern lecture on "Modern Babylonia." In 1922 there will be lantern lectures by Mr. Grant Brown on "The People and Religion of Burma," by Mr. Lee Shuttleworth on "Some Peoples and Religions of the Punjab Himalayas"; and by Sir Percy Sikes on "The Achaemenian Dynasty."

## APPOINTMENTS & PROMOTIONS

El Lewa Cameron Pasha, Governor of the Fung Province, has retired from the service of the Sudan Government and has been placed on pension. He joined the Egyptian Army in 1899 and was transferred to the Sudan Government and appointed Senior Inspector in Sennar Province in 1905. He afterwards served at Governor of Mongalla, next as Governor of Kassala, and then of Sennar Province He holds the rank oi Brevet Lieut.Colonel in the British Army with seniority June, 3, 1919.

## OBITUARY

Mr. Malcolm Macgregor Hadow, of Assam, who was a member of the Indian Legislative Assembly, died in London on September 30.

Sir James John Digges La Touche, late of the Indian Civil Service, died last week at his house in Raglan-road, Dublin. He was appointed to the Indian Civil Service in 1865, and retired in January, 1907. During his service in India he served as Chief Secretary to the Government of the North-Western Provinces, was appointed a member of the Viceroy's Council in 1897, and was Lieutenant-Governor of the United Provinces of Agra and Oudh from 1901 until his retirement. Sir James, who was created a C.S.I. in 1896 and elevated to a K.C.S.I. five years afterwards, was a member of the Council of the Secretary of State for India from 1907 to 1914.

## EGYPT'S PROBLEM.

Egypt to-day has no need of blue-books to keep it before public notice, and there is, perhaps, some connexion between that fact and the studied colourlessness of the High Commissioner's Report for the year 1920, which has just been issued. Lord Allenby, it may well be supposed, would wish, in the interests of the Egyptians themselves, that a little less lime-light might be directed upon the country, and it is by no means inopportune to have emphasis laid upon aspects of Egypt's everyday existence that are apt to be overlooked by those who are concerned only with Egyptian politics. Economic considerations and the material prosperity of the country were certainly far from the thoughts of Zaghloul Pasha and his fellow-delegates in their discussions with Lord Milner's Mission. Although Adly Pasha's political acumen appreciates the importance of these matters, circumstances may tend to keep his present negotiations with the British Government in the rut worn by his short-sighted rival. It is, however, in Egypt that the lesson of this blue-book needs most of all to be taken to heart, and we should like to see definite measures adopted to interest Egyptians in subjects that are vital to their welfare. They have been taught too long to believe that in the attainment of 'independence' lies the sum total of all that statesmanship requires of their leaders. Zaghloul Pasha, indeed, would purposely keep them ignorant of any other aspect of self-government, in order to justify his sacrifice of the country's real interests to personal considerations. But while the Egyptian Prime Minister is engaged in England on the treaty negotiations, his colleagues in the Government might be educating public opinion to realization of what the British connexion has meant to Egypt and of the fact that much still remains to be done of immediate importance to the country's interests which can be carried through only with British good will and assistance. In other words let their message to the people be that, when once the principle of independence has been conceded by Great Britain, the question of degree, on which Zaghloul Pasha would fasten for his own ends, is not so important as the necessity of providing for the continuation of the measures on which the material prosperity of Egypt depends and which she cannot carry through without British aid.

It is an axiom of all agitations for self-government that it is better for a people to govern themselves badly than to be governed well by foreigners. The argument, no doubt, appeals strongly to those who count upon belonging to the governing class; whether it will carry the same weight with the governed through all the years of subsequent experience is another matter. A variety of circumstances helped to win support for the Nationalist campaign in Egypt; some of the more cogent, we should like to think, have already made room for more satisfactory conditions. Certain it is that the period of financial prosperity which lent colour to the Nationalist creed that Egypt was entitled to be out of leading strings and to be allowed to fend for herself has given place to a time of considerable anxiety for the bulk of the population. The experience of the world as a whole to-day suggests that Egypt is more likely to pull through with the status that close association with the British Empire will give her than if she is left entirely to her own devices. Some of her problems, as the High Commissioner's Report reminds us, are complicated by international considerations, and it is not to be expected that the confidence withheld by foreign countries from Egypt under British tutelage will be extended to her when independent. For twenty years the need has been felt for reforms in the registration of title to land, but international jealousy has been mainly responsible for delaying their introduction. Egypt suffers in consequence from an enormous amount of litigation due to the absence of any clear record as to ownership and boundaries. Under British guidance an up-to-date system of land registration is now ready to be introduced as a result of an exhaustive inquiry into the question. Will it be, we may wonder, as much to the interests to Zaghloul Pasha's lawyer clique and other town politicians as it is to the interests of the fellaheen that the new system should be enforced, and will it be carried into effect with equal thoroughness without the British stimulus? Again, the dependence of Egypt upon cotton makes the scientific regulation of the industry, with constant and competent research and agricultural application, a more urgent problem when so great an edifice has to be maintained upon this foundation. Can this and similar questions with which Lord Allenby's blue-book deals count on the same dispassionate and expert treatment under a régime of "independence" as they have had hitherto? To the Nationalists the point may seem of no moment; for those who form nine-tenths of Egypt's population such subjects may well prove a matter of life and death.

Apart, moreover, from what may be regarded by some as the theoretical side of administration, there are a number of very practical considerations with which the Government of Egypt, whatever the status of the country, will find itself immediately confronted. A heavy deficit on the financial year 1920-21 of £E14,000,000 has reduced the country's reserve to £E3,000,000, a lower figure than that at which the fund has stood at any time since 1908, and this amount may be reduced by a further £E2,000,000 if the estimate for 1921-22 be realized. This reduction, however, finds the country faced with heavy arrears of maintenance and renewals on railways and other public works left in Egypt, as elsewhere, as a legacy of the war. For a decade ahead, writes the Financial Adviser, special efforts will have to be made to bring these public undertakings back to a safer and economically more effective standard. The demands upon the public purse during this period that are not merely justifiable but requisite, he adds, appear on any present showing considerably to exceed the public revenues. Egypt's fiscal system will have to be recast so as to combine greater yield with more equitable incidence; but the process calls for "careful scientific inquiry initially, and the maintenance of regular and capable statistical investigation subsequently." It requires little reflexion to discover what misery may be awaiting the Egyptian people if its affairs should be lightly handed over to the crude manipulation of extremist office-seekers. The financial position of the country, the Financial Adviser assures us, is fundamentally healthy, and the state of the public finances is such as to give no cause for anxiety, if an adequate opportunity for readjustment and recuperation is allowed, and these finances are managed with prudence until accumulated liabilities are discharged. But there are grave dangers ahead, of which the present condition of many European countries is a sufficient warning. It would be thought that here is an adequate text for the Egyptian Cabinet in its efforts to counteract Zaghloul Pasha's agitation and to prepare the ground for the acceptance by the nation as a whole of any treaty which Adly Pasha may take back with him to Egypt.

## MEMORIES OF NORTH PERSIA.

(*By Ernest Betts.*)

Not all the magnificence of Persia, not all its loveliness in snow and sun and changing light, not all its quinces, pomegranates, melons and honey, to say nothing (or very little) of its pastries and omelettes, could atone for the absence of a good English drink at Kazian by the Caspian Sea nearly three years ago, when the whole world was chattering and incredulous at the prospect of an Armistice. For Kazian, twin brother to the little port of Enzeli opposite, where the Western finger of Murdab Bay nearly touches it, had nothing convivial to offer us. The Armistice made no difference to Kazian. In this extremity, we celebrated the peace with buns from an itinerant baker outside our billet, and considered like philosophers the distant revelries of Piccadilly.

At that time the quays and jetties were blocked with a pageant of ships waiting to proceed to Baku, where the Turkish Commandant was showing his independence by declining to surrender. The crews of these ships—Armenians, Persians, and Russians—slouched about hopelessly; unsightly, but picturesque; the women wrapped in shawls, ill and nervous-looking, did the same. In many places hawkers sold bread and cakes, sitting all day in the cold and the slush, unmindful of anything but their trade. Caviare, which had been so plentiful at Resht, was here, at the very source of its supply, unobtainable. The famous fisheries had long ago come to a standstill, and the only way to obtain similar delicacies was to walk out to sea along the Mole, where Persians caught Caspian trout while you waited, and offered it, twitching and dying, at a kran a head. You slung two or three of these over your shoulder—you could not carry more—with the strong suspicion of the white man in the East that you had paid too much for them. A roaring wind blew across from the sea, making your foothold on the Mole a precarious thing, and giving the fish hope that in a moment you might fall in. There was a tremendous tuning-up of sirens in the bay, but this might be attributed to the customary oriental fuss about nothing, or perhaps it was a shipload of Armenian refugees brought by the now discredited Bicherakhov from the Caucasus.

Outside the British hospital, on the 'front,' it pours with rain and all the feeble lights of the place seem to waver and spit uncertainly. It is icily cold. For you, there were at least a good fire, blankets, buns, and an occasional whisky-and-water to remind you of civilisation; and perhaps with the sun at its brightest, the fishing-nets jumping with their catch, and oil in abundance to prosper the seamen, life was merry enough in Kazian. . . . It was a dirge in 1918.

Resht, a vigorous town of 60,000 inhabitants, about 22 miles inland, is a very different spectacle. It has a quite European superiority. You enter Resht under an obligation to wear clean boots and a respectable hat—a singular compliment to almost any Persian bazaar. As long ago as the 14th century, Mustawfi, the Moslem geographer, described it as famous for its silk and cotton, and even now it is as celebrated for these as for its pastry-cooks and cinema. It lies at sea-level beneath the shadow of the huge Elburz mountains. The Great Khorasan road from Kazvin, a town lying some 150 miles to the south, leads into Resht by way of an ancient stone bridge, the Pul-i-Sangîn, beneath whose sharp, not to say alarming apex, frisking like a puppy, runs the Wakhsh river. The river is the great laundry of Resht, and its rocks and boulders resound daily to the smack and slap of beaten clothes. It is quite the most beautiful spot on the outskirts of Resht, though the whole scene for miles about has something young, green and spacious to commend it.

Resht cannot be much less in extent than the eleven miles of bazaars in Hamadan, though it is certainly more European, more Russian, both in its manner and aspect. It has tasty attractions in food and drink. You need never eat stale bread here, for it is baked before your eyes, and the execrable Persian tobacco, very little, if at all, better than nothing, is machine-cut in as open a fashion.

Most of the goods for sale are from Russia; there is the usual heavy sprinkling of Constantinople watches and Manchester cottons. Throughout the main street there is a constant cracking of whips from seemingly tipsy gharry drivers, and the long painful drone of beggars, cripples and hawkers. There is no sanitation to speak of, and the general dirt and litter everywhere proclaim a people as careless of appearances as of health.

During the festival of Mohurram, Resht in common with other Persian towns, is a scene of the greatest stir and colour. Nearly all the shops are closed, and the Englishman is well out of the way on these occasions. His intrusion is viewed as an offence; but as the entire town is monopolised by a series of religious pageants, he is hard put to it to escape.

During one of these festivals, I remember seeing a long procession of worshippers passing through the streets like Crusaders, their children dressed in the most elaborate disguises, the men mounted, and wearing coats of mail. They carried lances like so many mediaeval knights, and, as Gibbon says, would soon be "abandoning their souls to the religious phrenzy of sorrow and indignation." The procession moved with the greatest solemnity, the children as deeply wrapt in its significance as their elders. To a Westerner their cries, chants and lamentations, and the injuries they inflicted on themselves and their little ones, at the moment when their grief reaches its climax, seemed to reflect what was most sinister and least admirable in the Mohammedan character. To the inhabitants, nothing could be more obnoxious than the presence of white men during the month of Mohurram, though on other days of the week his money and his protection are welcome enough. After ten days the position readjusts itself, and Mohammedan and Christian smile again on each other, or utter the usual affronts as soon as it is safe to do so.

Entertainment in Resht can be found in two ways, either of which is certain to become monotonous after a time. There is the cinema aforesaid, to which only a desperate lack of occupation would impel one, (on the principle of any port in a storm), and there are the dances organised by the Armenians to relieve their starving compatriots. These are well supported and recklessly hilarious. Nobody knows exactly when they begin or when they end, nor how or when the money collected is administered. But why consider formalities? The real thing is the variety entertainment which is part of them, and this is carried through with tremendous spirit and "éclat." There are folk songs, minstrel songs, drinking songs, national songs, and songs to the balalaika. There are wild dances in which everyone joins indiscriminately, rushing up and down the room in a sort of enjoyable panic.

To the foreigner this jollity is something like home. It goes with admirable zest and pace. But nearly always some sad song, sadder than any we know, piercing heart and memory far more keenly, intervenes to cast its shadow over the revels, and you say to yourself, with lofty conclusiveness: "This is the East!"

Afterwards you emerge into an atmosphere as soft, as blue, as warm as a summer night in the Mediterranean. The incessant chatter and mumble of the bazaar are over, but the driver of your gharry, enemy to this silence, addresses the weirdest noises to his half-dead hacks, mournfully aiming to encourage them. "Br-r-r-r-r!" he cries, to a sound like a lift descending. At the Stone Bridge the old man's curses and halloes become tempestuous, as vainly he attempts the rise. From this point you are obliged to walk, adding your more refined curses to those of the driver.

In a few hours it will be dawn again, and the shadowy mountains to the south of Resht will slowly outline themselves, in unearthly blue, then in pink, then in gold, then in grey, till the whole ridge is rimmed with light, and you stand perfectly still, wondering whether England has anything so fair to show as this old Persian garden slowly awakening beneath the Rising Sun.

## PRESS ON THE NEAR EAST

### The Allies and Turkey.

In the *Daily Telegraph* of October 4 Lieut.-Colonel Repington writes upon the political aspects of the Greek Campaign. He begins his article with an examination of the differences in the policies pursued respectively by England, France, and Italy. Whereas England in some measure supports the Greeks, both France and Italy stand for the revision of the Treaty of Sèvres in favour of Turkey. But the situation, already desperate a year ago, has since been changed by two facts:—(1) On July 21 the full strength of the Greeks met that of the Kemalists and overcame it, and (2) the Turkish Nationalists allied themselves on March 16, with the Soviet Government, which aims at the Bolshevisation of the East. And the article concludes with a consideration of the widely-held view that Nationalist Turkey may be made to act as a barrier against Russia.:—"It is no good flogging a dead horse. The Turkish Nationalists are not a barrier against Bolshevism, but its ally. Until they are finally suppressed they will continue to spread disorder far and wide in the territories of all the Allies peopled by Mohammedans, and they form a valuable ally for the Reds in the Eastern propaganda of the latter. May we not assume that the French see this all now as clearly as we see it? The furtherance of French interests in the Near East can no more be secured by truckling to the Nationalists than our freedom from Turkish propaganda in Palestine, Irak, and the States round India can be secured by professing neutrality towards a race who continue to harm us as much as they can and ally themselves with a de facto Government which has openly set out to Bolshevise the East. Another new fact to consider is the disappearance of Count Sforza from the scene. He has been a force in modern Europe and a great advocate of moderation and pacification. We can frankly regret him and still retain an opinion that his Turkish policy, partly due to his residence at Constantinople and friendship with Kemal, was a mistaken one. It has certainly brought Italy no advantage, and if a change of course is facilitated by a change of Foreign Ministers, then, perhaps, the temporary eclipse of Count Sforza will permit this particular bent of his policy to be changed.

"We have all learnt something by our experience this year. We have had proof that the little Greek people are a fighting race and a live force in politics. We have seen that Turkish Nationalism and Bolshevism are allied and that we cannot trust either. Most of all must we have seen that nothing can be done without unity in the ranks of the Allies, and from such conclusions to a fresh Allied meeting and a change of course is but a step. We are not likely to find the Greeks rebels to a pacification if we cease this puerile folly of boycotting their chosen ruler and take into account in a settlement the sacrifices which the Greeks have made in a common cause. As for Kemal and his Turks, they deserve no benefits at our hands, but if we propose to settle with them, we must cease to be Laodicean and remember that nothing can be done in this part of the world without force and the will to use it in case of need."

### Syria.

In the French Supplement of *The Times* of October 4, there was an instructive article upon French policy in Syria and upon the administration of the new States. The article begins with a statement of the interests that for so long have bound Syria to France:—

The reasons underlying France's desire to fulfil in Syria the task which has to be assumed there by some Western Power are not always thoroughly understood abroad, especially in England, because they spring more particularly from tradition, and the traditions of a nation are, as is the whole of its intimate life, less comprehensible to others than are its purely material interests. Every Frenchman of any culture knows that men of his nation have been the chief agents of modern education in Syria; that when massacres occurred in the Lebanon his country was naturally prompted to restore order there. And in later times this inheritance of history and culture was reinforced by a preponderant economic activity: with a single exception, all the railways in Syria were French undertakings, and the same applied to a very large number of the foreign enterprises which contributed to the development of the country. This economic influence strengthened the intellectual influence and the hold of the French language, which every educated Syrian speaks almost as well as his native tongue, and which some 40,000 Syrian children were studying in the schools of Syria when the war broke out. Yet this intellectual and economic penetration was unaccompanied by any desire for political domination; its very success tended to confine it to the spheres in which that success had been gained.

Before the war, it proceeds, the majority of Frenchmen were Turcophil and opposed to the partition of the Ottoman Empire. But "in 1915 the dismemberment of Turkey seemed to be inevitable." Moreover—

Russia had designs on Constantinople and the north-eastern portions of Turkey, which were bound to lead to a partition. Moreover, the subject races, particularly the Arabic-speaking peoples, wished to be released from the Turkish yoke. So France had to recognize the necessity of making sure of a portion, under new conditions, in order to avoid being ousted altogether. She knew that her culture was being opposed in, and in cases gradually eliminated from, the countries detached from the Ottoman Empire. She must, therefore, save whatever could be saved. Thus France, agreeing to the partition of Turkey, not as an improvement but as a necessity, was, like England and Russia, a party to the Agreement of May, 1916, which prepared the way for the division of the Ottoman Empire into spheres of influence.

It then details the agreements made in 1916, and sketches the movement of French troops in the East up to the appointment of General Gouraud as High Commissioner.

As for the French policy in Syria, it was still based on the principles through which French influence had prospered in the Ottoman Empire: its trend was towards avoiding direct action as far as possible, by confining French activities to the supervision of native Governments. The Government which the French found, at any rate in the interior, certainly did not simplify the task of setting up such a *régime*: its opposition and its intrigues, even in the zone occupied by French troops, caused a further delay of several months in the initiation of a regular administration in the Syrian areas of which France was to supervise the organization. The Emir Feisal refused to work with the French, but at first he did not meet with any hostility in Paris. At the beginning he appeared to the French as an ally, not as an adversary, and was accepted by them as a possibility. In the spring of 1919 M. Clemenceau proposed a very liberal agreement to him, but without success, and another attempt to come to an arrangement was made in January, 1920. The Damascus Government was too weak-willed, too inconsistent: it was carried away by the anti-French and anti-foreign sentiments which it had itself let loose—doubtless in the belief that it was strengthening itself—and its intrigues culminated in July, 1920, in the clash in which it was swept away. The question of organizing Syria on a new basis then arose, and the Syrian States of Aleppo, Damascus, and the Alawite were created. It was intended that they should become a federation, into which the Lebanon should be free to enter if it chose, and this federation was proclaimed by General Gouraud last June.

And after showing the amount of freedom which the French system will allow to the individual States, the article concludes:—

Already the system set up a year ago has begun to work smoothly in all parts which have not been disturbed by those extraneous outbreaks of which France has much reason to complain in Syria. It may be expected to develop and to lead gradually towards the emancipation of the political minor of which France has become the guardian and which has been so badly educated for public life under Turkish rule. Nothing will be done from the French side to delay the natural development of the political system given to the Syrian States. France will be perfectly satisfied to see them able, later, to stand alone and offering such an opening for her culture and commerce as was formerly provided by the Ottoman Empire. She has no other

Digitized by Google

designs in the East, which is outside what might be called the area of her Imperial policy—North-West Africa; on the other hand, she has always been unable to see any other means of assuring the maintenance of her influence than participation in the mandate policy in Syria. Such are the motives of France's activity in the East so soon after a victory which cost too much for her to contemplate as one of its results the complete abandonment of a country so deeply impregnated with her influence.

## Mohammedans and Turks.

Under the above heading the *Westminster Gazette* of October 4 comments on the difficulties now being experienced with our Mohammedan fellow-subjects, and particularly it expresses the embarrassment in which the Viceroy of India is placed by the present uncertainty of the Western policy towards the Moslem world.

When the war ended we had a resonable case to put before the Mohammedan world. The Turks had sided with our enemies in Europe and declared war upon us. The fact that Mohammedans considered the headship of their religion to be vested in the person of the Sultan could not fairly be pleaded to defend him from the legitimate consequences of defeat, though it was a good reason for making as moderate a use of victory as the circumstances permitted. A treaty which left him his capital, under guarantees for the freedom of the Straits, which gave him such territory as was necessary for securing it against attack, which gave him compensation for the loss of his European territory in a firm guarantee that Asia Minor would be secure to him, and which finally saved the Armenians from further oppression, would probably have been regarded even by Mohammedans as a fair settlement. The Treaty of Sèvres, unfortunately, went far beyond these simple objects, and has finally been wrecked upon King Constantine's ambitions. Of all the disservices that that monarch has rendered to us, none has quite equalled his march into Asia Minor. It has rekindled Mohammedan passion at a moment when it seemed to be dying down, and reduced us to a position in which our only apology is a mortifying confession of helplessness. The military people who predicted disaster for the Greeks, but judged that there was nothing for it but to stand aside and let them learn their lesson, overlooked these inevitable results of our masterly inactivity.

We must awaken from this lethargy, if we are to keep our position in the East. It is not fair to the Viceroy or to any other administrators who have the handling of Eastern problems that they should be left in the position of having perpetually to make feeble explanations and apologies, while the long-overdue settlement is held up by the timidity, procrastination, and mutual differences of the Western Governments. We do not take an alarmist view of the Moplah rising, which has little connexion with the legitimate discontent of intelligent Mohammedans, and has probably had even a salutary effect in awakening some extremists to the consequences of kindling fanaticism among primitive people. Both Hindus and Mohammedans have a lesson to learn from this event, and we hope they will learn it. But we shall be profoundly mistaken if we suppose that the suppression of the Moplah rising will end Mohammedan unrest, if we are still without an intelligent Turkish policy. The solicitude for the Turk of the Indian Moslem, and still more of the Egyptian and Arab, whom he grievously oppressed, may seem to us outlandish and fantastic. The claim of the Sultan to the Caliphate may even be, as some Western scholars assert, an historical illusion. It is as useless for a Christian to argue about the Caliphate with a Mohammedan as for a Protestant to argue about the Papacy with a Roman Catholic. We must accept the fact that the vast majority of Mohammedans do believe the Sultan of Turkey to be the Head of their religion, and that they attach enormous importance to the guardianship of the holy places which were in the territory of the Turkish Empire. We must also realise that the downfall of the Turkish Empire is regarded by an immense number of Mohammedans as a reverse for themselves. While that Empire lasted, they might quarrel with it, fight it, endeavour to throw off its yoke; but when it goes they feel suddenly a loss of status. The great Mohammedan Power, the Trustee of their religion, which stood in the gate of Europe, and argued on equal terms with the great European Powers, passes from the scene and leaves them lesser men, scattered and divided, uniquely at the mercy of the enemies of their faith. So there arises a sudden feeling of community in disaster, a religious impulse passing all through Asia and North Africa bidding them hold together and guard the faith against the enemy from without. This is what we mean when we speak of Mohammedan unrest, and if we are to deal with it wisely we must study its psychology and its spiritual meaning.

## British Prestige in the East.

The recently reported decision of the British Government to exchange fifty-one Turks interned at Malta for seventeen British subjects detained in Anatolia has caused much surprise, and in puzzlement *The Times* of October 6, asks:—

Is our diplomacy in the Near East, with its long experience of the ways of the Oriental mind, now so helpless that it cannot rescue a few British subjects from the depths of Anatolia without seriously diminishing British prestige? The British subjects now held by the Kemalists are deserving of all possible sympathy and help. But they themselves would be the last to desire that the power of the British Empire to uphold and assert its claims and just rights in Turkey should be sacrificed in their interests. They would certainly not desire that the criminals who brutally maltreated our officers and men in Northern Mesopotamia and Anatolia should be allowed to return home unpunished to join in new and definite aggression against the British Empire, whose unintelligible clemency will be regarded as a sign of weakness. The decision to hand over the war criminals to Mustapha Kemal is a plain surrender of prestige.

And it proceeds to comment upon the "extraordinary negligence" with which the question of these Turkish war criminals has been treated:—

The offenders should have been tried long ago, when evidence was abundant, the memory of their crimes still fresh, and when the fear of the British Name wae still living in Turkey. But in idle procrastination the advantages were frittered away. The Kemalist movement developed in Anatolia, and British subjects fell into the Nationalists' hands to be used for bargaining over the Malta prieoners. The Bekir Sami agreement was repudiated. A number of Turkish prisoners broke their parole and escaped from Malta, and have now been received in triumph in Angora. The British Government have been flouted consistently; and their reply now is meekly to send the remainder of the notorious offenders home. There is vague talk of their being tried at some later date; after the conclusion of a peace that is not yet visible on the horizon. Such talk is illusory. The criminals will come home with honour, and there will be no more reckless agitators, no more violent opponents of any real peace with Great Britain than the men who have discovered by their own astonishing experience that they may brutally maltreat and massacre Englishmen with impunity. Our dawdling, hesitating, ambiguous Near Eastern policy has involved us in no greater humiliation than this. Our prestige is evaporating in the futility of our counsels. Throughout the East our assertion of rights, and not mere force of arms, has hitherto been our strength. If by such a pitiful surrender we abandon this weapon, how shall we cope with the growing dangers? The decision, which obviously does not emanate from the men on the spot, who know all the risks, but from some purblind authority here, must be reversed. British interests, British dignity and honour in the Near East, must not be sacrificed to the conveniences of Whitehall.

*Abode his Hour or two and went his way.*

—OMAR KHAYYAM—

The crowning of Faisal as King of Irak must surely have been the proudest day Baghdad has known for many a century. Since that fatal day in 1277, when Hulagu the Tartar sacked it and put its inhabitants to the sword, the city has been but a sorry shadow of its former splendid self; though its fall certainly cannot be compared with that of Babylon, its neighbour to the West. The latter, an incomparably greater and more famous city, has been for centuries little more than an assemblage of vast rubbish heaps; whereas Baghdad has never fallen below the rank of a city, as cities go in that region, and has been in effect what it now becomes in name also, the capital of Irak el Arabi. Its people, too, have never forgotten entirely its great past. Indeed, how could they, with so many reminders of those palmy days constantly under their eyes, in the form of the older mosques, the city walls and gates, and the specimens of ancient tiling still to be found in parts of the bazaars and elsewhere? They must, therefore, have been stirred deeply by the events of the post-war period, and especially by those of the past few weeks. For even if some of them would have preferred some other King to Faisal, it is not to be doubted that all of them would prefer a ruler of their own race to one of any other race; and King Faisal comes of a stock that must appeal to all of them. So, though, there may be here and there, citizens of Baghdad or of Basrah who would have preferred Seyyid Talib or some other candidate, they must all have regarded the day on which King Faisal was crowned as the dawn of a new era for Baghdad and for Irak as a whole.

Judging by letters that have reached me, and by pictures of the Coronation ceremony that I have seen, it seems to me, however, that King Faisal might have been given a much better 'send off.' It is hard to say just what was lacking; but I rather suspect that the thing would have gone off better if it had been run on less modern lines. Baghdad has been, and still is at heart, a very conservative city; and I fancy that the real Baghdadis—the people who are going to count in the future—would have preferred something more truly Oriental in character. King Faisal, for instance, might have been well advised to wear the true Arab costume; and, though it would undoubtedly have shut out the view slightly, a canopy of some kind would surely have taken away the 'skimpy' appearance of the dais and thereby have added greatly to the effect. Above all, if confidence is to be placed in a letter written by a spectator, the anti-climax depicted in the passage reproduced below should have been avoided.

The writer of the letter referred to, after describing the ceremony and the departure of King Faisal, escorted by cavalry who do not seem to have presented an imposing appearance, goes on to say that a local official appeared on the dais, "accompanied by a dirty half-naked coolie who was to remove King Faisal's throne." The said throne is described as "looking rather well in front," and not unlike one used by a certain other Sovereign, but—"when the coolie proceeded to remove it, which he did by the simple method of turning it upside down and placing it on his head, we were greeted with "D—'s White Label" written in red all over the bottom of the throne. So King Faisal's throne was constructed of old whisky packing cases . . . . !!" That was enough to shock not only Pussyfoot Johnson but anyone with a sense of humour. Or so it seems to me.

The Baghdadis use old whisky cases so freely in their carpentry that I do not suppose for one moment that they would see anything incongruous in such an incident; but I do think they would have liked a little more pomp and circumstance about the whole ceremony. Of course, King Faisal was not responsible for the arrangements; and in any case he is big enough, I hope, to make his new subjects proud of him very quickly. Moreover the level-headed members of the British Colony seem to think well of him and of his chances of "making good." As one of them wrote to me just before the Coronation: 'Faisal has made a very good impression, and all that he says in public and private is just what it should be." That, from one who is the old days had no very high opinion of the Arab, is a pretty good testimonial. May his Majesty reign long and successfully and bring back to Irak some of the prosperity and fame that it boasted before the coming of the Tartars.

I am intrigued by a cutting sent me by a correspondent in Yugoslavia. It is clipped from the *Jutarnji List*, a Zagreb daily, and it runs:—

Prispio

Amerik. Mixer Mr. Yo Club Bar Pleas trey Mixer Jos Special Mixed drings. 36040.

My correspondent informs me that "prispio means arrived," and leaves it at that. I suspect that the advertisement—for I gather that it *is* an advertisement, from the number attached to it—is one that would appeal to thirsty souls rather than to ardent teetotallers; but who—or what—in the name of goodness is "Mr. Yo Club?" I fancy I know what a 'Bar' is. But the rest of the inscription has me down. I feel like starting a Competition on my own account—open to *all* readers, and not merely to Lady Readers Abroad—with prizes for the correct solution.

# COMMERCIAL & FINANCIAL SECTION.

## NOTES AND NEWS.

Devonshire Square.
E.C. 2.

**Export Credits.**

While there has been no definite statement on the question, it may, I think, be taken for granted that the Government's proposals to meet the problem of unemployment will include the development of the export credits scheme. That will obviously mean greater demands on the resources of the banks, whose extended operations will require to be guaranteed by the Government as in the case of the present scheme. Within limitations, and provided it is carefully drawn up, an improved scheme should go far towards enabling British trade to surmount this exceedingly critical period. But it cannot do everything. As has been pointed out before in these columns, a remedy for the adverse exchanges is not everything; what is essential for the re-establishment of the *status quo* is progress in reconstruction in the countries which have been most seriously affected by the war. An export credits scheme can do little more than help us to dispose of our goods. We want to create a position in which export credits schemes are no longer required. To do that we must be prepared to make credits for reconstruction, and to take steps in other ways to give direct help to the countries concerned.

**Cheaper Postage.**

No one concerned with commerce can fail to support the pleas that are being put forward in the Press for cheaper postal rates. It has been stated that the recent returns of the Post Office have been very favourable, and the impression has been given that after due consideration some concessions may be expected by the public. But why should there be any delay? The postal service takes a high place among the accessories to the development of trade, and surely at a time like the present when increased commercial activity is above all things essential, it is desirable that it should be made as accessible to the public as possible. The only reason for hesitation is the fear that the return to pre-war conditions might involve financial loss, but in the circumstances who would venture to deny that the experiment would be worth while even if it resulted in a loss for a period of years? Some losses are simply investments. This would be a case in point, and, as suggested in a letter in a contemporary, a really bold stroke in the direction of a reduction of the rates might justly be calculated to have indirectly a most beneficial effect on the unemployment question.

**Yugoslavia and Salonika.**

Details are given by our Zagreb Correspondent this week of the arrangements that are to be made by the Greek authorities in connection with the project for a free zone for Yugoslavia at Salonika. The programme is framed on pretentious lines, and it is estimated that ten years will be required to carry it through. As our Correspondent points out, the project is an urgent necessity for Yugoslavia, and it is to be hoped, as he says, that "a working scheme will be adopted long before the completion of this ambitious programme." But given that that is the case, it is not to be expected that the facilities provided at Salonika, however adequate they may prove to be, can really satisfy Yugoslavia's needs. The country's ultimate requirements can only be met by the possession of a satisfactory port of its own.

**Exchange Banks' Rates.**

If my correspondent whose criticisms of the rates of the Exchange Banks I quoted in these columns last week had delayed communicating with me for a few hours, his remarks would have been somewhat modified, for very shortly afterwards circulars were issued by the banks in question announcing the reduction of the rate to seven per cent. So far as it goes this must be considered satisfactory, but it does not nearly meet the position outlined by my correspondent. But probably it is merely a first step in the downward movement.

**The Cotton Freights Controversy.**

The dispute between the United States Shipping Board and the Liverpool Conference Lines has taken an awkward turn, and latest developments would appear to suggest that the hope that better counsels would prevail and an amicable settlement be reached will not be realised. The circumstances in which the dispute arose have been dealt with at length in these columns, and as the facts will be fresh in the minds of readers it is unnecessary for me to recapitulate the details regarding the award of the contract for the shipment of cotton from Egypt to the United Kingdom and America. The principal grievance of the Americans was apparently the fact that they had not been successful in tendering for shipment to the United States, and this the Conference Lines endeavoured to meet in a most generous spirit by suggesting that the Shipping Board should share in direct shipments from Alexandria to the United States.

**Failure of Negotiations.**

This offer, it might have been imagined, would have led to a settlement. Possibly it would have done so, but unfortunately while the negotiations were in progress various charges were made against the Conference

Lines in Alexandria, and the application of the Jones Act was threatened. Negotiations were subsequently resumed with the United States Shipping Board's representative in London ; the question of the use of improper methods was discussed, and it was assumed that the charges had been dropped. Anyway various proposals were considered, and ultimately the matter came down to the question of whether a two or three years' agreement should be made. At this point, however, when a settlement seemed in sight, the negotiations were broken off as the result of instructions from Washington.

**America's Bid for Trade.**

The reason for the non-acceptance of the Conference Lines' offer is dealt with in a long statement issued by the Vice-President of the Emergency Fleet Corporation, in which it is declared that it was not agreed to because there was no assurance that it would have meant 50 per cent. of the cotton, since contracts existed between the British Lines and the cotton shippers. It is further urged that the insurance question, the fact that the financial arrangements in connection with the handling of the cotton crop are under British control, and other factors made it improbable that America would obtain a fair share of the trade. Both suggestions are obviously unjustified, and the attitude of the Shipping Board to the Conference Lines' offer is clearly open to the interpretation that America is bent on obtaining a share of the trade at all costs.

**A Freight War.**

The Americans, it now appears, are going to enforce their point of view by introducing a freight war, for it is stated that pending an agreement the vessels of the Shipping Board will be instructed to accept cargo to and from Egypt at 10s. per ton below the prices quoted by the British Lines. The serious nature of this step will readily be grasped. The Conference Lines represent private British enterprise ; the Shipping Board is a State institution. Our shipping firms are to be confronted therefore, with what is in plain terms national competition. I do not doubt the ability of our lines to render a good account of themselves even in such adverse conditions, but it is greatly to be regretted that a position should have arisen in which rivalry of this character is possible between the United Kingdom and America.

**America's Viewpoint.**

Apart from the immediate issues at stake the cotton freights controversy is of importance as an indication of the trend of America's feeling regarding maritime affairs. The idea is apparently widely held on the other side of the Atlantic that the maritime nations do not desire to see the development of a great United States mercantile marine. Hence the view that it is justifiable to use measures such as that just decided upon in order to attain the desired end. That other countries have no such wish need scarcely be emphasised ; there is room and to spare for the shipping enterprise of the United States if conducted on proper lines. But the road to the development of their mercantile marine is not by the displacing of the existing business of the shipping of other countries, but by the development of trade—a distinction with a very great difference.

## EXCHANGE BANKS' RATES.

(*To the Editor of "The Near East."*)

Sir,—The remarks of your correspondent in your issue of October 6 are apposite. In most export transactions there are three parties interested—the merchant shipper, the Exchange Bank, and the dealer in India. The last named fails to meet his obligations, and demands assistance on account of the severe drop in values and heavy exchange depreciation. To get bills cleared the merchant has been obliged to grant allowances amounting in certain instances to as much as 33 1-3 per cent. of the original value. Failures on this side have been numerous and many firms have seen their reserves swept away, and indeed are experiencing difficulty in carrying on. Meanwhile the banks continue to wax fat, and apparently consider that they have done all that they should in granting some extensions of time for the provision of margins, allowances etc.

It does not seem unreasonable to suggest that some part of the great losses that are being experienced in the Indian trade should fall on the banks, which have prospered so exceedingly well during the lean as well as in the fat years, and are continuing to pay substantial dividends to their fortunate shareholders, while the merchant, whose *capital* in many cases provided the bank revenue in the shape of heavy interest and other charges, must needs feel that he has been left to shoulder a burden which should in equity have been shared by all who hoped to profit by the business, had things not gone wrong. Your obedient servant

COMMISSION MERCHANT,

London, October 7.

## INDIAN DELEGATES FOR GENEVA.

The Indian Government representatives at the forthcoming International Labour Conference at Geneva are Mr. A. C. Chatterjee, I.C.S., Secretary of the Industries and Commerce Department, and Mr. J. N. Gupta, I.C.S., a Commissioner in Bengal. Their advisers are Mr. G. F. Paddison, I.C.S., Labour Commissioner, Madras ; Lieutenant-Colonel F. H. G. Hutchinson, I.M.S., Public Health Commissioner with the Government of India ; Mr. A. G. Clow, I.C.S., Controller of the Labour Bureau at Simla ; and Miss G. M. Broughton, Adviser of the Bureau. The employers' representatives were recommended by the provisional committee of the newly formed Federation of Indian Industries. The delegate is Mr. N. B. Saklatwala, of Messrs. Tata Sons, Limited, Bombay, and the advisers are Mr. J. K. Mehta, secretary of the Indian Merchants' Chamber and Bureau, Bombay ; Mr. A. W. Dods, of Messrs. Burn and Co., ; Mr. H. Waddington, United Planters' Association, Southern India ; and Mr. A. U. Crowe, late of the Assam Frontier Tea Company. The nominations of the workers' representatives were made on the recommendation of the standing committee of the All India Trade Union Congress. The delegate is Mr. N. M. Joshi, who held the same position at the Washington Conference, and the adviser is Mr. B. P. Wadia, who has come into prominence in the last two years as an active promoter of trade unionism in India.

REPORTS FROM OUR OWN CORRESPONDENTS.

## EGYPT.

*Cairo, September 27.*

**Control of Cotton Seed.**

In a previous letter an explanation was given of the Government's scheme for the control of cotton seed in Egypt. It may be remembered that the Government wishes to place the responsibility for the purity of the seed upon certain private individuals in the industry fitted to undertake the task. An experienced agriculturist has now published details of an alternative scheme, in which he proposes that the Government should ensure the success of the scheme by instituting a special department for the work. His suggestions, if adopted, undoubtedly would ensure the purity of the seed, but in a much more cumbersome way than the method proposed by the Government, as it would entail additional staff and accommodation and, further, if for any reason the Government organisation suddenly broke down, the cotton-growers would be left without seed. It is understood that the Government is according serious consideration to his suggested alternative, but it is not believed that the original proposal will be abandoned in favour of another which will merely guarantee the same results with greater expense and trouble to the Government.

## ROUMANIA.

*Bucharest, September 28.*

**The Financial Crisis.**

In my last letter I reported that the chief banks had framed a programme to be adopted by the State for the purpose of improving the Roumanian rate of exchange. The Prime Minister has since invited the representatives of the banks to a conference at the Ministry of Finance. It was first established that the main cause of the depreciation of the leu is due to the non-payment of the coupons of the national debt abroad. As a remedy the bankers suggested that the State should contract an external loan in foreign currency. On this occasion the Premier informed them that the negotiations for the loan of 40 million francs in Switzerland might probably fail owing to the terms demanded by the Swiss being too exacting; but he has since been offered a loan of three million pounds at an interest of 8 per cent., redeemable in 5 years, for the payment of the coupons. At a later meeting, it was suggested that imports should either be prohibited or if admitted free the duty taxes, especially on luxury goods, should be very high. Nothing definite has yet been decided, but further meetings are to follow.

Merchants are waiting anxiously for the result of these conferences, for with payments in foreign currency coming due and the leu at the present rate of exchange (450 lei to the £) something will have to be decided very speedily, otherwise many old established and sound firms will have their bills protested and their credit abroad ruined. In commercial circles it is suggested that instead of a moratorium foreign creditors should be met with acceptances payable in two to three years and endorsed by a syndicate of bankers and merchants, thereby making these acceptances more easily negotiable for the creditors abroad. A solution of this kind would be satisfactory to both parties and particularly to British firms, who could thus take advantage of the Export Credits Scheme. If this should fail, it is further suggested that a reasonable rate of exchange should be legally enforced.

**The Bucharest Fair.**

The Bucharest Fair is an "eye opener" to every visitor and not least to the majority of Roumanians themselves who did not know that such a large variety of goods could be manufactured in their own country. It would not be an exaggeration to say that if Roumania's industries were developed and properly supported by the State in time to come the country could become almost self-contained. There is no doubt that the new provinces have increased considerably the industrial capacity of Roumania. In walking through the different pavilions, very artistically designed, one is struck by the numerous exhibits of various kinds of raw and manufactured products, ranging from cereals, petroleum, coal, iron, gold etc. to electro-motors, hydraulic presses, motor-cars, aeroplanes, railway coaches and locomotives, woollen and cotton articles of all descriptions, everything in the leather line, soaps of all qualities, etc., not to mention the famous Roumanian pottery articles, carpets and embroidered dresses, etc.

## YUGOSLAVIA.

*Zagreb, October 2.*

**Revenue Figures.**

The official returns show the following revenue for the financial year 1920-21; State monopolies, 318,445,389 dinars, octroi duties, 349,491,867, direct taxation, 317,530,872 and customs duties, 786,312,718 dinars, making a total of 1,771,780,840 dinars.

**The Internal Loan.**

The subscriptions list to the internal loan of 500 million dinars is closed, and the official figures for Serbia, Bosnia and Herzegovina are now published. The estimates for Serbia (old frontiers) are 75 millions, but nearly 76 millions have so far been handed in, and returns are still awaited from eleven banks and 79 finance offices, so probably the figure for Serbia will amount to about 90 millions, which is very satisfactory. Bosnia and Herzegovina have so far reported the subscription of nearly 23 millions.

## BULGARIA.

*Sofia, October 2.*

**House Construction in Sofia.**

The building trade is one of the few trades, if, indeed, it is not the only one, that is really flourishing in Bulgaria to-day. With the object of encouraging house construction, the present Government has decreed that any person building a house shall be free to live in it himself, no matter what is its size, and that in addition no taxes need be paid by the owner for ten years. The result of this legislation has been to produce great activity among Bulgarian, Italian, and German builders.

The total number of dwelling houses in Sofia at the end of 1920 was 25,000, but during the first nine months of 1921, no fewer than 805 licences were issued for the construction of new buildings and annexes, having an area of more than 27 square metres, whilst 870 licences were issued to build houses possessing an area less than 27 metres. These figures show an increase of 205 and 170 respectively over the figures for 1912 which previously held the record for construction. It also must not be forgotten that to the 675 houses the construction of which has been begun this year must be added two or three hundred other houses which have been built in the suburbs of Sofia without a licence having been obtained. It is estimated that 2,000 is a figure which comprises all new buildings and this constitutes 8 per cent. of the houses existing in 1920. Other matters which call for comment are the number of second third, and even fourth stories that are being added to bungalows. This work is not difficult to accomplish as the average Bulgarian house is low and flat. Then during the last few months, the construction has been begun in the centre of the town of several large buildings which will serve as offices for commercial and industrial

Digitized by Google

companies. The rapidity with which the building is being carried out is somewhat remarkable. The Sofia workmen know no eight hours day and they work even on Sundays. A German firm is importing "ready made" houses which have only to be put up, but so far these somewhat flimsy erections have not found favour as the winter here is too severe for such a class of house to be popular.

## CYPRUS.

*Nicosia, September 20.*

### The Carob Trade.

One of the leading papers has a very strong and outspoken article respecting the position of the carob producing villagers, who are in a depressed state, and on the relations existing between them and the exporting merchants. Severe comments are made regarding the latter. The villagers are nearly all, if not all, more or less heavily indebted to them, and are practically their "serfs." They are consequently obliged to sell their produce at a price, and generally at a time, that suits their merchant or *mastori*. The latter has been buying at 14s. or 15s. the kantar (180 okes), and according to present prices himself obtains 21s. the kantar. Late advance sales have been most unfair to the villager. The demand for carobs in England is such that prices, it is considered, will continue to rise. But the merchants in their haste to obtain immediate profits, give no thought to the unfortunate producer. They should, says the writer, be satisfied with a profit of 2s. a kantar, and allow the villager 18s. or 19s. in the present time of hardship. It would be to the advantage of the merchant as well as the producer if more consideration were given to the actual cultivators in the present crisis. It is to be feared that the reasoning will make but little impression upon the class referred to. No real relief will be possible until the peasantry can shake off the fetters of the moneylender. The root of the evil lies much deeper. It is an old story. What is now urged might have been written at any time during the last 40 years, —or 40 centuries? In Cyprus hopes have been periodically raised that agricultural banks would be established on such terms as would enable all thrifty and deserving peasants to emerge from their serfdom. But the time is not yet, and the evil still goes on.

Two steamers are being loaded with carobs at Limassol and others have been chartered for this and other ports. There has been a sharp rise in prices, and merchants have disposed of a considerable part of this year's crop at 21s. the kantar (£4 13s. 4d. the ton).

### Market Prices.

The following are the present prices of some articles: Carobs, local price 17s. 6d. and upwards per kantar, wine, £3 to £3 5s. per load (128 okes), olive oil, 4s. 4d. to 4s. 9d. per litre; grapes, 1½d. per lb.; wheat, 8s. 6d. to 9s. per bushel; barley, 3s. to 3s. 6d. per bushel; vetches, 9s. 6d. to 10s. 6d. per bushel; sugar, 4½d. per lb.; coffee, 9d. per lb.; rice, 2d. to 3½d. per lb.; onions, ¾d. per lb.; potatoes, ¾d. to 1½d. per lb.

## TENDERS INVITED.

*(Particulars of tenders marked (D.O.T.) are to be obtained from the Department of Overseas Trade, 35, Old Queen Street, S.W.1.)*

**Greece.**

Telephone Installation.—The Commercial Secretary to the British Legation at Athens has forwarded to the Department of Overseas Trade a copy of a notice of adjudication for the supply of a new Telephone Installation at Athens which is to take place on November 14 next. The installation is to be of the central battery type and of an approximate capacity of 5,000 local lines, 40 inter-urban lines, and at least 50 special lines connecting Athens with the Piraeus. (D.O.T.).

## EGYPTIAN CONSOLIDATED LANDS.

The report of the Egyptian Consolidated Lands, Limited, for the year ended June 30 states that the past financial year witnessed a very heavy fall in the price of cotton, with the result that the market in agricultural land in Egypt suffered severely and practically no sales of land on the Kom-el-Akhdar Estates were completed. The area of the estate remaining unsold at June 30 last was 1,386 feddans. The work of reclaiming 400 feddans, referred to in the last report, is progressing satisfactorily and this land should be ready for sale within the next few months Of the Rodah Island property, 513 square metres were sold during the year at an average price of £E1.125 per square metre. The area held at June 30 last was 110,092 square metres, exclusive of roads. Arrangements have recently been made by the company with the Egyptian Government for the latter to take over the roads on the company's property on the island. The principal sum due to the Mortgage Company of Egypt, and secured by a mortgage on the properties, has been reduced during the year by £10,000 to £70,000.

## ALLIANCE BANK OF SIMLA.

The report of the Alliance Bank of Simla to June 30 last, presented at the meeting held at Simla on August 30, states that, including Rs.3,13,931 brought in, the balance of profit for year, after contributing to staff provident fund, rebating current bills writing down investments, and providing for bad and doubtful debts is Rs.15,49,423. Interim dividends at rate of £4 per cent. per annum, free of tax, on ordinary, and at rate of 6 per cent. per annum, free of tax, on preference shares, were paid for December half-year and absorbed Rs.4,06,531, leaving Rs.11,42,892. Directors now propose a dividend for June half-year at rate of 6 per cent. per annum, free of tax on preference, Rs.1,61,737; further distribution on ordinary at rate of 14 per cent. per annum, together with a bonus of 3 per cent., both free of tax, Rs.3,50,000; reserve against depreciation of Government paper and other investments, Rs.2,00,000; staff pension fund, Rs.1,00,000; carried forward, Rs.3,31,154. The preference share capital was increased during the year from Rs.53,51,800 to Rs.53,81,500.

During the year Mr. W. Muir Masson has left the board upon his retirement to England. Mr. R. G. H. Boulton and Mr. W. W. Boulton have also resigned their positions as directors. They have decided to establish an Indian branch of their London finance and issue house, and in these circumstances it was mutually agreed that it would be to the interest of both parties for a separation of directorates to be effected. They still retain their shareholding in this bank.

## SUMMERS AND SIND.

To those who are in any way interested in the great Sukkur irrigation project of Sind the name of Dr. Thomas Summers, C.I.E., needs no introduction. A Coopers Hill engineer of the 1877 batch, he has been remarkable throughout his life for the intensity of fervour he has always thrown into any occupation he happened for the moment to be engaged. *Quid brevi fortes jaculamur aevo multa?* asked Horace; but it was useless to ask Dr. Summers that. It was his nature, and he could not help it. So it came to be that he was a distinguished student at the College on the Green; on his furloughs from India he sought academical degrees and acquired, among others, the D.Sc.; he was just as enthusiastic in his sports, he was a great football player, an athlete, a big-game shot; and when, possibly by reason of his gluttony for work and games, he overtaxed his vigorous constitution, and the doctors said that he could not live, he refused to die. He recovered, and not only recovered, but continued to display a vitality which was the envy of men of his age. In that second lease of life, which he had secured by virtue of his dogged determination, the Robri canal became an obsession. It was the child, so to speak, of his old age, and all the more passionately loved because it was a stricken child. It was not till he had twenty-seven years, and arduous years, of Indian service behind him that he visited the Punjab to inspect the great perennial canals of that province, and he returned to Sind imbued with the idea of improving the inundation canals with which he was familiar. In his programme he set the needs of the tract of country on the left bank of the Indus south of Sukkur first, and devoting all his enthusiasm to the scheme he evolved the project that will always be associated with his name. It was completed in 1910, and in the following year Dr. Summers had perforce to retire. He retired in good odour, for the Bombay Government Resolution of the time said that the supply channel to feed the Robri tract should be called the "Summers" Channel "to perpetuate the memory of the excellent work done in Sind by Dr. Thomas Summers, M.Inst. C.E." With that well-deserved compliment it was no doubt thought that Dr. Summers was officially dead. But so far from being dead, he was very much alive. In fact in the past decade he has been much more in the public eye than he ever was in the course of his long Indian service; and the latest phase of his activities is the forcible lecture he delivered before the East India Association in July in order to protest against the last Sukkur scheme, known as the project of 1920.

There have been many large Indian irrigation projects which have passed through great vicissitudes; but, generally speaking, it may be said that the delays, however unfortunate in themselves, have led to improvements in the end. No one can say that the Sukkur project has been unduly hurried, it was spoken about by Colonel Scott of the Bombay Engineers in 1847, Lieutenant Fife of the same Corps proposed a Robri canal ten years later, and yet in 1921 no estimate submitted to the Secretary of State for India for sanction has ever been so mercilessly criticised. It is unnecessary, however, to dip too deep into ancient history, and the case can best be explained by a reference to three projects which are the outstanding features of the controversy. The first is the project prepared by Dr. Summers himself. It provided for a great canal to take off from the Indus at the Sukkur gorge, and it did not include the construction of a barrage. The gorge is a natural weir, and Dr. Summers was of opinion that his canal would be able to derive its supplies from the river without such assistance. But he was in no way opposed to the barrage, he only held that it should follow the canal if and when it was required, and he was quite prepared to agree that it should be a definite item in the programme provided that it was constructed at a time to synchronise with the *completion* of the whole scheme. Dr. Summers' project went, however, no further than the Government of Bombay, for at that time an alarm was raised that the withdrawals of water from the tributaries of the Indus in the Panjab would ruin Sind. It was a cry of wolf, wolf, when there was no wolf, and exhaustive examination has since conclusively proved that the action of the Punjab canals has had no adverse effect on the Indus at Sukkur. But the outcry led to the belief that the barrage was of immediate necessity, and the next project, that of 1912, provided for a barrage to be begun simultaneously with the canal, and this programme of execution led to its undoing. Dr. Summers protested against it, and possibly on account of his protests the Secretary of State appointed a committee of experts to examine the scheme. The committee reviewed it very thoroughly, and apart from other criticisms came to the decision that it would not fulfil the definition of a productive public work. It was accordingly rejected; and it was unfortunate that the misconception regarding the action of the Punjab canals should have arisen, or the project would probably have been framed in a different way, and no objection would have been taken to it. The Secretary of State, however, refused to sanction it, and it was followed by the project estimate of 1920, which professed, it is believed, to avoid the defects of the estimate of 1912, but which adhered to the same programme of construction in the matter of the barrage, and, therefore, failed to meet with Dr. Summers' approval.

At the Caxton Hall meeting, he explained that if the 1912 project had been under-estimated in cost, the project of 1920 contained more serious errors in the same direction; he said that while the revenue forecasts of 1912 were prepared on safe and cautious lines, those of 1920 were visionary and impossible of fulfilment; he referred to many other details, but his main conclusion was that in the case of a work of such magnitude, dealing with an immense river like the Indus which has never yet been harnessed, there should be a fresh committee of experts to examine and report on the proposals before they are allowed to be carried into effect. With this recommendation it is difficult to quarrel. It does not commit the Government to either the views of Dr. Summers or those of the responsible engineers in India, and it is only right that a work calculated to cost some eighteen millions sterling, which provides for controlling for the first time a dangerous river, should receive the scrutiny of the very best advisers obtainable before it is too late. The Irrigation Comission of 1903 pointed out the difficulties in preparing a remunerative scheme from the Indus at Sukkur; those difficulties obtain at the present time, in fact they are considerably enhanced by the enormous increase in the rates of labour and material in consequence of the war. The Government, it is true, might take the view that if a productive project is impossible, it is still desirable that in the interests of Sind the project should proceed. Such a view would be reasonable; but even so, it must also be desirable not to waste money or to run risks. Lord Lamington, who was in the chair at the East India Association meeting, announced that the 1920 project had received the acceptance of the Secretary of State in Council subject to certain financial restrictions. But the controversy still rages, and there seems to be no valid reason why it should not be set at rest in the way that Dr. Summers has advocated. The latest project has been adversely criticised by engineers of standing, quite apart from Dr. Summers' own views, and investigation in competent hands is indicated to save India from what might conceivably prove to be an expensive and irretrievable mistake.

---

**There is a demand** in Yugoslavia for cotton piece goods of all kinds and practically all such commodities must be imported.

---

The Roumanian Legation in London reports that the exportation of gold from the mines of Transylvania and Roumania has been authorised by the Roumanian Government for a period of one month, provided the parties interested make a deposit in lei for an equivalent sum at the Roumanian Customs, or at one of the Roumanian Legations abroad.

## THE POSITION IN EGYPT.

### Outlook more Promising.

With the appearance of the "Reports of His Majesty's High Commissioner on the Finances, Administration, and Condition of Egypt and the Sudan for 1920 "we have for the first time since 1914 the Blue Book with which we were familiar in pre-war days, that of last year being, it will be remembered, largely of the nature of a survey as a period of six years had to be covered. In general the Blue Books on Egypt and the Sudan have been replete with interest, and the present volume is no exception, the period under review having been one in which exceptional conditions obtained in the financial and economic domain, calling for the constant attention of the authorities, and necessitating numerous special measures to enable the country to tide over an undoubtedly critical time.

It would be difficult to visualise a sharper contrast than that which exists between the Egypt of 1919-20 and of 1920-21. The former period saw the country at the zenith of her post-war prosperity as a result of the unprecedented demand for cotton which resulted in f.g.f. Sakellaridis being quoted at Alexandria in February, 1920, at 187 dollars per kantar. That was the culminating point, and before the period closed much of the increase in the price of cotton had disappeared, the economic outlook in general was giving cause for anxiety, and there was evidently ground for fearing that Egypt was destined to endure a long period of depression the effect of which would be to exhaust the reserves accumulated through the war-time prosperity.

Developments more than justified this view. After August cotton fell with increasing rapidity, finally reaching approximately the pre-war level. This decline had a variety of obvious and extremely unfortunate effects. For the agricultural population. it meant the reduction of profits to next to nothing, and the utilisation of reserves in meeting the high rents and the cost of subsistence. This naturally gave rise to widespread dissatisfaction, and pressure was brought to bear on the Government to exercise intervention. The measures adopted were the subject of the following comment by the Financial Adviser in his Note on the Budget:— "Although it has avoided the worst features of the wholesale schemes of speculative cotton purchase urged upon it, Government, in so far as it has erred, has erred in the direction of engaging public funds and credit upon palliatives, which it is to be earnestly hoped have played their part in alleviating popular distress and tension; but which, it should be unambiguously recorded, cannot be justly defended on any other grounds, particularly at a time when the financial resources of Government themselves demand an almost parsimonious husbandry, any departure from which must inevitably be paid for by the taxpayer sooner or later." A second result was a great decrease in purchasing power making the local market a negligible quantity for imports. Large orders had, however, been placed in Manchester at the end of 1919 and the commencement of 1920, and deliveries of goods during the year were on a very large scale. In the middle of the year local buyers began to show a tendency to hold aloof, because of the growing restriction of credits and also on account of the belief that prices were coming down, and goods began to accumulate in the warehouses, and it was not long before a state of unprecedented congestion obtained.

Finally there is the effect on the country's finances to be considered. The budget estimates for 1920-21 balanced exactly as to revenue and expenditure at £E40,271,000. In consequence of the "slump" in cotton, however, the revenue was below the estimate, while the expenditure on the other hand greatly exceeded expectations, necessitating the depletion of the reserve funds, which are now estimated to stand at only £E3,042,866 or rather less than before the war. For the current year the estimates allow for a deficit of £E1,981,000. How far this will be borne out will depend entirely on economic developments during the next few months. If conditions obtain approximating to those of the previous year then the deficit might well be considerable in which case the authorities would be confronted with a very awkward situation. Happily, however, there is no reason for anticipating that that will be the case, for indications at the moment suggest very plainly that the period of depression is nearing its its end. The price of cotton has risen sharply, and though there have been fluctuations the general tone of the market and reports from authoritative sources point to the probability of the continuance of an upward tendency. Any marked advance will, needless to say, have a great effect on the general position, which will also be modified for the better by the tourist season, which, it is believed, will be most successful. It may be pointed out, *en passant*, that concurrently with the revival of the cotton market, the general trade outlook in Egypt has undergone a great improvement. For some time now goods have been going into consumption at a much greater rate so that the congestion should soon be a thing of the past, and then given favourable economic developments British traders should have their opportunity.

One other feature of the Egyptian section of the report must be briefly touched on in conclusion (the Sudan section will be the subject of a separate article) and that is the survey of cotton cultivation during the year. It is pointed out that last year's crop was finally estimated at 6,035,000 kantars, but "it is doubtful . . whether the actual yield for 1920 will ever be known with any accuracy, owing to the fact that only a small proportion of the crop has been ginned, and a large quantity will most certainly be stored and carried over to next year." The statistics of distribution of varieties of cotton show that Sakellaridis was grown on 1,270,481 feddans or 69.51 per cent., Ashmuni being second with 283,906 feddans or 15.53 per cent., and Zagora, which is quoted for the first time as a separate variety, third with 145,171 feddans or 7.94 per cent. It is to be noted that there is a slight decrease in the cultivation of Sakellaridis and a substantial one in the case of Ashmuni. Representations were made last year "regarding the risks to which the cotton industry has been exposed through the appearance of a new variety of cotton, known by the name of Pelion." Enquiries that were made indicated, it is stated, that there was little likelihood that this variety would be extensively grown.

# Engineering Topics.

*By our Engineering Representative.*

**Commercial Motors.**

The Commercial Vehicle Exhibition at Olympia, which I had the opportunity of visiting before its opening, promises to surpass itself this year.

One of the most representative stands I visited was that of the Commer Cars, Luton. As one of the oldest firms in the industry their exhibits were worth close inspection.

The exhibits fully maintained the standard which one naturally associates with this Luton firm, and consisted of a range of four Commer Cars, three being goods chassis with carrying capacities of two, four and five tons, the other being a coach for seating 30 passengers. The new five-ton chassis is one of the most powerful and well designed I have seen, and is built to carry a five ton net load in addition to the body and equipment, which weigh a further one ton. The gear box is of the four speed type, and the advantages of the greater reduction obtained by the lower speed will be obvious to all those who are used to handling commercial vehicles, or who, like myself, clattered a milk lorry along the Uxbridge Road and up all sorts of little hills in Bucks during the first post-war railway strike. The gears, by the way, are operated by side lever through a gate change quadrant. Foot and hand brakes are fitted, each being sufficiently strong to hold the vehicle, fully loaded, on a steep decline. A Claudel-Hobson carburettor and a high tension magneto are standard fitments of these cars, which are also equipped, as standard, with hollow spoke cast steel wheels.

The gear box mentioned is of a unique type, and will appeal to all engineers by reason of its strength and comparative simplicity. It consists of main shaft, lay shaft, and reverse shaft running parallel with each other, and to this extent the lines of the conventional sliding gear are followed. Instead, however, of the usual and often unsatisfactory method of sliding the gear teeth into one another, all gear changes are obtained by means of dog clutches cut from solid steel, and it is the successful application of this principle which gives the gear box so many valuable advantages.

**A Handsome Charabanc.**

The Commer coach shewn is strikingly finished in nickel silver fittings, and is luxuriously upholstered It is built to accommodate 30 passengers, and runs on interchangeable disc wheels shod in giant pneumatic tyres. I regard it as a typical example of the high standard of comfort which has now been reached in connection with the motor coach, and from a close inspection it was evident that comfort, safety, and good appearance had received special attention.

Speaking technically of this coach, the engine is a 4-cylinder, and of 120 m.m. bore by 140 m.m. stroke. The cylinders are cast in pairs, and as in all other of this firm's models are carried on two cross members and three point suspended. The Thomas patent four-speed gear box is fitted, The final drive is by overtype worm working in phospher bronze wheel, mounted in removable section of main axle casing for quick inspection and replacement. The propeller shaft is enclosed in a steel tube bolted at one end to back axle. This tube is provided at its forward end with a spherical enlargement, and acts as a combined radius and torque stay.

The brakework is designed to give an exceptionally wide margin of safety. The foot brake acts on a large drum on the main shaft, while the hand brake operates shoes expanding internally in steel drums mounted on rear wheels. All brake drums are of large diameter giving an unusually generous area of braking surface.

**Original Features.**

Another exhibit worthy of extended notice was that of Straker-Squire, Ltd., who are concentrating upon one model of commercial chassis known as the "A" type which has a carrying capacity up to five tons. Although produced in one model only the chassis is adapted to suit particular requirements. Different gear ratios, for instance, are provided for passenger and goods carrying use, and the springing arrangements are varied according to the working conditions and the loads to be carried.

The chassis simply bristles with original features, and is of unusually solid design throughout. The four cylinder engine, which measures 4½ inch bore and 6½ inch stroke is of the overhead valve type, and interesting points in this latter connection are the method of mounting the rocker arms and the means of adjustment. The crankshaft, mounted on two large roller bearings, is 3 inches in diameter, and all wearing parts are of correspondingly large dimensions. The gudgeon pins are fitted to the small ends of the connecting rods, and run in bushes pressed into the piston bosses. Lubrication is positive, oil being forced through the drilled crankshaft by a plunger pump situated behind the camshaft. There are many interesting points about the lubrication system such as the method of squirting oil from nozzles in the crankcase into scoops integral with the crank webs, which have oilways running to the big end bearings. Thermo syphon cooling is used, the flow being assisted by an impeller driven from the fan spindle. An impulse starter is fitted to the magneto, which renders starting up a matter of extreme simplicity, and at 1000 revolutious per minute the engine develops 54 brake horse power.

The main feature of the chassis is a single disc clutch which conveys the drive to a four speed gear box, and it is worthy of note that, owing to the manner in which the engine and gear box are mounted on their supporting sub-frame, there is no need for universal joints between these units. Splines on the primary shaft of the gear-box engage in castellations in the clutch centre. The change speed mechanism is totally enclosed, and works in oil, the gate being carried on the gearbox itself. Transmission is by a tubular shaft, which has a Star type universal joint at either end, and the final drive is through an overhead worm. Both brakes operate on rear wheel drums of large diameter, and as on all other features throughout the chassis a very simple system of adjustment is provided. It may be mentioned in passing that the brake mechanism is fitted with oil-less bushes which require no attention whatever.

**STANDS A HIGHER FRICTION HEAT.**

Certain cutting work is not so difficult as to warrant the use of a high-speed steel tool, but generates enough friction-heat to shorten the life of an ordinary carbon steel tool. To use either high speed or ordinary carbon steel for this work is therefore wasteful, Use instead

**Edgar Allen's Red Label Steel**

which contains a small percentage of tungsten, enabling it to withstand a higher friction-heat than carbon tool steel. In addition it has a greater torsional resistance, and being deep hardening, will take and hold a razor-like edge. It is specially suitable for dies, punches, etc. Write for "Red Label" Folder which gives illustrations of work done together with instructions for treatment to Edgar Allen & Co., Ltd., Imperial Steel Works, Sheffield,

# Near East Markets.

## LONDON PRODUCE REPORT.

Coffee.—The market has been unsteady. Costa Rica has gained 8s. at 130s.; and Indian at 100s. has dropped 10s. Nairobi at 106s. is 2s. up; while Jamaica at 140s. is unchanged. Futures are:—December, 50s. 3d.; March, 51s.; May, 52s.; and July, 52s. 6d.

Sugar.—Home refined has been in fair demand at unchanged rates. White Mauritius at 47s. has shed 1s., while Czecho-Slovakian at 23s. 6d. is unchanged. Other transactions include West Indian crystallized at 40s. to 46s.; white Java at 49s., and beet sugar at 18s. 9d. which is 2s. 3d. down.

Oilseeds.—All prices are weaker. Indian linseed at 16s. is eighteenpence down, while La Plata has shed 10½d. at 16s. 3d. Rapeseed is lower with Toria 9d. down at 19s. 9d.; bold Ferozepore, 3d. down at 18s.; and brown Cawnpore, 1s. down at 19s. Cottonseed has been weak with Indian 1s. 4½d. lower at 10s., while Egyptian black is 9d. down at 14s.

Seed Oils.—Unsteadiness has prevailed. Linseed oil is 6d. down at 31s. Cotton oil is steadier with refined common edible 3s. up at 57s.; Egyptian crude unchanged at 48s., and the deodorized variety 1s. down at 62s.

Oilcakes.—The market has been dull. Linseed cake is 10s. down at 310s.; while London-made cottonseed cake has shed a like amount at 200s. Arachis cake at 310s. is unchanged.

## EXPORT OF ROUMANIAN GRAIN.

(*From Our Own Correspondent.*)

*Bucharest, September* 28.

The State, having monopolized half of the grain stocks of the country, partly for home consumption and partly for export, has now closed a contract with a syndicate of Roumanian bankers recently formed into a company under the name of "Sindex," for looking after the financing of the sale of the grain available for export. This contract only refers to oats, maize, barley, and beans. The quantity of 6,000 waggons sold to the Italian Company "Granaria" has to be deducted from the available quantity. The Sindex Company will sell abroad up to 50,000 waggons, for the account of the State against a commission of 2½ per cent, and for any further quantity at 2 per cent. All expenses f.o.b. as well as freight and insurance will be borne by the State. The sale will be made at the best price obtainable, while the foreign currency (preferable sterling, dollars, French francs and Italian liras) resulting from the sale will be placed at the disposal of the Government. The syndicate guarantees the payments of the goods delivered, thereby exempting the State from all risks.

The syndicate will further open a credit for the State of 500 million lei, to be used only for the purchase of the grain from the farmers, which amount will be refunded from the sales effected abroad. The state will pay for this loan an interest of 1 per cent. above the Banca Nationala rate, with a minimum of 7 per cent. plus a three monthly commission of ¼ per cent. The prices paid to the farmers are those fixed by the State. The whole organisation of taking delivery, selling, shipping, and making and collecting payments will be carried out by the syndicate. For shipment Roumanian boats must be preferred.

## ROUMANIA'S MAIZE CROP.

(*From Our Own Correspondent.*)

*Bucharest, September* 28.

According to the statistical data of the Ministry of Agriculture the gathering of the maize crop is almost terminated, and can be estimated at an average of 14 hectolitres per hectare. Thanks to the last rains the autumn ploughing and sowing are progressing satisfactorily.

The Roumanian-Swiss Convention, which has recently been signed, stipulates that out of the credit of 40,000,000 francs accorded to Roumania in exchange for deliveries of cheese 24,000,000 francs are to be used for the purchase of Swiss goods, orders for which the Roumanian Government will place with Swiss producers.

## SATISFACTORY CROP PROSPECTS IN INDIA.

The India Office has issued the following communiqué:—

In India during September, rain was sufficient nearly everywhere and was generally well distributed. In part of the North West Frontier Province, Upper Burma, Baluchistan, Southern Bombay, and Madras Deccan, the crops are suffering from insufficient rain. Much damage has been caused by floods in the Saran District of Bihar. In Malabar, owing to Moplah outrages, the harvest may be lost and the second crop may not be sown. In three Deccan districts of Madras last year's crop failure seems likely to be repeated and famine relief operations are extending in this tract.

These local exceptions, however, do not detract materially from the crop prospects of the country as a whole, which are most satisfactory. In the United Provinces of Agra and Oudh, and the Central Provinces, crops are excellent, while elsewhere, with the exceptions mentioned above, they are good. At least a normal autumn harvest is expected. Prospects of wheat sowings are good, except in the North West Frontier Province, where more rain is needed. The price of rice has fallen appreciably in most provinces, but food grains generally are still extremely dear, and cheap grain shops have been opened in part of Northern India.

## DRIED FRUIT REPORT.

Messrs. J. C. Houghton and Co., of Liverpool, report as follows under date October 4:—

Currants.—It is very difficult to say anything about the market during the closing weeks of the past month, because there is little to relate. If there was any feature at all, it was the excessive desire of holders to unload their small remaining stock before the arrival of new, with the natural sequence of forcing values down. Closing prices on arrival of new fruit:—Pyrgos and Amalias, 42s. to 44s.; Patras, 52s. to 56s.; Zante, 45s. to 62s.; Gulf and Panariti, 55s. to 65s.; Vostizza, 65s. to 75s.

New Fruit.—The first supply came to hand by the Phrygia, only about 800 tons of her cargo being available for the Brokers' Counters. Samples of these were on view towards the end of last month. Quality so far seen is disappointing, a large proportion being small and thin, and little interest was evinced, only a few parcels changing hands. Pyrgos, 52s.; Zante, 65s. to 68s. (few specialities up to 72s.); Patras, 65s. to 68s.; Gulf, 62s. to 68s.; Vostizza, 70s. to 82s. The Bosnian with a further 1,200 tons is discharging and it is hoped that with a better selection more interest will be in evidence, as the opening has proved the most discouraging ever experienced. No further steamer is reported as having left Greece, so it looks as if we should be short of supplies in the near future.

Valencia Raisins.—The vines were so ruined by drought and other causes that the quality harvested is the smallest known for many years, and latterly heavy rains have further reduced the stocks available, damage being suffered by fruit while in the process of drying. Samples of first arrivals ex-Kamir, Phrygia, and Seahound (the total being very small) are on the market. Demand keeps slow, and progress most difficult. ½ boxes, 125s. to 132s.; ¼ boxes, 130s. to 140.

Sultanas.—The Luque's cargo of 50,000 boxes opened the market. For some time past it was known the the old stocks were exhausted and that the new fruits would consequently come to a market bare of supplies. Nevertheless when the above named steamer's fruit came on offer it was found necessary to accept lower rates than the parity of forward business transacted on overland samples, if any progress was to be made. Sellers decided to meet buyers and a number of parcels changed hands at 10s. per cwt. reduction. The interesting feature is that, although demand is slow and no weight is moving, steady progress on a small scale is possible, buyers giving repeat orders as soon as they dispose of their purchases.

Figs.—The first arrival of skeleton cases of good quality, was quickly disposed of—large boxes selling at 140s. to 150s. Small boxes up to 155s. Loucoums 160s. to 180s.; pulled, 95s. to 110s. Further supplies ex-Malatian are discharging.

## ASIA MINOR FRUIT REPORT.

Messrs. C. J. Giraud and Co., Smyrna, report as follows for the week ended September 17 :—

Sultanas.—The total estimated arrivals to date amounted to 78,215 bags compared with 39,665 bags for the corresponding period of last year. The total estimated sales are 68,215 bags as against 37,165 bags for the same period last year, and the estimated stock unsold amounts to 10,000 bags as compared with 2,500 bags for 1920.

Figs.—The total estimated arrivals to date came to 47,511 loads, as against 54,562 loads for last year. The total estimated sales were 46,511 loads as compared with 54,562 loads, and the estimated stock unsold amounts to 1,000 loads.

Shipments.—Sultanas and figs are being loaded on the following steamers :—S.s. Antigone for London and Bristol ; s.s. Gourko for London and Hull ; s.s. Trentino for Liverpool and Glasgow ; s.s. Stork for London ; s.s. Jason for Amsterdam; and s.s. Wheelingmold for New York.

Markets.—Market for sultanas opened firm and sales of the week totalled about 3,000 tons. Prices in local currency are advancing, but the upward tendency of foreign exchanges, accompanied by sharp and sensational fluctuations, has entirely counteracted any advance in foreign equivalents. In view of political uncertainties, it is more than probable that exchanges will continue to fluctuate widely and business is becoming to a great extent a gamble on exchange rates. A steady business is doing in figs, and all arrivals continue to be absorbed with ease. In both articles there are still large forward engagements to be covered and demand will continue active throughout the month.

For the week ended September 24, Messrs. C. J. Giraud report :

Sultanas.—The total estimated arrivals to-date amount to 95,960 bags, as against 51,875 bags for 1920. The estimated sales total 85,960 bags, compared with 47,875 bags for last year, and the estimated stock unsold amounts to 10,000 bags against 4,000 bags.

Figs.—The total estimated arrivals to-date amount to 72,679 loads as against 78,554. The sales are 71,544 loads as against 78,554. The sales are 71,544 loads as against 78,554 loads, and the estimated stock unsold amounts to 1,000 loads.

Shipments.—Sultanas and Figs are being loaded on the following steamers :—S.s. Malvolio for Australia ; s.s. Antigone for London and Bristol ; s.s. Gourko for London and Hull ; s.s. Stork for London ; s.s. Jason for Amsterdam ; and s.s. Stella for Amsterdam.

Markets.—Prices for both sultanas and figs showed little change in local currency over the week. Demand still continues its activity owing to the engagements still outstanding for September. Exchanges have fluctuated within narrower limits, but the general tendency has been downwards marking a decline of about 4 per cent. on the preceeding week and proportionately increasing the sterling cost of fruit. Arrivals of sultanas are showing some reduction but supplies of figs have been maintained owing to the requirements of the packing establishments which will be closing down in the course of October.

## CURRENT PRICES.

*General Produce.*—Bacon : (Continental), 160s. cwt. ; (Canadian), 115s. cwt. ; (American), 102s. 6d. cwt. ; butter : (Danish), 226s. cwt. ; (Australian), 180s. cwt. ; (New Zealand), 205s. cwt. ; cheese (Canadian), 103s. cwt. ; (New Zealand), 97s. cwt. ; lard 85s. cwt. ; eggs : (Danish), 28s. 6d. per 120 ; (Styrian) 17s. 6d. ; per 120 ; chillies, 155s. cwt. ; cloves (Zanzibar), 1s. 3½d. lb. cocoa (Ceylon, good to fine), 87s. cwt. ; coffee : (Costa Rica) 146s. 6d. cwt. ; (East India), 140s. cwt. ; (Central American), 120s. cwt. ; (Jamaica), 67s. 6d. cwt. ; (Mocha longberry), 113s. 6d. cwt. ; (Santos superior), 65s. cwt. ; ginger (washed Cochin), 49s. 9d. cwt. ; nutmegs (110's to 80's), 11d. lb. ; pepper : (Singapore black), 4d. lb. ; (Muntok white), 9d. lb. ; pimento, 2½d. lb. ; raisins (Valencias), 137s. 6d. cwt. ; sultanas (Smyrna), 126s. cwt. ; currants : (Vostizza), 79s. 6d. cwt. ; (Amalias), 61s. cwt. ; sugar : (Tate's cubes), 57s. 9d. cwt. ; (Lyle's granulated), 52s. 1½d. cwt. ; (Mauritius crystals), 47s. 9d. cwt. ; (West India Crystallized), 43s. 3d. cwt. ; (centrifugal), 17s. 9d. cwt. ; tapioca (fair Singapore), 1¼d. lb. ; sago (small pearl), 26s. 6d. cwt. ; sago flour, 17s. 3d. cwt. ; rice : (Rangoon No. 2), 22s. 6d. cwt. ; (bran Rangoon), £8 12s. 6d. ton ; cinnamon (firsts), 1s. 1½d. lb. ; mace (fair Singapore), 1s. 2½d. lb. ; tea : (Indian, common to good common), 10½d. lb. ; (medium to good), 1s. 5d. lb. ; (fine to finest), 2s. 7½d. lb. ; Ceylon (common to good common), 10½d. lb. ; (medium to good), 1s. 5d. ; (fine to finest), 2s. 7½d. lb. ; Java (common to good common), 7d. lb. ; wheat : (English white), 57s. 6d. qr. ; (La Plata ex-ship), 82s. qr. ; (Australian) 72s. 9d. qr. ; barley (malting), 72s. 6d. qr. ; barley (feeding). 39s. 9d. qr. ; oats (English), 31s. qr. ; oats (La Plata), 25s. 9d, qr. ; maize (mixed American), 37s. 3d. qr. ; maize (La Plata) 34s. qr. ; flour, 53s. sack.

*Metals.*—Aluminium, £122 10s. ton ; antimony (English Regulus), £39 10s. ton ; bismuth, 7s. 6d. lb. ; copper (standard), £68 8s. 3d. ton ; copper (electro), £73 10s. ton ; gold bars, 111s. 2d. oz. ; iron (No. 3 Cleveland), 125s. ton ; hematite (mixed number), 150s. ton ; galvanized sheets (24G), £19 5s. ton ; lead (soft foreign) £22 16s. ton ; manganese Poti, 1s. 1½d. unit ; molybdenite, 40s. unit ; nickel, £190 ton ; platinum, 365s. oz. ; plumbago, £20 ton ; quicksilver, £9 10s. bottle ; silver bars, 43d. oz. ; spelter (G.O.B.), £26 11s. 3d. ton ; tin (standard), £156 12s. 6d. ton ; wolfram, 13s. unit ; zinc sheets, £35 10s. ton ; tin plates (20 x 14), 21s. 6d. box.

*Chemicals.*—Acids : Boric, 66s. cwt. ; oxalic, 8½d. lb. ; citric 2s. 4½d. lb. ; tartaric, 1s. 5½d. lb. ; ammonia (sulphate), £13 7s. 6d. ton ; arsenic (white powdered), £31 5s. ton ; benzole (standard), 2s. 5¼d. gallon ; bleaching powder (35 per cent), £16 10s. ton ; borax crystals, 31s. 6d. cwt. ; cream of tartar, 128s. 9d. cwt. ; Potassium : Bi-chromate, 9d. lb. ; chlorate, 5d. lb. ; caustic, £30 10s. ton ; nitrate, £53 ton ; permanganate, 11¾d. lb. ; prussiate yellow, 1s. 2d. lb. ; sulphate (90 per cent.), £17 ton ; Sodium; Crystals, 141s. 3d. ton ; bi-carbonate, £12 5s. ton ; bi-chromate, 6½d. lb. ; alkali (58 per cent.), £8 5s. ton ; chlorate, 4d. lb. ; caustic (70 per cent.), £24 10s. ton ; hyposulphate, £2 12s. 6d. ton ; prussiate, 7d. lb. ; nitrate, £17 12s. 6d. ton ; glycerine (crude 80 per cent.), £80 ton ; glycerine (industrial, 1260 per cent), £110 ton ; lemon oil, 3s. 10½d. lb. ; quinine, 4s. 0½d. oz. ; red lead, £39 15s. ton ; white dry lead, £42 12s. 6d. ton ; white ground lead, £53 2s. 6d. ton ; sulphate of copper, £30 10s. ton ; sulphate of iron, 117s. 6d. ton

*Hides and Skins.*—Ox and Heifer (first), 90 lbs. and under, 10¾d. lb. ; 80 to 89 lbs., 10¾d. lb. ; 70 to 79 lbs., 10¾d. lb. ; 60 to 69 lbs., 10¼d. lb. ; 59 lbs. and under, 8,3-8d. lb. ; (second), 90 lbs and up, 9,3-8d. lb. ; 80 to 89 lbs., 9,3-8d. lb. ; 70 to 79 lbs. 9,3-8d. lb. ; 60 to 69 lbs., 9d. lb. ; 59 lbs. and under, 8¼d. lb Cows (first), 70lbs. and up, 8¾d. lb. ; 59 lbs. and under, 8¼d. lb. (second), 60 lbs. and up, 7d. lb. ; 59 lbs. and under, 6¾d. lb. Bulls (first), 6,1-8d. lb. ; (second), 4,3-8d. lb. ; Kips (first) 6,7-8d. lb. ; (second), 6,1-8d. lb. ; (third), 4d. lb.

*Miscellaneous.*—Cotton (American), 13.20d. lb. ; cotton (Egyptian Sakel), 26.60d. lb. ; Oilseeds : Linseed (La Plata), £16 ton ; rape (Toria), £20 5s. ton ; soya beans, £15 5s. ton ; palm kernals, £21 15s. ton ; sesame seed (China), £33 ton ; Oils : Linseed, £33 2s. 6d. ton ; olive (Levant), £82 10s. ton ; palm £42 ton ; rape (crude), £54 10s. ton ; soya, £44 10s. ton ; petroleum, 1s. 4½d. gallon ; petrol, 2s. 1d. gallon ; fuel oil (ex tank), £3 15s. ton ; coconut (Ceylon), £53 ton ; cotton (crude), £46 11s. 6d. ton ; Rubber : Plantation No. 1 crepe, 9d. lb. ; smoked sheet, 9d. lb. ; fine hard Para, 1s. 1d. lb.

## INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated October 3 :—

Season.—September 26.—Monsoon active in Burma and North East India. September 27—Break in Arabian Sea monsoon. September 28—Weak except in Burma and to the south of Peninsula. September 29—Withdrew from North-West India. September 30 to October 2.—Fairly heavy rain in Punjab and round head of Bay.

Crops.—September 30—Punjab—unchanged. Central Provinces—Rice and cotton good to excellent. Sesamum very good. Bengal—Winter paddy normal. Jute fair. Sugarcane good. Bombay—Cotton and Sesamum good. Groundnut excellent. Assam—Sugarcane and cotton normal broadcast. Winter rice poor. Tea and transplanted rice good.

Markets.—Bombay cotton market September 29—quiet, but steady. Oomras. Rs. 515 December-January. Cotton arrivals September 1 to 23, 110,000 bales as compared with 38,000 bales in same period last year. Government of Bombay have published Bombay Cotton Contracts Control War Provisions Repeal Act, 1921, which repeals as from November 15, next the Act of 1919, which constituted the Cotton Contracts Board. Surplus assets of Board will be applied by Government of Bombay for the benefit of cotton trade in city of Bombay. In Bombay piece-goods market hopeful tendency continues and up-country buyers more in evidence. Demand in staple styles more encouraging, and rupee rates better. In some cases local goods moving fairly. Calcutta jute, September 30—Drop in rates to Rs. 62 for old crop firsts and Rs. 52 for old crop lightnings. Gunnies quiet but steady. Same rate for T.N. shellac as last week, viz., Rs. 142. At the tea sale on September 27 quality good. Price 3 pies lower, for medium leaf grades from 6 to 8 annas. Dusts slightly lower. Other grades unchanged. 223,885 packages sold to date at average price of 8 annas 11 pies per lb. On September 30 Rangoon rice market excited over end of September settlement owing to rumours of weakness in Calcutta and Bombay, also of anticipated Government action. Price, special rice, Rs. 632½. Paddy arrivals dimishing. Price quoted. Rs. 265. No change in Bank Rates.

## YUGOSLAVIA'S TRADE OUTLOOK.

### The Salonika Project.

*(From Our Own Correspondent.)*

*Zagreb, October 2.*

A press message from Salonika states that the Greek authorities are now arranging to carry out the scheme by which Yugoslavia will have its own free zone for the transit of merchandise through that port. The Governor of Macedonia, M. Alexandropoulos, has decided to proceed without delay to obtain the necessary site. As soon as that is done the construction of the necessary docks, wharves, warehouses, offices, and other buildings, for which a period of ten years is allowed, will be at once begun. The project is an urgent necessity for Yugoslavia, and it is to be hoped that a working scheme will be adopted long before the completion of this ambitious programme, for the kingdom, in spite of its long seaboard, in spite of its population of about 13 millions, in spite of its great natural resources, in spite of Serbia's successful wars for eight years, one of the main objects of which was an outlet to the sea, is still at the mercy of two foreign maritime states for the free ingress and egress of merchandise. Both these States have vast coast lines, a seafaring population, and numerous ports of their own, and have no interest in the interior behind Salonika and Fiume.

There have been a good many complaints about delays at Salonika, shortage of rolling stock, and difficulties put in the way by Greek officials. The Greek authorities have now informed the Government that all obstacles have been removed which were interfering with goods in transit, and that they will in future endeavour to give every possible facility.

## FORTHCOMING SAILINGS.

*The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parentheses :—*

*Anchor Line.*—S.s. Circassia for Bombay (Liverpool, October 27).

*Anchor Brocklebank Line.*—S.s. Malia for Calcutta (Manchester November 5) ; s.s. Matheran for Port Said, Colombo, Madras and Calcutta (leaves London, November 5) ; s.s. Imani for Port Said, Colombo, Madras and Calcutta (leaves London, November 19).

*Bibby Line.*—S.s. Lancashire for Port Said, Colombo, and Rangoon (Birkenhead, October 26).

*Byron Steamship Line.*—S.s. Lord Broughton for Patras, Piraeus, Salonika, Smyrna, Constantinople, Bourgas, Varna. Constantza, Galatz and Braila (Liverpool, October 15) ; s.s, Lord Harrington for Patras, Piraeus, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Galatz and Braila (Liverpool, October 28).

*Clan Line.*—S.s. Clan MacNair for Bombay and Persian Gulf (Birkenhead, October 19) ; s.s. Clan MacNaughton for Colombo, Madras, and Calcutta (Birkenhead, October 20).

*Cunard Line.*—S.s. Brescia for Gibraltar, Algiers, Malta, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Odessa, Novorossisk and Batoum (Glasgow, November 3) ; s.s. Pavia for Genoa, Leghorn, Catania, Brindisi, Bari, Ancona, Venice, Trieste, Fiume, and Gravosa (Liverpool, November 10).

*Ellerman Line.*—s.s. City of Oxford for Gibraltar, Malta and Alexandria (Liverpool, October 22).

*Ellerman "City" Line.*—S.s. City of Baroda for Calcutta (Birkenhead, October 15) ; s.s. City of Harvard for Bombay and Karachi (Birkenhead, October 22) ; s.s. City of Brisbane for Calcutta (Birkenhead, October 26).

*Ellerman's "Hall" Line.*—S.s. City of Palermo for Bombay, Karachi and the Punjab (Liverpool, October 15) ; s.s. Melford Hall for Bombay, Karachi and the Punjab (Liverpool, October 31).

*Ellerman's "Westcott and Laurance" Line.*—Steamers sail fortnightly for Mediterranean, Egypt, and Levant ports.

*Glen Line.*—S.s. Glenluce for Port Said, Port Swettenham, Singapore, etc. (London, October 20) ; s.s. Glenogle, for Port Said, Port Swettenham, Singapore, etc. (London, November 3).

*Harrison Line.*—S.s. Diplomat for Calcutta (Liverpool, October 14) ; s.s. Dramatist for Calcutta (Liverpool, November 1).

*Henderson Line.*—S.s. Bhamo for Port Said and Rangoon (Birkenhead, October 19).

*Johnston Line.*—S.s. Dromore for Piraeus, Volo, Salonika, Bourgas, Varna, Constantza, Sulina, Galatz, and Braila (Liverpool, October 22) ; s.s. Peruviana for Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Galatz and Braila (Liverpool, November 5).

*Moss Line.*—S.s. Sitra for Gibraltar, Malta, Syra, Piraeus, Salonika, Constantinople, Bourgas, Varna, Constantza and Sulina (Liverpool, October 15) ; s.s. Amarna for Gibraltar, Algiers, Malta, and Alexandria (Liverpool, October 15).

*Papayanni Line.*—S.s. Gerano for Algiers, Malta, Syra, Smyrna and Constantinople (Liverpool, October 22).

*P. and O. Line.*—S.s. Kaisar-I-Hind for Bombay (London October 14) ; s.s. Macedonia for Bombay (London, October 21) ; s.s. Kalyan for Colombo, Madras and Calcutta (London, October 21) ; s.s. Nankin for Colombo, Madras, and Calcutta (London, November 3).

*P. and O. British India Line.*—S.s. Manora for Colombo, Madras, and Calcutta (London, October 14) ; s.s. Neuralia for Bombay and Karachi (London, October 21) ; s.s. Margha for Colombo, Madras and Calcutta (London, October 28) ; s.s. Merkara for Bombay and Karachi (London, November 4) ; s.s. Manela for Colombo, Madras, and Calcutta (London, November 11.)

## SUPPLIES AND PRICES IN THE NEAR EAST.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank:—

Aleppo, September 7.

The crop of cereals is reported to be good, Prices have fallen by about 10 per cent. Prices of Manchester goods, which find a large opening in this market, have improved of late.

There is practically no export of the products of this region, with the exception of pistachio nuts and apricot kernels which are in great demand notably for America.

The prices of the principal products of the district (in Piastres Syrian per kilogramme) are:—Wool, washed, extra, 37; raw wool, 24; cotton, 18 to 20; yellow wax, 78; apricot kernels, 9; pistachio nuts—(white shells) 729, (red shells) 27; butter 80.

Adana.

The report for August states:—The great heat that has been experienced during the month has damaged the cotton, and the forecasts of the crop do not appear to bear out the total of bales previously anticipated. The crop of cereals so far as it has been raised is short. Orders have come from Marseilles for about 1,000 tons.

The local administration, owing to the deplorable position of agriculturists, who had to undergo great losses during the events of July, 1920, and who in consequence are unable to proceed with the development of the land, and fearing lest the shortage of the crop of cereals should be repeated in the 1921-22 season, has invited the various banking houses such as the Banque Agricole, the Imperial Ottoman Bank, and the Banque Francaise de Syrie to ask their head offices to grant credits of about £T750,000 to the agriculturists. But it does not appear that the prospect will be agreed to by the said banking administrations.

The recovery in the price of cotton has relieved the market, and merchants are looking forward hopefully to the end of the crisis which has lasted for more than a year. This market possesses a stock of approximately 20,000 bales of cotton. The quotation at the commencement of the month was Ps. 135-150, and is now Ps. 180—200 with a strong tendency to rise.

Orders are arriving from all parts. Merchants are freeing their goods which have been held as security by the banks, and are selling them almost without a profit. The financial stringency from which the market has been suffering appears to be undergoing an improvement. The banks are showing more confidence in their advances in view of their increased security as a result of the rise of cotton.

The Banque Francaise de Syrie, of Mersina, is contemplating the construction of large warehouses in the proximity of the customs for the direct reception of goods in their passage through the customs. A special customs staff would have to be installed to deal with the valuation of the duties. A large piece of land beside the sea has been purchased by the bank from the Efkafs for the sum of £T2,000.

---

The annual general meeting of the Imperial Ottoman Bank will be held at Winchester House, E.C, on November 3.

## ON 'CHANGE.

### Tone Generally Dull.

*( From Our Own Correspondent.)*

London, Monday.

Almost the only bright feature of the week has been provided by the gilt-edged market, and in general the tone has been very dull. Hopes had been entertained that the Bank rate would be lowered, and this further disappointment added somewhat to the general depression.

Among gilt-edged securities Consols are ¼ up at 48 7-8. War Loan Fives are 89 3-8, a rise of ½, while Fundings are ¼ up at 72 1-8. In Near Eastern securities Egyptian Guaranteed 3 per cent. are unchanged at 69, while Greek Guaranteed 2½ per cent. 1898 and Turkish Guaranteed 4 per cent. 1855 are the same at 66 and 69 respectively. The India 7 per cent. Loan is ¼ up at 103¼.

A tendency to weakness has prevailed in the Industrial group. There has been a considerable amount of liquidation in various directions, and generally speaking, prices have moved towards lower levels. Iron and steel shares have been dull. Shipping shares have also been weak, P. and O. Deferred being 15 down at 350. Furness Withy have shed 9d. at 24s. 3d., while Cunards have dropped a similar amount at 18s.

**Oils Weak.**

Oils have been exceptionally dull, with Mexican Eagles again providing the outstanding weakness. Much selling of these shares has been going on during the week, and they now stand at 3½, a fall of 23-32 on the week. Anglo-Egyptians are 3-32 down at 1 1-8, while Roumanian Consolidated have shed 9d. at 9s. Steaua Romana are 1s. 9d. lower at 8s. 9d., while Phoenix are 3d. down at 8s. 3d. Burmahs are 5-8 down at 4 7-8.

Bank shares have been fairly firm. Agricultural 3½ per cent. Bonds are 53 xd, while the 3½ per cent. Guaranteed Bonds are 55 xd. Imperial Ottoman Banks are unchanged at 7 7-8 but National Bank of Egypts are 1-8 down at 19 7-8. Bank of Athens are 2 3-8, while Ionians are 3¼.

There is little fresh to report as regards Rubbers. The raw commodity now seems to be fairly firm at a fraction above 9d., but the shares are still very weak, though it would not take much buying to make some remarkable changes in prices.

**Greeks Dull.**

Greek shares have displayed weakness. The 5 per cent 1884 Loan is 2 down at 39. The 4 per cent. 1902 Loan is unchanged at 5, while the five per cent Funding Loan remains at 39, but the 5 per cent. 1914 Loan is 1 down at 39.

Land shares have been firm. Beheras are unchanged at 11, while Behera Prefs are the same at 3¼. Egyptian Delta Lands are 1½ lower at 9s. 1½d., but Egyptian Consolidated Lands are 1½d. up at 1s. 3d. New Egyptians are 6d. up at 26s., but Sudan Plantations are 1-8 down at 3 1-16. Union Foncieres are 1-16 up at 3 1-16.

## OIL NOTES AND NEWS.

**Dacia Romano Petroleum.**

The report of the Dacia Romano Petroleum Syndicate Ltd. states that the company's development programme has been retarded by the lack of transport facilities, the improvement in this respect being much slower than was generally anticipated. Chiciura Well No. 1 and Baicoi Well No. 1, the two wells which were partially restored after their destruction by the British Commission, yielded during the year 3,030 tons of oil, production having been restricted by defects at the Power Station which supplies the oilfields with electric current, involving a stoppage of several weeks. A further four weeks stoppage at Chiciura No. 1 Well was caused by a landslide which necessitated repairing the derrick. The difficulty of getting materials through to the new well sites from the Port of Galatz rendered it impossible to start drilling operations until early this year. Baicoi Well No. 2 was commenced in January, and Moreni Well No. 1 at the end of March: both wells are on the verge of completion, and new wells are being commenced at Moreni and Chiciura. The big labour strike in Roumania, which lasted for five months, suspended progress for that period, and the contractors were further delayed by the great difficulties of transport. The Factory has just been completed, and the plant and machinery is now being tested. It is anticipated the refinery will be operating by the end of October. The whole of the work in connection with both buildings and plant has been carried out in a most satisfactory manner, and the company will now possess a freehold refinery equipped with the most up-to-date plant and capable of refining over 200 tons of oil daily. Roumanian exchange has throughout the year been subject to wide fluctation and the sum of £4,767 3d. 5d. has been written off the Profit and Loss Account for depreciation of Lei, leaving a profit of £104 15s. 4d., which added to the balance £234 os. 6d. brought forward from last account makes a total of £338 15s. 10d., which the Directors recommend should be carried forward. While progress has been retarded by the unavoidable causes above referred to, the directors are satisfied that the company is now about to enter the profit earning stage.

**The Empire's Oilfields.**

A new volume, dealing with petroleum. in the series of Monographs on the Mineral Resources of the Empire, issued under the direction of the Mineral Resources Committee of the Imperial Institute, has just been published by Mr. John Murray. (Price 5s. This monograph has been prepared jointly with H.M. Petroleum Department with the assistance of Mr. H. B. Cronshaw, N.A., Ph.D., A.R.S.M. The world's output of petroleum during the last fifteen years has increased from 35 millions tons to upwards of 90 million tons. The first chapter describes the characteristics of petroleum, the geological distribution of oil in the chief oilfields, the causes which have affected the transference or migration of oil, drilling for oil and the methods of refining it. and the uses of petroleum products. In the second chapter the deposits of the British Empire are described, especially those of India, Egypt, Ontario, and Trinidad. The third and last chapter deals with the petroleum of foreign countries, more particularly Poland Roumania, Russia (Ural-Caspian region), Georgia (the Caucasus) Dutch East Indies, Japan, Persia, Mexico, the United States Argentina (Comodora Rivadavia) and Peru. Statistical tables give imports, exports, and production, and the chapter concludes with a map showing the principal petroleum deposits of the world and a list of the chief publications on petroleum.

## ALEXANDRIA EXCHANGE.

*Supplied by G. L. Mortera, Alexandria and Cairo.*

Prices on September 23 were as follows :—Agricultural Bank of Egypt, £4 19-32 ; Alexandria Water Co., Ltd., £7½ ; Anglo-American Nile Steam, £2½ ; Associated Cotton Ginners, £27-32 ; Banque d'Orient, Fr., 56½ ; Behera Ord., £E 10¾ ; Brasseries d' Egypte, Fr., 75 ; Building Lands of Egypt, £11-16 ; Cassi di Sconto Priv. Fr., 100 ; Ciments d'Egypte Priv., Fr., 55 ; Ciments d'Egypte Div., Fr., 30 ; Comptoir Fin. et Com. d'Egypte, £15-16 ; Consolidated Land, Pt., 6; Credit Foncier Fondateur, Fr. 840 A Credit Foncier Act; Fr 643 Credit Foncier, 1886 Oblig., Fr., 334½ Crown Brewery Priv., Fr., 110 ex. ; Crown Brewery Div., Fr., 130; Eaux du Caire, Capital, Fr., 81½; Eaux du Caire Jouissance, Fr. 108; Egypt and Levant, S.S. Co., Pref. £2 9-16 ; Kom Ombo Ste. An de Wadi, £5 ½-16 ; Kom Ombo Ste., Fondateur, £33 9-16 ex. ; Land Bank of Egypt, Parts de Fond, £37: Lots Turc., Fr., 35 ; Menzaleh Canal Navigation Pt., 270 Nungovich Hotels, £7-3-32 ; Ramleh Railways, £3 3-16 ; Sal and Soda, Pt., 35s. 3d. ; Tram d'Alexandrié Priv., Fr.,48 ; Tram d'Alexandrié Div., Fr., 60 ; Union Fonciere d'Egypte £3,1-16 ; Egypt Hotels, £2 7-32 ; Urbaines et Rurales, £2 7-8.

## THE GREEK DEBT SERVICE.

The Council of Foreign Bondholders issues the following information, compiled from figures published by the International Financial Commission at Athens, with regard to the revenues assigned under the Law of Control for the service of the Greek Debt from January 1 to July 31, 1921 (new style January 14 to August 13, 1921).

| | Monopolies, tobacco stamps, stamped paper, Naxos emery. | Piraeus Customs. |
|---|---|---|
| | Drachmai. | Drachmai. |
| Gross receipts. July, 1921.... | 5,893,253.67 | 6,074,712.35 |
| Do. do. do. 1920 .... | 5,222,312.71 | 4,102,654.65 |
| Estimated receipts for 7 months (Law of Control) ..... | 16,858,333.33 | 6,241,666.67 |
| Actual receipts for 7 months, 1921 ..... | 39,498,349.04 | 31,768,977.15 |
| Actual receipts for 7 months, 1920 ..... | 36,232,582.00 | 34,074,508.70 |
| Difference between estimated and actual receipts for 7 months 1921 | x22640,015.71 | x25,527,310.48 |
| 1920 | x19374,248.67 | x27,832,842.03 |

NOTE.—Of the surplus over the estimated receipts from monopolies, tobacco, stamps, stamped paper, and Naxos emery, 49,1-5 per cent' is applied towards increasing the minimum rates of interest and sinking fund on the External Gold Loans of 1881 to 1893.

The products of the sales of Naxos emery have been paid in paper drachmai since August, 1920. In the case of the Piraeus Customs, the receipts in gold are included in the above statement at par.

# COTTON & COTTON GOODS.

## MANCHESTER REPORT.

(*From Our Own Correspondent.*)

*Manchester, Saturday.*

In connnection with this market the most notable event during the past week has been the opening by the King of the reconstructed and enlarged Manchester Royal Exchange. Great interest was taken in the ceremony, and Lancashire traders are justly proud of their new market place. There is no doubt that the increased accommodation will be very welcome, as for several years business has been carried on under severe difficulties owing to the congested state of the boards. The market as a whole during the week has presented a more cheerful appearance. The easier tendency displayed in raw cotton circles towards the close has somewhat checked enterprise, but on the whole the undercurrent of demand remains healthy. With regard to the outlets of the Near East there has been less activity, in cloth and to some extent the falling off in the turnover may be accounted for by the Jewish holidays at the beginning of the week. Buying in Egyptian yarns has been very patchy. Here and there, however, fair contracts have been arranged, and on the whole Bolton firms are more favourably situated than a little time ago. The cloth enquiry for India has tended to broaden, but there is no doubt that the Ghandi agitation to boycott Lancashire goods is seriously harassing developments. More favourable bids have been received, and some fair lines have been booked in light fabrics for Madras and Karachi. Grey shirtings and mulls have been in better request for Calcutta. There has been a better inquiry about for Chinas, and quite an encouraging turnover has taken place in grey and white shirtings, sheetings and fancies, orders being reported for Shanghai and Hong Kong. It remains to be seen, however, whether the revival of demand will be maintained. South American advices have read more cheerfully, and some minor transactions in a variety of fabrics have been registered. Many merchant houses are not in a position at the moment to adopt a policy of enterprise, but it is quite evident dealers abroad are more disposed to replenish supplies if satisfactory terms can be arranged.

## LIVERPOOL REPORT.

Messrs. Reynolds and Gibson report as follows for the week ended October 6 :—

The past week began in a very satisfactory manner, a good demand for Egyptian cotton being again in evidence. The outlook all round seemed brighter, and spinners appeared to be gaining in confidence. Report from Manchester were consistently good, and denoted a distinct broadening of trade. Then came the American condition estimate of 42 per cent., and this gave speculators and others furiously to think. Although at first all markets showed considerable resistance to the selling pressure which naturally accrued, the germ of a big reaction had been sown, and during the last two days of the week a big drop has taken place. This reaction came at a most unfortunate time, and it has had the effect for the moment of somewhat checking spinners' buying enthusiasm. The result was immediately noticeable here in Liverpool, where a marked diminution in the daily sales occurred.

We are of the opinion, however, that this set-back is only of a temporary nature, and that the "shake-out" of the last few days in the futures market will merely induce towards a healthier state of things, and that confidence amongst our spinner friends will soon be restored. Already, in fact, signs are not wanting that this has commenced. Crop reports from Egypt indicate that considerable damage has been sustained, and Alexandria is apparently finding no difficulty in marketing the balance of her old crop, between the Continent and America—not to speak of Lancashire. A telegram from Alexandria received to-day, from a trustworthy source, reads as follows :—'Large demand for Uppers. Fear probable scarcity." There is only a poor selection of Uppers in Liverpool at the present time.

The spot demand here during the week has been mainly for Sakellaridis Fully Good Fair and upwards, but Tokar and Sudan cottons have again received a considerable amount of attention. The bulk of this latter business, we believe, has been done for shipment to America. Brown, Uppers and White cottons have been comparatively neglected. Total sales 4,200 bales (includes 1,550 Sudan). Quotations have fluctuated considerably, but on balance Sakellaridis is unchanged, with the exception of Extra Fine, which is ¼d. dearer. Brown and Uppers are ¾d. lower on the week. Fully Good Fair Sakellaridis 28.25d.

## AGRICULTURAL BANK OF EGYPT.

The following was the position of the bank's encashments on August 31 ( the figures in brackets representing the corresponding totals for 1920 ) :—Existing Loans : Short term Loans, £E59,940 ( £E13,424 ) ; Special loans with the direct guarantee of the Egyptian Government £E40 832 ; Category "B" £E3,527,894 ( £E3,469,904 ) Total, £E3,628,666 ( £E3,483,328 ) ; Matured Loan instalments : Due, £E25,557 ( £E24,976 ), falling due £E604,186 (547,519)total, £E629,743 ( £E572,519 ). Perceptions : Outstanding on January 31 £E172,700 ( £E83724 ), Balance, £E136.648 ( £E ( £E50,949 ), Encashed £E36,112 (£E32,775 ) ; Matured Loan instalments: Encashed £E14,324 ( £E15,912 ) ; Total encashments of instalments due £E 50,436 ( £E48,687 ).

## EXPERIMENTAL COTTON STATION FOR SYRIA.

H.M. Consul General at Beyrout states that according to a recent issue of *Reveil* the French High Commissioner has decided to establish an experimental station for cotton culture in the Akkar plain, E.N.E. of Tripoli, on crown land placed at his disposal by the Governor of the Greater Lebanon. This station will deal especially with questions concerning cotton cultivation, but it will also concern itself with matters affecting agriculture in general and cattle breeding. The construction of the necessary buildings and the installation of the station will be begun at once, and it is hoped that it will eventually become an important factor in the agricultural life of Syria.

The Consul adds that the idea is on the right lines, and it is to be hoped that it will be duly carried out. Syria is pre-eminently an agricultural country, and it is important that its agriculture should be developed in every way possible in order to stimulate exports and to reduce the at present highly unfavourable balance of trade. Cotton growing has undoubtedly possibilities, and although the prospects of Syria were affected severely by the war there seems no reason when conditions become normal, why the favourable predictions made before the war should not be fulfilled.

Reuter's Bucharest Correspondent in a message dated October 4 states that a party of British, French, and Belgian financiers has arrived at Ploesti for the inauguration of an oil refinery. At a banquet Colonel Frank Hilder, M.P., and Major R. W. Barnett, M.P., emphasised the importance for the Allies of co-operation with Roumania.

## NOTES OF THE WEEK.

### *The Spirit of Nationalism.*

In denouncing the spirit of nationalism as the main source of all the sufferings and mischiefs which the peoples of Europe are now enduring Lord Hugh Cecil has sacrificed logic for an epigram. He was so far conscious of the weakness of this thesis as to admit that there was much truth in the contention that it is rather hatred of other nations than the love of one's own that is now ruining Europe, and he could not deny that nationalism under due discipline is a beneficent force. If he had probed deeper into his subject, he might have found that it was more accurate to say that at the root of the evil was violence to the spirit of nationalism, aided by the political instability of Governments as a result of the stress of war. As far as South-Eastern Europe is concerned, it is noticeable that surprisingly little rancour between the different peoples remains after the war, although it may suit Governments and sections of the Press to misrepresent the situation. The peoples are weary of strife and want to settle down to the work of reconstruction, but the politicians are inclined to harp on the nationalist string for their own ends, to cover up injustice in the peace settlement for which they may be responsible, or for the imagined effect abroad. If the violence done by the Allies to the principle of nationality could be remedied, there would be a better chance of peace in the Near East. But the move must come from outside, for no Near Eastern Government feels itself strong enough to prospose any concession in the interest of good relations with its neighbours, for fear that it may give a handle to its political opponents.

### *Greece and the Entente.*

The Greek Prime Minister, having received a vote of confidence from the Chamber, has left Athens with M. Baltazzi, Minister for Foreign Affairs, on a visit to the Entente capitals in order to lay the Greeek case once more before the French and British Governments. It is well that a personal exchange of views should take place, as the situation is too delicate to be dealt with by formal despatches. M. Gounaris has shown by his speeches that both Govermnent and people are still living in pre-war days. They recall, naturally enough, their five centuries of oppression under Turkish rule, and think of themselves as still striving "for their liberation." But liberation and conquest are not synonymous. The territory now occupied by the Greek army has a population of about three million, the Prime Minister declared in the Chamber, instead of the one million in the zone accorded to Greece by the Treaty of Sèvres. But even the one million were far from being all Greeks; a very much smaller proportion of the additional two million will be. All this territory, therefore, must be evacuated. The post-war spirit requires that a fresh start should be made; that Asia Minor, which is predominantly Turkish, should remain under Turkish jurisdiction, in order that even Turks should be given a chance to respond to the new order of things. If they fail under these favourable conditions, it will then be time to consider the problem of coercing them into better ways.

### *The Problem of Smyrna.*

Smyrna, in view of its anomalous position, calls for separate treatment, of a nature that will do justice to the capital and enterprise that have built it up. It must not be cut off from its source of supplies, which is the whole of Asia Minor, by a customs tariff, nor must it alienate the Turkish labour on which it depends, by imposing on it a wholly alien jurisdiction. An automonous régime is the obvious solution. But Greece is entitled to assurances that she shall never suffer again from the Turkey of the past, which is the only Turkey she knows. These assurances must be given her by the Allies, and at the first symptom of the old Adam reappearing in Asia Minor, there must be swift and effective action on the part of all the Allied Powers. The policy of sending a boy on a man's errand has done harm to Greece, has achieved no solution, and has thrown the whole East into a ferment. It cannot be continued any longer, and the very first to gain from a change of policy will be Greece herself. We can only hope in her own interests that the whole nation will realize that acquiescence in the Allies' decision—the only decision possible—is no reflexion on the administration of M. Gounaris and his colleagues.

### *A Welcome Change in Cyprus.*

Reports from Cyprus indicate that the growing number of islanders are becoming weary of the agitators who are continually talking as if union with Greece were the one thing needed to convert Cyprus into an earthly Paradise. Into the merits or demerits of the 'union' question we do not intend to enter at the present time: the British Government has announced its decision, and Cypriots who really wish their island well will surely

Digitized by Google

be wise to recognise the fact, and make the best of the situation as it is. Fortunately, as our Cyprus Correspondent's letter published this week shows, that opinion seems to be gaining ground in the island; and it is beginning to be recognised that those members of the Legislative Council who have held aloof from its meetings in order to mark their disapproval of present conditions, are thereby doing Cyprus a real dis-service. The island is admittedly backward in many respects, and if it is to go ahead and attain the position to which its natural advantages entitle it, it will require the ungrudging service of all its inhabitants. In any case it is hard to see what good the absentee members of the Council hope to achieve by their conduct. Certainly they will not force the hand of the British Government by such a childish display. On the other hand, if they use their influence and abilities in practical fashion for the betterment of the island, they will show themselves good friends of their fellow-islanders. In the meantime it is satisfactory to note the change of public opinion to a more healthy direction.

### *The Egyptian Delegation.*

The negotiations between Lord Curzon and the Egyptian Delegation were resumed last week, and conversations have since been actively carried on. It is even possible—though not very probable—that by the time these lines appear in print the Delegation will have had its promised interview with the Prime Minister, and it is generally hoped that an end of the discussions is almost within sight. At the same time, it is generally recognized here that it would be the height of folly to attempt to hasten that end at the risk of reaching merely a partly satisfactory agreement, when a delay might bring about one entirely satisfactory; and that section of the public which follows the negotiations at all, is content to 'wait and see' how they shape. In Egypt there is—naturally, no doubt—a good deal less patience and a great deal more anxiety, and some of the native newspapers appear to be inclined to draw very sweeping inferences from very insignificant premises. Adly Pasha has sent a message to the Egyptian nation, appealing for unity in working for the general interest; and has received a telegram from eight hundred notables expressing their support of the Delegation.

### *The Situation in Egypt.*

The situation in Egypt itself is improving, inasmuch as the unreasoning enthusiasm for Zaghloul Pasha shows signs of diminishing, at least in Upper Egypt. It became necessary for Zaghloul to abandon the idea of taking his guests, the Labour Members of the British Parliament, to Assiout and other centres; and not only had the British visitors to deny themselves the pleasure of meeting the citizens of Assiout, but Zaghloul himself, on arriving there met with such a mixed reception that he gave up the idea of landing. Assiout, in fact, seems solid for Adly Pasha and the Official Delegation, and Egypt south of Cairo is apparently inclining towards the same opinion. Zaghloul Pasha has abandoned a part of his programme of visits; and it would probably be his wisest course to give up the tour altogether. It would be interesting to know what Mr. Lunn and his companions think of this latest development. But that wish is not likely to be gratified. The Labour Members before their departure from Egypt said just what was expected of them, and they will probably repeat it —at greater length—on the first opportunity after their arrival at home. But they will surely find it impossible to maintain now that Zaghloul represents all Egypt.

### *Two Strong Men of Persia*

News from Persia continues to be somewhat scrappy and unsatisfactory. According to an Allahabad report, the Sardar Sipah, having disposed of Mohammed Taghi Khan, is now bent on tackling Kuchik Khan. This is rightly described as a more difficult task; and though a Cossack force was last week reported to be advancing against the redoubtable Jangali leader, that does not necessarily imply that he has reached the end of his tether. If the Sardar Sipah is the one strong man of the Government, as we suspect, Kuchik Khan has been described by Western observers as one of the strongest and 'straightest' men in Persia; and Sir Percy Sykes in his 'History of Persia,' gives a favourable account of his character, if not of his policy. He has certainly shown himself a skilful leader, with a power of impressing himself upon his followers, and it looks as if the struggle between him and the Minister for War may be a stiff one. How soon we may expect to receive any trustworthy report of it, we cannot guess

### *The Latest Cabinet.*

In view of his past actions, it is not easy to understand, precisely what Kuchik Khan's designs are. It is possible, of course, that he is playing for his own hand pure and simple; but we are not inclined to accept that view. Has he definitely abandoned his Bolshevist Allies? If not, since they are, nominally, on good terms with the Teheran Government, how does it come about that he is making trouble for that Government? It almost looks as if he may see farther than the Sardar Sipah. But until more light is shed on the problem it seems hopeless to try to straighten out the tangle, and we can only wait on events. Meanwhile we learn from an official message received in London last week that the latest Persian Cabinet is almost identical with its predecessor. With so many changes, at such short intervals, it is a little difficult to keep track of these things; but unless our memory misleads us, the only new Ministers are those of Education (Amir Aalam) and of Public Works (Naib es-Sultanah); and while Persia is in its present condition neither is likely to find his position a very serious one.

### *Fashions and Politics.*

October is one of the several months which have been designated successively by Mr. Gandhi for the disappearance of British rule from India, but the most recent news discloses no signs of such a re-adjustment, and lately the cables have been more concerned with sartorial eccentricities than with matters of such grave import. People in this country are not excited by the progressive denudation of Mr. Gandhi's person, and, so far as they notice the subject at all, are inclined to think that the saint would be better employed in shedding the scales from his eyes than the coat from his back; but a clear distinction must be drawn between the example set by him and the precept enunciated simultaneously by another active politician, that people who cannot buy clothes should cover their nakedness with leaves. One is inevitably reminded of the experience of an earlier philanthropist, who pointed out that people too poor to buy food could eat grass; the persistence of British rule will presumably prevent a recurrence of the fate of that gentleman, who, it will be remembered, was hung from a lantern with his mouth stuffed with grass; but for

Digitized by Google

sheer, callous inhumanity it is not easy to choose between the two.

### *The Afghan Negotiations.*

Secret diplomacy may be going out of fashion in the West, but it is still very much the rule in the interior of Asia, and little definite news has been allowed to reach the public, whether in this country or in India, regarding the important negotiations which have been for so many months in progress in Kabul. Some observers, however, are inclined to draw favourable inferences from the recent statement that the return of the British Mission is being delayed by the number of questions which crop up at the last moment, for this statement is taken to imply that something like common ground must have been reached on matters of principle, and seeing that a complete breakdown over the fundamentals has been frequently prophesied, and more than once asserted as an actual fact, any indication that the negotiations are concerned with details may fairly be regarded as encouraging. The future may have an unpleasant surprise in store, but at the moment it seems permissible to hope that we are within reach of a reasonable adjustment of the most anxious question in the foreign policy of India.

### *Mount Everest.*

Perhaps when the time comes for the story to be told, it may be found that the experience of the Kabul Mission has borne some analogy to that of Colonel Bury's expedition round the back of Mount Everest. In the latter case there is happily nothing to prevent prompt publicity, and the world has been allowed to read the tale of disappointment following disappointment, until almost at the last moment the clouds have broken, and a practicable route has been discovered. The great mountain has not yet been conquered, nor indeed was a conquest expected this year, but the pioneers have reached a height of 23,000 feet, and are satisfied that the last vertical mile or so is practicable, so that, if all goes well, some of them should have been on the summit by this time next year. A pleasant feature of the expedition's reports has been the testimony to the cordial assistance given by the local officials and the population generally, but we confess we should like to know what the ordinary Tibetan really thinks of the whole business.

### *The Indian Legislature.*

As we commented recently on certain lapses on the part of the Indian legislature, it is only fair to say that the fuller accounts of the proceedings brought by the mail indicate that, these lapses apart, the high standard reached in the opening session has been maintained, or even raised. The Council of State in particular is developing business-like habits, and getting through its work with despatch. The Assembly, the larger body, still finds a difficulty in regulating the flow of eloquence, and on one recent occasion has managed to block a motion which it was particularly anxious to discuss, but such matters may be expected to right themselves as time goes on. As regards the tone of the debates, the Assembly scored a veritable triumph in discussing the thorny question of racial distinctions in the law-courts. The special privileges, if they are privileges, of Europeans and Americans accused of crime have been the subject of rhetorical fireworks for forty years or so, but on this occasion they were discussed with a degree of moderation and good sense which does the utmost credit to both sides. In the end a committee was appointed to consider methods, but Europeans and Americans of criminal proclivities may take it that their "privileges in India" are dead.

## THE WEEK AT HOME.

*London, Monday Afternoon.*

**Parliament Re-Opens.**

Parliament re-opens to-morrow, but with a programme rather different from what was anticipated. When the official mind, last summer, was arguing against "an autumn session" but admitted that there would have to be "sittings in the autumn,"—a distinction without a difference to the non-officialised intellect—the idea was that by October the Irish negotiations would be over, and that the House of Commons could then discuss the upshot of the negotiations between Mr. Lloyd George and Mr. de Valera. But Mr. de Valera, like the moon last night, is in temporary eclipse, and his lieutenants have hardly got beyond the preliminaries of conversation at Downing Street. On the other hand, the unemployment question has come more to the fore; and the Commons therefore will hear less of Ireland and more of industry than was expected.

**Government and Unemployment.**

It is understood that on Wednesday the Prime Minister is to make a statement on the unemployment position and such means as have been agreed upon to remedy it. A good deal has been written in the Press lately as to the wonderful recommendations of the Government's experts, and some of the Coalition papers have been so enthusiastic as to the stupendous plans conceived in the mighty brains of these advisers that they unwillingly convey the impression that unemployment is almost a blessing in disguise, since it enables us to see by what great intellects we are governed. Unluckily it is not so easy to make this particular desert blossom like the rose and there has been a significant silence as to the details of remedial measures, which is mainly due to the impossibility of constructing a satisfactory scheme. It is easy enough to manufacture goods, and so give everybody temporary employment; the difficulty is to sell them. For the past two years the Government has been disposing of war surplus stores; it would seem to be absurd to set about the accumulation of another surplus, which would simply embarrass the markets worse than ever.

The foreign exchanges are the root of the whole problem, and those can only be stabilised by a general cancellation of war debts. That has been realised in this country for some time, but it is not yet understood in the United States, where the unemployment position is worse than it is here, although they hold most of the liquid wealth of Europe in their banks.

As is well known, we are only too anxious to cancel the Allied debts to us, which are practically equal to our debt to America; during the latter part of the war, we were merely the guarantor to Washington of France, Italy, and Belgium. A cancellation of that kind would do more to revive international trade all round than any amount of State-supported industry; it would be a natural, not an artificial restoration of health. There is some hope that Washington may yet see this point but there is a good deal of popular objection in America to "letting England off"—although we were only the channel through which the war loans passed, not the actual recipients.

**The Washington Conference.**

It is hoped in many quarters that the preliminary steps towards the discussion of this whole matter of Allied (and ex-enemy) finance may be discussed at Washington unofficially next month. The Conference called by the American Government is specially summoned to discuss peace in the Pacific and disarmament. It would be unfair to say that people here do not expect

Digitized by Google

any results from such a programme ; but our hopes are not so buoyant as those of the Americans. The fact is that we have seen so many conferences of a more or less cognate character already, and we recognise that they are more inclined to conceal radical divergences under a formula of good words and pious resolutions than to remove real difficulties.

The American conference begins with this advantage over its predecessors, that everybody, in Western Europe at least, is tired of war, and is therefore ready to discuss disarmament, but this is merely a psychological condition due to fatigue. And it must frankly be recognised that the chief parties to the conference, America and Japan, have not the same reason to be tired of war as Britain and France, while the introduction of the Chinese problem is not unlikely to ruffle tempers on both sides of the Pacific.

It is hoped, however, that good may result from the conference, and also that unofficially the question of finance, which is international, may be conveniently discussed between the Governments at Washington. It is now increasingly probable that Mr. Lloyd George will soon cross the Atlantic, if the Irish negotiations run smoothly—and so far there has been no *contretemps* at Downing Street—and it is known that President Harding has expressed a strong desire that he should attend. The opportunity is one not to be missed, for American observers are of opinion that the Republican Government will hold power for eight years in America, and that President Harding, although intellectually less dominating than his predecessor, is more of a practical statesman than President Wilson. As the Coalition Government is likely to hold office here for some years, a cordial understanding between London and Washington would not be likely to be upset by electoral accidents on either side of the Atlantic.

**The Church Congress.**

The Birmingham meeting of the Church has been a great popular success, and a boon to the newspapers, whom it has provided with much good "copy" It has practically ignored theology, and concentrated on social questions, and more particularly on sex and matrimony, the sins of society, the ethics of betting, and women's clothes—or the absence of them. All these topics are of perennial interest to the clergy, and it was with a sense of awe that the assembled curates heard a Dean confess that he had once lost half-a-crown on a horse.

A great medical man told the Church that it was all wrong on the question of sex, and there was some debate as to the admission of women to holy orders. One of the speakers drew a dreadful picture of the consequences of female ordination, by pointing out that if it were once admitted, we might have a female Archbishop of York, who might decide to marry the Archbishop of Canterbury. The imagination boggles at the idea of such a union. But perhaps the female parsons would decide to remain celibates as a matter of policy.

**A New Coalition.**

There has been some talk in political circles of a new coalition, between Lord Grey and the 'Wee Frees' on the one side, and Lord Robert Cecil and the Young Tories on the other. But oil and vinegar, although excellent in combination, do not by themselves make a salad, and the lettuce is still to seek in this dish. Apparently that was felt by the leaders concerned, for after a push by Lord Grey and a letter defining his position from Lord Robert Cecil, the upshot is that the two bodies agree to co-operate in opposition, but not in Government. In other words they will coalesce in destruction, but not in construction—a singularly futile form of politics. Sheet lightning of this kind will not disturb Downing Street for an instant, and the political atmosphere remains calm.

**The New County Hall.**

The new London County Hall, the official home of the L.C.C. is now nearing completion. Begun before the war, and stopped in the early part of the war, it will rank as the most splendid building erected in the metropolis since the Houses of Parliament were built. Standing on the south side of Westminster Bridge, its massive architecture even now challenges that of Parliament. It has already used 3,000 tons of steelwork ; 19,000 square yards of oak flooring, and over 3,000 steel casements. There will be more than 300 telephones, 800 radiators, and 3 passenger lifts. Some of the offices are already occupied, but the whole building will not be actually finished until the new year. But it is no longer possible to reproach the greatest municipal Corporation in the world with being more meanly housed than a second-rate provincial city.

**The Week's Books.**

Sir Ian Hamilton is a little alarming in his new book, "The Soul and Body of an Army" (Arnold). He remarks that we do not yet know what war is, and "the half-knowledge gained from experience during the war may tend to become more dangerous than the pre-war no-knowledge which still holds good as regards the Navy." In the next war "we want smaller, more compact, more mobile, more highly machined formations each sufficient unto itself, capable of bringing the last word of science and skill to bear upon areas containing less skilled, less powerfully armed peoples. "We must have one Defence Minister, who will dominate and co-ordinate sea, air, and land, and all that therein fight." He does not believe in trench warfare. "Outwardly the battle of the future will resemble battles which took place before the birth of Christ rather than those fields of sinister desolation and solitude where we have suffered. The area of the conflict, the use of tanks and motors as the pivot of the forces where formerly elephants and war chariots manoeuvred, will have more affinity to 500 B.C. than to A.D. 1917." I omit the more rhetorical passages.

"Sir Edward Cook, a Biography," by J. Saxon Mills, (Constable) is not only an interesting study of a great journalist, but is full of good stories, of which one will suffice. When Cook was editor of the *Daily News*, that paper was bought by Mr. Lloyd George, acting for the syndicate R. Lehmann, Cadbury, Leon, and others. In Cook's diary is the following : "Dined with Hudson at the Continental. He was very nice. Said he had people on hand who would readily have bought the *Daily News* for the other side and at a much better price. Said he was surprised at their getting money from Cadbury. He (Hudson) had always failed. Cadbury used to say 'Liberalism is too high and sacred a thing for money. But I will pray with you. Probably Mr. Lloyd George had prayed."

By way of contrast, I may mention "Essays and Addresses on the Philosophy of Religion" (J. M. Dent), by that eminent authority, Baron F. von Hugel. "Everything beautiful, true, and good, of whatever degree or kind, is indeed included within Christian theism ; a certainty as rock-firm as it is rich and elastic, a certainty groped after and confirmed by all that is virile, pure, humble, truthful, tender, self-immolating, and deeply joyous in the depths of man's longings and attempts."

Another of the ever-popular series of personal sketches, which Mr. E. T. Raymond made the fashion, has come out in "Pillars of the State" (Nisbet) by Mr. H. Sidebotham, of the *Manchester Guardian* and *The Times*. The style may be judged from the verdict on Mr. Lloyd George : "At once an explosive of party union and a builder of flying bridges between incompatibles. In fact, he is a born Coalitionist. An incomparable actor, a spell-binder, a perfect conductor of electrical discharge, a crowd-compeller, and master of mass-psychology, but not a builder of stately argument nor a sculptor in words of ideals of such mental and moral beauty that all who hear must forsake everything else and follow him."

To these I may add "Rudyard Ripling's Verse ; Inclusive Edition 1885-1918" (Hodder and Stoughton). This is one of the books it is not necessary to review.

OCELLUS.

# THE NEAR AND MIDDLE EAST.

*(From Our Own Correspondents).*

## EGYPT.

*Cairo, October 4.*

**The Visiting M.P.'s.**

Politically, there is comparatively little to chronicle this week, but what there is has caused, locally at least, some sensation. During the past few days the visiting Members of Parliament have been shepherded about the country at express speed by Zaghloul Pasha and his lieutenants. At the latter end of last week the party went to Port Said, returned to Cairo for a banquet at Shepheard's Hotel, left early the next morning for Mansourah, called at Tanta on the return journey, and arrived in Cairo on Saturday. They are now making preparations to visit Upper Egypt, and they will make a few other hurried trips before embarking for England on October 7. As most of the reports of the trips have been highly coloured, it is impossible to gauge from the newspaper accounts exactly what happened at the various towns visited, but I have learned from unimpeachable sources that the peregrinations were not such grand triumphal tours as Zaghloul expected them to be. Just why Zaghloul chose to take the visitors to Port Said is not apparent, as the town is not typical of Egypt; but, as was expected, Port Said did not rise to a man to welcome the visitors. The inhabitants did betray a certain amount of interest in the presence of the notables, but they signally refrained from any explicit declaration that they loved Zaghloul Pasha and would not be content with anyone else to secure for them their political independence.

**A Bad Blunder.**

Of most significance to the British community, however, was the strange action of Zaghloul Pasha in deliberately excluding the representatives of the British Press, local and Home—with the exception of *The Times* and Reuter's Agency—from the banquet given to the Parliamentary visitors on Thursday evening. A representative of the *Egyptian Gazette* was actually given verbal invitations to attend by two of Zaghloul's lieutenants; but when he entered the hall at the conclusion of the dinner to report the speeches, he was given a polite hint to leave. In thus turning away from the voices of his guests the British community in Egypt, Zaghloul committed a tactical error which has reacted upon his "British Delegation." The British community has been awakened to betray a sudden and vivid interest in the position of the visitors, and some pointed questions are being asked in the Press regarding the source of money for the visitors' expenses and how much is being thus expended. By that gratuitous slap in the face Zaghloul has alienated whatever sympathy may hitherto have been accorded to his misguided visitors by the local British community.

Throughout their visit Zaghloul appears to have followed an utterly mistaken policy. If he had had any real desire for his guests to obtain independent knowledge of the true state of affairs in this country, he would have refrained from having them ceaselessly guarded; he would have allowed them to see whomsoever they pleased, instead of only the persons it pleased him to have them see; he would have allowed them to visit where they liked, instead of selecting their itinerary and arranging in advance for artificial demonstrations. Instead of an independent mission of inquiry, the visitors have become agents of Zaghloul, and whether they embody their impressions and opinions in a report, or whether they ventilate them in Parliament, they cannot fail to injure their host. If their opinions imply that Zaghloul is the elect of the Egyptians, it will cause such ridicule that the reaction must weaken Zaghloul and strengthen Adly; if, on the other hand, they prove so ungrateful as to imply that Zaghloul commands merely a section of the Egyptian people, it will be a disastrous blow at the prestige of the Pasha. That they will declare that the Egyptians deserve and are fit for independence is a foregone conclusion, since they have reiterated that opinion here; but they will have an arduous task to prove their assertion, since they have neither knowledge of the whole situation nor the essential familiarity with the questions of foreign politics involved.

**An Election!**

A few days ago an election was held in one of the provinces, and the scenes on that occasion are rather ominous in view of the possible advent of a general election in the country. The Omda of the district had been dismissed, and his rival, who—as always in such circumstances in the Orient—was his personal enemy, was appointed as his successor. The original Omda, feeling that he had been the victim of injustice, lodged a complaint; and the Ministry of Interior, being unable to dismiss his complaint, decreed that an election should test the issue. Into the district, where there are only 800 voters, 150 police were sent—about one policeman to every five voters. The voting began at 8 a.m. and finished about 6 p.m. As the majority of the electors were illiterate, the system adopted was that the voter went into the booth, gave his name, and upon his right to vote being established, he declared that he voted for one or other of the candidates. At 8 o'clock in the morning votes were saleable at 5 piastres (1s.) each; at 5.30 p.m. they were fetching as high as L.E.10 per man. Assuredly the party with the longest purse will win the next election.

**The Coming Season.**

During and since the war, Egypt has had winter seasons of sorts. But for at least six weeks during the coming season—from the first week in February until the third week in March—no less than five big 'cruises' are due to arrive at intervals of seven to eight days. At a very conservative estimate, 5,000 tourists will pass through Egypt during these six weeks. Messrs. Thos. Cook and Son originally had arranged one big cruise de luxe in the Caronia, but the demand for accommodation has been so heavy that it has been necessary to arrange another. The American Express Company, Clark's, and Messrs. Raymond and Whitcomb have arranged one each. People who desire to visit this fascinating country, but who have not booked accommodation to date, would be well advised to do so in the near future. Accommodation is available for booking from now until the first week in February, 1922, but inquiries are coming in by each mail, and it is apparent that during the winter months a steady stream of visitors will be flowing through from Alexandria to Cairo and the Pyramids, Luxor, Thebes, Karnak, and the other places of renown in this wonderful Valley of the Nile. All the tourist companies are making thoughtful arrangements to ensure that the visitor shall be comfortable and interested and those fortunate enough to be able to make the trip will never regret it.

*Cairo, October 7.*

**The M.P.s' Departure.**

To-day the Liberal-Labour Mission embark at Alexandria for England, after a hurried rush from Alexandria to Cairo, from Cairo to Port Said and back, and from the capital to Mansourah for a two-days' stay. They have been in the country for 24 days. Let Mr. Swan tell the story, as he told it to an interviewer on Wednesday evening, at a function offered by Cairo Zaghloulites under the name of 'Cairo's Professional Men': "We have come to Egypt as guests, to see and hear for ourselves concerning the state of affairs in Egypt. We had been told stories of oppression here under martial law. We have seen; we have heard. We are convinced that the overwhelming majority of Egyptians feverishly desire emancipation; we are also convinced that the vast majority of Egyptians regard Saad Pasha Zaghloul as their national leader. We are convinced that the present system of Government of Egypt is unsatisfactory; and in our report, which is to be published at the proper time and place, we intend to suggest a practicable solution, which we believe will be acceptable to every fair-minded man and woman." "Do you think it will be acceptable to the Egyptians?" pressed the interviewer. "I think it will be acceptable to all fair-minded people!"

**British Community's View.**

So much for the visitors' viewpoint. Last Monday about 30 members of the British community in Cairo met the Parliamentarians and delivered the following opinions:—(1) As about 80 per cent. of the Egyptians are wholly ignorant of the Egyptian question, it cannot be said that the bulk of the Egyptians intelligently desire complete independence; (2) Saad Pasha Zaghloul, in the opinion of those present, did lead a large majority of the Egyptians, but as his supporters consisted chiefly of the aforesaid ignorant mass, he led them instead of following a policy devised or desired by them; and (3) those present were inclined to agree to the acceptance, in principle, of the Egyptians' claim to independence, but were of the opinion that the Egyptians should not be left to govern themselves until they were fit to do so, and that this time had not yet arrived. Therefore, the best interests of Egypt would be served by withholding autonomy until such time as the inherent responsibilities could be safely shouldered by the Egyptian people as a whole. This must not be construed as a direct and representative expression of the feelings of the British community, as those who met the Parliamentarians did so entirely informally and unofficially. Nevertheless, there is not apparently much variance between the opinions expressed and those of the British community.

Zaghloul's attitude is not quite so easy to define, because he has not stated his views with the same clarity as the people just mentioned. But from the evidence available it seems that he is not altogether satisfied with the results of the tour of the visitors and himself. There have been too many signs of resentment among the Egyptians at what they consider the unwarranted intrusion of Members of the British Parliament into their internal affairs, and though Zaghloul has not actually disclaimed further connexion with them, his excuse for putting off further tours—the sudden and slight illness of his wife's sister—is so transparently weak that one at once looks for a further reason. It is highly significant that the decision to abandon the visit to Assiout synchronised with the publication by the native Press of the monster protest against the visit, signed by practically all the leading notables of the province. The reason thus became apparent. Zaghloul and his advisers had no wish to jeopardise the favourable impression presumably created in the minds of his guests—particularly at Mansourah—by courting a counter-demonstration at Assiout.

**The Result?**

It is difficult also to describe the result of the visit, for the simple reason that, beyond a certain negative one—the revivalist tour on behalf of Zaghloul has not been such a huge success as was anticipated—there has been no tangible result. There were two possible results which would have been of interest: first, that the Members should have found unquestionable instances of the alleged coercion on the part of the authorities to force the public to declare its confidence in the Cabinet; second, that the visit might have applied the match to the dry powder about the country by facilitating a clash between the respective bodies of supporters of the Cabinet and Zaghloul. If the Members have found the authorities to be the deep-dyed villians of the piece, as represented to them in London, they have maintained a singular silence about their discovery. It now seems as if their only duty is to go back and write their report; and, as already pointed out, if it describes Zaghloul as the real national leader, the consequent ridicule of their mentality will react in favour of Adly, while if they honestly declare that Zaghloul merely leads a section of the natives—and the ignorant section at that—Zaghloul will stand disgraced before all who have heard his egotistical claims to be the elect of the whole. It does seem as if Zaghloul has spent money to help Adly. Perhaps that is also why he is anxious for the visitors to return.

## SUDAN.

*Khartoum, September 29.*

**The Political Situation.**

It is of interest to note that in spite of the efforts of the Nationalist party to enlist the sympathies of their Sudan brethren in obtaining the freedom of Egypt, the Governor of the Red Sea Province has lately received a round robin signed by twenty seven of the leading Sheikhs and Nazirs of the Amarar, Hadendoa and Beni Amer Arabs, protesting against the distribution of seditious literature in their districts and expressing their full confidence and satisfaction in their present Government. They demand that they shall come under the direct control of the British Government, and state that they will strongly resist any attempt at governing by Egyptian officials, whom they associate with false imprisonment and the bastinado. It would be a good object lesson to the various impassioned contributors to the Egyptian Arabic publications, were they to make an extensive tour of the Sudan and view local conditions and the varied and virile characteristics of the natives of the country. There is very little doubt that they would return in a more humble frame of mind, and deeply disappointed at the lack of enthusiasm shown for their aspirations.

There has been an attempt to make capital out of the recent regrettable incident in Southern Darfur, resulting

Digitized by Google

in the death of Mr. McNeill and Captain Chown and other civilians. It should be borne in mind that it is not so very long ago that Darfur was a savage and unruly country despotically governed by a brutal and tyrannical Sultan, imbued with the idea that his subjects existed simply and solely for his good and possibly for the good of the Palace favourites. It is only natural that the present peaceful rule would be most unpalatable to a Sheikh of the old régime, who, brought up to seize upon any article or commodity that took his fancy, suddenly found that he was expected to suffer the supreme indignity of having to pay for his requirements and even to work in order to obtain a sufficiency to live on. However, his deluded followers have paid heavily for their adherence, some 600 having been killed and an unknown number wounded. This severe punishment has heen absolutely necessary to safeguard the lives of other Political Officers and Government servants stationed in outlying stations in the newly conquered province, and it should prove a deterrent of any similar outbursts in the future. There is no doubt that the rising was of a purely local nature, entirely uninfluenced by events in Egypt, and it should prove an interesting study to see what the Egyptian native papers say on the subject.

**A Shilluk Dance.**

H.R.H. the Duke of Sodermanland has recently passed through Khartoum on his return from an extended tour through the Dark Continent. On his arrival at Kalakal in August a special dance was got up in his honour, in which over 1,000 Shilluk warriors took part. This extraordinarily interesting event was duly filmed, and the thousand metres of exposures should prove a great attraction when displayed.

Mr. N. R. Udal, Assistant Director of Education, visited El Obeid on August 23, and gave a series of cinema exhibitions on the three following evenings, which were much appreciated.

Abdel Aziz Bey, the Khalifa of Berber, and Sheikh Mudassar Ibrahim have recently returned from the Pilgrimage, and received a warm welcome from their various adherents.

## YUGOSLAVIA.

*Zagreb, October 12.*

**A Combined Opposition at Last.**

M. Stoyan Protitch has paid an important visit to Zagreb, where he has been in conference with the various Croat leaders. No announcement has been made under his authority, but the *Jutarnji List*, which seems to be very well informed on this movement, states that he has completed his negotiations with the Croat bloc, who will form a combined opposition, in which even Stjepan Raditch will join. M. Protitch denies that it is his intention to split the Radical party, and he evidently hopes to win over his former colleagues to support his scheme for a revision of the Constitution, which is the main plank in his programme. Practically all Croats are profoundly dissatisfied with the Pashitch Constitution, which is too centralised, and concentrates too much power in the hands of the Cabinet. They resent the abolition of the historic office of *Ban*, and, although they are duly represented at Belgrade, they complain that they had more autonomy even under the Magyars. M. Protitch's draft constitution allows them a peculiar position, for he agrees with the Narodny Club that it is yet premature to force into one mould the provinces which have grown up in such different circumstances. There is no doubt that many thoughtful Serbs view his movement with considerable sympathy. One good effect of his action will be participation of the Croat parties in Yugoslav parliamentary life, for it will be remembered that they dissociated themselves from the passage of the Constitution. It is probably the Democratic Party which will suffer most, but the chief point for foreigners to remember is that the question of separation is not raised and has not been raised, and it is inconceivable that it should ever be raised, except by the Hapsburgite Frankovists and the frankly hostile Magyars, who, together with the Italians, have spared no effort to exaggerate in the eyes of Europe the political squabbles, and to paint as a movement for separation what the Croats themselves describe as a purely internal administrative question.

**Eugen Kvaternik's Jubilee.**

The national heroes of the Croats are Zrinsky and Frankopani, the tercentenary of whose martyrdom has recently been celebrated. The jubilee of the death of another and more real national hero has just been celebrated. Eugen Kvaternik took an active part in the troublesome days of 1848. The next twenty years were hard days for patriotic Croats, and the national movement began to develop vigorously. The most active patriot was Kvaternik, who labelled traitor to his country any Croat who would dare to negotiate with either Vienna or Budapest. But the forces of reaction were still too strong, and Kvaternik was driven to the last resort of the patriot—plots and revolution. But his attempt to become a Croatian Garibaldi failed and he paid for his idealism with his life. On October 8, 1871, he called upon his countrymen to throw off the "Shvabo-Magjarski" yoke, and raised the standard of revolt at Rakovica. But the movement was premature, the Frontier Guards crushed the rebellion in a couple of days, and Kvaternik and his devoted little band were annihilated, the leader falling beneath a shower of bullets on the 10th.

**Bolshevist Leader's Wealth.**

The leader of the Serbian Communists, of whom mention has often been made in earlier letters, has been in Moscow several months, where it appears that he has arranged to get himself appointed Chief Commissary for Yugoslavia in the event of a successful Bolshevist revolution. He has now turned up in Vienna, together with Iliya Milkitch, a member of the executive committee of the Third International. Both were arrested by the Austrian police, but were set at liberty again shortly afterwards. They had in their possession a quantity of foreign money, 17,000 dollars, 5,000 pounds sterling, 5,000 dinars and several thousand marks, evidently intended for the party funds. The dollars and pounds represent a very considerable sum in local currency at to-day's low rate of exchange.

**The Linguistic Ability of the Serbs.**

The Yugoslavs have a reputation for being good linguists, and, as a matter of fact, there are very few who do not know at least one language perfectly besides their own: the Slovenes always know either German or Italian or both; the Croats know German; the men of the coastlands know Italian as a rule, and often enough German too; in Serbia, German is widely known, especially among the commercial classes, but Roumanian is fairly extensively known in the north-east corner, where there is a large colony of Vlach *emigrés*; along the south-western frontier, almost all Serbs know Albanian, and Turkish, which is well known, too, of course in Macedonia. In the Voivodina, Serb, German, Magyar and Roumanian are commonly known; professional men must be competent to conduct their business in the first three languages. Still, it is of course force of circumstances that has compelled this extensive knowledge of languages as in the case of all "small peoples," but whether they have any talent more than any other people is a matter of opinion. A Zagreb paper claims a record for a Professor Fanjo Burian, of Bakar, who is reported to speak over fifty languages, with all their dialects, and to know the history and philology of each. This is certainly an exaggeration. Still more so, when it is claimed that he can pass for a native in each. One is tempted to ask: who is the judge? To the non-linguist, a facility for languages often appears little short of miraculous, just as does a lightning-calculator to the non-mathematical mind. And a *really* bilingual man is a much greater rarity than generally supposed. Professor Burian is compared to the famous Cardinal Mezzofanti, and exactly the same claim is made for him, down to the very number of dialects. No doubt the learned professor

Digitized by Google

is a very erudite philologist, who would probably be the last to claim fifty languages for himself, at least to any degree of perfection, and moreover, good linguists are usually poor philologists and *vice versa*. Probably he would be as unwilling to claim the Cardinal's reputed half century as the character which Napoleon is said to have given the Italian linguist "voila un homme qui a beaucoup de paroles mais très peu d'esprit."

## ROUMANIA.

*Bucharest, October* 6

### An Alternative Government.

It is no longer a secret that negotiations are now taking place between the Liberals and the Transylvanian National Party under M. Maniu, the Bessarabians under M. Inculetz, and the Bukovinians under M. Nistor for the purpose of forming a political combine strong enough to take over the reins of Government, should General Averescu's party have to resign. The Opposition expects this event even before the reopening of Parliament. Among the leaders of the new provinces there is complete understanding, their interests being identical; but to come to terms with the Liberals is not proving such an easy proposition. The Liberals, being one of the oldest and best organized political parties, have hitherto been accustomed to dictate terms, and now they find themselves compelled to negotiate on an equal footing, and will probably have even to make concessions in order to procure the support of their future collaborators. One of the hardest conditions demanded by the representatives of the new provinces is that the Liberals should confine their political influence and activities to the Old Kingdom, leaving the administration of the new provinces entirely in the hands of the respective leaders. Another condition that will be hard to agree upon is the allotting of the different portfolios, both sides claiming for themselves the most important ones, such as the Ministry of Interior, Foreign Affairs, and so on. Despite these obstacles, the chances are that this coalition will materialize, owing to the eagerness of all sections to come to power as soon as possible; which could be achieved only by collaboration in one form or another. At the same time, the Opposition is still carrying on its campaign against the Government, by means of the Press and of meetings throughout the country.

The Government, although affecting to ignore this campaign, is fully aware of its critical situation, and is trying its hardest to win over the Peasants' Party, which has not joined its former friends of the late Federation owing to its bitter antagonism towards the Liberals.

### General News.

It is reported that Queen Sophie of Greece intends to come to Bucharest, possibly at the same time as Professor Luros, who was called to attend to Princess Helen.

The Queen of Roumania, accompanied by Princess Ileana and her niece, the Grand Duchess Chira of Russia, left for Constantza last Sunday to visit Prince George (King George's third son), on board the British Cruiser, Iron Duke.

Admiral John de Robeck during his stay here was received in audience by the Queen of Roumania, and before his departure was entertained at a dinner given by the War Office at the Cercul Militar. Among the fifty guests present were: General Averescu, the Premier; General Rashcanu, Minister of War; Sir H. Dering, British Minister; Colonel Duncan, British Military Attaché, and a number of superior Officers of the Roumanian Army and Navy, besides the British Naval Officers who accompanied Sir J. de Robeck.

## BULGARIA.

*Sofia, October* 9.

### The Imprisonment of Colonel Nicoloff.

Three weeks ago I referred to the case of Colonel Nicoloff. It will be remembered that this officer of Reserve was put into prison at the end of August on the charge of having traded illicitly during the war. On October 7 the charge preferred against him was communicated to the Colonel. He is accused of having accorded too many privileges to the English prisoners of war under his care and having had English notes in his possession which he exchanged for other moneys, and also of having brought some English money back from Salonika at the time of the Armistice.

Everything thus seems to point to the correctness of his friends' views, who always held that he had been imprisoned because of his relations with the British. In fact Colonel Nicoloff's principal crime seems to lie in his having accorded fair and just treatment to the British officers who were prisoners of war in the camp which he commanded.

It has now been learnt that he has been put in solitary confinement and is not allowed to see anyone or receive any letters. This harsh treatment seems to signify that the authorities are determined to frustrate any attempt on the part of his numerous English and American friends to get into touch with him. The matter has created a great sensation here and it is making the English Colony come to the conclusion that Bulgarian Army circles are very badly disposed towards England. Diplomatic representation is, of course, not possible, owing to Colonel Nicoloff's being a Bulgarian subject; so for the moment all that can be done is to watch closely further developments, and trust that the efforts being made on behalf of the Colonel by his numerous friends and acquaintances will meet with a success.

### Dismissal of Surplus Employees.

Action has at last been taken by the Government with regard to the large surplus staff that was being maintained in one of the Departments of the Foreign Office. The Department in question had twice as many employees as were required, and on the first of October sixteen employees, consisting of half the actual staff, were dismissed. M. Radouloff, Minister of Justice, who was recently acting as Minister of Foreign Affairs, is responsible for this decrease in the number of employees, and it seems a pity that he was not left to carry on his work at the Foreign Office, for M. Dashkaloff, who succeeded him, besides being Minister of Commerce, is the Bulgarian representative on the Reparations Commission and must find it very difficult to fulfil the duties of the three posts.

M. Radouloff, besides being popular, is considered to be one of the most capable Ministers in the Cabinet, and his moderate and far-sighted views are daily winning him new adherents. In addition to the dismissal of the Foreign Office employees, he has been instrumental in bringing about the enforced retirement of 63 persons either belonging to or attached to the Legations abroad. The total amount of public money thus saved will amount to about two million levas; and as a certain number of the persons concerned only spoke Bulgarian their dismissal will not be a great loss. When one considers that at the present moment Bulgaria is keeping up only fourteen Legations, one wonders how she is able to spare 63 officials, as this means an average of more than four per Legation, and we are forced to the conclusion that there must have been unnecessarily large staffs at each Legation.

### Diplomatic Relations with Greece.

The Bulgarian Legations at Constantinople and Athens are still shut up, the former owing to the Allies' not yet having ratified the Peace Treaty with Turkey, but it is hard to understand why no Bulgarian diplomatist has been sent to the Greek capital. There has been a Greek Chargé d' Affaires at Sofia since the beginning of 1920, and a Bulgarian Minister and his Secretary were nominated to Athens a year ago, but have not yet taken up their duties. M. Kissemof, the Minister, is probably too valuable to M. Stambolisky to allow of his being spared at present, and it is thought that another Minister may be nominated in his place, as M. Kissemof's position as official interpreter and general right-hand man to the Prime Minister will be a very hard one to fill.

Digitized by Google

**The Municipal Elections.**

The outstanding feature in the Elections which were held in 130 Municipalities on October 2 is the great decline in the Communist vote. With the exception of three places, viz., Samakov, Lom Palanka, and Kalofar, their vote has everywhere grown less, and the comparatively small number of votes they received at Yamboli, a town in Eastern Bulgaria, hitherto regarded as a Communist stronghold, is especially significant.

Other interesting features in the elections are the increase in the Agrarian vote in towns such as Rustchuk, and also the solid block that has been formed by the Democrats and the Narodniaks in most of the outlying districts. It would appear that it is only at headquarters that these two Bourgeois parties are divided, and it is very possible that the conference of the Narodniak party, due to be held at Sofia next month, will help in smoothing over some of the questions that at present prevent the two parties from being united.

The recent elections, including as they did only 130 out of 2,000 to 3,000 Communes, cannot be said to be of a grand importance, but nevertheless they serve as a useful criterion of present day political feeling in Bulagria, and it is certainly very satisfactory that the Communists have met with at least a temporary set back.

**General News.**

General Jekoff, the ex-Commander-in-Chief of the Bulgarian Army is expected to arrive in Bulgaria from Vienna to-morrow. His trial will begin on the 11th. inst., and it is understood that the defence, which will be conducted by M. Mouchanoff, will bring to light some new and interesting facts concerning the closing stages of the war.

The Honourable W. A. F. Erskine, the new British Minister to Bulgaria, arrived in Sofia on October 4.

Two million levas was recently collected by Banks and business houses in Sofia in aid of the starving people of Russia.

## GREECE.

*Athens, October 8.*

**Two Letters.**

Intense excitement has been caused, not only in political circles but in Greece generally, by the publication in all the papers here, on the 2nd. inst., of a letter despatched by M. Venizelos to a friend in Athens, and M. Gounaris' reply published in the Press on the following day. M. Venizelos' letter was written in Aix-les-Bains on July 3 last. It points out that the refusal of the Government to accept the Allies' offer of mediation constituted the last crime against Greece. How could the Government say that they are continuing his (M. Venizelos') policy when by the vote of November, and by the rupture of the alliance with the great Powers, which followed as a consequence, this policy had been completely upset? He would never have thought of continuing the war without the support of Greece's Allies. There only remained to the leaders of to-day to pursue an entente which would terminate the state of war and save what could be saved. This entente was sought by England four months ago. Unfortunately, however, the Government, frightened by public opinion, refused the offer and continued operations. A further chance was offered and was again rejected, at a time when the Allies were disposed to state their terms in advance. These terms were to the effect that Thrace as far as Chatalja, should be retained, and that Smyrna with a hinterland should receive autonomy, with a Governor-General nominated by the League of Nations. These terms were certainly inferior to those accorded to Greece by the Treaty of Sèvres, but, unfortunately, these had to be considered the price to be paid for Greece's failure to take into consideration the Note of the Allies sent after the elections. Whilst maintaining that the Government had committed a diplomatic crime in not accepting the offer of mediation, M. Venizelos does not wish it to be understood that the terms England had in view would be accepted by the Turks. But with Turkey refusing, England could give Greece aid in her struggle to impose the Treaty of Sèvres. To-day, however, in view of the refusal on Greece's part, public opinion in England would in no circumstances permit its Government to come to her help.

The letter further completely excludes the possibility of an absolute victory, which would force the enemy to accept the conditions of the conqueror as the former would well know the diplomatic isolation of Greece. Consequently the carrying on of hostilities could only result in the weakening of Greece from an economic and military point of view which would, within a few months, lead her to implore mediation.

M. Venizelos' letter further goes on to recall the danger of an occupation of Thrace by the Bulgarians, and as an advance of that country's army on Salonika could not be checked, this would provoke the descent of another nation on that town.

Regarding the question of Northern Epirus, M. Venizelos foresaw that the fate of the decision of the Supreme Council would be similar to that of the Treaty of Sèvres, after the isolation of Greece, and after France and Italy became hostile towards her. Unfortunately, says he, at Athens the danger lurking under France's open declaration of unfriendliness has not been realised. This is so pronounced that she (France) is actually working against her own interests whilst at the same time hastening those of Greece to ruin.

The letter ends up by saying :—

It is to be feared that some of the Liberals also accuse me of treason, because, when speaking in London in favour of the application of the Treaty of Sèvres for Greece, it was pointed out that such application would lead to the recognition of King Constantine and that I had arrived at the point of supporting such recognition. The facts are that the governing parties of to-day continue the war because they wish to tire the Greek people and then bring matters to a position of stalemate, and later by concluding peace, be acclaimed as benefactors. In other words they wish to repeat what was done in 1915-1916.

Digitized by Google

## M. Gounaris' Reply.

In view of the impression caused by the publication of M. Venizelos' letter, M. Gounaris decided to reply to it, and this reply was communicated to the Press by the Press Bureau of the Ministry of Foreign Affairs.

M. Venizelos, said M. Gounaris, based his tirade against the Government on the argument that his policy was dependent upon the alliance with the Allies, which alliance was overthrown by popular vote on November 1 (O.S.).

This basis was false. He would not discuss the existence or the conditions of the alliance on the basis of which M. Venizelos states that he conducted the war against Turkey. This alliance could not be broken, and has not been. The Great Powers could not abolish on their own initiative the obligations which they had undertaken, unless there was a clause stipulating that the Greek people should not throw out M. Venizelos; but the latter did not mention this point.

M. Gounaris goes on to examine how the alliance under the Venizelist Government acted. No Allied Army co-operated even with the Greek Army, neither were arms or munitions supplied. Not only did the Allies not give money to Greece but they forbade her issuing paper money. M. Venizelos never obtained freedom of action in Asia Minor, and neither he nor he who was performing the duties of a king at the time, was allowed to set foot in Asia Minor. Every movement of the Hellenic Army was dependent upon the consent of the Great Powers, which consent was never given. To-day these barriers had fallen. Every liberty of action had been left to Greece. The King of Greece had crossed the whole of Asia Minor actually under Greek occupation, and the Hellenic Army had carried freely the national flag wherever it is flying to-day.

The money required for the military campaign had been found in the country itself. The Powers had held towards Greece the same attitude as they had done towards M. Venizelos. In order to facilitate Greece in obtaining supplies, the Allies agreed that commerce should be opened, whereupon every nation hastened to offer supplies to the country. From the point of view of the alliance, therefore, the situation had undergone no change.

Such was the state of affairs in its proper perspective, with regard to the co-operation of the Great Powers in the struggle against Turkey. How could M. Venizelos dare to state that the alliance between the Great Powers and Greece had been broken off as a result of the Note of November 1? Would it not be better to say that the Treaty of Sèvres was signed and Greece alone entrusted to impose it? And could M. Venizelos explain why the Treaty had not been ratified by any of the signatories?

Referring to the Northern Epirus question, M. Gounaris states that M. Venizelos is very audacious in daring to speak of this question, in view of the fact that it was he who had used every endeavour to bring about a failure. Was it true or not that Northern Epirus belonged to Greece as a result of the struggles of the Epirotes whilst M. Venizelos was acting against its interests? Was it true or not that Greece had completely assimilated that country, and that the latter deputies formed part of the Greek Parliament? Was it true or not that the Allies had occupied that country, following an arrangement with M. Venizelos? How was it then that Northern Epirus was now under Albanian occupation? Who gave it to the Albanians instead of to the Greeks? Who was then in power in Greece?

Passing on to the agreement with Italy, the Prime Minister asks; was it not under the Venizelos Cabinet that it was denounced? With regard to the refusal of the Government to arrive to an understanding at the Conference of London, M. Gounaris says that there were no grounds for an entente. To begin with, Turkey, before Greece had time to reply, had declared through those who represented Angora, that she would not accept the terms stipulated, and was then actually preparing her troops for an attack. This situation was realised by the Great Powers themselves who informed Greece that she had perfect liberty of action to make preparations in order to forestall those of Turkey.

Touching on the proposals of mediation, M. Gounaris explained that whilst pourparlers would have been in progress, Kemal would have had ample time to reinforce himself.

In conclusion, the Greek Premier said that the Government which succeeded M. Venizelos had done everything possible and advantageous in the National interest, that which M. Venizelos had not been able to do not having the confidence of the people. This confidence of the people shown towards the present Government, was to-day a powerful asset, carrying probabilities of great success. To-day M. Venizelos spoke again of the lassitude of the people, which was even being provoked by the present Government. M. Venizelos was also mistaken in this illusion, as much to-day as when he stated the lassitude of the Army had caused his downfall. It was not the lassitude of the people which sent him away, and it was that which would once more bring him back to power.

## CYPRUS.

*Nicosia, September 27.*

### The Island Outlook.

A point has been reached when some new departure is clearly essential unless the present anomalous and unsatisfactory situation is to be continued during the sessions of the new Legislative Council which is shortly to come into being. At a meeting of the "Central Committee" (which has for some years directed the course of events in the Greek community) held under the presidency of the Bishop of Papho, it was decided that yet another Pan-Cypriot meeting should be convened, on October 9 or 10, to decide upon the "policy" to be followed. The term Pan-Cypriot is of course a misnomer, as it would ignore the opinions of 60,000 Moslems. So few members attended (10 out of 28, of whom 6 only voted) that it has not yet been decided whether this decision holds good. The long-suffering Archbishop—the political figurehead—is to decide. Should the meeting be held, it means that about 2,000 representatives of towns and villages must be summoned; and no one can seriously imagine that any useful purpose can be served by all the trouble, expense and waste of time that would be involved.

A more important and interesting fact is that there is now, at last, a conflict of opinion (fully reflected in the Greek papers) as to what line ought to be followed in the new council. Considerable and growing sections of the educated community have been asking themselves whether the policy of abstention from attendance by the Greek members has not been a mistake, and whether, if persisted in, it is not bound to interfere with island progress. There is now a pronounced difference of opinion, and the nucleus of an opposition which is bold enough to speak out. Supporters of the present members who advocate their re-election contend that the latter have fought hard for the cause of "union," have sacrificed much, that they should continue the struggle on the same lines, and be returned by a grateful electorate. The new party say that, since a definite reply has been given by the British Government, it is useless to ignore the consequences, that island interests must now take the first place, and that these cannot be advanced by members who refuse to sit in the Council. The latter, it is represented, cannot change their tactics; otherwise they would be regarded as mere weathercocks; and there should therefore be an infusion of new blood. It is fully recognised that they have played their part strenuously, but the fact remains that they have not succeeded, and that the island is not to be handed over to Greece; and that way must now be made for men who will strike out a new line, which points to co-operation with their colleagues.

The outlook is therefore as follows:—If the present members (all but one of whom seek election) are returned, they will pursue the same futile tactics, and probably absent themselves from the Council, and maintain a hostile attitude of non co-operation and mischievous obstruction, that is to say that the real interests of Cyprus will be grossly neglected. If on the other hand new members, or a majority of such, are elected, presumably there will be more or less co-operation by the Greek section with the Government. Should the first alternative be realised, the Government (Colonial Office) can hardly tolerate any longer a continuation of this farce and of the subordination of legitimate work to politics, but would surely give a warning such as was given in 1895, that persistence in the present course must inevitably lead to a change of constitution. It is impossible to suppose that the present handful of agitators can any longer be allowed to play fast and loose with the working of the legislative machine. Several of the agitators have been cautioned regarding their speeches, and there has been some tightening of the Press law. The proceedings of the Council itself have been trifled with quite long enough by the Greek element.

# CORRESPONDENCE.

## "TRAVELLERS IN THE BALKANS."

*To the Editor of "The Near East."*

Sir,—Since returning from the Continent, I have read with amusement the note about my visit to Zagreb which appeared in your issue of October 6. It is true that my brother and I saw M. Raditch, as well as a number of other politicians of all parties, though the report that we were introduced to him by the acting British Consul is untrue. But while the Serbian Press was, I understand, accusing us of seeking to undermine the Yugoslav State, we were in reality engaged in the far more congenial pursuit of catching Slovene trout.

Not only was the river fishing of a very sporting character, but the surroundings were ideal. I do not think there are any valleys in Europe more lovely than those of Slovenia, or any people more charming that the Slovenes. Certainly the lake of—is an earthly paradise, and it is said that even Balkan publicists become calm and lovable after a week's contemplation of its deep waters.

Of its island church and its romantic castle and its great pike, of the beauty of the encircling hills, of the river, like green crystal, which leaps out of the rock and flows to it through the beech forests, only a poet could sing. But if all the political leaders of Yugoslavia would spend their holidays on its banks, I believe that the effect on their minds might be a potent influence for peace and harmony throughout the land!

I am, etc.,

LELAND BUXTON.

45, Kensington Park Gardens, Ladbroke Square, W.11.

## "BEDOUIN."

*To the Editor of "The Near East."*

Sir,—I think it ought to be noticed that the spelling of "Bedouin," although it resembles an Arabic plural, is properly a singular, derived from a French form of the Arab *badawi*; consequently the plural "Bedouins" is correct, and the error (a very common one) is to suppose that it is already a plural. It is your reviewer who (on p. 415) has fallen into the common mistake.

I am, etc.,

S. A. C.

Cambridge, October 10.

Our reviewer, to whom the above letter has been communicated, writes:

"I am afraid that I cannot see eye to eye with your correspondent. Mesopotamian Arabs of education have told me that 'Bedouin' is a plural form, and it is certainly so used in speech in that region. Apart from this, Sir Richard Burton, whose authority can hardly be questioned, writes as follows in his "Pilgrimage to Al Madinah and Meccah." Vol. 2, p. 80 (Memorial Edition), footnote to Badawin,—"I use this word as popular abuse has fixed it. Every Orientalist knows that Badawin (Bedouin) is the plural form of Badawi, an 'ism al-nisbah,' or adjective derived from Badu—a Desert. "Some words, notoriously corrupt," says Gibbon, "are fixed, and as it were naturalised in the vulgar tongue."

"The Concise Oxford Dictionary" gives: "Bedouin n and a. (Arab) of the desert, wandering; gipsy (F., f. Arab. *badawin* pl. of *badawiy*—dweller in the desert (*badw*—desert); *-n* is prop. the pl. sign."'—Ed.

## RECORDS OF THE PAST.

*To the Editor of "The Near East."*

Sir,—The Society of Antiquaries has, as you may be aware, recently started a quarterly journal called the Antiquaries Journal, one purpose of which is to give information to all who are interested about any discoveries that may be made of archaeological interest. In the past many finds that might have furnished us with interesting information, were not generally known because there was no convenient means of recording them, and so the opportunity of investigating them was lost. Many of your readers take interest in such matters, and would willingly if they perchance heard of such things, communicate their knowledge. I should be much obliged to you therefore, if you would by inserting this letter in your columns, encourage any of your readers to communicate information to the local Secretaries of the Society whose names are below. To any of them any discoveries either of mediaeval or earlier remains which may be made should be promptly communicated. They will welcome any information and will willingly afford all assistance in their power. The earliest possible notice should be given as, in these matters it is very necessary to have advice in the first stage, before any work is done, whether by excavating or otherwise.

I am, etc.,

RALPH GRIFFIN, Secretary.

## ALBANIA AND YUGOSLAVIA.

(*To the Editor of "The Near East."*)

Sir,—The Albanian question is getting serious, and as the Albanians have Italy at their back, the European press is spoon-fed with anti-Yugoslav propaganda. The Slavs are naturally anxious to secure a good strategic frontier, especially as that wild country has been for centuries, and will probably be for many years to come, a theatre of border warfare and the raiding of villages, as is inevitable where there is a mixed and warlike population in a relatively tardy stage of civilization. But they have no wish to see the growth of Albania thwarted, and would infinitely prefer to see them left to themselves and not made the tools of foreign intrigues. In many parts of the Balkans the Serb and Albanian population are inextricably mixed, and there are constant if slow movements and migrations, and a substantial amount of mutual absorption, for, although the two nationalities are so distinctively marked, there is a tendency for the minority to become absorbed in the majority in different districts.

The recent reference to "Russian mercenaries" in "*The Near East*" itself is an example of the subtle effect of propaganda. It is well known how Yugoslavia has strained its resources to the utmost to find a home for the wandering Russian refugees, often to the discontent of the natives, and how the Government is actually spending large sums on the feeding of them. When General Wrangel's army was left to starve, and Belgrade was approached with a view to accepting more, the country's resources were not equal to the strain, but the Government agreed to take on a certain number, not very great, to reinforce their frontier guards, for this is the only manner in which many of these destitute Muscovites can earn their rations. We read that a much greater number of Russians are in the service of the Bulgarian Government, yet no one accuses Sofia of employing mercenaries, and the implication is a little cruel.

While it is quite possible that the Yugoslavs have carried on political activity in the south-west with a view to securing ultimately a strategic frontier, and may have committed indiscretions, it is Serbia that is suffering. There seems to be substantial fighting now on Serbian territory, and the military authorities have been in conference with the Cabinet with a view to sending reinforcements and upholding the sanctity of the frontiers. Information gathered from prisoners shows that the Italians are helping the Albanians with food, uniforms and munitions. And at the same time, the Magyars are massing troops on the northern frontier,

Digitized by Google

hoping to profit by Yugoslavia's embarrassment in the south. In some political circles the opinion is expressed that as the country is in fact in a state of war with Albania, the situation should be regularised, the Skupshtina convoked, as the Constitution requires when the country is attacked, and war formally declared. Meanwhile, to avoid the necessity of mobilisation, the Ministry of War is despatching reinforcements in the form of regular troops and gendarmerie, but will not dare to denude the Hungarian frontier.

While it is true that the Yugoslav delegate to the League of Nations has forfeited a certain amount of sympathy by his outburst recently, which has been criticized in Belgrade, it must be borne in mind that when we come to the root of the matter, it is a purely Balkan question, which in former days would have been left to the two parties to settle among themselves. Also that the so-called centrifugal forces within the Triune Kingdom are very weak and few in numbers, but those without are both numerous and strong as many of your letters have shown. It is directly to Italy's interest, or to that of her imperialistic party, to act as they are doing, and it plays right into the hands of Hungary.

I am, etc.,

YUGOSLAVOPHIL.

## RUSSIAN REFUGEES IN CONSTANTINOPLE.

*To the Editor of "The Near East."*

Sir,—The case of the Russians here really wants writing up. There are 27,000 practically starving today in the streets of Constantinople (official figures)! You watch their condition getting gradually worse each day as you pass down the streets—thinner and more emaciated, and the expression on their faces one of increasing hopelessness. All the streets are *lined* with them, selling such things as paper snakes, paper flowers, picture postcards, newspapers, rubber dolls. I saw a nice looking youth last week about 26, who in the operation of selling one of two rubber faces that squirt a red tongue out—which he held up for sale—allowed his stick to drop to the ground. He was too weak to reach the ground, so the purchaser turned and picked it up for him. They stand in the streets in all weathers out at heel, with just a remnant on them of their original Russian military uniform. One hears that all funds for their assistance are about exhausted. The French have closed down entirely. It strikes one here that they are just as deserving of some of the Russian Famine Relief Fund as at any rate the looters of the relief trains in Russia itself.

So far the Russians here are amazingly quiet and law-abiding and in consequence are more and more gaining the sympathy of the public. But one feels that trouble must come before long. It is contrary to human nature that it should be otherwise.

I am, etc.

C.M.B.

## THE NEW PERSIAN CABINET.

According to an official message received in London, the Persian Prime Minister has reconstructed the Cabinet as follows:

| | | |
|---|---|---|
| Kavam-es-Saltaneh | .. | Prime Minister and Interior. |
| The Sardar Sipah.. | .. | War. |
| Mushir-es-Saltaneh | .. | Foreign Affairs. |
| Amid-es-Saltaneh .. | .. | Justice. |
| Shahab-ed-Dowleh | .. | Posts and Telegraphs. |
| Amir Aalam .. | .. | Education. |
| Mussadek-es-Saltaneh | .. | Finance. |
| Naib-es-Saltaneh .. | .. | Public Works. |

SCHOOL OF ORIENTAL STUDIES.
London Institution, Finsbury Circus, E.C. 2

ORIENTAL LANGUAGES AND RELIGIONS.

Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs

For particulars, apply to Sir E. DENISON ROSS, Director.

## PRESS ON THE NEAR EAST

### Palestine.

In the *Contemporary Review* of October Professor Patrick Geddes, who has recently returned from Jerusalem, has an intensely interesting article on "Palestine in Renewal." He begins with a statement of that impartiality which he, as a town-planner, had to observe in Palestine; his views from such an aspect are therefore valuable:—

In this present situation, with hopes and purposes, opinions and criticisms as to the future of Palestine so widely divergent, the testimony of recent visitors may be of value; and this according to the nature and measure of their direct observation and their interpretations of such survey. The writer—not previously acquainted with Palestine, but prepared by long familiarity with various Mediterranean regions, some as far east as, *e.g.*, Cyprus—has spent part of 1919, and the greater half of 1920, in travelling and planning, and this with an eye to regional development. He has been consulted for the designs of the Hebrew University at Jerusalem, and of Jewish, as well as other, garden villages there and round several other towns, and throughout the whole period of both visits he has been responsible to the successive Governments of Palestine, military and civil, and has accordingly been reporting to them on general city and town plannings, within which these Jewish schemes have only their limited areas among the rest. And just as the hygienist, whether at home in Europe, in India, or in Palestine, is in practice but little concerned with either the religion or the politics of the public which he is called to serve, so it is also with the town-planner. Essentially occupied as are hygienist and planner with general and community interests, a substantial impartiality is thus necessary and customary in their professions: indeed, without it their plans would be vitiated in all men's eyes, and not simply in their own.

And he proceeds to give one or two impressions gained from this angle:—

The common idea of the relative backwardness of Arab agriculture is too often confirmed, yet with very noteworthy exceptions for certain villages. The widely current impression of poor housing, in Arab villages and Moslem quarters, requires frequent correction; since skilled mason-work, substantial building, and good proportion are very general; while an old Turkish or Arab mansion has not only air and space, but dignity, and often interior beauty, even charm. Modern Christian architects of all denominations, with all their large opportunities during the past generation or two throughout the Holy Land, have as yet mainly been giving too formal presentments of their own styles, and thus failing to express them at their best; while Jewish building and architecture have been hitherto no better than in Europe, since they mostly range from poor, even ghetto-like, meanness and overcrowding of houses of ordinary suburban character, showing as yet scarcely any fresh inspiration.

And in continuing with a description of the varied traditions of Palestine and of the necessity for observing them all, he discloses the idealism that is at the bottom of all great practical men. "It is out of the old Palestine with its broken and surviving beauty, that men of good work and will, of each and every faith, may best hope to express their own vision of their new Jerusalem upon its hills." He goes on to discuss agriculture:—

Yet the most fundamental of all reconstructive tasks is agriculture; and its main object, in literal Biblical phrase, and in concrete fulfilment of its prophesy, is to "build again the old waste places." And though the Zionists are in this way the most active and ambitious, and the Moslem and Christian Press is in consequence voicing a dread of submergence, there is nothing to prevent much further development of all good agricultural and constructive endeavours—as, *e.g.*, by credit organisations. This in fact is being seen by many, and as a wiser and more practical policy than that of outcries of "dispossession." Such outcries are, indeed, baseless; for, even if Jews were to become destitute of that long foresight and political intelligence with which in other moods they are only too generously, sometimes almost superhumanly, credited, the British Mandate and administration are there, pledged to guard all existing interests. And, as a matter of fact, after looking at many Jewish land purchases, in north, east, and west, one forms the clear resultant impression that the Jews are paying very good prices for what they buy. Moreover, the bulk of such land, if not all, requires further large capital expenditure, so it will need not only skill and labour but long patience too, before the mass of these investments can be brought up to a remunerative return. This has been true even of the older Jewish colonies which have been growing up for half a century and more, along with those of German and American Christians, quite before the present Zionist movement, which is essentially of very recent years. Its world-wide publicity, however necessary for its objects in other countries, is in Palestine costing its promoters dear. For it is the very A B C of economic experience that, in a bargain between an eager buyer and a leisurely and conservative possessor, it is in the latter's favour that the scale tends to incline. This is inevitable where sentiment comes into the scales, as in any country, say for the archaeologist seeking to acquire some venerable ruin to

Digitized by Google

him inestimably precious; for the religious body longing to restore a venerated shrine, or, again, for any person asking to re-acquire the home of his ancestors. But the Jewish buyer is each and all of these, and *more*; he has not merely the sum of all these sentiments, he is their multiplicand. He has, moreover the disadvantage of a legend of wealth behind him, almost as when any travelling Englishman was "milord," or was at least assumed to be heir to a London banker or brewer; this, indeed, all the more because everyone in Palestine knows that one of the Rothschild barons has long been backing and extending with his millions, the pre-Zionist group of colonies that have long been numerous, and are at length fairly prospering. But the Zionists themselves are less fortunate, since the great Jewish financiers and bankers are mostly somewhat shy of their ardour; they are, however, asked long prices none the less. And though sometimes an Arab seller may expand into unwonted luxury at Cairo or Jerusalem, there are also many cases in which, like proprietors of large but impoverished lands nearer home, he is able by selling a portion, to disburden and develop the land he keeps. Under the influence of a recent and vigorous political and Press propaganda, not a few *effendis* declared they would never sell to Jews, but some have been prudently reconsidering this. And one meets old-fashioned Arab landholders and chieftains, more interested in the development of their lands and people than in politics, who are frankly desirous of promoting Jewish settlements in their midst; not simply, as they explain, from a desire for ready cash, but as a fresh example and impulse to their own small, scattered, and admittedly backward agriculture. For a Jewish colony often offers employment for Arab labour, and certainly a stimulus to the neighbouring villages.

He then details some of the material improvements that have already been effected, and concludes with some instructive remarks on the nature of the Zionist Colonists:—

Now a word about these workers. After all one has heard of them as wastrels, dotards, usurers, Bolsheviks—for any and every word of abuse, however mutually incompatible, seems to satisfy such critics by turns—the naked eye finds them in the mass pretty much like a group of our own young soldiers back from the war. For in this a great number of them served, of course in many different armies; a surprisingly large proportion are men from universities, now closed to them, too commonly by hate, but also largely by the poverty, ruin, or massacre of their kindred. And in these young fellows turning from philosophy, law and letters, or medicine and science to agriculture, is there not also an element of "University Reform," fuller than its advocates, whether in Britain or India, have yet put forward?

But what of the Bolsheviks and Communists, of whom we have heard so much, and who alarmed Sir Herbert Samuel's Government? No doubt there are a sprinkling. I have heard, from some of their opponents, of two or three hundred in Palestine. If there be so many, it is few compared with too many British cities; but, in any case, the difference is that, while any great modern industrial city to-day is becoming more or less a nursery and training school of extreme economic theories, an even revolutionary spirit, any and every agricultural region—and especially such a reclamation area as this—is the nursery and school of a view of life and a philosophy of action of a totally different character, since it is no longer mechanical, but essentially vital and constructive. As a student and planner in great cities, and even at present in this quiet old Scotland, I feel a very real anxiety over their impatient Communists and ardent Bolsheviks; but when in the fields, whether watching Horace Plunkett's work in Ireland or Dr. Egginger's in Palestine, one breathes a totally different atmosphere, and with returning hope. For what steadier and better ground has any civilisation to show, in past, present, or future, than such return to mother earth, in strenuous and loving labour?

## A Problem of To-Day.

Writing in the *Saturday Review* on the "Asiatic Dislike of European Control," a correspondent thinks that "there can be little doubt that the relations between Europe and Asia will prove to be one of the gravest and most perplexing questions that the present generation will have to face." In his opinion, "it is in the Nearer East—that is, in all the country extending from India to the Mediterranean—that the social feeling between East and West is now gathering its strength under the impetus of new ideas and the unifying bond of a common creed." There is in fact a spirit of revolt in the East against all implications of inferiority in its dealings with Europeans:—

The philosophic Hindu dreams of the return to a life as depicted in the Vedas, a life of saintly self-complacency undisturbed from without, which he feels the rigid materialistic rule of the white man has rendered impossible of attainment. The Muslim sees around him at Agra, Cairo, Delhi, and Damascus the glorious marble relics of fallen dynasties and departed greatness, and longs for the days when every career was open to the strong and ambitious, when the great could live a life free from the restrictions of external law, moral duties, and responsibilities to others with which the European has encumbered civilisation. Even the timid had then a chance to make themselves a name in some of the quieter walks of life. All the excitement and high interest of life have, they feel, been extinguished under the rigid, wooden order produced by the foreign rule. For all this which has been extinguished the foreigner has nothing to offer in exchange. Nor could he offer anything except justice and good order. But the Asiatic prefers a more flexible justice, on his own lines, where his point of view is better understood and provided for, though this in the white man's eyes is not justice at all. So long has the past grandeur of Persia been nothing but a memory, so utterly has her civilisation crumbled that, except for the living influence of her poets, there is little to recall her former proud position among the nations of the world. Omar Khayyam, indeed, is known and appreciated in the West, but little is understood of the quaint philosophy of life of which Hafiz is a master, and still less of the mystic love poems of Saadi and his rose garden with the bulbuls singing in the trees. And Turkey, the home of ancient and modern empires, heir to the civilisation of Rome, and the object of envy and intrigue on the part of every western Power ever since "his most Christian Majesty" Francis I. allied himself with Suleiman the Magnificent, has, under the hammer blows of fate, dwindled into a caricature of its former might. Perhaps the future may prove that, in losing a weak Empire Turkey has become a strong nation and will find the means to shake off the foreign economic and international yoke. For the rebirth of the nationalist spirit of Asia dates from the revolution of 1908, when Turkey decided that her destiny lay on the southern side of the Golden Horn, and not in Europe. This great historical movement, the full effect of which has yet to be seen, marks for Asia an epoch no less important than the French revolution did for Europe. Yet, in the past, this antipathy between the two continents could not have been of the same intensity or even of the same kind as exists to-day. For did not the greatest of all world conquerors, Alexander the Great, marry a daughter of the Persian King Darius; and did not the patrician Antony take as a wife Cleopatra, the Queen of Egypt? Moreover, in more recent times, Shakespeare saw no objection to placing Desdemona and Othello on the stage together in circumstances which would, perhaps, be avoided in an essentially modern drama.

Lack of space prevents us giving more than one further quotation:—

It is certain that the European in the East can never merge himself in the Asiatic, for that to him would spell mental and physical deterioration with ultimate sterility as a consequence. Asia for the Asiatics is a law written into the soil and races of Asia. In the East the European never, if he can help it, accepts any other position than that of ruler. For the white subject thinks himself, often with small justification, to be the equal, if not the superior of the Asiatic King. Probably no two persons of different colour every marry without feeling, in some inscrutably way, that they had transgressed a law that is older than humanity itself. This strange, and apparently immutable, feeling of separateness was never more strikingly illustrated than in the position of the English in India in 1857, when the chances against them seemed overwhelmingly great. Yet they asked no quarter, they suggested no terms, they proposed no truce, but fought on, clear only as to one point, they would either continue to rule, or they would go under and be forgotten.

## The Egyptian Discussions.

Under the above heading the *Glasgow Herald* of October 11 appeals for brevity in the negotiations between Lord Curzon and Adly Pasha:—

The story of our trouble with Egypt since the risings, which led to the tardy despatch of the Milner Mission, has been a story of delays and postponements favourable to nothing but increased suspicion on the part of the Egyptians that this country is not sincere in its promises. It is true that the delays have been to some extent brought about by the action of the extreme Egyptian Nationalists; but it is open to question whether, if the British Government had taken a stronger line in regard to the Zaghlulist attempts to introduce new issues and to obscure the situation as a whole, a settlement would have *not* been arrived at by now instead of still remaining problematical. In many cases, one thing is transparently clear—namely, that neither Great Britain nor Egypt can afford to allow these discussions to be indefinitely protracted, or to be again interrupted by the factious machinations of Zaghlul Pasha and his supporters. The Delegation, with which Lord Curzon is resuming discussion of the points at issue, is a delegation from the Egyptian Government with the most trusted and perhaps most trustworthy of Egyptian politicians at its head. A careful study of the conditions in Egypt itself favours the impression that Zaghlul's influence is now more apparent than real, and that his recent displays of arrogance, petulance, and inconsistency have greatly weakened such hold as he had upon his countrymen, the great majority of whom will gladly support Adly Pasha's acceptance of a compromise much more reasonable than any to which Zaghlul would listen. There is surely no reason why, in view of these circumstances, an agreement should not be arrived at in time to allow of its being discussed in Parliament during the next session. Nor is it likely that such a discussion would be seriously controversial or unduly *prolonged*, save possibly by the efforts of Zaghlul's recent guests to exploit their rapidly acquired knowledge of Egypt and its political and social requirements.

## MUSICAL NOTES.

**The Piano-Player.**

On October 13 at the Æolian Hall a causerie-recital was given by Mr. Edwin Evans on "Modern Composers and the Player-Piano as an advanced means of musical expression," and the very large audience, much larger than that which the ordinary pianoforte-recital attracts, was an indication of the popular interest in the purely musical side of this comparatively new instrument. Much of Mr. Evans' lecture I unfortunately missed, but I heard the examples (played by Mr. Reginald Reynolds), especially written for the "Pianola" by Stravinsky, Malipiero, Goossens, Howells, and Casella, which were intended to illustrate his contention that the piano-player is an instrument with a technique of its own. Argument on this subject is useless: to those conservatives who still prate of mechanical touch, the lack of soul, and so on, I commend Mr. Ernest Newman's excellent book on the piano-player. But one is bound to confess that the pieces which were played were not attractive to the ear, though one freely admits that time is on the side of the experimentalists, since the ear will in the future certainly be able to take in masses of sound that are to it in its present untrained condition unbearable.

**Two Pianists.**

Brailovsky, whose pianoforte recital was at the Wigmore Hall on October 10, is already a very considerable artist. His technique is excellent, and his ideas, sometimes sound and sometimes showing the wantonness of youth, will probably take him to the highest rank. Unquestionably his finest possession is the spick brilliance of his playing, such as informed some of the more dazzling Chopin preludes. In these his was indeed a wonderful performance. But equally admirable is the most alluring muted silky tone in which he frequently indulges. From this tone he draws all sorts of colours, and with it he was even able to make the first two movements of Beethoven's "Pastoral" sonata (Op. 28) a constant delight. It sounded so easy, but that was because it was done by a master. But in "Carnaval" of Schumann he was not nearly so good; his rhythm was sometimes perverse, he missed many of the inner parts, and his sense of climax was disappointing.

In Miss Dorothea Vincent's pianoforte playing there was that good British honesty that so often in our concert halls finds itself the sole substitute for other and more satisfying virtues. At her recital at the Wigmore Hall on October 14, she displayed an unaffectedness and a technical ability that in any other art than music would probably secure for her popularity. But in music matters are different. There the accurate reproduction of proved values is not sufficient: one must suffuse one's reading in the glamour of original imagination. It was this personal, vital, gripping element that was lacking in Miss Vincent's playing. Everything, whether it was Beethoven's thin Sonata in E minor (op. 90), or Ireland's "Summer Evening" and "Merry Andrew," or Scott's "Introduction and Fugue," or even E. J. Moeran's new "Theme and Variations in F minor," was done in faultless taste, but could move no one. However pleasing and "nice" (as the Oxford people used to say) her playing may be, it will never progress very much without an infusion of personality.

**A Joint Song-Recital.**

Much as I admire the art of M. Mischa-Léon there were many dull things in the recital which he gave with Mme. Donalda at the Æolian Hall on October 13. Both were in good voice, Mme. Donalda far better than ever I have heard her; but in the songs of both singers there were some quite unworthy choices. Mme. Donalda especially brought many new songs. Of three new songs by Louis Durey "Trois poemes de Pétrone," only the first, "La Boule de Neige," showed much ability, and that of the superficially pleasing sort. A song of Casella, "En ramant" went well enough until the final verse, where it foundered in commonplace. Two new songs of de Breville were quite insignificant (so many modern French songs have negative virtues only), though recompense was made in Ravel's wholly delightful "Le Paon," which, incidentally, was extremely well sung. Her group of English songs was very poor, the worst of all being Scott's "Time o' Day" and some footling encore about "Smile a little." M. Mischa-Léon, who is incomparably the finer artist of the two, was, except where he was indulging in temperamental orgies, always interesting. He sang a beautifully finished "Sarabande" of Albert Roussel with consummate skill, following with perfect art the clear, limpid line of the melody. Laparra's "Du Pays" was a complete surprise to me: I had expected something vital, or at any rate original, from this composer, and here we had him pouring out diatonic conventionalities bedecked with common chords! His English group also, like the soprano's was poor, containing but two good songs, Butterworth's "Requiescat," which is perhaps too intimate, delicate, and English a thing for a foreign artist to fathom, and Bantock's "Desolation," magnificently interpreted by the singer. The beautiful justness of the atmosphere in which he distantly shrouded Bantock's song made all the more shocking the wild extravagances in which he indulged in Holbrooke's already extravagant "Come not when I am dead." But where he is a singer without peer is in his Scandinavian songs; it was a memorable thing to hear his tragic intensity in Lange-Muller's "Efteraar" or the pathos of his Grieg's "En Svane."

ANDANTE

## ALBUQUERQUE'S ATTACK ON ADEN.

Lecturing before the Royal Asiatic Society at 74, Grosvenor Street, London, on October 18, on "The Red Sea at the beginning of the sixteenth century," Sir E. Denison Ross said that the first quarter of that century witnessed events which had a lasting effect on the history of Egypt, Persia, and India. Among these events were the conquest of Egypt by the Ottoman Sultan, followed by his assumption of the title of Khalif, the rise of the great Safari dynasty in Persia, and the establishment of the Mogul Empire in India. But the event which concerned Europeans more than any of these was the opening of the direct sea route between Portugal and India.

In connection with the last named matter the lecturer gave an account of the attack by Albuquerque, the greatest of the Portuguese adventurers, on Aden, then a stronghold of a monarch ruling south-west Arabia. In 1513 Albuquerque left India to go to the Red Sea in search of a fleet whose attack he had long been waiting for in India. On the way he called at Aden, where the commander of the town sent to inquire whether he needed supplies for his fleet. Albuquerque replied that he had come to look for the armada that had been sent out by the Sultan of Cairo. There followed an exchange of compliments, Albuquerque asking the commander to acknowledge the suzerainty of Portugal. This was eventually refused. During the three days spent in the harbour Albuquerque determined a plan of attack; he decided that his whole force should engage in a scaling assault on an arm of the city wall which ran along the sea front. His force consisted of one thousand Portuguese and four hundred Malabaris. The attacking party went to the shore in small boats, carrying with them scaling ladders so wide that six men could ascend them side by side. The plan of the town garrison was to entice the Portuguese within the city walls, and fight them there rather than outside, where they would be at the mercy of superior artillery. Such was the keenness of the attackers in mounting the ladders, that these broke with the weight of the men upon them, and Albuquerque sent halbardiers of his guard to prop up the ladders with their spears. The chief success of this attack lay in the occupation by Garcia de Sousa of a fortified turret. Meanwhile Mir Mirjan rode out with others, also on horseback, and pressed down upon those who had entered the town. This attack the Portuguese could not resist, and most turned back in flight to the walls; while a few joined Garcia de Sousa in his turret. The Arabs brought straw and placing it below this turret set fire to it in order to smoke the men out. Whereupon Albuquerque sent ropes by which they could let themselves down. Garcia de Sousa refused to leave the turret by any other way than he had entered it, and lost his life in consequence. The fight lasted four hours, after which Albuquerque withdrew his men to their ships; and decided to continue his voyage to the Red Sea, leaving the chastisement of Aden to another time. Returning from the Red Sea he attacked Aden again, but found it in a much stronger state of defence than before; and after achieving very little he set sail again for India.

Comparing the Portuguese account with a hitherto unpublished Arab account of the fighting, the lecturer said it was interesting to note that they agreed in almost every detail; excepting that the Portuguese account told very little of the second attack, whereas the Arab account showed it to have been an even more serious affair than the first.

# NEAR EAST BOOKSHELF.

## A NEW POLITICAL GOSPEL.

**"THE FUTURE OF THE INDO-BRITISH COMMONWEALTH." By J. C. Wedgwood, M.P. (London and Madras; Theosophical Publishing House. 5s. nett.).**

The publishers regard this book, and its author, as so important that they have sent out copies for review without waiting to bind them, so as to economise time in spreading the new gospel. Perhaps they are justified, for gospels are best when served hot, and while this example is highly flavoured at the moment, we doubt whether it will keep. The theme is large, but simple. The League of Nations has failed, and the only chance of peace is to build up the desired world-union on the basis of the British Empire, enlarged by the free nations of the East, India, Ceylon, Burma, Mesopotamia, Egypt, and Palestine, and supported by the co-operation of America, the direct annexation of which is fortunately unnecessary. The bulk of the book is occupied by the measures required to bring the free Eastern nations into existence.

This theme is arguable, but there is little argument in the book. The League of Nations for instance is labelled "a pack of dagoes and Lord Robert Cecil," and Colonel Wedgwood strides over the infant corpse to his next objective, delightfully certain that he has left no enemies in his rear. Men of discernment do not, however, look to the author for logic, still less for facts, and readers who do not require such pedantry will find the booklet interesting throughout, and frequently provocative—sometimes of thought, and sometimes of expletives. For ourselves, we confess that its chief interest lies in the revelation it furnishes of the psychology of its writer. Colonel Wedgwood is, of course, a Democrat, but he doesn't care twopence for the size of the adverse majority. He will believe practically anything that is told him to the discredit of his fellow countrymen, but all the same he has an almost fanatic faith in the men he is so ready to discredit. In some way or other he has become a confirmed doctrinaire, but blood will tell, and deep down in the machinery there is a stark middle-class strain, which every now and then acts as an antiseptic, and which, if it had freer scope, might, perhaps, transform the doctrinaire into the inspired statesman, for whom there is plenty of room.

We may add that the book contains a short preface by Lord Haldane, which in itself is quite unimportant, but is noteworthy for the confession that the writer wanted to write it, the first admission we have seen of voluntary submission to what has become one of the minor terrors of literature.

## A TALE OF MALTA.

**"THE GOVERNOR'S ROMANCE." By Mina Holt (London: John Long. 8s. 6d. net.)**

Although the scene of Miss Holt's novel is laid chiefly in Malta, she also takes us to an island off the coast of Galway, the childhood's home of Cleena, her heroine, and to South Africa where Cleena spends her early married life with the unloved, millionaire husband. The sense of actual motion from one part of the world to another is indeed Miss Holt's most successful achievement. She seems better able to convey the atmosphere of a place than to establish the individuality of a character. Cleena, although the author is evidently sincerely interested in her, is rather swamped by the necessities of the plot. And the hero, Hugh (in the latter part of the story, Sir Hugh Dava, Governor of Malta), is chiefly employed to come in and say and do what is expected of him in moments of crisis. Such is the moment when he returns from a secret mission to find Cleena—who has thought him dead—just married to the millionaire; then his "worn, bronzed face" takes on "grey colour" and he laughs bitterly. There is another later when, in order to show the reader that he is human although so sternly virtuous, he presses her "against his heart" and urges her to fly with him. The Governor's faithfulness through long years to Cleena is rewarded and his "Romance" ends most happily for them both.

Some of the minor characters, for instance the confirmed bachelor, General Birchington, strike one as being drawn from life.

Miss Holt is generous with mysteries—the one on which the plot turns is well worked out, and its solution is sure to come as a shock to the reader. But besides this there are German spies (the time is just before the war) who are only just prevented, by Cleena's ingenuity and courage, from doing terrible damage at Malta. We wish that Miss Holt had left out the chapter in which the spies confer after this discomfiture; it serves no purpose, and only causes us to feel irritatedly certain that no spies ever talked like that.

It is also a pity that the first chapter introduces some of the characters in an obscure, puzzling way, as we fear it might dissuade a reader who was taking a desultory glance at the novel, from continuing it to his own enjoyment.

## BRITISH POLICY IN THE NEAR EAST.

M. Pantcho Doreff, formerly a Bulgarian Deputy in the Turkish Parliament, and now Secretary of the Bulgarian Legation, devotes a pamphlet to the consideration of the policy of Great Britain in the Near East and Central Europe. Britain's prestige, he points out, rests *inter alia* on her humanity towards, and readiness to succour, the suffering and oppressed small peoples, "but the greatest tradition of British policy was always considered to be the magnanimity towards the defeated." This factor leads the author to his main theme, the treatment of Bulgaria by the Allies. To deprive Bulgaria of her Ægean port does violence to geographical, economic and moral principles. It is also an enormous blunder. His main points may be briefly quoted:—

There are three large rivers in Bulgaria rising from the bosom of the Balkans—Struma, Mesta, and Maritza. The mouths of all these were handed over to the Greeks..

. . . the very interest of Great Britain is to see that every nation in the world has at least an effective free port to an open sea, and this not only for the sake of maintaining direct trade with that country, but chiefly to be in a position to enable her to exercise her influence in regard to that particular State.

It is very difficult to understand what is the real interest of Great Britain in giving preference to a few millions of Greeks over three hundred millions of Mohammedans. Great Britain is destined to play the role of cultural intermediary between the Asiatic and American continents, and in this respect it would be quite right to say that one of the chief duties of British policy would be to reconcile the Christian with the Moslem civilization.

. . . Once the Turks were satisfied in their legitimate rights, the militarist and chauvinist manifestations of the Kemalist and Young Turk policy would die away and the peaceful and progressive elements preponderate.

In Poland our author sees in any other solution than leaving Silesia in German hands the risk of a graver error than was the Macedonian problem for the Balkans.

Mr. John Hogg announces for immediate publication a volume entitled "Soldiers of the Prophet," by Lieutenant-Colonel C. C. R. Murphy, F.R.G.S. The author was Naval and Military Intelligence Officer in the Persian Gulf; Chief Intelligence Officer to the Mesopotamia Force; and Head of the First British Mission to Turkey in 1918.

# PERSONAL AND GENERAL.

**To-Day.**
October 20. (New Style).
October 7. (Old Style).
Safar 18, 1340 A.H. of the Moslem Calendar.
Tishri 18, 5682 of the Jewish Calendar.

The Hereditary Prince of Kapurthala has arrived at Claridge's Hotel.

Sir Henry Babington Smith was included as executor under the late Sir Ernest Cassel's will.

M. D. Mamartcheff, third Secretary at the Bulgarian Legation, is on the Continent on leave.

Lieutenant-General Sir John and Lady Du Cane returned to London last week from Monte Carlo.

Lord and Lady Reading, accompanied by the Foreign and Political Secretaries, left for Kashmir on October 21.

M. Stambolisky has returned to Bulgaria from Geneva, states a Reuter telegram from Sofia.

M. Take Jonescu, the Roumanian Minister for Foreign Affairs, has returned to Bucharest from London.

Sir Henry and Lady Bax-Ironside have left London for the Baltic Provinces and Poland.

Field-Marshal Viscount Allenby will leave London on Sunday for Egypt.

After being received by King Boris, the Dean of Cashel, brother of the late Mr. James Bourchier, has visited the Rilo Monastery.

Lady Goldney, of Monks Park, Corsham, Wilts, sailed for India last week and will return about Christmas.

Mr. Alfred Mercer, of Wigan, Science Master, formerly Inspector of European Schools in Bengal, India, left £21,148.

The King has granted permission to Brigadier-General Sir Gilbert Clayton, to wear the Grand Cordon of the Order of the Nile.

General Sir Claud Jacob (Chief of the General Staff, India) had the honour of being received by His Majesty at Buckingham Palace on October 11.

Sir Percy Loraine, new British Minister to Persia, is to leave Marseilles on October 29, and hopes to reach Teheran about the middle of December.

**OUTFITS FOR EGYPT, INDIA, AND THE FAR EAST**

The Official, Business or Sporting traveller going East this Winter will find just what he wants at

**THRESHER & GLENNY**

A century old outfitting experience and records of what others have taken are at your service.

*Write for List "H" mentioning destination and nature of appointment.*

**152 & 153, STRAND, W.C.2.**

Last week, at the opening meeting of the new session of the Victorian League, Sir Valentine Chirol gave an address on "The New Régime in India."

Lady Winifred Gore left London last week for Marseilles on her way to India, where she will visit the Commander-in-Chief and Lady Rawlinson.

Lady Ironside, late of Calcutta and Ootacamund, has taken 14, Victoria-road, Kensington, W.8., and this is now her permanent address. (Telephone, Western 490)

The *Sudan Times* states that Mr. J. H. G. Buller of the Legal Department will not return to the Sudan after the expiration of his leave in December.

The Minister of the Kingdom of Serbs, Croats, and Slovenes, M. Michel Gavrilovitch, who has been on a special mission to Paris, returned to London this week.

On October 12, at the Homestead, Shanklin, a son was born to the wife (*née* Carter) of Captain R. P. J. Mitchell, Indian Army.

M. and Madame Venizelos were among the guests at a small luncheon party given on October 14, by Mr. and Mrs. Lloyd George. Later in the week they left for America.

Lieutenant-General Sir Charles Harington's leave is now drawing to a close, and, under present arrangements, he will return to his command at Constantinople during the first week of November.

The Belgian Ambassador entertained at luncheon on October 13, M. Michel B. Boeresco, Minister Plenipotentiary and Roumanian Chargé d'Affaires, and the personnel of the Belgian Embassy.

The marriage arranged between William Allard, of the Public Works Ministry, Cairo, and Dorothea, daughter of the late Charles Mann and of Mrs. Mann, Talbot Road, Highgate, will take place shortly in Egypt.

Sir Geoffrey Archer, Governor of Somaliland, has left London to confer with the Political Resident at Aden on the question of the proposed transfer of Aden from India to the Colonial Office and the possible administrative amalgamation of Aden and Somaliland.

We are officially informed that there is absolutely no foundation for the rumours lately circulated by the Belgrade Press to the effect that King Boris of Bulgaria has been seriously ill. The King enjoys perfect health and is fulfilling all his engagements.

The marriage was celebrated on October 13, at St. John's Church, Calcutta, between Leslie John Marriott, M.I.C.E. of Chittagong, Eastern Bengal, and Winifred Frith, youngest daughter of Mr. and Mrs. Edwin Bowring, of Alstone House, Huntspill Somerset.

The *Times of Mesopotamia* announces the rssignation of Colonel G. Lubbock, C.M.G., D.S.O., R.E., Director of Mesopotamian Railways. With effect from August 21. Mr. P. Rothera, O.B.E., M.I.C.E., is appointed to act as Director of Mesopotamian Railways (*sub. pro tem.*)

The Prime Minister's eldest daughter, Mrs. Carey-Evans, on her arrival in London took Sir Arthur Pearson a cheque for £72, the sum collected for St. Dunstan's on board the Naldera, on which she was the voyage from Bombay.

The marriage was celebrated on October 11, at Holy Trinity Church, Karachi, India, between Captain Arthur Amys Fausset-Baker, Indian Army, only son of the late Major Fausset-Baker, and Mrs. Fausset-Baker, and Flora Jane, second daughter of Mr. and Mrs. Lewis Evans, of Withby, Sidmouth, Devon.

The marriage was celebrated on October 11, at St. Saviour's, Westcliff-on-Sea, by the Rev. H. Morrison Rose, between Roderick Llewellyn Baylis, of Delhi, second son of Mr. and Mrs. J. Barnard Baylis, and Dorothy Phyllis, only daughter of Mr. and Mrs. Gordon Bayliss, of Westcliff.

Lieutenant-Colonel Mark Synge, D.S.O. (S. and T. Corps, Indian Army), of Kelston, Seaford, Sussex, who saw service in the Tirah, Tibet, and Abor Expeditions, and during the Great War in France and in Persia, writer under the name "Powell Millington" of several books on life of India, left estate of the gross value of £9,437.

"Early Relations of Egypt, Babylonia, and Syria" is the subject of a lecture to be delivered by Mr. Percy E. Newberry, O.B.E. on Thursday, October 27, at 8.30 p.m. at the rooms of the Royal Society, Burlington House. This lecture is the first of a series on Egypt to be arranged by the Egypt Exploration Society; tickets and further details can be obtained from the Secretary, 13, Tavistock Square, W.C.1.

The Athens Correspomdent of the *Morning Post* states that M. Gounaris, the Greek Prime Minister, and M. Baltazzis, Minister for Foreign Affairs, have left the Piraeus on a destroyer, and are due to arrive in Paris to-day. Subsequently they will visit London and Rome. Admiral Malicopoulos and General Strategos, with M. Argyropoulos and other officials of the Ministry of Foreign Affairs, are accompaniyng the Greek Prime Minister and M. Baltazzis to Paris and London.

The Egyptian Expeditionary Force dinner was held at the Café Royal on October 12. The dinner was the outcome of the successful G.H.Q. Palestine dinner held last year, and a Dinner Club, which will meet annually has now been formed under the presidency of Field-Marshal Viscount Allenby, with Lieutenant-Generals Sir P. Chetwode and E. Bulfin, Major-Generals Sir H. G. Chauvel, Sir Vere Fane, and Sir Harry Watson as vice-presidents. Lord Allenby presided last week, and among those also present were Lieutenant-Generals Sir E. Bulfin and Sir Walter Campbell; Major-Generals Sir P. Palin, Sir John Adye, Sir Steuart Hare, Sir Henry Hodgson, Sir G. Bowman-Manifold, and Sir R. H. Luce; Brigadier-Generals Bartholomew, Buckley, Paul, Williamson, Oswald, Jellicoe, Sir G. Macauley, Clarke Short, Leggett, and Simson Baikie; Captains E. Unwin, V.C., R.N.; and W. B. Macdonald, R.N.; Wing-Commander A. D. Borton, V.C.; Colonels Angus McNeill, Davis, Bagshawe, Badcock, Lord Dalmeny, Mainwaring, Horton, Robbins, Paravicini, Sterling, Garsia, Jameson, and Waters Taylor; Majors Reynolds, Hill, MacDonald, Berkeley Wills, Raikes, and Captain, Raymond Savage, the organizer and hon. secretary of the Dinner Club.

## APPOINTMENTS & PROMOTIONS

King Ferdinaud of Roumania has promoted the Crown Prince to be Brigadier-General.

M. Fotitch has been appointed First Secretary to the Legation of the Kingdom of Serbs, Croats and Slovenes.

M. Constantin Al. Constantinesco has been promoted Third Secretary to the Roumanian Legation.

M. Nicholas Michel Vladesco has been promoted Third Secretary of the Roumanian Legation.

A Simla Reuter message states the Professor Rushbrook Williams has been appointed official historian of the Prince's tour through India.

The King has been pleased to approve the appointment of Mr. Alfred Edward Martineau to be a Puisne Judge of the Madras High Court, in succession to Mr. S. Wilberforce, who is retiring from the Bench in November.

The appointment of the Prince of Wales to be an Extra Knight Grand Commander of the Order of the Star of India and an Extra Knight Grand Commander of the Order of the Indian Empire was gazetted last week.

The King has been pleased to approve the appointments of Mr. Muttayya David Davadoss Avargal, Barrister-at-Law, and Mr. Mutha Venkata Subba Rao Garu, to be Puisne Judges of the Madras High Court in succession to Mr. Justice C. F. Napier, and Mr. Justice Sadasiva Aiyar.

## OBITUARY

Lieutenant-Colonel Edmond Munkhouse Wilson, C.B., C.M.G., D.S.O., R.A.M.C. (retired), died on October 9 at Queen Alexander's Military Hospital, Millbank, aged 66. In 1881 he joined the Army Medical Department, and he served in the Nile Expeditions of 1884-5-6 (medal and clasp and Khedive's star), the Gambia Expedition of 1891-92 (medal and clasp), the Ashanti Expedition of 1895-96, when he was in command of a base hospital and was honourably mentioned and received the C.M.G. and star, and the Sudan Expedition to Khartoum in 1898 as secretary to the Surgeon-General (mentioned in despatches, D.S.O., English medal, and Sudan medal and clasp). In 1903 he was created a Knight of Grace of the Order of St. John.

The death has taken place at Edinburgh of Major-General Peter Stephenson Turnbull, M.D., aged 85, an hon. surgeon to the King. Major-General Turnbull joined the Indian Medical Service in 1860 and served in Abyssinia in 1867 and 1868 under Lord Napier of Magdala. He was Secretary to the Principal Medical Officer, H.M. Forces, Bombay, from 1882 to 1888, and Acting Inspector-General of Prisons in the Bombay Presidency from 1883 to 1885. Major-General Turnbull also held the appointment of Principal Medical Officer for the Sind district from 1888 to 1893, in which year he became Surgeon-General to the Government of Bombay, retiring three years later. He was made a Fellow of the University of Bombay in 1893, and was awarded the Good Service Pension in 1896. He was appointed hon. surgeon to the King in 1902.

## THE PALESTINE PROBLEM.

If Palestine feels obliged to look outside her own borders for inspiration, it is to be hoped that she will turn to the East, where Mesopotamia is setting an excellent example by peacefully testing her new conditions before passing judgment upon them, rather than to the north or the south-west, where she might be misled into the belief that the methods of the Turkish and Egyptian Nationalists achieve more good than harm. Provided that disturbances can be avoided in the immediate future, there would seem to be many forces at work to clear away some of the misunderstandings from which the country has suffered for the last two years. The chief danger lies, perhaps, in any exaggerated hopes that the Moslem-Christian Delegation may have raised when it first set out on its mission. Its presence in England will not have been altogether in vain; the members will certainly have been able to enlighten on many points those with whom they have come in contact, but they will also, we may trust, have learnt something themselves. The greatest disservice that they could render to Palestine would be to seek to cover up the non-attainment of their hopes by allowing the extremists among their followers to imagine that more violence on their part would turn the scale in their favour. It would, without doubt, have the opposite effect. Further disturbances in Palestine to-day would discredit the Arab population, which is anxious to prove its fitness to look after itself without being subjected to Jewish tutelage. On the other hand, given more time for the gradual readjustment of views held regarding the situation in Palestine, there can be no doubt that the Arabs stand to benefit from the process. Their fears were aroused much more by what they thought the Zionists intended to do than by what had been done. They had been stirred up to take Zionist declarations far more literally than the rest of the world had. Thus when an advertisement in the American Press spoke of Zionism restoring a people without a land to a land without a people, it is easy to appreciate how half a million Arabs of Palestine might be induced to picture themselves as on the eve of being swamped by a Jewish immigration that would forcibly eject them from the land of their fathers. Slogans, however, are not always to be taken literally, and if the most level-headed business men are inclined to make a prospectus as attractive as possible, much must be forgiven the Zionists in the flush of the achievement that the Balfour Declaration implied for them. A year's practical experience of translating their aspirations regarding a National Home into a workable scheme has caused many of the high-flown phrases of the propagandist days to be abandoned.

No seriously-minded person to-day speaks or thinks of a country as apart from its population. The Jews would be the sufferers first, last, and all the time, if they were brought to a land emptied of its inhabitants. As far as Palestine is concerned, therefore, the Arabs may rest assured that they are wanted, and that there will be no attempt to oust them from their heritage. At the same time, if they are wise, they will reflect that, as it is impossible to contemplate the country without its Arabs, so it would be a misfortune both for Palestine and the Arabs to face a future deprived of Jewish co-operation. From the fact that before the war Jews and Arabs were on satisfactory terms it has to be inferred that the existing trouble arises mainly from agitation on the part of a few rather than from any inherent antagonism between the two races. What is known as the Effendi class, landowners, lawyers and others, may have felt that the halcyon days that they had known under Turkish jurisdiction were slipping away from it. Jewish labour, it will have argued, if not actually Bolshevist, can hardly fail to introduce modern ideas among the fellaheen, who will no longer submit to the time-honoured exploitation that has brought wealth to those in authority over them. But let it be known that the new order, although entailing certain far-reaching changes, will offer many compensations—a higher value for land, fresh openings for capital—and the Effendi class will probably become more friendly. As for the fellaheen, so long as the mandate is in British hands they have nothing to fear and much to gain. Conviction on this point, we may hope, will reach them both from Egypt and from Mesopotamia, and will satisfy them that those who would stir them up to make disturbances to-day are the very men, or the tools of the men, who oppressed them in the past.

Not the least welcome among the forces at work to remove misunderstandings and to create a better atmosphere in Palestine is the Economic Board for Palestine, a report of whose first annual meeting appears in this issue. Under the chairmanship of Sir Alfred Mond, this Board aims at associating a number of Jews of proved capacity and judgment for the purpose of creating economically successful enterprises in Palestine. It is held by the Board that in doing so it will be performing the greatest service which any British Jew can render alike to Great Britain and to the cause of a National Home. In other words, as we understand its aims, the Board is anxious to promote the material prosperity of the country, and not to concern itself with political matters. It realises, as actual experience has already proved, that the present capacity of Palestine for absorbing Jewish immigration is strictly limited; and it believes that the only way to improve that capacity is to develop the resources of the country. Among the more urgent needs of Palestine are hydro-electric works for obtaining power from the Jordan and other rivers, and the provision of a harbour. Smaller projects will also be examined. As examples of these were mentioned at the meeting a Dead Sea transport scheme, the manufacture of salt and house-building. The Board hopes to receive strong financial backing throughout the Jewish world; the enterprises into which its funds will be put are to be tested by the severe economic test of whether they can be made economically successful on sound business principles, and it hopes accordingly to rally to its support those who may be prompted by business motives, as well as those who may be influenced by sentiment, whether it be sympathy with the National Home movement or the feeling that, as British Jews, Great Britain has a call upon them. All who are interested in the peaceful development of Palestine and wish the country well will recognise the advantage of having considerable sums of money judiciously spent upon it, over and above what the Administration with a limited revenue may feel justified in devoting to public works. In the material prosperity that such expenditure ought to bring about there is certainly the fuller opportunity for Jews and Arabs to know one another better and to discover that in Palestine the two races are complimentary, if not indispensable each to the other.

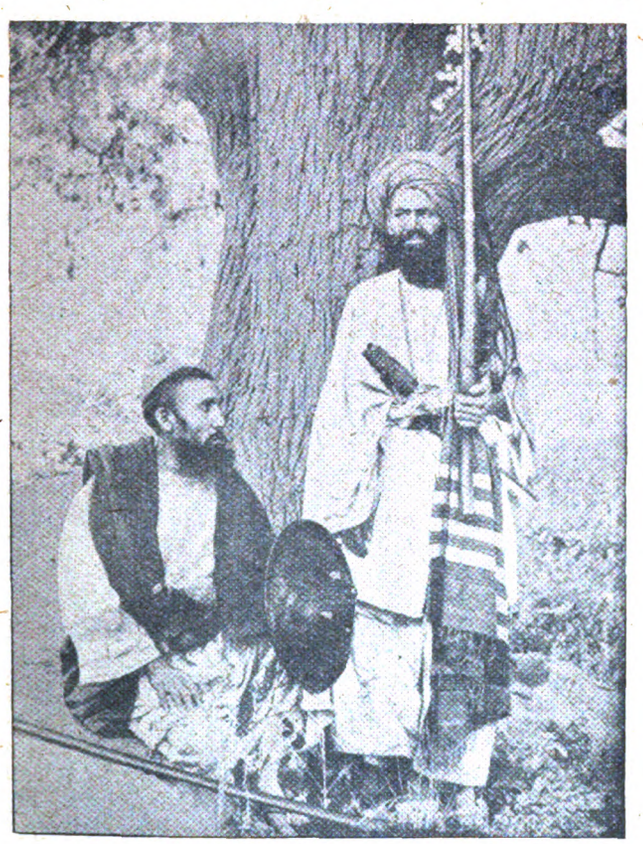
## THE NORTH-WEST FRONTIER.

*(By Sirdar Ikbal Ali Shah, F.R.G.S.)*

The time has now come when the struggle on the North West Frontier of India should cease, for owing to the political conditions in Central Asia and Afghanistan a disturbed borderland presents grave dangers to the peace of India. British policy in those regions has always been wavering ; it has been altered from time to time according to the changing atmosphere prevalent in official circles. Time and again it has been shown that military actions against the tribesmen were unsuccessful while a policy labelled, for want of a better term, as "masterly inactivity" answered the needs of the situation very much better. For well nigh a hundred years the tribesmen have been fighting.

To solve the problem of quieting the Frontier Province of India, we must understand the causes of the unrest. These are first and last due to economic conditions. The whole borderland, of about 800 miles, is one long stretch of wild, rocky country, where the need of water is as great as in the desert. Given facilities for cultivating their ground, the tribesmen will not fight, or at least their raids upon British territory will be greatly reduced. An example of this fact occurs in fertile regions of Peshawar district, and none can wish for better fields than I saw in the neighbourhood of Shabqadder.

A marked contrast to such fertility is afforded when one motors to Kohat from Peshawar, and sees that every man, whether ploughing or engaged in putting up his wall, has his rifle slung over his shoulder. Dreary



**Mullah Geeree Tribsmen, Frontier Province of India.**

and parched valley is all that they have to labour on. I saw a troop of women coming down a hill and making their way to their village, who had water pitchers on their heads, and were escorted by four armed men. On inquiring I was informed that every woman represented a household, and that was all the ration of water that they can procure in that area for their needs. There was only one well in the whole district, some eight miles away and nine villages had to get their supply of water from it. Further, that if all the grounds available and claimed were cultivated the produce would not suffice to keep all the inhabitants.

When nature is so much against them, is there any wonder that a warlike tribesman, hungry and sorefooted, sits on the top of his rocky hill, looking longingly at the green fields of Peshawar that he should exclaim with a sigh : "Look at that fertile country of the Ferungi and see our parched fields!' ? Then with a fierce sparkle in his eyes, his fingers clasp the butt of his rifle and he stands, whistles and gives a long sonorous call to his friend, "Gul—ul—mo—ma—da—da—oo—oa!" In a few minutes his comrade, Gulmohamed, comes up and relieves the mind of his friend by saying that there is no use in bemoaning fate and the real reason of God in making the tribal country so unproductive is that the Ghazi should pounce upon the green lands of the Ferungi. A raid is arranged forthwith.

While on my wanderings in the East, from which I have just returned, I had various opportunities of

**A Frontier Bazaar : PESHAWAR.**

talking both with the British officials and with the tribesmen, and I found that my views were endorsed on all hands ; every one agreeing that the Frontier troubles were directly economic, and could only be settled through economic means. Is it not the case that the construction of the Sawat Canal reduced fierce tribesmen to comparatively peaceful neighbours ? Engineering difficulties are undoubtedly in the way, but when the wonderful feats of Mesopotamian irrigation are borne in mind, surely the tribal area can be managed. Also we have another great feat of British engineering in Egypt, where Sir Murdoch Macdonald's name will remain in Eastern history as long as the Esna Barrage.

Reverting to the question of the North-Western Frontier of India, I refuse to believe that the tribesmen, if given the facilities for agriculture and working in factories, will again take to a life of raiding and destruction. From my personal observations, I am confident that if a peaceful form of living be provided, the Frontier will be made peaceful.

Other forms of quieting the tribesmen have been undertaken, one of them generally employed being subsidizing the Clans. Nearly four lakhs of rupees are given annually to the Afridi clans in the Khyber, and the *Maliks*—headmen—receive allowances separately. One knows of a Shinwari Malik getting as much as four thousand rupees a month. This form of procedure, if justified on some grounds is unwise on others. We may call it a waste, for it fails to bring out just that trait which this distribution of money ought to produce. The Government gives it as a present ; but the clansmen, in place of being thankful, assert that it is their just due that they receive, that they are the owners of the Khyber Pass, and that whatever is given to them is in return for services which they render in keeping the Pass open on Tuesdays and Fridays. On the other hand, it has been held that this allowance not only

Digitized by Google

ensures the peaceful behaviour of the tribesmen, but gives a political hold by means of which the Khyber Agency is able to deal with disturbances in the so-called Independent Country. In this connection, one might mention Khan Bahadar Sheikh Mahboob Ali Khan. This officer has been able to accomplish much that would at one time have been impossible of realisation. The quickness of perception and far-sighted policy of this vigorous young Pathan show that he is the right man in the right place. He is to be praised for the reason that he is a son of the country which he is called upon to administer, and he knows the causes of unrest so intimately that a policy such as he pursues cannot fail to be of highest value to the British interests in that region.

It must be added that the Khyber Railway which is in process of construction falls considerably short of what it is supposed to realise. Lahks and lakhs of rupees spent on its construction through different passes do not counterbalance its uselessness. Considerable

**A Hold-up in the Khyber Pass.**
( This man was covering us while we repaired our motor. *A.A.S.*)

sniping is done of the workers on the railway in the Khyber, which has greatly retarded the work. But supposing that one day the railway is completed to Dekka, is it not possible for a recalcitrant Afridi tribe to throw a few boulders in a tunnel or cut the line, or do any other mischief of the kind? It is entirely a wrong policy to bribe in order to secure the friendship of a nation—and that of the tribesmen in particular; for a race whose friendship can be retained only by means of gold is unworthy of the friendship of the great British Empire.

It is not yet too late in the day to start a vigorous campaign in the North-West Frontier against the natural difficulties of production in that country. By such a campaign and by wise sympathy with the religious traditions—a point of considerable significance—a quiescent borderland may be secured. Otherwise Bolshevist intrigues will not lose time in using the tribesmen to create more difficulties than are already in the way of Lord Reading's Government.

*(Our illustrations are from photographs by the Author.)*

Rumours circulated in the Greek Press as to the enlistment in the Bulgarian Army, of officers and men from General Wrangel's Russian troops are officially denied by the Bulgarian authorities.

## THE ARAB INTELLECT.

On October 12, at King's College, London, in the course of an address on Mesopotamia, Mr. Edwyn Bevan referred to the Arab intellect. He said that the Mohammedan learning cultivated under the Abbaside Khalifs was sometimes claimed as a great achievement of the Arab race in the past, and deductions had been drawn from it as to what we might expect in the future. During the war some eloquent articles had been published in *The Times* from an enthusiast for the Arabs who took this line. But at the time those articles appeared he (Mr. Bevan) remembered their condemnation as gravely misleading by two men who might perhaps be considered our best Arabists. One of these, Sir Charles Lyall, was now gone. It was true that the Mohammedan literature in question was largely embodied in the Arabic language, which was that of the then reigning power; but it had not been produced by Arabs. It had been produced almost entirely by Persians, or Syrians, or the children of the old inhabitants of Mesopotamia; and therefore we could not draw deductions from it as to the capacities of the Arabs.

Commenting on this passage, Dr. Ernest Barker, Principal of King's College, said that perhaps he had been misled upon this matter because one of his old pupils and friends was Colonel Lawrence, who was enamoured of the Arabs—giving as one reason that the modern Arab wrote such fine revolutionary poetry. He (the speaker) had never seen any of this; but he would suggest that a race which could produce revolutionary poetry had some intellectual gifts. Going back to the days, about 800 A.D., when philosophy of a good deal of depth was written in the Arabic language, he would venture to suggest that it was the Arabs themselves, and not merely the Persians or Syrians, or the old inhabitants of Mesopotamia who wrote that philosophy; because some of the finest Arabic work in philosophy was done in Spain as late as 1200 A.D. Another point was that the Arabs had at any rate a great religious genius. The Arab was the desert dweller, and the desert dweller had the religious sense and enthusiasm. Judaism, Mohammedanism, and in some sense Christianity had all come from the desert in which the Arab dwelt; and, according to first principles, the Arab with his religious gifts must have some philosophic inclination. One other remark he would make was that the diffusion of the Arab was one of the marvels of history. About the year 100 A.D. the Arab was trading in and occupying Malaya. He occupied the whole of Spain, with all the North African littoral lying between Spain and Arabia, and was colonising a good deal of the east coast of Africa. This diffusion was only paralleled and was not equalled by the diffusion of the Northmen.

## THE ARAB HORSE SOCIETY ENDURANCE TEST.

As briefly announced in a recent issue, the Society successfully held their second Endurance Test for Arab and Arab-bred horses on the Sussex Downs for five days commencing September 26, last. The course was one of sixty miles a day, starting from Lewes to a point near Arundel with various gradients, reaching over eight hundred feet at Ditchling Beacon, and over seven hundred feet at Chanctonbury Ring, falling to less than fifty feet at other points of the course.

The horses were examined at each compulsory halt so that none should proceed if unfit to do so. Eight horses (entered either in The Arab Horse Stud Book, or in the Arab-bred Register started; and the ultimate winner of the Challenge Cup and Gold Medal was Mr. H. V. M. Clark's Belka, by Rijm, out of Bereyda, and following her came Mr. L. Edmunds' last year's winner Shahzada, by Mootrub, out of Ruth Kezia, winning this year the Silver Medal. Belka finished the whole course of three hundred miles in 37 hours, 38 minutes, and Shahzada in 38 hours, 43 minutes, exclusive of compulsory halts. Both the winners were Arab horses bred in England; but Chandi, the only imported Arab in the contest, though dropping out at the end of the third day, considering his weight and height, made a gallant effort. It may be added that experts who were present considered that the winners made a fine performance in spite of the prevailing heat and the hardness of the ground.

## PERSIA DIOCESAN ASSOCIATION.

On September 30, a meeting of the Persia Diocesan Association was held at St. James's, Paddington (Parish Hall). The Bishop of Barking, who presided, referred to the growing interest in Persia, contrasting the position to-day with that in the days when Henry Martyn first sailed for India. He emphasised the value of such an Association as the P.D.A. in upholding and strengthening the hands of Bishop Linton and the workers in Persia. Dr. White, of Yezd, gave a stirring address on conditions and work out there. Twenty-five years ago missionary work in Persia was small—almost entirely confined to Julfa. Now the workers are stationed in towns at large distances, and hospitals and schools are established in strategic centres. In Ispahan is St. Luke's Church, the first modern Christian church in Persia filled with crowds of men and women, some once Moslems now believers in Christ, others Moslems seeking the truth.

## ECONOMIC BOARD FOR PALESTINE.

The First General Meeting of the Economic Board for Palestine was held at the offices of the Board, 7, Queen Square, Southampton Row, on October 6. Among those present were Sir Adolph Tuck, Sir Stuart Samuel, Sir R. Waley Cohen, K.B.E., Sir Samuel Instone, Mr. J. A. de Rothschild, Mr. H Van den Bergh, and Mr. J. Cowen. In the absence of the Chairman the Right Hon. Sir Alfred Mond Bart., M.P., who was detained at a Cabinet meeting, Sir R. Waley Cohen was voted to the chair. He said that he was sure that it must be a great disappointment to Sir Alfred Mond not to be able to preside on that occasion, because the Economic Board for Palestine was so largely his own idea. Sir Alfred felt that the acceptance of the Mandate for Palestine by the British Government, including as it did, the Balfour Declaration as to the establishment of a Jewish National Home in Palestine, had placed a special obligation on British Jews to stand by the Government and give them all the help they could in carrying out the extremely difficult task they had undertaken before the world and on behalf of the Jews of the world. In this, as in so many previous similar things, Great Britain had no ulterior motive, but was following her traditional policy of championing the oppressed, and that was why he thought that they were all under a special responsibility to support the Government in this matter.

It would be well that it should be thoroughly understood that those who were working on the Economic Board did so because they felt that at the present time the greatest service which they and any British Jew could render both to Great Britain and to the Jewish cause was to make the task of creating a Jewish national home in Palestine a successful task. They felt that the best way to do that was to create economically successful enterprises in Palestine, and that was the object they had in view. Dr. Weizmann, the head of the Zionist Organization, had always very strongly welcomed the formation of the Board, and the expression of his feeling was shown in the presence there on this occasion of the representative of the Zionist Organization, Mr. Joseph Cowen, whom he was sure they all welcomed very heartily, though some of them might not share all the aspirations of the Zionist Organization.

He believed himself, though he was not an authority on the subject, that Palestine had considerable natural advantages, and that the objects which the British Government had set out to achieve could be achieved ; but it was no use disguising the fact that a lot of money would be required if it was to be achieved with a degree of success. The utilization of the water-power, which at present flowed unused to the sea and was the country's most valuable potential asset, harbours, houses, credit facilities for industry and agriculture, irrigation,—these were all urgent necessities, and many of them were likely to be good investments ; but of course they all depended upon the necessary capital being available. They might get, they certainly would get, some money from the Jewish public on a non-commercial basis because of their feeling for Palestine and their desire to help in building up the country. But it was impossible to get capital on the scale they would require unless people were convinced that the enterprises on which the capital was to be laid out were sound business undertakings and that they would be properly managed. They judged that, more than anything else, from the standing and reputation of those who would be responsible for the enterprises. It therefore seemed to the Executive Committee that the right thing to do was to get together a body of men of proved capacity and judgment, men who would have the public confidence, and that only in that way would they have the chance of getting the capital they required. How far they had been successful in doing this, they would be able to judge from the list of members which had been sent to them.

Another point which they had in view was to co-operate as closely as possible with other bodies working in Palestine so as to co-ordinate all the activities that fell within their particular sphere, the economic sphere. For that reason they had been very glad to welcome on the Executive Committee members nominated by the Zionist organization and also by the Jewish Colonization Association, both of which bodies had of course experience and special knowledge which would be of great value to them. They also hoped to have the assistance and support—in fact it was more than a hope, because they had had an assurance of their support—of those in America as well as other countries who shared their views and their objects. They felt that it was only by pooling all available resources that they could hope to achieve substantial results.

He would now like just to indicate their programme of work as far as they had been able to realize it. He thought it was generally accepted that the most urgent needs for Palestine were the hydro-electric projects for obtaining power from the Jordan and other rivers, and also the question of the harbour These two enterprises were of paramount importance, because they were productive enterprises in the fullest sense of the word. They would give employment to a very large amount of additional labour, and they would have an incalculable effect upon the permanent prosperity of the country. He was not able to say much about them in detail then, but they would require a large amount of capital and a great deal of examination if the capital was to be wisely spent.

Probably everyone there had heard of Mr. Rutenberg's scheme of a hydro-electric power station to utilize the water-power that was already available. He had gone far with his negotiations, and no doubt some definite scheme would come up for consideration as soon as there seemed any possibility of getting the large amount of capital required. The question of the port was also approaching a more definite stage, and it was hoped to proceed almost immediately with the necessary preliminary boring and sounding. The Economic Board would be able to perform a useful function in connection with both these enterprises and no effort would be spared to do so.

Apart from these larger schemes, which necessarily would take some time, there were a large number of small, promising propositions which were constantly coming up there, and which they believed could form the basis of a number of industries which might develop very largely indeed. The first, probably the most immediate task that they would have before them would be to provide capital for those propositions in so far as they were sound and promising. They considered very carefully the best way of putting themselves in a position to deal with those propositions. They had decided that the most practical way of dealing with them was to form a company, to be called The Palestine Company, with a capital which he believed was provisionally fixed at about £200,000.

The purpose and object of that company would be to examines these propositions and enterprises, to invest in these undertaking and enable them to be started as soon as possible after they had been examined on the spot by their representative. The company would of course have a representative in Palestine, who would act as their agent and sit as their nominee on the boards of any companies in which they might make investments, and who would be responsible for seeing that they were efficiently managed. He would have liked to put a prospectus before the meeting, but they had not got quite as far as that yet, though they hoped very shortly to do so.

Without going into details of the various undertakings which had come before them, he might say that one of the most urgent things was, of course, to assist in house-building in Palestine. There was an appalling scarcity of housing accommodation in all the principal towns, and rents were very high. With the fall in the cost of building material, however, they hoped that it would be found possible to put up houses on an economic basis, and that they might be able to assist in this.

Another enterprise which would be of interest, and which looked rather promising, was a transport scheme for bringing corn and other produce across the Dead Sea into Palestine, and conversely for sending merchandise from Palestine to Transjordania. That seemed to them to be of great importance, because of the benefits which it would confer on the inhabitants on both sides of the river. The Government of Palestine was also interested in it, as the Company, if formed, would have a contract with them for the conveyance of mails and troops. Such an enterprise might do a great deal for the backward regions east and south-east of the Dead Sea, and that was one of the matters on which they were securing further information.

They were also anxious to help the production of articles of general use, for which the country is at present dependent on imports from outside, and there was a salt scheme before them which looked as if it would be able to take almost the first place among the schemes they were examining. The capital required would be about £40,000. They had already received promises which made them able to say now that they could finance that scheme, with the aid of the J.C.A., who had undertaken to subscribe half this amount.

Before sitting down he would like once more to emphasize the vital importance—of course it was absolutely vital to this enterprise—that they should secure a large measure of support. Their objects, their aspirations, were very plain, simple and straightforward. They were determined to test all the enterprises into which they put funds by the severe economic test of whether they could be made ecomically successful on sound business principles. He thought that an illustration of what should be their aims might be drawn from the life of Sir Ernest Cassel. He did not suppose Sir Ernest Cassel, when he put money into Egypt, originally did so solely from business motives. No thought there was sentiment attached to it. He thought in their affairs, too, there was considerable sentiment. Some were

perhaps moved more by what he might call the Nationalist sentiment; others more by the feeling that as British Jews the British Government had a call upon them. Whatever it might be, there was no doubt that if that body could develop in Palestine a number of really successful industries, they would be rendering an invaluable service to the Jewish cause and the British cause. On that account he did venture to appeal to the meeting to secure a much wider circle of friends to support their organization. They had to do work of a varied character, and if they were to do it adequately, they would need men and women of varied experience.

The proceedings terminated with a vote of thanks to the Chairman, proposed by Mr. J. de Rothschild, and seconded by Sir Adolph Tuck, Bt.

## PALESTINE UNREST.

The annual meeting of the Jerusalem and the East Mission was held in Church House, Westminster, on October 4. The Bishop of London, who presided, said that a great reform in the Church's affairs in the East had been effected by the splitting up of the diocese of Jerusalem and the enthronement of Bishop Gwynne as the first Bishop of Egypt and the Sudan. The Mission was continuing to make grants to the new independent diocese for the next two years. Further, the Mission had spent £4,000 in buying out the last claim but one in the land adjoining St. George's Cathedral, which was used as a playground for the boys' school.

Bishop MacInnes, Bishop in Jerusalem, said the year had been one of steady and encouraging work in spite of the political unrest. Zionism was a difficult subject. The friction in Palestine, he said, was largely due to the attitude of the Zionists. He had not discovered in them any desire to work for the common good of the country. He was still a keen supporter of the ideal of Zionism, though he disagreed with the methods adopted. Nine-tenths of the natives had been stirred to an active and bitter opposition to the movement, and Palestine was seething with unrest over the declared intention to make Palestine as Jewish as England was English. This ideal, in his opinion, was absolutely impossible of attainment.

## NEWS IN BRIEF.

Four members of the British Mission to Kabul are returning to India to recuperate.

King Albert has arrived at Toulouse by aeroplane from Casablanca in Morocco on his way back to Belgium.

Bulgarian Cabinet Ministers responsible for the entry of Bulgaria into the late war were put on trial on October 11 in Sofia.

British representations have been made in Belgrade and Italian in Tirana in hopes of securing a suspension of hostilities along the Serbo-Albanian frontier.

At Rabat last week, Mulay Yussef, the Sultan of Morocco, received the King and Queen of the Belgians and conferred on the Queen the Sherifian military medal.

The riband of the India General Service Medal, granted for operations against Afghanistan, 1919, may now be worn by *personnel* of the Royal Air Force who are entitled to the award of the medal.

The Indian Group of the Royal Air Force is being reorganised and will in future comprise four Wings instead of two, although the number of Squadrons will not be increased.

The President of the Vilna region, says a Reuter message from Warsaw, has invited the representatives of the British Press who have been visiting Roumania to visit Vilna.

An Abyssinian delegation headed by Kantiba Gobra, who attended King George's coronation on behalf of the late Emperor Menelik has arrived in Cairo *en route* for Jerusalem on a religious mission.

A munitions explosion occurred at a fortress near Bucharest on October 14, in which ten persons were killed and numerous others injured. One hundred and fifty trucks of munitions were blown up.

Twelve hundred wagon-loads of cereals for the relief of the famine-stricken have been bought by the co-operative society of the Communist Party of Bulgaria on account of the Central Union of Russian Co-operative Societies.

Two French airmen are now on their way to Bucharest to open negotiations for the establishment of a branch of the Paris-Prague-Warsaw air service from Prague to Vienna, Budapest, and Bucharest, and ultimately, to Constantinople.

A British Court-martial at Constantinople has sentenced to death a man named Torlakian, who was found guilty of assassinating Behoud Khan, the Azerbaijan Minister there.

Eight of the persons found guilty of killing a number of Sikhs at the Nankana Sahib Shrine, Punjab, some months ago, have been sentenced to death, eight to transportation for life, and 17 other to seven years' rigorous imprisonment.

Sir Edward Northey, the Governor of Kenya, in opening the Legislative Council, appealed for a truce on the Indian question, which, he said, would be seriously and quietly considered. He also said that no compensation could be made for losses due to currency changes.

The ex-Soldiers' Society of India and Burma has appealed for a lakh of rupees with which to found a home at Jubbulpore for old soldiers who, through wounds, weakness, or advanced age are no longer able to support themselves.

A telegram from the Officer Commanding the Malabar Column, dated October 4, states that 2,830 rebel prisoners had been dealt with, and that over 2,000 had been sentenced to punishments ranging from a whipping to two years' imprisonment.

M. Pezard, an excavating the site of the ancient Kadesh, or Kadshu, in Syria, has found a number of Roman, Greek, Syrian, and Babylonian remains, and an exceedingly interesting Egyptian obelisk bearing a carving of Pharaoh Seti I (1310-1292 B.C.).

A dispute having arisen as to the ownership of the Tomb of Rachel in Palestine, the High Commissioner has decided that if it needs repair the work may be carried out by the Jews but without prejudice to any rights which the Moslems may enjoy, pending the final decision of the Commission on Holy Places.

The *Morning Post* Rome correspondent writes (October 12): Ex-Queen Miléna of Montenegro, has at last officially abolished the Montenegrin Ministry, which for some time has been a mere farce. The Montenegrin Government has therefore ceased to exist.

The Simla correspondent of *The Times*, writing on October 13, states:—Thirty-five thousand ex-Service Indians will be collected at various camps for meeting the Prince of Wales during his forthcoming tour. The first camp will be at Poona, where over 2,000 men will greet the Prince two days after he lands. Other camps are at Ajmer, Lucknow, Benares, Calcutta, Madras Nagpur, Agra, Delhi, Jullundur, Lahore, Jhelum, Peshawar Attock, Rawal Pindi, and Dehra Dun.

## PORT SUDAN MUNICIPAL COUNCIL.

By Proclamation, dated September 15, a municipal council has been constituted under the title of the Port Sudan Municipal Council. The Council is to consist of the following ex-officio members:—The Governor of the Red Sea Province, the Senior Inspector of the Red Sea Province, the Inspector of Port-Sudan District, the Medical Officer of Health for Port-Sudan or in the event of there being no such Official, the Senior Medical Inspector Red Sea Province the Sub-Inspector Red Sea Province or in the event of there being no Sub-Inspector an executive official of the Red Sea Province to be selected by the Governor, and the Mamur of Port Sudan. Two other Government Officials may be nominated by the Governor-General, and not more than nine or less than six Members one-third of whom must be natives of the Sudan to be appointed by the Governor-General on the recommendation of the Governor from among the Notables and merchants of the municipal area.

## NOTES AND NEWS.

Devonshire Square.
E.C. 2.

**British Empire Exhibition.**

The appeal of the Prince of Wales at the Mansion House last week for the guarantee of £1,000,000 to enable the work for the proposed British Empire Exhibition at Wembley in 1923 to be started at once, as was to be expected, has met with an instantaneous response, and it seems highly probable that before he leaves England on his Indian tour he will have the satisfaction of knowing that there are, to use his own words, "a few thousand happier homes" as a result of the additional employment thus afforded. The project of the Exhibition has met with the strongest support throughout the Empire, as it is realised that, provided it is really comprehensive, it would form an invaluable medium for the development of trade between the different parts of the Empire and for making our resources better known. None of the existing buildings were quite suitable for the purpose; hence the decision to obtain the site at Wembley, where permanent buildings are to be constructed, which after 1923 will house the British Industries Fair, and, it is expected, other exhibitions.

**Palestine Harbour Works.**

If there had been any truth in the report that a contract for the construction of a harbour at Haifa had already been given, it would be difficult to explain the delay in its confirmation. The alleged value of the contract—ten million sterling—was certainly calculated to arrest attention, as it is between four and five times the total of Palestine's present revenue. I can well understand the Administration hesitating to commit itself to such a costly undertaking, however urgent the need of a harbour. When the Economic Board, a report of whose first annual meeting appears elsewhere in this issue, is able to start operations on a big scale, it may be an easier matter to contemplate an expenditure of ten millions on a single project. In the meantime, if a harbour at Haifa cannot be constructed for less, there will be a desire to examine Jaffa's claim to be made the chief port in case it should prove a cheaper enterprise. If there is any danger of Haifa being cut off from the northern markets by the incidence of railway rates, Jaffa will certainly be nearer to the centre of gravity of the Palestine market, with its Transjordania annex.

**The Greek Currant Crop.**

From Messrs. Burlumi's annual report on Greek currants, which is given in another column in this issue, it will be seen that as far as the quantity is concerned, the prospects for consumers are somewhat more favourable than last year, the estimate of the crop being 120,000 to 125,000 tons as against last year's estimate of 90,000 tons. The quality, it is stated, is, however, not up to standard, and the fruit "seems insufficiently cured, but there may be an improvement in later shipments, as early arrivals, as a rule, do not generally represent the actual quality of the crop." It is to be hoped that this anticipation will be borne out, for the British market for currants has been developing rapidly of late, but might easily be destroyed by carelessness as to the maintenance of the standard.

**No Cause for Complaint.**

I have just been reading a lengthy criticism in a local paper of the recent increases in the Irak customs duties, and frankly I am at a loss to understand the nature of the grievance unless the objection is to all taxes. If that be it, I sympathise, for I, too, am a hearty opponent of the "taxman," but I know that taxes are a necessary evil, and in increasing the customs duties the authorities would appear to have followed the only way to raise additional revenue. After all, a country to be self-supporting must pay for the privilege, and the incidence of the taxation as it stands is not heavy, especially as there is no income tax at six shillings in the pound. The alternative to an increase in the duties would appear to be an increase in the British income tax, and I can imagine what the taxpayer would say to that.

**The Trade Crisis.**

Before these notes appear we shall have the Government's proposals for dealing with the critical trade situation arising from the adverse exchanges. Chief interest is naturally centred in developments with regard to the export credits scheme. If the business community is to be satisfied the scheme put forward will have to be a great advance on that at present existing, which, as shown by figures published during the last few days, has fallen very far short of fulfilling its objects. In two years the advances made total about two and three quarter millions, and while it must be admitted that of late the rate has been considerably accelerated it is obvious that the scheme as constituted is unlikely to render any material assistance to solving the problem of trade depression.

**Export Credits.**

As I have previously emphasised, however, no export credits scheme whatever its qualities can do more than alleviate the situation to some extent, and as Sir Robert Horne pointed out last week it would be well not to entertain too great expectations of the relief that will

Digitized by Google

be forthcoming from the Government's scheme. In present conditions the authorities are simply unable to contemplate any measure which may mean in effect presenting other countries with the equivalent of the advances made. Thus the scheme will presumably be limited to countries whose financial and general economic position ensures ultimate payment. It would of course, apply to the Near Eastern countries whose exchanges are a mere travesty of the actual situation, but not to countries whose exchanges would appear to preclude the possibility of recovery within a reasonable period.

**Sir Drummond Fraser's Report.**

One of the most disappointing features of the present situation has been the failure of some of the Governments concerned to take the most obvious steps in the direction of reconstruction. It is not open to question that the Ter Meulen scheme supplies a certain way to the restoration of purchasing power in Europe, but there has been no attempt so far as I know to make use of it. The position with regard to the scheme has just been the subject of a report by Sir D. Drummond Fraser, who points out that the general condition of trade and production in the countries the scheme was designed to benefit, has improved " relatively to that in other countries," but "while private industry shows signs of improvement the state of their public finances has steadily deteriorated, and is in some cases already desperate." Obviously the more embarrassed the Governments are the less likely are they to look with favour on a scheme which requires the allocation of approved revenues for its application. It remains to be seen whether the League of Nations can persuade them of the vital necessity of this course.

**Factors in the Situation.**

An important memorandum on the trade depression has been issued by the Federation of British Industries which has appointed a committee to consider, and to consult other interests in regard to, the suggestions it contains. While of necessity it covers very familiar ground it has the outstanding merit of presenting the facts of the case very clearly. It is pointed out that there are three fundamental causes of the present position—the general impoverishment of the world, the destruction of the world's standards of values, and an alteration of the world's trade channels which may be permanent or temporary. The view is expressed that two periods of difficulty will have to be faced. In the first the exchanges and tariffs will seriously hinder international trade, and during this period commerce will have to adapt itself to the new channels " in so far as they seem likely to be permanent." The second period " will last until by a process of hard work and restricted consumption the world has replaced the stock of commodities and instruments of production lost during the war."

**The Outlook.**

The question of the restoration of stability is then dealt with, and a plea is put forward for international action in regard to the exchanges. The experience of the last year or so shows very clearly that that is the only way; the difficulty lies in impressing the need for cohesion upon the countries concerned. There are grounds for supposing that at least one country has resorted to further inflation in order to obtain an immediate though illusory trade advantage; that of itself illustrates the position. The League of Nations, if it is ever to realise the hopes based upon it, should be able to bring home to the world the need for universal action. But the fate so far of the Ter Meulen scheme scarcely induces confidence. A far from cheerful view, it may be added, is taken of the immediate outlook in the memorandum which urges that an improvement in stability can only be gradual, and that " we must anticipate a period of extraordinary difficulty and considerable distress for several years."

**Wanted—a Policy!**

That view, needs, however, to be qualified, like the statement made last week to the effect that we may expect twice as much unemployment next year. Both are possible, given a *laissez faire* policy, but given bold and determined measures based on an accurate weighing up of the position there is no reason at all why the period of economic instability should not be greatly curtailed, and something approaching a real trade " boom " be developed far sooner than most people anticipate. The memorandum, in criticising the proposals made to alleviate the position, emphasises the importance of the reduction of direct taxation accompanied by rigid economy in Government expenditure, and besides export credits schemes it is suggested that barter might be developed to a small extent, but it is recognised that great difficulties exist in this connection.

**Commentator.**

## TENDERS INVITED.

*Tenders are invited for the following contracts, and must be made by the dates mentioned.*

*(Particulars of tenders marked (D.O.T.) are to be obtained from the Department of Overseas Trade, 35, Old Queen Street S.W.1.)*

**Egypt.**

Blind Tape.—The Inspector of Buildings, West Division, 32 Boulevard de Ramleh, Alexandria, invites tenders for the supply of 2,500 linear metres of blind tape 2½ centimetres wide. October 31.

Clothing, etc.—The Lunacy Division, Abbassiya, invites tenders for the supply of clothing, bedding, furniture, hardware, slippers, brushes, and other household necessaries required for Abbassiya and Khanka Asylums for one year from April 1, 1922. November 21.

Paper and Stationery.—The Egyptian Ministry of Finance invites tenders for the supply of paper, stationery, and general office material required by the Central Stores, Ministry of Finance, for the year 1922—1923. December 15. (D.O.T.)

**Malta.**

Conveyance of Mails.—Sealed tenders will be received at the Office of H.M. Treasury, Malta, up to 4 p.m. on November 30, 1921, for the service of the conveyance of mails between Malta and a port in Sicily or the Continent of Europe for a period of six years, (*a*) twice weekly, (*b*) three times weekly, provided that either party can terminate the contract by giving six months' notice on the expiration of the first three years. Tenderers will give the following particulars:—(*a*) Days of the week and hours of proposed arrivals and departures at Malta and at specified ports abroad. (*b*) Gross and net tonnage of steamers, speed, passenger and other accommodation. (*c*) Amount of annual subsidy required. (*d*) Date of commencement of service. Copies of conditions of contract and forms of tender may be obtained on application at the Treasury Office, Malta, or to the Crown Agents for the Colonies, 4, Millbank, Westminster, London S.W. The Government will consider any other conditions which tenderers may propose. No tender will be considered unless it is signed by the tenderer and by a suitable guarantor, residing in these Islands, for the due performance of the contract, and unless it is accompanied by a deposit of £500, which in the case of unsuccessful tenderers will be returned as soon as a contract is completed within the term fixed in para. 8 hereof. In the case of the successful tenderer the deposit shall be returned after the signature of the contract. The tenderer whose offer is accepted shall forfeit the deposit of £500 should he or his surety fail to sign the contract within eight days from the date of an intimation given to them to that effect, and fail to deposit with the Government of Malta, within eight days from the date of acceptance of the tender, a sum of two thousand pounds (£2,000) as security for the due performance of the contract.

REPORTS FROM OUR OWN CORRESPONDENTS.

## EGYPT.

*Cairo, October 4.*

**The Market Position.**

A fortnight ago I reported that the commercial barometer was registering a change for the better following on the rise in the price of cotton. During the ensuing two weeks cotton has soared steadily to a height of nearly 60 dollars, but the commercial community, remembering the sharp and bitter lesson inculcated during the aftermath of the last boom, is making haste very slowly. Retail buying for the winter has received a temporary set-back, but this is due to the sudden reanimation of the dying summer and not to any protest against the prices, which have fallen considerably since the consumers as a whole decided to economise. But before there can be any decided increase in business generally retail buying must obtain in considerably greater volume than during recent months, as almost everyone has large stocks on hand, and though not sufficient to supply a substantial demand at least large enough to induce a feeling of caution before importers book up heavily abroad. The winter season is upon us, however, and the stage is set for a buying revival. As soon as it materialises Egypt will be a comparatively happy hunting-ground for the manufacturer with stocks to sell.

*Cairo, October 7.*

**The Cotton Crop.**

The Ministry of Agriculture announced yesterday morning that the preliminary estimates of the coming cotton crop had been completed and that the estimated yield would be about 3,440,000 kantars. This means just under 700,000 bales. It is, as an annual yield, very low. But it has proved higher than was anticipated. The general expectation has been that the yield would not be more than about 3,000,000 kantars, and this assumption has led to a certain amount of Bull operations on the Bourse at Alexandria. In the ordinary course of events such a rise in the price of the staple commodity would immediately have quickened business; but the very regularity and speed of the rise is awakening the suspicions of business people who have been caught before in the vortex of a falling market. No one is able to predict with certainty how high cotton is going to go, or when the bottom will fall from the market. Therefore, the rest of the commercial community is standing by, patient and cautious, until a glimpse is obtainable of the basis of the future. It is retaining its cash in hand for payment of liabilities if things suddenly go bad, or for quick investment if the rosy tints develop to brighter prospects. There is also the fate of the political negotiations to be considered. A high cotton-price and a possible disturbed country are too risky for definite plans to be matured.

**Tobacco Duties.**

At the last meeting of the Council of Ministers it was decided that the import duties from October 3 on tobaccos coming from countries with which special arrangements with Egypt have not been concluded would be fixed as follows:—(a) L.E. 0.820 mills. per kilogramme on leaf tobacco; (b) L.E. 0.920 mills. per kilogramme on stripped tobacco; (c) L.E. 1.020 mills. per kilogramme on cut, pressed, and shredded tobaccos and on cigarettes. The import duties from October 3 on tobaccos accompanied by a certificate from a country having a special agreement with Egypt are fixed as follows:—(1) L.E. 0.800 mills. per kilogramme on leaf tobacco; (2) L.E. 0.900 mills. on stripped tobacco; (3) L.E. 1.000 mills on cut, pressed, and shredded tobaccos and on cigarettes. Without a certificate of origin these tobaccos cannot be imported without paying the import duties fixed in the first paragraph. The duties on cigars of every quality are fixed at L.E. 1 per kilogramme The duties fixed by this decree are to be levied on all tobaccos which have not paid import duty by October 3. Tobacco on which import duty has been paid, and which will be exported in the form of cigarettes from December 3, 1921, will be subject to a drawback at the rate of L.E. 0.600 mills. per kilogramme of tobacco contained in the said cigarettes.

## ROUMANIA.

*Bucharest, October 6.*

**The New Budget.**

The Ministry of Finance is now working on the budget for 1922-3, and in this connection has sent a circular letter to the different Government Departments to the effect that their respective budgets should be sent in before November 1, and should show a further reduction of 25 per cent on those of the present year.

The Ministry of War, however, has already advised the Ministry of Finance that in order to carry out the Army requirements a further sum of 7,200 million lei will be needed above the sum provided by the budget. This sum it is proposed to spread over five years, starting from this year, and is intended primarily for army buildings, equipment, &c.

**The Swiss Loan.**

Despite repeated rumours to the contrary, it is now practically confirmed that M. Titulescu has obtained from the Swiss Government a loan of 40 million Swiss francs. The conditions of this loan are not yet known, but from semi-official quarters it is reported that the Roumanian Government will receive 5 million francs in cash, and 25 million francs in goods, while with regard to the remaining 10 million francs nothing definite has yet been decided. The loan will probably be redeemable within five years, and will bear an interest of 8 per cent. per annum.

**Traders and the Exchange.**

In view of the extremely critical situation of merchants who have obligations to meet in foreign currency at the present rate of exchange, merchants' unions and associations throughout the country have made a written appeal to the Government through their representatives to take the necessary measures to protect them from foreign creditors who insist on payment at the present rate of exchange. The merchants explain emphatically that they do not wish for a moratorium, but they urge that in cases where creditors will not grant an extension of time they should be allowed to meet their foreign bills at a reasonable official rate of exchange fixed by the Government. In this connection the Minister of Justice has been authorised by the Ministers' Council to find a legal solution by which merchants' bills payable in foreign currency can be extended.

**New Import Regulations.**

A few days ago the Government decided to allow the free importation of all goods, proportional taxes being applied to certain luxury goods. In view, however, of the objections raised to this measure in different quarters the Government has now completely prohibited the importation of certain luxury articles, such as champagne, and other wines, liqueurs, caviare, fine preserves, powders and powder puffs, textiles containing more than 50 per cent. of silk, perfumes, and all cosmetics. Other luxury goods may be imported, but the duties and luxury taxes on them will be considerably increased For articles such as rings, earrings, expensive furs etc. the luxury tax will have to be paid in "gold lei" according to the rate of the day.

**Restrictions on Exports.**

The following products may not be exported:- Iron ore and cast-iron, copper, brass, and zinc in every form, coal and lignite, flax and hemp in every form, excepting finished articles, sacks, wool, fish, milk and its by-products excepting sheep cheese, poultry, paper

Digitized by Google

in every form excepting printed and paper articles, caustic soda, paraffin, crude oil, fuel oil, grease and other mineral oils, oak beams and staves, rape-seed, iron and oak barrels, " Podolia " oxen up to six years old, other oxen up to four years old, cows up to eight years old, bulls, buffaloes, horses, sheep, mules, asses and goats, pressed fodder with the exception of oats, barley, and maize.

The following goods may be exported :—Wheat and rye and their by-products, excepting flour paste, gold and silver.

The following products may be exported by special permit provided home consumption has been satisfied :—Pigs, smoked, dried and prepared meat, bacon, lard and animal fats, bones, wool, flax and hemp, rags, torn paper, vegetables, cheese, and all kinds of preserved vegetables, cement, celluloid, old iron, Pyrites of iron, Manganese of iron, oak and beech railway sleepers, oak bark, glue, starch, finished wool articles and carpets.

**Miscellaneous.**

The Roumanian War Office has concluded a convention with the French Government by which the latter in exchange for military uniforms supplied to the Roumanian Army will receive a certain quantity of oil products. So far 24,585,958 kilogrammes have been shipped to France, the price being fixed at 750 francs per ton. This export is free of taxes.

The Soviet Government has asked the Roumanian Government to allow a Russian Mission to enter the country for the purpose of buying cereals. Their request has been granted.

It is hoped that the Borcea bridge on the Bucharest-Constantza railway line will be repaired before the end of this year. The port of Constantza has suffered considerably on account of this transport difficulty.

The Government has now fixed the price of gold produced from the State mines at 27,000 lei per kilo. The export tax and commission on exportable gold has been fixed at 3,000 lei per kilo.

## BULGARIA.

*Sofia, October 9.*

**Control of Cereals.**

As many stories have been current concerning the intention of the Government to requisition fresh stocks of flour and other cereals a communique was issued yesterday by the Ministry of the Interior to the effect that the Government had no intention of restricting in any way the free trade in cereals and would not requisition any further stocks of flour. The communique stated that the requisitions of flour that had already taken place were necessitated by the need for accumulating a certain reserve of flour for the use of the non-producers of cereals, in view of the danger of shortage of bread caused by the introduction of free trade, and the resulting haste of the grain dealers to export as much as possible. This announcement should reassure those traders who feared that their trade would be interfered with by the Government.

## EGYPTIAN COTTON SHIPMENTS.

Particulars are to hand of the shipments of Egyptian cotton from Alexandria during the season ended August 31, last. The total export was 445,415 bales, equal to 3,400,500 kantars. The chief importing countries were :—England 223,292 bales, United States 51,230 bales, France 41,257 bales, Switzerland 31,349 bales, Germany 27,355 bales, Italy 21,712 bales, and Japan 18,686 bales.

The following is a list of the principal exporters with the number of bales shipped, the figures in brackets representing shipment to England :—Peel and Co., Ltd., 53,543 (32,587) ; Carver, Brothers & Co., Ltd., 51,036 (23,721) ; Choremi Benachi and Co., 43,358 (18,958) ; Reinhart and Co., 31,127 (7,537) ; Commercial Company of Egypt, 24,087 (13,854) ; Planta, J. and Co., 22,626 (7,660) ; Eastern Export Company S.A., 21,775 (18,437) ; Gregusci C. and Co., Anc., G. Frauger and Co., 17,561 (4,013) ; Escher, W., 16,430 (2,025) ; Tamvaco, Choremi and Co., 15,368 (2,649).

## INDIA'S FISCAL POLICY.

The following resolution, on the subject of the appointment of a Fiscal Commission, has been published by the Commerce Department of the Government of India :—

With the approval of the Secretary of State for India, the Government of India has decided to appoint a Fiscal Commission with the following terms of reference :—To examine, with reference to all the interests concerned, the tariff policy of the Government of India, including the question of the desirability of adopting the principle of Imperial preference, and to make recommendations.

The following gentlemen have agreed to serve on the Commission :—President, the Hon. Sir Ibrahim Rahimtulla, Kt., C.I.E. ; Vice-President, J. M. Keynes, Esq., M.A. C.B., Fellow of King's College, Cambridge ; members, T. V. Seshagiri Ayyar, Esq., M.L.A. ; Ghaneshyamdas Birla, Esq., M.L.C., of Messrs. Birla Brothers, Ltd., Calcutta ; J. C. Cojajee, Esq., B.A., LL.B., Professor of Economics, Presidency College, Calcutta ; The Hon. Sir Maneckji Byramji Dadabhoy, Kt., C.I.E. ; Jammadas Dwarkadas, Esq., M.L.A. ; The Hon. Sir Edgar Holberton, Kt., C.B.E. ; R. A. Mant, Esq., C.S.I., I.C.S. ; Narottam Morarji, Esq., of Messrs. Morarji, Goculdas and Co., Bombay ; C. W. Rhodes, Esq., C.B.E., M.L.C., of Messrs. Hoare, Miller and Co., Calcutta ; Sir M. De P. Webb, Kt., C.I.E., C.B.E. The Vice-President will arrive in India about the beginning of February. Mr. H. G. Haig, I.C.S., has been appointed Secretary to the Commission, and Mr. E. F. Rogers, officer on special duty in this department, will be Assistant Secretary.

The Commission will assemble at Bombay in the first half of November, and will visit the more important commercial and industrial centres of India for the purpose of taking oral evidence, completing this part of its work early in March, 1922 ; it will submit its report to the Government of India as soon thereafter as possible. Various associations and individuals will be invited, either directly by the Commission or through Local Governments, to forward their views in writing; other associations or individuals wishing to represent their views should apply to the Secretary, Indian Fiscal Commission, Simla, who will furnish them with a list of questions to which answers are required. The Commission will decide, after a perusal of the written replies, which witnesses will be examined orally. The Government of India trust that Local Governments and administrations will afford the Commission all the assistance which it may require, and will comply with any request for information which may be addressed to them by it.

The traffic receipts of the Egyptian Delta Light Railways for the 10 days ended September 20 amounted to £E10,069 total for year £E159,397. For the corresponding period of last year, receipts amounted to £E14,959 ; total for year £E215,624.

## THE FUTURE OF COTTON.

### Will a Substitute be Discovered?

*By E. C. de Segundo, A.M.Inst. C.E.*

In the year 1907 a conference of American and European cotton manufacturers was held in Atlanta, Georgia, at which it was stated that the American Cotton Belt could be relied upon to produce all the cotton required by the world's ever increasing demands, and that it was wholly unnecessary to think of opening up new cotton fields in other parts of the world.

The planters had not reckoned with the boll weevil. In 1907 this insect, which first crossed the Rio Grande in 1892, had spread over rather more than one quarter of the area comprised by the cotton belt. To-day, it ravages the whole area of some 750,000 square miles, and, although the serious menace to this cotton pest was recognised 20 years ago, the strenuous efforts and unremitting researches and investigation of the United States Department of Agriculture have been wholly unsuccessful in discovering any practical remedy for the depredations of the Mexican boll weevil, or even means of appreciably alleviating the results of its activities.

In view of the glut of cotton in 1919 arising from various causes more or less directly connected with the economic after-effects of the war, a determined campaign was entered upon in the United States for a reduction of 50 per cent. in the area planted to cotton this season as compared with 1920. The area planted this season was about 25,000,000 acres against about 35,500,000 acres in 1920, or an actual reduction of about 30 per cent. Under reasonably normal conditions this acreage would be expected to produce a crop of between 9,000,000, and 10,000,000 bales, instead of which the latest Government estimate places this season's crop at 6,500,000 bales, and other estimates place it as low as 5,800,000 bales. Moreover, in the opinion of certain experts, a not inconsiderable proportion will be found to be unusable.

We thus have to face the fact that the *effective* American crop this year will probably be under 6,000,000 bales, corresponding to an effective yield per acre of about 120 lb. on an acreage of 25,000,000, an alarmingly low yield for the United States. Even taking the Government crop estimate of 6,500,000 bales, the yield per acre would work out to only 130 lbs. per acre (assuming all bales to be 500 lb. bales), a much lower figure than any of record.

But it must be remembered that the term "yield per acre" is not necessarily a true criterion of productivity. Many other factors enter into the question, and it is worthy of note that the variation in the yield per acre during the years of record before 1892 (when the boll weevil first appeared in the United States) is not appreciably different from that during the years of since 1892, *with the exception of this season.* It would appear that this season's abnormally low yield must be attributed almost entirely to the increased activity of the boll weevil,—because weather conditions are stated to have been, on the whole, by no means abnormally unfavourable.

During the war, the proportion of the American crop spun in American mills increased greatly. The following figures are taken from Shepperson's "Cotton Facts" for 1920:—

| Year | Crop in bales | Proportion spun in American mills. |
|---|---|---|
| 1915-16 | 12,862,000 | 53 per cent. |
| 1916-17 | 12,737,000 | 55 ,, |
| 1917-18 | 11,865,000 | 59 ,, |
| 1918-19 | 11,360,000 | 48 ,, |
| 1919-20 | 12,252,000 | 50 ,, |

It is clear that if the domestic consumption in the United States continues to be anything like 6,000,000 bales per annum, and if the ravages of the boll weevil and other cotton pests increase in intensity, or even remain as at present, the proportion of the American crop available for export may languish and perhaps vanish altogether. Opinions seem to be divided as to the resultant benefit to the United States, but there can be but one opinion as to the immediate effect upon the world in general.

In view of the conditions and circumstances, economic and other, which have come into existence in the United States during the last fifteen years, it is not improbable that in the near future the United States may find difficulty in raising more cotton than will suffice to satisfy the home demand for spinning, and will recede more and more from the position she has so long held as the premier cotton-growing country of the world. China is stated to have produced 6,000,000 bales this season.

The prospect of cotton becoming a dear textile raw material instead of one of the cheapest, as it has been for two generations or more, is one which can only be viewed with the gravest apprehension, because cotton is a necessity of our civilised life. There are two alternatives:—(1) New cotton fields must be opened up, or (2) a substitute for cotton must be found.

As regards the first alternative so much has already been said and written in these columns and elsewhere that it were a work of supererogation to add more than a brief comment. If the greatest of our export trades—that in manufactured and half-manufactured cotton products—languishes and dies, the blame can only be laid at our own door. For years past far-seeing men have unceasingly drawn attention to the precarious basis upon which our great industry rests; to the folly of remaining dependent upon one source for some 80 per cent. of the required raw material; and to the unlimited possibilities of cotton cultivation within certain countries comprising the British Empire, notably India and the Sudan.

As so frequently happens, those in authority—or rather those who should act in that capacity—appear, until quite recently, to have been blind to the increasing gravity of the cotton situation as affecting the Lancashire spinning industry.

Although the artificiality of our conditions of life in this country due to importing some 70 per cent. of the foodstuffs we need must have been patent even to the average intellect, and the supreme necessity of maintaining and increasing our export trade in order to be able to continue to pay for our food must have been equally obvious, no adequate steps have been taken to safeguard the supplies of raw materials for an export trade the value of which in pre-war years had reached about £114,000,000 per annum.

We complain about our "loss of trade." The simple fact is that we sit down calmly and suffer others to take it from us.

As regards the second alternative, it does not seem to be generally realised that from 90 to 95 per cent. of the world's cotton crop involves the concomitant production of a character of cottonseed, which, after ginning, retains a not inconsiderable quantity of short residual cotton fibres, which, although too short for spinning, constitute a valuable raw material for the production of cellulose. Mr. C. F. Cross, F.R.S., whose work in connection with the scientific investigation of cellulose and its derivatives is known throughout the scientific world, stated many years ago to the present writer that posterity would look back upon our age as the cellulose age. Among the more important cellulose derivatives, industrially speaking, may be mentioned viscose. Viscose (the discovery of which may justly be attributed to Mr. Cross) is the basis of one of the most successful processes for the manufacture of artificial silk. This industry, which is, comparatively speaking, of recent origin, has progressed by leaps and bounds. The battle between wood and cotton as a raw material for the production of viscose has been fought out, and has resulted in the victory of cotton—apart from which, the available supplies of wood pulp in relation to the demand for news and other cheap papers—are rapidly becoming smaller and smaller.

For the production of viscose, length of staple in the

Digitized by Google

cotton fibre is of secondary importance. The primary consideration is cleanliness and freedom from the extraneous matter always found in cottonseed to a greater or less extent. It is a feature of a recently introduced machine (referred to some months ago in these columns) that the removal of these residual cotton fibres from the cottonseed is effected in a manner which avoids the intrusion of the dirt and *débris* present in the cottonseed into the fibre product delivered by the machine. Thus a very large supply of suitable material for the production of viscose is rendered potentially available, and active steps are now being taken for the establishment of these machines in Great Britain, the United States, India, and in other cotton growing countries.

In view of the great improvement in the processes involved in the manufacture of artificial silk which have been introduced from time to time in recent years, it does not seem unreasonable to suggest that, given efficiency of organization and management, it should be practicable to produce an artificial fibre from the residual fibres of cottonseed which would form an efficient substitute for staple cotton, and compare favourably in price, at least, with that of superior cottons.

It may be that the next generation—even perhaps the present generation—will be clothed in artificial silk shirts and other garments now spun from cotton.

## THE SUDAN IN 1920.

### A Prosperous Year.

The fall in the price of cotton and other adverse economic developments came too late to have any material effect on the general position in the Sudan last year, and the review of conditions there in the recently published Blue Book, the first section of which was dealt with in these columns last week, shows the country still in the enjoyment of the flood of prosperity that developed early in the war and was enhanced in 1920 by what are described as "unprecedented harvests."

An improvement was again recorded in the country's finances, the revenue again reaching a record figure. The revenue amounted to £E4,392,000, and the expenditure to £E3,532,000, there being thus a surplus of £E860,000. It is pointed out, however, that this sum cannot be regarded as a real surplus, as services only of a recurrent nature are provided for in the Budget, and that further—

this sum cannot be regarded as representing a normal development of the revenue of the country, as it is in a large measure attributable to causes that may not be expected to recur. Apart from the uncertain nature of a revenue largely derived from agricultural sources which are dependent upon a varying rainfall, upon freedom from insect pests and fluctuating market prices, there is the general uncertainty of the economic future throughout the world which not only calls for great caution in sanctioning current expenditure, but makes it necessary to exercise the strictest economy and to do all that is possible to build up the reserves to meet future demands.

At the end of 1919 the unallotted balance of the reserve fund stood at £E119,500, to which had to be added the Budget surplus of £E272,279 and £E48,783 from sales of land and other receipts, giving a total of £E440, 562. The allocations for 1920, the principal of which was £E121,500 for railway and steamer services, left an unallotted balance of £E121,000, so that with the addition of various receipts amounting to £E3,500 and the surplus of £E860,000 the amount available for allotment for the present year was no less than £E984,500. The Budget estimates for 1921 showed a substantial increase on those of 1920, the totals being £E4,026,000, and had the conditions obtaining in 1920 continued, history would doubtless have repeated itself and the Sudan would have had another substantial surplus. Of course these vicissitudes are bound to occur from time to time in the case of a country dependent on agriculture. Progress cannot be continuous, and a setback such as the Sudan has since been experiencing will only check the country's development.

Turning to commerce there was a large increase in 1920 both as regards imports and exports. Imports rose from £E4,805,745 to £E7,006,865, while exports advanced from £E2,740,759 to £E4,712,652, but these increases do not represent the development of trade owing to the inflated prices. Actually imports in 1920 were greater than before, but to nothing like the extent suggested by the above figures, while as regards exports an average trade was done in grain, gum and hides, but exports of cotton developed, and it was the phenomenal rise in the price of this commodity that was mainly responsible for the increase in value. It will be noted that there was once again a large trade balance against the Sudan, the figures being £E1,930,894. This is the invariable experience of all countries during the period of development, and while as in the past, circumstances may bring about a temporary improvement in this respect it may be anticipated that it will be a considerable time before the Sudan is likely to be in a position to count upon being a favourable trade balance.

From the statistics that are given it would appear that Egypt is not maintaining its position as the medium of trade between the Sudan and foreign markets. The Red Sea ports obtained 58 per cent. of the imports and 56½ per cent. of the exports as against percentages for 1919 of 54 and 49 respectively. The position is best illustrated by the fact that while the foreign goods imported from and through Egypt were 49 per cent. higher than in the previous year those imported direct were 66 per cent. higher.

As regards the agricultural position the report describes the year as "one of moderate areas of cultivation and of excellent prices for all agricultural produce." The total area of crops amounted to about 1,900,000 feddans, an increase of 220,000 feddans which was practically confined to rain cultivation. It is pointed out that the comments "apply to the cultivation dependent upon the 1919 rains and flood, but no review of the whole year would be complete without reference to the abnormally favourable rains and floods which have been experienced and which will provide in next year's statistics a record for the Sudan."

Much interesting information is contained in the report on the provinces. We give the following extracts.

*Bahr-el-Ghazal.* The crops for the 1919-20 season were excellent. The province, however, cannot benefit by a good season as it should because of the impossibility of transporting a large quantity of grain from one district to another.... The reason for the difficulty of transport is that the Dinka tribes detest all forms of work, and in particular carrying.

*Nuba Mountains.* Mechanical transport was introduced some three years ago on the road from Tonga on the White Nile to Talodi, and has proved a great boon . . . .

*Blue Nile.* The feature of the labour problem which is peculiar to this province is that native cultivation and the large cotton growing estates both require a large amount of labour for cleaning at the same time. Consequently the price of labour during, and directly after, the rains goes up to any-thing between 30 and 50 piastres a day. The harvesting of the dura also coincides with the first pickings of the cotton, and there is another rise in the price of labour. Between the two periods the price of labour falls to perhaps 5 or 8 piastres a day.

*Upper Nile Province.* An attempt is being made by the Soudan Cotton, Fuel, and Industrial Development Company (1919), Limited, to exploit the great agricultural resources of this province, and one or two considerable areas have been taken up. There is no difficulty in the production of the crops as experiments have shown that excellent cotton and jute substitutes can be grown, but the principal obstacles that have to be overcome are the labour and fuel problems.

*By our Engineering Representative.*

### A Big Tipping Waggon.

An exhibit at the Commercial Vehicle Exhibition at Olympia to which I was unable to refer last week owing to pressure of space was the Star 50 cwt. tipping waggon, shown complete with tipping gear. It has a 20-25 h.p. engine, water-cooled, with aluminium cast and tubular radiator. Lubrication is by forced feed to all parts of the engine, and every effort has been made to render this waggon immune against the effects of rough usage. The wheelbase is especially short to allow of the lorry being weighed on a standard weighing machine, and altogether it may be said that it is particularly suitable for the haulage of goods where the weighing of every load is essential. This firm also showed a 30 cwt. box delivery van of which the specification is as follows:—20-25 h.p. engine, water cooled, with aluminium cast and tubular radiator. Pump circulation. Lubrication by forced feed to all parts of the engine. Magneto ignition. Zenith carburettor. Four speeds forward, one reverse. Ferodo lined clutch. Live axle, worm drive. Deep section pressed steel frame. Tyres and wheels; Sankey pressed steel wheels, single front and twin rear, interchangeable, detachable, fitted with 880 x 120 Dunlop pneumatic tyres, with spare wheel and tyre. Wheelbase 11ft. 6in. To carry a useful load of 30 cwt..

The body is of the large box type, having a carrying capacity inside of 8 feet in length, 5 feet in width and 5 feet 2 ins. high.

### Front Wheel Brakes.

Those engineers who for so long have advocated the use of brakes on all four wheels of motor vehicles will be interested to hear that nearly two dozen different makes of cars, exhibited recently at the big Paris automobile show, were equipped with front wheel brakes. The innovation is the more interesting in view of the fact that hitherto the leading French engineers have expressed adverse opinions as to the practice. There is, of course, a certain difficulty in ensuring even action; the transmission of the braking power to the front is a matter of some little difficulty, but, however, it may be in practice, in theory four-wheel braking is the best possible procedure.

### Low Temperature Carbonization.

In view of the important developments which it is hinted are about to occur in connection with the process known as the low temperature carbonization of fuel it may be of some interest to recall the principal features of a gas-works equipped, some 12 years ago, with the plant in its then state of development. In this way we shall be better able to see the changes and developments made in the process.

The plant was erected at the Plymouth Gas Works, by permission of Sir Joseph Bellamy, who agreed to take 500,000 cubic feet of gas daily from the new equipment in order to augment the resources of the Plymouth undertaking.

The low temperature plant consisted of three units each 52 feet long by 13 feet wide, spaced a distance of 15 feet apart.

Each unit was nominally capable of dealing with 56 tons of coal daily, it being estimated that this quantity would produce 35 tons of smokeless fuel and 280,000 cubic feet of 20 c.p. gas. The plant had only been in operation a short time before it was found that these figures could be exceeded. In weight nearly 60 tons of fuel passed daily through each of the stills, resulting approximately in 40 tons of smokeless fuel and 320,000 cubic feet of gas.

At that date each unit consisted of 32 vertical bunched stills, each bunch consisting of 12 tubes cast into a single block. The stills were fed from above by a travelling hopper, and after a period of 3½ hours' distillation were discharged into a chamber where the contents were quenched. The smokeless fuel was then collected and carried by an electrically driven continuous conveyor to the bins where it was stored. The stills were heated by gas obtained from a small producer plant, and even at that date the control over the temperature was so complete that it could be regulated within very narrow limits to 800 degs. Fahr. at every point.

After leaving the vertical retorts the gas generated passed through a hydraulic main of special construction to the condensers and exhausters, and from thence, after measurement, to the scrubbers and purifiers. It is interesting to note that the comparatively small low temperature plant was able to carbonise, in two of its units, more coal per day than the high temperature plant of the gas works with its 72 retorts.

### A Rolls-Royce Success.

I am informed by Mr. Claude Johnson that the post-war Rolls-Royce has just gained a conspicuous victory in the Côte du Phare Hill Climb at Biarritz, the details of which are contained in a message from the firm's Spanish representative. The car, a post-war Rolls-Royce, driven by Mr. de Salamanca, has beaten all cars in all classes, including racing cars. The Côte du Phare is 500 metres in length, possesses 3 sharp turnings, and the start was made from a stand-still on a 6 per cent. gradient. The Rolls-Royce car was travelling at the rate of 63¾ miles an hour at the finish, and actually climbed the hill in well under 26 seconds.

This success calls to mind a similar success by the Rolls-Royce car gained by the firm's Spanish representative in 1913, when a standard Rolls-Royce car won the Spanish Grand Prix over a tortuous course of 194 miles in the Guadarrama Mountains, at an average speed of 54 miles an hour.

### An Oil Circuit Breaker.

An opportunity has just been afforded me of examining a new type of automatic oil-break circuit interrupter, suitable for use on circuits carrying up to 30 amperes at 600 volts, either alternating or continuous current. Of course a very large number of circuit breakers of various types, as direct acting with inverse time element, have been placed on the market, and are in general and satisfactory use, but the designers of the new appliance referred to above evidently consider that there is room for one of simpler form or which would possess some equally valuable advantage and so they have placed the new piece of apparatus on the market.

I was particularly struck with the principles of the mechanism and the way in which these have been utilised and the finished articles developed from the initial idea. Actually, a very fine piece of apparatus has been placed at the disposal of the electric power engineer, and I anticipate hearing that it has at once leapt into popularity. I know stations where apparatus of a greatly inferior type is being used.

The total weight of the device is 28 lb., consequently it is quite easy to handle and to fix in position, the design I have seen being of the wall type. The maker claims that it embodies several novel features, and, although it is now some years since I was in charge of a central station I was able to see at a glance that these claims were justified. The trip mechanism is extremely simple and it will come as a surprise to most of my readers to hear that no use is made of the worked-to-death toggle principle. There is very little wear likely to occur in the tripping gear and such as is unavoidable will not interfere with the efficiency of the action. A further feature is that the moving contacts are at their maximum speed at the moment they leave the stationary contacts. The no-volt coils as well as the trip are positive in action and the design is such that these cannot be affected by vibration. A further point which will appeal to all users is that the parts are interchangeable. Incidentally, the switch case is of cast iron, and the oil tank of pressed steel, with interlocking gear. As customary with these appliances the handle is loose in both the on and off position and as mentioned an inverse time element is supplied if required. There are ample means for adjustment provided in connection with the overload trip and inverse time element device, and an ammeter can be supplied in conjunction with the circuit breaker if required.

# COTTON & COTTON GOODS.

## MANCHESTER REPORT.

*(From Our Own Correspondent.)*

*Manchester, Friday.*

At the commencement of the week the tone of the market was firm, but during the past few days a sagging tendency in raw cotton rates has prevailed which has naturally caused a certain amount of falling off in business. The lowering in values is generally understood to be the result of the big depreciation in the German exchange rates. Buyers on the whole have adopted a policy of caution, but at the same time a few transactions of large weight have been mentioned, these however have only been isolated cases. With regard to the cloth demand for the outlets of the Near East buyers for Egypt have not been altogether idle, and some encouraging transactions have taken place in a variety of fabrics. A little more demand has been about for the Levant, but not much business has been done for Constantinople. In the yarn section Bolton spinnings have been very quiet, and the offtake has been patchy. In sympathy with the drop in raw cotton rates, prices have favoured buyers. Quite an extensive cloth inquiry has been about for India, but it is realised that developments with regard to that outlet are impossible until the Gandhi boycott on foreign goods is removed. Still a few encouraging transactions in mulls, dhooties, and jaconets have taken place for Calcutta and Madras, and a few sales of shirtings have been registered for Karachi. Shippers to China have not reported any increase in business, and sales generally have not been of any weight. Not much business has been done for the republics of South America. The prospects of the market at the moment are rather bright, but before a larger business can be registered raw cotton rates will have to show more stability and have a hardening tendency instead of declining.

## LIVERPOOL REPORT.

Messrs. Reynolds and Gibson report as follows for the week ended October 13:—The past seven days have been comparatively quiet compared with other weeks we have witnessed recently, and the total sales show a considerable falling off. This is hardly surprising, everything considered. Spinners have been buying freely of late. There is, as yet, but little improvement in the home trade for yarns, and there is still a considerable quantity of below-cost-price manufactured goods to be disposed of before the way is really clear for fresh business based on current prices of the raw material. Then there is the all-important factor of the movement of the American crop. America has been a big buyer of Egyptian cotton recently, but with her own crop coming into sight, there is naturally a disposition to see what can be had out of it—we refer, of course, to staple—before resuming buying in Egypt. It was largely this cessation of buying, combined with a certain amount of "long" liquidation in Alexandria, which has caused the present decline. This decline has come at an unfortunate time, and confidence amongst buyers has again been shaken considerably, and just when it was beginning to show signs of recovery. The demand here has been of a fairly general character, with the usual preponderance in favour of Sakellaridis—fully good fair to good. C.i.f. business has been conducted on quiet lines only, spinners in most cases finding it cheaper to purchase here on hand-to-mouth principles rather than pay the prices asked for in Egypt. Manchester reports, except those dealing with home yarns continue favourable, and always providing that steady markets ensue, there is good reason to expect a recrudescence of buying before very long. Total sales 2,300 (includes 550 bales Sudan). Quotations of Sakellaridis are reduced ¼d. per lb., those of Upper and Brown are unchanged on the week.

## COTTON INDEX RISING.

In the October issue of his Cotton Trade Circular published this week Mr. Frederick W. Tattersall, of Manchester, gives the index number for the general average of current cotton prices as 256, which compares with 219 for the previous month and 161 in the middle of March last when the downward trend of values was arrested. Twelve months ago the general average was 381.

Taking the price ruling on July 31, 1914, as a basis of 100 in each case, the figure for American cotton is now 220 and that for American yarn 244, which show advances on the month of 25 and 23 points respectively. Cloth prices, however, have only risen 14 points—from 198 to 212—but the gain in Egypt cotton from 253 to 338 is most marked. Values in Egyptian yarn have also appreciated to the extent of 36 points to 265.

The advance of 37 points in the general average on the month is attributable to the increase in the rates for raw cotton as a result of the recent unfavourable advices relating to the growing crops in the United States and Egypt. This feature has stimulated buyers in the Manchester market to greater activity, and Lancashire producers of cotton yarn and cloth have secured more orders than for many months. At the present time the prospects may be considered encouraging.

## LANCASHIRE COTTON TRADE.

### Spinning Company Dividends Increased.

The stocktaking reports for the September quarter of 76 Lancashire cotton firms that carry on the spinning only of cotton yarns have been analysed by Mr. Frederick W. Tattersall, of Manchester, and the results along with the comparative figures for previous similar periods, are published in his Cotton Trade Circular issued last week.

Of the 76 companies, which have a total paid-up ordinary share capital of £8,596,450, no less than 43 have experienced such a lean time that the directors have been unable to recommend the payment of a dividend to the shareholders. The remainder, however, have fared better, two companies making a distribution at the rate of 5 per cent. per annum, one 7½ per cent., fifteen 10 per cent., one 11 per cent., two 12½ per cent., two 13 1-3 per cent., one 15 per cent., eight 20 per cent., and one 24 per cent. per annum.

A satisfactory feature revealed by the summary is that the average dividend per company for the three months, which works out at 5.65 per cent. per annum, is an improvement on the average for the same concerns for the preceding quarter ended June 30, when the figure was 5.10 per cent. per annum.

Some idea of the extent of the trade depression can be gauged from the fact that the average for the September 1920 quarter was 25.77 per cent. per annum; December 1920, 19.92 per cent. per annum; and March 1921, 8.10 per cent. per annum.

# Near East Markets.

## LONDON PRODUCE REPORT.

### Prices declining.

Coffee.—The position is practically unchanged. Costa Rica has dropped 4s. to 126s.; but Indian is unchanged at 100s. Nairobi is the same at 106s., while Jamaica is unchanged at 140s. Futures are :—December 50s.; March, 51s.; May, 51s. 9d July 52s. 6d.

Sugar.—Home refined has been in fair request at unchanged rates. White Mauritius is 6d. down at 46s. 6d.; while Czecho-Slovakian has shed 3s. at 20s. 6d. West Indian crystallised is the same at 46s., while white Java is 6d. down at 48s. 6d. Beet sugar is 3s. 9d. up at 22s. 6d.

Oilseeds.—The market has been weak. Indian Linseed is 9d. up at 16s. 9d., but La Plata is 9d. down at 15s. 6d. Rapeseed is quiet with Toria 6d. down at 19s. 3d., brown Cawnpore 6d. down at 18s. 6d., and bold Ferozepore 3d. down at 17s. 9d. Cottonseed has been weak with Indian 9d. lower at 9s. 3d., while Egyptian black has lost the same amount at 13s. 9d.

Seed Oils.—Prices have declined. Linseed oil is 1s. 6d. down at 29s. 6d. Cotton oil is steady with refined common edible unchanged at 57s.; Egyptian crude 1s. up at 48s.; and the deodorised variety the same at 62s.

Oilcakes.—A dull tone has prevailed, Linseed cake is 10s. down at 300s; while London-made cottonseed cake has lost 10s. at 190s. Arachis cake is 20s. down at 290s.

## BULGARIAN MARKET POSITION.

The Bulgarska Banka in its report dated October 1, states :—Despite the very satisfactory crop the prices of cereals and flour, of milk and its products, of cattle and meat are tending to rise. In view of the present rate of the leva and the increasing freedom for the export trade it is evident that these products will be in demand at prices that will approach more and more the prices in the countries where the currencies are less depreciated. If the other circumstances of the economic position were normal this would necessarily result in an almost corresponding improvement in the value of the leva.

Imports are extremely limited; materials for construction, metals, machinery, and Colonial produce predominate. The unfavourable exchange and the coming into force of the new tariff have taken away what courage remains to importers. The vast majority of them are abstaining from placing orders abroad, no longer having the basis for the establishment of their calculations of prices, and not being able any longer to immobilise large sums as the credits for which they stand cannot be increased on a par with the depreciation of the leva.

The abrogation of the Law of the Consortium has resulted in important purchases here. Prices are continually rising. The Government, beginning to entertain apprehensions regarding the supplies for the population, is contemplating various fiscal measures to ensure retaining the necessary quantities in the country at moderate prices. The solution of the problem remains to be found.

Considerable quantities of flour, cheese, and eggs have been exported to Constantinople. The export of cereals still remains very limited. That of attar of roses and tobacco is more animated. The prices of attar of roses are a little higher, ranging from 18,000 to 20,000 leva per kilogramme.

As we have already recorded in previous reports the tobacco crop is good. The drought has affected the crop as regards quantity, but not as regards quality which is very good. The disposal of the stock remains very difficult; the large houses hope, however, to be able to conclude transactions for the export of the new crop.

Business in cocoons has almost come to an end. All the disposable stock has been bought by exporters. The export continues, and has become very considerable during the last two months.

Mr. Vanderlip, the American banker, has arrived at Belgrade.

The Burmah Oil Company has declared an interim dividend in respect of the current year of 2s. per share, the same as last year.

## EGYPTIAN CROPS.

The Bulletin of the Egyptian Ministry of Agriculture gives the following particulars of the crop conditions in September :-

Cotton.—The notation figures for this month are the lowest ever published since the formation of the Department of Agriculture in 1910. The failure of the crop is most marked in the provinces of Gharbiya, Daqahliya, Qalyubiya, Beni Suef and Faiyum. Some reasons for the abnormally poor crop are :—(1) Late sowing owing to the hesitation of cultivators; (2) Careless cultivation due to low prices in the early part of the season; (3) Unseasonable weather from middle May to middle June; (4) Overwatering after a short supply during July; (5) The cool damp weather during the period under review following the hot spell in August; (6) The increase of the pink boll-worm, which has been encouraged by the lateness of the crop and by the amount of unginned cotton from last year stored in the villages. The results from the first picking are unsatisfactory; very little is expected from the second picking, and many cultivators are not troubling to take one.

Millet (Sefi).—Practically the whole crop has been harvested. The yield is expected to be a good average one.

Millet (Nili).—The areas under this crop seems to be less than last year. The crop is growing satisfactorily.

Maize (Nili).—The weather was, on the whole, favourable and water supply was sufficient. Thinning, manuring and watering were being carried out. Cobs have already formed in early-sown areas, but a very large proportion of land seems to have been sown late and in these areas the condition of plants is far from being satisfactory.

Rice (Sefi).—The weather was, on the whole, favourable and the water supply sufficient. Some early-sown areas have been harvested. The yield is expected to be a little below the average.

Bersim.—Both weather and water supply were favourable. Sowing has taken place late in August or the first days of September. The condition of the young plants is satisfactory.

Sugar-Cane.—The cool, damp weather experienced in Faiyum and Beni Suef Provinces has slightly affected the crop, but the condition of the plants is on the whole, satisfactory. Some cutting has taken place for human consumption. Slight attacks of stem-borer (Sesamia cretica) have been reported. An average yield is expected.

## ASIA MINOR FRUIT REPORT.

Messrs. C. J. Giraud and Co., Smyrna, report as follows for the week ended October 1 :—

Sultanas.—The total estimated arrivals to-date amounted to 106,245 bags compared with 56,125 bags for the corresponding period of last year. The total estimated sales are 98,245 bags as against 51,125 bags for the same period of last year, and the estimated stock unsold amounts to 8,000 bags as compared with 5,000 bags for 1920.

Figs.—The total estimated arrivals to-date total 101,294 loads, as against 100,495 loads for last year. The total estimated sales are 99,594 loads as compared with 100,495 loads, and the estimated stock unsold amounts to 100,495 loads.

Shipments.—114,239 boxes of sultanas, 1,422 cases of figs, 2,313 boxes of figs, and 35,386 bags of figs are being loaded on the s.s. Gourko and s.s. Stork for London and Hull.

Markets.—Demand for sultanas has commenced decreasing, and arrivals from the country are proportionately falling off, dealers having no inducement to continue buying from farmers on falling consuming markets abroad. Business in the later autumn stage will come to a relative standstill until a revival sets in later in the year. Shipments henceforward will be of limited compass. Total exports to date total about 15,000 tons.

Figs are a steady market, and prices marked a sharp advance on reports of rain damage. The production is likely to prove short of estimates, stocks remaining in hand being very light. The proportion of sound packing figs has been very limited this season, and qualities generally of natural figs are of a lower standard than last year. This deterioration is due to the unfavourable atmospheric conditions which prevailed since the winter in the Meander Valley. Foreign exchanges have been declining during the week.

## GREEK CURRANTS.

Messrs. Burlumi's annual report, dated October 3, states:—Our last report was dated September 30, 1920, and in it we estimated the crop of currants at about 90,000 tons. The yield, which actually reached 89,000 tons, was the smallest grown in point of size, since the year 1900, and the prospects of a successful season to all traders in the article appeared rosy. Although prices ruled high no anxiety was felt as to any serious drop for the reason that the crops of both sultana and Valencia raisins were likewise very small. The s.s. Thurso arrived in London on September 19, followed by the s.s. Coya on September 2 and the s.s. Crane two days later. Buyers operated with great caution at from 88s. for Pyrgos in half-bags up to 105s. for shade dried Vostizza in quarter cases. These prices receded at from 8s. to 10s. per cwt. during October through poor demand from the country and depreciation of exchange, but the *coup de grace* was reserved for the first week of November, when the Food Minister decided to reduce the price of his huge stock, of some 14,000 tons of old currants, from 75s. to 45s. per cwt. duty paid. This possibiilty was threatening from the arrival of new fruit on the English markets, but few thought that the reduction would have been so sweeping. The Food Minister, by adopting such a step, had little thought of the enormous interests vested in this article by the luckless traders. The result was that a panic ensued and prices tumbled down by several shillings per cwt. without attracting buyers at the fall.

The market continued flat and lifeless all through the winter months, buyers adopting the hand to mouth policy for their requirements. Early in March a syndicate of speculators bought the entire Government stock of currants, some 7,000 tons, at an average price of 30s. per cwt. duty paid, and this event infused some life into the article. The major part of these old currants were exported to Germany, Holland and America. A better tone prevailed, but prices remained practically stationary all through the spring and summer months with occasional fluctuations within narrow limits. The season ended disastrously as the fall in prices has been severe, thereby causing incalculable losses to the dried fruit traders generally. The currants shipped to foreign countries were distributed as follows: United Kingdom, 55,000 tons against 70,000 tons in 1919-20; United States and Canada, 16,500 tons against 28,000; Holland and Germany, 12,500 tons against 6,000; France and other parts of the world, 3,500 tons against 6,000; total, 87,500 tons against 110,000.

The Privileged Company received during the season in their warrant stores 10,000 tons all of which had been withdrawn before the end of the season. No dried fruit had been offered to the company for purchase, the ruling market prices being always much higher than the Convention limit. In their Retention stores the company received 4,500 tons, making 10,000 tons with the certificates in circulation on August 22, 1920. The land tax in kind, at 5 per cent. on the exported quantities, absorbed 4,400 tons and 4,000 tons represented by certificates circulation have been carried over. The Retention currants have been sold to the local distillers and to wine makers. The stock of old sound fruit carried over to the present season is estimated to be about 1,500 tons. Deducting 3,000 tons of old fruit brought over from the previous season 1919-20, we find that the crop of 1920 has yielded 89,000 tons against 127,500 tons in 1919 and 125,000 in 1918. The clearances for home consumption in the United Kingdom for the year ended August, 1921, amounted to 58,895 tons against about 63,000 tons for the previous twelve months ended August, 1920. The latter figure was somewhat hypothetical as no details of distribution were being published by the Board of Trade before September, 1920, when control on dried fruit was finally removed. The stock of currants in the United Kingdom as returned by the Board of Trade at the end of August was 9,980 tons against 15,000 in 1920 and 8,500 tons in 1919.

The new crop is estimated according to the latest news received from Greece at about 120,000 to 125,000 tons. The climatic conditions have been favourable during maturity, but owing to excessive heat harvesting commenced earlier than was expected to avoid rot setting in, which is usual when abnormal heat prevails in the currant growing districts. The s.s. Manhattan with about 600 tons of new fruit arrived in London on September 21, followed by the s.s. Hollandia I on September 24, with an equal quantity. A few samples were shown from the latter steamer on the latter date, but being Saturday a few sales only were made, of Gulf at 70s. and Patras at from 65s. to 70s., in quarter cases per cwt. duty paid. The s.s. Frederic Cleaves arrived on September 26, with over 1,000 tons, a good portion of which consisted of Vostizza. Although a good selection of all growths was offered to the trade the response was most disappointing. No doubt lower quotations from Greece, owing to the depreciation of the drachma oblige buyers to demur and to wait for developments. The quality of all growths is not up to that of last year's. The fruit seems insufficiently cured, but there may be an improvement in later shipments, as early arrivals, as a rule, do not generally represent the actual quality of the crop. The s.s. Phrygia arrived in Liverpool on September 29, and the opening of the market is reported slow with few sales at about the same prices as those paid in London for similar quality. Considerable business has been done both with the United States of America, Holland, and Germany from Greece on c.i.f. terms, and some 10,000 tons are now being shipped for these countries. The volume of business c.i.f. to the United Kingdom has been comparatively small, and excepting shade dried Vostizza which was bought somewhat freely at from 71s. to 78s. and Pyrgos at from 42s. to 52s. in quarter cases c.i.f. London for September shipment, all other growths have been neglected. Owing to the wild fluctuations of the exchange quotations vary from day to day, and all transactions based on an erratic exchange are bound to disconcert both buyers and sellers and to impede business.

The Privileged Company distributed to the ordinary shareholders for the year ended August 22, 1920, a dividend of 34.50 drachmae per share, equal to a little over 12¼ per cent. on the capital, and to the founders 12.20 drachmae, equal to 5 per cent. per share. The Retention for the current year has been fixed at 18 per cent. in kind and 17 per cent. in money. The exchange for cheques on London fluctuated during the season between 30 and 35 drachmae per £ sterling.

## SUDAN NOTES.

(*From Our Own Correspondent.*)

*Khartoum, September 29.*

Crop reports from the Blue Nile Province are not quite so cheering as usual. In spite of a good rainfall the crops are not very promising, and considerable damage has been suffered owing to a plague of mice and grasshoppers, more especially in the Medani, Hassa Heissa, and Kamlin districts, during the latter half of July. During the first half of August however conditions have improved, and crop prospects are fair. The area under cultivation is much less than last year, partly due to lack of energy on the part of the cultivators and also to a great extent owing to the state of the produce markets. A sufficiency of labour is obtainable in the Medani district at PT 10. per day, with a tendency to rise.

An outbreak of cattle plague was reported from Sennar on August 29, amongst cattle brought in from Kosti. This is regrettable as the province has been free from contagious bovine-pleuro-pneumonia for forty years. As a result of successful inoculation the disease has been stamped out. The infection was finally traced to cattle at Segadi, imported by the Sudan Construction Company from outside provinces.

News from Kordofan states that rains have been plentiful throughout the province and all cultivation is progressing well.

Crop reports from the White Nile Province are very good. The rains throughout the province with the exception of the Geteina district have been even better than those of last year, and there is every indication that the crops will be much above the average.

From the Red Sea Province news as to the flooding of the Tokar cotton area is good. The floods have been above the average, and have been well distributed. A succession of gales have been notified from Suakin, occasioning considerable damage to buildings in the town.

In Berber Province—the Wad Hamed, Kelli, Tubga, and Fadlah basins have been well flooded, but cotton cultivation has been somewhat difficult owing to the heavy grass crops resulting from early rains. The plants are reported to have survived, and as a result of strenuous efforts on the part of the cultivators most of the areas have now been cleaned. Rain crops

Digitized by Google

promise exceptionally well, and good grazing should be found in the Abtai.

The prospects of the date crop in Halfa Province are fair and forward contracts have already been made by the cultivators. There have been complaints from Delgo that date dealers who have hitherto been most regular in visiting the district for their purchases have suddenly ceased to do so, and are not even appointing local agents to carry on the work. There is general satisfaction throughout Abri and Delgo at the abnormal rains which have resulted in a very considerable increase of cultivation. As a result of the appearance of smugglers on the northern frontier a patrol has been sent out from Halfa along the West bank of the river in order to put a stop to any more contraband coming in from that direction.

Dongola Province reports that the date crop has been severely damaged by rain, the southern part of the province being more especially affected.

## CURRENT PRICES.

*General Produce.*—Bacon: (Continental), 157s. cwt.; (Canadian, 110s. cwt.; (American), 105s. cwt.; butter: (Danish), 229s. cwt.; (Australian), 180s. cwt.; (New Zealand), 205s. cwt., cheese (Canadian), 104s. cwt.; (New Zealand), 90s. cwt.; lard 80s. cwt.; eggs: (Danish), 32s. per 120s; (Styrian), 17s. 6d. per 120; chillies, 162s. 6d. cwt.; cloves (Zanzibar), 1s. 4d. lb.; cocoa (Ceylon, good to fine), 86s. 6d. cwt.; coffee: (Costa Rica), 152s. 6d. cwt.; (East India), 140s. cwt.; (Central American), 120s. cwt.; (Jamaica), 67s. 6d. cwt.; Mocha, (longberry), 115s. cwt.; (Santos superior), 65s. cwt.; ginger (washed Cochin) 56s. 3d. cwt.; nutmegs (110's to 80's) 11¾d. lb.; pepper: (Muntok white), 8½d. lb.; (Singapore, black), 4d. lb.; pimento, 2½d. lb.; raisins (Valencias), 136s. 6d. cwt.; sultanas (Smyrna), 122s. 6d cwt.; currants (Vostizza), 79s. 6d. cwt.; currants (Amalias), 55s. cwt.; sugar: (Tate's cubes), 57s. 9d. cwt.; (Lyle's granulated) 52s. 1½d. cwt.; (Mauritius crystals), 47s. 9d. cwt.; (West India crystallized), 43s. cwt.; (centrifugal), 17s. 9d. cwt.; tapioca (fair Singapore), 1¾d. lb.; sago (small pearl), 26s. 6d. cwt.; sago flour, 17s. 3d. cwt.; rice: (Rangoon No. 2), 20s. 6d. cwt. (bran Rangoon), £8 7s. 6d. ton; cinnamon (firsts), 1s. 1½d. lb. mace (fair Singapore), 1s. 2½d. lb.; tea: (Indian, common to good common), 9d. lb.; (medium to good), 1s. 5d. lb.; (fine to finest), 2s. 7½d. lb.; Ceylon (common to good common), 10½d. lb.; (medium to good), 1s. 6d. lb.; (fine to finest), 2s. 7½d. lb.; Java (common to good common), 7d. lb.; wheat: (English white) 53s. 6d. qr.; (La Plata ex-ship), 82s. qr.; (Australian), 69s. qr. barley (malting), 68s. qr.; barley (feeding), 41s. 6d. qr.; oats (English), 30s. qr.; (La Plata), 26s. 6d. qr.; maize: (mixed American) 33s. qr.; (La Plata), 33s. 3d. qr.; flour 51s. sack.

*Metals.*—Aluminium, £122 10s. ton; antimony (English Regulus), £39 10s. ton; bismuth, 7s. 6d. lb.; copper (standard), £69 9s. 3d. ton; copper (electro), £75 12s. ton; gold bars, 108s. 7½d. oz.; iron (No. 3 Cleveland), 120s. ton; hematite (mixed number), 138s. 6d. ton; galvanized sheets (24G), £19 5s. ton; lead (soft foreign), £23 ton; manganese Poti; 1s. 1½d. unit molybdenite, 40s. unit; nickel, £190 ton; platinum, 365s. oz.; plumbago, £20 ton; quicksilver, £9 10s. bottle; silver bars, 41d. oz.; spelter (G.O.B.), £26 17s. 6d. ton; tin (standard), £155 2s. ton; wolfram, 13s. unit.; zinc sheets, £35 10s. ton; tin plates (20 by 14), 21s. box.

*Chemicals.*—Acids: Boric, 66s. cwt.; oxalic, 9d. lb.; citric, 2s. 5½d. lb.; tartaric, 1s. 5½d. lb.; ammonia (sulphate), £14 9s. ton; arsenic (white powdered), £33 15s. ton; benzole (standard) 2s. 5½d. gallon; bleaching powder (35 per cent.), £16 10s. ton; borax crystals, 31s. 6d. cwt.; cream of tartar, 131s. 3d. cwt.; Potassium: Bi-chromate, 9d. lb.; chlorate, 6d. lb.; caustic £32 10s. ton; nitrate, £52 10s. ton; permanganate, 11¾d. lb. sulphate (90 per cent.), £17 ton; prussiate yellow, 1s. 2½d. lb.; Sodium: Crystals, 141s. 3d. ton; bi-carbonate, £12 5s. ton; bi-chromate, 6½d. lb.; alkali (58 per cent), £9 ton; chlorate, 4d. lb.; caustic (70 per cent), £24 10s. ton; hyposulphite, £18 10s. ton; prussiate, 7¾d. lb.; nitrate, £14 16s. 3d. ton; glycerine (crude 80 per cent), £80 ton; glycerine (industrial 1260 per cent), £110 ton; lemon oil, 3s. 7½d. lb.; quinine, 4s. 6½d. oz.; red lead, £39 15s. ton; white dry lead, £42 12s. 6d. ton; white ground lead, £53 2s. 6d. ton; sulphate of copper, £31 ton; sulphate of iron, 117s. 6d. ton.

*Miscellaneous.*—Cotton (American), 14.65d. lb.; cotton (Egyptian Sakel), 27s. 5od. lb.; Oilseeds: Linseed (La Plata), £14 10s. ton; rape (Toria), £19 10s. ton; soya beans, £15 ton; palm kernals, £19 10s. ton; sesame seed (China), £32 ton; Oils; Linseed, £30 10s. ton; olive (Levant), £78 15s. ton; palm, £39 15s. ton; rape (crude), £54 10s. ton; soya, £43 ton.

## COMPANY NOTES AND REPORTS.

### Barsi Light Railway.

The report of the Barsi Light Railway Co., Ltd., for the year ended March 31 states that the net earnings for the year less Indian income tax and super tax, amounted to £45,115 4s. 2d., or, adding the exchange adjustment of £17,039 14s. 11d., £62,154 19s. 1d. After providing the interest on the debenture stock, £5,600, and the interest and sinking fund instalment, etc., on the "Latur Extension" debentures, £5,649, there is left £50,905 19s. 1d., which, with the balance of £10,352 13s. 2d. brought forward from the previous year, makes £61,258 12s. 3d. at credit of net revenue account. The directors have transferred £15,450 17s. 3d. to credit of reserve account for the equalisation of dividends, depreciation on investments, etc., which account now stands at £135,000, and £4,000 to taxation reserve account as a provision for corporation profits tax and the heavy income tax which will become due hereafter in respect of the past year's profits. An interim dividend of 3 per cent. and bonus of 2 per cent. (or 10s. per share) was paid on April 22 last, and the directors now recommend that a final dividend of 3 per cent., with a bonus of 4 per cent. (14s. per share in all) be paid. This will make a total distribution of 12 per cent. for the year and leave £10,607 15s. 0d. to be carried forward. Owing to the partial failure of the monsoon, goods traffic in the second half year fell off considerably; taken as a whole the year was a good one and shows total receipts second only to last year's record As against the previous year there is a decrease of 5,242 passengers and Rs. 48,683 in coaching traffic and sundry receipts due chiefly to the smaller attendance of pilgrims at the fairs at Pandharpur on account of the stoppage of through bookings from the G.I.P. Railway.

Goods traffic shows a decrease of 23,742 tons and Rs. 1,15,178 owing to the continuance of restrictions on through bookings during the earlier part of the year, and the failure of the crops in the district as a result of which the export of food grains and cotton seeds from H.E.H. the Nizam's Territories was prohibited. Working expenses at Rs.6,61,763 are Rs. 53,964 higher, the chief cause being the all round increase in salaries and wages which has been forced on all railways in India by the action of labour and the rise in the cost of living. In consequence of the increased expenses, combined with the decreased earnings, the percentage of working expenses to gross earnings amounts to 46.22, as compared with 38.09. The net earnings of Rs.7,70,133, compared with Rs. 9,87,956, and the rates of exchange for remittances yielded a considerable addition to the profits and bring the average rate for the year to 1s. 10.13 per rupee., The approximate traffic receipts from April 1 to August 27, 1921, amount to Rs, 5,46,300 equal to Rs. 217.50 per mile per week, as compared with Rs. 6,97,900 (Rs. 276,00 per mile per week) during the corresponding period of last year.

### Harrisons and Crossfield.

The report of the directors of Harrisons and Crosfield Ltd. for the year ended June 30 last states that the company's business has been carried on in the face of adverse conditions, owing to the very heavy fall in the prices of rubber, tea, and nearly all classes of merchandise in which the company deals, and to violent fluctuations in exchange. From the stocks held large amounts have consequently had to be written off, having regard to which the result of the year's working is not unsatisfactory. The stocks stand in the balance-sheet at replacement values. The investments show some considerable depreciation as compared with their cost; but market prices have for some months been largely nominal, and the directors believe that the investments will again show appreciation over the balance-sheet figures when the present crisis is passed.

The net profit earned during the twelve months amounts to £164,466, to which is added £37,874 brought in. Out of this the directors have paid the full dividends of 6 per cent. on the cumulative preference shares and 10 per cent. on the preferred ordinary shares, and they have also paid 7½ per cent. on the deferred ordinary shares and distributed £5,941 among the holders of management shares. These dividends together amount to £157,815, and the balance remaining at credit of profit and loss is £44,525, which the directors propose to carry forward. The company has contributed upwards of £10,500 to the staff provident fund during the twelve months. A profit-sharing scheme has been introduced at the branches, and it is hoped that this will prove beneficial alike to the company and the staff. Meeting, 38 Eastcheap, E.C., October 21, noon.

## SUPPLIES AND PRICES IN THE NEAR EAST.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank :—

Marmouret-ul-Aziz, August 6.

Business has come to a standstill owing to the lack of means of transport. There has been a fall of 25 per cent. in the price of cereals on account of the good harvest.

Jaffa.

The report for August states :—Owing to the tithes for 1921 falling, due, continued arrivals of cereals from the interior, and the fall in foreign flour a slight decline has taken place on this market. The mean prices of the month are as follows :—(in piastres Egyptian per rotole ;—wheat 4½ to 5¼ ; barley, 2¼ to 2½ ; beans, 2¼ to 2½ ; vetches, 3 to 3¼ ; lentils, 3 to 3½. Consignments for Syria continue.

It is to be noted that as in the past year wheat has been attacked by the weevil ; in view of that state of things merchants are abstaining from laying in stocks of cereals, and the result is that prices show a strong tendency to fall.

Mersina.

The report for August states :—During the first three weeks of the month the commercial and financial crisis continued to rule in our market with the same intensity. However a marked recovery took place during the closing days of the month, a development which has been hailed by all merchants as the forerunner of the commercial movement so much desired. The recovery is due, it is understood, to certain purchases for the interior, carried out through the little town of Djihan, which suggests that when normal communications are re-established Mersina will beyond question recover all its importance and its lost activities.

The tendency for cotton to rise, recorded in our report for July, has not suffered any abatement, and this commodity now stands at P.s. 165—215 per batman of 5 kilos as against Ps. 125—150 in July, and Ps. 115—140 in May and June.

Beans are also harder at P.s. 10 per oke as against Ps. 6—7 last month. Wheat from Ps. 11—12 per oke has risen sharply to Ps. 18—19. Barley is also firmer at Ps. 8½ per oke as against Ps. 7. Oats were sold at the end of August at Ps. 7—7½ per oke. Sugar on the other hand has fallen to Ps. 25 per oke following arrivals from Alexandria and Constantinople.

Panderma, September 15.

The arrivals of the new crop have made their appearance on the market. The exports include 100,000 kilos of wheat for Smyrna and 45,000 kilos of chick peas for Constantinople.

Stocks existing here (in kilos) are as follows, prices (in piastres per kilo) being given in brackets :—Wheat 1,250,000 (7¾ to 8¼) ; oats, 315,000 (3½) ; barley, 1,025,000 (4,7-8) ; maize, 25,000 (4) ; chick peas 55,000 (7¾ to 8,5.8) ; flax grains, 130,000 (7,3.8) ; lentils, 65,000 (4,7-8) ; beans, 260,000 (7¾) ; mustard, 20,000 (7¾) ; native flour 75,000 (10,1-8 to 12,7-8) ; dry cocoons, 20,000 (360 to 367) ; sugar, 70,000 (28,7-8) ; coffee, 16,000 (39 to 50¾) ; skins, 700 (54,5-8 to 85¾). There are also 500 cases of Roumanian oil at 400 piastres per case, and 2,000 cases of American oil at 575 piastres per case.

## ON 'CHANGE.

### Business Very Restricted.

*(From Our Own Correspondent.)*

London, Monday night.

Generally speaking a dull tone has prevailed in the markets during the past week. A lower Bank rate would have helped to brighten things up, but once again hopes of a reduction were disappointed. As a matter of fact whatever happens in this direction it is hopeless to look for any great improvement until the trade outlook is more settled.

Gilt-edged securities have again provided the bright feature of the week. Consols are unchanged at 48,7-8, but War Loan Fives are 5-8 up at 49,7-8. Fundings are ¼ up at 72,3-8. In Near Eastern securities Egyptian Guaranteed 3 per cent. are unchanged at 69, while Greek Guaranteed 2½ per cent. 1898, and Turkish Guaranteed 4 per cent. 1855 are the same as before at 66 and 69 respectively. The India 7 per cent. Loan is ¼ up at 103½.

The Industrial group has been dull with weakness developing in various directions. Business has generally been extremely restricted. Iron and steel shares have been weak, while Shipping securities have moved adversely. P. and O. Deferred are 5 down at 345. Furness Withy are 24s. xd., while Cunards are 6d. down at 17s. 6d..

**Oils Unsettled.**

The unsettled condition of the Oil Market has continued. Mexican Eagles are a shade lower on the week at 3,15-32. Anglo-Egyptian are 3-32 up at 1,7-32, but Roumanian Consolidated have shed 1s. at 8s. Steaua Romana are 3d. up at 9s., but Phoenix are 1s. down at 7s. 3d. Dacia Romano are 13-16. Burmahs are 3-8 up at 5½, while Anglo-Persian Prefs are 21s. 9d., Anglo-Persian 2nd Prefs being 22s.

Bank shares have been firm, Agricultural 3½ per cent. Bonds are 1 up at 54, while Agricultural 3½ per cent. Guaranteed Bonds are unchanged at 55. Imperial Ottoman Banks are 3-8 down at 7½, while National Bank of Egypt at 19¾ are 1-8 lower. Bank of Athens are ¼ down at 2,1-8, but Ionians are unchanged at 3¼.

The position with regard to Rubbers remains much the same. The share market is practically stagnant, little business being transacted. There is very little stock about as holders are unwilling to part at present prices, and the development of even a small buying movement would make a considerable difference.

**Greeks Decline.**

Greek shares have developed weakness. The 5 per cent. 1884 loan is 3 down at 39, while the 5 per cent. 1881 Loan is 37. The 4 per cent. 1902 Loan is 35, while the 5 per cent. Funding Loan has lost 2 at 37. The 5 per cent. 1914 Loan is unchanged at 39.

Land shares have shown a variable tendency. Beheras are ¼ down at 10¾, but Behera Prefs. are unchanged at 3¼. Egyptian Delta Lands are 4½d. down at 8s. 9d., while Egyptian Consolidated Lands have shed 3d. at 1s. New Egyptians are 6d. down at 25s. 6d., but Sudan Plantations are unchanged at 3,1-16. Sidi Salems are 1,1-8, while Union Foncieres are 2,7-8, a decline of 3-16.

Among Miscellaneous descriptions Alexandria Waters are 7¼. Egyptian Markets are 20s., and Egyptian Salt and Sodas are 35s. 3d.

## ROUMANIA'S OIL EXPORTS.

Our Bucharest Correspondent writes:—The statistics of Roumania's exportation of oil products by countries during the first half of 1920 are as follows (the figures representing tons):—To France 18,554, Italy 17,966, Czecho-Slovakia 12,771, Turkey 11,530, Bulgaria 9,569, Austria 8,551, Great Britain 7,469, Hungary 6,381, and Germany 5,157. A comparison of the monthly average of oil exports during this period with those for the corresponding six months of 1920 shows that while the monthly exports in 1920 averaged 20,583 tons the total had fallen in 1921 to 17,912 tons.

## ANGOLA—OILFIELDS.

Angola Oilfields, Ltd., has been registered with a nominal capital of £1,000,000 in £1 shares. Objects:—To adopt an agreement with Trade and General Trust, Ltd., to acquire and turn to account petroleum, asphalte, napthaline, coal or oil-bearing lands in any part of the world, and to carry on the business of miners, prospectors, explorers, refiners of and dealers in petroleum and other mineral oils and the products thereof, carriers, wharfingers, shipowners, &c. The registered office is at Capel House, 52, New Broad-street, E.C.

## THE AIR POST.

The Postmaster-General states that as the outcome of the experiment, arrangements have now been made whereby the public will be enabled to post letter packets, registered or unregistered, for transmission from Egypt to Irak (Mesopotamia) by aeroplane once a fortnight. A special air mail fee at the rate of 1s. an ounce will be charged in addition to ordinary Imperial postage. Despatches from London in connection with the service will be made weekly by the ordinary Indian mail; they began with the despatch on October 13. Any letter intended for onward transmission by the air service should bear in the top left-hand corner the "Air Mail" label obtainable at any post-office, or the words, "By air, Cairo-Baghdad" clearly written or typed. Parcels and insured packets are not admitted. The normal time occupied in transmission by the combined ordinary and air route will be about 18 and 11 days in alternate weeks, and the saving in time compared with transmission all the way by the ordinary route should be from seven to 14 days or more.

The time of departure from Toulouse of the air mail for Morocco has been revised. The latest time of posting at the General Post Office, London, of correspondence intended for inclusion in the Moroccan air mail is now 11 p.m. on Saturdays and 6 p.m. (5.30 p.m. for printed papers) on Mondays, Wednesdays, and Fridays.

## INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated October 10:—Season.—October 3—Monsoon active in North Burma and South Madras. October 4—Strengthened in Peninsula. October 5—Upper Burma, Assam and South-Eastern Madras rain practically general. October 6—Fairly general rain in Upper Burma and Konkan. October 8—Rain general in Bay Islands, Mysore and Bombay-Deccan. October 8 and 9—Heavy rain in Madras-Deccan. Crops.—October 7.—Punjab and Central Provinces—unchanged. Bombay—cotton and oilseeds good. Markets.—Bombay cotton market October 6—steady. Oomras Rs. 470. December-January. Cotton arrivals September 1 to 29, 150,000 bales as compared with 55,000 bales in same period last year. In Bombay piece-goods market retail enquiry steady. Demands for white and grey staples continue encouraging. In Calcutta market, Jute and Hessians quiet and fairly steady. Heavy goods quiet and rates slightly easier. October 4—T.N. Shellac Rs. 135. At the tea sale on October 4, very few Darjeelings offered, but good selection of good quality from all other districts. Prices were firm and occasionally slightly dearer for all grades. All markets interested except Persia. 248,606 packages sold to date at average price of 8 annas 11 pies per lb. October 7—Price special rice Rs. 637½. Railway Survey.—Nasik Road—Belapur (on the Dhond-Manmad line), Railway detailed survey 92 miles by Great Indian Peninsula Railway Co. sanctioned. No change in Bank rates.

## ALEXANDRIA EXCHANGE.

*Supplied by G. L. Mortera, Alexandria and Cairo.*

Prices on September 30 were as follows:—Agricultural Bank of Egypt, £4 7-16; Alexandria Water Co., Ltd., £7½; Anglo-American Nile Steam, £2½; Associated Cotton Ginners, £27-32; Banque d'Orient, Fr., 56½; Behera Ord., £E 11,1-16; Brasseries d' Egypte, Fr., 75; Building Lands of Egypt, £11-16; Cassi di Sconto Priv. Fr., 100; Ciments d'Egypte Priv., Fr., 55; Ciments d'Egypte Div., Fr., 30; Comptoir Fin. et Com. d'Egypte, £29-32, Consolidated Land, Pt., 6; Credit Foncier Fondateur, Fr., 835 ex; Credit Foncier Act; Fr., 643; Credit Foncier, 1886 Oblig., Fr., 339; Crown Brewery Priv., Fr., 110 ex.; Crown Brewery Div., Fr., 130; Eaux du Caire, Capital, Fr., 81½; Eaux du Caire Jouissance, Fr., 108; Egypt and Levant, S.S. Ord., 26s. 9d.; Egyptian Delta Light Railways, £4,5-32 ex.; Filature National d'Egypte, £12¼; Immeubles d'Egypte Soc., an des., £5, 7-16; Khedivial Mail S.S. Ord., 110s.; Khedivial Mail S.S. Co., Pref. £2 9-16; Kom Ombo Ste. An de Wadi, £5,1-16; Kom Ombo Ste, Fondateur, £33 9-16 ex.; Land Bank of Egypt, Parts de Fond, £37; Lots Turc., Fr., 36; Menzaleh Canal Navigation Pt., 270; Nungovich Hotels, £7,1-16; Ramleh Railways, £3; Salt and Soda, Pt., 35s. 3d.; Tram d'Alexandrié Priv., Fr., 45; Tram d'Alexandrié Div., Fr., 60; Union Fonciere d'Egypte, £3,3-32; **Egypt Hotels, £2,7-32; Urbaines et Rurales, £2,7-8.**

The Madras and Southern Mahratta Railway Company recommends a distribution on January 2 of £2 5s per cent. out of stockholders' revenue account, in addition to guaranteed interest at rate of 3½ per cent, per annum, making 7 per cent. for the year. In addition there will be the refund of 12s 9.45d per cent. for income-tax to stockholders owing to the adjustment of Colonial tax. Income-tax will be deducted on £4 dividend at the rate of 4s 11.04d in £.

# SHIPPING INTELLIGENCE

## DALMATIA'S WATER POWER.

In an article in the *Prager Presse*, Vice-Consul Franz Falta states that the question of the exploiting of Dalmatia's water power has come into evidence by reason of the changed national economic situation in Yugoslavia. The late Austro-Hungarian policy favoured the activities of German and Italian enterprise in Dalmatia, as a result of which two of the greatest water-power resources in Dalmatia are in the hands of foreign capitalists. The Italian "Sufid" Company (Societa anonima per utilisazione di forze idrauliche in Dalmazia) controls the Gubarica waterfall in the river Cetinja, and likewise those on the River Krka without any restriction.

The existence of lime and coal fields in the immediate neighbourhood of the central power station suggested the production of carbide and its derivative azotes. According to the statistics of the former Italian Consulate in Zara, from 20 to 30,000 kg. carbide and cyanamide is the yearly production, but this sum should be about doubled to arrive at the true figure. The "Sufid" obtains 100 kg. cyanamide out of 800 kg. carbide, and the production is so much the more profitable in that cyanamide sells in Dalmatia for Yugoslav Kr. 7-10. The cost of production of 100 kg. carbide amounts to Kr. 37 (including amortisement of relatively high cost of installation), while the sale price is Kr. 72 per 100 kg. This explains the prosperity of the Sufid in the immediate past, and the desire of the Yugoslav circles to rid themselves of this foreign exploitation. The Dalmatian cyanamide is the rival of Chilian saltpetre; the latter went through a crisis in recent years owing to this competition, while the increased production of artificial fertilizers in Switzerland, England and Germany gave it the *coup de grace*. Incidentally, 75 per cent. of the Chilian saltpetre production is in the hands of Yugoslav emigrants. The crisis reacted also upon the Dalmatian cyanamide market, and brought about a reduction in the Sufid's activities.

The controversy is now entering on its decisive phase. Not only the question of emancipation from foreign capital, but also the choice between cyanamide and saltpetre is concerned, whereon depends the well-being of the Yugoslav emigrants who cannot be treated with indifference, in view of the great part played by them in the liberation of Yugoslavia.

## FORTHCOMING SAILINGS.

*The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parentheses :—*

*Anchor Line.*—S.s. Circassia for Bombay (Liverpool, October 27).

*Anchor Brocklebank Line.*—S.s. Malia for Calcutta (Manchester November 5); s.s. Matheran for Port Said, Colombo, Madras and Calcutta (leaves London, November 5); s.s. Imani for Port Said, Colombo, Madras and Calcutta (leaves London, November 19).

**ANCHOR LINE**

**First-Class Passengers only.**

**LIVERPOOL TO BOMBAY.**

**KARACHI via Bombay calling at Gibraltar & Egypt**

LARGE STEAMSHIPS. UPPER DECK CABINS.
FITTED WITH ELECTRIC FANS.
RECOGNISED BY INDIAN GOVERNMENT.

PASSENGER SAILING DATES—

ELYSIA, OCTOBER, 21,
CIRCASSIA, NOVEMBER, 2,
OLYMPIA, NOVEMBER 18.
SCINDIA, NOVEMBER 30.
CASTALIA JANUARY 6
MASSILIA, JANUARY 20,

**Anchor Line (Henderson Brothers), Ltd.,**
**16, Gracechurch Street, London, E.C.3.**

*Bibby Line.*—S.s. Lancashire for Port Said, Colombo, and Rangoon (Birkenhead, October 26); s.s. Yorkshire for Marseilles, Port Said, Colombo and Rangoon (Birkenhead, November 9).

*Byron Steamship Line.*—S.s. Lord Harrington for Patras, Piraeus, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Galatz and Braila (Liverpool, October 28).

*Clan Line.*—S.s. Clan MacNaughton for Colombo, Madras, and Calcutta (Birkenhead, October 20).

*Cunard Line.*—S.s. Brescia for Gibraltar, Algiers, Malta, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Odessa, Novorossisk and Batoum (Glasgow, November 3); s.s. Pavia for Genoa, Leghorn, Catania, Brindisi, Bari, Ancona, Venice, Trieste, Fiume, and Gravosa (Liverpool, November 10).

*Ellerman Line.*—S.s. City of Oxford for Gibraltar, Malta and Alexandria (Liverpool, October 22); s.s. Cressado for Gibraltar, Algiers, Malta, Jaffa, Haifa, and Beyrout (Liverpool, November 5).

*Ellerman's "City" Line.*—S.s. City of Harvard for Bombay and Karachi (Birkenhead, October 22); s.s. City of Brisbane for Calcutta (Birkenhead, October 26); s.s. City of Exeter for Calcutta (Birkenhead, November 8).

*Ellerman's "Hall" Line.*—S.s. Melford Hall for Bombay, Karachi and the Punjab (Liverpool, October 31).

*Ellerman's "Westcott and Laurance" Line.*—Steamers sail fortnightly for Mediterranean, Egypt, and Levant ports.

*Glen Line.*—S.s. Glenshane for Port Said, Port Swettenham, Singapore, etc. (London, November 3); s.s. Glensanda for Port Said, Port Swettenham, Singapore, etc. (London, November 17).

*Harrison Line.*—S.s. Dramatist for Calcutta (Liverpool, October 30).

*Henderson Line.*—S.s. Amarapoora for Port Said and Rangoon (Birkenhead, November 2).

*Johnston Line.*—S.s. Dromore for Piraeus, Volo, Salonika, Bourgas, Varna, Constantza, Sulina, Galatz, and Braila (Liverpool, October 22); s.s. Peruviana for Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Galatz and Braila (Liverpool, November 5).

*Moss Line.*—S.s. Limoges for Casablanca, Gibraltar, Malta, Jaffa, Beyrout and Cyprus (Liverpool, November 10).

*Papayanni Line.*—S.s. Gerano for Algiers, Malta, Syra, Smyrna, and Constantinople (Liverpool, October 22); s.s. Andalusian for Tangier, Malta and Alexandria (Liverpool, October 29).

*P. and O. Line.*—S.s. Macedonia for Bombay (London, October 21); s.s. Kalyan for Colombo, Madras and Calcutta (London, October 21); s.s. Nankin for Colombo, Madras, and Calcutta (London, November 3); s.s. Morea for Bombay (London, November 11).

*P. and O. British India Line.*—S.s. Neuralia for Bombay and Karachi (London, October 21); s.s. Margha for Colombo, Madras and Calcutta (London, October 28); s.s. Merkara for Bombay and Karachi (London, November 4); s.s. Manela for Colombo, Madras, and Calcutta (London, November 11); s.s. Mashobra for Bombay and Karachi (London, November 18).

## ENQUIRY BUREAU.

*Readers abroad desirous of getting into touch with British manufacturers, export merchants, etc., are invited to insert a brief reference as to their requirements in this column free of charge.*

*Replies should be addressed "The Enquiry Bureau, "The Near East," 1, Devonshire Square, London, E.C.2."*

*ADVERTISERS in and annual subscribers to "The Near East" will be supplied with names and addresses of enquiring firms on application. All catalogues sent to "The Near East" for transmission abroad must be accompanied by stamps to cover postage.*

*No guarantee is given as to the financial stability of firms using this column, and enquiries as to status, etc., must be made by the firms concerned.*

119. Russian gentleman, age 34 years, speaking fluently English and French, offers his services to a British firm or company, with a view to becoming acquainted with any special line they intend to undertake in Russia, so as to be able to act in their interest in that country.

120. Import Merchant to Mersina, Cilicia, Asia Minor, wants to establish relations with British manufacturers of motor cycles, printing machinery, electrical instruments and generators, stationery articles, typewriters, steam turbines and other mechanical appliances. Send catalogues, prices and terms, First class representation.

## NOTES OF THE WEEK.

### *Foolishness in High Places.*

Many people have hitherto found it difficult to understand the vindictiveness shown by the Allies towards ex-King Karl. He cannot be held responsible for the war, unless he is credited with a sinister influence in Austro-Hungarian affairs before he came to the throne, and with the collapse of the Dual Monarchy it might be thought that almost anybody could reign in Hungary without disturbing Europe's sleep o' nights. But a veto was promulgated against the ex-King, and has been extended, with what justification it would be difficult to say, against the whole of the House of Hapsburg. Ex-King Karl has now provided his boycotters with some of the justification that they previously lacked. If there is one place where fools cannot be suffered gladly, it is on a throne in Central Europe at the present time. Only a fool will be the tool of every chance intriguer, and this is precisely the rôle that the ex-King seems to have marked out for himself. To-day two things are necessary to enable him to be on the throne of Hungary—the support of the Magyars and the sanction of the Allies. If he had been content to keep quiet for a period, he might conceivably have dispensed with the latter. As things are, he is likely to find the hostility of the Allies, or at least of the Little Entente, the determining factor in his undoing. Not even an aeroplane trip from Switzerland to Hungary can render the action of a throne-snatcher who breaks his parole heroic. Hungary with the Burgenland escapade has made herself disliked among many who were anxious to befriend her; her would-be sovereign has made himself contemptible when most people were inclined to accord him sympathy.

### *The Allies and Hungary.*

The correct attitude of the Budapest Government, supported or inspired by the obvious determination of the Allies to stand by their guns, has led to the collapse of the ex-King's false move, without the necessity of any military effort on the part of the States of the Little Entente. It is to be hoped that the lesson from this incident will not be lost sight of in the future. Wherever troubles threaten in Europe—at least outside Russia—the Allies only need to present a united front and handle them firmly in order to secure their speedy liquidation. We should be sorry if the Little Entente should feel that it must always be standing under arms for the safety of Europe. Even in regard to the Carlist escapade we were convinced that, in the present parlous condition of European finance, the question of "His Majesty Charles IV" on or off the throne of Hungary is not worth the expenditure of a leu, dinar or krone to any of the neighbouring peoples. The suggestion that Hungary with or without Charles IV can jeopardise the interests of the Secession States is, we believe, an unwarranted aspersion on the latter. Individually they are each a match for Hungary; collectively they have an unassailable position. Their united statesmanship, therefore, should be directed to avoiding the expense of further warfare at all costs.

### *The Franco-Turkish Agreement.*

It is officially announced that an agreement with the Nationalist Government has been signed at Angora by M. Franklin-Bouillon, on behalf of France. In the absence of definite information to the contrary we must suppose that the understanding between the French Government and Mustapha Kemal Pasha is restricted to matters affecting Cilicia and Syria, in accordance with the promise given by M. Briand. France has long been anxious to clear up the situation on her Cilician frontiers in order to be able to withdraw her troops, without incurring the charge of sacrificing the non-Moslem population. The only possible way out of her dilemma was to come to an arrangement with the Turks, and she has apparently satisfied herself that the Nationalists are to be trusted when it is shown that they are trusted. In regard to this the French are probably right; in any case there is no other course open to them or to the Allies, and the sooner the latter make up their minds on this point the better for all concerned. The agreement on the other hand would assume a very different complexion if it trespasses on matters of interest to the Allies as a whole instead of to France alone.

### *Greece and Turkey.*

Every allowance must be made for Greece's difficulty in adopting this view of the Turks as her own. To understand the position it is necessary to get back to first principles. At the bottom of the Asia Minor situation lies the fact that the Turks hate the Greeks as much as they are hated by the latter, with the result that on both sides we witness the same warping of judgment whenever enemy affairs are in question. With the Greeks the trouble may take the form of an unwise advance into Asia Minor beyond the limits imposed by

Digitized by Google

military and financial considerations. In the case of the Turks we have the cruder exhibition of wholesale executions of Pontus Greeks accused of treasonable acts. It would be idle to deny that the Angora Government has shown some qualities of statesmanship during its existence, and for this reason the blunder, to say nothing of the criminality, of the executions stands out in bolder relief. To explain it we have to recall the folly of the Allies in authorising the Greek to act as their policeman in Turkey. In all matters affecting Greece the Nationalists "see red" and will continue to do so for just so long as the Greeks have a land frontier with them in Asia Minor. Remove this incitement, and the world may find the Turks as amenable as the French appear to have found them at last in regard to Cilicia.

### *Italy and Rhodes.*

The Italian view of the situation in regard to Rhodes is probably that it is entirely on all fours with that of Cyprus, and that consequently English opinion on the subject should be expressed cautiously. There are, however, many circumstances in connexion with the British possession of Cyprus altogether lacking in the Italian occupation of Rhodes. Not the least important is the question of time; another is the fact that the justification supplied by a considerable Moslem minority in Cyprus does not hold good in the case of Rhodes. But any analagy breaks down completely when British and Italian methods of administration are compared. The Rome Government has evidently decided that Cyprus methods are not to be practised in Rhodes. The British allow Greek members of Legislature to absent themselves until such time as they are ashamed of their childishness or their constituents grow tired of their tactics. In Rhodes failure to attend public functions in honour of the Italian Crown Prince has caused the Greek Archbishop and some of his clergy to be arrested and deported from the island. Whether such measures make for peace in the future remains to be seen. Only a Power conscious of its strength and of the justice of its cause can adopt the tolerance and leniency which Great Britain has shown in Cyprus in far more trying circumstances.

### *The Murder of M. Dimitroff.*

There can be no justification for political murders; but in the case of the assassination of M. Dimitroff, Minister for War in Bulgaria, it is possible to piece together the circumstances which may be supposed to have led directly to the tragedy. M. Dimitroff was the strongest man next to M. Stambolisky, the Prime Minister, in the Agrarian Party. In spite of being associated with certain commercial undertakings which were held by the Moderate section of the Agrarians to have brought no credit to the Party, he occupied important posts in the Cabinet, first as Minister of the Interior, and then as Minister for War. During both these periods the political life of Bulgaria was disturbed by various acts of violence, which for one reason or another added to the number of M. Dimitroff's personal enemies. When finally some prominent members of the Macedonian party, having been brought to Sofia, were compelled to reside in certain provincial towns to which they were conveyed, and one of them, on the way to Kustendil, failed to reach his destination alive, feeling against the Minister for War was still further embittered among certain sections. M. Dimitroff, it will be noted, was killed while motoring to Kustendil, and although no arrests have been made, the crime is attributed to Macedonian elements. It is only fair to Bulgaria to point out that M. Dimitroff in office was an anachronism to his own countrymen.

### *Zaghloul Pasha's Tour.*

Saad Pasha Zaghloul's trip up the Nile has not yet come to an end, as it was erroneously reported to have done last week, but in all probability he and the more intelligent of his supporters will be very glad to be done with it. For, although they will of course persist in representing it as a triumphal progress marred by the malignity of the Government, they will find it increasingly difficult to make the world accept that view as correct. That the Pasha has his ardent followers in the South, as in the North, it would be foolish to deny; but the trip has already served to show that they are by no means the overwhelming majority that the Zaghloulists would have us believe; and indeed it is open to doubt whether they are more than a considerable minority. Particulars of the fighting between the two factors at Assiout show that they were not unevenly matched; and as far as it is possible to judge from the reports sent from other places at which the 'Nubia' called, only to be warned off, it would seem that the same was the case at most of those towns. In one way the trip has served a useful purpose: it has taught both sides that Zaghloul Pasha is no longer—or should we say not at present?—able to do exactly as he pleases with the country. We may now reasonably expect the Egyptians to await the conclusion of the negotiations in London before giving way to any further extravagant display either of joy or rage. If reports current here are to be trusted, it will not be long before the negotiations are brought to an end.

### *A New Persian Force.*

A month ago, in reporting that the Persian Government had made an offer to take over the South Persia Rifles and that the offer had been rejected by Lord Curzon, we remarked that there was nothing to prevent the Persians' organizing a force on similar lines for themselves, if they had the ability to do so. Last week the Persian Legation announced that the Teheran Government is creating a new force to take the place of the Rifles, and that it had invited Great Britain to sell the arms and ammunition requisite for its armament. The Legation *communiqué* added that if the request were granted, there need be no fear of that tribal unrest in anticipation of which the British Consul at Shiraz had advised the withdrawal of British families from the district. But the request has not been granted, the British Government standing by its decision not to allow the S.P.R. arms and munitions to be taken over without a full guarantee of the purpose for which they would be used. It is a pity that such a reply should have to be given; for sooner or later the Teheran Government will probably get what it wants elsewhere, and meanwhile South Persia is likely to drift back into the anarchic state from which it had only recently emerged. But, failing guarantees such as those asked for, no other answer would have been wise: in all probability the arms and ammunition would have found their way to the North; the South would have been no better off; and we might ere long have had reason to regret our complaisance.

Digitized by Google

### *The Moplah Rebellion.*

Another week has passed without any very obvious progress towards the final suppression of the rebellion in Malabar. An official telegram, indeed, suggested that we might expect shortly to hear of a decisive action, but so far the official *communiqués* have given no encouragement to that view, and the obscure position now assigned to them in the daily Press suggests that editors at least regard them as possessing little interest for the public. We do not, however, wish to suggest that any cause for pessimism exists. The area affected has been restricted, and the ground still held by the rebels must be regarded as a natural stronghold, the reduction of which must inevitably take time if useless sacrifices are to be avoided. It must also be borne in mind that Moplahs do not usually surrender even when their position has become untenable, so that some time may yet elapse before tranquillity is restored, and we can only express the hope that the delay will not be greatly prolonged.

### *Legislative Hustlers.*

There is something rather pathetic in the eagerness of the Indian Legislative Assembly, as shown in the recent debate, to speed up the transformation of the Constitution, and dismantle the whole scaffolding of dyarchy within a few months of its erection. The legislatures, both central and provincial, have made such a promising start that the eagerness of their members is easy to understand, and it seems almost churlish to say anything which might disillusion them, but at the same time we are bound to point out that they have not yet been put seriously to the test. The youngest offspring of the Mother of Parliaments are undoubtedly healthy and vigorous, but so far they have been nursed tenderly, perhaps too tenderly, by their guardians, and they have still practically all their troubles before them. For one thing, the members have not yet met their constituents, and even the boldest will hesitate to prophesy what will happen at the elections two years hence; but apart from the risk of a revolutionary change in personnel, there are dangers ahead which may easily turn either the legislatures or the constituencies into so many bear-gardens.

### *Dangers Ahead.*

It would be easy to make a long list of these dangers but a couple of examples will suffice. The Central Assembly has of late shown a tendency to engage in the reform by legislation of various social or religious customs, and in India that is very treacherous ground. The customs are doubtless out of date, but the fact is not universally admitted, and at any moment the subterranean forces of orthodoxy may be mobilised against the reformers, and the legislature find itself the scene of a conflict which may cause even its members to revise their views regarding its capacities. In the provincial councils again, a peck of trouble seems to be brewing over the excise administration. Members are almost necessarily prohibitionists, for the higher castes drink in secret when they drink at all ; and if they carry things too far, they may rouse the temper of the lower classes, who have as yet little direct representation, but who may suddenly decide to take an active part in politics if their chief luxury is threatened. It is in view of such possibilities as these that we think the legislatures would be well advised to be content for the present with the position they have already won. They need a large increase in the number of voters before they can safely use extended powers.

## THE WEEK AT HOME.

*London, Monday Evening.*

### A Discordant World.

It has been a hectic week. On the Continent a sanguinary revolution in Portugal, the return of the ex-Emperor Karl, and the successive fall of the German mark and the German Government, have shown how far the world is still from settling down to a secure and stabilised civilisation. These facts have dashed the hopes of the optimists at home, who have professed to discern a gradual improvement abroad during the past year. Even in home affairs matters have not gone too smoothly.

### An Inquisitive Parliament.

The House of Commons was convoked with the idea that it should sit for a fortnight to say ditto to the Government's proposals on unemployment. But it showed no particular disposition to play so tame a part and is likely to enquire into the whole condition of trade, and to discuss thoroughly the very large proposals put before it. For the first time in our history the State has taken the responsibility of fostering trade by grants in aid—like a hospital—from national funds, a curious commentary on the general desire to curb the functions of the State in commerce which necessarily demands debate and may cause controversy. It is a departure from precedent that will have many curious reactions, quite apart from the immediate effects, which naturally are what mostly concern the Government and Opposition. Whether the immediate effects of these proposals—which now await constructive criticism—will be of great benefit remains to be seen ; there are some doubters. Their ultimate consequences may still be debated a generation hence.

### Ireland.

The Irish Conference continues, but it has taken a back seat in public notice, partly because the rule of secrecy at its meetings has been inviolably observed by both sides, and the Press has therefore had no indiscretions to report. Unfortunately there is another reason for the lack of interest in the Downing Street meetings. Official telegrams between the King and the Pope were published during the week, and since both expressed a desire for peace, it seemed impossible that the most extreme Sinn Feiner or the strongest Tory could take offence at their phraseology ; it is not yet an ethical or even a political crime to profess the wish to be at peace with one's neighbours. But Mr. de Valera obviously took it in bad part, and at once sent off a telegram to the Pope which must have embarrassed the Vatican, and has seriously jeopardised the chances of a

successful outcome of the negotiations between Britain and Ireland. It could be read as nothing less than a claim for full republican independence, since it was a definite repudiation of the King, combined with the inevitable grievance against British methods, and a suggestion that underhand propaganda was being resorted to.

Seeing that the King was officially the prime mover in the road to peace, and that Mr. de Valera himself took part in the preliminary conferences this summer, and subsequently abandoned the claim for full independence in his prolonged correspondence with the Prime Minister, his intervention has been universally regarded as extraordinarily maladroit. It has been suggested in some quarters that its best explanation is as an outburst of petulance against his own party, who, for doubtless sufficient reasons, thought it best not to include him in the present Conference. That hypothesis would be preferable to the idea that the Conference was assented to in bad faith by the headquarters in Dublin. It is understood that the Government regard this episode with some anxiety.

However that may be, a feeling of pessimism and even of disgust has followed the optimism of a fortnight ago. It is too soon, of course, to say that the Conference will fail, but if this affair is repeated, its chances of success will not be great. The immediate reaction is that the strong Tory and Die-Hard group in the House of Commons, which is usually more vocal in the lobby than in the House itself, has raised its head. It demands an open discussion of the whole Irish position during the present sittings: the result of which would inevitably be the saying of many bitter things, and a political storm that would leave the atmosphere even more oppressive than it is now. Mr. Austen Chamberlain has addressed the Constitutional Club (which is one of the centres of discontent) with smooth words and the proverbial soft answer, but there are threats of revolt and slaughter within that terra-cotta building which do not bode altogether happily. The Conservatives, like Mr. Pickwick, are usually docile, but they talk now of "taking their coat off," like that respected hero, and they will need rather tactful handling. The fact that they have no real leader with any national following, so far from making things better, may make things worse. It is easier to deal with a recognised leader than with a mob.

**Bones, Bottomley, and an Acquittal,**

As if these things were not enough to fill the papers, the news has been full of legal and criminal matters. Mr. Bottomley is prosecuting a man for criminal libel in one court, and is being attacked in several others, on account of some prize lottery which he ran, and which seems to have got everybody concerned into difficulties; there have been whole columns of examination, cross-examination and re-examination, incidents between rival counsel, and scathing comments by magistrate and judge. At Cambridge there was a murder trial which ended in an acquittal, and the Isle of Wight has been excited by the discovery of some human bones in a garden. The experts declare that they came over with the Conquerer or thereabouts, and have been buried for centuries, but local opinion rejects this solution as too tame altogether, and prefers the idea of a recent crime, and a proper criminal hunt with the gallows at the end. One touch of gruesomeness makes the whole world kin. All the reporters in Fleet Street have been down to investigate the mystery, but after all they have failed to make those dry bones live as a news story.

**Grosvenor House for Sale.**

Another great London house is likely to go. The Duke of Westminster, who has just sold a couple of pictures for an enormous sum, is about to dispose of Grosvenor House in the near future. The pressure of taxation and the impoverishment of estates render it impossible to keep up these great houses; and most peers, faced with the inevitable, would rather sell their London than their country house. After all, even a Duke can find quite tolerable accommodation in a hotel. The change is bound, however, to have an effect not wholly for good on London society; we seem to be within measurable distance of a time when entertainments on the grand scale will be impossible in the capital. A more serious side of this tendency is that it will eventually provincialise the aristocracy; they may perhaps keep more in touch with their own estates—so long as they continue to hold them—but they will play less and less part in the high politics of the time, and consequently in the House of Lords. Anybody who wishes to see how far this change has already gone has only to look at a list of the Cabinets of fifty years ago, when the great nobles playe a large part in Parliament and the Government of the day, and contrast it with the present time, when the great bulk of the Cabinet consists of commoners. The aristocracy have not exactly abdicated, but their influence on affairs is certainly declining year by year.

**A Feminine Agitation.**

The past week has seen a real recrudescence of feminism, A local council has been in trouble because it has threatened to dismiss a lady doctor on her marriage; as her work is mainly concerned with women and children, it has exposed itself to the effective retort that marriage will make her more and not less acquainted with that type of practice.

But the real battle of the women has been waged at Cambridge. Oxford, which is inferior to Cambridge in many respects, has at least accepted women as part of the University; but Cambridge, while permitting women's colleges, will not grant women real degrees, and still refuses to allow them any actual share of the corporate life of the University. Some very ingenious arguments have, as usual, been put forward to prove that women would ruin the tone of the University; it is said that they are imitative and not constructive or intellectually creative—as though the average male don was ever anything more than a commentator on the commentators—and they have been told that they would do much better to go off somewhere and form a university for themselves—preferably in the Hebrides, I suppose.

On a pouring wet day last week country clergy and school masters of incredible antiquity arrived to vote the women down, while undergraduates indulged in a glorious rag in the streets, with a funeral procession symbolising the burial of the mere male by triumphant women. By a large majority women were again forbidden any part in the university life, but the campaign is not yet over. The ladies threaten to appeal to the Government to alter the law, and the unhappy Cabinet may yet have to appoint a Royal Commission to enquire into the constitution of Cambridge University. Meanwhile Oxford chuckles; it has so often been sneered at by Tabland as being mediaeval and the home of lost causes that it can hardly restrain a decent joy over the present perplexities of its rival.

**The Week's Book.**

The most important book of the week has been Professor J. W. Gregory's "Rift Valleys and Geology of East Africa" (Seeley Service) which covers more ground than its name implies, since it deals with the geological rift which begins in the Jordan Valley, runs through the Red Sea, and thence downwards through the Tanganyika and to the south of the Zambesi. It is thus one of the most unimportant features of the earth's crust, and this detailed survey will be a great use to prospectors and administrators, and many others than geologists. Despite the legends of Sodom and Gomorrah and other traditions, Professor Gregory arrives at the conclusion that this rift in the earth's surface is very ancient, and he gives at some length reasons for the belief that is in him.

OCELLUS.

Sennar Province, of the Anglo-Egyptian Sudan, has been renamed Fung Province, Fung being the dominant tribe. Sennar town and district have been transferred to the Blue Nile Province in order to bring the whole area covered by the Gezira irrigation scheme under one jurisdiction.

## EGYPT.

*Cairo, October 12.*

**Awaiting Developments.**

The spirit of the hour may be described as expectation mingled with trepidation. The whole country is nervously expectant concerning the result of the official negotiations in London. A section of the people, chiefly the literate classes, are awaiting the result of Zaghloul Pasha's visit to Assiout. The commercial community is watching the cotton market for hints as to the future; and almost the whole of the business community is awaiting further information relative to the coming tourist season, for which prospects are so wonderfully bright when everything is taken into account. It seems as if the present is a time when no one dare make plans. Everything depends upon the events of the next four weeks: Egypt will be friendly or hostile to Great Britain; Zaghloul Pasha will have indicated that he has a substantial section of the people with him, or he will have discovered that he has passed the zenith of his popularity and his influence; the cotton market will be buoyant or sagging. And we shall know whether the rosy prospects for a splendid winter season are to be realised.

**The London Negotiations.**

The latest news from London indicates that the crux of the negotiations is at hand. The respective plenipotentiaries are about to start upon the knotted tangle of the military occupation. That is what the negotiations have been reduced to. If this question can be settled, there is every hope of an amicable treaty. If not, Adly Pasha presumably will return with his delegation, and resign. Zaghloul Pasha's visit to Upper Egypt so far has been productive of one minor sensation. On the first day his steamer passed through continuous cheers from both banks of the Nile, even in spots where the only sign of man was the crop of maize stretching for miles along either side of the river. But on arrival at the first big town from Cairo—Beni Suef,—towards midnight, there was a strange silence; and it was not until the boat had been at anchor for three-quarters of an hour that four members of the reception committee appeared on the bank and related how the police and soldiers had picketed the banks and refused to allow any demonstration in favour of Zaghloul. Even the Nile boats which had been engaged to take the notables downstream to greet the party had been ordered to remain at their moorings. Strong telegrams of protest were at once sent to the Ministry of Interior and to the native papers in Cairo.

**The Sultan and Zaghloul Pasha.**

According to a report from a well-informed source, prominent Zaghloulists have recently made a determined effort to effect a reconciliation between the Sultan and Saad Pasha Zaghloul. It is stated that two of Zaghloul's most influential friends called at the Palace and hinted that as Sunday last was the anniversary of the Sultan's accession to the throne, and as there would be a big reception at Court, the Sultan might care to heal the breach by inviting Zaghloul to join the guests at Court. The Sultan refused, on the ground that it would not be consistent with his dignity if he took the initiative to secure the presence at Court of one of his subjects who had deliberately stayed away when all eyes were turned to see if the usual complimentary visit would be paid by that subject. Rumours, however, began to circulate that a reconciliation had been effected, but at the Acting Premier's reception, on Sunday evening, in honour of the anniversary, a high official from the Court intimated quietly to some of the most prominent guests that there had been no *rapprochement* between the Sultan and Zaghloul, and that there would not be one till Zaghloul abandoned his attitude of studied aloofness.

**The End of Summer.**

By recent steamers large numbers of officials and business people who had been abroad on leave returned. Cairo is rapidly filling up again, many familiar faces being noticeable, together with the van of the tourists. The Residency returns to Cairo in the last week of the month, in preparation for the return of the High Commissioner and Lady Allenby. The Ministries will also return at about the same time.

*Port Said, October 8.*

**Zaghloul Pasha's Visit.**

The visit of Zaghloul Pasha to Port Said, accompanied by his guests amongst the Labour *Wafd*, and several hundred of the riffraff of other parts of Egypt, passed off without any untoward disturbance. The speeches of the Pasha and the white men accompanying him showed the usual ignorance, or evasion, of the realities of the situation, and apparently did not make any great impression on the Egyptian population of the place. Port Said is entirely commercial, and the business community know the benefits of a strong and impartial rule, and apparently do not hanker after any change in the 'self-determination' direction. Of course if every individual were absolutely certain that in the event of 'independence' he would be made a Mudir or something of the sort, things would be quite different; but as in all probability, not even Zaghloul has promised him that, the average citizen of Port Said prefers to wait and see.

I have it on the best authority that the amount of money subscribed here for Zaghloul Pasha's party did not exceed four hundred pounds, a sum which probably just covered the hotel expenses of the party and the cost of the special train. One keen observer has likened Zaghloul's *penchant* for telegrams and special trains, to the same phase of megalomania (*anglice*, swelled-headedness), which was such a feature of the Kaiser's incipient madness.

**Harvest Festival.**

Last Sunday was kept here among the British community as a Harvest Festival, and the church was profusely decorated with fruits, flowers, and vegetables, which together with the eggs collected at the children's service in the afternoon, were sent to the British Hospital for the use of the third-class patients. In the evening a feature of the service was the anthem solo, "Consider the Lilies," sung with beautiful effect by Miss Nanine Roberts.

Lord Radstock left here a few days ago in the City of Exeter. He came out to Egypt soon after the war started, as the representative of the National Council of the Y.M.C.A., and did great work visiting the various Huts on all the Eastern fronts, sharing the life of the men in every way. He made one trip to Malta, and was torpedoed on the way. Returning to Egypt a few months later, he continued his work among the troops till after the Armistice, when, owing to the demobilization of the armies, he was able to devote himself to the

Leaders of the World's Office Equipment and Filing Systems.

holding of missions among the native churches in various parts of Egypt. He went about entirely unarmed, and generally unaccompanied by any European, being looked after by the native pastors, who also acted as his hosts and interpreters. He cut himself off from all official connection, and as a private person, though of high rank, was able to do an immense amount of real evangelistic work, as well as creating a better feeling towards the English among the natives of the country.

## YUGOSLAVIA.

*Zagreb, October* 16

**A Welcome Sign.**

It is pleasant to find the *Obzor*, an organ of the Narodny Club, in Zagreb, appearing with a leading article in a strong pro-English vein. The writer chides his contemporaries, not for their constant paeans of gratitude to the French for their great services to Yugoslavia during the war, but for the scarcity or absence of such paeans of gratitude to the English, who did as much. He goes on to remark that we British do not advertise much; but, having done our job, quietly withdraw. He singles out in particular Sir Arthur Evans, Mr. Wickham Steed and Dr. Seton Watson, without the influence of whose support it is probable that the Union would never have been achieved, for the British were not educated up to the cry of "Delenda est Austria." And if ever any anachronism in Europe required deleting, it was certainly the "ramshackle empire."

**M. Pashitch versus M. Protitch.**

M. Pashitch has gone to Paris to confer with the King, who is shortly expected to return to his capital, and to exert all his influence against the allocation of Skutari to Albania. The news that this city has been allotted to the Arnauts is interpreted here as a diplomatic snub to M. Pashitch. It is generally maintained that M. Pashitch was willing to sacrifice Fiume if he could get Skutari, that is to say, he regarded the problem as a purely Balkan one; but now both are lost, and this fact gives his opponents an opportunity of saying that his foreign policy has been as great a failure as his Constitution, which has caused such discontent in parts of the country that there is a strong movement for revision, led by his own henchman M. Protitch. As a matter of fact, the outsider cannot feel very much sympathy for the loss of Skutari. Although it was built by the brothers, Mrnyavchevitch, the father and uncles of Marko Kralyevitch, Serbia's favourite hero, as the beautiful old tale tells us, and was the capital of the old Serbian state of the Zeta, the modern traveller looks in vain in that purely eastern town for any traces of Serbian influence to-day. The claim based on sentiment can hardly receive support in these days; the claim based on strategic considerations is another matter, but the key of the position is the famous hill of Tarabosh.

Parliament is due to re-assemble on the 20th, and probably M. Pashitch will be back by then, and it is to be hoped, the King as well. The Cabinet will have its hands full enough, with the Albanian question, the financial question, and the slump in the exchange, and the vigorous opposition led by M. Protitch, who is a redoubtable opponent. A stalwart Radical leader himself, he disclaims any intention of splitting his old party, but the effect of his action has been to stir up the Democrats. If it is true that he has secured the adhesion of the Narodny Club and also of Raditch, and the Bosnian Mohammedans join him too, as appears probable, he will have a strong backing: if this bloc comes to terms with the main mass of the Radical party, M. Protitch will have scored a remarkable personal triumph, and will certainly carry his policy of revising the Constitution, in favour of a reasoned form of federation such as he proposed last summer. That would be a shrewd blow to the Democratic party.

**M. Protitch's Policy.**

M. Protitch has just brought out the first number of his new paper, *Radikal*, which has been awaited with considerable interest. It is interesting to note that in his leading article, he refers to the possible eventual inclusion of Bulgaria in the union, but the obstacle, according to him, is the strong intermixture of Turkish and Tatar blood, as they themselves acknowledge in their upper levels, and in their north-eastern district, which has given them a different mentality, and in the fact that from their liberation by Russia they have been the whole time a plaything in the hands of foreign-intriguing politicians. Then referring to the union of the Serbs, Croats and Slovenes, he at once introduces his policy, which he set forth last year in his "Draft Constitution." He writes:—"Our people has been divided among several States, and administered in various methods, manners and systems . . . We are trying to unify into one simple mould a national life varied for hundreds of years, regardless of nature around us, and of the history of our own and of other peoples. Nature is one, but varied. And the State can be one, but must not and cannot, if it wishes to live a healthy and sound life, clothe all its citizens in one overcoat, and must not and cannot so abruptly change the *pelengire* (breeches) of Uzhitse for trousers, nor graft the life of a Shumadinats or Old Vlach on to that of a Croat of the Zagorje." This is also the cry of the Narodny Club, and will probably find a number of sympathisers in Serbia itself, but is in direct opposition to the "Greater Serbia" policy represented by M. Pashitch. As these two veteran Radicals have worked together for a generation, the situation is piquant, and it will be interesting to see whether M. Protitch will carry his party with him. If he does, and he is a strong man, he will succeed in forming a powerful coalition, with the support of the Croats, both of the Narodny Club and very likely of Raditch too, and of the Bosnian Mohammedans, and the Democrats will then find themselves in the chilly atmosphere of opposition, and perhaps may split into their component parts.

## ROUMANIA.

*Bucharest, October* 12.

**The Bid for Power.**

The negotiations between the Liberals and the Transylvanian National Party, for the purpose of forming a coalition, have now come to a deadlock, and in order to avoid a complete rupture between the parties have been suspended. The bone of contention is the demand of the Transylvanians that the Liberals should wind up their entire political organisation in Transylvania and in the Banat. The reason for this demand is to be sought in the fact that the Liberals have been recruiting among the former partisans of the Transylvanian National Party. In the event of collaboration the Liberal Party, being the more powerful and especially the richer of the two, would no doubt contrive to absorb a large portion of the members of the other Party. The Liberals contend that it would not be fair on their part to abandon their newly acquired partisans, and further, they consider the Transylvanians' demand to be equal to a claim of political autonomy in that province, which in principle they would not concede, nor would any other political party of the Old Kingdom. The deadlock between the two parties is naturally very favourable to the Government, which is still treating with the Tzaranists; it is even trying to win them over by offering them portfolios in the Cabinet, which in any case is expected to be rearranged before the re-opening of Parliament or immediately afterwards. The Tzaranist Party is stated to have been further strengthened recently by the adhesion of a certain section of the Socialists known as the Social-Peasant Party.

**The Anniversary of King Carol's Death.**

A requiem mass in commemoration of the seventh anniversary of the death of King Carol was celebrated with great solemnity on Sunday at Curtea d'Argesh, in the presence of the Royal Family, the members of the Cabinet and other high officials. On this occasion the 400th anniversary, the death of Voevod Neagoe Basarab was also celebrated. Basarab IV of Wallachia was the founder of the famous Cathedral of Curtea d' Argesh, which was renovated and embellished by King Carol.

Digitized by Google

The cathedral is regarded as the finest monument in Roumania and is much admired for its architecture and its wealth of historical relics. It is also the mausoleum of Voevod Neagoe Basarab and his wife Despina, as well as of King Carol and Queen Elisabeth (Carmen Sylva).

**Street Mendicants.**

A frequent and displeasing sight of Bucharest was the large number of ragged beggars and tramps seen in the main thoroughfares of the capital. These have now disappeared as if by magic, thanks to the enforcement of the new regulation for suppressing public mendicity. Offenders were raided by the police and taken to a temporary home, where every case was investigated. It was ascertained that the majority of the mendicants were professional beggars, who found their trade a lucrative one. Many managed to hide in time and are now lying low, waiting for the authorities to become less energetic in the enforcement of the law ; others have emigrated to provincial towns, where the regulation has not yet been applied. Naturally, some deserving cases were found. Of these the aged are placed in homes, the sick interned in hospitals, and the physically fit are being given suitable work.

**Visit of Italian Students.**

About a hundred Italian students, accompanied by University professors, have for the last two weeks been visiting different towns in Roumania. On Thursday last they arrived in Bucharest and were very warmly welcomed by the authorities and the people of the capital. The Italians brought with them amongst other gifts the flag under which the Roumanian volunteers fought on the Italian front.

**Further Explosions.**

To-day at 11.30 a.m. a number of violent explosions were heard all over Bucharest. They took place at the Chitila-Chiajna forts, ten kilometres from Bucharest, and recall what happened two months ago at another fort near Bucharest. In the present case, a dump of 150 waggon-loads of all kinds of explosives—the larger part left behind by the German and Russian Armies in a deteriorated condition—were being sorted out by a number of soldiers, when by accident a case dropped to the ground and exploded. The rest of the dump also exploded, blowing up the entire fort. Minor explosions from shrapnel-shells and hand-grenades are still continuing and will do so for many more days, for the forest close to the forts is on fire and is spreading the disaster. Owing to the danger the authorities have not yet been able to approach the *débris* for further investigations. Many of the houses and factories on the outskirts of Bucharest have been damaged by pieces of shrapnel and concrete. Up to now there are rumours of fifteen dead, fifteen wounded, and about twenty missing, presumably buried under the ruins of the forts.

**General News.**

M. Take Jonescu returned to Bucharest on October 11, after a two months' stay abroad.

M. Argetoianu, Minister of the Interior, also returned from abroad last week, and M. Titulescu, Minister of Finance, is expected back towards the end of this week.

M. Emanoil Porumbaru, former Minister for Foreign Affairs, under the Liberal Government at the time when Roumania entered the war, died on October 11, at the age of 76. He will be accorded a national funeral.

The law for compulsory school attendance has recently been introduced in Bessarabia, so that from October the parents of children who do not attend school regularly will be fined two lei per day for every child. This is still a very small fine considering the present high cost of agricultural labour.

A railway collision took place on Thursday last at Topletz stations on the Orshova-Temesvar line, owing, it is said, to the negligence of the railway officials of that station in allowing a Bucharest passenger train to enter the line already occupied by a goods train. The two engines and three trucks were badly damaged. There was fortunately nobody killed, but a dozen passengers were more or less severely injured. The railway officials responsible for the collision have been arrested.

The controversy over some three hundred Roumanian subjects forcibly detained in Budapest having now been satisfactorily settled, the Roumanian Consul at Budapest is once more affixing the *visé* on Hungarian passports for Roumania.

## BULGARIA.

*Sofia, October 16.*

**The New British Minister.**

The Honourable W. A. F. Erskine, presented his credentials as Minister Plenipontenary and Envoy Extraordinary to King Boris on Wednesday, the 12th. The occasion was marked by the usual ceremonial, and two State carriages, accompanied by an escort of cavalry, were sent to bring Mr. Erskine and his staff from the British Legation to the Royal Palace. M. Tourlakoff, Acting Minister of Foreign Affairs, was in attendance on the King, whose reply to the somewhat short address of the British Minister was couched in the usual terms.

Some of the Sofia newspapers have commented on the apparent coldness of the new Minister's address, and have judged it an opportune moment for reviewing the relations between Great Britain and Bulgaria. For it is generally agreed that relations are good, and although one newspaper says that no undue warmth has been shown by Great Britain towards Bulgaria since the Armistice, the same newspaper seems to forget that it is only three years ago since we were at war, and even the notoriously " quick to forget " English race take a little time to get over the surprise that was caused by the decision of ex-King Ferdinand and his Cabinet to enter the war on the side of Germany. It is considered, however, that there are indications in the recent tone of the English Press that public opinion is gradually beginning to weary of a pro-Greek policy, and is asking what we shall gain by encouraging the Venizelist dream of a Greater Greece. Public opinion usually has its way in the long run, and it will surely do no harm if in the future we hold out a rather more helpful hand towards our ex-foe, who still cherishes a great admiration and respect for the country that did so much to free her from the yoke of the Turk.

**The Trial of the Radoslavoff Cabinet.**

The trial of the Cabinet of M. Radoslavoff, which was in power when war was declared in September 1915 has begun. The charge against the accused is that they were responsible for plunging the country into a war which has led to such disastrous consequences, and some of the ex-Ministers are accused of corruption. Two military officers, General Jekoff, late Commander-in-Chief of the Army, and General Boyajieff, First Army Commander, are also being tried ; so the total number of accused is brought up to thirteen, of whom nine were actually present, the absentees being M. Radoslavoff and Boyajieff (who are in Germany and Austria respectively, and refuse to return), and M. Bakaloff, ex-Minister of Commerce, who is ill, whilst General Jekoff was en route for Bulgaria and arrived yesterday. The trial is being held in the " Slavianska Beseda " which in ordinary times is a theatre ; there are seven Crown Judges convened to try the accused ; and the former are assisted by a male jury of twelve persons, who were specially elected by the people. Eleven of the twelve jurymen are peasants, and it was a somewhat curious sight to witness the swearing-in of the jury, who, attired in their picturesque peasant costume, formed an expectant circle around the officiating priest. The most interesting figure among the accused is M. Toncheff, ex-Finance Minister, who, besides being charged with having been responsible for the catastrophe, has to face grave charges of alleged bribery and corruption. It is said that M. Toncheff is the richest man in Bulgaria, but nevertheless his local bank account shows a credit balance of only 200 levas, and it would appear that all his reputed wealth is safely out of the country.

Digitized by Google

Whilst everyone is agreed that the trial of the Radoslavoff Cabinet was necessary, it is at the same time greatly to be regretted that M. Radoslavoff himself has been able to take refuge in Germany. He was Prime Minister and Minister of Foreign Affairs when war broke out, and was very largely responsible for making the ex-King decide to throw in his lot with Germany. He will be tried *in contumaciam*. The action of General Jekoff in returning of his own free will is in striking contrast with the attitude of M. Radoslavoff, and quite a wave of popular enthusiasm has spread over the country at the behaviour of the late Generalissimo. Jekoff has being living in dire poverty abroad, and although he is expected to make some startling revelations concerning the later stages of the war, it is not likely that these will affect to any great extent the views of the Judges towards him. The prosecution is in the hands of M.M. Yaneff and Stoyanoff, and it is understood that a great many witnesses, including M. Malinoff, who was Prime Minister at the time of the Armistice, will be called upon to give evidence.

**General News.**

M. Stambolisky returned to Bulgaria from Geneva yesterday and has gone away to the village of Pavlienki, where the celebration of the jubilee of M. Tsanko Bakaloff, the 'Poet Minister' is being held.

A considerable amount of wheat has recently been bought by the Co-operative Societies of the Communists in Bulgaria. This wheat is intended for the starving Russian people. The Bulgarian Communists are evidently well supplied with money, as they are paying a high price for the grain they have bought; and have thus come in for some criticism from the Bourgeois parties, who point out that a short time ago the Communists were protesting against the increased price of bread in Bulgaria, and now it is they who are forcing up the price owing to the fancy prices they are willing to pay.

## GREECE.

*Athens, October* 15.

**The British Football Club.**

At a meeting held this week at the British Club here, it was decided to continue the football club which had a very successful season last year. The British Minister, Earl Granville, was elected Hon. President, and Admiral Smith one of the vice-Presidents. Commander Rode was elected Captain, and Mr. J. H. Clarke vice-captain of the team, which will again compete in the League instituted by Colonel Mayes last year. Last season the Club finished third in the League, and would, in all probability have obtained a better position but for the weakening of the team owing to absentees in one of the most important matches.

While the loss of such sterling players as Messrs. S. S. Scott, H. Bates, and W. Morton, who have returned or are shortly returning to England, is much to be regretted, it is hoped that the new Naval Mission, which is to arrive about the middle of November, will provide some good recruits, and that the British will succeed in carrying off the honours this year. The thanks of all are due to Commander Rode for the manner in which he looked after the Club last season, and his election as captain for the present season was a very popular one.

**Punishment of General Dousmanis.**

The Chief of Staff, General Dousmanis, upon taking up his appointment in Athens after his return from the Asia Minor front, published an "Ordre du Jour" which, however, was not approved by the Government, for it was considered, in some of its terms, as contravening military discipline. The Minister of War promptly obtained the King's signature to a Royal Decree placing General Dousmanis on the retired list. At the same time the Chief of the Army Recruiting Department, Colonel Spyropoulos, published an open letter accusing the Commandant of the Military region of Athens of arbitrarily arresting persons whose military status had been satisfactorily established, and sending them by the first steamer to the Asia Minor front. As a result of this the Government decided to punish Colonel Spyropoulos by placing him on the retired list.

**M. Stergiadis.**

The High Commissioner of Greece at Smyrna, M. Stergiadis, who had come to Athens to collaborate with the Government with regard to the measures to be taken for the administrative organisation of the occupied regions in Asia Minor, has returned to Smyrna. He has been given full powers to enforce a system of administration which would be considered suitable for the newly occupied territories. These have been divided into thirty-six districts or "Kazas," each of which will be placed under the administration of a sub-prefect who will be nominated by the High Commissioner himself, and chosen from amongst the most capable officials at his disposal.

**Personal.**

Rear Admiral Aubrey Smith, who is replacing Admiral Kelly as Head of the British Naval Mission to Greece, arrived in Athens last week. He was presented to the Minister of Marine, and the Minister for Foreign Affairs by Admiral Kelly on Monday. The latter is leaving Athens either to-day or tomorrow.

Prince Andrew, accompanied by his two daughters, has left for Corfu.

The General Manager of the Bank of Athens, M. John Eliasco, has returned from Western Europe, and has resumed his duties at the Bank.

M. Costas Eliasco, sub-Manager of the Bank of Athens, has left for Paris.

## ALBANIA.

*Tirana, October* 13.

**A Critical Time.**

The situation is very interesting and even critical. The Chamber has reassembled after its holiday, and has held some agitated sittings, its legislative activities being

carried on amidst difficulties, and with minds preoccupied by the political situation, which has lost nothing of its seriousness.

Albania has won the sympathy of the Assembly of the the League of Nations, as Lord Robert Cecil announced publicly at the sitting of October 2; and the assurance is a great moral help to the Albanians, who have noted with satisfaction the statement regarding the moderation of their demands. Unfortunately, however, the Assembly has no power in the matter, the Council of the League having handed this matter over to the Conference of Ambassadors; and all that has been gained at Geneva is the despatch of a Commission to conduct enquiries on the spot. Such a commission would have been very useful if it had been sent at once, but apparently it will not leave Geneva until November 1, and will not begin to function until after the Ambassadors' Conference has taken its decision. Meanwhile the state of uncertainty continues, with the inevitable crop of rumours attaching to it. Great demonstrations have taken place against any eventual yielding of Albanian territory. Any territorial rectification or any granting of rights over the country to Italy would be opposed to the last, and any Government that should agree to them would risk being overthrown—when the country might drift into a state of anarchy.

### Serbs Invade Albania.

Some twenty days ago grave events began to develop on the Serbo-Albanian frontier. The Serbs opened an attack—with artillery and with ex-Russian soldiers of General Wrangel's Army—on the Albanian villages of Aras, Dardha, Muher and Singa. The Serbians represented to the League of Nations that these villages lie beyond what they call the Armistice Line, while the Albanians maintain that they are and always have been under Albanian administration. At the time of writing the Serbs are attacking fresh positions.

*Tirana, October 20.*

### The New Government.

The new Cabinet has just been formed, the downfall of the old one being due to the difficulties caused by the uncertain political situation and particularly by Serbian activities on the frontier. Moreover, Ilias Bey Vrioni had long wished to retire from office owing to his bad health. The task of forming the new Cabinet has fallen upon Pandeli Evangeli, Minister of Foreign Affairs, who is now President of the Council and holds the portfolio for Foreign Affairs; M. Zogolli becomes Minister of War, M. Michel Mosi of Public Instruction, M. Bayran Fevzi of the Interior, M. Constantin Tasi of Justice, M. Ahmed Dakli of Finance, and M. Zia Dibra of Public Works.

With the exception of M. Pandeli Evangeli and M. Zogolli all these men are young and have only just come into prominence. The character of the new Government is democratic and liberal. To-day the Premier sketched out his programme before Parliament; he, like the old Cabinet, proclaims the maintenance of the Albanian frontiers of 1913.

### Serbian Attacks.

In spite of the representations made to Belgrade by Great Britain, France, and Italy, the Serbs have continued their activities on the frontier. Yesterday they took possession of Oboti on the Boyana, seven kilometres from Skutari, thus cutting the communications between the town and the sea by the river. On the Eastern side they have invaded the whole of the Malissia, which forms the prefecture of Buria. The population is fleeing panic-stricken to Skutari.

Here the thought is expressed that the comedy played by the Great Powers in their denial of the Albanian frontiers has begun to change into tragedy, and it is even asked whether it is not these Powers themselves who are encouraging the Serbs to invade Albania. The winter is approaching and the Albanians find themselves exposed to terrible sufferings.

## CYPRUS.

*Nicosia, October 4.*

### The Question of Hotels.

The scarcity of good hotels has always been one of the principal reasons why so few travellers comparatively have visited the island. For Europeans it can never compete with other resorts until more hotels are established. As far back as 1882 an Englishman from Alexandria with an ample backing, came over to arrange for the construction of one that would suit the requirements of the British Colony in Egypt, and matters were proceeding satisfactorily when the Arabi outbreak and its consequences put an end to the scheme. The late Mr. George Nungovich of hotel fame in Cairo, who was a Cypriot, was prepared to build and run a large hotel on Mt. Troodos, but only on conditions which the local authorities could not concede. Messrs. Thos. Cook and Son would have included Cyprus in some of their programmes, had island circumstances been less behind the age. This year there has been some talk of schemes which would place Cyprus on a level with other countries as regards up-to-date hotels. During the summer some 3,000 visitors have sought rest and change in the island. Some have failed to find suitable accommodation, others have complained of discomfort and lack of proper supplies; and others again of exorbitant charges and grasping landlords. It will be time to say more as to the development of a tourist trade when some more hotels are built. There is no reason why Cypriot capital should not be invested in the enterprise. For the present the influx of visitors is only during the heat of summer, *i.e.*, for three or four months; so that hotel keepers have to make what profit they can in that period. But in Spring and Autumn travelling in the island is delightful, and the winter climate is admirable, so that, if all goes well with the island, hotels ought to do well enough as soon as their existence and the many attractions of Cyprus become better known. Better steam communication is also required, and this should come concurrently with trade expansion. It is to be hoped that the needs of Cyprus will not be overlooked in connection with Mr. Churchill's schemes of Crown Colony developments.

### Letter from M. J. Gennadius.

The Nicosia *Voice of Cyprus* (*Phone tes Kyprou*), published lately extracts from a letter it has received from M. J. Gennadius, late Greek Minister in London, regarding the preservation of objects of antiquity, especially those of Christian epochs, which should not be allowed to leave the island. He refers to various objects sold at auction even quite recently in London which were evidently obtained from Cyprus, including Greek ecclesiastical manuscripts. "Do not," he says "blame the alien plunderings. Everyone is justified in buying any object of value that is offered for sale. Rather blame and punish the priests and superintendents of churches which they have sacrilegiously robbed, and the monks who do nothing themselves, but sell away what is valuable in the holy monastery which shelters and nourishes them." Such plundering still goes on. "If we ourselves" he says, "show such indifference, who shall respect our national aspirations?"

### The Government School of Agriculture.

The Government is doing its best to induce suitable students to enter this school at Nicosia. The synopsis of studies for a three years' course is published. Boys of 15 and upwards are admitted. Preference is given to those who have already received a good education in colleges and gymnasia, and all must have been educated up to a certain standard. The school provides lodging and light, and 12 piastres (1s. 4d.) a day. Studies for the coming term begin on October 15. When more is done for agriculture in general, the prospects of pupils should be brighter than they are at present.

# CORRESPONDENCE.

## "BEDOUIN."

*To the Editor of "The Near East."*

Sir,—As I have been, in my time, among those who thought that the word Bedouin was already a plural, until I learnt that it was derived from a French form of the Arabic singular, I hope you will permit me to substantiate my letter printed in your last issue (p. 483). I have consulted the Lord Almoner's Professor of Arabic, Prof. A. A. Bevan, and he has kindly allowed me to quote his statement:

"With regard to the origin of the French Bédouin, it is ,of course, well known thet there exists in Arabic a plural termination *-in*, and that in *literary* Arabic the word *badawi* would form a genitive and accusative plural *badawiyina* or *badawiyin*. But in modern times the plural of *badawi* seems to be *bidwan* (a so-called "broken" plural), and accordingly it seems to me evident that the French Bedouin is from the singular *badawi*, just as the French *Rabbini* corresponds to the Hebrew *Rabbi*, and the French *Moghrebin* to the Arabic *Magharbi*."

I am, etc.,
STANLEY A. COOK.

26, Lensfield Road, Cambridge.

---

*To the Editor of "The Near East."*

Sir,—In justice to your correspondent, "S.A.C." in to-day's issue, I must say he is correct. "Bedouin" is a French singular form, the plural of which is "Bedouins."

The Arabic singular Badawi or Badawi, makes its plural Badawiyoun in the nominative case, and Badawiyin in the accusative and genitive, which *colloquially* is shortened into "Badawin," but never in *writing*. In writing we mostly say "Arab Al-badu."

The French may originally have taken this colloquial form, and forgot that it was the original of their Bedouin.

In the same way the French Academy is exercised over their definition of "Midinettes," whereas it is a survival of "Medinet," a pure Arabic word for maiden.

## THE CASE OF THE DODECANESE.

*To the Editor of "The Near East."*

Sir,—I protest most vigorously against the expulsion of His Grace, Kyrios Apostolos, Metropolitan of Rhodes and Primate of the Dodecanese. This new pattern of Italian misrule in the Dodecanese reminds us of Germany's treatment of Abbé Wetterlé and Cardinal Mercier. The Metropolitan has been exiled to Patmos (the island of the Apocalypse) because he abstained from being present at the reception of the Crown Prince of Italy on his arrival at Rhodes. In such case, the Italians ought to exile all the Greeks of Rhodes, because, as I understand, with the exception of the Turks and the Jews not a single Greek of the town of Rhodes and the forty-four villages of the island took part inthe feasts which were held in honour of the Prince of Piedmont.

A month ago, when Count Bosdari, the new Governor, visited the Dodecanese he was presented by the inhabitants with votes not of welcome but of protest against the Italian occupation. Now, it has been the turn of the young heir of King Vittorio to know the truth himself; that his countrymen are not wanted in the Dodecanese.

I am, etc.,
Theodore D. Moscona.

Dodecanesian Delegation, Manchester, October 21.

## A SUGGESTED ANGLO-PERSIAN POLICY.

*To the Editor of "The Near East."*

Sir,—The denunciation of the Anglo-Persian Agreement of August 9, 1919, the return of the British Financial Adviser, the victorious resistance of the Turks in Asia Minor (which has again raised the prestige of Turkish nationalism), the new political situation in Afghanistan, the intrigues which the Turks are carrying on in that country, as well as in India, and the ever growing threat of Bolshevism, have led me to make the following remarks on the present situation.

In a work on European Policy in Persia (1) which I recently published, I considered in detail the policy of Great Britain, and I unfortunately arrived at the conclusion that British diplomacy has frequently taken a wrong course in Persia. I have endeavoured to find the cause of the failure, which was, perhaps, due to force of circumstances. In the presence of rival Powers such as Russia and Germany, England was sometimes obliged to sacrifice us Persians to secure her own interests. But once the Russian and German Empires were broken, we believed that the British Government would in all sincerity give us real support, both in our and her own interests. What has been done? The Congress of Paris was prevented from hearing the Persian Delegation, and there was concluded the well-known Agreement of August 9, 1919. This diplomatic instrument was useless and prejudicial to British interests—useless, because Great Britain could have derived all the economic and other advantages without the Agreement, and without this Agreement the friendship of Great Britain and Persia would have been strengthened; prejudicial, because it raised public opinion in Persia and elsewhere against Great Britain, and thus helped to bring about its failure.

To sum up the situation, the Agreement of 1919 has been denounced, the English Financial Adviser has been released and with him have disappeared the last traces of the Treaty. Persia who had hitherto considered Great Britain as a friend, is to-day thoroughly annoyed. There is abundant proof that the policy followed by the British Foreign Office since 1919 has not been the best. The same remark can be said of the Persian Government. Let us for the moment draw conclusions from the past with regard to future policy.

Speaking frankly Persia is to-day surrounded by four neighbours in regarding whom the Teheran Government must adopt a definite policy for a long period. The neighbours are Russia, Turkey, Afghanistan and the British Empire, without mentioning Armenia, the Baku State or the so-called "Azerbaijan Republic," and the Kingdom of Irak. Russia certainly is a permanent danger to Persia, since its frontiers adjoin, and it is a Power which naturally expands. And after all it is not expected that the lamb can form an alliance with the wolf. Turkey, I wish to say frankly, is the greatest danger Persia has yet experienced. She is a permanent national peril to us. Since the legendary wars between Turan and Iran, sung by Ferdousy, to the invasions of Tamerlan and Gengis Khan and the contests of Safavis with the Ottomans, the Turco-Mongols have been considered as our hereditary enemies. But to-day the Turkish danger is greater than ever, manifesting itself under the forms of *Panturanianism* and *Panislamism*, which are one. If the Afghans and Indian Mohammedans are led by the Panturanians of Angora, Persians will have nothing to do with them. The object of the Turkish Nationalists is to suppress Armenia, to incorporate the "Republic of Baku" which they have purposely called "Azerbaijan" in order to confound it gradually with the Persian province of Azerbaijan, to pass the Caspian Sea, to annex in one way or the other Turkestan and the "Turkish" portion of Afghanistan. The remaining parts of Persia and Afghanistan will then become vassal States, satellites of "Great Turkey." The Turkish danger is not merely a temporary political threat, it is a national danger for all the Iranian peoples: Persians, Afghans, Kurds, Baluchs, Tats, Tajiks, etc.

Afghanistan is the Eastern neighbour of Persia. Inhabited by a people of Iranian race and language it cannot be regarded with distrust. The only disquieting thing is the Turkish influence at the Court of Kabul. The Turanian danger threatens Afghanistan as well as Persia. They are the two great representatives and defenders of the Iranian race. But the Afghans are perpetually told that the Persians are Shiahs whilst they are Sunnis like the Turks. The name of "Panislamism" is used to destroy the roots of what might be called "Paniranism" which is the union (I mean 'moral' and not 'political') of all Iranians in the presence of the Turkish danger.

The fourth neighbour is the British Empire, but this does not mean England. For India cannot be considered an extension of Great Britain; it does not stand in the same position as the Caucasus and even Turkestan in regard to Turkey and Russia. It is not unknown that to-day certain Indians are working with foreign help to overthrow British rule in India, and if allowed to expand, it is possible to foresee a separation. Neither Persia nor Afghanistan, in my opinion, has any interest in helping to bring about this eventuality. The departure of the English from India

would mean civil war in this vast country, troubles on our frontiers, and serious injury to our trade and to our whole economic system. Neither Persia nor Afghanistan must have any political or territorial ambition in regard to India. The energy and activity of the two countries should be devoted to internal reforms, to public education, and so on. For to-day a nation is great only through a degree of higher moral and material civilisation.

Since Persia does not desire to see the position of Great Britain in India shaken, and since England has every interest in making Persia a friend and fellow-worker, it becomes evident that a new political relationship between the two nations must be inaugurated. The present state of things in Persia necessitates the help of England, and the latter in her own interest should take the opportunity and follow an entirely frank and friendly line of conduct. Had not the English by the Agreement of 1919 excited Persia, she would have demanded in preference to any other Power British advisers for a large number of departments. We proved this in 1911 when we asked for the services of Major Stokes, British military attaché in Teheran.

We hope that the British Government will form a truer conception of its real interests, which in my opinion are identical with those of Persia, and on the other hand that the Government of Teheran, looking ahead and giving up the "hand to mouth policy" will adopt a more truly rational course, and that the two Governments will endeavour to conclude a new treaty which will not infringe on the self-respect of Persia and will enable her to work peacefully on for her regeneration.

I am, etc.,
Dr. Mahmoud Afschar.

118 Queen's Gate,
London, S.W.

(1) "Politique Europeenne en Perse."—(*London: Lusac & Co*)

(Our correspondent inveighs against the Anglo-Persian Agreement of 1919, but neither in his letter nor in his recently published book does he substantiate his objection. The Agreement was a perfectly natural method of recording a friendly arrangement between the two countries. Dr. Afschar makes a quite unjustifiable insinuation in suggesting that "Great Britain could have derived all the economic and other advantages without the agreement." Great Britain sought no advantages and stood to derive no advantages from the agreement other than the indirect benefit accruing from a stable and progressive Persia. There was not a word nor a clause in the Agreement which was not entirely in harmony with the recommendations that Dr. Afschar now makes in the last paragraph of his letter. The Agreement did not raise public opinion in Persia against Great Britain; but public opinion in Persia, having taken a strong anti-British line, fastened upon the Agreement, and its denunciation provided the Persians with the only definite political goal which they were capable of holding before themselves. Dr. Afschar in his "Politique Européenne en Perse" made himself the spokesman of this foolish policy.

We gather from his letter that he has now realized that such a policy can only lead Persia more deeply into the morass of her own undoing, and that Great Britain alone has the goodwill and the power to save Persia from herself. On this point we are in entire agreement with him, as he is echoing what "The Near East" has always maintained. We would suggest, however, that Dr. Afschar will be rendering his country a greater service by preaching to his own countrymen and proclaiming among them his conversion rather than by pressing advice upon Great Britain. The next move is with Persia. Ed.)

## THE AROMOUNI OR KUTZO-VLACHS.

The traveller in Macedonia often sees swarthy men, of light but active build, usually engaged in wandering, or in tending flocks, in picturesque and peculiar costume. If he asks what they are he will be told "Aromouni," so that he frequently confuses them with the Romani, or Gipsies. They are, however, no relation of the Chinganieh, but are better known as Kutzo-Vlachs or Tsintsars. The former word means Lame Vlachs, that is, they are not true Roumanians, while the latter is an imitation of their language in which the sound "ts" occurs so frequently. But as both these names, which are constantly used by their neighbours the Greeks and the Slavs, are contemptuous, it is better to follow Cviyitch, and call them by the name which they use themselves, Aromouni, which means simply Romans, as does Roumanian, with whom they are akin.

Apart from the work of Thompson and Wace, and passing references to them in books on the Balkans, as, for instance, in Odysseus' classical "Turkey in Europe," there is little about them in English. This is strange, because they are a most interesting race. They are the survivors of the ancient Thracian tribes who were civilised by the Roman conquest and accepted the Latin language, of which their present-day speech is a descendant. There is an oft-quoted record of a muleteer in one of Rome's countless expeditions in the Balkans crying out to a comrade: "Torna, torna, fratre!" which is usually interpreted as meaning "Look round, brother!" but it more probably means "it is turning, brother," *i.e.*, the saddle is slipping round, for then as to-day, the Aromounes were specialists in pack-transport, which is still the main means of carrying goods in the Balkan peninsula.

They are a people almost without a national sense, a strange phenomenon, especially in the Balkans, where ethnic passions are so fierce. Their nearest approach to an appearance on the stage of history is in the XIIth Century, when a blend of Vlachs and Bulgars founded the Asen dynasty of Bulgaria, but here they are absorbed in the history of that Slavo-Tatar state. Formerly they extended over all the central and eastern Balkans, touching on the west the Illyrian tribes who survive in the Albanians of to-day. They formed a majority of the population in Thessaly and Aetolia, which were once known as Great and Little Valachia. There is a White Valachia in the northern part of the peninsula. They were known in Thrace in the XIIIth Century, and are recorded as early as the XIth in the Dobruja, where they connected up with their kinsmen the Roumanians. In mediaeval documents they are referred to as *Vlachs*, *Vlah* or *Vlasi*, which is connected by some with the Teutonic word *Welsch*, and our *Welsh*, meaning Strangers. To this day the Poles call the Italians Wlochy and Italy Wloszka. They are frequently referred to in ancient chronicles as dwelling in the mountain of southern Serbia and near Prizren. But in the Middle Ages the name of Vlah had already begun to lose its ethnical sense and come simply to mean shepherd, and was indiscriminately applied by the Turks to Greeks, Aromouns, and Slavs alike.

They are disappearing because they have been for centuries absorbed by their neighbours and so lost their identity. They seldom accept Islam, though there is a small colony of Mohammedan Vlachs in Eastern Macedonia near Meglen, who mingled with the Pachenegs, a Tatar tribe, and turned Mohammedan about two centuries ago. They have been largely assimilated by the Greeks and by the Serbs and Macedonian Slavs. Cviyitch has pointed out that of all Balkan peoples, it is the Aromouns and the Greeks who have been most profoundly impressed by the old civilisation of Byzantium, and to-day they betray many of its modern characteristics. They are most numerous in the Pindar mountains, where in the XVIIIth Century there were over half a million of them. To-day there are but about 150,000 or 160,000 left in their old stronghold. A few more are scattered about the mountains of the southern portion of the peninsula, from the Stara Planina in Serbia, and in Bulgaria to the Peloponnese. In the Sredna Gora in Central Bulgaria we find traces of an Aromoun colony, which was finally absorbed in the XIXth Century: they have left their impression in the place names of Latin sound, as Bunaya, Ursulica and others and in the type of village seen at Klisura, Kotel, Zheravna, and also on the mentality of the natives, who are far more vivacious, music-loving and imaginative than the stolid Bulgars of Tatar origin.

They are the last surviving purely European nomads, for the Kalmycks of Eastern Russia can be regarded as Asiatics, and are mostly engaged in cattle-breeding. Their headquarters are usually situated at an altitude of from 800 to 1,000 metres, and consists of closely-packed villages, where they spend the summer months, and leave their womenfolk and children when the men go down to the plains in the autumn, covering vast distances either to graze their flocks, or in petty trading, the *pechalba*. They reach the shores of the Aegean, and more rarely the Adriatic, and the plains of Greece. A few occur along the highways of the Balkans, engaged in petty commerce or plying the trade of inn-keeper, like the Greeks.

Though light of build, and very different from the heavily-framed Slav, they are lithe and active. In the great labour camps employed by the British Army in Macedonia, an infusion of Aromouns in winter had a

Digitized by Google

marked effect upon the work, for they were far more energetic and hard-working than the half-starved Greek refugees from Thrace and Anatolia who formed the bulk of the labour. These had but the vaguest idea of how to use a pick and shovel, but some Aromouns set them the example, and taught them how to throw a spadeful of earth over their shoulders. When they returned to their eyries in the spring, they were missed by the British sappers in charge. The younger ones, lithe lissom lads, with springy, elastic walk of mountaineers, reminded one of athletic English schoolboys.

Such culture as they have is almost entirely Greek, and they all speak Greek as well as their own language. During the ten years or so before the Balkan wars, Roumania, not wishing to be excluded from the great game of propaganda which was being so vigorously played in Turkish Macedonia, opened a few schools and taught them that they were Roumanians, but the total influence has been almost negligible. Their language is a variant of Roumanian, with a large admixture of Greek and Turkish words, but much less Slav, and is really a pure Latin dialect.

They marry young, and the bride is usually considerably older than the bridegroom. One shock-haired youth in a British camp once asked for a week-end leave. "What for?" enquired his officer. "To get married" replied the boy. "But you are only a child!" "I am fifteen" remonstrated the lad. "And how old is the bride?" asked the Englishman curiously. "Twenty. Why, if I waited till I were an old man of twenty, no girl would look at me" said the boy, "and besides, I want a woman who can look after me." The next day the wedding procession passed the camp. The bride in all her glory was riding a tiny donkey. On the third day the bridegroom was back in camp. He had sent his bride back to her people for a month, while he earned some more drachmae by his *pechalba*.

## MUSICAL NOTES.

### The Opera Season.

The opera season in London was begun on October 7 by the Carl Rosa Company at Covent Garden with a performance of Saint-Saens' "Samson and Deliah." It is said that this opera was chosen as a *première* on account of its popularity in this country, but why it should be popular is difficult indeed to discover. There is practically no music in it that is really individual, and nothing at all, apart from an aria or two, that is memorable. Its attractiveness must therefore be in its non-musical side, a side on which, it must be confessed, the management had not exercised too much imagination, though at once the exception must be made of the final note of the drama, in which Samson pushes down the walls of the temple and the Philistines perish in its ruins. This climax was wonderfully staged and retrieved the opera of its monotony. As a whole the performance was quite adequate, though certain weaknesses such as the lack of tone in the choral singing and in the representation of Abimelech could have been more easily forgiven if the opera itself had been first-rate, for the company knows its repertoire thoroughly.

### Pianists.

Bluntly, I was disappointed in Mr. Herbert Fryer's pianoforte playing at his recital at the Æolian Hall, on October 19. At the last Bach Festival he played splendidly, but here in a Chopin programme dullness reigned almost supreme There are certain things to be said of him, however; he had recently injured his finger, and the instrument he was using was an inferior one. His pianoforte had little beauty of tone, and, though perhaps Mr. Fryer was too sparing in his use of the sustaining pedal, the response of this member, most important in Chopin, was extremely poor. It is better to wait until his following recitals on November 9 and 15, to write at greater length.

Miss Mabel Dawkins, who gave a recital at the Æolian Hall on October 19, belongs to that type of young pianist, unhappily fast increasing, which should not perform in public at all. That she had received sound technical tuition was possible, but of musical intelligence there was scarcely the slightest trace. Beethoven's Sonata in E flat (Op. 81.a.) was done perfunctorily and with no architectural sense, and coming after a vapid "Ballade" of Tobias Matthay, its effect was doubly unpleasant. Debussy's two "Arabesques" were remarkable for their perversions of the rhythm, though it was not unamusing to watch Miss Dawkins' sprints down the straight whenever a *stringendo* passage was approached. She was assisted by Captain Heyner, who sang some English songs pleasantly enough, but with hardly enough art to dispel the prevailing gloom.

### John Coates.

It is doubtful whether the greatness of John Coates is sufficiently recognised in this country. His art in singing and his efforts to advance the cause of song are not easily paralleled in any country. I do not pretend that such a recital as he gave at the Chelsea Town Hall on October 18—the third recital devoted to the songs of twenty English contemporary composers—had not many points of weakness, but the defects arose rather from generosity than from misconception or shortcomings. It is extraordinary how he can make a bad thing seem good, though one has learned now to suspect his powers of wizardry. There were bad songs in his recital, *e.g.* Cowen's "At the mid-hour of night," Herbert Brewer's "An idyll," and Landon Ronald's "Love in Dreams," but he easily persuaded his audience that this was not so. The most interesting of his newer songs was Orry Corjeag's setting of A. E. Housman's magnificent "Epitaph" (Ypres No. 1), a setting almost inevitably inferior to the verse but sincerely attempting to the proud strength of the poem. Another unpublished song was Hurlstone's "That time is dead for ever," which has a striking, recurrent conception and a few good points of detail, but as a whole was disappointingly poor. In other songs, like "Immanence" or "An inconsequent ballad," the accompanist did not play up to the singer, and their effects were consequently spoiled. The one point of violent disagreement which I found with the solo artist was in Mallinson's "Eldorado," his interpretation of which I thought a monstrous imposition. For the sake of some magic painting of the word "Eldorado" he was content to wreck the onward rhythm of the song. But these things are insignificent compared with his larger successes. It is at once a pleasure and an education to hear him, and I may note here that his next English song recital will be at the same hall on November 8, when he will sing old songs of the Tudor, Elizabethan, and Stuart period before Purcell.

### General News.

On November 2, at the Æolian Hall, Costopol Aïdonne d'Etolie, the Roumanian prima donna, will give a song-recital. Mlle. d'Etolie showed musical ability at a very early age, and began her studies in pianoforte and singing at the Bucharest Conservatoire. She was taught by Mme. Carlotta Leria, who was a pupil of Mme. Viardot Garcia. In 1913 she went to the Imperial Academy at Vienna, and made her first appearance as "Marguerite" in "Faust." She has since appeared in Breslau, Charlottenburg, and Munich, and of course, has given many recitals in Roumania itself. On December 6, 1915, she had the honour of singing before Her Majesty the Queen of Roumania, and the Crown Princess of Greece.

Her programme, which contains songs in English, French, Italian, Roumanian and Greek, is an unusually interesting one. Her enterprise is particularly notable in putting down Roumanian and Greek songs which are unknown to English audiences. The two Roumanian songs, "Mi-e dor" and "Flueras" are by Andreescu-Jassy; and it was under the young composer's baton that Mlle. d'Etolie gave, with orchestra, the first its first performance. Andreescu-Jassy, a protegé of Coquelin, has written symphonies, but possibly his best known work is a symphonic poem called "The Dreamer of Dreams," and inspired by a romance written by "Carmen Sylva," who, it will be remembered also prompted the writing of one of Arnold Bax's early, yet beautiful, orchestral works. The two Greek songs, by Xantopoulo and Samara respectively, are called "Diati" and "Mana ke ios," and have been chosen to illustrate the vivid differences in individual treatment of popular songs. Samara, who died a few years ago, is considered the best Greek composer. He studied chiefly in Italy, and has written, among other things, some operas.

# NEAR EAST BOOKSHELF.

## "LAUGHING AT OURSELVES."

**"THE CIVILIAN'S SOUTH INDIA." By "Civilian." (London: John Lane. 12s. 6d. net.)**

We can recommend this book as pleasant reading. It consists of a cheerful description of every-day life in the Madras Presidency, and the writer has escaped most of the dangers into which Anglo-Indians attempting similar tasks are accustomed to fall. There is practically nothing of politics, only the indispensable minimum of administrative detail, not too much about sport, and on the other hand the descriptions of scenery are unusually convincing. The author has adopted the difficult method of picture-making which may be called humorous exaggeration, but his choice is justified by success. One of Elia's Caledonian antipathies might contend with strict accuracy that many of the statements which he makes are, taken by themselves, untrue; yet to the discerning reader the cumulative effect of exaggeration and paradox is a definite picture, which is probably very near the truth. Above all, the book is cheerful, and, for ourselves, we assent with the utmost cordiality to the concluding apologia, "Let us at least be thankful that we can laugh at ourselves, for then we are the less likely to be laughed at by others."

## A COMEDY ROYAL.

**"EUDOCIA." By Eden Philpotts, (London: Heinemann, 7s. 9d. net)**

"History is but a reverberation; and the forces that brought down the Byzantines similarly combined against against all earlier civilisations and will resolve all later . . . The Comedy is not, therefore, archaic; but read in the light of to-day, alive—at least in spirit."

Thus Mr. Eden Phillpotts in the Foreword to his latest book, which deals with events of Christian Constantinople in the days that followed the death of the great Constantine. To those readers (among whom the reviewer is one) who have grown to regard the West Country as Mr. Phillpotts' particular field of interest, it will seem strange to follow him to such scenes, and among such people; and it is certain that the author ran increased risks of failure in this type of romance by very reason of his fame in another. But he has not failed; the book contains passages which bear the impress of greatness even though the book is not in itself great. The opening chapter, where Sarus, the Jester, harangues Michael, the son of Constantine on the subject of court intrigue, and wherein many of the protagonists are introduced, is disappointing to the verge of dullness. Disappointing also is the first introduction of Eudocia, the Empress, and the splendour of her court. It lacks the mystic touch which carries with it the breath of the Orient, and lacking this no words may give it warmth. Gradually, however, such points are forgotten as the plot unfolds. The delineation and working of the various characters leave nothing to be desired excepting perhaps that of the central figure Eudocia. The vagueness, which, to our minds marked her entry, clings to her until the last. When the story opens plotters are already at work on a scheme for the deposition of the Empress in favour of the joint kingship of John Ducas, brother of the late Emperor, and Michael, youthful son of Eudocia. The Empress, being under oath made to her Royal spouse on his deathbed to forgo matrimony a second time, is powerless to satisfy by marriage the popular demand for a king; powerful factors led by the Patriarch maintain that only a male ruler can save the country from destruction. Foremost among the loyalist, Nicephorus, the Prime Minister, and Romanus Diogenes, idol of the Army, are indicted for treason and consigned to the fortress at Marmora, the former for having parleyed with Alp Arslan, leader of the Saracen foe the latter for having openly expressed the wish that he might marry the Empress—sworn to widowhood. Both are subsequently released, and from the time that Nicephorus returns to Court the book is irresistibly fascinating. In the chapter where this wily statesman debates with Xiphilus, the Patriarch, upon the morality of the vow extracted from the Empress at the death bed of her consort, Mr. Phillpotts has excelled himself. Bardas, brother of the Patriarch, has recently been promoted to open favour by Eudocia; Nicephorus, no longer holding office, but still pulling the strings of his country's destiny, sets out to fill the eyes of the plotting Patriarch with visions. How well he succeeded we must leave the reader to find out for himself, assuring him of an ample meed of excitement in his quest. We leave the book with a two-fold feeling of regret, sorry in the first place that the tale is over, sorry in the second place that Mr. Phillpotts, having done so much, did not exercise the little extra care which in our opinion would have placed this book high among the best of the decade.

## THE SCIENCE OF POLITICS.

**"PRINCIPLES OF POLITICAL SCIENCE" By R. N. Gilchrist (London &c., Longmans Green and Co. 18s. net).**

Principal Gilchrist of Krishnagar offers this book primarily for the use of students of Indian Universities. The offering is substantial—eight hundred pages apart from the bibliography—and, so far as we can judge, the book contains practically everything which such students ought to know. We must however, leave the task of reviewing it in detail to specialist journals; it is definitely a text-book, and cannot be recommended to the general reader.

October 27 (New Style).
October 14 (Old Style).
Safar 25, 1340 A.H. of the Moslem Calendar.
Tishri 25, 5682 of the Jewish Calendar.

The Minister of the Kingdom of Serbs, Croats and Slovenes returned to London last week from Paris.

Dr. Kumamidi, the Yugoslav Minister of Finance, has arrived in London from Belgrade.

M. Yovanovitch, the Yugoslav Consul-General, and Madame Yovanovitch, arrived in London last week from Belgrade.

At University College last week Dr. Pinches, of the Department of Assyriology, lectured on "Babylonian Magic."

Sofia telegrams report that M. Dimitroff, the Bulgarian Minister of War, was assassinated while motoring to Kustendil.

The Persian Minister in London, Sir Davood Khan, paid a visit last week to the Bible House of the British and Foreign Bible Society, where he was received by Sir George Scott-Moncrieff.

A marriage has been arranged, and will take place shortly at Constantinople, between Lieutenant-Colonel Claude Bayfield Stokes, 3rd Skinner's Horse, and Olga, daughter of Lieutenant-General and Mrs. Postovski.

The engagement is announced of Major Alfred (Tab) Lethbridge, 54th Sikhs (Frontier Force), and Margery, eldest daughter of the Rev. G. H. Cockerton and Mrs. Cockerton, of Musbury, Devon.

Captain George Stuart Henderson, V.C. (2nd Manchester Regiment), of Mounthooley, Jedburgh, N.B., who was killed in action in Mesopotamia, left estate valued at £434.

Mrs. Rosita Forbes, the explorer and traveller, was married at the Chapel Royal, Savoy, ton October 22, to Lieutenant-Colonel A. T. McGrath, D.S.O., of the Royal Artillery.

Major-General Charles Smith McLean, of Oaksleigh Sarisbury Green, Hampshire, late H.M. Consul-General at Khorassan and Seistan,and an Indian Mutiny veteran died leaving £796.

A marriage has been arranged, and will take place at Lahore in November, between Major W. K. P. Wilson, 30th Punjabs, and Aileen, only daughter of Mr. and Mrs. P. J. Fagan, Lahore.

The opening meeting of the forthcoming session of the Royal Colonial Institute will be held on November, 8 when Lord Chelmsford, late Viceroy, will give an address on India.

The engagement is announced of Commander Bertram Hughes-Hallett, Royal Indian Marine, second son of the late Colonel Wyndham Hughes-Hallett, Indian Army, and the Hon. Frederica Somerset, second daughter o! Lord and Lady Raglan.

An engagement is announced between Stephen H. Longrigg, younger son of Mr. and Mrs. G. Hemsley Longrigg, of 33, Talbot Road, Highgate, and Florence elder daughter of Mr. H. A. Anderson, C.S.I., of Lansdowne Crescent, Edinburgh.

The engagement is announced between Major H. C. F. Drader, M.C. (late Tank Corps), son of Mr. and Mrs. H. F. Drader, of Ploeste, Roumania, and Letitia Lilian, only daughter of Dr. A. E. Neale, WA.M.S., and Mrs. Neale, of Moscow Mansions, S.W.5.

Mr. Humphrey Bowman, C.B.E., Director of Education, Palestine Government, and Mrs. Bowman were among the passengers leaving Marseilles on the s.s. Caledonia, on October 23, and are expected in Jerusalem towards the end of the month.

The marriage was celebrated on October 20, at Christ Church, Luton, by the Rev. Canon Morgan Smith, between Richard Weymour Williams, Egyptian Civil Service, and Frances Folliott, youngest daughter of Mr. and Mrs. William Austin, of Rye Hill, Luton.

The engagement is announced of Mr. Severin Oswald de Bilinski, C.B.E., Managing Director of the National Bank of Turkey, son of the late General de Bilinski and Mrs. de Bilinski of Constantinople and Cairo, and Adriana Hilda, youngest daughter of the late Mr. and Mrs. H. A. Liebbrandt of Cape Town, S. Africa.

The engagement is announced of Maud, the only daughter of W. G. Skipworth and the late Mrs. Skipworth, of Brookhurst, Slinfold, Sussex, and Captain J. H. Michell, 39th (K.G.O.) Central India Horse and Small Arms Staff, India, youngest son of the Rev. J. H. Michell, St. Sennen, Cornwall.

Mr. William King Wood, of Teheran, Persia, director of the Persian section of the Indo-European Telegraph Department, who saw service in the Boer War, and, during the recent war maintained telegraphic communication through Persia despite German opposition, left £2,906.

The engagement is announced between Captain A. E. Farwell, 15th Sikhs, son of the late Lieutenant-Colonel W. C. Farwell, I.A. and of Mrs. Manning-Kidd, Oxenways, Membury, Axminster, and Winefred, youngest daughter of Mr. J. Impey Scarborough, Coly House, Devonshire.

The engagement is announced, and the marriage will take place in January, in India, between Captain A. Douglas Gordon, 16th Cavalry, Indian Army, second son of the late Mr. H. H. Gordon, and Mrs. Gordon, of Broughty Ferry, and Margaret, elder daughter of Mr. and Mrs. H. V. Masefield, 9, Evelyn Gardens, S.W.

The engagement is announced of Captain R. G. Sanders, 38th Dogras, youngest son of Colonel G. L'H. Sanders, Indian Army (retired), and Mrs. Sanders, and Eileen, only daughter of Mr. Arthur Pickard, of White Lodge, Esher, and 60, Albert Hall Mansions, S.W.7., and the late Mrs. Pickard.

Mr. Srinivasa Sastri, the Indian delegate to the Washington Conference, will be accompanied by Mr. G. L. Corbett, Deputy-Secretary of the Government of India, as civil adviser, by Colonel K. Wigram as military adviser, and by Mr. G. S. Bajpai as secretary. The delegation was due to sail in the Olympic yesterday.

A marriage has been arranged, and will shortly take place at Lahore, between Major William Kenneth Pollexfen Wilson, son of Captain George Wilson C.I.E., R.I.M., and Mrs. Wilson, of Dyke House, Chancer-road, Bedford, and Alleen, daughter of Mr. Patrick James Fagan, C.S.I., I.C.S., Financial Commissioner, Punjab, and Mrs. Fagan.

A marriage has been arranged, and will take place on November 22, at St. Cuthbert's Church, Earl's Court, between Ernest Lionel Forward, M.R.C.S.Eng., L.R.C.P. Lond., youngest son of the late Samuel Forward, of

Digitized by Google

Chard, Somerset, and Aileen Frances, only daughter of Charles Stewart Middlemiss, C.I.E., F.R.S., of Srinagar, India, and Mrs. Middlemiss, of Crowborough, Sussex.

A marriage has been arranged, and will take place on November 16, at Lucknow, India, between Major E. S. Harcourt, M.C., 7th Gurkha Rifles, son of the late Colonel G. J. Harcourt, Royal Dublin Fusiliers, and of Mrs. Harcourt, 38, The Pryers, Hampstead, and Nancy, eldest daughter of Major-General Sir Edwin, and Lady Atkinson, Hythe, Kent.

A marriage will take place shortly in Egypt between Captain P. Kenneth Boulnois, N.C., R.E., youngest son of Mr. and Mrs. H. Percy Boulnois, of 34, Evelyn Mansions, S.W.1., and Violet, youngest daughter of the late Lieutenant-Colonel Charles W. Long, sometime M.P. for South Worcestershire, and Mrs. Long, of 38, Lowndes Square, S.W.1.

The engagement is announced of Leonard Middleton. I.C.S., Punjab, younger son of Mr. and Mrs. J. W. Middleton, Acacia House, Shanklin, Isle of Wight, and Muriel Edith, eldest daughter of Mr. and Mrs. William Charlton McKechney, Knole Cottage, Wimbledon Common. The marriage will take place on November 12, at Lahore.

A marriage has been arranged between Captain Charles O. R. Mosse, M.C., 120th Rajputana Infantry son of the late Colonel Oliver Mosse, Indian Army, and Mrs. Mosse, and Marian (Molly), elder daughter of Sir J. and Lady Barber, of Ootacamund, S. India. The marriage will take place at St. Stephen's Church, Ootacamund, on November 9.

The engagement is announced between Major Frederick B. Geidt, M.C., late R.F.A., second son of the late Mr. Justice B. G. Geidt, I.C.S., of the High Court, Calcutta, and step-son of Mrs. Geidt, of 167, Victoria Street, S.W., and Audrey Willmer, second daughter of Dr. Percival White, M.V.O., and Mrs. Percival White, of Becketts, Hartley, Wintney, Hants.

A marriage has been arranged, and will shortly take place, between Owen Cecil Kirkpatrick, Corrie, M.C., Vice-President of the Palestine Court of Appeal, only son of Mr. J. O. Corrie, F.R.A.S., of Lincoln's Inn, and 95, Church Road, Upper Norwood, and Ivy Isabel, youngest daughter of the late Henry Digges La Touche, M.I.C.E., Chief Engineer, P.W.S., Madras, India, and Mrs. Henry Diggs La Touche, of Lansdown, Bath.

The Bishop of Gibraltar has started on an eight months tour through his very scattered diocese, which includes the whole of South Europe and Asia Minor. The Bishop has recently sent to Roumania an itinerating chaplain, who will have under his care not only the British in Bucharest, but also those working at the Danubian ports, and on the oilfields, and in other parts of Roumania.

The marriage arranged between Mr. Hugh Stanton Chatfield, barrister-at-law, Inner Temple, and of Cotton Hill, Trevandrum, South India, younger son of Mr. Kyrle M. Chatfield, of The Argoed, Penalt, Monmouth, and Miss Edith Mary Moore, younger daughter of the late Mr. John Moore, Wellington Park, Belfast, and Mrs. Moore, will take place at Christ Church, Newgate, on November 1.

Under the auspices of the Royal United Service Institution, Whitehall, a series of lectures will be delivered on Wednesday afternoons during the coming winter, among those announced being:—January 18, "Some Reflections on the Cavalry Campaign in Palestine," by Colonel-Commandant G. A. Weir, C.M.G., D.S.O., commanding 3rd Cavalry Brigade, and March 8, "The Development of Communications in the Middle East and their Strategic Importance," by Colonel W. M. St. G. Kirke, C.N., C.M.G., D.S.O., Deputy Director of Operations.

Captain H. E. Poynter has been appointed President of Baldwin's Canadian Steel Corporation, Toronto, and will be leaving for Canada shortly, accompanied by Mrs. Poynter. Before the war Mr. and Mrs. Poynter were resident in Constantinople, and they have travelled much in the Near East and in the Far East. Some of the experiences acquired on their travels and during their residence in Turkey are embodied in two charming books by Mrs. Poynter: "Around the Shores of Asia" and "When Turkey was Turkey," which were published this year and are proving extremely popular.

## APPOINTMENTS & PROMOTIONS

Captain Bouboulis has been appointed Naval Attaché to the Greek Legation in London.

M. Lysimachos Caftanzoglu has been appointed Greek Envoy Extraordinary and Minister Plenipotentiary to Madrid.

The Hungarian Official Journal publishes the agreement of the Government to the appointment of Mr. Laurence Milner Robinson as British Consul in Budapest.

Lieutenant-Commander S. H. S. Moxly has been appointed Naval Transport Officer in charge of Constantinople. He succeeds Lieutenant F. H. West, R.N.R., who has held the post temporarily.

## OBITUARY

Sir Joseph Frizelle, a former Chief Judge of the Chief Court of the Punjab, died recently at his residence at Jersey, in his eighty-first year. He passed the Indian Civil Service examination of 1862. After a brief period in the United Provinces, he was appointed to the Punjab Commission, in which he spent nearly thirty-three years. He reached the grade of Divisional Judge in 1884, and in May, 1889, he went to head-quarters as a Judge of the Chief, now the High Court of the province. Before his retirement at the close of 1898, he was for some months Chief Judge, and at the end of his services were rewarded with a knighthood.

The death has occurred at Keenthorne House, Fiddington, Somerset, of Thomas Withey Cuffe, Sheriff of Bombay of thirty-three years. Born in Somersetshire in 1852, Mr. Cuffe went out to Bombay as a young assistant in the firm of bankers and agents of which Sir H. Seymour King is the head. For many years he was an important member of the firm of King, King, and Co., Bombay, and for a great part of the time he served on the Bombay Municipal Corporation. He was chairman of its Statutory Standing Committee in 1901-2.

## THE PRINCE'S TOUR.

Once again the Prince of Wales has set out on an Empire tour, which will prove, we fervently hope, as interesting and inspiring to him as it must needs be important to India and to the whole British Commonwealth of Nations. From his visits to Canada and Australasia His Royal Highness returned an accredited Ambassador of Empire, and it is in the same exalted rôle, which he has made peculiarly his own, that he visits the Great Dependency at, perhaps, the most critical stage in its history. To the pride and pleasure with which the people of Great Britain followed his successful progress through each Dominion in turn will be added this time some measure of anxiety, not because there is less confidence in the powers of the Prince to win the hearts of all those with whom he comes in contact, but for fear lest unreasoning prejudice on the part of a few irreconcilables should detract, however slightly, from the maximum advantage that India stands to derive from the visit. For in the Prince's presence among them the peoples of India have a unique chance of strengthening the bond of their own unity. Their thoughts are turned towards self-government; but they know that divided against herself India cannot stand. Yet in her complexity of races, languages, religions, laws and institutions, there are no connecting links that would hold all together, if the country were left to itself. To-day, however, from every unit of that vast aggregation, lines, as it were, converge on the Imperial Crown and consequently on him, who, in the providence of God, is destined to assume it. The Prince's visit is to all sections of the community; one and all should feel that for the nonce no one stands between them and their future Sovereign. On that common ground, adequately developed, they can surely best establish the solidarity without which India cannot prosper. Let those of her people who pride themselves on their political knowledge and sagacity ponder these things.

For the rest it is to be hoped that in the varied programme of the tour due care has been taken that the high tension involved in State ceremonials and functions of a political character shall be adequately interspersed with periods of rest and relaxation. The ground to be covered is so vast, the phases of Indian life—not forgetting the British community—to be investigated so numerous, that it is impossible that the Prince should not feel at times the physical strain. But His Royal Highness will be followed throughout his long tour by the wishes and the prayers of the Empire that health and strength will attend him for the successful accomplishment of the high purpose on which he has embarked.

## A MOMENTOUS DECADE OF INDIAN HISTORY.

*(By Sir Valentine Chirol.)*

The ten years which lie between the Indian progress of the King and Queen at the end of 1911, and the impending visit of the Prince of Wales, have been no ordinary years in the history of the world or in the history of the Indian Empire. They have witnessed the Great War with all its cruel vicissitudes and triumphant close, but only the beginning of the vast changes conceived in the tortured womb of war. From the more subtle changes, not shown by violent transfers of territory or by huge war indemnities or by the crash of falling dynasties, the victors have been no more immune than the vanquished. But deep as are the honourable scars and grievous the burdens of war which the British people will bear for generations to come, they have at least emerged with an increased faith in the unity of the Empire and a quickened loyalty to the Crown as the symbol of Imperial unity, and in these no part of the Empire has been given a larger opportunity of sharing to the utmost of its capacity than India.

Only a decade ago the King-Emperor went out to receive in the pomp and circumstance of the great Delhi Durbar the homage of the Princes and peoples of a sub-continent which was still ruled mainly on autocratic lines as a mighty dependency of the British Crown, but still only a dependency, and to that extent still in a position of implied inferiority to the Oversea Dominions, which already enjoyed the higher privileges of self-government. Since then the world war has raged and been fought out. In the hour of destiny in 1914 India responded with a splendid outburst of enthusiasm to the call of the Empire. Her gallant army fought shoulder to shoulder with the British armies from our own islands and from all our oversea Dominions and possessions, and during the worst months of the critical winter 1914-1915, Indian troops filled, and were alone ready and equipped to fill, the desperate gaps on the Western front which, until the Kitchener armies and the Dominion contingents had time to train, there were none others to fill after our first expeditionary force of "Contemptibles" had been gloriously decimated in holding up the tremendous German onrush that was to have pulverised France. Later on, and on every far-flung front, Indian troops "did their bit," in East Africa and on the Canal, in Mesopotamia, and in Syria, where the Indian cavalry at last found their opportunity in the great sweep which broke the remnants of the Turkish armies. From first to last India had over a million men under arms. Nor was it on the battle-field alone that she did yeoman's work for the Empire. The Indian Legislative Council spontaneously proposed the grant of £100,000,000 towards Imperial war expenditure, and another £140,000,000 of Indian money went into Indian war-loans. India became one of the great sources of food-supply for the Allied armies, and her industries and natural resources of all sorts were stimulated and explored as never before under the pressure of war requirements. Without the intensive production of the Tata Iron and Steel Works, initiated, controlled and financed by Indian enterprise alone, the railways essential to the conduct of modern military operations on a vast scale could never have been laid in the waste region of Mesopotamia or across the waterless desert between Egypt and Palestine at a time when, apart from the submarine danger to transport from England, the British metallurgical industry was hard put to it to keep up with the colossal demands made upon it for the Western Front.

The British people and the British Government were not slow to acknowledge the value of India's contribution to the defence of the Empire, and of the loyal spirit in which it was made. At an early stage of the war the Prime Minister declared emphatically that Indian questions would have to be approached hence-

Digitized by Google

forth "from a new angle of vision." That India was qualifying to occupy a new and higher place in the fabric of Empire was definitely recognised when at a moment of supreme stress. Indian representatives—on the first occasion the Maharajah of Bikanir for the Native States and for British India Sir Satyendra Sinha, (now Lord Sinha) the sober spokesman for many years past of Indian national aspirations—were invited to attend the two great War Councils of the Empire held in London, and to take their places beside British Ministers and the Prime Ministers of the self-governing Dominions.

No less significance was attached in India to the statements of British war-aims in which Ministers repeated with increasing emphasis that the life and death struggle of the Empire was essentially a struggle for liberty and for the right of every nation, great and small, freely to shape its own destinies. For at least a generation a class of Indians, numerically small but wielding an actual and potential influence over Indian public opinion far in excess of their mere numbers, had been demanding with increasing insistency the much larger share in the government and administration of their country which they believed themselves entitled to claim, not only in virtue of their own qualifications to share the responsibilities of Government, but on the strength of the many promises from time to time made to India by her British rulers. That class was above all others the offspring of British rule and of the Western education which British rule had imported nearly a century ago into India, with the deliberate object, in the eyes of many of the greatest British administrators of that period, of training the Indians to govern themselves. When the great storehouse of British literature was thrown open to Indians, and they began to study the evolution of Western civilisation, and more especially the history of the British people and of their political institutions broad-based on freedom, they were not slow to ask themselves and to ask their British rulers why India should be denied the application of the principles and methods on which the greatness of the British Empire had been built up. Such response as they elicited seemed even to the most moderate Indians unduly slow and reluctant, whilst the issue was obscured by the violent form which political agitation assumed under the impulse of a section compounded partly of reactionary and partly of revolutionary elements, bent not on reconciling British rule with a growing sense of Indian nationhood, but on eliminating it altogether and bringing India back to a more or less mythical "golden age" when, uncontaminated by the breath of Western civilisation, she was supposed to have been free and wise, and wealthy beyond all the nations of the earth.

Successive waves of political unrest rose and fell, and only subsided for a time even during the Great War, of which India was spared both the worst horrors and the stern discipline. But even the most extravagant forms of political agitation could not seriously detract from the solid value of her war-services, maintained throughout at the same high level, which showed how real and widespread was the appreciation of what British rule had done and still meant for the peace and progress of her many and heterogeneous peoples. Never had the unifying effect of British rule upon India as a nation nor her title to rank as one of the nations of the Empire been so fully demonstrated as in the sustained effort which had united princes and peoples in the common cause of the Empire. At a time when the frightful ordeal of war was testing the relationship between all the component parts of the Empire, the way in which India had stood the test was enough to justify, at any rate from that point of view, her claim to be admitted to relationship of a higher status than she had hitherto enjoyed. So much a Government that represents the whole Empire was precluded from denying by the general principles which had been proclaimed to inspire British war-aims as well as by those which had always differentiated the purpose of British rule in India from mere domination.

At the same time conditions peculiar to India, the diversity of her races and creeds and customs, all strangely remote from our own, the backwardness of the vast majority of her population, the lack of training and experience in the conduct of public affairs, even amongst the classes that had been gradually drawn into the orbit of Western civilization, and the menacing attitude of irreconcilable factions made it impossible to relax wholly and abruptly the political tutelage in which India had been hitherto held.

A *via media* was sought in the famous declaration of August 20, 1917, which announced that the purpose of British policy in India was not only the increasing association of Indians in every branch of the administration, but also the greatest development of self-governing institutions in successive stages with a view to the progressive realization of responsible Government in India as an integral part of the British Empire. In pursuance of that declaration, the Secretary of State for India, Mr. Montagu, went out in the following winter to conduct jointly with the Viceroy, Lord Chelmsford, an inquiry on the spot into the best means of translating into practice the policy which he had been authorized to lay before Parliament. The results of this inquiry—the first exhaustive inquiry into the state of India since with the transfer of India to the Crown after the Mutiny the grand inquests had been dropped which invariably preceded the periodical renewals of the East India Company's charter—were embodied in a Report which, in spite of all the abuse and even ridicule poured out upon it at home and in India by the stubborn advocates of "masterly inactivity," will certainly rank amongst the monumental landmarks of the constitutional development of the British Empire. It was the basis of the Government of India Act of 1919, which, whilst reserving to the Supreme Government and within their own sphere to the Provincial Governments the power to assert in the last resort the authority with which they remain invested in discharge of their responsibility to the British Parliament for the peace, welfare and security of India, has created all-Indian and Provincial representative assemblies, elected on the broadest franchise at present practicable and has assigned in the provinces a number of important branches of the administration to Indian Ministers who are themselves answerable to their own Provincial Councils and therefore to the large Indian majority that sit in them.

This constitution is one of the boldest of the many bold experiments which make up the unique history of the British *raj* since the charter granted by Queen Elizabeth in the last year of her reign encouraged a handful of London "merchant-venturers" to cross unexplored seas and to found on the remote and then almost unknown shores of India, a few small trading settlements destined to grow into the British Indian Empire. Welcomed by the bulk of the educated classes as a great instalment of the promised boon of self-Government within the Empire, it has aroused all the hostile forces inveterately opposed to the British connection and to the civilisation which it connotes into an unprecedented frenzy of resistance, which has taken shape in the "Non-co-operation" movement. Despite the sinister features of an agitation that appeals chiefly to the religious emotions and the economic grievances of the ignorant masses, there is ample reason to hope that good will ultimately come out of evil. For the extravagant doctrines preached by such strange bedfellows as Mr. Gandhi, the Hindu saint and prophet, and the Mohammedan *Khilafat* agitators, have been already so often followed by deplorable outbreaks of violence that they have driven in a deep wedge between the Indians who put their trust in peaceful constitutional progress, and those who clamour for a complete and immediate severance of every tie between India and a civilisation no less "satanic" than the Government for which it stands. So far "Non-co-operation" has failed repeatedly. The elections for the popular assemblies, which they tried hard to kill in the womb by an organised boycott

Digitized by Google

of fierce denunciation and intimidation were duly held and in most parts of the country with more conspicuous success than might have been expected from a largely inexperienced electorate. The Assemblies themselves, on the whole fairly representative of all creeds and races and classes and interests, except the "Non-co-operators" excluded by their own default, met in due course, and were opened in the name and on behalf of the King-Emperor by the Duke of Connaught who was eminently fitted by his old acquaintance with India, and his singular tact and kindliness to discharge a right royal mission. It was a great historic moment when, on February 9 last, at the opening of the All-Indian Legislature in Delhi, His Royal Highness read out the generous message in which the Sovereign, courageously ignoring the disloyal implications which had not long ago attached to the word *Swaraj*, himself employed it and gave it a new meaning. "For years—it may be for generations—patriotic and loyal Indians have dreamed of *Swaraj* for their motherland. To-day you have the beginnings of *Swaraj* within my Empire, and the widest scope and ample opportunity for progress to the liberty which my other Dominions enjoy." From that moment India ceased to be a mere Dependency of the Crown, for the Sovereign himself had admitted it explicitly to partnership with his *other* Dominions. Whilst the creation of a Council of Princes marks so far only a pious endeavour to draw the Native States as a whole into closer communion with the rest of British India, directly administered by the Supreme Government, the new legislative bodies of British India have already given remarkable proofs of ability, moderation and self restraint in the transaction of parliamentary business during their two first sessions. With the presence of three Indian members in the Viceroy's Executive Council, and of Indian Ministers in every Provincial Government, as well as of large Indian majorities in every legislative body, Indians feel that henceforth they will have in the shaping of policy sometning of the influence possessed by the peoples of the self-governing Dominions. At the same time their sense of partnership has been confirmed at the Imperial Conference, or Cabinet, recently held in London, where not only did Indian representatives sit side by side with British and Dominion Ministers as at the previous War Councils and at the Paris Peace Conference, but for the first time one of the Indian representatives, Mr. Srinivasa Sastri, was a distinguished member of the new Indian Legislature called into being by the great Government of India Act of 1919, the first charter of Indian self-government.

It is to this new India, no longer as in 1911 a mere dependency, however eminent, but a partner, albeit still a junior partner in the British Empire that the heir to the Throne goes out now on his own embassy of royal good-will—a fitting sequel to the embassies on which he had previously proceeded to the older Dominions which have already learnt to combine approved loyalty to the Crown with a growing sense of their own distinct nationhood. At home and in every part of the Empire which he has already visited his many endearing qualities have won for him an unusual measure of personal affection. They cannot fail to do so in India too amongst people quick to respond to the appeal of a frank and generous disposition and imbued at the same time by all their religious traditions with a peculiar reverence for the almost divine attributes of royalty. Above all the Prince of Wales who has been reared in the democratic atmosphere of these islands, and has acquired during his strenuous years of war-service in France the habits of broad and genial comradeship, which are bred of common partnership in a tremendous ordeal, is thus pre-eminently qualified to stimulate between men of all races and classes, Indians and Europeans, the spirit of genuine and close co-operation and of equality in public endeavour, upon which must in the long run depend the success of a great constitutional experiment destined to bring India, despite the many peculiar difficulties still to be surmounted, into full and equal association with the great democracies of the British Empire.

## YOUNG INDIA AND OLD.

(*By Janus.*)

*Bliss was it in that dawn to be alive,*
*But to be young was very Heaven.*

So wrote Wordsworth, looking back to the days when as a mere lad he had watched the re-birth of a great nation, and so, when they are a little older, will say many young Indians who at the moment are in a somewhat critical mood, and inclined to belittle all that has been done in the course of the last four momentous years. When the vision clears, they will see that these years have marked a definite breach with the past, and have opened up for India a future of unlimited possibilities; and from this point of view the visit of the Prince of Wales is appropriately timed. One can read in the Indian chronicles of princes in past ages who have come to spy out the riches of countries which they hoped to make their own; but here we have a Prince, a true representative of the time, coming to learn something of the burden he must expect to shoulder, the burden of the Empire as it has developed since the days when Queen Victoria assumed for the British race the direct sovereignty over India. A young man is meeting a young nation, and we older men may be allowed to express the hope that the meeting will prove of lasting benefit to both.

As my name implies, it is my habit to look back as well as forward, and it is only by looking back that one can see the recent constitutional changes in a true perspective. Not to go too far, let us take the story of the last seven centuries, a consistent record of despotic rule. In the north of India we may think of Alauddin or Firoz Shah, of Akbar or Aurangzeb; in the south, of anyone from Harihara to Haidar Ali; rulers have differed in race and temperament, but all were despots, and, though subjects might grumble, they had only the choice between submission and rebellion. The Dutch diarist, writing of an outrage committed by order of Shahjahan, recorded that all India was scandalised, but none dare speak his mind, and the phrase may serve as the epitome, and the epitaph, of the epoch. Nor did the establishment of British rule result in an immediate change. The Company was not less despotic than its predecessors: Queen Victoria was a despot, and while Indians in the last century acquired the right, and to some extent the habit, of speaking their minds, it was long before they asked for anything more. There was no demand for a change when King Edward visited India as Prince of Wales; the demand was scarcely audible when Prince Albert Victor followed in his father's footsteps; even in the present century a liberal statesman could win widespread approval by denying the suitability to India of parliamentary institutions. To-day the rudiments of true parliaments are in being, and that is the really significant thing, a conscious and deliberate break with that tradition of despotism which is the only political inheritance of the country, and by far the greatest political event since Mahmud of Ghazni proved to demonstration that the days of India's isolation had gone by. Mahmud and his successors taught India to obey foreigners: England has ordered Indians to learn to govern themselves.

I am not at the moment concerned with the wisdom of this fundamental change. I know that some self-constituted authorities, sinners as well as saints, consider it a great mistake, and hold that Indians would prefer a continuance of despotism, in which either the saints or the sinners should wield the sceptre. I think myself that both classes are in the wrong, and that the change was in essence right, but the point is that it has been made, and we have to see what it involves. The word democracy has acquired a new significance since the days when *demos* actually governed; no large civilised State is, or can be, governed directly by its

people, and the term now means that the people decide on the broad lines of general policy, choose representatives to see that those lines are followed, and dismiss them summarily if they fail to do so. The essence of the institution, and the whole secret of its success, lie in the free interchange of knowledge and the free play of opinion between the representatives and their constituents. Divisions and elections are not everything; ministers must often bow to the general feeling before it has found formal expression; and popular representatives are more often engaged in controlling a ministry than in turning it out of office.

To say this is to bring out the vast amount of work which has still to be done before it can be said that India has learned to govern herself. In every province ministers are now putting forward policies, and that is undoubtedly a great advance; but, even when policies are approved by representatives, can anyone be confident that they are supported by the constituencies, or by the masses who are excluded from the list of voters? At present an Indian province is like a body without a nervous system: the brain is functioning actively, but it is not yet in a position either to receive impressions from outside, or to direct and harmonise the movements of the limbs. Apart from a few representatives of special interests, scarcely a member can be sure that he knows what his constituents really want; most of them assume that they know, and accept their own idiosyncrasies as the fruits of popular inspiration; but that is a very dangerous thing to do, and after a short experience of electioneering, they will find, what politicians in other countries have found, that, if they are to do any good, they must be learning and teaching for a large part of their time.

Now this is where the young men come in, for they have to take a large share in creating the nervous system of the body politic. Only a few of them can hope to become actual legislators, but nearly all of them can look forward to doing useful and necessary work as intermediaries between representatives and the mass of their constituents. That work has two sides. The men who have enjoyed the privilege of a good education must use it for the benefit of the much larger number who have had no such opportunities; they must go among the people, must teach and persuade, must help to form sound opinion, must carry knowledge, and inspiration born of knowledge, from the universities to the streets and the fields. But at the same time they must gather new knowledge in the fields and in the streets, until they can make known the wants of the people in the seats of learning and political activity. They must transmit knowledge constantly in both directions, until it can be said that classes and masses understand each other much more thoroughly than is now the case; it is only in this way that a nation can be organised for democracy, and it is the young men who must do most of the necessary work.

The ordinary young man, immersed in the life of his college, will probably say that all this is for the future, when he shall have taken his degree and begun life in earnest. That is a very common mistake. It is skilled work that is wanted, and skilled work has to be learned, so that those who mean to do it must begin to qualify themselves at once. They may believe that they know already how the masses live, and think, and feel; but if they are to do any good, they must know the Why as well as the How. Why are Indian peasants poor? Why do Indian brains prefer buying and selling to making things for sale? Why is capital still so shy? Why do the villages distrust the towns? Why are their schools so often failures? Why is the death-rate so high? The amount of nonsense that is talked and written nowadays on these subjects, and a dozen others, shows at any rate that knowledge of them is not universally diffused, but its possession is essential, and it can be gained only by a careful study of the past. That is the necessary foundation for useful political work, and the sooner it is laid the better. Study by all means the records of the far-away times when India was isolated and self-contained; but study also the causes which destroyed that condition once for all. Study in much greater detail the dark centuries which lie between, unpalatable as the story of Indian decadence must be; and learn to regard each successive century as more important than the last. If history is to be a guide and a guard through the untrodden jungle of the future, Akbar must count for more than Asoka, and Thomason for more than Todar Mal; it is on these lines that the old India can be used to help in building up the young nation, and without its help little real progress will be made.

All this means hard work? That is exactly my point, and now is the time to urge it. Visits of Princes do not stand for boons and holidays in the twentieth century, whatever they may have connoted in the past. Princes work hard in these days, rather harder perhaps than most of us, and the real significance of the impending celebrations lies, to my mind, in the fact that they constitute a call to the young men to devote themselves to hard, unselfish work, inspired by the confident hope that, if everyone does his best, the new India may be a better country than the old.

## THE PRINCE'S PROGRAMME.

The following is the official programme of the Prince of Wales' tour after leaving these shores:—

The Prince will visit Gibraltar, Malta, Port Said, and Aden on the way to India. The arrival in India is timed for November 17. H.R.H. will disembark at Bombay. The itinerary of his tour in India is as follows:—

| | | |
|---|---|---|
| November | 17 | Bombay (a visit to Poona will be made.) |
| ,, | 23 | Baroda. |
| ,, | 25 | Udaipur. |
| ,, | 28 | Ajmere. |
| ,, | 29 | Jodhpur. |
| December | 1 | Bikanir. |
| ,, | 7 | Bharatpur. |
| ,, | 9 | Lucknow (a visit to Allahabad will be made) |
| ,, | 13 | Benares. |
| ,, | 14 | Nepal. |
| ,, | 22 | Patna. |
| ,, | 24 | Calcutta. |
| January | 2 | Rangoon (a visit will be made to Mandalay) |
| ,, | 13 | Madras. |
| ,, | 18 | Bangalore. |
| ,, | 19 | Mysore. |
| ,, | 25 | Hyderabad. |
| ,, | 30 | Nagpur. |
| February | 1 | Indore (a visit will be made to Mhow) |
| ,, | 4 | Bhopal. |
| ,, | 8 | Gwalior. |
| ,, | 13 | Agra (a visit to Aligarh will be made on the journey from Agra to Delhi). |
| ,, | 14 | Delhi. |
| ,, | 22 | Patiala (a visit to Jullunder will be made on the journey from Patiala to Lahore). |
| ,, | 25 | Lahore (a visit to Sialkot will be made on the journey from Lahore to Jammu). |
| March | 2 | Jammu (a visit to Jhelum will be made on the journey from Jammu to Peshawar). |
| ,, | 4 | Peshawar. |
| ,, | 8 | Rawalpindi (a visit to Kapurthala will be made on the journey from Rawalpindi to Dehra Dun). |
| ,, | 13 | Dehra Dun. |
| ,, | 13 | Gajraula. |
| ,, | 17 | Karachi. |

H.R.H. will embark from Karachi for Colombo on the afternoon of March 17.

## The Future of India.

In the *Asiatic Review* for October Sir Verney Lovett K.C.S.I., has an important article which he calls "The Rebellion in India." He begins by sketching the history of events up to the recent Moplah riots, and shows particularly how the Government after Amritsar has shrunk from any methods that might be called repressive and how to-day apparently its "long-suffering is at last worn out." But in spite of appearances in India he has hope :—

Now, we shall not understand Indian affairs unless we realize that peace and order in the great sub-continent depend principally upon the prestige of the Central Administration, upon the honour or dishonour which attaches to the British name in India. *Whatever may take the place of that prestige in future there is nothing whatever that can take its place now.* If the district and police officers, who among multitudinous millions of all castes and creeds carry on the daily administration of the country, are regarded as the representatives of an effete Power, which may be constantly and openly derided and slandered with impunity, their tasks will become impossible. The Moplah rising, which presents marked features of its own, but is undoubtedly the result of the Gandhi-cum-Khilafat agitation, shows conclusively what may take place. The present Legislative Councils are at present islands in a vast ocean of multitudinous peoples. They form a facade. To assume that a solid fabric of responsible parliamentary government exists behind the facade is to assume what is not the case. If such a fabric is to rise gradually, the new legislators must act whole-heartedly on the excellent advice recently delivered to some of their number at Bombay by Mr. A. F. Whyte, President of the Legislative Assembly, who impressed upon his hearers that harmony between non-officials and officials on the Councils was *not* all that the situation required. The political education of the people of India would only be built up by the maintenance of close and constant touch between representatives and their constitutencies, by intensive non-official propaganda of a salutary kind, by hard, unselfish labour on the part of the former. And here we approach the root of the matter. The real battle of the future will be won or lost among the masses of the general population. Mr. Gandhi and his accomplices see this clearly. They are losing no time and are working hard. They have collected some hundred thousand pounds for the financing of their campaign. What have the constitutionalists done? Are they working hard? Have they collected money? Are they in districts and cities, by press and platform, combating strenuously the efforts of the paid agitators who on July 12 last, were denounced by a British member of the Bengal Legislative Council as "cold-blooded murderers and a menace to society?" If they are, Mr. Whyte's advice is superfluous. If they are not, we shall gain nothing by imagining that they are. Let us hope at any rate that they are making substantial beginnings. The need is urgent. But if they are doing little, we must recognize that when once Mr. Gandhi and his principal coadjutors began their intensive campaign among the masses, and the Government of India still accepted the hypocritical plea that non-violence was inculcated, the burden that fell on the Moderates was one that only a great leader of men could have sustained.

The Moplah rebellion is the last of three recent warnings. The first was the Arrah riots, which occurred in October, 1917 and have been described by me elsewhere. They consisted of fierce organized attacks by Hindus on Mohammedans over a widespread area of Bihar and of days of mob ascendancy. They had been prepared with care and skill. The rioters were possessed with the idea that British rule was in the throes of dissolution.

The next warning was the riots of April, 1919, the incidents of which are well known. It was then widely believed, in the Punjab at any rate, that the war had left Great Britain weak and exhausted. The third warning is the Moplah revolt. It has shown us the result of deliberate and open inculcation of the combined theories that British is responsible for the woes of Turkey, and that British power in India is detestable and is on its deathbed.

In spite of variations of scene, method, and occasion, all these risings, as well as a number of minor incidents, have owed much inspiration to a belief that British rule in India is moribund. That belief has been a strong plank in the agitator's platform. It is true that British rule in India in the old sense is gone. But if the new British-cum-Indian rule does not contain sufficient of the old quality to add the assurance that is needed to the arguments of the Moderates and to arrest the further progress of the preachers of sedition and revolt, the Reforms are certainly doomed.

Let us hope for better things.

## Bolshevism in the Middle East.

Writing in the *Contemporary Review* for October on "The Bolshevist Menace in the Middle East," Sirdar Ikbal Ali Shah begins by frankly admitting the success of Bolshevism in the Middle East :—

No good purpose is to be served by denying that Bolshevism has achieved at least a temporary triumph in the Middle East. In Afghanistan, for example, it has secured a firm foundation, and has gained concessions hitherto impossible to British diplomacy. In order that we shall be able to confront its strategems when they impinge more closely upon our own interests—as they undoubtedly will at no distant date—it behoves us to scrutinise them in detail. During a recent prolonged sojourn in Afghanistan and Bokhara, I made a personal examination of Bolshevist methods, official and otherwise, and must confess to a certain admiration for the very thorough manner in which the Russians have adapted themselves to the work of proselytism among populations so difficult and intractable. But the whole effort of Communist Russia is vitiated by a dishonesty of purpose which, in the event, must spell failure, gigantic and overwhelming.

He proceeds to an examination of the "hopeless" conditions of Persia, Bokhara, and Turkestan; and finally of Afghanistan :—

Bolshevist endeavour has been quite as active in Afghanistan as it has in Turkestan. The High Court officials have been overwhelmed with the "attentions" of M. Suritz, the Bolshevist envoy, and his Aide-de-Camp, Colonel Rex, who are closely in touch with the Sirdar Ali Mahomed Beg Turzi, General Nadi Khan, Jamal Pasha, and Abdur Raheem Khan, the envoy of the new Bokharan Republic. It was this junta, indeed, which was responsible for bringing about the recent revolt among the Afridis, and the election of the notorious Mullah Said Akbar as the "tribal Amir" of that people. They are also known to be in touch with Kemal Pasha in Anatolia, whom they have requested to aid them in the formation of a large army recruited from the frontier tribes, and to send as many officers as he can spare for that purpose. One of the results of this ill-omened association has been the recently ratified Russo-Afghan treaty by which the Reds have received the right to establish Russian consulates and trading posts at the most important strategic centres in Afghanistan, and it is significant that to these are to be attached military agents. Indeed, Afghanistan bids fair to fall under the Bolshevist yoke, as has Bokhara, at no distant date.

And he concludes with a hint of the possibilities of the future :—

The Afghans are scarcely to be blamed for their acquiesence in Bolshevist endeavours when it is remembered that their refusal to countenance these meant actual invasion and ruin. They retain their old dependence, but there is little doubt that they are becoming tired of Soviet interference in their affairs. In this, it seems to me, lies Britain's opportunity to check the tide of Red aggression ere it overflow her Indian Empire. There is still time to approach Afghanistan with overtures which would certainly wreck Soviet schemes against India. But a clear-cut policy towards Turkey, the head and fount of Islam, is required before anything specific can be attempted in this direction, and the question of Waziristan must also be considered before any *rapprochement* is possible.

## The Dead Sea.

In the *Fortnightly Review* for October, Mr. A. J. Liversedge has written an article upon "The Dead Sea and a Biblical Prophecy: A Project for Zionism." He begins by sketching the quite new idea of converting the Dead Sea into a useful and beneficial water—quite new, that is, apart from a reference to the subject in the Book of Ezekiel (Chapter XLVII). After giving the prophet's "vision of the future Sanctuary and organisation of his restored people," the author concludes

with a description of his own vision and an appeal to the Zionist movement :—

The Prophet refers to two views of the transforming water; both, in his vision, flow from the East. It might perhaps at some period be found worth while to make two separate connections from the Jordan Valley to the Mediterranean; but the conception of the "double stream" would be realised essentially by making a channel to the head of the Gulf of Akabah as well as one to the Mediterranean. He sees the shores of the new river covered with luxuriant vegetation; the picture might be completely realised in all essentials. The new sea, or river, or strait, or whatever it might be called, would certainly flow through some stretches of desert in the southern part; but otherwise it would be overlooked by high lands where systematic cultivation might produce wonderful results. The new water would be comparable not with such a desert channel as the Suez Canel, but rather with the Dardanelles, the Sea of Marmora and the Bosphorus, with this difference, that its climatic conditions would be even more favourable to luxuriant growth. The entire margin of the new water "on this side and on that side," to use the language of the prophet, from the southern end of the Dead Sea round to Haifa, where touch with the Mediterranean would doubtless be made, would admit of profitable cultivation—there might presently be found along it some of the richest vineyards, orchards and fields in the world, flanked by numerous forests on the mountain slopes. Nor would there be any reason why the southern portion should not also become the centre of a rich agricultural region, where a new and still more famous Petra might arise. Prosperous towns and villages might dot the margin of this new channel throughout its length; important ports would develop at its extremities; while Jerusalem herself might have another at her gates. Finally, while the new channel would not be likely to enter into formal competition with the Suez Canal, it would, as a matter of fact, provide an alternative route which in circumstances easily conceivable might prove of very considerable value.

This vision of "healing waters" set out by Ezekiel 2,500 years ago suggests many speculations which it would be interesting to pursue if space permitted. Ezekiel spent much of his life as a captive of the Babylonians among a people of great intelligence and high scientific attainments. Had they recognised the raised beaches of the Jordan Valley standing high among the level of the water of the Dead Sea, and concluded from their observations that at one time the entire valley was filled with water? Or had they some intuitive or instructive knowledge of a remote geologic past when a great sea occupied that region? Or had legends of such a sea come down to them from primitive human inhabitants who had occupied those regions during, say, the Glacial Period? And did Ezekiel, who was certain, from the position he held during his captivity, to be acquainted with those legends or familiar with that knowledge, merely reason that what had been in the past might return? Or did he owe his "vision" of a great material transformation which is certain to be made by human agency, sooner or later, to some supernatural inspiration? However these questions may be answered, the vision does admit of practical realisation in the manner which has been indicated in these notes.

It is not possible to give here particulars of any useful estimate of the probable cost of constructing this new maritime channel. The cost need not be large; even though a considerable amount would be required by way of compensation for disturbance of the inhabitants of Tiberias, for example, and of scattered hamlets, which would be submerged; and for their removal and resettlement on sites above the new water level. It is possible that some of the work of excavation might be effected by the aid of electrical power developed by water brought fron the Mediterranean. This water, after having served its purpose in the power stations, would pour down into the Dead Sea or into some portion of the Jordan valley and thus begin the filling up of those depressions, which would necessarily be a slow and prolonged operation. In any case, the entire cost of constructing the necessary works would be more than recouped by the appreciation which would speedily develop in the value of the land which would form the borders of the new water; apart from the economic value of the general stimulus to industry, to social progress and intellectual development throughout the entire country traversed by it, which the new water would most certainly provide.

During the Great War the present writer had special opportunities of witnessing the splendid patriotism, as British citizens of distinguished members of the Jewish people, some of whom are associated with Zionism; and would like here, by way of some acknowledgement of that self-sacrificing patriotism, to offer and commend the project which has been roughly sketched in this writing to the authorities of the Zionist movement, in the confident assurance that it will one day be taken up and carried to a successful issue, with great and lasting benefits to mankind

---

*The Sphinx* has produced a very attractive "Special Egypt. Tourist Number," profusely illustrated and very attractively made up. Pictures and letterpress are calculated to appeal to the class of Tourist that is most welcome in Egypt, and most sides of life beside the Nile as seen by the winter visitor are touched upon. We are glad to notice that the "Moslem Architecture in Cairo," too often ignored, is dealt with at some length, by Mrs. A. L. Devonshire; and that Mr. Rene Francis, whose name is familiar to many of our readers, contributes a couple of articles, on "The Wonders of the Nile" and "The Art of Ancient Egypt."

## NEWS IN BRIEF

A Persian political and economic mission has arrived at Baku with a view to concluding political and economic teaties with the Soviet Government of the Azerbaijan Republic.

A mission from the Azerbaijan Government, states Reuter, has arrived at Angora. It is composed of 36 persons.

Lloyd's agent at Malta quotes a wireless message from the British Naval Attaché at Rome stating that the Italian Secretary of Marine reports that the Italian war vessel Roma collided with and sank the British steamer Zurialon (bound from Braila for Antwerp) on October 15, 36.22 N., 22.54½ E. The crew were saved.

George Hirst and Wilfrid Rhodes, the well-known Yorkshire cricketers, left Huddersfield last week for India to fulfil an engagement with the Maharaja of Patiala.

The latest reports from Malabar show that the summary courts have up to now dealt with 3,815 cases, of which 1,336 have resulted in committal to the session and 2,024 in sentences of two years' imprisonment, while the remainder of the prisoners with the exception of 39 acquittals, were sentenced to lesser terms.

A crowd of Greek residents welcomed M. Veniselos when he landed at New York from the Aquitania with his bride.

Kunhakauer, Secretary of the Khalifate Committee at Tanur, who was charged with waging war against the King-Emperor, has been sentenced, a Calicut telegram states, by a special tribunal to be hanged.

## OUR ILLUSTRATIONS.

In a special supplement in this issue we publish a portrait of His Royal Highness the Prince of Wales, and a number of illustrations typical of Indian life and scenery.

Of the latter the most notable is the reproduction of the picture by the Russian painter, Vassili Verestchagin, who perished in the Russo-Japanese War. It represents the "Elephant Procession through the streets of Jaipur, on the occasion of the visit of H.R.H. the Prince of Wales (afterwards King Edward VII) to that State in 1876." We are indebted to the Marquis Curzon of Kedleston for this reproduction from the only photograph believed to be in existence of Verestchagin's remarkable painting. The original picture, of vast dimensions, was exhibited in London in 1882 and passed into the hands of an American collector. Purchased from him by H. H. the Maharaja of Jaipur, it was presented by the latter to the State collection destined for the Victoria Memorial Hall, Calcutta, where it now hangs. This Hall, which owes its conception to Lord Curzon twenty years ago, and is Calcutta's most magnificent building, is to be opened by the Prince of Wales during Christmas week.

## THE CARAVANSERAI

*Think, in this batter'd Caravanserai*
*Whose Doorways are alternate Night and Day.*
*How Sultan after Sultan with his Pomp*
*Abode his Hour or two and went his way.*

—OMAR KHAYYAM—

A correspondent in Egypt writes:—"An American ship passed through the Canal recently, called the Dryden. It is not known whether this name was bestowed on the ship out of compliment to the great English satirist, or whether it is a covert reference to the state of America, where it is said the people are so dry that they have to pin their stamps on the letters. Anyhow, the name on an American ship has a sinister significance."

Another correspondent in Egypt sends me a little story of the Labour M.P.s' visit to that country, which has found its way into the local English Press, and has tickled the fancy of the British colony not a little. The Labour men, it seems, had for a fellow-passenger on the boat which took them to Egypt a certain Englishman, who formerly held a high position in Egypt and now holds a still higher one in Palestine. (His name would be familiar to most readers of *The Near East* if I mentioned it; but as I have no permission to do so, I refrain.) This Englishman frequently talked with the 'Labour' men; and towards the end of the voyage he contrived to turn the conversation onto the subject of mining and the miners' life, conditions of work, and so forth. Finally, he suggested that he would like to spend a fortnight or three weeks in one of the mining areas, in order to study the subject on the spot. At once the Labour M.P.'s pointed out, with a directness peculiarly their own, that three or four weeks was far too short a time to gain any correct idea of the subject. Then a bland smile spread over the Official's face. 'And let me see,' said he, 'is it three, or four weeks, that you expect to spend in Egypt?'

An Englishman, Frenchman, German, and Pole, were once asked to write an essay upon "The Elephant." The Englishman was no great hand with his pen, but he remembered he had used his gun to good effect while hunting this particular creature in the wilds of Africa, and in a short time produced an entertaining volume of sporting reminiscences entitled "The Bagging of an Elephant." The Frenchman, who had never seen an elephant in his life, hurried to the Zoo, there to exercise his very perceptive abilities in observation of the elephant's domestic habits; he was able, therefore, to publish within a few weeks a rather intimate sketch of "The Elephant and his *amours*." And of the German it is scarcely necessary to write. Though he, too, had never seen an elephant in the flesh, he had of course read much of the animal; and this knowledge he supplemented with an eight months' course of intensive study of the subject, burying himself the while in the profoundest and dustiest libraries. Thus, after much labour, he too proudly announced his work, a colossal tome: "A Preliminary Treatise on the Elephant." As for the Pole, he had neither seen nor read of the elephant, but by means of a magnificently prolonged indulgence of the most striking of his national virtues, the will to overcome all obstacles, he brought forth his book: "The Elephant and the Polish Question!"

**Corsair.**

### DESERT FLYING.

In a lecture before the Royal Aeronautical Society on October 6, Air Commodore H. R. M. Brooke-Popham, vice-chairman of the Society, gave a description of the new desert air route between Cairo and Baghdad. He mentioned that the original survey party who went in cars to map out the route actually marked it out, for they followed carefully in one another's tracks, with the result that there remains stretching away into the desert before the eyes of the pilot setting out on his journey a ribbon-like guide to his destination. When the original party set out there were no maps of this part of the desert. Wireless telegraphy played a romantic part in the survey work.

The Royal Air Force appeared to be doing good work in improving British prestige among the natives. A friendly sheikh who had been wounded by a raiding party from another tribe was met by a British convoy in the middle of the desert, and within a few hours the sheikh was safely in hospital in Baghdad with his injuries under examination by X-ray. A few days later when one of our aeroplanes was damaged in landing at the same oasis, a flight of six other machines was sent out from Baghdad with spares, and the whole party had to camp for the night. At sunset five natives on camels appeared and silently took up positions round the camp, where they remained until dawn. It subsequently turned out that they were from the wounded sheikh tribe, and, hearing that the Air Force was in some sort of trouble, had come to see that they were not molested.

Commodore Brooke-Popham also dealt with the various difficulties to be overcome in flying aeroplanes in tropical climates. He expressed the opinion that machines built, as at present, of wood are satisfactory so long as they are only to be flown in Egypt or Mesopotamia; but for machines flying regularly between England and these countries metal construction would probably be necessary.

The memorial plaque to Admiral Lord Beresford was unveiled on October 11, in the Crypt of St. Paul's Cathedral by Admiral of the Fleet, Earl Beatty, First Sea Lord of the Admiralty. The inscription on the memorial records the gallant Admiral's diverse distinctions thus:—

**Charles William de la Boer Beresford,**
Admiral Lord Beresford of Metemmeh,
G.C.B., G.C.V.O., D.C.L., LL.D.
Born Feb. 10, 1846. Died Sept. 6, 1919.
At Alexandria, 1882; on the Nile, 1885.
Three times Commander-in-Chief at sea.

A member of the House of Commons for more than 20 years. A distinguished and gallant sailor; a devoted public servant; and a genial comrade of many illustrious and humble friends.

## NOTES AND NEWS.

Devonshire Square.
E.C. 2

**The Government's Policy.**

The proposals outlined by the Prime Minister for dealing with the critical situation arising mainly from the adverse exchanges in his speech at the re-opening of Parliament followed in the main the expected lines. Besides what may be termed direct aid for unemployment the proposals include the amendment of the export credits scheme, the extension of credit for engineering contracts, and Government assistance in connection with the raising of loans where the application of such loans is calculated to promote employment in this country. How far these proposals will enable British industry to tide over the period that still separates us from something approaching normal conditions must remain to be seen. *Prima facie* they seem calculated to achieve that purpose.

**Export Credits.**

The most important proposal is, of course, that dealing with export credits. As Mr. Lloyd George pointed out, there is no doubt that the world needs British goods, but owing to the adverse exchanges it is impossible at present for buyers and sellers to come together. The existing export credits scheme has largely failed to meet the emergency. Under that scheme the Government guaranteed 85 per cent of the cost of goods with recourse against the exporter for half the risk. It is now proposed that the Government guarantee should be increased to 100 per cent., and that the exporter should be liable on recourse for 57½ per cent. This amendment, it is maintained, and with justice should remove the obstacle to trading at this end.

**The Question of Security.**

One of the main reasons why the export credits scheme has not been a success has been the question of the deposit by importers in a bank of a sufficient sum to cover the transaction. While the exchanges were fairly steady as they were a year ago this was possible, but at the present time it will be readily realised that anything of the kind is quite out of the question. Apart from the handicap of having to immobilise credit for long periods no trader is able to meet the constant demand for increased cover caused by continued fluctuations in the exchanges. Of course no one could foresee a year or more ago how things would turn out, and it was natural to suppose that with occasional variations the tendency of the exchanges would be towards a gradual appreciation.

**Bonds, Bank Guarantees, and Currency.**

The question of security was dealt with at length by Mr. Lloyd George, who pointed out that at first the importer "had some reserve for security in one way or another, but it has all gone." He went on to explain that they were left with three kinds of security—Government bonds, guarantee by the banks of payment in sterling, and the currency of the importing country. As regards the first he remarked on the failure of the League of Nations to bring the Ter Meulen scheme into operation up to the present, while as regards the second it scarcely needs explaining that banks are unlikely to show any great anxiety to guarantee payment in sterling. The third security, the currency, needs no comment. As Mr. Lloyd George said, in giving examples of the fluctuations of the exchanges "it is obvious that neither exporter nor importer can build up a trade on that acrobatic basis."

**At the Exporter's Risk.**

The Prime Minister summed the question up by saying that it came to be a matter of the exporter's risk, which presumably means that in transactions under the new scheme the importer will not be compelled to furnish security as before. Of course the risk in trading on such lines must be very considerable, and there are bound to be losses, but the Government very naturally take the view that it is a question of deciding which is the greater risk—trade and employment or unemployment.

**Improved Position of Tea Industry.**

A very interesting review of the outlook for the tea and rubber industries was given by Mr. Clark at the general meeting of Harrisons and Crosfield Ltd., a report of which will be found on another page in this issue. As regards tea he pointed out that producing costs have fallen, while market prices have improved so that the majority of companies are no longer making heavy losses. Further the statistical position has improved. He estimated the probable world's production of tea in 1921 at about 600 million pounds as against a probable consumption of about 700 million pounds, "while during the past six months the stocks in the United Kingdom have been eaten into just about to the extent of 50 million pounds."

**Promising Outlook.**

It is as Mr. Clark says a very remarkable fact that the consumption of the various markets should have increased sufficiently to enable the absorption of 700 million pounds of tea while Russia still remains practically out of the market and other outlets are not yet available. These facts should give shareholders who have seen their securities depreciate so greatly considerable encouragement. There may be a long

Digitized by Google

period to wait before all countries are able to take their requirements, but when that happens the position will simply be, as I have had occasion to point out before in these columns, that unless the present plantations have been greatly increased there will ultimately be something approaching a shortage.

**The Rubber Industry.**

An encouraging review of the outlook for the rubber industry was given by Mr. Clark. He expressed doubt whether the actual consumption of rubber has ever been going on faster than during the past year, and thought it safe to conclude that "by the end of this year the invisible stocks, both of raw and manufactured rubber will have been used up to the fullest extent possible, and that next year the demand for raw rubber must again be fully equal to the actual consumption, and amount to not less than 300,000 tons, and very possibly to 350,000 tons."

**Need for Rubber Expanding.**

As illustrating the extent to which the world's real need of rubber is expanding he pointed out that while just before the war there were about 2,000,000 cars running there are now 12,000,000. "I know of no source of rubber consumption," he added "that can be said to be declining, but, on the other hand, there are constantly new uses being added to those already in existence, and I have no doubt as to the ultimate soundness and value of the rubber producing industry."

**Commentator.**

## "THE FUTURE OF COTTON."

*To the Editor of "The Near East."*

Sir,—I read with interest Mr. de Segundo's article in your issue of October 20, entitled "The Future of Cotton: Will a Substitute be Found?" There has been at least one previous article by the same writer on the use of the same material which he here suggests but as a substitute for paper pulp.

This material is the fibre cut from the cotton seed, and known as Linters and Cotton Hull Fibre. The fibre itself is obviously an ideal material for making paper and artificial silk, as Mr. de Segundo points out, but is useful in many other directions for instance, in making celluloid, films, and in the plastic moulding trade. The difficulty has been to produce an absolutely clean and white pulp.

The article continues "Thus a very large supply of suitable material for the production of viscose is rendered potentially available and active steps are now being taken for the establishment of these machines (machines for removing residual cotton fibres from the seed) in Great Britain, the United States, India, and other cotton growing countries."

All these developments appear to be on sound lines, but while awaiting the production which will some day be available it is a matter of considerable importance to those who are interested in this question to know that already a perfect material of this kind absolutely clean and white is being produced in large quantities, and is being sold here in England.

Papers of the highest grade, and celluloid made from this material, are available. Pending the organisation of the industry in our Colonies, when no doubt the Empire will produce all the necessary pulp of this nature, there is no need to wait for the potentially available supplies—they are here now. The pulp is being used in increasing quantities. Yours faithfully,

H. C. de J. du Vallon.

26 and 27, Bush Lane, London, E.C.4.

October 21.

## THE BRITISH INDUSTRIES FAIR.

It seems only a very little time since the last British Industries Fair was held, but already, as the announcement on the opposite page indicates, we can begin to think about the next of these welcome annual events.

Each year in the brief history of the fair has marked an advance towards the ideal of a really comprehensive exhibition of the potentialities of British manufacturers. Progress was naturally slow during the war period which saw the birth of the fair, but it has been rapid since 1918 when at last it became possible to include the chief branches of British industry, and those who visit the coming fair may expect without fear of disappointment to be shown a wider range of manufactures than they could see anywhere else in the world.

The fair in its short career has known many habitations, none of them permanent. The London Docks, the Crystal Palace, the White City have all housed it in turn; it has been centred in London; then on account of its remarkable growth at three centres, London, Birmingham, and Glasgow. In 1922 there is to be a new arrangement. Glasgow drops out, and the exhibits at that centre, with the exception of textiles (which for once will be omitted) will be shown at Birmingham. The advantage of the change from the buyer's point of view will be obvious. However convenient the dates a task of extreme difficulty was clearly imposed on any visitor who wished to see all three sections of the fair. Confined to London and Birmingham the buyer will have his work much simplified. This change is not permanent, for the intention is to hold the fair after 1923 in the buildings that are to be constructed at Wembley to house the British Empire Exhibition of that year.

The "slump" was nearing it worst when the fair was held in February, and the congestion in foreign markets and the general economic outlook naturally affected the attendance and the amount of business transacted. It was nevertheless a very fair success. Next spring, judging by present indications, conditions in general should be much more favourable. The opinion is widely held that we have seen the worst of the trade depression. Certainly stocks in a number of centres are rapidly diminishing, and will have to be replenished, while the new export credits scheme should enable buyers and sellers to come to business despite the adverse exchanges. It may be hoped by then, too, that if the Ter Meulen scheme is not actually in operation there will at least be definite signs of its pending ultilisation by some of the countries with whom we are now almost unable to trade. Whether that is so or not it is certainly possible to look forward to next February with a very fair degree of confidence.

The range of exhibits at the Fair, which has come to merit the title of the successor to Leipzic, is too well-known to the majority of buyers the world over to need recapitulation. They know by previous experience that they will be certain to find just what they want either at the White City or at Birmingham, and withal so well arranged that there is no need for them to spend hours at one of the sections of the Fair in searching for what they want, as all the exhibits are carefully arranged in classes so as to simplify inspection. Given no untoward developments next spring will be the first occasion in the history of the Fair in which conditions have really favoured the presence of buyers in large numbers and it may be expected that all records for attendance and business will be broken.

The City of Bombay Improvement Trust 4 per cent. Guaranteed Debentures of 1900. Coupons due on November 1 will be paid on and after that date at the Hongkong and Shanghai Banking Corporation, 9 Gracechurch-street, E.C.

Spaghetti and other similar alimentary pastes may be exported from Algeria to all destinations until the end of the year up to a maximum of 1,200 metric tons.

It is announced that the Roumanian Army is being supplied by France with clothing in exchange for petrol; 25,000 tons of oil have already been shipped to France in this connection.

# BRITISH INDUSTRIES FAIR, 1922.

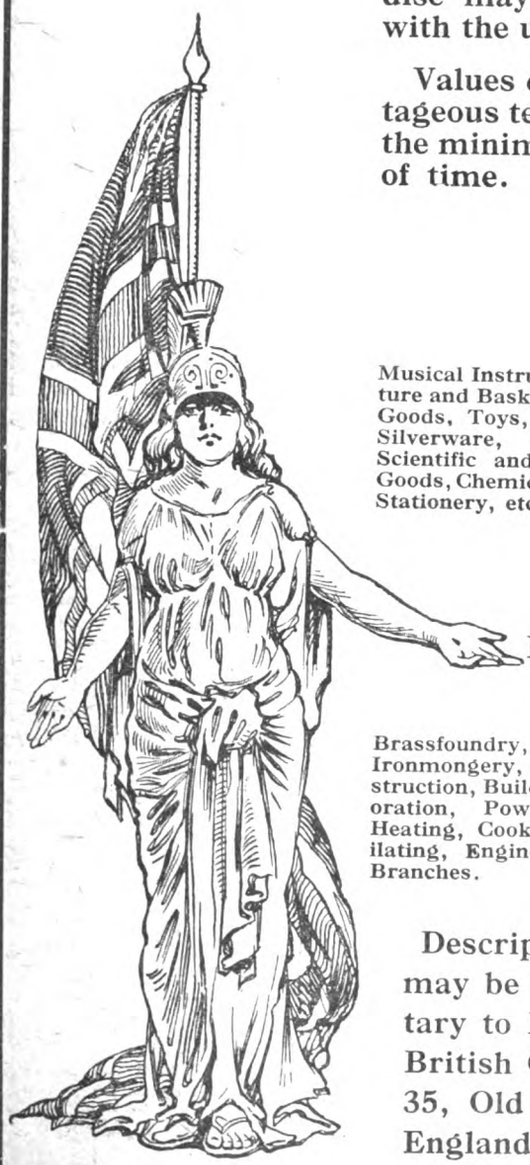
## LONDON and BIRMINGHAM, February 27th to March 10th.

***Organised by H.M. Department of Overseas Trade.***

A comprehensive exhibit of the Leading British Manufactures is here officially presented, in the two principal industrial centres of the United Kingdom.

This unique display of Britain's Best Merchandise may be inspected by the World's Buyers with the utmost convenience.

Values can be compared, and the most advantageous terms secured for all requirements, with the minimum of trouble and the greatest saving of time.



## LONDON,
White City, W.

Musical Instruments, Furniture and Basketware, Sports Goods, Toys, etc., Jewellry, Silverware, Cutlery, etc., Scientific and Photographic Goods, Chemicals and Drugs, Stationery, etc.

Printing, Fancy Goods, Travelling Requisites, etc., Brushware, Pottery, China and Earthenware, Glass and Glassware, Foodstuffs, and Beverages, Boots and Shoes, Leather, etc.

## BIRMINGHAM,
Exhibition Buildings, Castle Bromwich

Brassfoundry, Hardware and Ironmongery, Metals, Construction, Building and Decoration, Power, Lighting, Heating, Cooking and Ventilating, Engineering in all Branches.

Agricultural machinery, Mining appliances, Motors, Motor Cycles, Cycle Accessories, Perambulators, Guns, Saddlery and Harness, Fishing Tackle, Brewing and Distilling Appliances.

Descriptive Booklets and Invitation Tickets may be obtained from the Commercial Secretary to H.B.M. Legation or from the nearest British Consul, or on request to the Secretary, 35, Old Queen Street, Westminster, London, England.

# Commerce and Industry.

REPORTS FROM OUR OWN CORRESPONDENTS,

## ROUMANIA.

*Bucharest, October 12.*

**Roumano-Austrian Economic Convention.**

On September 30, the Roumano-Austrian Economic Convention was signed at Vienna by the respective delegates. This is the first economic convention concluded by Roumania with one of the former enemy States, and is based on the most favoured nation clause. The convention will come into force 15 days after it has been ratified by the two Parliaments, and is to run for a period of one year. In the course of next month Roumania expects to conclude an economic convention with Spain.

**Further Credit for Reconstruction.**

The Ministry of Communications has been granted a further credit of 400 million lei to be used for the following purposes:—10 million lei for the alteration of the gauge of the Ungheni-Chisinau Railway line in Bessarabia; 90 million lei for the repair of railway bridges; 80 million lei for the repair of railway tracks; 125 million lei for the improvement of railway work-shops; 47, 500,000 lei for the repair of vessels belonging to the State shipping lines and the hydraulic service; 18,500,000 lei for wireless telegraphy; 9 million lei for aviation; 20 million lei for postal, telegraph and telephone services.

**The "Gold Lei."**

In my last letter I mentioned that according to the new import regime the duty tax for certain luxury goods will have to be paid in "gold lei." This means that one gold lei will be equal to 20 lei. This calculation is based on the present rate of the dollar as compared to the lei, and will remain in force until November 1, when it will be modified should a change in the rate of exchange have taken place.

**Miscellaneous.**

As a result of the unfavourable rate of exchange, and in order to encourage home industry, the Roumanian War Office has decided to place an order for one million metres of cloth for army requirements with local manufacturers.

## BULGARIA.

*Sofia, October 16.*

**Bulgarian Debts to England.**

Mr. Egerton Grey, the Treasury official entrusted with the collection and general administration of the Bulgarian debts to England, has been on a short visit to Sofia and has gone back to London with the intention of sending a representative to Sofia who will work in conjunction with M. Stoyanoff, Director of the Public Debt. Mr. Grey met a number of Ministers, financiers, and business men, and stated before leaving that Bulgaria was showing more proofs of good will and honesty in the paying of her debts than any of the other ex-enemy countries. Whilst it is satisfactory to record this tribute on the part of Mr. Grey, it is equally unsatisfactory to note that no arrangement has as yet been come to whereby the sequestration of Bulgarian property and money in England may be terminated. As is well known both France and Italy have raised the sequestration, but we persist in our present attitude, and seem to regard the action taken by our late Allies as foolish and ill advised, whereas in reality it is a clever diplomatic move, which, without entailing much loss to the two countries concerned, has enabled them to gain a considerable amount of prestige in local business and financial circles.

**New Import Duties.**

The new import Tariff which will shortly come into force will have the effect of practically putting a stop to the import of motor cars as there is to be a tax on them of 50 per cent. *ad valorem*. There is also a great increase in the taxes levied on such articles as tea, coffee, and other foodstuffs. The aim of this legislation is to ensure a better balancing of the Budget and to encourage local manufactures.

## ASIA MINOR.

*Smyrna, October 11.*

**Vexatious Trade Restrictions.**

Much annoyance has been caused to Smyrna grain dealers by the refusal of the Greeks to allow barley and wheat to be despatched to Smyrna. Permission to bring down considerable quantities of barley was accorded to the leading British firms by the Greek authorities in Smyrna, but at the last moment the Military authorities at Ouchak refused to allow the waggons to leave. The various Chambers of Commerce have protested against this useless step which is paralysing trade, and have shown that there are ample stocks for the use of the Greek Army without holding up the entire crop.

## EGYPT.

*Port Said, October 7.*

**Shipping Outlook.**

There are various signs here that whatever the state of trade is at home the shipping is improving. Vessels passing through the Canal are noticeably deeper in the water than they were six months ago, and the number appears to be greater.

## GREECE

*Athens, October, 15.*

**Reconstruction of Salonika**

According to information supplied by the Ministry of Communications, the Government has decided to expedite the application of certain measures for the reconstruction of Salonika. The work in connection with the drawing up of the plans of the town is nearing completion, and it is hoped that the sale of plots of ground will shortly commence. It has also been decided to build a new custom house near the railway station, in order to facilitate commerce with Serbia.

## COMMERCE IN THE SUDAN.

### Handicaps of Traders.

*(By Our Khartoum Correspondent.)*

There is little doubt that all traders throughout the world are subjected to petty annoyances and restrictions by their respective Governments, and that the official mind is rather inclined to regard the merchant in the light of a perpetual grumbler, and is liable to give very cursory attention to the various complaints and petitions that are put forward from time to time. The usual channel for the ventilation of trade grievances is the Chamber of Commerce, which, if a sufficiently strong body, can make the necessary representations to the Government immediately concerned or failing that, have recourse to Consular assistance. The Sudan trader, however, is resident in a Condominium, in which no consular representation is allowed, and which is still subject to the Proclamation of Martial Law, which does not appear to have been repealed since its inception at the re-occupation of the country. During the war, censorship was so strict that the Sudan Chamber of Commerce *Journal*, which should be regarded in the light of a privileged publication, was treated in the same manner as news publications displayed for sale at the various stationers and bookstalls. It is only comparatively recently that the *Journal* has been freed from restriction, and as a consequence it is only within the last year or so that the grievances of the commercial community have become more widely known. The country is still in a stage of transition from military to civil rule, and it is only natural that in certain quarters the trading community is looked on as a necessary evil resulting from the too rapid development of the conquered territory. Happily this state of affairs is becoming less apparent every year, but it must be generally conceded by all residents that administrative methods could be much improved were some attention paid to the opinion of the merchants as regards certain regulations which undoubtedly hamper the import and export trade of the country.

In this respect a series of interesting points were raised at the general meeting of the Sudan Chamber of Commerce held in April this year. The members present were unanimous in condemning the excessive freight and passenger rates charged by the Government Railways and steamers. In certain cases the rates for produce have been materially reduced. As an instance a rebate of PT 100. per ton was granted on *dhurrah feterita* destined for export. This did much to stimulate trade in this particular commodity, but any grateful recognition for the reduction was more or less nullified by the length of time occupied in obtaining a refund from the railways, the method practised being that the railways insisted on full freight being paid at the time of loading consignments—the rebate to be made on evidence of shipment from Port Sudan. Actually the refund in many cases was not made until two months after the merchandise had left the port. In the case of a merchant obtaining financial assistance from his bankers this would entail a loss of interest at from 7 per cent. to 8 per cent. per annum, which, in some instances brought to the notice of the writer, meant an appreciable loss as the rebate due ran into several thousand pounds. As regards passenger fares, on the basis obtaining on the Egyptian State Railways the fare from Shellal to Khartoum would be some £E.7. instead of over £E.20. as at present. Freight rates are on the whole equally disproportionate. In January last as an example a Ford Car in its case was sent from Alexandria to Khartoum. The freight on the Egyptian State Railways as far as Shellal amounted to £E.9. for a distance of roughly 680 miles, from Shellal to Khartoum—approximately 800 miles—the freight was some £E.24. Another continual source of complaint is the question of liability of the railways as regards produce carried at 7th class or "owner's risk" rates. Naturally the railways refuse to accept any responsibility for loss or shortages of goods booked on these conditions, but on the other hand it is manifestly unreasonable that a shortage of say 32 sacks out of 100, or as far as that goes a shortage of the whole consignment of 100 sacks, should be borne by the unfortunate exporter. The regulations are framed in such a way that there is a distinct incentive to dishonest employees of the Department to profit by their elasticity and make away with small lots from each of these consignments at owner's risk, knowing that the onus of proving such thefts revolves on the consignor and that the likelihood of detection at wayside stations at night is practically nil. During the recent heavy rains very considerable damage was sustained through the lack of tarpaulins and shortage of covered wagons. There is no doubt that merchants would gladly pay a few piastres extra for the hire of tarpaulins and although the subject has been brought up repeatedly by various individuals and the Chamber of Commerce, there has hitherto been no indication that these will be provided in the future.

In regard to imports from Egypt via Halfa—under existing regulations goods are inspected there and dues collected. No goods may be forwarded unless accompanied by a trader's invoice, and as these are for the most part sent direct to the consignee in Khartoum or elsewhere in the interior, a very great deal of unnecessary delay is occasioned in forwarding the consignments to their ultimate destinations. This procedure is said to be due to the existing dual Customs control at Halfa, the trader's invoice being required by both Egyptian and Sudan Customs. It may be noted that there is no storage accommodation at all at Halfa the incoming and outgoing consignments being left for considerable periods on the foreshore of the river, depending on the congestion of traffic or non-arrival of the all-needful trader's invoice, and naturally there is every risk of deterioration of the goods. It has been suggested frequently that through consignments should be inspected at Khartoum and all necessary dues paid there. For reasons best known to themselves the authorities refuse to countenance such a course, and seem unwilling to give any explanation as to their not being desirous to give way.

A great deal of discontent has been manifested with regard to the Dam construction. Hitherto the public have not been enlightened in any way as to the precise nature of the scheme evolved. No official information has been given out as to whether the native or other owners of tracts in the 300,000 feddans to be affected are to be permitted to cultivate their land in their own way, or whether such cultivation is to be supervised by the Government or the Sudan Plantations Syndicate. There appears to be a very great deal of unnecessary secrecy maintained on this subject, so much so that it is necessary to obtain special permits even to visit the works. The mercantile community complain that no tenders are put out in respect of the supply of material etc. for the construction and that all purchases are made privately. The contention put forward some time ago that there are no firms capable of tendering in the Sudan does not hold good any longer in view of the fact that the Associated British Manufacturers and other important engineering firms are now represented in the country. In view of the excellent work carried out by the Department for Overseas Trade, it is regrettable that a Commercial Agent has not hitherto been appointed for the Sudan. There is very little doubt that British trade has benefited much from the appointment of a similar official in Egypt.

Amongst other disabilities I may mention the entire lack of any legislation in regard to the registration of companies, and the necessity of an official translation office where the precise shades of meaning of certain Arabic phrases and terms could be clearly defined, since, as may be readily understood, in the case of a disputed contract, a very great deal would depend on the interpretation.

*By Our Engineering Representative.*

## COAL CARBONISATION.

Quite recently extraordinary progress appears to have been made in connection with the low temperature carbonisation process of dealing with coal. This particular method of working, as distinct from the high temperature methods adopted by our gas works and coke ovens, is by no means new, as it has in fact been working for some ten or twelve years, though not to anything like the efficiency possible, and it was known and in the experimental stage for at least an equal length of time before that. In fact I remember the opening of one of the most ambitious, and for a time most successful, schemes of the old coalite enterprise, the plant at Plymouth.

The trouble with the coalite or low temperature process was purely mechanical. As every engineer knows coal when subjected to heat commences to expand, this expansion being about at a maximum at from 700 to 750 degrees Fahr, which is just the temperature required for the most efficient carbonisation in the low temperature retorts. Now when a large mass of solid coal expands something has to give way; if on the other hand the coal mass is not solid, it swells and gains and crushes itself under that heat into something about as hard and solid as stone. If the work of temperature raising is carried out in a retort, the mass of coal slack used in the coalite process cakes together like concrete, and, in short, although there was no trouble in making coalite there was a very real and serious trouble in getting it out of the retort. In fact, some time back coalite was being produced and marketed, some 100,000 tons in all being sold, but the retorts were unsatisfactory. The coalite had to be forced, perhaps "rammed" would be a better word, out of the retorts, and this not only caused long delays in connection with recharging the retorts but a good deal of the heat stored up which could otherwise have been used for roasting or at least pre-heating the following charge had to be wasted. As a matter of fact the molten coalite had actually to be crushed out of the retorts, and consequently such fuel as did discharge in solid form was inclined to be friable, and was not, therefore, suitable for rough handling.

**An Interesting Visit.**

A few days ago I was asked to go down to Barnsley to inspect a low temperature carbonisation plant in operation, to examine it closely in every engineering, chemical, and mechanical detail, and to give my considered opinion as to its design and construction, and also as to the efficiency and economy of the working arrangements. The invitation came from Messrs. Close Bros and Co., who, having operated the plant successfully and continuously for nearly three months, and believing as a result that there is nothing less than absolute certainty of success ahead, are now desirous of letting everybody know what a good thing coalite is and how extremely well the low temperature process is working.

In an experimental manner and a laboratory no one with a requisite knowledge disputes that the following results can be obtained by this process from one ton of average small slack coal:—14 cwts. of smokeless fuel, known as coalite; 16 to 18 gals. of tar oil, which can be split into lubricating and Diesel engine oils; 6,000 cubic feet of gas of a calorific value of 700 British thermal units per cubic foot; 14 lbs. of sulphate of ammonia, which, as everyone knows, is a particularly valuable fertiliser; and from two to three gallons of pure motor spirit.

No one questions that if these substances, in the quantities mentioned, can be produced on a commercial scale, enormous benefits to the world in general, and to this country in particular, will result. But it has never till now been possible to carry out this process on a profitable commercial basis. More specifically, it has been rightly doubted in the past whether the smokeless fuel made in the retorts can, as mentioned above, be discharged sufficiently rapidly from the apparatus, when constructed on a commercial scale, and further, whether, when so discharged, it would not prove to be of such a character that it would break up into dust under pressure or rough usage. In other words, whether it could be carried in trucks, whether it would withstand the vibration of a railway journey, and whether it could be handled as easily and as roughly as coal. From my visit to the Low Temperature Carbonisation Co's. works at Barugh, near Barnsley, I am able to assure my readers that all difficulties have been overcome and the last problem has been solved.

**Some Details.**

In connection with the process, the most important thing is that small and dust coal of low value is converted by the process into a valuable fuel, and in the course of this a number of extremely valuable products, as gas, motor spirit, and fertiliser, to say nothing of oils, are recovered.

Of all the coal mined in this country roughly one-third is "slack," or small coal, that will pass through a sieve with a moderately fine mesh. Of this slack there are two main sub-divisions, coking and non-coking slack. The latter is unsuitable for gas works or coke ovens, and can be used only to a limited extent for heating or steam raising purposes. It is consequently a drug on the market, and is regarded as a waste product. In normal times most of this is left down the mines and used for filling up the old workings, and is left in the "gob." The coking slack is a trifle more valuable as it can be used for the production of coke for blast furnace work. It is, however, not readily saleable and a good deal is consequently not brought to the surface. That which is, can be sold for a few shillings a ton.

Coalite is made from a mixture of two parts of non-coking with one part of coking slack, and as it is a perfect fuel for both domestic and industrial purposes, being absolutely uniform in texture and quality, it sells readily at a price closely approximating to that of best household coal.

The fuel is entirely smokeless. I have not only used it myself but have seen it burning in small and large domestic grates, and in the boilers and industrial plants, and can personally testify as to its value. About half a ton of coalite is equal in bulk to one ton of coal, will last as long in the fires as one ton of coal and give out about as much radiant heat. It consequently shows nearly 50 per cent. saving as compared with coal, a fact which speaks for itself.

# SHIPPING INTELLIGENCE

## MOTOR-SHIP v. STEAMSHIP.

(*From Our Own Correspondent.*)

*Port Said, October 7.*

It is often asserted, and sometimes justifiably, that British shipowners are slow to adopt anything new until it has been thoroughly tested and tried by other countries, and this is well illustrated in regard to motor-ships, for the Scandinavian and Danish firms are far ahead of our own in the adoption of this class of vessel. So far the only English company trading out this way that seems to have gone in at all seriously for them is the Glen Line, and as far as we have been able to ascertain the management appear to be satisfied with their step. It is obvious that in case of high prices or a shortage of oil a motor-ship that only uses say twenty tons a day is a better proposition than a steamship that burns forty tons a day, even though the initial cost of the motor-ship's engines is much higher.

## RECORD RUN TO EGYPT.

(*From Our Own Correspondent.*)

*Port Said, October 7.*

The s.s. Troilus belonging to the Ocean Steamship Company, better known perhaps as the Blue Funnel Line, has passed through here recently. She has created somewhat of a record in getting to Port Said from Liverpool in one hour under nine days. She is the latest of that line, and is on her maiden trip. With a length of 460 feet and a gross tonnage of 7,500 she makes an ideal cargo carrier, and is fitted with most of the latest improvements; water-tight doors in the bulkhead below that can be closed in case of emergency by the officer on the bridge, and also very efficient gear for the quick handling of cargo. She has also a new type of rounded bow, which, in case of collision with another ship, reduces very considerably the risk of fatal damage. In fact it may be safely said, that a ship struck by this type of bow would in all probability be able to get to port, whereas the same impact by one of the old type of sharp bows, would sink her at once. In case, however, that the Troilus is the rammed instead of the rammer, she is fitted in the highest part of the ship, nearly on a level with the bridge, with a complete installation of motors and pumps, so that, if the engine-room were flooded, these motor-pumps could keep the water under control, and at the same time furnish power to keep the wireless going at full strength.

Her engines are compound geared turbines, which have obviously done well to have got the ship here in record time. Her "astern" turbine is able to develop about 80 per cent. of the power of the "ahead" ones, which is a vast improvement on previous geared turbines, which could often only give 50 per cent., and sometimes as low as 40 per cent. of the ahead power, for going astern.

It would be a good thing if underwriters took note of this sort of thing, which is done by a firm which insures their own ships There might be fewer total losses of ships, and lives, if such precautions were made compulsory. There is already a vast difference in the number of fatal casualties happening to Greek ships, since the underwriters refused to insure them, and if they adopt the same attitude to certain types of tramp steamers, it would be of benefit to everybody.

## NEW STEAMER FOR ROUMANIA.

The s.s. Prahova, which was recently launched from the Walker Shipyard, Newcastle-on-Tyne, has been constructed by Sir W. G. Armstrong, Whitworth & Co., Ltd., to the order of La Première Société Nationale de Navigation Maritime, Roumania, represented in this country by Director General Commander Cesar Boerescu. The naming ceremony was performed by Madame M. T. G. Dinescu, wife of the Resident Inspector.

The principal dimensions of the vessel are :—Length overall, 372 ft.; length between perpendiculars, 360 ft.; breadth extreme, 51 ft.; breadth moulded, 50 ft. 9 inches.; depth moulded to upper deck, 24 ft., 9 inches. The vessel is designed for a speed on trial of 10 knots with deadweight of 6,235 tons. It is a single screw vessel, and had been built under special survey to approved plans for Lloyds Classification—100 A.1.

The cellular double bottoms are arranged for carrying water ballast, and to extend from the well in the after tunnel recess to the fore peak bulkhead, divided by water tight transverse floors. The fore and after peaks also serve as ballast tanks arranged to be filled and emptied by a donkey pump. The upper deck, poop bridge and forecastle decks are all of steel. Fresh water tanks are provided of a total capacity of 4,000 gallons; each tank being provided with suitable arrangements for filling emptying and cleaning.

The vessel has two masts, with telescopic pitch pine top masts, and on each side of each mast two pitch pine derricks capable of lifting 5 tons are fitted, in addition to two derricks placed on the bridge capable of lifting two tons. It is provided with a windlass of the horizontal direct steam type in addition to 10 winches of the double cylinder horizontal type. Pumping and piping arrangements are replete in every respect. The electric lighting installation comprises a direct coupled generating plant with vertical single cylinder engine and dynamo of the multipolar type of ample power to run the whole plant at one time.

The propelling machinery is of the triple expansion type with cylinders 24 inches—39 inches, and 65-1-2 inches;stroke 45 inches. There are three boilers of the cylindrical multiple type 12 feet 9 inches external diameter by 11 feet. 6 inches long, constructed to stand a working pressure of 180 lbs. per square inch; the total heating surface being 5,200 sq. ft.

## DANUBE-ELBE NAVIGATION SCHEME.

The Prague papers announce that the Czechoslovak Government is negotiating with an English financial group with a view to forming a company, which, assisted and supervised by the Government, would be entrusted with the whole navigation on the Elbe and Danube. Besides stipulating for facilities in the transport of goods from the Czechoslovak Elbe and other ports to Bratislava on the Danube, the English group suggested the advisability of hiring the Czechoslovak State Railways for a number of years. The details of the offer, however, are not yet known, but it is stated that, as regards tariffs, the authority of the State would not be superseded.

## NEW PASSENGER SERVICE TO THE FAR EAST.

The Ellerman and Bucknall Line are inaugurating a new passenger service to the Straits, China and Japan. The first departure will be the s.s. City of Manchester, calling at Plymouth for passengers on December 2, to be followed by the new twin s crew Turbine steamer City of Simla, 10,500 tons, about a month later. The City of Simla is fitted with all modern improvements and has accommodation for 200 first class passengers, and 60 second class. Her up-to-date accommodation includes brass bedsteads in many of the cabins, another feature being the provision of outside cabins only.

## FORTHCOMING SAILINGS.

*The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parentheses :—*

*Anchor Line.*—S.s. Olympia for Bombay (Liverpool, November 8).

*Anchor Brocklebank Line.*—S.s. Malia for Calcutta (Manchester, November 5); s.s. Matheran for Port Said, Colombo, Madras and Calcutta (leaves London, November 5) ; s.s. Magdapur for Calcutta (Birkenhead, November 6) ; s.s. Imani for Port Said, Colombo, Madras, and Calcutta (London, November 15) ; s.s. Holywell for Port Said, Colombo, Madras and Calcutta (London, December 5).

*Bibby Line.*—S.s. Yorkshire for Marseilles, Port Said, Colombo and Rangoon (Birkenhead, November 9).

*Clan Line.*—S.s. Clan Mackay for Colombo, Madras and Calcutta (Birkenhead, November 3) ; s.s. Clan MacQuarrie for Bombay and Persian Gulf (Birkenhead, November 4).

*Cunard Line.*—S.s. Brescia for Gibraltar, Algiers, Malta, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Odessa, Novorossisk and Batoum (Liverpool, October 29) ; s.s. Cypria for Genoa, Leghorn Catania, Brindisi, Bari, Ancona, Venice, Trieste, Fiume, and Gravosa (Swansea, November 15).

*Ellerman Line.*—S.s. Estrellano for Gibraltar, Algiers, Malta, Jaffa, Haifa, and Beyrout (Liverpool, November 5).

*Ellerman's "City" Line.*—S.s City of Exeter for Calcutta (Birkenhead, November 8) ; s.s. City of Poona for Calcutta (Birkenhead, November 24).

*Ellerman's "Hall" Line.*—S.s. Melford Hall for Bombay, Karachi and the Punjab (Liverpool, October 31) ; s.s. City of Marseilles for Bombay, Karachi and the Punjab (Liverpool, November 12) ; s.s. Kosmo for Malabar Coast ports, (Liverpool, November 21).

*Ellerman's "Westcott and Laurance" Line.*—Steamers sail fortnightly for Mediterranean, Egypt, and Levant ports.

*Henderson Line.*—S.s. Amarapoora for Port Said and Rangoon (Birkenhead, November 2) ; s.s. Chindwin for Port Said and Rangoon (Birkenhead, November 16).

*Johnston Line.*—S.s. Peruviana for Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Galatz and Braila (Liverpool, November 5).

*Moss Line.*—S.s. Limoges for Casablanca, Gibraltar, Malta, Jaffa, Beyrout and Cyprus (Liverpool, November 4) ; s.s. Karnak for Gibraltar, Algiers, Malta, Alexandria (with transhipment to Morocco, Algeria, Cyprus, and Syrian Coast ports) (Liverpool, November 5).

*P. and O. Line.*—S.s. Nankin for Colombo, Madras, and Calcutta (London, November 4) ; s.s. Morea for Bombay (London, November 11).

*P. and O. British India Line.*—S.s. Margha for Colombo Madras and Calcutta (London, October 28) ; s.s. Merkara for Bombay and Karachi (London, November 4) ; s.s. Manela for Colombo, Madras, and Calcutta (London, November 11) ; s.s. Mashobra for Bombay and Karachi (London, November 18) ; s.s. Nerbudda for Colombo, Madras and Calcutta (London, November 26).

---

On account of insufficient fodder in some parts of Roumania the export of oilcakes has been prohibited.

---

The traffic receipts of the Egyptian Delta Light Railways for the week ended September 30 amounted to £E12,844 ; total for year £E172,241.

# WONDERFUL EXHIBITS
AT THE
# Brewery Exhibition
**(Royal Agricultural Hall, Oct 29th to Nov 4th).**
## FLUGEL SODA FOUNTAINS
**Stand—152, Row Z.**

Actual working models will be on view showing how the finest aerated fruit drinks are automatically manufactured at a minimum of cost and trouble. The Flugel Soda Fountains automatically filter every drop of water, and each drop is aerated while it is being filtered. Every one interested in the production and sale of mineral water drinks should ensure seeing this remarkable machine, and if unable to visit this exhibition they should send for the special free illustrated booklet (now ready) giving a full description of these exhibits. You will be more than interested. Write to:
**FLUGEL & Co., Ltd., (Dept. N40): 69, Green Lanes, London, N: 16:** and mark the envelope "Exhibition."

## TENDERS INVITED.

*Tenders are invited for the following contracts, and must be made by the dates mentioned.*

*(Particulars of tenders marked (D.O.T.) are to be obtained from the Department of Overseas Trade, 35, Old Queen Street, S.W.1.)*

**Egypt.**

Blind Tape.—The Inspector of Buildings, West Division, 32 Boulevard de Ramleh, Alexandria, invites tenders for the supply of 2,500 linear metres of blind tape 2½ centimetres wide. October 31.

Pumps.—The Director-General, State Domains (Commercial Service), invites tenders for the supply of three centrifugal pumps of 13 and 14 inches complete. October 31.

Canal and Drain Clearance.—The Inspector of Irrigation, 3rd Circle, Alexandria, invites tenders for the winter clearance of canals and drains in Beheira Province. November 2.

Pumping.—The Director-General, Mechanical Department, P.W.M., Cairo, invites tenders for the supply of installation of pumping plant at Atf Pumping Station. December 31.

Oil Fuel.—The Technical Secretary, Petroleum Office, Ministry of Finance, Cairo, invites tenders for the supply of oil fuel to various Government Departments. November 1.

Canal and Drain Clearance.—The Mudir of Gharbiya Province Tanta, invites tenders for winter clearances and repairs, Gharbiya Province, excluding Zifta District 1921-1922. November 5.

Canal and Drain Clearance.—The Mudir of Minufiya Province, Shibîn el Kom, invites tenders for winter clearances and repairs, Minufiya Province and Zifta District, 1921-1922. November 5.

Clothing, etc.—The Lunacy Division, Abbassiya, invites tenders for the supply of clothing, bedding, furniture, hardware, slippers brushes, and other household necessaries required for Abbassiya and Khanka Asylums for one year from April 1, 1922, November 21.

Paper and Stationery.—The Egyptian Ministry of Finance invites tenders for the supply of paper, stationery, and general office material required by the Central Stores, Ministry of Finance, for the year 1922—1923. December 15. (D.O.T.)

**Malta.**

Conveyance of Mails.—Sealed tenders will be received at the Office of H.M. Treasury, Malta, up to 4 p.m. on November 30, 1921, for the service of the conveyance of mails between Malta and a port in Sicily or the Continent of Europe for a period of six years, (*a*) twice weekly, (*b*) three times weekly, provided that either party can terminate the contract by giving six months' notice on the expiration of the first three years. Tenderers will give the following particulars :—(*a*) Days of the week and hours of proposed arrivals and departures at Malta and at specified ports abroad. (*b*) Gross and net tonnage of steamers, speed, passenger and other accommodation. (*c*) Amount of annual subsidy required. (*d*) Date of commencement of service. Copies of conditions of contract and forms of tender may be obtained on application at the Treasury Office, Malta, or to the Crown Agents for the Colonies, 4, Millbank, Westminster, London S.W. The Government will consider any other conditions which tenderers may propose. No tender will be considered unless it is signed by the tenderer and by a suitable guarantor, residing in these Islands, for the due performance of the contract, and unless it is accompanied by a deposit of £500, which in the case of unsuccessful tenderers will be returned as soon as a contract is completed within the term fixed in para. 8 hereof. In the case of the successful tenderer the deposit shall be returned after the signature of the contract. The tenderer whose offer is accepted shall forfeit the deposit of £500 should he or his surety fail to sign the contract within eight days from the date of an intimation given to them to that effect, and fail to deposit with the Government of Malta, within eight days from the date of acceptance of the tender, a sum of two thousand pounds (£2,000) as security for the due performance of the contract.

**Yugoslavia.**

Paper.—The Director of Government Monopolies, Belgrade invites tenders for the supply of 180,000 kilogrammes of paper on reels for packing tobacco. November 1 (D.O.T.).

Army Clothing.—The Army Clothing Department of the Yugoslav State, Ministry of War and Marine, invites tenders for the supply of 120,000 army blankets, third class. Tenders will be received by the Army Clothing Department, Donji Grad, Belgrade, where samples of the blankets required may also be inspected. November 10. (D.O.T).

**India.**

Rails and Fishplates.—The South Indian Railway Company Ltd., invites tenders for the supply of 60lbs. per yard B.S. Bull-headed rails and fishplates ; 90lbs. ditto ; fishplates for 41½lb. flat-bottomed rails. Specifications and forms of tender can be obtained from the Company's Offices, 91, Petty France, Westminster.

Paint, etc.—The East Indian Railway Company invites tenders for the supply and delivery of Paints, &c., wood screws, nails, &c., bunting, 20 bogie carriages. Tenders for paints, wood, screws, nails and bunting close on November 2, and tenders for bogie carriages close on November 9.

Condensing Plant, etc.—The Calcutta Electric Supply Corporation invites tenders for the supply and erection at Cossipore generating station of (1) one 15,000 kw. turbo-alternator and condensing plant, and (2) two water-tube boilers each with evaporation of 60,000lb. per hour. November 9.

# Near East Markets.

## LONDON PRODUCE REPORT.

### Further Decline in Prices.

Sugar.—British refined has continued in fair demand at the revised rates. West Indian crystallised has come to business at 40s., while Czecho-Slovakian is unchanged at 20s. 6d. Other transactions include white Mauritius at 43s. 6d., a decline of 1s., and white Java at 47s. 3d. a drop of 1s. 3d.

Coffee.—A quiet tone has prevailed. Costa Rica has been done round about 126s., while Santos has come to business at 55s. and Indian at 100s. Futures are:—December 47s, March 48s. 3d., May 48s. 4½d., July 50s., September 50s. 3d.

Oilseeds.—The market has been dull. Indian linseed is 1s. 3d. down at 15s. 3d., while La Plata has shed a similar amount at 14s. Rapeseed has been firm with Toria at 19s. 3d., and Brown Cawnpore at 18s. 6d. Cottonseed has been inactive, with Indian 1s. 3d. down at 8s., and Sakellaridis at 11s. 6d.

Seed Oils.—A weak tendency has ruled. Linseed oil is 3s. 6d. down at 26s., while for November-December 25s. 3d. is quoted and for January-April 26s. 6d. Rape oil has been quiet, with crude at 52s. and the refined variety at 56s. Cotton oil has been quiet. Refined common edible has come to business at 57s., while Egyptian crude has been done at 47s., and deodorised at 62s. American turpentine is 65s.

Oilcakes.—The market has been weak. Linseed cake has been done at 275s, while cottonseed cake has come to business at 190s. Other quotations include 300s. for arachis cake, and 160s. for palm kernel.

## ASIA MINOR FRUIT REPORT.

Messrs. C. J. Giraud and Co., Smyrna, report as follows for the week ended October 8 :—

Sultanas.—The total estimated arrivals to date amounts to 111,640 bags compared with 65,220 bags for the corresponding period of last year. The total estimated sales are 104,640 bags as against 59,220 bags for the same period last year and the estimated stock unsold amounts to 8,000 bags as compared with 6,000 bags for 1920.

Figs.—The total estimated arrivals to date total 117,346 loads, as against 119,305 loads for last year. The total estimated sales are 115,346 loads as compared with 116,305 loads for 1920, and the estimated stock unsold amounts to 2,000 loads against 3,000 loads for last year.

Shipments.—The s.s. Trentino which sailed on September 26 for Liverpool and Glasgow has on board 32,362 boxes of sultanas, 831 cases of figs , 1,511 boxes of figs, and 29,216 bags of figs for Liverpool ; and 29,321 boxes of sultanas, 136 cases of figs, and 13,552 bags of figs for Glasgow.

Markets. The sultana market closed very quiet for the week ended October 1. ' Early this week, however, the exchanges commenced marking some sensational fluctuations, sterling from 650-660 running up to 695-700. Dealers attempted to put up prices in local currency, but shippers, discouraged by news of falling prices abroad, refused to follow the advance, and the market speedily relapsed. The advance in foreign exchange has been partly maintained, and the market remains very disorganised, business becoming more than ever a gamble on exchange. It is impossible to forecast the future of exchanges, and shippers are generally at a loss on what basis to reckon their prices for forward deliveries. Owing to the heavy stock of sultanas, however, prices must continue declining.

Figs are a steady market, the rise in exchange stimulating business. About 80 per cent of the yield has been marketed, and stocks remaining, of sound undamaged fruit, are light. Statistically the outlook is encouraging.

## BUSREH DATES.

The bazaars in Busreh and Ashar (says the *Times of Mesopotamia* of September 4) are rather excited at present concerning a scheme for the limitation of date exports which, we believe, is now being considered by some of our leading exporting firms. In view of the interest aroused locally by this subject, it might be advisable for somebody to make a statement on the necessity of the steps which are proposed, and which will probably be put into operation if the firms concerned succeed in coming to an agreement for the sharing of the spoils. Nobody can object to the exporters looking after their own interests. A considerable proportion of the consignments which they sent to London last year remains unsold, and a repetition of that state of affairs would, in the long run, have most deleterious effects on Busreh's staple trade. It is only natural that the growers should grumble. But it must be remembered that they reaped a rich harvest during the war, when dates could not be produced in sufficient quantities to meet the emergency demand. Experience has shown that that demand has not been maintained. It strikes us, by the way, that a good deal could be done to popularise the consumption of dates in Britain and the rest of Europe by a judicious advertising campaign in the popular press. Many of us remember the fillip that was given to the use of currants a year or two before the war by advertisements (usually disguised as articles in " Aunt Nellie's column " and the like !) proclaiming the excellencies of currants. No firm's name appeared in these advertisements, which were paid for by a combine interested in the exploitation of the commodity in question. Why not try the same remedy for the admitted falling-off in the demand for dates? Many housewives in England would appreciate a reminder concerning the superb qualities of the date as a proteid, its lusciousness its purity and freedom from disease, and—above all—its cheapness.

## CURRENT PRICES.

*General Produce.*—Bacon : ( Continental ), 144s. 6d. cwt. ( Canadian ), 110s. cwt. ; ( American ), 90s. cwt. ; Butter ( Danish ), 229s. cwt. ; ( Australian ), 180s. cwt. ; ( New Zealand) 96s. cwt. ; lard 79s. 3d. cwt. ; eggs : ( Danish ), 34s. per 120 ; ( Styrian ), 21s. 6d. per 120 ; chillies, 162s. 6d. cwt. ; cloves ( Zanzibar ), 1s. 3¾d. lb. ; cocoa ( Ceylon, good to fine ), 87s. cwt. ; coffee ( Costa Rica ), 152s. 6d. cwt. ; ( East India ), 130s. cwt. ; ( Central American ), 120s. cwt. ; ( Jamaica ), 68s. 6d. cwt. ; ( Mocha longberry ), 114s. cwt. ; ( Santos superior ), 63s. 6d. cwt. ; ginger ( washed Cochin ), 56s. 3d. cwt. ; nutmegs ( 110's to 80's ), 1s. lb. ; pepper ( Muntok white ) 8½d. lb. ; ( Singapore black ), 4d. lb. ; pimento, 2½d. lb. ; raisins ( Valencias ), 141s. 6d. cwt. ; sultanas ( Smyrna ), 120s. cwt. ; currants ( Vostizza ), 70s. cwt. ; ( Amalias ), 53s. cwt. ; sugar ( Tate's cubes ), 53s. 6d cwt. ; ( Lyle's granulated ), 50s. 7½d. cwt. ; ( Mauritius crystals ), 45s. 6d. cwt. ; ( West India crystallized ), 42s. cwt. ; ( Centrifugal in bond ). 16s. 6d. cwt. ; tapioca ( fair Singapore ), 1¾d. lb. ; sago ( small pearl ), 26s. 6d. cwt. ; sago flour, 17s. 3d. cwt. ; rice ( Rangoon No. 2 ), 19s. 6d. cwt. ; ( bran Rangoon ), £8 2s. 6dl ton ; cinnamon ( firsts ), 1s. 1½d. lb. ; mace ( fair Singapore ), 1s. 2½d. lb. ; tea: (Indian, common to good common), 9½d. lb.; ( medium to good ), 1s. 4½d. lb. ; ( fine to finest ), 2s. 7½d. lb. ; Ceylon ( common to good common ), 10½d. lb. ; ( medium to good), 1s. 5d. lb. ; (fine to finest), 2s. 7½d. lb.; Java (common to good common ), 7¼d. lb. ; wheat : ( English white ), 46s. 6d. qr. ; ( La Plata, ex ship ), 82s. qr. ; ( Australian ), 57s. 6d. qr. ; barley ( malting ), 60s. qr. ; barley ( feeding ), 40s. qr. ; oats ( English ), 28s. qr. ; oats ( La Plata ex ship), 26s. 6d. qr. ; maize ( mixed American ), 33s. qr. ; maize ( La Plata ). 33s. 3d. qr. ; flour 50s. 6d. sack.

*Metals.*—Aluminium, £122 10s. ton ; antimony ( English Regulus ), £39 10s ton ; bismuth, 7s. 6d. lb. ; copper ( standard ), £67 13s. 9d. ton ; copper ( electro ), £75 10s. ton ; gold bars 106s. 5d. oz. ; iron ( No. 3 Cleveland ), 120s ton ; hematite ( mixed number ), 136s. 3d. ton ; galvanized sheets ( 24 G), £18 15s. ton ; lead ( soft foreign ), £23 15s. ton ; manganese Poti. 1s. 1½d. unit ; molybdenite, 40s. unit ; nickel, £190 ton ; platinum, 382s. 6d. oz. ; plumbago, £20 ton ; quicksilver, £9 18s. 9d. bottle ; silver bars 42½d. oz. ; spelter ( G.O.B. ), £26 13s. 9d. ton ; tin ( standard ), £155 7s. 6d. ton ; wolfram, 12s. 10½d. unit ; zinc sheets, £35 10s. ton ; tin plates ( 20 x 14 ), 21s. box.

*Chemicals.*—Acids : Boric 66s. cwt. ; oxalic, 9d. lb. ; citric, 2s. 5½d. lb. ; tartaric, 1s. 5½d. lb. ; ammonia ( sulphate ), £14 9s. ton. ; arsenic ( white powdered ), £33 15s. ton ; benzole (standard ), 2s. 5d. gallon ; bleaching powder ( 35 per cent ), £15 15s. ton ; borax crystals, 31s. 6d. cwt ; cream of tartar, 131s. 3d. cwt ; potassium : bi-chromate, 9¾d. lb. ; chlorate, 6d. lb. ; caustic, £29 ton ; permanganate, 1s 0½d. lb. ; prussiate yellow, 1s. 2d. lb. ; sulphate ( 90 per cent. ) £16 10s. ton ; Sodium : crystals, 14os. ton; bi-carbonate, £12 5s. ton. ; bi-chromate, 7d. lb. ; alkali ( 58 per cent. ) £9 5s. ton ; chlorate 4d. lb. ; caustic ( 70 per cent.) £24 10s. ton ; hyposulphate £18 10s. ton ; prussiate, 8¾d. lb. ; nitrate, £14 16s. 3d. ton ; glycerine ( crude 80 per cent. ) £80 ton ; glycerine ( industrial 1260 per cent. ) £110 ton ; lemon oil, 3s. 7½d. lb ; quinine, 4s. 0½d. oz. ; red lead, £38 5s. ton ; white dry lead, £41 5s. ton ; white ground lead, £51 ton ; sulphate of copper, £31 ton, sulphate of iron 117s. 6d. ton.

*Miscellaneous.*—Cotton ( American ), 13.00d. lb. ; cotton ( Egyptian Sakel ), 24.00d. lb. ; Oilseeds : Linseed ( La Plata ), £14 15s. ton. ; cotton ( Egyptian ), £12 10s. ton ; palm kernals, £18 5s. ton ; castor seed ( Bombay ), £21 15s. ton ; Calcutta, £16 ton ; rape ( Toria ), £19 ton ; sesame seed ( China ), £32 ton ; soya beans, £15 ton ; Oils : Linseed £29 15s. ton ; coconut (Ceylon ), £47 10s. ton ; cotton crude, £49 10s. ton ; ground nut, £55 ton ; olive ( Levant ), £78 15s. ton ; palm, £36 17 6d. ton ; rape ( crude ), £52 10s. ton ; soya, £41 10s. ton ; petroleum, 1s. 4½d. gallon ; petrol, 2s. 1d. gallon ; fuel oil ( ex tank ), £3 15s ton ; Rubber : Plantation ( No 1 crepe ), 9¼d. lb. ; smoked sheet, 9¼d. lb. ; fine hard para, 1s. 1½d. lb.

# COMPANY MEETING.

## HARRISONS AND CROSFIELD.

### Outlook for Tea and Rubber.

The thirteenth ordinary general meeting of Harrisons and Crosfield Ltd., was held on October 21, in the Council Room of the Rubber Growers' Association (Incorporated), 38, Eastcheap, E.C., Mr. C. Heath Clark, the Chairman of the company presiding.

The Secretary (Mr. E. C. Cleveland-Stevens, D.Sc.) having read the notice convening the meeting and the report of the auditors,

The Chairman said: A year ago, when I presided over our meeting, acting for our Chairman, Mr. George Croll, who was then absent owing to illness, I quite expected that I was doing so for the last time. Unfortunately Mr. Croll's illness has proved of longer duration than any of us at that time imagined was at all probable, and his colleagues have thought it best to act in accordance with his expressed desire, and have accepted his resignation of the Chairmanship. As the other members of the Board pressed me to continue to act as their Chairman, I have consented to resume my old position for the present.

**The Past Year.**

The past year has been the most anxious and difficult that I remember in the history of our business. We have not only had to contend with an altogether unprecedented slump in the prices of the produce in the production of which we are mainly interested but, in addition, on the merchant side of our business we have had to face an enormously heavy depreciation of stocks, aggravated by the inability of customers to take up and pay for consignments ordered. We have also encountered further difficulties connected with violent fluctuations in exchange. Having faced very heavy losses from these and other causes, and having written down the stocks to replacement values, we have, I think, no need to be ashamed of the final result as shown in our Profit and Loss Account for the year.

**The Balance Sheet.**

Dealing with the figures in the balance sheet, the only change in the capital of the company is an increase to the extent of 7,020 deferred ordinary shares. The reserves stand at £473,000, as against £459,000 last year, the sundry liabilities have been reduced to the extent of about £260,000 since a year ago.

On the assets side of the balance sheet, there is an increase of about £140,000 under the heading of freehold and leasehold property, in consequence of our having paid for commitments previously entered into. Stocks show a reduction of about £35,000 as compared with a year ago, and are taken at replacement value. Loans to companies are £39,000 less; bills receivable are £70,000 less; and sundry debtors are £229,000 less.

Our investments amount to £1,413,000—an increase of about £145,000 since a year ago. The book values have not been changed, but remain at "cost or under" as in previous years. The value, if measured by the Stock Exchange quotations, in cases where there are such quotations, would show a considerable amount of depreciation, but, having regard to the favourable basis upon which our holdings were originally acquired, the directors have no doubt that the depreciation will disappear whenever the industries with which we are connected recover from the present crisis.

**Profit and Loss Account.**

Turning now to the profit and loss account, including the amount brought forward from the previous year, the balance at credit of the account is £202,339 18s. 8d. The dividends already declared amount to £157,514 12s., leaving an available balance of £44,525 6s. 8d. which the directors recommend should be carried forward to the current year. It has been our custom to recommend further dividends on the deferred ordinary and management shares, but, under the present uncertain conditions, we think it wise to conserve the resources of the company and to make no further distribution of profit among the holders of those classes of shares.

**The Tea Industry.**

The position of the tea industry has improved during recent months. The fall in the value of the rupee has reduced the production costs, and this has, in the cases of all the estates with which we are concerned, been accompanied by economies in management and working. The market prices for tea have somewhat improved also, so that at present the majority of tea companies are no longer making heavy losses.

The probable world's production of tea in 1921 will be, I think, round about 600 million pounds, as against a probable consumption of about 700 million pounds; and, during the past six months the stocks in the United Kingdom have been eaten into to just about the extent of 50 million pounds.

It is a remarkable fact that the consumption in our own and other markets should, during the past two or three years, have increased to an extent permitting the absorption of 700 million pounds of tea, although the Russian market, which in pre-war days took nearly 200 million pounds per annum, remains practically closed, as well as other smaller outlets. It would appear that, when business with these countries again becomes possible, the demand must go beyond the present limits of production. At the same time it would appear wise for tea producers to remember that that time has not yet arrived, and that, until it does, it may be possible in any season to produce a greater quantity of tea than can be marketed at a profit.

**The Rubber Industry.**

The rubber industry has been, and still is, passing through a very grave crisis, owing partly to the increased production of the past two years, and still more, I think, to the financial stress and general slump in the trade of the world. It is, however, one of the world's great industries, and an industry which is growing in importance every year. To-day the raw product is the chief commodity which the British Empire sells to America, and any improvement in its price tends to strengthen our exchange with the United States.

I doubt whether the actual consumption, by which I mean the using up of rubber, has ever been going on faster than during the past year. I think that what has happened is that, owing to the abnormal financial and trade conditions, the actual consumption has been provided for very largely from the invisible stocks in the hands of manufacturers, wholesale dealers and shopkeepers throughout the world, and that there has only been taken from the first-hand producers of raw rubber just sufficient to make up the difference between what was available from the invisible stocks and the actual consumption, leaving the balance of the year's production of raw rubber to accumulate and increase the stocks in London and other parts.

As a result of the restriction, voluntary and involuntary, it appears probable that the total production of raw rubber this year will not exceed 280,000 tons, and that the amount of raw rubber bought by manufacturers during the same period will be about 250,000 tons. I think it is safe to conclude that, by the end of this year, the invisible stocks, both of raw and manufactured rubber, will have been used up to the fullest extent possible, and that next year the demand for raw rubber must again be fully equal to the actual consumption and amount to not less than 300,000 and possibly to 350,000 tons.

The motor industry accounts for about two-thirds of the consumption. It is estimated that, just previously to the war, there were about two million cars running; that in 1918 the number had increased to between seven and eight million; and that to-day it has reached a total of twelve million. I know of no source of rubber consumption that can be said to be declining, but, on the other hand, there are constantly new uses being added to these already in existence, and I have no doubt as to the ultimate soundness and value of the rubber production industry.

To assist in meeting the crisis, the Rubber Growers Association has done a very great amount of work. If it had not been for their taking steps to organise restriction, the position would have been much worse than it is, and I hope that it may be possible for that Association to take the lead once more in organising some simple form of temporary restriction. If any large percentage of producers would agree to a cessation of tapping for a period of three months, it would force the present first-hand stocks of rubber rapidly into consumption, and if, as I believe, the demand will steadily improve, the whole industry might be once again upon a paying basis.

On the motion of the Chairman, the balance sheet made up as at June 30, 1921, and the reports of the directors and auditors were adopted.

Messrs. George Croll and E. Eric Miller were re-elected directors of the company, and Messrs. Price, Waterhouse and Co., were re-appointed auditors to hold office until the next general meeting.

At the close of the ordinary general meeting, an extraordinary meeting of shareholders was held at which a resolution was passed altering the provisions contained in Article 92 of the Articles of Association.

## THE FILM INDUSTRY IN YUGOSLAVIA.

The motion picture field in Yugoslavia is ripe for exploitation says an American consular report. To-day there are eight principal firms importing and distributing films in Yugoslavia, most of them being agents for German concerns. No pictures are developed and printed in Yugoslavia, owing to lack of equipment and personnel, and no new companies are known to be forming.

The fact that a great percentage of the people are illiterate and know their country's history only through song and story should encourage films specializing in educational matter and featuring special phases of Yugoslav history. The climate of the country is exceptionally favourable to the taking and printing of pictures, the atmosphere being relatively dry and very clear the year round. Every type of scenic background is to be found within the comparatively short radius of the principal cities, There is also an abundance of untouched water power that could be utilised for a dependable supply of power and electric lighting.

It is estimated that there are about 400 motion-picture halls in Yugoslavia. Most films are importations from Italy, France, Germany, and Austria. Productions for export to Yugoslavia should be free from immoral suggestions and political colouring as stress is laid here by the local censors.

## ASSAM RAILWAYS AND TRADING

The report of the Assam Railways and Trading Company for the year ending March 31, states that the capital expenditure amounted to £11,877, making £813,572. The gross earnings were Rs15.88.178, an increase of Rs1.08.358, and expenditure Rs2,59,699 increase Rs2,11,249. The output at collieries amounted to 274,909 tons, and sales to 293,111 tons. The profit amounted to £87,045. There has been brought into account £21,621, representing recoveries of income-tax, etc., made recently. After payment of Debenture interest and allowing for all Preference dividends there remained £17,498. Directors recommend a final dividend on "B" stock of 3 per cent., making 5 per cent for year, leaving £2,498 to be carried forward, subject to excess profits duty (if any). Meeting, Winchester House, E.C. November 2, noon.

## SUEZ CANAL COUPON DRAWING.

On November 3 next the Suez Cana Company will proceed to the final redemption drawing of 92,932 bills for coupons in arrears (says the Paris Correspondent of the *Financial Times*). These "bons" are at present negotiable on the Paris market, but will cease to be so from November 3. The bills or "bons" were brought into existence in 1874 to the number of 400,000 to represent seven coupons in arrears on 400,000 shares. Each coupon was of the value of 85 francs and the bills were for 85 frs each, bearing an annual interest of 4.25 frs gross. They are to be reimbursed at 85 frs less existing taxation, which will reduce the net amount to 78 frs 96 centimes. The latest quotation on the Paris markets is 82.50 frs, which is difficult to explain in view of the certainty of the "bons" being redeemed at a lower figure in a few days' time.

## ON 'CHANGE.

### Dull Tendency Prevails,

*(From Our Own Correspondent.)*

London, Monday Night.

A very dull tone has ruled during the greater part of this week, though towards the close there was a slight recovery. The weakness of the mark has been one of the principal adverse influences, while the troubles in Portugal have not been without their effect.

Gilt-edged securities close at about the same level as a week ago. Consols are unchanged at 48, 7-8, but War Loan Fives are 1-8 up at 90. Fundings are 3-8 lower at 72. In Near Eastern securities Egyptian Guaranteed 3 per cent. are ¼ down at 68¾, but Greek Guaranteed 2½ per cent. 1898, and Turkish Guaranteed 4 per cent, 1855 are unchanged at 66 and 69 respectively.

There is little fresh to report with regard to the Industrial group. Dullness has prevailed generally, and prices generally have shown a downward tendency. Business, however has been on the smallest possible scale. Iron and Steel shares have displayed weakness. In Shipping securities P. and O. Deferred are 5 lower at 340. Furness Withy at 23s. xd. are 1s. down, while Cunards have shed 1s. 3d. at 16s. 3d.

**Oils Still Dull.**

The position in the oil market is still very uncertain. Mexican Eagles are 11-32 down at 3,1-8. Anglo-Egyptian are 1-32 up at 1¼, but Roumanian Consolidated are 9d. lower at 7s. 3d. Steaua Romana have shed 6d. at 8s. 6d., while Phoenix are 1s. 3d. down at 6s. Burmahs are 3-32 up at 5,11-32, while Anglo-Persian Prefs are unchanged at 21s. 9d., Anglo Persian Second Prefs being 3d. lower at 21s. 9d. Dacia Romanos are unchanged at 13-16.

Bank shares have been rather weak. Agricultural 3½ per cent. Bonds are unchanged at 54, while Agricultural 3½ per cent. Guaranteed Bonds are ¼ up at 55¼. Imperial Ottoman Banks are ½ down at 7, while National Bank of Egypts have shed ¾ at 19. Bank of Athens are 1-8 down at 2, but Ionians are unchanged at 3¼.

Interest in the Rubber market continues to be very restricted, but despite the poor outlook prices are now fairly steady.

**Greek Shares Weak.**

Pronounced weakness has developed in Greek securities. The 5 per cent. 1884 Loan is 5 down at 34, while the 5 per cent. 1881 Loan has shed 3 at 34. The 4 per cent. 1902 Loan is 2 lower at 33, while the 5 per cent. Funding Loan has lost 3 at 34. The 5 per cent. 1914 Loan is exceptionally 1 up at 40.

Land shares have been somewhat unsteady. Beheras are ¾ down at 10, but Behera Prefs are unchanged at 3¼. Egyptian Delta Lands have shed 9d. at 8s. 9d., but Egyptian Consolidated Lands are unchanged at 1s. New Egyptians are 1s. 6d. down at 24s., but Sidi Salems are unchanged at 1,1-8. Sudan Plantations are 1-16 down at 3, while Union Foncieres are the same at 2,7-8.

Among Miscellaneous descriptions Alexandria Waters are ¼ down at 7, Egyptian Markets have shed 1s. 3d. at 18s. 9d., while Egyptian Salt and Sodas are 1s. 3d. down at 34s.

## FUTURE OF INSTITUTE OF SCIENCE AT BANGALORE.

In consequence of representations from the standing committee of the Court of Visitors of the Institute of Science at Bangalore, India, the Viceroy has appointed a Committee of Enquiry to examine the working of the Institute with a view to making suggestions as to its future policy. The object of the Institute, as originally projected by the late Mr. J. N. Tata, was to encourage research in pure chemical and physical science, but it has, in the course of a comparatively short career, developed a distinct tendency towards the study of problems which are likely to lead to results of immediate economic value, rather than towards the pursuit of investigations of purely scientific interests. The main question now in issue is as to the lines on which its development is to proceed.

Sir William Pope, K.B.E., F.R.S., etc., Professor of Chemistry, Cambridge University, is to be chairman of the committee, and Sir Arthur Shipley, G.B.E., F.R.S., Master of Christ's College, Cambridge, and Sir Henry Hayden, C.S.I., C.I.E., D.Sc., F.R.S., late Director of the Geological Survey of India, are the members appointed from this country. They are sailing for India shortly and it is expected that the committee will commence its enquiry about the middle of November. The rest of the committee will be appointed in India.

## MAP OF EMPIRE'S METAL RESOURCES.

A map of the chief sources of metals in the British Empire with diagrams of production for 1918 has just been published for the Imperial Institute by Messrs. Geo. Philip and Son, Ltd. It has been prepared under the direction of the Mineral Resources Committee of the Imperial Institute, and is a new edition, much amplified, of a similar map issued by the Imperial Institute in 1918, which had a large sale. The present map consists of three sections, a general map of the world on Mercator's projection, a series of inset maps of British countries and a separate set of diagrams of metal production. On both general and inset maps British possessions are shown in red, mandated territories in light red, and foreign countries in yellow. Deposits of metals are indicated by special letters, and their approximate localities by symbols, of different colours, worked deposits being distinguished from unworked. The letters are sufficiently large to be visible several feet from the map. In the general map are tabular lists of the principal metallic deposits in each part of the Empire.

The inset maps, all drawn to a uniform scale of 160 miles to the inch, includes South Africa, British Columbia and Yukon, Eastern Canada, the British Isles, Southern India and Ceylon, Burma, British Malaya, Eastern Australia and New Zealand. The diagrams of production give the outputs of 18 principal metals in each country of the Empire for the year 1918, the amounts being illustrated proportionately by red coloured rectangular strips. The outputs of the world are similarly shown, the proportion of total British production being indicated.

## USE OF TRACTORS IN MOROCCO.

H.M. Agent and Consul General at Tangier reports to the department of Overseas Trade that by an "Arrete Viziriel" dated September 24th, it was decreed that the application of the bonus of 60 francs per hectare for the cultivation of land by motor traction, which was authorised on 15th September, 1920, with a view to encouraging this mode of cultivation, should be extended to December 31st, 1921.

# COTTON & COTTON GOODS.

## MANCHESTER REPORT.

*(From Our Own Correspondent.)*

*Manchester, Friday.*

The conditions prevailing throughout the market during the past week have not been at all satisfactory, and there has been a noticeable falling off in the amount of business passing. The fluctuations which have occurred in raw cotton rates have proved disconcerting, and buyers have naturally adopted a policy of caution. The ups and downs in the values of the raw material just came at a time when business appeared to be improving but during the week demand fell away. Another disturbing feature has been the depreciation in the Far Eastern exchanges. With regard to cloth not much business has been done for Egypt, and only a few miscellaneous transactions have been placed for the Constantinople. Quotations for Egyptians yarns have eased somewhat, and buyers have purchased very sparingly. The cloth demand for India has been on rather extensive lines, but sales of any weight have not been mentioned. Occasional transactions have been registered in shirtings, and in a few instances some fair orders have been placed for light cloths. Recent advices, however, received from our Dependency have not been at all encouraging, and in some quarters revival of demand is not anticipated until after the new year. No developments have taken place with regard to China, but some fair sales in a variety of fabrics have taken place. Not much business has been done for South Africa. The position of the market at the moment is not extremely bright, and many disturbing features still prevail. The general opinion however is that trade will gradually become better.

## LIVERPOOL REPORT.

Messrs. Reynolds and Gibson report as follows for the week ended October 20:—Business on the spot during the past week has been most unsatisfactory, an accumulation of "Bear" factors weighing heavily on all markets. Yesterday afternoon however, the belief that the American railway strike would be averted, and that the unemployment so rife in this country would soon be alleviated—this latter as a direct result of Mr. Lloyd George's speech—induced a more favourable opinion in New York, and, as usual, the recovery there was reflected to-day in Alexandria and Liverpool. In spite of this, however, prices here show a decline of, roughly, 2d. to 3d. per lb. on the week, and spinners show less inclination to buy than ever. The only features worthy of comment are the small but steady business which continues in Sudan cotton, and the customary "tag-end" of the season enquiry for Scarta Afrita cotton, the latter being chiefly for the Continent. Uppers are being strongly held in Alexandria, and the difference here between fully good fair Uppers and fully good fair Sakel is narrowing. C.i.f. business is still being done on a limited scale only, and Manchester reports, whilst indicating a considerable enquiry from India and China, have but few actual sales to advise—from India, at any rate, and are on the whole very unsettled. The trade in yarns is in a very poor way at the moment, and spinners are reported as "losing ground." Most sources agree, however, that there is plenty of business waiting—granted steady markets. There are a great many unsettled influences still to be cleared away, unfortunately, before really steady markets can be looked for, and for the present we are of the opinion that considerable fluctuations may be expected. Quotations of Sakellaridis, fair to good are reduced 300 points; fine 200 points; and extra fine 150 points on the week. Brown and Upper are 100 points lower. Estimated sales 1,600 bales (including 250 Soudan). Fully good fair Sakellaridis 24.50d.

A Czecho-Slovak firm is erecting a cloth weaving plant at Arad, Transylvania, which it is understood will employ 1,400 operatives.

The Bengal Dooars Railway announce a further dividend on ordinary stock of 3 per cent., less tax, making 6 per cent. for year to March 31 last.

Czecho-Slovakia has now concluded commercial treaties with all the Central European States, with the exception of Hungary, as well as with France and Italy.

## COTTON CULTIVATION IN THE SUDAN.

*(By Our Khartoum Correspondent.)*

In view of the present prominence of the Sudan in the public eye as a potential cotton-growing country and the various controversies that have recently taken place regarding the engineering and economic aspects of the Gezireh projects, it is interesting to note that cotton has been grown in the country from very early times. It has not hitherto been possible to collate or publish in a connected form the various old annals of the country, but, as a result of recent researches into old and musty records, there is strong reason to believe that the growing of cotton for export purposes was introduced into Egypt very shortly after the conquest of the Sudan by that country. Jumel, an early French scientist and explorer, is known to have discovered round about the year 1822 a hitherto unknown plant in the garden of a certain Maho Bey, with which he made numerous experiments. For many years afterwards this plant was known as Mahoor Jumel's cotton, and it is on record that the original plant in Maho Bey's garden was grown from seed imported from the Sudan. These first cotton trees of the Sudan were perennials, and the present plant is merely another form of the same tree. For many years the Sudan-Abyssinian frontier was marked in a certain locality by a large cotton tree of this perennial type, which was a well known landmark in the vicinity and rejoiced in the name of Abu Masr (Father of Egypt).

The present cotton growing activity in the Gash Delta is another case of history repeating itself, as the potential value and possibilities of the district were fully recognised as early as 1873 when Ismail Pasha Ayoub erected a ginning factory at Kassala. Unfortunately the difficulty of finding adequate labour and supplies of fuel proved insurmountable, and after a very brief period of activity the factory was closed down and the cotton transported by caravan to Suakin. This proved a severe setback to the agriculturists of that period, and the cultivation steadily declined and became very desultory in character until a few years ago when a great revival took place. Now thanks to the great improvements effected by the Irrigation Department and the steady encouragement of the Government the district is in a flourishing condition, and it is estimated that eventually some 200,000 feddans will be under cultivation. The types grown are almost exclusively Sakellaridis and Afifi-Assili and compare very favourably with Egyptian types. The industry is at present heavily handicapped by the difficulties of transport and it is regrettable that the attempts at establishing motor transport between Kassala and Atbara have hitherto proved abortive from a commercial point of view.

There is an increased demand for German made precision tool from the Balkans, and eastern border countries.

## NOTES OF THE WEEK.

### *Hungary and the Little Entente.*

No single Government in the opinion of its fellows is above reproach to-day, and it is, therefore, meet that credit should be given where it is due. The Hungarian Government has been scrupulously correct in its attitude and action towards ex-King Charles' attempt to regain the throne. It lost no time in moving troops; it defeated the misguided Karlists, took the ex-King prisoner and held him at the disposal of the Allies. Up to this point nothing more could have been required of it, and it would have been unchivalrous and improper, if any communication in the nature of an ultimatum had been addressed to Budapest on the subject. Europe wants peace and good will these days, not sabre-rattling, and European affairs must be regarded from the standpoint of a group of nations confident of its strength to enforce peace, rather than from the nervous standpoint of a small country suspicious of its immediate neighbours. At the first news of ex-King Charles' escapade there may well have been a desire on the part of the Governments of Czecho-Slovakia, Roumania and Yugoslavia to exhibit the solidarity and usefulness of the Little Entente; but Dr. Benes must be too able a statesman to allow the agreement between the three countries to be unnecessarily strained by false cries of "Wolf." Long before mobilisation could take effect or any communication requiring an exchange of views between Prague, Bucharest and Belgrade could be sent to Budapest it was clear that Hungary was in no way responsible for the ex-King's foolishness.

### *The Fate of the Hapsburgs.*

Whatever may be the ultimate destination of ex-King Charles, there is no need for any sympathy to be wasted upon him. With a modicum of common sense he might have found himself back again on the throne of St. Stephen. He had merely to bide his time and satisfy the Allies of his good intentions; if an unmistakable call had reached him from Hungary, his return to Budapest would have followed as a matter of course. As things are, he has proved himself a nuisance to Europe and has rendered a grave disservice to his own country. In spite of all this, it might be well for the Allies to refrain from placing at this stage a veto on the whole House of Hapsburg as a result of one member's crime and folly. Their experience in interfering with the domestic affairs of Greece has not been a particularly happy one. It may be that the Magyar nation will be glad of the opportunity and rid themselves of the dynasty, in spite of the existence of a pro-Hapsburg clique in the capital and among the largest landowners. By common consent a republican form of government is unsuited to Magyar psychology, and a country is well advised to think twice before it exposes itself to the dangers and annoyance of rival dynasties. Of the ex-King Charles as a pretender to the throne the Allies can take charge; they will not wish to make themselves responsible for every member of the family for all time. If the Magyars decide that they can secure the sovereign they want among the Hapsburgs, it will be better to allow them to make their own choice rather than to disturb the country by imposing upon it a ruler whom they will regard as less desirable.

### *The Asia Minor Problem.*

The Greek Prime Minister and M. Baltazzi, Minister for Foreign Affairs, have arrived in London after a brief stay in Paris. Their mission is both a difficult and a delicate one, but there can be no doubt that in England they will find a desire to do everything possible to smooth their task. No good purpose, however, can be served by attempting to ignore facts. Since a Greek mission was last in London it has been proved conclusively that the Greeks are unable to coerce the Turks into submissiveness, and that any attempt to place Turks under Greek rule will embroil Great Britain with a considerable section of the Moslem world. A practical solution of the Asia Minor problem has to be found. The one that would cause least prejudice to Greek prestige would be that Greece should offer to retire from Asia Minor in favour of Great Britain. The British public has no desire for further commitments abroad, still less for another mandate, and there would doubtless be considerable reluctance in this country to accept the additional responsibility. But the measure of responsibility would be slight. Greece is mainly concerned for the safety of Christian minorities in Asia Minor; the Turks protest their ability, if left alone, to safeguard the interests of these minorities, and in regard to Cilicia, the French appear already to have taken them at their word. The presence of a British High Commissioner in an autonomous Smyrna would be an earnest of the Turks' ability to carry out their good intentions and would meet the fears of the Greeks. After a stated period

Digitized by Google

of years it would be possible to take stock of the situation; if the Turks had made good, there would be no need for the British High Commissioner in Smyrna. Who can doubt that they will be more likely to live up to their pledges, if all chance of provocation is removed?

### *A Blessing Undisguised.*

The solution proposed above is made from a desire to serve the best interests of Greece. A form of military stalemate has been reached in Asia Minor, and both belligerents will probably assert their readiness to continue the campaign in the spring. Even if the Greek soldiers are proof against all personal considerations it is certain that the Government could not resume hostilities unless it has in the meantime secured a substantial loan. Even so the chances of reaching a definite conclusion would be no more favourable than they were this year. Greece, therefore, must extricate herself from the *impasse*, and for this reason we would commend the suggested solution to the consideration of her Delegates. As between Greece and the Allies bygones would be bygones; with the formal recognition of King Constantine and with the promise of a loan the mission of M. Gounaris would not have been in vain. Some political capital might be made out of the Asia Minor situation, but the Greek people as a whole would experience a sense of relief over its liberation from the burden of prolonged military service.

### *The Story of a Tour.*

The five Members of Parliament who have recently spent eighteen days in Egypt have embodied their experiences in a document entitled "Report on the present situation in Egypt." The report itself, however, declares that the tour was restricted to finding the reasons for the substitution of Adly Pasha for Zaghloul Pasha in the negotiations with the British Government. "Was it because the desire of the Egyptians for complete independence was diminished? Was it because Adly Pasha had displaced Zaghloul Pasha for the time being as the most powerful leader of Egyptian opinion? To these two questions and to these two questions only we sought the answers in Egypt." To these all-important questions our tourists very wisely avoid giving a specific answer, although Zaghloul Pasha spared neither money nor trouble to convince them that Egypt could not possibly get on without him. It may, of course, have been that the five Labour Members were in the predicament of the wise men of Gotham who went to sea in a bowl, and if their case had been stronger, their tale would have been longer. Quite possibly, before they reached Egypt, they had discovered that the reason why Adly Pasha and not Zaghloul Pasha headed the second Delegation to London lay in neither of the questions they had set themselves to answer, but in the simple fact that Zaghloul Pasha had refused to accept the responsibility of office, and then had refused to serve under the Prime Minister on the Delegation. Adly Pasha had not been "substituted" for Zaghloul Pasha; the latter of his own accord, whether from moral weakness or pique, had eliminated himself.

### *The Tourists' Recommendations.*

Having informed a fellow passenger on board the steamer on their way to Egypt that three weeks would be a wholly inadequate time within which to become acquainted with conditions in an English coal-mine, Zaghloul's five guests are a little uneasy in mind as to their claim to have gained an adequate knowledge of Egypt and of the views of the people in eighteen days. But they meet criticism with an analogy, and imagine visitors to England being "bear-led" and "spoon-fed" (these terms are implied, not used) with the same persistency as themselves, and they very rightly come to the conclusion that the visitors to England, having to choose between the rival claims of, let us say, Mr. Ramsay Macdonald and Mr. Clynes to be regarded as the idol of the Labour Party, would also give their vote to the man who had been their host and always at their right hand instead of to the unseen rival who had done nothing for them. For the rest, they state: "We returned from Egypt with our views unchanged and our belief unimpaired," and the solution of the Egyptian question, we are told, depends on the application of certain recommendations that they enunciated before the went to the country, and the salient points of which had already been laid down by Lord Milner. This seems a little unkind to Zaghloul Pasha and a poor return for his lavish outlay. The only consolation he has is in a further recommendation, which would give, as the proposers and he himself imagine, the leader of the extremists a chance of obtaining the post of Prime Minister which he rejected before. Of conditions in Egypt the "Report" says nothing. It is equally reticent as to the authors' opinion of Zaghloul Pasha. In this the Labour Members, who after all are no fools, show their shrewdness; for Zaghloul Pasha has sacrificed any reputation for statesmanship that he had through his pursuit of a personal quarrel with an abler man than himself, and it is wiser on the part of his guests merely to record that organised crowds shouted "Long live Zaghloul Pasha,' and to leave it at that.

### *Our Force in Irak.*
